Applications include central file extract for local decision support, interaction between local and central electronic mail systems, access to host applications and data bases via 3270 emulation capability, centralized management of workstation software distribution, report distribution and sharing and data entry upload.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984

CULLINET SOFTWARE, INC.

☐ **Goldengate Information Link**
Provides transparent access to information in Cullinet's ICMS on mainframe. Downloads mainframe data into various PC formats including ASCII, DIF, Lotus 1-2-3, Symphony, dBASE II and dBASE III. Provides electronic mail facility for ICMS users. Requires ICMS.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 11,000 since 1985 ☐ Cost: $195-$300

☐ **Infogate**
Provides PC users with transparent access to mainframe information in Cullinet's Information Center Management System. Upload/download capability of data tables and DOS files. Allows for translation between various PC file formats. Provides electronic mail facility for ICMS users.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1986 ☐ Cost: $300

The Most Powerful LAN Fits on a Disk.

Network Power. You knew that someday there would be a powerful LAN that didn't need old-technology network boards. It would be fast, easy to install, and run 99% of PC-DOS software. It would be expandable, provide remote access, password-protection, and enable you to use inexpensive terminals as workstations in a PC-DOS environment.

Dream no more, because the power is here.

Its name is LANLink™

A Software-Driven LAN Powerful Enough To Use RS-232 Ports for Network Communications. In development for over three years, LANLink™ represents the next generation of local area networks. All of the logic which has traditionally resided on network boards is on LANLink's Satellite and Server Diskettes.

No additional hardware is required. Inexpensive serial ports replace "Kilobuck" Network Interface Boards making installation costs one-third that of a board-driven network.

How To Configure a Smart Network...With Dumb Terminals, But Without Dedicated Servers. Boasting a wide variety of configurations, LANLink™ is most often set up as a "Star" having up to eight satellites connected to a central, nondedicated server. Larger networks can have multiple servers, supporting a total of 73 or more network users.

R-LAN™ (Remote-LAN) gives users the ability to interact with a LANLink™ network in real time via modem. Plus, if MultiLink Advanced™ is run on a Satellite, inexpensive dumb terminals can be used to access network disks, files, and programs.

99% of PC-DOS Applications Run In a Totally-Transparent Network Environment. If you know DOS, you already know how to use LANLink™ COPY transfers files among users, and a 2-drive PC Satellite boots 1-2-3 from the Server's hard disk with the entry c:lotus. Each satellite's access can be limited to specific disks, printers, and sub-directories. A wide variety of software including Lotus 1-2-3, dBASE III, and WordStar 2000 is fully compatible. LANLink™ has a collision-free data transfer rate which exceeds 115,000 BPS.

Power Up Your PCs Today. For complete details and the authorized dealer nearest you, call The Software Link TODAY. The LANLink™ Starter Kit is $495 and includes modules for both a Server and a Satellite. For a limited time, 50 feet of shielded RS-232 cable will be included free of charge. Additional Satellite Modules are only $195, each.

LANLink™ is immediately available and comes with a money-back guarantee. VISA, MC, AMEX accepted.

LANLink™

PCOX Techno From Micro To Main

Now you can open micro-to-mainframe paths to the future.

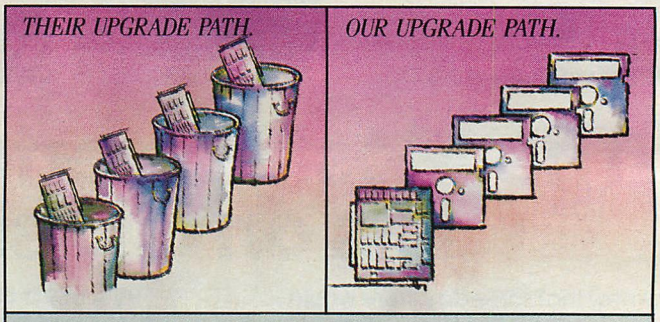
PCOX™ Technology is built on a very simple concept.

Open migration paths.

So you can upgrade products without throwing boards away.

So you can move from one PC to another without learning a new user interface.

So you can write application programs for PCs all over a network, without accounting for dozens of different program interfaces.



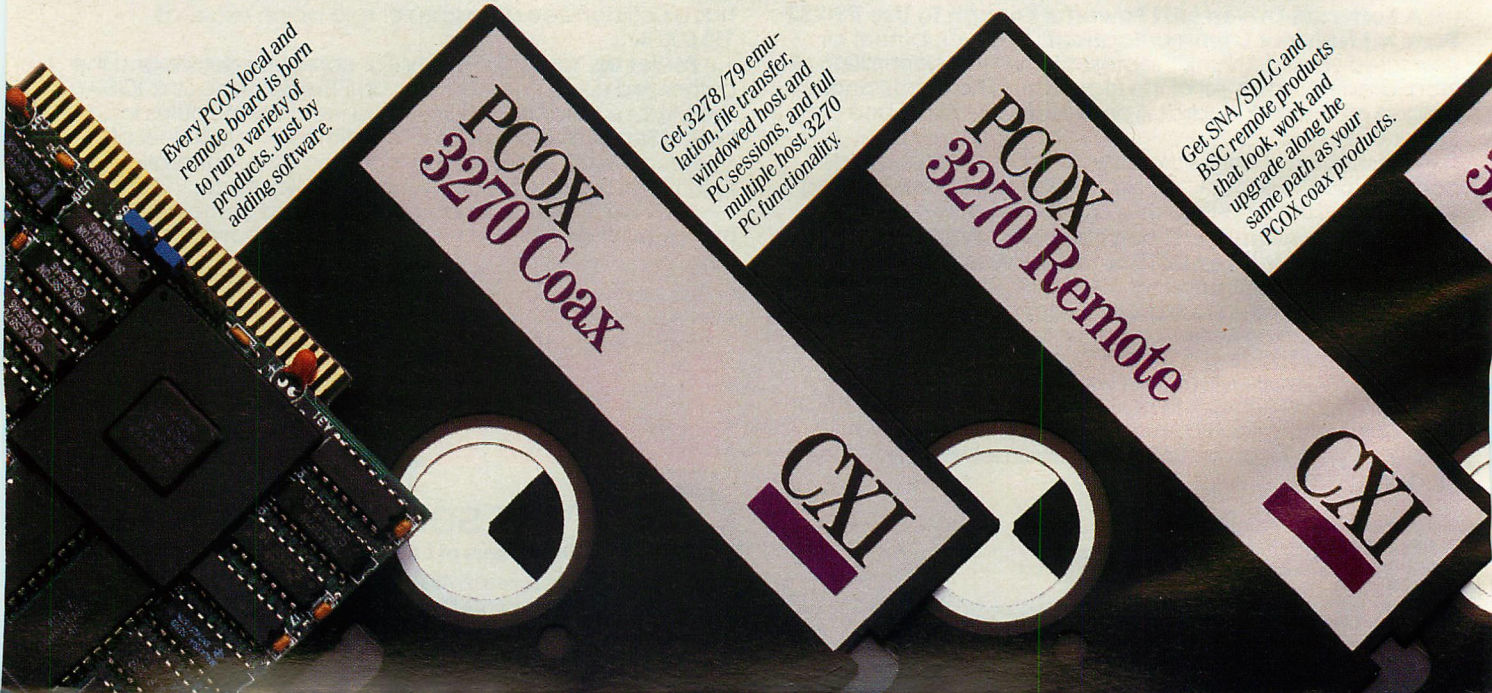
So you can standardize on a system of products that covers all your needs. Local and remote.

Including 3278/79 emulation. File transfer. Windowed PC and host sessions. Multihost 3270 PC emulation. Graphics. Gateways. Even 5250 emulation.

And whatever the future may bring.

No more dead ends.

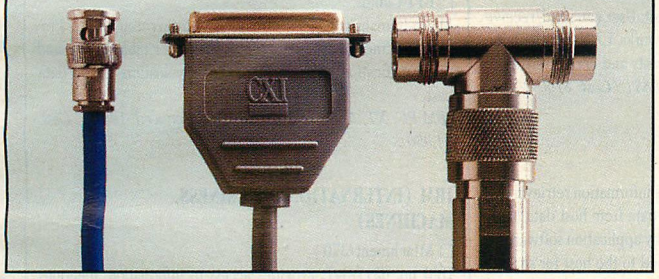
Before PCOX Technology, terminal emulation was something of a terminal disease. About the best a PC could do was imitate a dumb 3270 terminal.



With PCOX Technology, you don't need a new board for every new micro-to-mainframe product. Start with one board and upgrade with software. It's the easier way! And cheaper, too.

Which left the users thirsty for more power. They wanted to interact with corporate data bases. Use multiple host sessions. Get into mainframe graphics. Do *all* this over the phone. Or from a LAN.

This involved other interests, like MIS, DP, PC evaluators and information centers. They needed more than boards. They needed a *system.*



So CXI gave it to them. With PCOX Technology. A modular system of micro-to-mainframe products that helps manage PC demands for mainframe access.

PCOX Technology works wherever PCs want to make mainframe

ogy Takes You rame. And Beyond.

ALL THE WAY THROUGH SNA.
PCOX Technology is dedicated to all the expressions of SNA and LU 6.2, with micro-to-mainframe links for 3270 coax, remote, LAN and 5250 environments.

connections—clustered around a controller, ganged up in a LAN, or isolated on the far ends of phone lines.

And PCOX Technology is open to the future. Which means it's ready to follow SNA wherever IBM® takes it, including all the future destinations of APPC and LU 6.2.

So your 3270 and 5250 networks can evolve without making your investments extinct.

All your favorite programs.

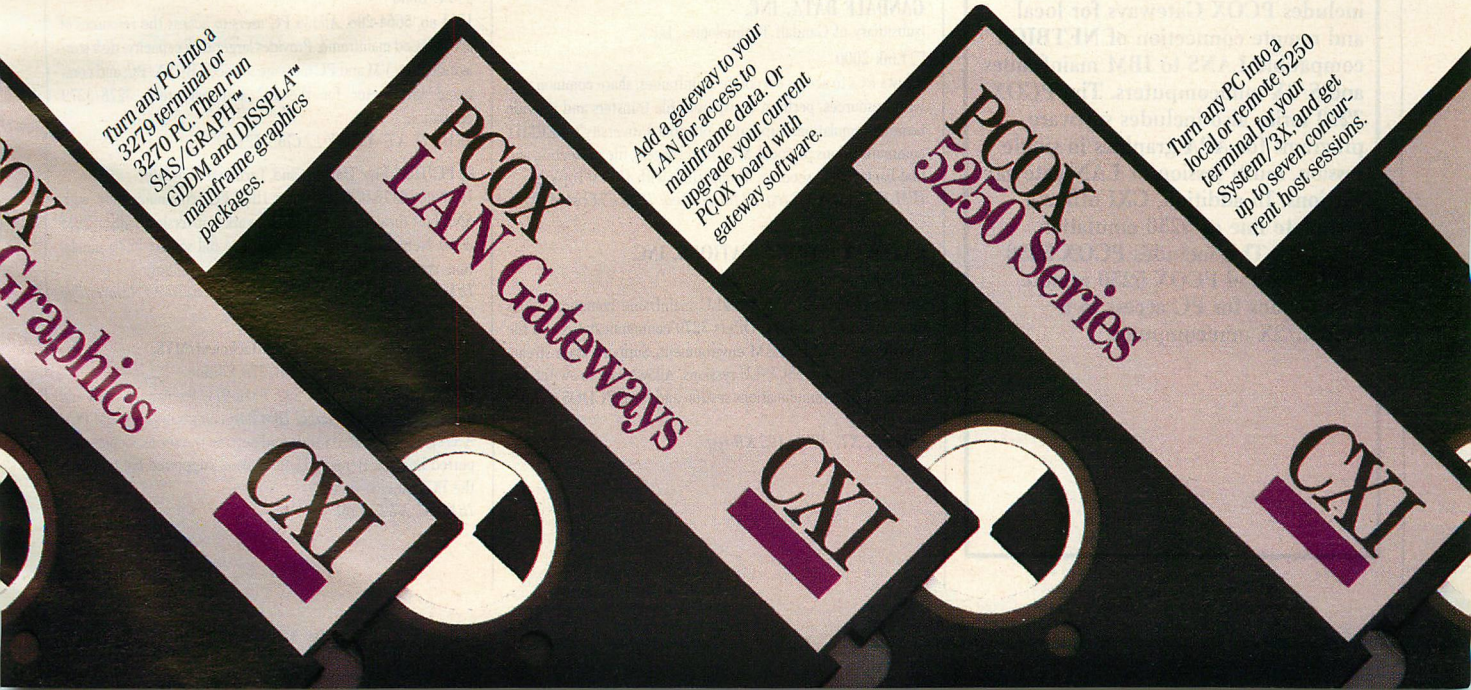
Just about any micro-to-mainframe application program written for CXI, IBM or IRMA™ will run on the PCOX system.

That includes programs from IBM, SAS, Cullinet, Micro-Tempus, Cincom, Tangram, Sterling Software and others.

And every PCOX product uses the same application program interface (API). So any application program written for PCOX in a local environment will also run in PCOX remote and LAN environments.

Which makes PCOX a perfect environment for application developers, too.

Call now to order a PCOX Technology brochure. Ask for the name of your nearest PCOX distributor. And see why terminal emulation doesn't have to be terminal any more. Call:



800-225-PCOX.
In California, call 415-424-0700.

CXI, INC.
SEE AD ON PAGES 266/267

☐ **PCOX/File Transfer and PCOX/Send-Receive**
Allows file transfer from IBM PC and PC compatible micros to IBM mainframe running TSO or VM/CMS. Features terminal, file transfer and maintenance modes, screen save file name specification and SPF-style information entry panels.
IBM PC, AT, XT ☐ 192 KB req. ☐ Introduced: 1983 ☐ Cost: $100

DATA RESOURCES, INC.
(subsidiary of McGraw-Hill, Inc.)

☐ **PC Gateway II**
Links micros with DRI's mainframe-based financial and economic data bases. Requires Hayes, Racal-Vadic or Penril modem. Accepts data in PRN, DIF, WKS, SAL, ESP, FCS, WUF, TSD and MDL formats.
IBM XT, AT ☐ 256 KB req.

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ **IRMAlink FT/CMS**
Assigns transfer definition based on file name entered by user. Handles text and binary files. Supports sequential and partitioned data sets with fixed and variable record formats. Supports international character sets. Includes IRMA board.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $75-$125

☐ **IRMAlink FT/TSO**
Transfers data through 3270 communications network. Allows user to create and store additional transfer definitions. Supports sequential and partitioned data sets with fixed and variable record formats. Includes IRMA board.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $75

☐ **IRMAlink FT/3270**
Works with IBM's host-based file transfer system to allow the transfer of files to and from a mainframe operating in TSO, CMS, or CICS environments. Interfaces Profs PCC and PS/PC.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $115

CXI, INC.
3606 West Bayshore Road
Palo Alto, CA 94303-4229
800-225-PCOX; In California, 415-424-0700
Telex: 821945

CXI's PCOX product line includes a full range of 3270 emulation products for IBM and compatible PCs. This includes PCOX Gateways for local and remote connection of NETBIOS compatible LANS to IBM mainframes and S/3X minicomputers. The PCOX 3270 series also includes software programs for APA graphics in single session, multi session or LAN gateway versions. In addition, CXI offers a complete line of 5250 emulation products. This includes PCOX 5250 TWINAX and PCOX 5250 remote connections for PC access to a System/3X minicomputer.

☐ **PC/3278 FT/CMS**
Transfers data through 3278 communications network. Assigns transfer definition based on file name entered by user. Handles text and binary files. Supports sequential and partitioned data sets with fixed and variable record formats. Supports international character sets and keyboards in Danish, German and Austrian. Includes IRMA board.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $1,195

☐ **PC/3278 FT/TSO**
Transfers data through 3278 communications network. User can create and store additional transfer definitions. Supports sequential and partitioned data sets with fixed and variable record formats. Supports 3270 keyboards in Danish, German and Austrian. Includes IRMA board.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $1,195

DTSS INC.

☐ **Datapass**
Micro-to-mainframe file transfer and terminal emulation. Provides log-in sequence for access to host. User can send/receive single/multiple files across public networks, LANs or telephone lines. User can monitor transfer requests and correct errors.
IBM PC ☐ Copies sold: 500 since 1983 ☐ Cost: $160

ESI

☐ **Micropulse**
Fourth generation micro to mainframe information retrieval system. Allows users to extract selected data from host data bases and download formatted data for use by application software on micros. Processed data can be returned to the host for sharing with other users. Interfaces to ESI's Datapulse, Genpulse and Impulse.
IBM PC ☐ Copies sold: 50 since 1984

FEL COMPUTING
(division of FEL Industries, Inc.)

☐ **Mobius**
Transparent micro to host integration. Provides task-to-task communications, task definition facility that manages sequences of interactions between host and micro, and VT100 emulation with menued set up, color choices, automatic capture, scripting, auto-dialing and auto-log in. Supports async ASCII communication and Ethernet.
IBM PC, XT, AT ☐ Cost: $250

FLAGSTAFF ENGINEERING

☐ **File Connection**
Allows 8" diskette file exchange between PCs and most micro/mini/mainframe computers. Supports read/write capabilities.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 4,000 since 1982

GANDALF DATA, INC.
(subsidiary of Gandalf Technologies, Inc.)

☐ **Link 2000**
Allows PCs to access corporate mainframes, share common network resources, perform transparent file transfers and provide terminal emulation. Supports Columbia University's KERMIT communications protocol. Multi-level access, file protection and dial-back access security. Compatible with IBM's TopView.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $195

GATEWAY COMMUNICATIONS, INC.

☐ **G/SNApc 3270**
Provides single-user SNA/SDLC mainframe communications by emulating IBM 3274. Offers 3270 communications and file transfer in VTAM/TCAM environment. Supports data stream compatibility and SSCP-LU sessions. Allows user to switch between 3270 communications session and local PCDOS or LAN program.
IBM PC, XT, AT ☐ 192 KB req.

☐ **G/SNApc 3770**
Provides single-user, PC-to-mainframe 3770 RJE emulation with file transfer. Supports 1-5 logical units. Communicates in JES or Power mainframe environment. Allows user to switch between 3770 communications session and local PCDOS or LAN applications.
IBM PC, XT, AT ☐ 192 KB req.

GENERAL ELECTRIC INFORMATION SERVICES CO. (GEISCO)
(subsidiary of General Electric Co.)

☐ **Mark III Professional Workstation**
Full-screen PC to mainframe communications. Provides flow controls, editing, print spooling and file transfer.
IBM PC ☐ Cost: $100 per package

GOLDATA COMPUTER SERVICES, INC.

☐ **BPI-Comm**
Micro-to-mainframe link. Applications are written on PC. Provides routines to send data to mainframe for table lookup and data verification. Does not require downloading entire data base.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $4,950

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **Attachment/370+**
IBM no. 6317-047. Provides access to information, functions and facilities of mainframe host including file transfer, execution of host procedures and virtual disk. Provides Personal Decision Series user interface and Extend/370 (EZ-VU Runtime Facility interface).
IBM PC, XT, AT, 3270-PC, 3270-AT ☐ Cost: $300

☐ **Host Data Base View**
IBM no. 6466-998. Accesses host data from PC, transparently. Reformats host data for use with such PC products as Lotus 1-2-3 and Symphony, dBASE II, Multiplan and IBM's Personal Decision and Filing Assistant Series. Interfaces to IBM's QMF, TIF and InfoCenter/1.
IBM PC, XT, AT ☐ Cost: $395

☐ **Mainframe Communication Assistant**
IBM no. 6024-140. Runs under IBM's TopView with full windowing. Uploads or downloads files. Supports check sum and sequence checking on transferred data. Includes facilities for user exits and extensions. Saves up to 30 screens for later review.
IBM PC, XT, AT, Portable PC, PCjr, Convertible ☐ 128 KB req. ☐ Cost: $199

☐ **PC Bond**
IBM no. 5664-298. Allows PC users to access the resources of a VM-based mainframe. Provides larger disk capacity, disk storage sharing, VM and PC message services, REXX/PC, and command interpreter for the PC and full-screen 3278/3279 emulation.
IBM PC, XT, XT/370 ☐ Cost: $2,000

☐ **PC/Host File Transfer and Terminal Emulator**
IBM no. 6476-052. Supports IBM PCs communicating with SNA host through IBM 3708 Network Conversion Units or IBM 3710 Network Controllers. Provides full-screen 3270 emulation, status-line support and 4-color or highlighting.
IBM PC, XT, AT, Portable PC, 3270-PC, 3270-AT, Convertible ☐ Cost: $200

☐ **Personal Decision Series - Attachment/MVS, Attachment/VM, Attachment/370 Edition**
IBM no. 5665-336, 5664-290, 6316-971. Exchanges tasks and information between larger IBM host computers and IBM PCs. Accesses data created inside and outside the series. Copies supported host file types to Data Edition supported file types on the PC and vice-versa.
IBM PC, XT ☐ Cost: $200

☐ PROFS/PC2 (PROFS Personal Computer Connection to VM)
IBM no. 6410-984. Extends PROFS functions to the IBM PC. Transfers incoming mail and other business information to PC for standalone processing. Results can be transferred to the system for processing or distribution to other system users. Documents transferred to PC for printing.
IBM PC ☐ Cost: $200

☐ VM Bond
IBM no. 6317-007; 6467-022. Includes message reception services, 3278/79 terminal emulation, REXX/PC command interpreter and VM-host command services. Allows PC to PC binary and text file transfer to PCs on the same or different VM-host connection. Provides for storage of sensitive PC data on VM host.
IBM PC, XT, AT, XT/370, AT/370 ☐ 256 KB req. ☐ Cost: $125 (6317-007); $250 (6467-022)

☐ 3270-PC File Transfer Program
IBM no. 5664-281; 5665-311. Transfers files from a host to a workstation for off-line data manipulation, updating, or correction, or transfers and stores local data in the host system.
IBM PC, XT ☐ Cost: $600

INFORMATION RESOURCES, INC. (IL)

☐ EXPRESS-Mate
Async communications allowing users to join IBM PC with EXPRESS. Enables PC to become workstation. Features log-in to mainframe, scrolling and local editing. Enables EXPRESS to communicate with micro programs including Lotus 1-2-3, Symphony, dBASE II, and WordStar.
IBM PC ☐ 192 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $295

INFORMATION TECHNOLOGIES, INC.

SEE AD ON PAGE 271

☐ LinkUp 3270 ITF Gateway System
Links PCs to LAN and IBM host computer. Communicates with mainframe as multi-session 3270 terminal using SNA or BSC emulations. Dynamic device data area allocation, background printer and file access, printer spooling, and high-level language application program interface. Supports user-written device handling.
IBM PC, XT, AT ☐ Cost: $1,995

INSTANT INFORMATION, INC.

☐ Instantcom XWorld
PC to PC and PC to mainframe communications. Includes autologon and auto-answer for unattended file receipt. Provides simultaneous bidirectional file transfer with error checking. Built-in word processor. Handles information retrieval, file transfer and messaging services.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,500 since 1986 ☐ Cost: $120

INTELLIGENT TECHNOLOGIES INTERNATIONAL CORP.

☐ Async Exchange
Provides communications between PCs and async mainframes. DEC VT100/52 emulation.
IBM PC ☐ 128 KB req. ☐ Cost: $150

☐ Bisync Exchange 3270
Allows bisync PC to mainframe communications. Emulates IBM 3274, 3278/9 and 3287.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $795

☐ File Exchange
Supports bi-directional transfer of data over coax or modem connections between PCs and mainframes running CICS, TSO and CMS applications.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $295

INTERACTIVE IMAGES, INC.

☐ Easel
High-level language that allows developers to build and provide PC-based front-ends for remote mainframe applications. Provides communication for interaction and data transfer, and hires color graphics for building icons and business graphs. Supports touch screen, mouse or keyboard.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 25 since 1984

INTERCOMPUTER COMMUNICATIONS CORP. (ICC)

☐ Honeymate
Interfaces to Honeywell mainframes.
IBM PC

☐ Hostmate
Interfaces with Burrough's Hostlink to allow multi-user data and file sharing between mainframe and micro. Stores micro files in special area in mainframe. Provides several levels of file security.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1 since 1985 ☐ Cost: $245

☐ Intercom Series
Allows users to perform terminal emulation and file transfers. Uploads and downloads files between IBM PC and Burroughs and Sperry mainframes. Includes Xtract II which downloads Burroughs mainframes to IBM PC and into spreadsheet format, word processing or data bases.
IBM PC ☐ Copies sold: 700 since 1983

☐ LanMate
Links most PC networks to mainframe computers, allowing both horizontal and vertical data transfers. Provides distributed data processing.
IBM PC ☐ 192 KB req. ☐ Introduced: 1985

☐ Link
Allows micro to mainframe file transfers. Assigns data security structures. Stores micro files in mainframe.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2 since 1985 ☐ Cost: $4,900

☐ Xtract I and Xtract II
Allows mainframe data to be used on micro. Compatible with such programs as Lotus 1-2-3, WordStar and Multiplan.
IBM PC ☐ Copies sold: 8 since 1984 ☐ Cost: $1,000-$3,900 (Xtract I); $6,000-$12,000 (Xtract II)

LINKWARE CORP.

☐ Linkware: Information Server
Places intelligence on each node of the information network to facilitate access, transfer and transformation of information. Allows user to place host production data in a central staging area where authorized PC and terminal users can access data. Offers option of transforming data to popular PC application formats.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $15,000

☐ PC Connection
Communicates with Linkware's file server application on the mini or mainframe host computer. Provides PC connection in conjunction with Linkware's Information Server. Includes file transfers, file maintenance, terminal emulation and emulation based interfaces.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $15,000

LOTUS DEVELOPMENT CORP.

☐ Symphony Link
Utilizes 3270 networking resources and protocols. Transfers files to and from VM/CMS and MVS/TSO operating environments. Integrates mainframe applications into personal computer applications.
IBM PC

☐ T-A-C (The Application Connection)
Provides connections between mainframe 4GL data bases, statistical packages and PC spreadsheets and data base applications. Generates fourth generation code. Allows PC users to extract/update information residing within information center data bases. Cross-loads data into multiple mainframe data bases including SQL/DS and SAS.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1986 ☐ $180

MACKENSEN CORP.

☐ File Transfer System
Allows files to be transferred between IBM PC and mainframes running TSO, CICS, IMS, IDMS and CMS. Works with coax-attach and RS-232C-attach 3270 emulation products. Features include data transfer rates of 3,700 cps and a user interface.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 4,869 since 1983 ☐ Cost: $295

MARTIN MARIETTA DATA SYSTEMS

(operating company of Martin Marietta Corp.)

☐ LinkIT
Async PC-to-PC or PC-to-mainframe communcations program with unlimited information format and that can simultaneously send, receive, edit and print. Screen editor and split screen operation.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,250 since 1983 ☐ Cost: $100

☐ PCmainframe
Allows downloading and uploading between PCs and central host IBM mainframes. Selectively extracts, summarizes and transmits condensed mainframe files to the PC in format usable by popular PC software.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 70 since 1984 ☐ Cost: $300

☐ Unison
Desktop information processing. Includes word processing, spreadsheet, graphics and file management standalone modules. Accesses RAMIS II. Provides transparent mainframe/PC communications, fourth generation language, access control, windows, downloading/uploading and electronic messaging.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985

☐ Unison RAMLink
Connects relational RAMIS II DBMS for the mainframe with a number of PC software packages. Data transfer from the mainframe to PC is requested by adding a transfer phrase to a standard table request. Reformats data for Lotus 1-2-3 and IT Software's KeepIT.
IBM PC, XT, XT/370 ☐ 192 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $185

☐ VIRTUALink
Provides PCs with virtual disk storage and information sharing among other PCs and host.
IBM PC ☐ Cost: $150

MASTERLINK

☐ Handshake Plus
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $495

MCCORMACK & DODGE CORP.

☐ Interactive PC Link
On-line, ad-hoc single, multiple or direct query capability, executed from the micro allows real-time selection of specific information from M and D mainframe application files. Users can manipulate selected data at the micro level with Lotus 1-2-3.
IBM PC ☐ 256 KB req. ☐ Copies sold: 400 since 1983

☐ Remote PC Link
Operates through all common carriers, including public switched telephone lines and leased lines. Access is accomplished by a dial-up to the host site by modem-to-modem connection. The user can query information for on-line reporting or download selective mainframe data to the PC.
IBM PC ☐ Introduced: 1985

MCDONNELL DOUGLAS INFORMATION SYSTEMS GROUP

(component of McDonnell Douglas Corp.)

☐ PC-Tel
Performs async communications, plus text and binary file transfer between PC and host computers. Performs PC to PC file transferring, printing, and PCDOS commands while connected to a host computer. Command file facility.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $195

the linkup™ connection

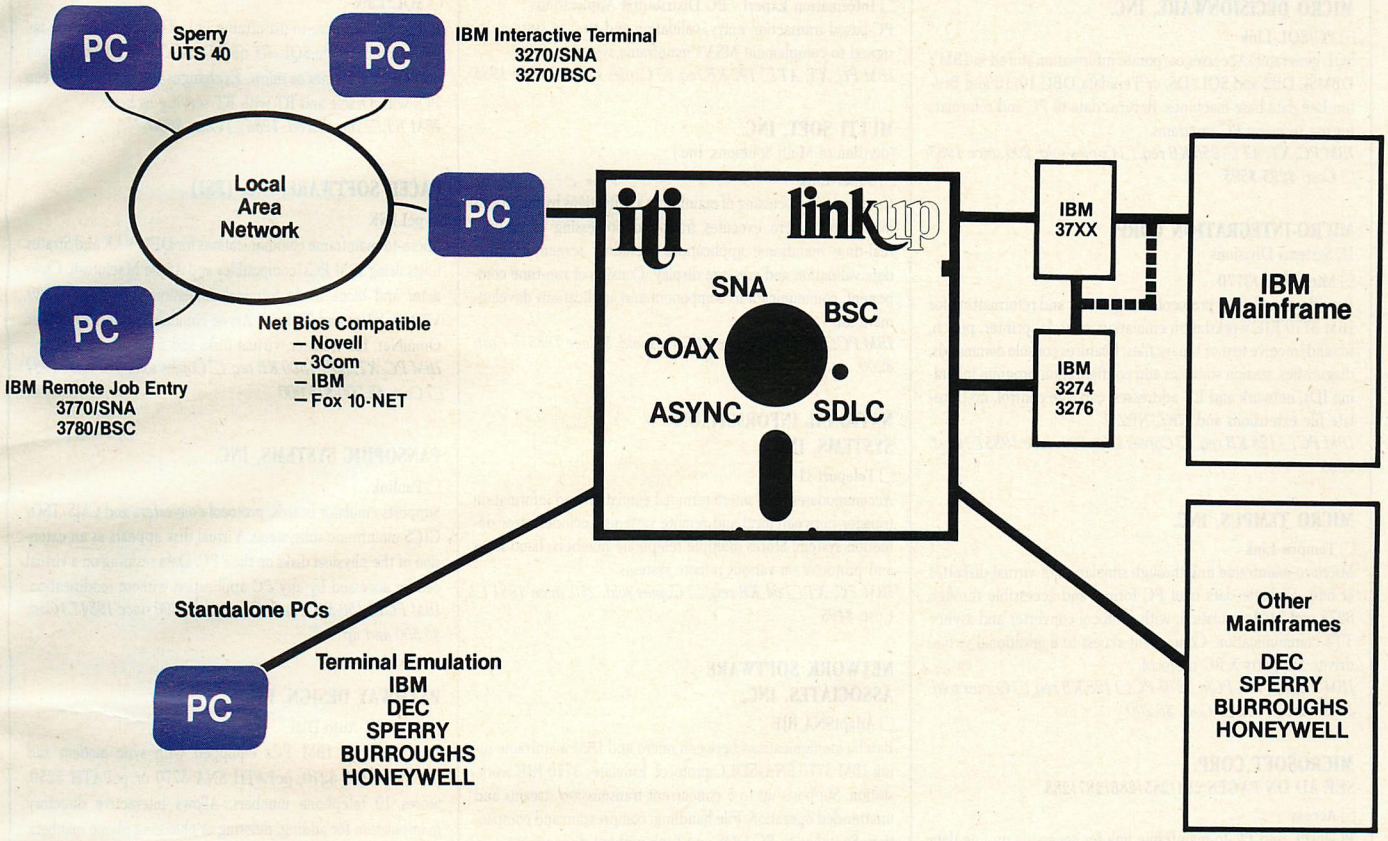
Advanced micro-to-mainframe solutions

PC - Data Communications

When you're using the LinkUp System approach...
...the system always appears the same to the user!
And that holds true for...
...intelligent (coprocessor) or non-intelligent hardware,
...standalone, LAN/Gateway or remote,
...file transfer - whether SNA or BSC, or Coax,
...and API - standard to all applications,
because the software modules are designed to fit within a standardized architectural framework.

SOFTWARE

LinkUp systems from Information Technologies, Inc. support the following terminal emulations:



TERMINAL MANUFACTURER	EMULATION
IBM	• 3274/3276 SUPPORTING SNA/BSC WITH 3278, 3279 MODEL 2 DISPLAY TERMINALS • 3286, 3287, 3289 PRINTERS ATTACHED • 3275/BSC TERMINAL • 3770 RJE/SNA TERMINAL • 2780/3780 RJE/SNA TERMINAL • 2780/3780 RJE/BSC TERMINAL
DEC	• VT52 • VT102 • VT100 • VT220
BURROUGHS	• MT900 SERIES, INCLUDING MT983, 993 • TD800 SERIES, INCLUDING TD832
HONEYWELL	• VIP: 7700 7700R 7705 7705R 7705W 7804 7805 7814
SPERRY	• UNISCOPE: 100 200 • UTS: 20, 40, 400

HARDWARE

These versatile, general purpose adapters, when coupled with Information Technologies' array of modular communications software packages and emulations, allow the use to connect the PC to virtually any other computer with communications capability. **MODEM-CONNECT LinkUp ONE:** onboard coprocessor with 56K memory to handle continuous data throughput to 19.2Kbps* and off-load real time data communication CPU requirements from the PC. **LinkUp XT:** a general purpose communications adapter board to handle data rates to 9600 bps* with optional capability to 400Kbps under DMA control.

Flexible, Multiprotocol Hardware • BSC, SDLC, HDLC, ASYNC • Optional plug-in interface adapters for varied communication requirements are RS 232, RS 422/449, RS 423/449, RS 485, MIL STD 188, Other on request, **COAX-CONNECT LinkUp COAX:** 3278/79 COAX (IRMA Compatible)

"IRMA" is a registered trademark of Digital Communications Associates, I

ADAPTABILITY

Change from BSC to SNA with a simple software upgrade. Run both 3770 SNA/RJE station and 32 sessions of IBM 3270 (displays and printers) in the background along with a DOS application in the foreground.

RECOVERABILITY

If the link goes down while you're using LinkUp, you may keep working at your PC, and—when the link comes back up, your system is ready and waiting ... no need to reboot.

PRINT CONTROL CAPABILITY

Information Technologies offers a dedicated, high speed printer support facility and print spool capability.

LinkUp Speedprint software, operating in the background, is able to transmit data from an application or from disk to a high speed printer via a dedicated serial port with data rates up to 19.2Kbps—the equivalent of 1,200 Lines Per Minute.

LAN/GATEWAY SUPPORT

With the addition of LAN interfacing modules, the LinkUp 3270 SNA/BSC Interactive Terminal Facility (ITF) now runs on a Local Area Network (LAN). The ITF subsystem provides an advanced data communication link between PCs attached to a LAN and an IBM (or compatible) host computer. You can have SNA and BSC working together in the same LAN System. Multiple gateways on the LAN give you access to more than one host.

FILE TRANSFER

Two file transfer programs are available, one interfacing with the TSO or CMS editor and one that works with the IBM 3270 PC host-based file transfer under TSO, CMS or CICS.

APPLICATION PROGRAM INTERFACE (API)

The API allows you to integrate your own programs and directly use the communication capabilities of the 3270 SNA, 3270 BSC, 3770 SNA and 3780 BSC emulations. The 3270 API and RJE API support a command structure similar to IBM's LU 6.2 Advanced Program-to-Program Communication (APPC).

LinkUp... an investment in reliable, upgradable assets for today and tomorrow.

iti® INFORMATION TECHNOLOGIES INC.

MICRO DECISIONWARE, INC.

☐ PC/SQL-Link

SQL generator. Accesses corporate information stored in IBM's DBMSs, DB2 and SQL/DS, or Teradata DBC 10/12 and Britton Lee data base machines. Returns data to PC and reformats for use in many PC programs.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $295-$595

MICRO-INTEGRATION CORP.

IE Systems Divisions

☐ Micro-SNA/3770

Provides translation, protocol management and reformatting for IBM 3770 RJE workstation emulation, console, printer, punch, to send/receive text or binary files. Features console commands, diagnostics, session statistics and configuration program including IDs, network and LU addresses, carriage control, no-translate file extensions and NRZ/NRZI.

IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $695

MICRO TEMPUS, INC.

☐ Tempus-Link

Micro-to-mainframe link through simulation of virtual diskettes at host. Diskette data is in PC format and accessible through 3278 and 3101 emulation, with protocol converter and async/TTY communication. Concurrent access to 8 additional virtual drives. Supports X.PC protocol.

IBM PC, XT, AT, PCjr, 3270-PC ☐ 128 KB req. ☐ Copies sold: 1,800 since 1982 ☐ Cost: $6,200

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Access

PC-to-PC and PC-to-mainframe link for accessing on-line data bases, information retrieval systems and electronic mail facilities. Interfaces with Dow-Jones News/Retrieval, CompuServe, EIS, NewsNet and the Official Airline Guide, MCI Mail and EasyLink.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $250

THE MOM CORP.

☐ PC/COM - BL

Baseline CICS cooperative processing. Defines fields, records and files in CICS from PC, which can be selected, sorted and reported on mainframe and transferred to PC. Specifies extraction logic on PC and host. Defines fields as character, packed or binary.

IBM PC ☐ Cost: $595

☐ PC/COM - FT

Host communications interface. Text and binary file transfer. File management. Runs from menu or command level DOS. Builds batch file to run series of file transfers with date and time control. Audits transfers.

IBM PC ☐ Cost: $395-$495

MOTOROLA COMPUTER SYSTEMS, INC.

(member of the Motorola Information Systems Group)

☐ MFE-Central

Allows IBM PCs and async terminals to communicate with a mainframe through Motorola/Four Phase System's Series 4000/5000 minis. Includes password, user ID and dialback security features. Supports 16 PCs or combination of local and remote PCs and async terminals.

IBM PC ☐ Cost: $2,000

MSA (MANAGEMENT SCIENCE AMERICA, INC.)

☐ Information Expert - ExpertLink

Permits data base sharing. Supports downloading and uploading. Allows transferring of individual fields and specific key ranges. Universal Interface feature downloads into Lotus 1-2-3, Symphony, dBase, VisiCalc and DIF.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 500 since 1982

☐ Information Expert - PC Distributed Applications

PC-based transaction entry, validation and storage system designed to complement MSA's mainframe systems.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 50 since 1985

MULTI SOFT, INC.

(division of Multi Solutions, Inc.)

☐ Super-Link

Cooperative processing of mainframe applications by micro and mainframe. Micro executes front-end processing of on-line, real-time mainframe applications including screen imaging, data validation and message display. Consists of run-time component, communications component and applications development kit.

IBM PC ☐ 30-256 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $200

NATIONAL INFORMATION SYSTEMS, INC.

☐ Teleport II

Accommodates local micro terminal emulation and information transfer between local and remote systems. Includes error detection system. Stores multiple telephone numbers, baud rates and protocols on various remote systems.

IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 250 since 1981 ☐ Cost: $495

NETWORK SOFTWARE ASSOCIATES, INC.

☐ AdaptSNA RJE

Batch communications between micro and IBM mainframe using IBM 3770 SNA/SDLC protocol. Emulates 3770 RJE workstation. Supports up to 5 concurrent transmission streams and unattended operation. File handling, compression and compaction. Switches to PC-DOS and back without disconnect.

IBM PC, AT, XT ☐ 192 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $585

OCEANIC INFORMATION SYSTEMS, INC.

Software Division

☐ Link/XL

Upload/download transfer capabilities and security. Reads and writes files residing on mainframe. Extracto users can read files on micro's virtual diskettes and write files on virtual diskettes used by micro.

IBM PC, XT, XT/370, PCjr ☐ Introduced: 1985 ☐ Cost: $6,200

ON-LINE BUSINESS SYSTEMS, INC.

☐ EXCELLINK

Offers IBM 3278-2 terminal emulation through PC serial port. Transfers files on PCs to IBM hosts through coax connections provided by IRMA and other 3278 emulation boards. Formats files to be sent into packets of up to 1kb. Provides 16-bit CRC.

IBM PC ☐ 64 KB req. ☐ Copies sold: 125 since 1982 ☐ Cost: $9,500

ON-LINE SOFTWARE INTERNATIONAL

☐ Free-link Micro/Mainframe Link

Micro-to-mainframe link. Features file transfer, data reformatting, customized capabilities for menus and functions, virtual disk facility, context-sensitive help and English syntax query language for selective file transfer downloads.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 700 since 1985 ☐ Cost: $495

ORACLE CORP.

☐ Easy*Link

Full-screen, point-and-select interface to Oracle's micro-to-mainframe intelligent link.

IBM PC

☐ SQL*Link

Bidirectional micro-to-mainframe link. Transfers data base information between SQL/RT on RT and Oracle DBMS running on PCs, mainframes or minis. Exchanges information between PCs with Oracle and RT with RT serving as host.

IBM RT ☐ Introduced: 1986 ☐ Cost: $600

PACER SOFTWARE, INC. (PSI)

☐ pcLINK

Micro-to-mainframe communications for DEC VAX and Stratus hosts using IBM PCs/compatibles and Apple Macintosh. Character and block mode terminal emulation including VT220, VT240, V102 and TVI950. Async communications, EtherNet, OmniNet, file transfer, virtual disks and print services.

IBM PC, XT, AT ☐ 500 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $2,000-$15,000

PANSOPHIC SYSTEMS, INC.

☐ Panlink

Supports emulator boards, protocol converters and CMS/TSO/CICS mainframe subsystems. Virtual disk appears as an extension of the physical disks on their PC. Data residing on a virtual can be accessed by any PC application without modification.

IBM PC ☐ 150 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $6,500 and up

PATHWAY DESIGN, INC.

☐ pcPATH Auto-Dial

Dials host for IBM PCs equipped with sync modem and pcPATH SNA 3270, pcPATH SNA 3770 or pcPATH 5250. Stores 10 telephone numbers. Allows interactive directory manipulation for adding, deleting or changing phone numbers.

IBM PC

PEGASUS SYSTEMS, INC.

☐ PSi3270

IBM 3270 BSC and SNA/SDLC emulator for micro to mainframe networks. Provides a programmable interface utilizing BASIC. Utilizing a TeleVideo PM/16 controller, IBM PCs with IBM compatible devices can be attached in a multi-user environment. Supports 15 workstations per controller.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $10,000

PHASER SYSTEMS, INC.

☐ VDAM (Virtual Diskette Access Method)

Allows users to store and access data or data bases on a mainframe in PC format. Mainframe audit security and backup applies to each virtual disk. Supports all binary and text files.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 30 since 1984 ☐ Cost: $4,950

RELATIONAL TECHNOLOGY, INC.

☐ Ingres/PCLink

Browses, extracts and manipulates data from Ingres data base via visual query language. Transfers and reformats data for use with PC applications. Includes terminal emulation and bidirectional file transfer. Combines PCs productivities with multi-user DBMS' facilities.

IBM PC, RT ☐ 256 KB req. ☐ Copies sold: 250 since 1985

REMOTE DATA SYSTEMS, INC.

☐ Corporate Tie

A CICS-based file transfer and network control system. Supports both leased line and dial networks with menu-driven Interactive mode or Command mode with programming interfaces. Provides bi-directional transfer of data files between the mainframe and a network of PCs utilizing 3270 protocol.

IBM PC ☐ 64 KB req. ☐ Copies sold: 5 since 1983 ☐ Cost: $7,500

ROSS SYSTEMS, INC.

☐ Maps/Microlink

Bridge between the PC-based spreadsheets and Ross' financial management software. Transfers financial data between PC spreadsheets using DIF formats and centralized, VAX accounting and modeling data bases. Designed to integrate with MAPS/GL and MAPS/MODEL.

IBM PC ☐ 10 KB req. ☐ Copies sold: 14 since 1984 ☐ Cost: $5,000 and up

SATURN BUSINESS SYSTEMS, INC.

☐ SpreadLink

Accesses data stored in a host mainframe or mini for use with Lotus 1-2-3, VisiCalc, Multiplan and dBASE II.

IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $150

SCA PRODUCTS & SERVICES

☐ Gateway PC

Integrates mainframe 4 GL data bases to Lotus 1-2-3 and Symphony interactively or with prewritten scripts. Includes Autopilot script language, file transfer facility, menu manager and terminal emulation/async communications for 3101, VT100, TTY and Xmodem.

IBM PC, XT, AT, 3270-PC ☐ 60 KB req. ☐ Copies sold: 2,000 since 1985 ☐ Cost: $210-$350

SCIENTIFIC AND BUSINESS SYSTEMS, INC.

☐ Streamline/Easywork

Micro-to-mainframe link with mainframe report and COBOL program generator. Transfers data to PC in any PC format requested such as Lotus 1-2-3 or dBASE III.

IBM PC

SOFTWARE AG OF NORTH AMERICA, INC.

(wholly owned operating subsidiary of Software AG Systems, Inc.)

☐ Natural/Connection

Downloads and uploads data files. Converts data files at the PC to the format required for popular PC software packages. Necessary security is provided by the Natural Security System.

IBM PC ☐ 192 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $1,000

SOFTWARE INTERNATIONAL CORP.

☐ Smart Link

Requires IBM mainframe, S/38 or DEC VAX equipped with Software International's GL system. Allows users to extend the data extraction and manipulation resources. Provides live data and does not use any batch processing mechanisms to create a shadow file.

IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $3,500 (Smart Link)

SOFTWARE SYNERGY, INC.

☐ Respond/PC Executive

Enables unattended PC to call and perform data communications tasks with remote micros, minis and mainframes. Schedules tasks to run at specific times with execution proceeding in chronological order. Opens report log file to record task activity as tasks are performed.

IBM PC ☐ 256 KB req. ☐ Cost: $295

☐ Respond/3270 Local (Coax) File Transfer

Transfers files between PC and IBM 43XX and OSs. Host based. Transfers multiple files using command files making it a batch transfer.

IBM PC ☐ 256 KB req. ☐ Cost: $1,000

SOUTHERN COMPUTER SYSTEMS, INC.

☐ Mbridge/B

Provides communications between IBM PCs/compatibles and Burroughs mainframes. Includes terminal emulation and file transfer. Editing capabilities. DOD certified.

IBM PC ☐ 128 KB req. ☐ Copies sold: 1,100 since 1983 ☐ Cost: $195-$295

SPERRY CORP.

Information Systems Group

☐ On-Line Disk

Allows IBM PC applications to share Sperry 1100 mass storage as if locally attached.

IBM PC

☐ On-Line Extract

Allows IBM PC to extract data from Sperry Series 1100, System 11 or MAPPER, and store it in local PC files in ASCII, DIF, CSV (Comma Separated Variable) and Lotus WKS formats.

IBM PC

☐ On-Line Transfer

Sync file transfer between IBM PC and Sperry host.

IBM PC

☐ Personal Information Connection

Allows IBM and compatible PC users to communicate with Sperry 1100 mainframes. Includes file transfer, job submission and interactive terminal support.

IBM PC

STERLING SOFTWARE

Dylakor Division

☐ DYL-VLink

Micro-to-mainframe link, communication subsystem and virtual diskette facility. Supports over 30 communications configurations. Includes DYL-Script module that allows user to store and recall lengthy logon and logoff routines.

IBM PC ☐ Cost: $6,200-$9,800

SYNTAX SYSTEMS, INC.

☐ VAX Interface Manager

Allows VAX or MicroVAX to function as host for network of IBM PCs or compatibles, acting as server for files, electronic mail and print functions. Moves PC files to and from VMS environment.

☐ VIM Subroutine Library

Allows user applications on PC to communicate with applications and processes on VAX. Communications interface uses Ethernet high speed link.

IBM PC ☐ 256 KB req. ☐ Copies sold: 10 since 1986 ☐ Cost: $5,000

SYSTEMATICS, INC.

Software Marketing Division

☐ Gateway/Query

Formulates queries on data residing in host through hierarchy of menus and associated screens. Transmits query to host and downloads requested data to PC. Integrates with Systematics' host-based financial and accounting products.

IBM PC

THE SYSTEMS CENTER

☐ MDM (Micro Data Mover)

Sends files daily to and from mainframes, schedules unattended data transmission and distributes any program information updates to any PC on network. Supports IRMA connections. Requires TSC's NDM-MVS and Corvus' SNA Gateway.

IBM PC ☐ 196 KB req. ☐ Introduced: 1984 ☐ Cost: $500

TESSERACT CORP.

☐ IDL (Intelligent Data Link)

Supports distributed applications, data capture and queries, hybrid applications combining mainframe and micro processing, corporate data storage, and local PC processing. Controls data distribution to PC network. Includes distributed data dictionary, protocols and standards. Interfaces to IMS, IDMS and ADABAS.

IBM PC, PCjr, XT, AT ☐ 256 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $1,000

TORUS SYSTEMS, INC.

☐ 3270 SNA Gateway

Provides 32 Tapestry users access to IBM mainframe. Emulates 3274 cluster controller with 3278 screen emulation. Runs in background.

IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $5,495-$7,495

UCCEL CORP.

Systems Software Division

☐ R:Gate Micro/Mainframe

IBM PC

UCCEL CORP.

Financial Systems Division

☐ Infopoint:Perfect Link

Links mainframe functionality to microcomputer to manage costs, projects, WIP, statistical accounting and daily financial operations. Selective downloading and uploading of data, what-if analysis, updating of data, monitoring of expenses and forecasting. Integrates with UCCEL mainframe applications and VSAM data base applications.

IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 7 since 1984

UNI-COLL CORP.

☐ C-N-COMM

Permits IBM PC to upload/download from IBM mainframe. Includes recovery/restart, terminal emulation, error checking protocol, ability to append data to files and transmit/view records. Requires monochrome or color graphics board and display. For engineering and scientific programs.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $400

UNICON GROUP, LTD.

☐ PC/Louis

Micro-to-mainframe link. Distributes mainframe-resident data to IBM or compatible PC for subsequent processing. Lotus 1-2-3 compatible. Supports async dial up, direct connect and LAN links. Multiple query processing. Immediate or deferred queries. Password protection.

IBM PC

VM PERSONAL COMPUTING, INC.

☐ Relay Gold

Transfers files, exchanges messages and runs other programs concurrently. Script language for automating operations. Transfers files with IBM mainframe running RELAY/VM and RELAY/TSO. Provides hardware-free 3270 emulation with RELAY/3270.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 20,000 since 1985 ☐ Cost: $225

WINTERHALTER, INC.

☐ Applications Interface Module

Includes user-callable library routines that provide interface to mainframe from user-written PC program. Writes applications to send/receive blocks of data using BSC protocol. Available on 3780 BSC, 3270 BSC and 3270 SNA programs. Requires DataTalker PC Plus or DataTalker II.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,000

WOW ENTERPRISES

☐ Missing (Async) Link

Intended for use with IBM's 3101 Emulation Program. Converts CMS and TSO host files to and from the same transmission format as is supported by the FILECONV utility supplied by the IBM program. Conversion data compression, CRC check sum characters and 4-for-3 encoding binary data.

IBM PC, XT/370, AT/370 ☐ 64 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $96

XEROX COMPUTER SERVICES
(division of Xerox Corp.)

☐ **Knowledge Worker**
Downloads and uploads data from production data base to IBM PC. Reformats information for use on PC in planning, modeling and reporting. Works with various spreadsheet programs. Supports DIF, SYLK, dBASE, CSV and ASCII formats.
IBM PC, XT, AT ☐ 250 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $2,500-$3,000

COMMUNICATIONS— NETWORK MANAGEMENT

ACCENT SYSTEMS CORP.

☐ **XNS Protocols (XEROX Network Systems)**
Develops applications for communication among heterogeneous workstations, computers and other devices via one or more LANs. User can name, locate and utilize services in distributed environment. Implements ISO and OSI model. Supports flow control, message routing, error reporting and diagnostic procedures.
IBM PC

ALLOY COMPUTER PRODUCTS, INC.
SEE AD ON PAGE 129

☐ **ATNX**
Network executive system. Allows disk caching for data access. Supports high-capacity hard disk volumes and high-speed interprocessor datagramming communications.
IBM PC, XT, AT ☐ Cost: $295

☐ **MTNX**
Network executive system. Allows disk caching for data access. Supports high-capacity hard disk volumes and high-speed interprocessor communications. Multi-processing and multi-tasking capabilities.
IBM PC, XT, AT ☐ Cost: $395

☐ **NTNX**
Supports applications programs for Novell LANs including data bases and languages. Provides record/file locking controls necessary in multi-user environments. Includes global RAM disk caching for shared disk access.
IBM PC ☐ Cost: $395

☐ **RTNX (Real Time Network Executive)**
Runs on host PC to load user processors with DOS. Includes print spooler.
IBM PC, XT, AT

ALTOS COMPUTER SYSTEMS

☐ **PC Path**
Connects PCs to network. Stores data/programs in password protected partitions. Stores and retrieves data/programs from multiple file servers.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $395

AMERICAN INTERNATIONAL COMMUNICATION CORP.

☐ **Network Navigator**
Networking/management. Host defined session, routing and distribution, audit trails, data conversion, user exits for special processing, invokes host functions transparently to end-user, dial-up communications, automatic recovery, error free file transfer, unattended delayed transmission and support for any type of data.
IBM PC, XT, AT ☐ Introduced: 1985 ☐ Cost: $80,000

APPLIED KNOWLEDGE GROUPS, INC.

☐ **Knowledge Network**
Disk and printer sharing among computers. Creates virtual devices by accessing devices or associated computers on LAN network. Supports printer sharing, file locking and electronic mail.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $99 per node

ARC DATA SYSTEMS, INC.

☐ **PC.25**
Links IBM PCs to other PCs, mainframes or minicomputers via X.25 facilities. Certified on TELENET, TYMNET or UNINET. Supports 32 simultaneous connections. HDLC/LAPB link level protocol. Includes XTERM terminal emulator and XCOPY for file transfer. Operates under DESQview and TopView multitasking environments.
IBM PC, XT, AT, 3270-PC ☐ 64 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $1,350-$1,850

ASHTON-TATE

☐ **dBASE III Plus LAN Pack**
Permits network-only access to dBASE III Plus. Enables 3 additional users to join network.
IBM PC, XT, AT ☐ Cost: $995

☐ **MultiMate for Local Area Networks**
IBM PC

AST RESEARCH, INC.
SEE AD ON PAGES 161/172/173/174/175

☐ **AST-NETBIOS Option**
Adds IBM NETBIOS compatibility to AST LANs. Supports peripheral devices and shares resources. Inter-level task queuing, data pointer passing and communications protocols. Contains 18 user-programmable parameters. Supports node naming, nondedicated servers, electronic messaging and file locking if used with PC network program.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $195

☐ **Network Program**
Provides menu-driven interface to manage LAN and share data files/peripherals using DOS-like commands. Offers server and workstation utilities. Includes electronic mail for communicating with other network users.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1986 ☐ Cost: $75

AT&T INFORMATION SYSTEMS

☐ **StarLAN**
Plug-in board. Network for PCs, workstations and file servers in departmental group. Connects to ISN (Information Systems Network) to gain access to other StarLANs, other PCs, modem pool or mainframes attached to corporate ISN network. Serves 20 to 200 active work stations.
IBM PC

AVANT-GARDE COMPUTING, INC.

☐ **Net/Link**
Network planning and analysis system. Sorts and charts network performance data. Provides statistics including response time, internal time, in/out time, polling latency, transaction/character counts, errors, failures, time-outs and no polls. Creates color graphics. Requires Lotus 1-2-3.
IBM PC ☐ 192 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $10,000

BAILEY CONTROLS CO.
(division of the Babcock & Wilcox Co.)

☐ **Network 90 Operations Management System**
Enables user to monitor, control and modify process conditions in Network 90 system from a personal computer. Provides real-time data needed to support management decisions.
IBM PC, XT, AT

☐ **Network 90 Tool Kit**
Monitors processes controlled by Bailey Controls' Network 90 system. Displays data in bar chart format, saves 500 data points for future reference, and performs remote monitoring via modem or telephone PBX equipment.
IBM PC, XT ☐ 256 KB req.

BANYAN SYSTEMS, INC.

☐ **VINES (VIrtual NEtworking Software)**
Builds department/corporate-wide networks. Shares printers, tape units, disk drives and communications controllers. Provides file sharing, electronic mail, network administration, time/date
IBM PC

☐ **VINES/286**
Converts IBM AT into multi-function network server for WAN, host access, server-to-server communications, resource sharing and NetBIOS support.
IBM AT ☐ 512 KB req. ☐ Cost: $1,895

CAERE CORP.

☐ **SNIP (Scan-Net Interface Program)**
Develops communication applications between Scan-Net network and IBM PC. Provides 1-way and 2-way communication. Includes device driver and 11 programming tools. Supports program development in Turbo, Pascal, IBM Pascal, Microsoft Pascal, Microsoft C, IBM BASIC, RM/COBOL and 8088 Assembly.
IBM PC ☐ 256 KB req. ☐ Copies sold: 32 since 1986 ☐ Cost: $500

COMMUNICATION MACHINERY CORP.

☐ **CCITT X.25 (1984) LAPB (Link Access Protocol Balanced)**
Data link layer protocol. LAPB implemented with extended sequence numbering. Compatible with worldwide public data networks.
IBM PC, AT

☐ **Connectionless Internet**
Internetwork layer protocol. MAP 2.1 compatible network/internetwork addressing and routing service. Supports fragmentation, reassembly and inactive layer subset.
IBM PC, AT

☐ **LLC Class 1 (Logical Link Control IEEE 802.2)**
Data link layer protocol. MAP 2.1 compatible. Point-to-point frame control procedure adaptable to most IEEE 802-class LAN medium.
IBM PC, AT

☐ **PC Netbios**
Session layer protocol. Emulates IBM PC Netbios used in PC network. Compatible with PC network application programs at 5C level. Provides session management and name translation.
IBM PC

☐ **QM100 TCP-IP Protocol**
TCP-IP protocol for local or long haul networks. Includes TCP, IP, UDP, ARP, ICMP, FTP, TELENET and SMTP. Interfaces with Ethernet on X.25 networks.
☐ 16 KB req. ☐ Copies sold: 125 since 1984 ☐ Cost: $20,000

☐ **TCP-IP Upper Level Protocol**
TCP-IP protocol for LAN used on Ethernet. Includes TCP, IP, UDP, ARP, ICMP, SMTP, FTP and TELENET.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 3,500 since 1984 ☐ Cost: $1,000-$6,000

☐ **XNS Upper Level Protocol**
Implements XNS design concept. Provides network devices for electronic mail, virtual terminal and file transfer. Includes internetwork datagram, sequenced packet, packet exchange, rotating information, echo and error protocols.
IBM PC, AT ☐ Cost: $1,200

COMPUTER ASSOCIATES INTERNATIONAL, INC.
Micro Products Division

☐ **EasyPlus Network Manager**
LAN network manager for Computer Associates' EasyBusiness Systems Plus Series under EasyPlus. Allows up to 4 users to share accounting, productivity and data base information.
IBM XT, AT, 3270-PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $395-$595

COMWARE INTERNATIONAL

☐ **File/34-38**
Supports packet-switching networks such as GTE-Telenet, Tymnet, Uninet, Infonet and Autonet. Communicates through Systar's PC Elf and runs in conjunction with Systar's Gateway 34/38. Interactively stores files or retrieves files from the S/34, S/36 or S/38. Includes built-in error checking protocol.
IBM PC ☐ Cost: $750

CONNECTIONS

☐ MNDS
Network design and modeling tool.
IBM PC, XT, AT

CONTEL INFORMATION SYSTEMS, INC.

(subsidiary of Continental Telecom, Inc.)

☐ MIND-Inventory
Controls and plans networks. Provides up to date model of network including equipment, circuits, connections and paths. Interfaces Contel's MIND-Pricer.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $4,950

COSMOS, INC.

☐ Bump Disk
Lets developer add 4 users at a time on LAN to any Revelation-based product. Each system can be bumped any number of times until desired configuration is reached. Each bump disk works only once. Networks include Novell, 3Com, PCNet and Netstar.
IBM PC ☐ Cost: $495

DATEM, LTD.

☐ dDCM 820; dDCM 820/R; dDCM 820/Q
Provides utility routines for developing, debugging and maintaining distributed control networks. Based on Datem's DCM and DCB bitbus compatible products. Controls dDCM 810 device table entries. Supports network configuration mode, Intel-defined RAC task and upload/download of HEX formatted files. Menu-driven.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $499

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ Network Design System
Allows network manager to permanently redefine network configurations that were temporary modifications made under DCA's Network Control Concentrator.
IBM PC ☐ Introduced: 1983 ☐ Cost: $4,995

☐ NMS (Network Management System)
Allows IBM XT or AT to serve as intelligent monitoring/reporting device for Series 300 network processors. Provides data base containing statistical history of network. Calculates graphics. Generates reports including trunk utilization, trunk error rate, port usage summary and connection summary.
IBM XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $9,995-$19,995

DISC

☐ DBL/NetWare
DIBOL superset. Allows DIBOL and DBL based application programs to be ported to MS-DOS, Novell's NetWare, UNIX, XENIX, TSX-Plus, VMS, RSX and RSTS OSs. Includes virtual memory, multi-key ISAM, fixed point decimal data type, and terminal independent screen functions.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $1,249

DP COMMUNICATIONS CORP.

☐ Cable Manager
Tracks, documents and displays cabling systems. Generates multi-color plots. Used for national/global networks and LANs. Oracle DBMS compatible. Basic Inventory, Design, Cable Installation, Termination, Path Tracing and Cable Maintenance modules.
IBM PC, XT, AT

EICON TECHNOLOGY CORP.

☐ Access/X.25
X.25, X.28, X.29 and X.3-compatible communication server for NETBIOS compatible LANs which support 32 remote connections at speeds up to 64K bps. Defines end-to-end protocol which emulates async and 3270-type terminals. Provides PC-to-PC, PC-to-mainframe and LAN-to-mainframe communications.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $995-$1,395

☐ Attach/X.25
X.25-compatible LAN-to-LAN, PC-to-LAN and PC-to-PC communications. Enhances IBM's PC Network, NETBIOS and Microsoft networks by allowing each to interconnect with LANs in several locations. Using a single command, servers from remote LANs can be connected and used in same way as local servers.
IBM PC ☐ 320 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $1,195

EXCELAN, INC.

☐ Exos 8010
Implements DOD standard ARPANET TCP/IP protocols to connect UNIX-based host systems to Ethernet networks. Includes I/O driver, application programming interface, network administration utilities and network application utilities such as file transfer, virtual terminal connection and remote command execution.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 190 since 1984 ☐ Cost: $13,000

☐ Exos 8011
Implements DOD standard ARPANET TCP/IP protocols to connect XENIX-based IBM AT supermicros to Ethernet networks. Includes I/O driver, application programming interface, network administration utilities and network application utilities such as file transfer, virtual terminal connection and remote command execution.
IBM PC, AT/XENIX ☐ 128 KB req. ☐ Copies sold: 40 since 1985 ☐ Cost: $595

FRONTIER TECHNOLOGIES CORP.

☐ PCX.25, Level III
Runs on Frontier's Communication Board. Implements all three levels of CCITT X.25 specification with 1980 amendments. Allows handshaking signals for communication through modems. Complies with X.25 requirements for LAPB link access procedure. Allows PCs connected through X.25 network to communicate with each other.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $695

GANDALF DATA, INC.

(subsidiary of Gandalf Technologies, Inc.)

☐ NetScan 2000
Monitors LAN or wide area data network from central workstation. Intended for use with networks of Gandalf's switching and multiplexing products. Collects data from various points, scans data for alarm conditions and enters data into daily event log. Generates data and statistical summaries.
IBM XT ☐ Cost: $2,000

GATEWAY COMMUNICATIONS, INC.

☐ G/Netbios
Emulates IBM's NETBIOS. Allows G/NET to run IBM PC and Microsoft MS-Net network programs OS and applications. Includes session level interface. Implements name management protocol. Supports session/link layer commands and 4 NETBIOS command types.
IBM PC, XT, AT ☐ Cost: $195

☐ G/SNAnet
Provides multi-user LAN-to-mainframe gateway for PCs connected to G/NET LAN by emulating 3270/3770 device selectively. Allows user to switch between 3270/3770 and local PCDOS or LAN applications. File transfer capabilities.
IBM PC, XT, AT ☐ 192 KB req.

☐ G/X25net
Provides multi-user X.25 gateway for users connected to G/NET LAN or other LANs independent of network OS. Serves as packet assembler/disassembler interface over trunk lines or PDN. Provides LAN-to-mainframe X.25 link or LAN-to-LAN bridge.
IBM PC, XT, AT

☐ G/X25pc
Provides X.25 communications interface for standalone PC. Serves as packet assembler/disassembler interface over trunk lines or PDN. Allows remote PC to act as if it were attached to LAN. Provides LAN-to-mainframe X.25 link or LAN-to-LAN bridge. Single-user.
IBM PC, XT, AT

GENERAL ELECTRIC INFORMATION SERVICES CO. (GEISCO)

(subsidiary of General Electric Co.)

☐ TSI (The Systems Interface)
Provides communications between PCs and public network systems.
IBM PC ☐ Cost: $50

H & A COMPUTER SYSTEMS

☐ RSS/PC
Allows PCs, Series/1s and mainframes to interact under same network. Includes copy utility, remote support, security, background processing and record access.
IBM PC ☐ 50 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $400

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Asynchronous Communications Server
IBM no. 1642-003. Provides capability for IBM PCs on IBM Token-Ring Network or IBM PC Network to access ASCII applications via switched communication lines. Provides access to Rolm CBX II, PBX or to public switched network.
IBM PC, XT, AT ☐ Cost: $495

☐ Business Adviser - Network Extension Edition
IBM no. 6466-992. Permits an additional user to share accounting information and enter data for one or more companies when one or more Business Adviser editions are installed on the server on IBM Token-Ring or IBM PC Networks.
IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $245

☐ Matrix Switch Host Facility
IBM no. 5665-428. Integrates network reconfiguration and monitoring functions of IBM 3728 Communication Control Matrix Switch units into centralized network management environment. Collects diagnostic information from local and remote 3728 installations.
IBM XT ☐ Cost: $6,000

☐ NetWare Bridge
IBM no. 6404-011. Allows IBM PC Network and IBM PC Cluster or 2 IBM PC Networks to be connected.
IBM PC, XT, AT, Portable PC, PCjr ☐ 256 KB req. ☐ Cost: $395

☐ PC Local Area Network Program
IBM no. 6024-195. Requires DOS 3.2. TopView compatible. Provides file, print and message server functions. Supports networks utilizing IBM PCs attached to IBM PC Network. Provides resource sharing, multiple file servers, file transfer, message send/receive and message broadcast.
IBM PC, XT, Portable PC, AT ☐ Cost: $125

☐ PC Network Analysis Program
IBM no. 6489-762. Network activity log/monitor and problem condition identifier. Reviews various reports on network utilization and traffic. Optionally converts log files to ASCII format for use with other user-provided analysis programs.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Cost: $1,295

☐ Ring-to-Ring Bridge
IBM Token-Ring Network bridge program. Allows multiple token-rings to be connected and to appear as single network.
IBM AT ☐ Cost: $1,495

☐ Token-Ring Network Manager
Enables operator to evaluate single ring and perform problem determination and error monitoring using dedicated PC. Assists operator in taking corrective measures to improve network operation.
IBM PC ☐ Cost: $1,495

☐ **Token-Ring Network Manager**
IBM no. 6476-046. Assists user in problem determination and error recovery. Monitors for hard and soft failures. Notifies operator of failures requiring immediate attention. Supports up to 260 attaching stations per single ring. Identifies probable cause and source of network failures.
IBM PC ☐ Cost: $1,495

☐ **Token-Ring Network NETBIOS (Network Basic Input/Output System)**
IBM no. 6467-037. Provides NETBIOS programming interface for IBM Token-Ring Network. Allows application programs to be written for operation on IBM Token-Ring Network and IBM PC network.
IBM PC, XT, AT, Portable PC ☐ Cost: $35

☐ **Token-Ring Network/IBM PC Network Interconnect Program**
IBM no. 6467-036. Permits exchange of information between IBM PCs attached to IBM Token-Ring Network and IBM PCs attached to IBM PC Network.
IBM XT, AT ☐ 256 KB req. ☐ Cost: $495

☐ **3728 Support Processor**
IBM no. 5668-787. For IBM 3728 Communication Control Matrix Switch which links controllers, modems and lines, and configures, reconfigures, monitors and tests data networks from central locations via operator control terminals.
IBM XT ☐ 640 KB req. ☐ Cost: $12,000

IDEASSOCIATES, INC.

☐ **IDEAshare**
Allows small businesses to establish a resource sharing center. Compatible with networked versions of Lotus 1-2-3, Symphony, WordStar, FinalWord and MultiMate.
IBM PC, XT, AT, Portable PC, PCjr ☐ 256 KB req. ☐ Cost: $595

INTEL CORP.

☐ **Open Net NRM**
Networked distributed processing environment for microprocessor development. Provides Ethernet-based communication including Open Net. Allows users to share network resources. Includes hierarchical file system, archival utilities, software version control system and generation program.
IBM PC ☐ Cost: $24,000

☐ **XENIX Open Net Networking Software**
Provides transparent remote file access across LAN between XENIX systems and PCs. Runs on Ethernet controllers and ISO Class 4 transport systems.
IBM PC, AT ☐ 1,000 KB req. ☐ Introduced: 1985 ☐ Cost: $2,500

MASTERLINK

☐ **VersaNet**
PC-to-PC communication system. Provides hard disk sharing, file transfers, printer sharing and spooling, modem sharing and electronic mail. External high-speed upgrade box (HUB) upgrades signals from PC's serial port and sends them up to 1,000 feet at about 50 cps.
IBM PC ☐ Introduced: 1985

MBP SOFTWARE AND SYSTEMS TECHNOLOGY, INC.

SEE AD ON PAGE 293

☐ **SNA LU6.2 Communications Software**
IBM 3270, 3770, LU6.2/APPC emulating send-receive node. Supports base set and extended LU6.2 verbs. Acts as 3274 cluster controller with Displaywriter emulation. Gateway into IBM distributed networks.
IBM PC

☐ **SNADS Communication Software**
Extends LU6.2 verbs and DIA architecture to distribution services of SNADS. Includes PU2.1 connection to provide peer-to-peer communications within SNA network. Transparent to user interface.
IBM PC ☐ 512 KB req. ☐ Introduced: 1986

METAPATH, INC.

☐ **NMS-1**
Designed for use with Metapath data switch products. Configures network ports from central point, displays usage statistics, defines security access and performs diagnostic tests.
IBM PC ☐ Cost: $1,500

MICOM/INTERLAN, INC.

(subsidiary of MICOM Systems, Inc.)

☐ **NP621 TCP/IP XENIX**
DoD TCP/IP standard protocols for high-level applications on Ethernet. For use with MICOM/Interlan's NP600 Protocol Processor.
IBM AT/XENIX ☐ Introduced: 1986 ☐ Cost: $1,390

☐ **NS2095 Device Driver for IBM PCs**
Interface between NI5010 and higher-level network applications. Packets are passed between application and driver via defined data structures in memory. Multi-cast, broadcast and protocol filtering. Features transceiver and network loopback tests.
IBM PC, XT, AT ☐ 4 KB req. ☐ Introduced: 1986 ☐ Cost: $200

MICRO BUSINESS APPLICATIONS, INC.

☐ **Network Interface**
Allows PCDOS and MSDOS to run on networks utilizing Novell's NetWare. Supports spooling, file and record locking, and data and index file updating.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $595

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ **Microsoft Networks**
Enables users to share system resources such as files, disks and printers within a networked environment. Requires a LAN card and a transport interface software.
IBM PC ☐ 192 KB req.

MODCOMP

☐ **PCLink Real-Time Network**
Real-time networking designed for process control and data acquisition. Continuous multi-link scanning enables IBM PCs to track and respond to real-time process dynamics from each MODCOMP system, even while unattended. Accesses temperatures, pressures, flow rates and stream compositions.
IBM PC, XT, Portable PC ☐ 256 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $4,500-$6,000

NCR CORP.

☐ **Decision Net**
Shares and backs up files, spools files to network printer, accesses central data bases, mails messages and provides several levels of security. Works within framework of the available networked host OSs.
IBM PC

☐ **Decision Net/Decision Mate V**
IBM PC ☐ 64 KB req.

☐ **Decision Net/IBM PC**
IBM PC, XT ☐ 128 KB req.

NESTAR SYSTEMS, INC.

☐ **File Transfer Server**
Allows remote links to other Nestar networks within same location and remote locations. Links single-station sites without a network.
IBM AT ☐ 64 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $395

☐ **Print Server**
Print spooling. Allows Nestar PLAN Series users to share printers. Attaches 6 printers of varying types to 1 print server. Connects print server to several networks, accessing same printer. Integrates with Messenger and File Transfer Server.
IBM PC, AT ☐ 64 KB req. ☐ Cost: $500

NETWORK INNOVATIONS CORP.

☐ **Multiplex**
PC-to-UNIX data base link. Links PCs to data bases on multiuser systems. Transfers files. Manages PC and UNIX network files. Emulates VT100 terminals. User interface resembles Lotus 1-2-3. Supports 4 UNIX DBMSs. Operates on local/remote async links and LANS.
IBM AT ☐ 256 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $695

NETWORK SOFTWARE ASSOCIATES, INC.

☐ **AdaptSNA LU 6.2/APPC**
Communicates and transfers files as LU 6.2 device in IBM SNA/SDLC network. Provides IBM-defined APPC functions. Works with PC-to-mainframe and PC-to-PC communications applications.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 10 since 1986 ☐ Cost: $795

NOVELL, INC.

☐ **ACS (Asynchronous Communications Server)**
Allows 12 simultaneous remote connections between async devices. Supports most modems. Auto-dial/-answer. Each WNIM port acts independently of others and supplies 4 connections. Provides async program interface.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $1,490

☐ **Netware Bridge**
Allows dedicated/nondedicated workstation on LAN running Advanced Netware 2.0 and up to 4 like/unlike network interface cards. Permits LANs to support multiple bridges. Users on different LANs can communicate and access one another's file servers.
IBM PC, XT, AT ☐ Cost: $395

OPEN SYSTEMS, INC.

(subsidiary of Uccel Corp.)

☐ **Network**
Converts single-user computer to multi-terminal LAN. Provides record locking control. Multi-level, multi-company passwords. Shares programs and information on hard disk permitting access from any workstation on network.
IBM PC, XT, AT ☐ Introduced: 1984 ☐ Cost: $695-$1,795

ORCHID TECHNOLOGY, INC.

☐ **PCnet**
Reviewed Sep/Oct 1983 p. 50.
Provides IBM PC compatible LAN. Shares all peripherals. Operates transparently.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 10,000 since 1986 ☐ Cost: $100

PACKET/PC, INC.

☐ **Packet/3270**
SNA 3270 emulator. Supports dial-up communications via packet networks. Supports standard keyboard/CRT SNA functions on PC. Provides application program interface, end-to-end error detection/retransmission, 3270 file transfer, data compression and 3279 4-color support.
IBM PC ☐ 256 KB req. ☐ Copies sold: 9 since 1985 ☐ Cost: $145-$295

PARADYNE CORP.

☐ **Analysis Entre**
Provides monitoring and diagnostics testing for small networks. Compatible with modems operating at 2400, 4800, 9600, 14.4K, 16.8K and 19.2K bps. Displays results in descriptive English. Performs surveillance over an out-of-band, noninterfering diagnostic channel. Maintains event file for retaining historical information.
IBM PC ☐ Cost: $1,195

RABBIT SOFTWARE CORP.

☐ **Network 3270-Plus**
LANs can communicate simultaneously with mainframes. Access to file transfer and handling, windowing and security.
IBM PC ☐ 512 KB req.

RATIONAL DATA SYSTEMS, INC.

☐ **PC/VS**
Ethernet-compatible LAN. Links DG ECLIPSE MV/Series minicomputers with IBM PCs and compatibles. Provides virtual disks, print service, file transfer, remote IPC interface, optional terminal emulation and CEO mail notification.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ Copies sold: 20 since 1985 ☐ Cost: $3,000-$10,500

SERVER TECHNOLOGY

☐ **EasyLAN**
Shares printers, disk drives and information between PCs. Performs communications, file transfers and printer operations while each PC simultaneously performs DOS applications. Protects communications operations by password assigned to each PC. Supports modems, dial-up lines and digital PBXs.
IBM PC ☐ Cost: $80-180

THE SOFTWARE LINK, INC.

SEE AD ON PAGE 265

☐ **LANLink**
Software-driven LAN. Logic resides on server and satellite diskettes. Transforms DOS into a multi-user networking system. Provides hard-disk back-up and access to files, programs and peripherals. Record-locking and file sharing. Supports IBM NETBIOS communications interface standard.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 15,000 since 1985 ☐ Cost: $495

SOFTWARE RESEARCH CORP.

☐ **SNE/FTF (Strategic Network Environment/File Transfer Facility)**
Transfers VSAM, PDS, QSAM and GDG data sets between MVS environments, from/to DASD, and magnetic tape devices. Transfers sequential and indexed sequential files. Supports async data delivery services. Recovery/integrity facilities, notification management, centralized control and file handling management.
IBM PC ☐ 4,000 KB req. ☐ Copies sold: 20 since 1985

SOFTWARE SYNERGY, INC.

☐ **Respond/Net**
Lets PCs share information, peripherals, electronic mail, and communication resources through independent modules that run in individual nodes of network. Utilizes Ethernet. Files may be shared, accessed and updated by authorized users. Routes work to printer. Includes electronic mail facility.
IBM PC ☐ 256 KB req. ☐ Cost: $710

SPERRY CORP.

Information Systems Group

☐ **Usernet Software/86 Network Operating System**
Allows access to common program files and data files, prints documents on shareable network printers and sends messages electronically between workstations. Supports multiple data/print servers.
IBM PC ☐ Cost: $1,595

☐ **Usernet 3270 SNA Protocol Communications Server**
Allows multiple Sperry or IBM PCs connected via Usernet to operate under IBM's SNA. Supports 32 simultaneous application sessions. Supports mainframe connectivity over dial-up, leased or point-to-point and multi-dropped lines at 9,600 bps.
IBM PC ☐ Cost: $1,995-$3,995

STANDARD MICROSYSTEMS CORP.

☐ **Advanced NetWare/SM**
Supports up to 50 workstations per file server. A file server supports up to 5 printers which may be used by all nodes on the network.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $1,595

SUN MICROSYSTEMS, INC.

☐ **NFS (Network File System)**
Files may be accessed and shared by users on other machines on network. Remote procedure call authenticates authorizations for file access. Changes are made to one copy of files residing on NFS server.
IBM PC ☐ Copies sold: 10,000 since 1985 ☐ Cost: $8,000

☐ **PC-NFS**
Converts local MS-DOS file names to network compatible NFS pathnames. Allows transparent file access among PCs and other computers using NFS. DOS commands access files from other computers on network.
IBM PC ☐ Cost: $255 and up

THE SYSTEMS CENTER

☐ **NDM-PC (Network Data Mover-PC)**
Distributes files, text, graphics, binary and programs throughout SNA network. Schedules unattended data transmission and distributes any program information updates to any PC on network. Handles electronic mail and distribution of documents. Automatic host application initiation available.
IBM PC ☐ 196 KB req. ☐ Introduced: 1984 ☐ Cost: $300

T-BAR, INC.

☐ **Data System Control**
Controls T-Bar DSTA 2001 distributed switched matrices.
IBM PC ☐ 640 KB req. ☐ Introduced: 1985 ☐ Cost: $4,500

TALLGRASS TECHNOLOGIES CORP.

SEE AD ON PAGE 137

☐ **TG-8000AT**
Converts IBM AT or compatible into multi-function network server. Provides integrated communications and multi-LAN links. Includes file/peripheral sharing, gateways between similar/dissimilar LANs, multiple remote communications links and network diagnostics. Accesses minis, mainframes and larger networks. Global naming mechanism tracks network resources.
IBM AT ☐ Cost: $1,895 and up

TCS SOFTWARE, INC.

☐ **Q*Net**
Works with networking environments. Stores data bases on multiple servers. Shares printers and hard disks. Provides user-defined security. For use with TCS Total Accounting System.
IBM PC, AT, Convertible ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $795

TECHLAND SYSTEMS, INC.

(subsidiary of York Research Corp.)

☐ **BlueLynx 3270 Gateway**
Allows single LAN IBM AT, PC or XT to act as a 3274 controller and communicate in sync mode with IBM mainframes through modems. Distributes 32 supported mainframe sessions to other IBM ATs, PCs or XTs in LAN.
IBM AT ☐ Introduced: 1984 ☐ Cost: $1,195

TECHNOLOGY CONCEPTS, INC.

☐ **CommUnity**
Packet-oriented networking structure. Uses virtual circuits, routing, network management, file transfer, virtual terminal and program interface. Coexists with other networks. Layered hierarchy based on model for open system interconnection. Compatible with DECnet Phase IV.
IBM PC ☐ 1,000 KB req. ☐ Copies sold: 5 since 1985

TEXAS INSTRUMENTS

☐ **BSA (Business System Access)**
Allows TI PCs to access Business Systems over Ethernet operating under DNIO 2.0 and DNOS 1.2.1. Provides file transfer.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $195

☐ **Ether Series User Kit**
Interconnects TI Professional Computers and IBM PCs into Ethernet network. Requires EtherLink board and EtherShare Server Kit.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3,000 since 1984 ☐ $50

☐ **EtherPrint Server Kit**
Allows multiple TI Professional Computer users to share printers on Ethernet network. Requires EtherLink board and EtherShare Server Kit.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ $195

☐ **EtherShare Server Kit**
Shares fixed disk resources in Ethernet network. Requires EtherLink board.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $395

3COM CORP.

☐ **EtherPrint**
Reviewed Jan 1984 p. 55.
Allows network users to share common printers. Provides print spooling.
IBM PC ☐ Cost: $195

☐ **EtherShare**
Reviewed Jan 1984 p. 54.
Allows communication among PC users connected to the network. Allows IBM users to share hard disk storage on one or more servers.
IBM PC ☐ 64 KB req. ☐ Cost: $450

☐ **EtherTerm**
Connects IBM and compatible PCs on a LAN to mainframes and minis. Connects through telephone lines or public data networks.
IBM PC ☐ Cost: $700

☐ **3+Path**
Allows EtherShare/EtherPrint users to migrate to 3+Share and Ethermail users to 3+Mail. Allows 3+ workstation to concurrently access Etherseries and 3+ servers.
IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1986 ☐ Cost: $500

☐ **3+Remote**
Permits remote PCs to dial in to network via modem. Accesses network data and printers. Provides electronic mail. Runs 3+ applications as if they are on-the-net. Performs error checking. Retransmits lost packets across async communication link assuring data integrity.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1986 ☐ Cost: $295

☐ **3+Route**
Extends resource and communications sharing beyond single 3+ network. Two or more networks can be inter connected via modems and telephone lines. Accesses resources across internetwork links by name. Bases route service XNS protocols. Works with 3+Share and Mail.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $1,250

☐ **3+Share**
Network OS for 3Com's 3+ network products. Provides multi-user file service, spooled print service, directory name service for identifying users, services and servers and dial-in remote service for dial-in network access from standalone PCs. Includes EtherPath.
IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1986 ☐ Cost: $550

TIARA COMPUTER SYSTEMS, INC.

☐ **TiaraLink**
LAN. Includes chat utility for network messaging and IAP (In-Application Printing) utility for accessing network printers.
IBM PC, XT, AT ☐ Cost: $500

TIMEPLEX, INC.

☐ **Prophet**
Network management system for MICROPLEXER networks. Offers single point control of overall network or individual ports. Checks dedicated channels, type of multiplexer, number of available ports and port module PROMs.
IBM XT, AT ☐ 384 KB req. ☐ Introduced: 1984 ☐ Cost: $1,500

☐ **Prophet Network Management System for the LINK/1 System**
Network configuration, management and diagnostics for LINK/1-based networks. Single point network control. Defines parameters for each exchange or node before connection. Checks dedicated channels, type of multiplexer, number of available ports and port module PROMs.
IBM XT, AT ☐ 384 KB req. ☐ Introduced: 1985 ☐ Cost: $1,500

TITN, INC.

☐ **QLLC**
Qualified logical link control. Allows SNA-to-SNA connections over X.25 packet networks.
IBM PC ☐ 128 KB req.

☐ **Twice PC X.25**
Enables user to communicate with remote X.25 DTE or host at process level through public or private packet-switching network. Provides multiple simultaneous virtual circuit operations across one physical line.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 50 since 1985

☐ **Twice TITN Worldwide ISO Communication Expertise**
Provides X.25 procedure portable package for any PSN. PAD emulation, PAD management and TELETEX CCITT Document Transmission packages are available.
IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1979

☐ **Twice X.21 LAPB**
Allows target machine access to circuit switching networks and earth or satellite data networks. Permits 2 host communication through circuit switched data network.
IBM PC ☐ 60 KB req. ☐ Copies sold: 75 since 1984

TORUS SYSTEMS, INC.

☐ **RAG (Remote Access Gateway)**
Configures Tapestry network to support RNL users. Allows unlimited workstations to act as undedicated remote gateway servers. Requires auto-answer modem for each station serving as remote gateway.
IBM PC, XT, AT ☐ Cost: $250

☐ **Tapestry**
Transforms LAN into office automation system. Includes electronic mail and file/printer sharing. Provides network intelligence to manage telephones, connection to mainframes and communication with remotes PCs. Utilizes icon-based user interface concepts. Supports IBM Token-Ring, PC Network and 3Com Ethernet.
IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $495

VIANETIX, INC.

☐ **ViaNet**
LAN link for micros and minis. Works with OS and adapter board to link 1 or more hardware nodes. Allows all disks, peripherals, programs and data files to be shared without dedicated server. Supplements ARCnet, Ethernet, IBM's Token-Ring network, Omninet and Starlan.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984

VIRTUAL MICROSYSTEMS, INC.

☐ **V-Drive**
Provides networking interface between PCs and DEC VAXs. Allows PC users connected to Ethernet network running DECnet to use VAXs/MicroVAXs as file servers. Includes menu-driven interface, virtual disk capability, VT220 terminal emulation and toggle switch between VMS and PCDOS. Uses TCI's CommUnity.
IBM PC

WANG LABORATORIES, INC.

☐ **PC Local Communications File Sharer**
Allows a Wang Professional to access the larger disk capacity of a Wang OIS or VS/IIS system.
IBM PC ☐ Cost: $500

☐ **PC Professional Network Services for Local Interconnect Option**
Uses token passing to access another Wang Professional's data and peripherals.
IBM PC ☐ Cost: $500

WINTERHALTER, INC.

☐ **DataTalker X.25**
Allows microcomputer to interface with private and public data networks via X.25 protocol, Level II and Level III. Requires DataTalker PC Plus or DataTalker II.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $495

WOLLONGONG GROUP, INC.

☐ **Win/PC**
Allows PCs to participate in LANs or WANs. Conforms to standard TCP/IP DOD protocols. Supports VT100 emulation, file transfer, transparent operation and network activity monitoring. Interfaces Ethernet or IEEE LANs.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $895

WORDTECH SYSTEMS, INC.

SEE AD ON PAGE 321

☐ **NetWorker**
File server module. Controls record/file locking of dBASE III Plus data on LANs supporting DOS 3.1 protocols. Controls locking for dBXL. Operates in transparent mode. Works with dBIII Compiler. Can be used with diskless workstations.
IBM PC ☐ Cost: $99

X.DOT CORP.

☐ **PAD**
Interactive, portable C language interface which connects async terminals to public or private packet switching networks. Implements the published 1980 CCITT Recommendations X.3, X.28 and X.29.
IBM PC ☐ 72 KB req. ☐ Introduced: 1985 ☐ Cost: $20,000 and up

COMPILERS/LANGUAGES

ADDISON-WESLEY PUBLISHING CO., INC.

☐ **True BASIC**
IBM PC

ALCYON CORP.

☐ **C68, C68/020**
C compiler. Generates object code for MC68000, MC68010 and MC68020/68881. Includes macro processor, compiler, relocatable assembler, linking loader, support libraries and utilities. Generates programs which execute standalone or under OS control.
IBM PC ☐ 64 KB req. ☐ Copies sold: 680 since 1981 ☐ Cost: $1,495 (C68); $2,295-$3,495 (C68/020)

AMERICAN BUSINESS COMPUTER DEVELOPMENT SYSTEMS, INC.

☐ **Workstation Basic**
BASIC compiler/interpreter, command processor and utility programs. Features full-screen entry, array math, integrated ISAM support and interactive debugging capabilities. Compatible with Novell NetWare and IBM mainframe BASIC.
IBM XT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $450-$695

AMERICAN PLANNING CORP.

☐ **APCBASIC**
Development compiler/interpreter processor. Utilities for scanning, developing and debugging. Facilities for dynamic dimensioning match capability, code merging/deleting and formatting I/O.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,000 since 1979 ☐ Cost: $249-$495

☐ **MegaBASIC**
Reviewed Jun 1986 p. 52.
Direct addressing of 1 MB of memory. Loads libraries of programs, subroutines and functions into memory executable from the running program with a single statement. Variable names up to 255 characters long, trace and edit functions and BCD arithmetic to eliminate rounding errors.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 4,000 since 1983 ☐ Cost: $375

APPLIED TECHNOLOGY VENTURES, INC.

☐ **ATV/Basic**
Compiles programs written in PC or MS-BASIC. Translates source code into Assembly language on DEC VAX systems. Supports floating point hardware. Disables run-time subscript checking, tracing and error reporting. Performs mathematical functions in double precision.
IBM PC ☐ 128 KB req. ☐ Cost: $3,900

ARITY CORP.

☐ **Prolog Compiler and Interpreter**
Reviewed Jan 1986 p. 145.
Develops applications. Provides floating-point arithmetic, string support for text handling, text screen manipulation, interface to other programming languages, shell to MSDOS and definite clause grammar support.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $350-$795

ARTEK CORP.

☐ **ADA Compiler System**
Includes compiler, full-screen editor, interpreter/debugger, subprogram and generics library support, formatting numbers into character strings and redirected compiler output, linker/library manager and A-code disassembler. Meets 1983 Defense Department specifications.
IBM PC, AT ☐ 384 KB req. ☐ Cost: $495

AUSTEC, INC.

☐ **ACE COBOL**
GSA-certified, 32-bit, multi-user, high-level COBOL compiler. Applications transportable from machine to machine. Supports networking/native object formats and calls to other programming languages. Sequential, relative and ISAM methods. Uses ACEBridge file system. Screen handling facilities. Program development aids.
IBM PC

AUTOMATA DESIGN ASSOCIATES

☐ **Educational PROLOG**
Reviewed Jan 1986 p. 145.
Language system. Includes a debugging aid. User settable spy points permit selective tracing. Exhaustive tracing is available. Allows execution of programs or editors from within PROLOG.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $30

HAUPPAUGE COMPUTER WORKS, INC.
358 Veterans Memorial Highway,
Suite MSI
Commack, NY 11725
516-360-3827

HFT+ is a set of routines which use a math coprocessor to perform very high speed one and two dimensional fast Fourier Transforms. The forward and reverse transforms are usable with Microsoft and IBM Pascal, Fortran, BASIC and C.

C the Advantage.

Introducing the Lattice® MS-DOS C Compiler, Version 3.

There's never been a better time to buy Lattice C. Professional programmers the world over have made Lattice C the standard compiler for serious MS-DOS programming. Now Version 3 offers even more of the features that have made our previous versions so popular. Our new compiler features include:

ANSI language constructs including, *unsigned* as a modifier, *void* data type, *enum* data type, structure assignments, structure arguments, structure returns, and argument type checking.

The compiler also incorporates improved code generation, more efficient stack overflow checking, in-line 8087 code generation, and 80186/80286 code generation.

The library contains more than 200 new functions, including: ANSI/UNIX/XENIX compatibility; extended support for MS-DOS; extended support for networking including file sharing, file locking, and I/O redirection; and flexible error handling via user traps and exits. Plus the library has also been re-engineered to produce much smaller executables.

Debugging your Lattice C or Assembly language programs will be even easier when you use our new and improved C-SPRITE™ symbolic debugger.

We've included new features such as a source mode that allows C-SPRITE to work with source lines instead of machine instructions for most functions such as disassemble, single step, and breakpoints. In addition, when you use the source mode, symbol types can now be completely specified so that variables are automatically displayed in their correct data type.

C-SPRITE allows the size of the symbol table to exceed 64k bytes. Symbols can be made to be case sensitive, and when symbols are loaded, compiler-generated symbols can be ignored.

Try the new Version 3 C Compiler and C-SPRITE from Lattice. Because C-ing is believing.

☐ **FS PROLOG**
Language system. Includes full random access file capability. Allows character and structure I/O, and insertion of clauses in data base.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $50

☐ **VMA PROLOG**
Language system which includes data base access routines.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $350

BARRINGTON SYSTEMS, INC.

☐ **CLARION**
Programming language and 12 utility programs that include compiler, editor, sorter, filer, scanner, screener and reporter. Sets or changes default options. Includes pass-through connector that plugs into parallel port.
IBM PC ☐ 320 KB req. ☐ Cost: $295

BASIS, INC. (NM)

☐ **BBx (Business BASIC/Extended)**
Reviewed Jun 1986 p. 52.
Version of Business BASIC source code compatible with MAI Basic Four and SMC Business BASICs. Operates in single or multi-user modes. Provides file system and utility set for program development and system management.
IBM PC ☐ Cost: $695-$5,000

BERSTIS INTERNATIONAL

☐ **Minnesota SNOBOL4**
Reviewed Jan 1985 p. 32.
Handles non-numeric processing, pattern matching, file format conversions and prototyping. Supports up to 512 Kb workspace.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $45-$500

BORLAND INTERNATIONAL, INC.

SEE AD ON INSIDE COVER & PAGE 1

☐ **Turbo Pascal**
Rev'd 7/84 p.58; 1/85 p.187; 2/85 p.112; 7/86 p.94.
High-speed interactive application development system. Full screen editor. Compatible with WordStar. Supports overlays, PGM chaining and external assembly routines. Includes Binary Coded Decimals and support for 8087 math co-processor.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 900,000 since 1983 ☐ Cost: $100

☐ **Turbo Prolog**
Incremental compiler, interactive editor, type system, graphics and text windowing support and GeoBase, a natural query language data base. User can program topic-specific rules into system. Designs expert systems.
IBM PC, XT, AT, 3270-PC, Portable PC, PCjr ☐ 384 KB req. ☐ Cost: $100

BOS NATIONAL, INC.

☐ **MicroCOBOL**
COBOL language containing all standard ANSI verbs with structured programming, sort facilities and overlay management. Data management includes file and record locking, spooling and logical physical unit assignments. Arithmetic is 18 decimal digits. Programs build job management dialogue under program control.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 10,000 since 1978 ☐ Cost: $550

CATSPAW, INC.

☐ **SNOBOL4+**
Reviewed Jan 1985 p. 32.
Emphasizes string manipulation, pattern matching, recursion and associative data structures. Supports entire SNOBOL4 language plus extensions.
IBM PC, PCjr, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $95

COMMON LANGUAGE SYSTEMS, INC.

☐ **Plain English Programming Language**
Accommodates PCDOS, UNIX and XENIX OSs. Creates self-documenting applications. Features variable record and field length, unlimited open files, floating records and ISAM file structure. Single- or multi-user option.
IBM PC ☐ 192-512 KB req. ☐ Copies sold: 1,450 since 1984 ☐ Cost: $250

☐ **Plain Italian**
Develops software for international markets. Creates self-documenting applications. Features variable record and field length, unlimited open files, floating records and ISAM file structure. Single- or multi-user option.
IBM PC, XT, AT

COMPUTER INNOVATIONS, INC.

☐ **C-to-dBASE**
Manipulates dBASE II data and index files in programs. Allows access to dBASE files without needing dBASE. Includes up to 100 functions.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $150

☐ **C-86 PLUS C Compiler**
Reviewed Nov/Dec 1983 p. 110; Jan 1986 p. 82.
Output is relocatable 8086/8088 object module. Supports small, medium and large memory models. Library support. Incorporates ANSI specifications. Includes window support functions. Compatible with Microsoft C. Options for 8087/287 math chip and IEEE floating point included.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 20,000 since 1981 ☐ Cost: $495

MODULA-2/86

Move up to LOGITECH MODULA-2/86. Whether you're a single programmer or part of a team, with LOGITECH MODULA-2/86 you'll decrease your overall development cycle and produce more reliable, more maintainable code. Build your program using our extensive library modules, your own modules or those from a growing list of available third-party software vendors. If you're a Turbo Pascal user you can even take your existing code along with you with the help of our new Translator!

NEW & IMPROVED!

Turbo Pascal to Modula-2 Translator $49

Now it's even easier for Turbo users to step up to Modula-2/86. Our improved Translator changes your Turbo source code into Modula-2/86 source, solving all the incompatibilities, and translating the function calls of Turbo into Modula-2/86 procedures. Implements the complete Turbo library!

LOGITECH MODULA-2/86 $89

Complete with Editor, Run Time System, Linker, 8087 Software Emulation, Binary Coded Decimal (BCD) Module, Logitech's comprehensive library, Utility to generate standard .EXE files. AND more!

- LOGITECH MODULA-2/86 with 8087 Support $129
- LOGITECH MODULA 2/86 PLUS $189

For machines with 512K of RAM. Takes advantage of larger memory to increase compilation speed by 50%.

Turbo Pascal is a registered trademark of Borland International.

RUN TIME DEBUGGER $69

(Source level!)

The ultimate professional's tool! Display source code, data, procedure call chain and raw memory. Set break points, assign values to variables, pinpoint bugs in your source.

UTILITIES PACKAGE $49

Features a post-mortem debugger (PMD). If your program crashes at run time the PMD freezes the situation so you can pinpoint, in the source, the cause of the error and the status of the data. Also includes a disassembler, cross reference utility and version that allows conditional compilation.

LIBRARY SOURCES $99

Source code for our major library modules is now available for customization or exemplification.

WINDOW PACKAGE $49

Now you can build true windowing into your Modula-2 code. Powerful, though only 15K in size. Features virtual screens, color support, overlapping windows and a variety of borders.

MAKE UTILITY $29

Automatically selects modules affected by code changes to minimize recompilation and relinking. Even figures out dependencies for you!

CROSS RUN TIME DEBUGGER AND ROM PACKAGE $199

Now available at an introductory price!

YES I want to move up to LOGITECH MODULA-2/86!

Here's the configuration I'd like:

☐ Logitech Modula-2/86	$89
☐ with 8087 support	$129

CONTROL-C SOFTWARE, INC.

☐ **BI-286/BI-386, BI-386**

BASIC interpreter running BASIC Four's Business BASIC programs level II and III. ISAM file manager screen control, error handling and masking. Allows transporting of Business BASIC programs to new computer systems.

IBM PC ☐ 128 KB req. ☐ Copies sold: 80,000 since 1983 ☐ Cost: $195

☐ **BI-386**

BASIC interpreter for business. ISAM file manager screen control, error handling and masking. Runs Basic Four's business programs.

IBM PC ☐ 128 KB req. ☐ Cost: $195

☐ **Business BASIC**

Transports Business BASIC II and III to new computer systems. Designed for single-user, multi-user and network environments. LAN versions available.

IBM PC ☐ Cost: $195-$1,395

CYBERNETICS, INC.

☐ **RM/COBOL Compiler**

High-intermediate ANSI 74 COBOL system.

IBM PC ☐ Copies sold: 1,000 since 1978 ☐ Cost: $950

CYTEK, INC.

☐ **Multi-C**

Programming library. Handles multiple users, printers and communications. Includes 32,000 distinct priority levels, and unlimited tasks, queues and flags.

IBM PC, XT, AT

DATABOARD, INC.

☐ **BASIC II/PC**

Checks/compiles source programs line-by-line as entered. Supports error messages, multi-character variable names, fixed/floating point decimal string arithmetic, indentation for loops, program chaining, formatted print commands, date/time function and edit functions. Optional ISAM and graphics.

IBM PC

DATALIGHT

☐ **C Compiler**

Reviewed Jan 1986 p. 82.

UNIX System V compiler. Implements K&R C standard. Contains make utility, touch utility and UNIX-like I/O library. Generates code for Intel 8086 family. Provides error messages and DLC compiler control program. Supports compact memory model and small model.

IBM PC, XT, AT ☐ 180 KB req. ☐ Cost: $60

DATEM, LTD.

☐ **dDCM 860; dDCM 860/R; dDCM 860/Q**

C compiler for 8044 microprocessors. Offers subset of K & R-defined C language for use with Datem's 8044 based bitbus modules. Generates assembler source file.

IBM PC ☐ 256 KB req. ☐ Copies sold: 2 since 1986 ☐ Cost: $550

DESIGN ANIMATION

☐ **Lisp Interpreter**

Features common Lisp subset with dynamic scoping.

IBM PC, XT, AT ☐ Cost: $49

DIGITAL RESEARCH, INC.

☐ **DR Assembler Plus Tools**

Produces linkable assembler object modules, creates and maintains library files and provides cross-reference listings of an assembly language. Includes tools for debugging and testing.

IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $200

DISC

☐ **DBL**

DEC DIBOL superset. Allows migration of DBL/DIBOL programs to Novell Netware, MSDOS, UNIX, XENIX, TSX-Plus, RSX, RSTS and VMS OSs. Virtual memory environment, multi-key ISAM support, fixed point decimal data type, multi-dimensional arrays and terminal-independent screen functions. Runs on hardware supporting Novell Netware.

IBM PC ☐ 256 KB req. ☐ Copies sold: 10,000 since 1978 ☐ Cost: $589-$7,889

DYNACOMP, INC.

☐ **Dynaforth**

Fig FORTH vocabulary for terminal and disk interfacing. Includes machine language code in FORTH word and line editor.

IBM PC ☐ 24 KB req. ☐ Cost: $75-$77

☐ **XPL, A Non-traditional Assembly Language**

Systems programming language for jobs involving data structures, byte manipulation, or tasks requiring little computation but much logic.

IBM PC ☐ Cost: $60

ECOSOFT, INC.

☐ **C88**

Reviewed Jan 1986 p. 82.

C compiler with ANSI enhancements including prototyping, enum, void data type, structure passing and assignment. Includes full-screen editor with multiple windows, macros and compile links from within the editor. Provides over 200 library functions.

IBM PC ☐ 256 KB req. ☐ Copies sold: 7,000 since 1985 ☐ Cost: $60

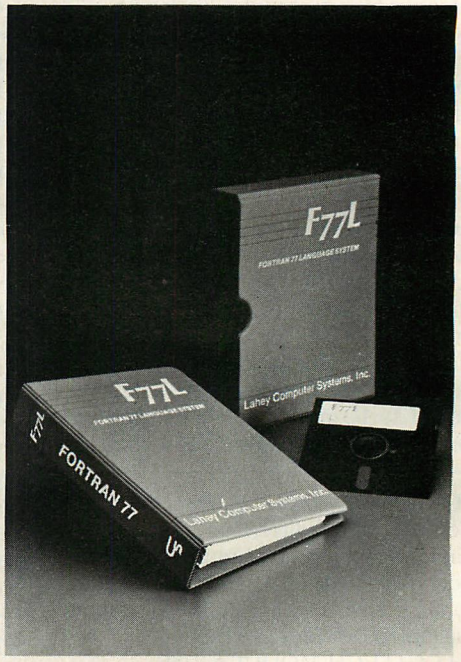
ELFIN SYSTEMS

☐ **C Software Development System**

Implements all major constructs. Full-screen editor, document generator, formatted file listing program, file compare, and HEX/ASCII dump programs.

IBM PC ☐ 48 KB req. ☐ Copies sold: 500 since 1981 ☐ Cost: $295

FORTRAN PROGRAMMERS



Looking for the right PC FORTRAN language system? If you're serious about your FORTRAN programming then you should be using F77L - LAHEY FORTRAN.

"Lahey's F77L FORTRAN is the compiler of choice. It's definitely a 'Programmers FORTRAN,' with features to aid both the casual and the professional programmer. . . F77L compiled the five files in a total of 12 minutes, which was 4 times as fast as MS FORTRAN and an astounding 6 times as fast as Pro FORTRAN." - PC Magazine

Compare the features and performance of other PC FORTRANs with F77L and you will find that F77L is clearly the superior product.

- Full Fortran 77 Standard (F77L is not a subset)
- Popular Extensions for easy porting of mini and mainframe applications
- COMPLEX*16, LOGICAL*1 and INTEGER*2
- Recursion - allocates local variables on the stack
- IEEE - Standard Floating Point
- Long variable names - 31 characters
- IMPLICIT NONE
- Fast Compile - Increases productivity
- Source On Line Debugger (Advanced features without recompiling)
- Arrays and Commons greater than 64K
- Clear and Precise English Diagnostics
- Compatibility with Popular 3rd Party Software (i.e. Lattice C)
- Easy to use manual
- Technical Support from LCS

• *NEW FEATURE - NAMELIST*

F77L - THE PROGRAMMER'S FORTRAN

$477.00 U.S.

System Requirements: MS-DOS or PC-DOS, 256K, math coprocessor (8087/80287)

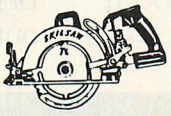
C spoken here...

High C™

Do you want to use a C compiler that



- was chosen by Ashton-Tate for dBASE III® Plus, and CAD Leader AutoDesk for AUTOCAD and AUTOSKETCH "with a twenty percent code savings over Lattice C."
- was well rated in ***Computer Language, Feb. 86:*** "Then there is High C, the most powerful compiler of all..." and ***Dr. Dobbs Journal, August 86***
- "would have saved me three weeks of porting time had I had High C instead of Microsoft's new C"
  Mike LeBlanc, compiler developer, Sky Computers
- "is the *only* C compiler for the IBM PC capable of compiling NYU's Ada/Ed compiler"
  Dave Shields, research scientist, New York Univ.
- has a complete run-time library
- has structure assignment, **enum**, **void**...
- supports nested functions as in Pascal
- supports pcc and full K&R C *plus* some latest, nifty extensions from the new ANSI-proposed C standard
- "is the highest quality C compiler for large-scale software development." *Randy Nielsen, Ansa (Paradox)*
- "saved 15% of code over five large modules of MultiMate relative to Lattice C"
  David Beauchesne, Multimate International

Pascal spoken here...

Professional Pascal™

Do you want to use a Pascal compiler that

- was chosen by Lifetree Software, Inc., for implementing Volkswriter Deluxe™
- serves as a systems and applications language at CAD/CAM giant Daisy Systems Corporation
- was well rated in ***Computer Language, May 86:*** "The clear choice for large-scale programming projects..."; and ***PC Tech Journal, July 86:*** "for team programming or for very large projects...stands absolutely alone." pg. 126 "documentation is certainly the best...a model of technical clarity." pg. 112.
- is the "howitzer" of Pascals and "could well be the most powerful Pascal compiler ever implemented on a microcomputer" ***PC Magazine, Oct. 29, 1985, p. 144***
- has 8-, 16-, and 32-bit integers; sets up to 64K bits
- has varying-strings of up to 64K characters
- has a full-fledged C macro preprocessor
- has many run-time library additions: UNIX™-like I/O, multiple heaps, interrupts, . . .
- has all the bit-pushing operators of C
- has *many* more extensions, getting you half way to Ada® for a non-Ada price

Power Tools for Power Users

Each compiler • generates **superb code**, with optimizations such as common-subexpression elimination and cross-jumping • sports no less than ***five* memory models** for the 8086 (Small, Compact, Medium, Big, and Large) • supports a unique implementation of register variables • supports the **8087/80287** in native mode, or **emulates** • supplies *three* floating-point formats • generates special instructions for the 80186/286 • generates code that runs in **80286 protected mode** • gives you **hundreds of error and warning messages**, helping you find those subtle bugs *before* you need a debugger's help • lets you **overlay *data*** as well as code (when used with PLINK86), for substantial space savings • lets you write **interrupt routines** directly in high-level language • lets you get "close to the machine" with built-in move/scan/compare operations • is supported by equivalent **resident and cross** compilers for the 80286 (UNIX V.2, Xenix, Concurrent DOS 286), 80386 (DOS, UNIX V.3), 68010/20/68881 (UNIX V & 4.2, GEM-DOS™), 32032 (UNIX 4.2), VAX (UNIX 4.2, VMS), RT PC, IBM 370,... • contains a **multi-modular cross-referencer** • produces ROM-able code for embedded applications • can talk to those **other languages** by those other vendors • gives you **64K run-time stack** space that can be shared with the heap • is endowed with an **amazing number of pragmas** (compiler controls) for customization to your application • has a compiler start-up **profile** • supports direct access to MS-DOS; library supports DOS 3.X file-sharing • generates symbolic debugger information for use with all known MS-DOS debuggers • allows **exec**-ing subprocesses • was designed for professional software developers, not hobbyists • comes with great technical support by a company that specializes in compilers • comes with extensive **typeset documentation** • and *more*... call or write for your information packet today...

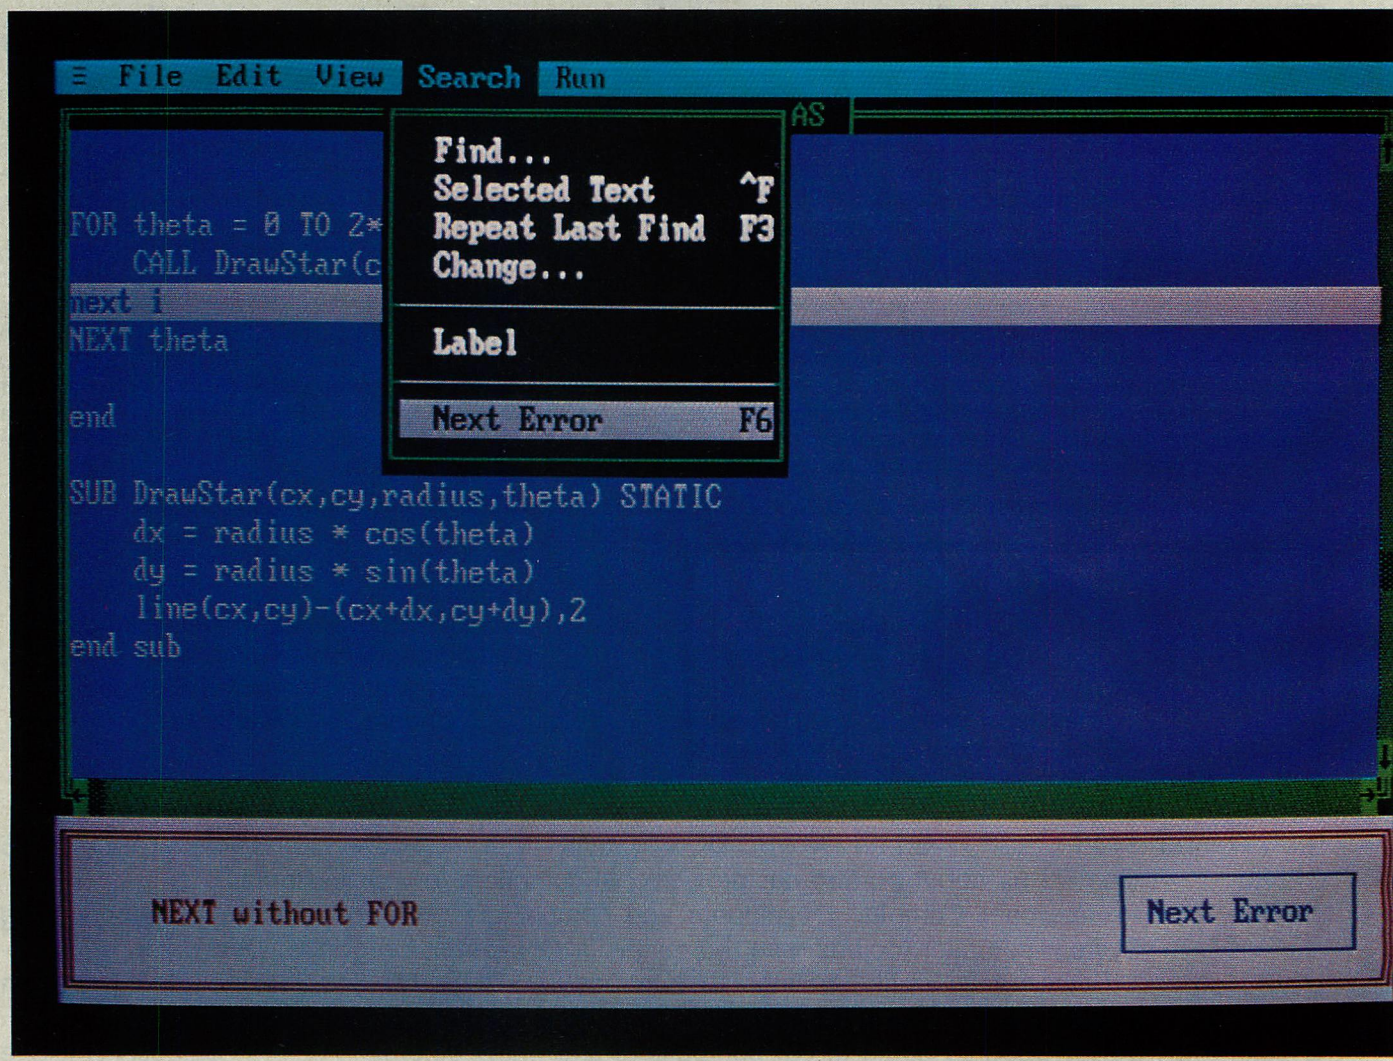
CIRCLE NO. 364 ON READERS SERVICE CARD

Finally, a language worth

For years BASIC has been everyone's first language. And for almost as long, they've been tempted by other languages. Lured by promises of more speed, more power.

We have a solution. A new language that's a substantial improvement over BASICA. Faster. More structured. Finally, a compelling reason to leave BASIC.

Introducing Microsoft's QuickBASIC Compiler, Version 2.0.



At last, you can have the latest programming techniques, combined with the solid foundation of BASIC. Our new compiler is as compatible with BASICA as you can get. At the same time it offers the extra speed and power you've been looking for.

Run faster with compiled code.

If there's one thing you've asked for, it's speed. And Microsoft® QuickBASIC simply blazes. Old BASICA programs will run up to ten times quicker once they've been compiled. Sometimes even faster.

Everything you need. Built-in.

Making programs run faster is only part of the story, though. The new Microsoft QuickBASIC Compiler includes a full-screen editor, built-in. So now you can make the jump from writing to RUNning in no time flat. Edit your program, compile it, and run it. Faster than any other BASIC compiler around. All without leaving our on-line help and prompts.

leaving BASIC for.

On the rare chance your program doesn't run 100% the first time out, we've got another surprise for you. The Microsoft QuickBASIC debugger. Our full-screen tracing lets you debug your programs while watching the source code execute. A line at a time, or with breakpoints. As easy as can be.

Our compiler is also smart enough to save you time. First, by finding any errors in one pass. Second, by putting your editor's cursor on the problem. Automatically. So you don't have to get lost in a maze of error codes and line-numbers.

The BASIC virtues. And more.

Speaking of line numbers, let's not. Because line numbers are strictly optional. And Microsoft QuickBASIC lets you use alphanumeric labels as well. Now you can GOTO *ErrorCheck* instead of line number 6815.

Or you could stop using GOTOs altogether. There are a variety of options that could make the GOTO an endangered species. Features like multi-line IF-THEN blocks. And named subprograms. Now your BASIC programs can be as structured and organized as you want.

We've only just begun to talk about the virtues of Microsoft QuickBASIC. There are dozens of enhancements to your favorite language. Things like larger arrays. Local and global variables. Reusable modules that let you create libraries of your most often-used routines. All explained in a revised manual that includes a complete language reference.

Making your quick escape.

If all these features follow your BASIC instincts, then zip on down to your nearest Microsoft dealer. That's where you'll discover the best surprise of all. The price. Only $99 for the best reason to leave BASIC.

For the name of your nearest Microsoft dealer, call (800) 426-9400. In Washington State and Alaska, (206) 882-8088. In Canada, call (416) 673-7638.

Microsoft® QuickBASIC
The High Performance Software™

Microsoft QuickBASIC Compiler Version 2.0 for IBM® PC and Compatible Computers.

BASICA Compatibility
- Sound statements including SOUND and PLAY.
- Graphics statements including WINDOW, VIEW, DRAW, GET, PUT, LINE, CIRCLE, LOCATE and SCREEN.
- Support of EGA extended graphics modes. NEW!
- BASICA structures are supported including WHILE/WEND, IF/THEN/ELSE, FOR/NEXT, GOSUB/RETURN, and event handling.

Results of Sieve Benchmark	BASICA 3.1	Microsoft QuickBASIC 2.0
Seconds per iteration	78	0.52

Complete Programming Environment
- Built-in Editor that places the cursor on found errors automatically. NEW!
- Compile entirely in memory at speeds up to 6000 lines per minute. NEW!
- Link routines once when starting a programming session and no need to link again when changing programs. NEW!
- Built-in debugger with single-step, animate, and trace modes. NEW!
- Create stand-alone programs.

Alphanumeric Labels
- Can be used to make your programs more readable. Line numbers are not required but are supported for BASICA compatibility.

Structured Programming Support
- Block IF/THEN/ELSE/END IF eliminates the need for GOTO statements. NEW!
- Subprograms can be called by name and passed parameters. Both local and global variables are supported.

Modular Programming Support
- Separate compilation allows you to create compiled BASIC libraries to use and re-use your programs.
- A library of routines to access DOS and BIOS interrupts is supplied. NEW!

Large Program Support
- Code can use up to available memory.
- Numeric arrays, each up to 64K bytes, can use up to available memory. NEW!

The fastest C

Your search for execution speed is over. The new Microsoft® C Compiler Version 4.0 is here. With blazing performance. We've added common sub-expression elimination to our optimizer that produces code that rips through the benchmarks faster than ever before.

"...the Microsoft performance in the benchmarks for program execution is the best of the lot overall." —William Hunt, *PC Tech Journal*, January, 1986.*

But speed isn't the only edge you get with Microsoft C. Other advantages include a variety of memory models like our new HUGE model that breaks the 64K limit on single data items. Plus our NEAR, FAR and HUGE pointers, which provide you greater flexibility. All this allows you to fine tune your program to be as small and fast as possible.

"Excellent execution times, the fastest register sieve, and the best documentation in this review ...Microsoft Corporation has produced a tremendously useful compiler." —Christopher Skelly, *Computer Language*, February, 1986.

No more debugging hassles. Introducing CodeView. Free.

Now, for a limited time, we'll give you an unprecedented programming tool when you buy Microsoft C, free. New Microsoft CodeView™ offers the most powerful tool yet in the war on C bugs. Forget the hex dumps. Now you can view and work with programs at any level you want. Use the program source, the disassembled object code, or

Microsoft C Compiler Version 4.00

Microsoft C Compiler

- Produces fast executables and optimized code including elimination of common sub-expressions. NEW!
- Implements register variables.
- Small, Medium and Large Memory model libraries.
- Compact and HUGE memory model libraries. NEW!
- Can mix models with NEAR, FAR and the new HUGE pointers.
- Transport source and object code between MS-DOS® and XENIX® operating systems.
- Library routines implement most of UNIX™ System V C library.
- Start-up source code to help create ROMable code. NEW!
- Full proposed ANSI C library support (except clock). NEW!
- Large number of third party support libraries available.
- Choose from three math libraries and generate in-line 8087/80287 instructions or floating point calls:
  - floating point emulator (utilizes 8087/80287 if installed).
  - 8087/80287 coprocessor support.
  - alternate math package – extra speed without an 8087/80287.
- Link your C routines with Microsoft FORTRAN (version 3.3 or higher), Microsoft Pascal (version 3.3 or higher) or Microsoft Macro Assembler.
- Microsoft Windows support and MS-DOS 3.1 networking support.
- Supports MS-DOS pathnames and input/output redirection.

Microsoft Program Maintenance Utility. NEW!

- Rebuilds your applications after your source files have changed.
- Supports macro definitions and inference rules.

Other Utilities

- Library Manager.
- Object Code Linker.
- EXE File Compression Utility.
- EXE File Header Utility.

C Benchmarks

In seconds

	Microsoft C 4.0	Lattice C 3.0	Computer Innovation C 2.3	Aztec C86 3.2	Wizard C 3.0
Sieve of Eratosthenes (register)	82.9	151.4	172.3	88.0	91.9
Copy Block	86.9	231.7	199.0	123.8	189.5

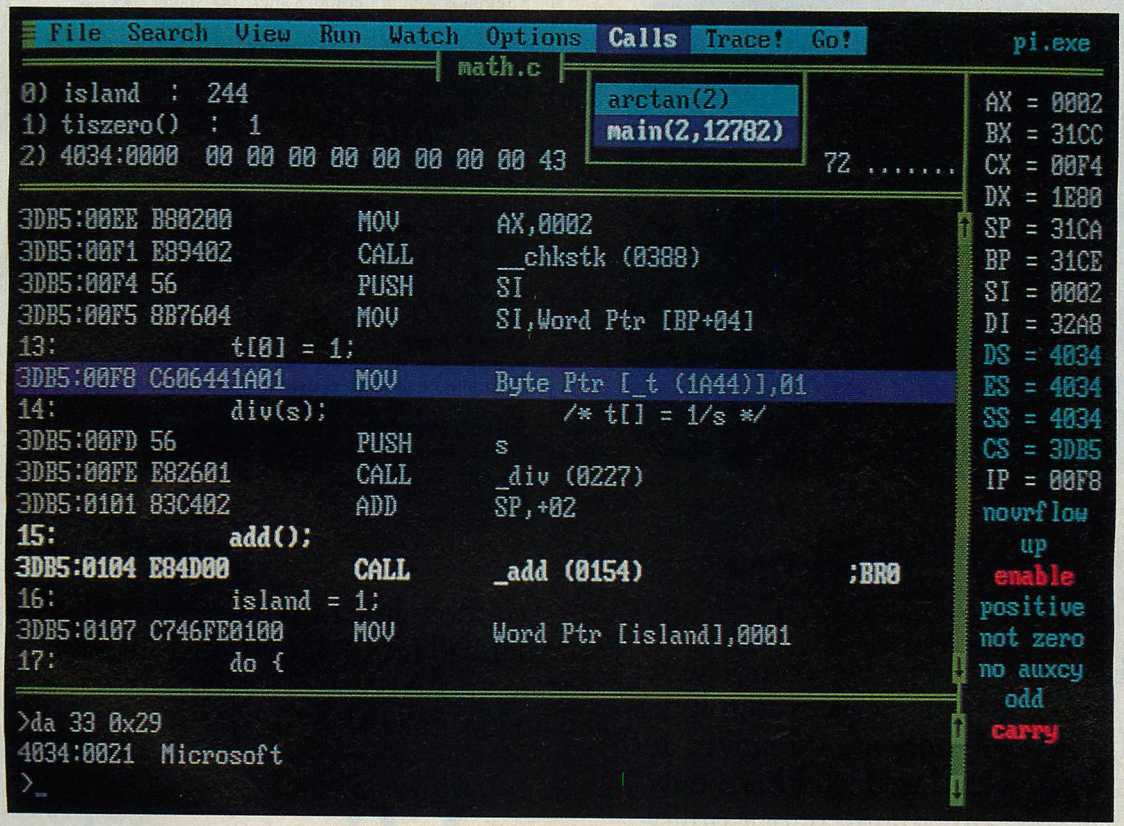
Run on an IBM PC XT with 512K memory

Microsoft CodeView
Window-oriented source-level debugger. NEW!

- Watch the values of your local and global variables and expressions as you debug.
- Set conditional breakpoints on variables, expressions or memory; trace and single step.
- Watch CPU registers and flags as you execute.
- Effectively uses up to four windows.
- Debug using your original source code, the resulting disassembly or both intermingled.
- Use drop-down menus to execute CodeView commands.
- Access the on-line help to lead you through CodeView's options and settings.
- Easily debug graphics-oriented programs since program output is kept separate from debugger output.
- Keyboard or optional mouse support.
- Enter in familiar SYMDEB or DEBUG commands.

*Reprinted from *PC Tech Journal*, January 1986, copyright 1986, Ziff-Davis Publishing.

you've ever seen.



both at the same time. Open a window to view CPU registers and flags. Watch local and global variables as well. All while your program is running.

CodeView gives you complete control. Trace execution a line at a time—using source or assembly code. Or set conditional breakpoints on variables, memory or expressions. CodeView supports the familiar SYMDEB command syntax, as you'd expect. Commands are also available through drop-down menus. Combine the new window-oriented interface with our on-line help and debugging has never been easier. Or quicker.

Take the $5 CodeView tour.

You may find it hard to believe our debugger can do all we've claimed. So we're offering test drives. Five bucks will put you behind the wheel of a Microsoft C demo disk with CodeView.† See for yourself how fast debugging can get.

For more information about the CodeView demo disk, the new Microsoft C Compiler, a list of third party library support or the name of your nearest Microsoft dealer, call (800) 426-9400. In Washington State and Alaska, (206) 882-8088. In Canada call (416) 673-7638.

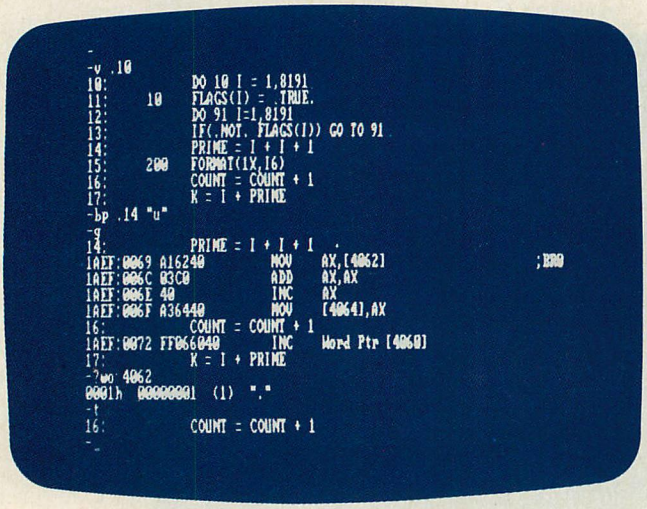
PC Magazine Product of the Year



Macro Assembler

The quickest. Bar none.

Our Macro Assembler has long been the most complete package on the market. Now it's also the fastest. Three times faster than before. And faster than anyone else. Period.

Of course, it's still the most powerful assembler on the market. It supports the standard 8086/8087 opcodes. And the new 186/286/287 instruction set. So you can make the most of the new machines.

Debugging is quicker, too. Thanks to our interactive symbolic debugger, SYMDEB. Now you can refer to variables and source code instead of getting lost in hex dumps. And this debugger also works with Microsoft languages like C, FORTRAN and Pascal. So now you can set breakpoints and trace execution—using source code for reference.

Cut your development time dramatically. Microsoft Macro Assembler's Symbolic Debug utility lets you debug your Macro Assembler programs, or debug your Microsoft C, FORTRAN or Pascal programs using your original source code or the resulting disassembly. For example, you can set breakpoints on line numbers and observe the contents of variables or expressions.

SYMDEB is just part of our complete set of utilities. Tools that make programming as fast as it should be. There are the linker and library managers you'd expect. Plus a new version of MAKE, our maintenance utility, with improvements like macro expansions and inference rules.

We've also revised the manuals. Our new Macro Assembler has a lot to offer, so we added more examples. Now our manuals are not only thorough, they're clearer than ever before.

For quick development and assembly, the choice is obvious. Microsoft. There's nobody faster.

Microsoft® Macro Assembler Version 4.0 for MS-DOS®

Macro Assembler
- Fastest macro assembler for MS-DOS computers.
- Supports the 8086/8087/8088 and the 186/286/287.
- Define macros.
- Conditional assembly.
- Optional case sensitivity for symbols.
- 100% upward compatibility from earlier versions of both the Microsoft and IBM® Macro Assemblers.

Interactive Symbolic Debug Utility
- Source level debugger for programs written in Microsoft Macro Assembler, C Compiler, FORTRAN, and Pascal.
- Screen swapping helps debug highly visual applications.
- Set breakpoints on line numbers and symbols.
- Single step to follow program execution.
- Disassemble object code.
- Display and modify values.
- Full I/O redirection.

Program Maintenance Utility
- Rebuilds your applications after your source files have changed.
- Similar to UNIX™ MAKE utility.
- Supports macro definitions and inference rules.

Library Manager
- Create, organize and maintain your object module libraries created with Microsoft languages.
- Set page size from 16 to 32678, to create compact and granular libraries.

Object Code Linker
- Simple overlaying linker combines relocatable object modules created using Microsoft languages into a single program.
- Load Map generation.
- Specify from 1 to 1024 segments.

Cross-Reference Utility
- Creates a cross-reference listing of the definitions and locations of all symbols used in an assembly language program, which makes debugging programs easier.

Microsoft EXE File Compression Utility
- Packs EXE files for smaller size on disk and faster loading at execution time.

Microsoft EXE File Header Utility
- Display and modify EXE file header, allowing you to tune the stack size and initial memory allocation.

For the name of your nearest Microsoft dealer call (800) 426-9400. In Washington State and Alaska, call (206) 882-8088. In Canada, call (416) 673-7638.

ELLIS COMPUTING, INC.

☐ Utah BASIC
Develops and debugs programs. Defines single- and multi-line functions. Limits number of characters in response and time allowed for response. Accesses math capabilities. Built-in screen text editor. Adds, deletes and corrects programs. Creates random access and sequential files.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $40

☐ Utah COBOL
Compiles and executes 5,000 statements. Based on ANSI-74 standards. Generates in-line machine language. Handles random access and sequential files, copy statement, character string, edit, 16-bit binary and 18-digit packed decimal data types.
IBM AT, PC, XT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1985 ☐ Cost: $40

☐ Utah FORTRAN
Based on ANSI-66 standards, FORTRAN IV. Includes if-then-else constructs, trace style debugging, copy statement, arrays up to 7 dimensions, free format read and sequential/random file support extensions.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1986 ☐ Cost: $40

☐ Utah Pascal
Reviewed Jul 1986 p. 94.
Handles CRT screen formatting with cursor control, graph/statistic procedures, case statement, get/put, 64K strings, dynamic storage and external procedures. Includes separate auto loading compilation, sequential/random files, 14-digit precision, floating point 64 to 63 and BCD math.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $40

☐ Utah PILOT
Programming language designed for data entry, programmed instruction and testing. Interpreter includes full-screen text editor and commands to drive optional equipment comprising VTRs and voice response units. Complies with PILOT-73 standards. Supports IBM character set including foreign language characters.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $40

ENERTEC, INC.

☐ MCP (Micro Concurrent Pascal)
Allows direct hardware addressing, external calling of assembly language routines, multi-tasking for real-time environment. Run-time kernel included to reside on target microprocessor.
IBM PC ☐ 256 KB req. ☐ Copies sold: 300 since 1980 ☐ Cost: $1,795 and up

FARADAY ELECTRONICS

☐ GW9000
Implementation of Microsoft BASIC compatible with IBM advanced BASIC. Requires MS9200. Supports Faraday motherboards.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $150

FAST FEEDBACK TECHNOLOGIES

☐ Forth
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $150

GENERAL DATA SYSTEMS, LTD.

☐ Dx Database Language
Fourth generation functionality in COBOL setting. Supports simple and production data bases. Accesses permanent data base relations, temporary relations, parametric tables and working files/storage. Handles COBOL data types with conversions between types.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

GIMPEL SOFTWARE

☐ C-terp
Reviewed May 1986 p. 153.
C interpreter and development environment. Supports K&R C language and ANSI C extensions. Reconfigurable editor and standard library. Links in object modules compatible with supported compiler. Software paging option for large applications. Large memory model. Batch mode, 8087 and multiple modules.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,500 since 1984 ☐ Cost: $300

GOLD HILL COMPUTERS

☐ GC LISP
Reviewed Dec 1985 p. 98.
Develops expert and natural language systems and intelligent interfaces to complex programs. Includes DOS support, full-screen intelligent editor, macros and color graphic support. Provides multi-tasking, I/O streams, closures for object-centered programming and multiple-value-returning functions.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $495

GRID SYSTEM CORP.

☐ C Features
Implements C, supports I/O, floating point utilizing Intel 8087 and bit fields.
IBM PC

HARVARD ASSOCIATES, INC.

☐ PC LOGO
LOGO implementation. Features search-and-replace function and programmed function keys to load and save files and pictures. Provides examples of turtle graphics, word and list manipulation, music, programming utilities and business applications.
IBM PC, XT, PCjr ☐ 64 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $150

HARVARD SOFTWORKS

☐ HSFORTH
FORTH interpreter/compiler. Supports DOS 2.X file system and Mb programs. Features 8088, 80186, 8087 assembler, optimizer, floating point, string functions, editor, graphics, sound, music and debug tools including decompile and trace. I/O interface available.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $395

HAUPPAUGE COMPUTER WORKS, INC.

SEE AD ON PAGE 187

☐ 87 Math Pak
Collection of 8087/80287 math coprocessor utilities. Provides math support to IBM BASIC compiler and Microsoft's QuickBASIC compiler. Matrix manipulation and FFT routines usable with IBM BASIC, FORTRAN and Pascal compilers and QuickBASIC.
IBM PC, XT, AT, PCjr ☐ Copies sold: 2,500 since 1983 ☐ Cost: $180-$279

HUMAN COMPUTING RESOURCES CORP.

☐ HCR/Pascal
Direct access to UNIX environment. Generates C language code. Macro preprocessor emulates C preprocessor. Includes UCSD dynamic string package and interface to UNIX system calls. Separate compilation of multiple module programs.
IBM PC, AT, RT ☐ 256 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $500 and up

HAUPPAUGE COMPUTER WORKS, INC.
358 Veterans Memorial Highway,
Suite MSI
Commack, NY 11725
516-360-3827

87 QB Pak is a library which adds math coprocessor support to Microsoft's QuickBASIC and the IBM Basic Compiler, speeding math calculations by up to 15 times. The math coprocessor support is added at the link stage, so no changes are needed to the source code.

☐ UX-BASIC
Multi-user, multi-tasking business programming language for UNIX and MSDOS based systems. Features interpreter and compiler, structured code, modular programming, BCD arithmetic, indexed sequential files, 32 character labels and debugging facilities. Meets ANSI minimal BASIC standards. Available as runtime.
IBM XT, AT ☐ 500 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $95-$7,800

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ C"
IBM no. 6871-466. Designed for system implementation. Compatible with UNIX Version 7 based C and a library.
IBM PC, XT, 3270-PC ☐ Cost: $350

☐ APL
Reviewed Nov/Dec 1983 p. 135.
IBM no. 6024-077. APL compiler.
IBM PC ☐ Cost: $195

☐ APLDI/PC (APL Data Interface)
IBM no. 6410-978. Provides file inquiry, selective data extraction and reporting. Requires IBM 8087 Math Co-processor.
IBM PC, XT ☐ 192 KB req. ☐ Cost: $325

☐ Assembler H XT/370
IBM no. 5668-962/01.
IBM XT/370 ☐ Cost: $432

☐ BASIC Compiler
IBM no. 6024-003.
IBM PC, XT, AT, PCjr, Portable PC ☐ 128 KB req. ☐ Cost: $300

☐ BASIC Compiler 2.0
IBM no. 6024-216; 6280-078. Specifically suited to run under IBM's TopView environment in IBM PC networks.
IBM PC, XT, AT, Portable, Convertible ☐ 64-128 KB req. ☐ Cost: $495 (6024-216); $539 (6280-078)

☐ BASIC Interpreter
IBM no. 6024-101. Compiler.
IBM PCjr ☐ Cost: $75

☐ BASIC Processor and Library XT/370
IBM no. 5668-996/01.
IBM XT/370 ☐ Cost: $1,008

☐ BASIC Reference Version 3.2
IBM no. 6280-075. For DOS 3.2. Allows open statement to support IBM PC and IBM Token-Ring Networks. Provides extended graphics adapter support for enhanced modes via palette, palette using and color statements.
IBM PC, XT, AT, Portable, PCjr, Convertible ☐ 128 KB req. ☐ Cost: $45

☐ C Compiler
IBM no. 6280-072, 081. Includes selectable-memory-model support, mixed-memory-model programming, interactive symbolic debug, implemented register support and utilities for program maintenance.
IBM PC, XT, AT, Portable, Convertible ☐ 256-320 KB req. ☐ Cost: $495

☐ COBOL Compiler
Reviewed Aug 1985 p. 107.

IBM no. 5669-056. Compiler and interpreter. Common syntax and semantics. Character and graphics modes. IEEE format floating point numbers and 4-byte integers.
IBM RT PC ☐ Cost: $1,000

☐ **RT PC FORTRAN 77**
IBM nc. 5669-054. Compiler and runtime utilities. Includes Extended FORTRAN Language and Rational FORTRAN structured preprocessors for FORTRAN. Logical *1 and double complex data types. Internal files, recursion, character strings. Include statements. Binary initialization constants.
IBM RT PC ☐ Cost: $650

☐ **RT PC Pascal**
IBM no. 5669-055. Compiler and runtime library. IEEE format floating point numbers and 4-byte integers. Character and graphics modes.
IBM RT PC ☐ Cost: $1,000

☐ **VS COBOL Workbench**
IBM no. 6205-286. Provides IBM mainframe and IBM PC programming facilities. Includes full screen COBOL source editor, interactive syntax checker/compiler, screen painter and animated source code analysis.
IBM PC, XT, AT, 3270-PC ☐ Cost: $4,000

IMPACC ASSOCIATES, INC.

☐ **Interactive - C**
C language development tool. Provides K&R interpreter. Codes and debugs C programs. Memory resident. Supports graphics. Includes detailed syntax and run-time diagnostics. Checks array subscript bounds. Verifies pointer references to data/logic. Entry point and parameter compatible with Lattice compiler.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $249

INTECK, INC.

☐ **MUMPS for the IBM PC**
Uses IBM PC hardware features including tone generation and function keys. Generic MSDOS version available for 8088/8086 and related machines. Uses B-tree file structures.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $495

INTEGRAL QUALITY, INC.

☐ **IQCLISP**
Implements common Lisp.
IBM PC ☐ 400 KB req. ☐ Copies sold: 300 since 1986 ☐ Cost: $300

☐ **IQLISP**
Reviewed Apr 1984 p. 112.
Includes 8087 support for floating point and graphics. Hierarchical directory access and random I/O (DOS 2.0).
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $175

INTEL CORP.

☐ **ASM 51**
Symbolic macro assembler. Produces object modules from Intel's 8051 microcontrollers' Macro Assembly language instructions that can be relocated and linked to other 8051 modules including PL/M 51 modules. Allows symbolic access to hardware registers, I/O ports, control bits and RAM addresses.
IBM XT, AT ☐ Cost: $750

☐ **PL/M 51**
Provides development support for Intel's 8051 single-chip microcontrollers. Supports Boolean processing, syntax checker, multiple optimization levels and cross-reference generation.
IBM AT, XT ☐ Cost: $750

INTERACTIVE SYSTEMS CORP. (CA)

☐ **INfort**
FORTRAN compiler.
IBM AT/PC/IX

LABORATORY MICROSYSTEMS, INC.

☐ **PC/FORTH**
Supports graphics, communications and process control. Interpreter/compiler, screen editor, editor, assembler, debugging utilities and demonstration programs. Cross-compilers for 8080, Z-80, 8086, 68000, 6502, 8096 and 8051 available.
IBM PC, XT, AT ☐ 96 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $150

LAHEY COMPUTER SYSTEMS, INC.

Reviewed Jan 1986 p. 82.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20,000 since 1981 ☐ Cost: $500

☐ **C-Food Smorgasborg**
Set utility functions for Lattice C program including decimal arithmetic package, I/O functions, and IBM PC BIOS interface.
IBM PC ☐ 128 KB req. ☐ Cost: $150

LEVIEN INSTRUMENT CO.

☐ **BYSO LISP**
LISP interpreter that provides file handling, full screen editor with four printing styles, arrays, macros and access to all system functions. Includes Visual Syntax, an editor that displays programs as data flow graphs. Supports LISP 1.5, MACLISP and Common LISP.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $150-$395

LIFEBOAT ASSOCIATES

SEE AD ON PAGE 291

☐ **Lattice C Compiler**
Reviewed Nov/Dec 1983 p. 110.
Full C implementation with library and I/O subroutines. Produces relocatable machine code in Intel's 8086 object module format.
IBM PC ☐ 128 KB req. ☐ Copies sold: 25,000 since 1984 ☐ Cost: $500

☐ **Plink II**
Two-pass linkage editor. Supports complex overlay schemes. Links programs for 8080 machines. Works with PASM, Microsoft, Whitesmith's or BD Software's format relocatable files and libraries.
IBM PC ☐ 64 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $350-$395

☐ **Run/C**
Reviewed May 1986 p. 153.
Shell/trace/profiler commands, detailed error messages and library of over 100 C example programs.
IBM PC ☐ 256 KB req. ☐ Cost: $150

LINK DATA, INC.

☐ **MPC/68**
Allows IBM to run software written in COBOL, DIBOL and CADOL languages without modification.
IBM PC, XT, AT ☐ 128 KB req.

LIONHEART PRESS, INC.

☐ **BASIC Compiler**
Reduces execution time of programs. Accepts code with or without line numbers. Creates and manages index files. Changes screen attributes within user's program.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $150

☐ **ProBASIC**
BASIC pre-processor. Merges blocks of source code. Marks references using labels rather than numbers.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $75

☐ **Structure**
Transforms BASIC into a structured language. Library manager indexes and stores routines user wants to use in other programs. Processor takes structured code and transforms it into standard BASIC for user's interpreter and compiler.
IBM PC ☐ Introduced: 1985 ☐ Cost: $75

THE LISP CO.

☐ **TLC-LISP**
Reviewed Apr 1984 p. 112.
Features fixed and floating point math, display editor including block move and search operations, source files with editor, debugger and OS interface for user customizaton, and compiler for user-defined functions.
IBM PC ☐ Cost: $250

LOGICWARE, INC.

☐ **MPROLOG**
Reviewed Jan 1986 p. 145.
Applications include expert systems, natural-language software, CAI/diagnosis, computer vision and voice recognition.
IBM PC, XT/370

You Can Get Programming Software Anywhere.

Here Are 10 Reasons Why You Should Insist On LIFEBOAT.

Everything the professional programmer needs, from a wide selection to our Tech Support Hotline to our competitive prices! Lifeboat's got the answers ...and the reasons why you'll insist on Lifeboat!

1 Latest Versions of Top-Rated Programs ... An unbeatable selection of up-to-the-minute programs. Including...

ADVANTAGE C++ • Advantage Link • Advanced Trace 86 • BASIC_C • Bastoc • BetterBASIC, Math Support, Runtime • Brief • Btrieve • C-86 • C-FOOD Smorgasbord • C Power Packs • csd C Source Debugger • C-terp • c-tree • C Tools Plus • Essential C Utility Library • Curses • CVUE • dBC III • db_Vista • dBX • Dr. Halo II • EMACS • Essential Graphics • Fast C • FirstTime • Float 87 • Greenleaf Comm Library • Greenleaf Functions • GSS Graphic Development Toolkit • GSS Toolkit—Plotting • Halo • Hammer • Informix • Instant C • Lattice C • Let's C • LMK • LSE • Mark Williams C • Microsoft BASIC Interpreter, C, COBOL, FORTRAN, Macro Assembler, Pascal • Microsoft Windows • QuickBASIC • Norton Utilities • Opt-tech Sort • Panel • Pasm86 • PC-Lint • Periscope I • Periscope II • Pmaker • Pmate • PowerMake • Pre-C • ProFORTRAN • ProPascal • Ptel • Quelo Linker/Assembler • Rtrieve • RUN/C-The C Interpreter • RUN/C Professional • Text Management Utilities • TopView Toolbasket • VEDIT, VEDIT PLUS, V-PRINT, V-SPELL • Wizard C • WINDOWS FOR DATA • Xtrieve • ZView

...and so much more!

2 Wide Selection ... Over 200 programs to choose from, covering C++, C, BASIC, Pascal, RPG II, Translators, Editors, Function Libraries, Language Utilities, Data Base Record Managers, Graphics, Communications and more!

3 Tech Support Hotline ... Immediate help with technical problems for all the software we publish. Lifeboat's there when you need us most!

4 Programming Tools Guide... A comprehensive reference catalog to help you select programs best suited to your needs.

5 Personal, Professional Advisor ... Your own Account Rep to advise you on the best programming software for your specific needs.

6 Automatic Update Service ... The easiest way to stay on top of the software market, with automatic notification of all new and updated programs, pre-tested and reviewed by Lifeboat.

7 Newsletter, Conference & Seminar Programs ...To keep you up-to-date on the newest products, technical developments and technical support relating to the world of software programming.

8 Special Orders... In addition to our extensive selection, Lifeboat offers customers the option to select from an open ended product line.

9 Competitively Priced ... Our prices are competitive with those of other suppliers that offer none of the essential services to which we are committed.

10 Prompt Delivery... Our huge inventory allows Lifeboat to ship most of our products the same day they are ordered, including overnight deliveries.

BRAND NEW FROM LIFEBOAT

ADVANTAGE C++

They say you can't be all things to all people. But Lifeboat's ADVANTAGE C++ proves that you can be! This exciting new product, developed by AT&T, represents a major programming breakthrough.

ADVANTAGE C++

- **Opens the door to object-oriented programming.**
- **Allows programs with greater resilience, fewer bugs.**
- **Lets you write reliable, reusable code that is easier to understand.**
- **Includes many enhancements to C, yet maintains full compatibility with existing C programs.**
- **Is the key to developing large and sophisticated programs more productively.**
- **All the benefits of C, without its limitations.**

ADVANTAGE C++ is available for the most popular C compilers, Lattice C and Microsoft C.

So why be limited to just C... When you can have all these pluses!

ADVANTAGE C++ from Lifeboat.

CIRCLE NO. 279 ON READERS SERVICE CARD

LOGITECH, INC.
SEE AD ON PAGE 281

☐ **Modula-2/VX86**
Reviewed Dec 1984 p. 154.
Compiles down to 8086/8088 native machine code. Type checking and controlled access to hardware and operating software.
IBM PC ☐ Cost: $6,500

LOKI ENGINEERING, INC.

☐ **MAGIC/L Interactive Language**
Structured interactive and extensible language. System-independent libraries. Access to system calls, CLI and inline assembler. Suited to prototyping and productization in hardware/software applications such as robotics, vision processing, data acquisition and process control.
IBM PC ☐ 196 KB req. ☐ Copies sold: 3,000 since 1981 ☐ Cost: $295-$750

LUCID, INC.

☐ **Portable Common LISP**
Common Lisp compiler, interpreter, debugger development environment. Uses proprietary compilation techniques to produce Lisp code that runs on many computer architectures. Transports applications between various computer systems for development and delivery needs.
IBM RT PC ☐ 4,000 KB req.

MANSFIELD SOFTWARE GROUP, INC.

☐ **Personal REXX**
Interpreter implementation of REXX language. Works as command language or macro language for KEDIT. Includes functions for DOS file, screen and directory access.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 3,000 since 1985 ☐ Cost: $125

MANX SOFTWARE SYSTEMS, INC.

☐ **C 86-c, d, p**
Reviewed Nov/Dec 1983 p. 110; Jan 1986 p. 82.
Includes C compiler, assembler, overlay linker, full-screen editor, libraries, UNIX utilities, interpretive/native compilers, ROM support, 80186/80286/8087/80287 support and CP/M-86 libraries in DOS format.
IBM PC ☐ Cost: $99-$499

MBP SOFTWARE AND SYSTEMS TECHNOLOGY, INC.
SEE AD ON PAGE 293

☐ **Visual COBOL**
Reviewed Apr 1984 p. 76; Aug 1985 p. 107.
ANSI 74 Level II native code compiler includes screen management system, interactive debugger, multi-keyed ISAM, extended chaining, access to DOS, callable sort, RM-compatible extensions to accept/display verbs. Version available for Novell network.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $1,150

MERIDIAN SOFTWARE SYSTEMS, INC.

☐ **Ada**
Compact compiler available in self-hosted and cross-compiler configurations.
IBM PC

☐ **Make**
Recompilation utility. Maintains relationships among elements of hierarchically organized software systems.
IBM PC

METAWARE, INC.
SEE AD ON PAGE 283

☐ **High C Compiler**
Compiles ANSI and extended C across machines and OSs in resident and cross modes. Designed for industrial-strength use by software developers. Supports 3 integers and real sizes, dynamic internal tables, and 5 memory models on 8086 family.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $495-$5,000

☐ **Professional Pascal Compiler**
Reviewed Jul 1986 p. 94.
Designed for industrial-strength use by software developers. Provides Ada-like packages for separate compilation with data abstraction and iterators from CLU, extra operators from C and Modula, three integer and real sizes, retyping, calling conventions and dynamic internal tables.
IBM PC ☐ 256 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $595-$5,000

MGLOBAL

☐ **CCSM**
ANSI Standard MUMPS-compatible compiler. Multi-user. B-tree structure. Includes full-screen editor, virtual memory and 8087 and BCD support. Micro-mainframe-mini transportable.
IBM PC ☐ Cost: $60

MICRO FOCUS, INC.

☐ **CIS COBOL**
Interactive COBOL compiler to federal low-intermediate level. Provides screen formatting and data entry mechanisms. Supports MF's Animator, Slideshow and Forms-2.
IBM PC ☐ 64 KB req. ☐ Copies sold: 10,000 since 1979

☐ **Compact Level II COBOL and High Performance Level II COBOL**
Provides CRT screen handling and loads segments/sub-programs dynamically. Supports MF's Animator, Slideshow and Forms-2.
IBM PC ☐ 64-256 KB req. ☐ Copies sold: 5,000 since 1981

☐ **Compact Level II COBOL/ET**
ANSI 74 COBOL compiler. Generates intermediate code from source programs created using standard UNIX editor such as vi. Supports large programs, 4 COBOL file formats and calls to programs written in C.
IBM PC, RT

☐ **High Performance Level II COBOL**
Reviewed Apr 84 p. 76; Jul 85 p. 111; Aug 85 p. 107.
Integrated COBOL programming environment for the development of mainframe COBOL programs on IBM PC workstations. Integrates tools such as Animator, for interactive visual debugging, and Forms, for prototyping interactive displays.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 5,000 since 1985

☐ **High Performance Level II COBOL/Multiuser**
ANSI 74 COBOL compiler. Record locking available on per file basis. Allows file sharing with full pathname support between COBOL programs running independently in multi-processing environments. Compatible with Micro Focus' Animator debugging tool and Sourcewriter applications generator. PCDOS requires Novell Netware.
IBM XT, AT

☐ **Professional COBOL**
Reviewed Aug 1985 p. 107.
Includes full screen editing, forms generation and program animating functions. Creates, analyzes, debugs and modifies programs.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ 256 KB req. ☐ Copies sold: 4,000 since 1983

☐ **VS COBOL Compiler**
High speed compiler. Generates 8086 native code. Supports ANSI'74 and ANSI '85 standards. Screen and keyboard support, internal sort/merge, communications and report writer support.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ Introduced: 1985

MICRO MOTION

☐ **MasterForth**
Screen editor, macro-assembler, strings, 32-bit integer arithmetic and hi-res graphics. Interpreter, compiler, assembler, editor and OS co-resident. Target compiler available.
IBM PC, XT, AT ☐ 32 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $125-$305

MICROSOFT CORP.
SEE AD ON PAGES 284/285/286/287/288

☐ **BASIC Compiler**
Provides double-precision transcendental functions with accuracy to 16 digits. Library contains routines for specific applications.
IBM PC, AT ☐ 64 KB req. ☐ Introduced: 1979 ☐ Cost: $350

☐ **BASIC Interpreter**
Writes, edits and debugs programs with interactive, line-by-line data entry and special editing and debugging commands. Provides access to program as it is created. Statements entered directly into memory and can be run at any time.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000,000 since 1975 ☐ Cost: $350

☐ **Business BASIC Compiler**
IBM PC ☐ 64 KB req.

☐ **C Compiler**
Reviewed Nov/Dec 83 p.110; Jan 86 p.82; Jul 86 p.29.
IBM PC, AT ☐ 256 KB req. ☐ Cost: $395

☐ **COBOL**
Reviewed Jul 1985 p. 111; Aug 1985 p. 107.
Data entry during program execution, screen formatting, interactive debugging and large program support. Supports Microsoft Sort.
IBM PC, AT ☐ 128 KB req. ☐ Introduced: 1979 ☐ Cost: $995

☐ **FORTRAN**
Reviewed Oct 1985 p. 149; Jul 1986 p. 29.
X3.9 ANSI subset level. Utilizes 8087 floating point coprocessor for numeric processing and 8087-emulation software. Supports multi-users.
IBM PC, AT ☐ 150 KB req. ☐ Introduced: 1981 ☐ Cost: $495

☐ **LISP**
AI language. Includes 400 common LISP functions, macros and special forms. Implements in machine code.
IBM PC

☐ **Macro Assembler for MSDOS**
Reviewed Oct 1985 p. 48; Jul 1986 p. 169.
LINK-80 connects relocatable modules and converts to executables. CREF-80 lists all intermodules referenced. LIB-80, run-time library manager. Includes source symbolic level debugger.
IBM PC ☐ 96 KB req. ☐ Introduced: 1977 ☐ Cost: $100

☐ **MuLISP Artificial Intelligence Development System**
Upwardly compatible extensions, trace facility and interactive screen-based tutorial system. Implements corrections via control characters.
IBM PC ☐ 64 KB req. ☐ Introduced: 1979 ☐ Cost: $200-$250

☐ **Pascal**
Reviewed Jul 84 p. 58; Jul 86 p. 29; Jul 86 p. 94.
Supports multi-users with file sharing and file/record locking. Address types, super arrays, separate compilation and variable length strings.
IBM PC, AT ☐ 140 KB req. ☐ Introduced: 1981 ☐ Cost: $495

☐ **QuickBASIC Compiler**
Works with previously written programs. Supports BASIC sound/graphic statements including play, sound, locate, draw, get, put, line, circle, pset and color. Offers language extensions when moving into structured programming. Alphanumeric labels optional.
IBM PC ☐ Cost: $99

MICROTEC RESEARCH, INC.
SEE AD ON PAGE 304

☐ **C Language System**
Accepts C source programs as input and translates source into symbolic assembly language.
IBM PC ☐ Cost: $4,000-$6,000

☐ **High C Compiler**
IBM PC

☐ **Macro Meta Assembler**
Symbolic microcoding for bit-slice or microprogrammed devices. Includes definition and assembler programs, linker and PROM formatter.
IBM PC ☐ 64 KB req. ☐ Introduced: 1978

☐ **Pascal**
Accepts Pascal source programs as input and translates source into symbolic assembly language.
IBM PC ☐ Cost: $4,000-$8,000

MICROWAY, INC.
SEE AD ON COVER 3

☐ **87BASIC**
Provides user transparent and 8087 support for IBM BASIC Compiler. Performs trigonometrics, transcendentals, addition, subtraction, multiplication and division. Includes patches to IBM BASIC Compiler.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 4,500 since 1982 ☐ Cost: $150

☐ **87BASIC/Inline**
Generates 8087 inline code. Transforms IBM BASIC Compiler output into Assembly language source file. Produces independently compiled subroutines. Allows BASIC programs to have over 64 K of code. Requires 8087, IBM BASIC Compiler and IBM/Microsoft Assembler.
IBM PC, XT, AT

MILLER MICROCOMPUTER SERVICES

☐ **MMSFORTH**
Total FORTH environment. Includes full-screen editor, in-line assembler, user-callable disk I/O with verification and tape I/O, virtual memory with multiple block buffers and lo-res graphics. Features copies utility, user-definable windows, double-precision integer math and string-handling.
IBM PC, XT, AT ☐ Cost: $180-$1,000

MIPS SOFTWARE DEVELOPMENT, INC.

☐ **Dyalog APL**
Includes nested arrays, full screen editor, screen management facility, session manager, event trapping, commercial formatter and external function libraries.
IBM AT, RT ☐ 500 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $900-$9,000

MIX SOFTWARE

☐ **C+**
Standard K&R C compiler and linker with UNIX V7 extensions. UNIX compatible function library with over 150 functions.
IBM PC ☐ Cost: $40

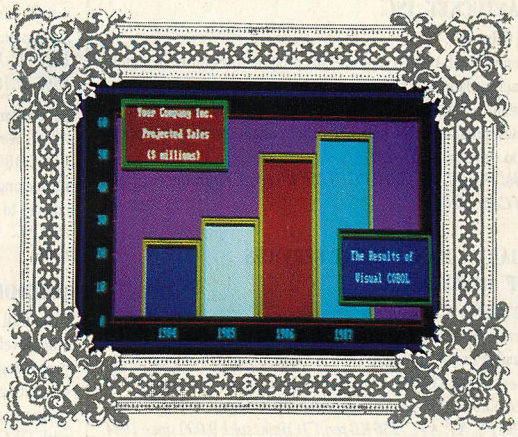
MODULA CORP.

☐ **Modula-2 Compiler/Interpreter**
Suited to the design and implementation of larger software systems including those which interact with the host at the lowest levels.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,100 since 1984 ☐ Cost: $150-$1,000

☐ **PC Modula-2**
Implements the full language and provides modules for color or hi-res grapics and the Microsoft Mouse.
IBM PC, XT, AT ☐ 128 KB req.

MODULA RESEARCH INSTITUTE

☐ **M2M-PC**
Reviewed Dec 1984 p. 154.
Modula-2 compiler. Uses 4-pass technique and run-time system.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $40



MORGAN COMPUTING CO., INC.

☐ **Professional BASIC**
Reviewed Jun 1986 p. 52.
Window-oriented interpreter. Includes 18 windows into program execution, syntax checking, optional line labels, large integers, real numbers, breakpoints, English error messages and cross-referencing.
IBM PC, AT, XT ☐ 512 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $99

the Art of Visual COBOL

COBOL programming has just been elevated to an art form thanks to Visual COBOL from mbp. This comprehensive COBOL compiler package gives you mainframe screen management capabilities for your IBM PC. As a result, Visual COBOL turns your color display into a canvas on which you can create professional data entry screens and a very visual user interface.

The heart of Visual COBOL is an interactive mask editor that encourages an artistic approach to screen design. By extending ANSI standards and providing full text editing capabilities, Visual COBOL allows you to create your own masterpiece using a full palette of foreground and background colors. You can easily move, insert, or delete fields; create an unlimited number of windows; even add eye-catching screen animation. In addition, Visual COBOL provides program-controlled video attributes for changing I/O field definitions in real time.

Once you add the final touches to your screen design, the mask editor automatically preserves your work of art in a separate screen library. At the same time, a WORKING-STORAGE definition is created for your mask. It's that simple.

Visual COBOL gives you the screen management capabilities you need. It can make the difference between ordinary software, and software that sells. Just as important, Visual COBOL increases your productivity by saving you valuable time in both the design and coding stages of program development. What's more, screen modifications can be done without recompiling the program, so maintenance is easy.

In addition to providing impressive artistic capabilities, Visual COBOL also gives you high-speed native 8086 machine code, a lightning quick SORT, extended CHAINing features, a new interactive debugger, execution of DOS commands, multi-keyed ISAM structure, ANSI compatibility, GSA certification, and much more. Versions that support XENIX, UNIX, and both the IBM and Novell networks are also available.

To fully appreciate the screen management capabilities of Visual COBOL, you must see it on your own PC. So, for a limited time only, mbp is offering qualified COBOL programmers the opportunity to receive a comprehensive demonstration disk that illustrates the creative potential of this powerful compiler. To find out if you qualify for this offer, simply mail the coupon below or call mbp's toll-free number.

Visual COBOL. $1150.

CIRCLE 105 ON READER SERVICE CARD

MOUNTAIN VIEW PRESS, INC.

☐ FORTH
Public domain FORTH for learning and writing programs. Editor and FORTH assembler.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $175

MYSTIC CANYON SOFTWARE

☐ Pascal
Reviewed Jul 1986 p. 94.
Interactive, multi-tasking Pascal compiler. Allows programs up to 1MB. Includes full screen editor and help windows. Displays error messages on screen and places cursor at point of error.
IBM PC ☐ Cost: $32

NANTUCKET, INC.

☐ Clipper
Compiles dBASE III and III Plus program files into executable machine language files. Features arrays, user-defined functions, menu commands, ability to call C and Assembly language routines, programmable help and other enhancements for application development.
IBM PC, XT, AT, 3270 PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $695

NIAKWA MANAGEMENT SERVICES OF AMERICA, INC.

☐ BASIC-2C Compiler
Screen I/O is bit mapped, yielding baud rates of up to 100,000 baud. Provides program overlays and merging, common variables, COM CLEAR, dynamic variable, space functions, BCD accurate arithmetic and commonly used forms of $GIO.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 9,000 since 1984 ☐ Cost: $195-$950

N.I.A.L. SYSTEMS, LTD.

☐ Q'Nial (Nested Interactive Array Language)
Provides structured programming constructs and infix notation. Combines rectangular array structures of APL with nested lists of LISP. Used for prototyping and thinking through the design of artificial intelligence applications.
IBM PC ☐ 512 KB req. ☐ Copies sold: 120 since 1982 ☐ Cost: $300

NOSTRADAMUS, INC.

SEE AD ON PAGE 240

☐ Pascal Plus
Set of external procedures in assembly language. Designed for IBM/MS Pascal's interface environment. I/O facility works with DOS 2.0 or higher. Expanded text display is available with IBM hardware and graphics adaptor.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $60

☐ Turbo Spawn
Procedure shell for Turbo Pascal. Runs whole programs as if they were instructions in Turbo Pascal. Issues DOS commands from within user's program. After program is complete, user continues on at next instruction. Makes no modifications to Turbo Pascal or any other program.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $40

☐ Turbo-Plus
Set of external procedures in assembly language and designed for Turbo Pascal's interface environment, I/O facility works with DOS 2.0 and higher.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $60

NOVELL, INC.

☐ NetWare/BI-286
Business BASIC II interpreter. Prevents rounding errors. Develops/debugs on line-by-line basis. Supports indexed, direct and sort file structures. Performs program renumbering and cross-referencing.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $595-$1,195

☐ NetWare/RM
Allows NetWare users to run multi-user applications written in RM/COBOL. Allows applications that use the record and/or file locking features of RM/COBOL to be implemented without change to the source code.
IBM PC, AT, XT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $495

OMTOOL CORP.

☐ Softbol
High-level procedural language for interactive business data processing. Includes compiler, symbolic debugger, external subroutines, run-time system, ISAM file, sort utility and inter-program communication. Multi-user file access. Compatible with DEC's DIBOL-83.
IBM PC

OREGON SOFTWARE, INC.

☐ Pascal-2
Multi-pass optimizing compiler for standard Pascal with utilities to format, cross-reference, profile, and debug programs. ISO Level 1 certified.
IBM AT ☐ 56 KB req. ☐ Copies sold: 250 since 1981 ☐ Cost: $395-$7,800

PCOLLIER SYSTEMS

SEE AD ON PAGE 6

☐ Modula - 2PC
Provides low-level programming capability, library modules for I/O handling, mathematics functions, PC screen and keyboard control, concurrent processes, interrupt handling and linkage to assembler programs.
IBM PC, PCjr, XT, AT ☐ 512 KB req. ☐ Cost: $60

PECAN SOFTWARE SYSTEMS, INC.

☐ BASIC Compiler and Runtime Unit
Supports structured programming and separate compilation.
IBM PC, XT, PCjr, AT ☐ 64 KB req. ☐ Introduced: 1981 ☐ Cost: $100

☐ CompilerCore
IBM PC, XT, AT ☐ Cost: $60

☐ FORTRAN-77 Compiler and Runtime Unit
Features ANSI-77 subset with support for structured programming and improved character types.
IBM PC, XT, PCjr, AT ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $100

☐ UCSD Pascal Compiler
Reviewed Jul 1986 p. 94.
IBM PC, XT, PCjr, AT ☐ 64 KB req. ☐ Copies sold: 100,000 since 1980 ☐ Cost: $145-$325

PHOENIX TECHNOLOGIES, LTD.

☐ GWBASIC/BASICA Integration
Runtime support code to implement Microsoft's GW BASIC compiler for OEM hardware environment. Screen editor, keyboard driver, sound, serial communications driver, graphics functions and drivers for line printer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 15 since 1984 ☐ Cost: $100,000

PORTABLE SOFTWARE

☐ PortaAPL
Contains APL functions, system functions, and system commands as IBM/ACM standard, with exception of shared variables. Includes full-screen editor, ASCII mode, file system, and machine language functions.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $195-$295

PRITSKER & ASSOCIATES, INC.

☐ SLAM II/PC
Simulation language. Uses 3 modeling approaches to analyze a system. Handles execution and I/O.
IBM PC ☐ 320 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $975

PRODUCTIVITY PRODUCTS INTERNATIONAL, INC.

☐ Objective-C
Hybrid, object-oriented software engineering software. Supports encapsulation, inheritance and run-time binding, making reusable software components available.
IBM PC ☐ Copies sold: 300 since 1983

PROGRAMMING LOGIC SYSTEMS, INC.

☐ micro-PROLOG
Reviewed Jan 1986 p. 145.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,700 since 1982 ☐ Cost: $89-$99

☐ Micro-PROLOG Professional
Language interpreter. Window handling primitives and screen editor.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $395

PROMARK, LTD.

☐ Business BASIC Micro
Allows single-(DOS) or multi-(Novell Netware) user to customize vertical applications that integrate with MAI accounting packages. Modifies source code for special customer needs.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 10,000 since 1975 ☐ Cost: $395

PROTOOLS

(division of Newberry Microsystems)

☐ SAL/80 and SAL/86
Assembly language compiler and macro-preprocessor. Emits optimally dense test/branch code for vocabulary of control statements. Includes I/O utilities, string-search and block move.
IBM PC ☐ 64 KB req. ☐ Copies sold: 75 since 1978 ☐ Cost: $179 (SAL/80); $199 (SAL/86)

PUGH-ROBERTS ASSOCIATES, INC.

☐ Dynamo
Continuous simulation language used to model business, social, economic, biological and engineering systems.
IBM PC ☐ 60 KB req. ☐ Copies sold: 1,200 since 1962 ☐ Cost: $245-$395

NOSTRADAMUS
5320 S. 900 East-Suite 110

Get Realistic about mainframe programming on your micros...

The Realia programming environment gives you the tools to boost productivity and reduce reliance on costly mainframe resources. From source code entry through system testing, Realia products offer the speed and features to make your workstation work.

First, get control of the process.

As you set up the directory for a new project, you begin to use the programming shell RealMENU. Typical programming functions like the compile, link, run sequence are a single keystroke. All the software tools you need are listed on the screen. With RealMENU, you can add more menu functions, redefine keys, access DOS help, and create custom help screens as your project progresses.

Write the code with familiar tools.

Use any text editor you like to produce the ASCII format source file. We provide RED, designed to support fast editing of extremely large files. RED includes default line formats (with and without line numbers), EGA support, file recovery, and automatic merging of previous-compile errors into the source file as you edit it.

You code in the COBOL you know: the compiler is so compatible with IBM VS COBOL that we deliver their language reference manual with our compiler. REALIA COBOL is GSA-certified at the high level for ANSI 74, and incorporates significant ANSI 85 features.

If you need command-level CICS programming, Realia almost eliminates the need for CICS test regions. With RealCICS, mainframe CICS applications can be moved to the PC for development and testing, then sent back to the mainframe for execution. Or the application can be moved permanently to the micro, saving even more in human and computer resources.

RealCICS includes a command-level COBOL program preprocessor, a resource definition processor, a BMS macro processor, and a full-screen map editor.

If your application is PC-based, the four Realia interfaces (DOS, C, assembler, and machine-level) can be extremely useful.

Screen and keyboard handling is fully implemented with DISPLAY and ACCEPT. For screen painting, Realia offers the option of the highly-respected SCREENIO package.

For single-user systems, REALIA COBOL handles ten file formats, including a fast, high-capacity indexed file system. For multi-user systems, RealFILE supports fast, safe filesharing using the IBM Token Ring Network and compatible networks. Files (including indexed files) can be shared among multiple machines. A central journal and local file caching minimize network traffic.

RealFILE's security features, such as rollback and recovery, are familiar to mainframe users and much needed for PC applications. Future RealFILE versions will provide a fault-tolerant database environment for the PC user.

Now, compile and execute. Fast.

REALIA COBOL compiles larger programs than any other COBOL compiler, mainframe or micro. A compiled program can have up to 1 Mb of data division and 6.4 Mb of procedure division, using overlays.

Designed for real-world programming projects with large programs and tight deadlines, REALIA COBOL compiles four times faster than its nearest micro COBOL competitor.

The greatest benefit comes when the compiled program is executed. Realia optimizes the COBOL code -- minimizing disk requirements and achieving the fastest micro COBOL execution.

Debug, better than on a mainframe.

REALIA COBOL and RealCICS take advantage of the full-screen, source-level debugger RealDBUG. RealDBUG allows you to watch and work with the program source as it executes. Unlike most interactive debuggers, RealDBUG uses the standard generated machine code output of the compiler -- the same code used in production.

The debugger also makes maximum use of the screen: with a standard single monitor, you can alternate between your application and the debugging source or split the screen between them. With two monitors or an EGA, both screens can appear at once.

Make it work.

The Realia workstation was built for COBOL programmers *by COBOL programmers.* The tools are constantly used by the people who provide telephone support and develop new releases. You get the right tools, the right information when you need it, and automatic updates (for an annual fee after the first year). Call us for more information.

REALIA®

10 South Riverside Plaza , Chicago, IL 60606 ■ (312) 346-0642 ■ Telex: 332979 (REALIA INC)

CIRCLE NO. 289 ON READERS SERVICE CARD

☐ **Professional Dynamo**
Allows user to create models and perform simulation analyses with dynamic feedback. Provides menu-driven interface, full-screen editor, cause-and-effect dynamics to control system behavior, screen-driven input prompts for what-if scenarios and built-in graphics capability.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986

RATIONAL SYSTEMS, INC.

☐ **Instant-C**
Reviewed May 1986 p. 153.
Includes compiler/interpreter, full screen editor and source level debugger. Enables coding, testing, debugging and modification without leaving Instant-C environment. Includes a standard library. Performs compile and run-time checking. Links to object code and compiled libraries.
IBM PC ☐ 512 KB req. ☐ Copies sold: 900 since 1984 ☐ Cost: $495

REALIA, INC.

SEE AD ON PAGE 295

☐ **COBOL**
Reviewed Jun 1985 p. 58; Aug 1985 p. 107.
High-speed compiler compatible with IBM VS COBOL. Supports ANSI-85 COBOL features. Compiles individual programs with up to 1 MB of data and 6.4 MB of code. Error-checking and interactive symbolic debugging. Interfaces with DOS, C, and assembly language subroutines.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $995

RR SOFTWARE, INC.

☐ **Janus/Ada Compiler-C, D, S Paks**
Partial Ada implementation. Supports modular programming via packages. Includes run-time error walk backs. Provides tools to aid program development including performance tracer and make utility. Mathematical library. Standard Ada strings.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1981 ☐ Cost: $100

RYAN-MCFARLAND CORP.

☐ **RM/COBOL**
Reviewed Apr 84 p. 76; Jun 85 p. 58; Aug 85 p. 107.
Level 2 relative and multi-key index file access methods, multi-key files with up to 14 alternate keys including duplicates, file recovery utilities, interactive screen handling, file and record level locking for multi-user activity and interactive debugging. LAN support available.
IBM PC, XT, AT, RT ☐ 64 KB req. ☐ Copies sold: 400,000 since 1975 ☐ Cost: $950-$1,250

☐ **RM/COBOL-8X**
COBOL compiler for micros. Provides portable application code, IBM mainframe COBOL extensions and ANSI-1985 COBOL standards. Source code compatible with programs written in RM/COBOL. Executes ANSI 74 or ANSI 85 programs. Available for LANs.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $1,250-$1,500

☐ **RM/FORTRAN**
Full implementation of ANSI 77 and FORTRAN 66 compiler. Includes Hollerith and hex constants, upper and lower case capability, hex editing and industrial real-time function standards. Provides symbolic interactive debugger.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 20,000 since 1984 ☐ Cost: $595-$750

☐ **RM/InfoExpress**
Add-on to RM/COBOL-8X. Allows multi-user applications to execute with no source or object code changes. Handles complex COBOL I/O request with single request-response transmission. Allows higher level of communication between user and network server.
IBM PC, XT, AT ☐ Cost: $595

S.A.I.L. SYSTEMS

☐ **S.A.I.L.B.O.A.T.**
Business BASIC interpreter for application development. BCD math and BTree file access.
IBM PC ☐ 32 KB req. ☐ Copies sold: 1,000 since 1979 ☐ Cost: $125

SOFT GOLD, INC.

☐ **APPLICATIONS BASIC**
Business BASIC level III/IV compiler/interpreter MSDOS. Dynamically allocated ISAM, files with full record/file locking on LANs, 1 to 58 character keys and support utilities.
IBM PC ☐ 64 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $325-$595 (interpreter); $875-$1,150 (compiler)

SOFT WAREHOUSE, INC.

☐ **muLISP-86**
LISP language programming environment for PCs. Includes 400 LISP functions and special forms, split-screen editor and debugger, on-line tutorial and help systems. Native-code compiler optional.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1979 ☐ Cost: $250

SOFTECH, INC.

☐ **Ada Language System (ALS)**
Includes ANSI Ada and DOD Stoneman specifications. Compiles, links, executes and debugs. Creates, edits and formats programs. Includes tools for library management, program analysis and project coordination.
IBM PC ☐ 150 KB req. ☐ Copies sold: 56 since 1985

SOFTWARE BUILDING BLOCKS, INC.

☐ **SBB Pascal Development Package**
Reviewed Jul 1984 p. 58.
Long pointers, variable length strings, direct file access, separate compilation, overlays, external routines, chaining, 8087 support, conformant arrays, include files and arbitrary precision BCD numbers.
IBM PC, XT, PCjr, AT ☐ 128 KB req. ☐ Copies sold: 150 since 1983 ☐ Cost: $95-$350

SOFTWARE IRELAND REPRESENTATIVES, INC.

☐ **UNIBOL**
Multi-user compiler and runtime execution module. Allows programs to run under UNIX Version 7, System III, System V and UNIX lookalikes.
IBM PC ☐ 128 KB req. ☐ Copies sold: 6,000 since 1983

THE SOFTWARE TOOLWORKS

☐ **LISP/80**
Features trace, file I/O and string operations. Includes editor, file librarian and formatted expression print routine.
IBM PC, PCjr ☐ 56 KB req. ☐ Cost: $40

☐ **Toolworks C**
Reviewed Jan 1986 p. 82.
Produces object modules compatible with MSDOS linker. Includes an execution profiler which lists number of calls and time spent in each subroutine and program trace facility. Executes matrix multiplication when used with MathPak.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $50

SOFTWARE WEST, INC.

☐ **RPG II**
IBM PC, XT, AT ☐ Cost: $1,500

SOFTWORDS

☐ **Natal**
Portable structured language for computer-aided-learning and CBT. Compares/manipulates text. Allows screen formatting and display control.
IBM XT ☐ 512 KB req. ☐ Introduced: 1983

SOURCE DATA SYSTEMS, INC.

☐ **SDL (System Definition Language)**
Fourth generation language. Consists of OS, system utilities, high level development language, end user oriented report generator, and distributed data processing including batch network processing and transaction network processing.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 150 since 1978 ☐ Cost: $2,100

SOUTHWEST DATA SYSTEMS

☐ **Pluto**
Multi-user. Interprets MAI/Basic Four and Science Management BASIC programs for MS-DOS and XENIX based systems. Can use, customize or create BASIC programs with Pluto. Includes Basic Four's terminal emulation package for PCs.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $595

SPECIALIZED SYSTEMS CONSULTANTS

☐ **u4th**
Version of FORTH programming language. Interfaces UNIX system calls and subroutines. Provides termcap support, and csh-like history mechanism. Kernel, library and source code for FORTH utilities. Recursive I/O redirection. Supports QUAN words. Vectored compilation.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $195-$495

STSC, INC.

☐ **APL*Plus/PC System**
Reviewed Nov/Dec 1983 p. 135.
Provides terminal mode using APL or ASCII character set and smart terminal mode for customized intelligent machine interaction. Includes graphics primitives, full-screen editor, page scrolling, capability to call DOS commands, numeric spreadsheet-like editor and full screen management.
IBM PC, AT, XT ☐ 192 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $595

☐ **Pocket APL**
Reviewed Jul 1985 p. 90.
Provides on-line calculator, full-screen capabilities, help facility, file systems and soft character set for computers with IBM compatible graphics board. Includes report formatting and error trapping facilities.
IBM PC, PCjr ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $95

SUMMIT SOFTWARE TECHNOLOGY, INC.

SEE AD ON PAGES 297/299/300/301/302/303

☐ **BetterBASIC**
Reviewed Jun 1986 p. 52.
Structured programming language. GW-BASIC and BASICA compatible. Combines Pascal, Modula 2 and C features. Supports 640 KB memory and 8087/80287 math. Includes documentation, windows, libraries, DOS/BIOS calls, chaining, shelling and Assembly language calls. Run-time system available.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $199

SUNBELT COMPUTER SYSTEMS, INC.

☐ **SUNDB86A (MS-DOS Single-Pass DATABUS Compiler)**
Supports SCSI's AAM, which is compatible with Datapoint's AIM, and Datapoint's primary DATABUS language.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $695

☐ **SUNDB86M (MS-DOS DATABUS Compiler)**
Allows Intel 8086 Assembler to be written in-line within DATABUS code. Supports SCSI's AAM, which is compatible with Datapoint's AIM. Fully supports Datapoint's primary DATABUS language.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $595

Better BASIC™

A great product with a great reputation . . .

SUPERSOFT, INC.

☐ A"
Native code, recursive and multi-pass compiler. Generates COM files.
IBM PC ☐ 32 KB req. ☐ Introduced: 1982 ☐ Cost: $300

☐ BASIC Compiler
Native code compiler. Compatible with Microsoft BASIC. Prevents decimal round-off errors. Features integer, string, single and double precision variables, print using, error trapping, matrices and random/sequential disk files.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $300

☐ C Compiler
Supports most of UNIX Version 7 standard C. Allows macro expansions. Provides in-line assembly code with ASM and EDASM.
IBM PC ☐ 48 KB req. ☐ Introduced: 1981 ☐ Cost: $350

☐ FORTRAN IV and RATFOR
Full 1966 ANSI standard with extensions. Supports recursive subroutines with static variables, until-while, if-then-else, begin-end and macro defines. 8087 support available.
IBM PC ☐ 32 KB req. ☐ Introduced: 1981 ☐ Cost: $325 (FORTRAN); $100 (RATFOR); $50 (8087 support)

SYSTEMS MANAGEMENT ASSOCIATES, INC.

☐ PROMAL
Structured language. Accommodates limited-memory micros. One-pass recursive descent compiler, full-screen editor, OS executive and library of 50 machine language subroutines.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $50-$99

TANDEM COMPUTERS, INC.

☐ COBOL85
Standard compiler with extensions for accessing Tandem facilities. Supports all required models specified in Draft Proposed Revised ANSI Programming Language COBOL (X3.23-198X).
IBM PC ☐ Cost: $500-$1,000 plus $150-$300 monthly license fee per processor.

☐ Tandem C
Lattice C compiler compatible C compiler. Conforms to K & R C standards with extensions for accessing Tandem facilities.
IBM PC ☐ Cost: $500-$1,000 plus $115-$225 monthly license fee per processor

☐ Tandem Pascal
Compiler with structured programming facilities and extensions for accessing Tandem facilities. Complies with ANSI/IEEE 770 X3.97-1983 and Level 0 of ISO 7185 standard.
IBM PC ☐ Cost: $500-$1,000 plus $115-$225 monthly license fee per processor

TEXAS INSTRUMENTS

☐ MS-BASIC Compiler
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $300

THEOS SOFTWARE CORP.

☐ Theos BASIC
Includes interpreter and compiler. Supports over 500 commands, statements and functions. Translates programs into machine code. Provides editor and syntax checker.
IBM XT, AT ☐ Cost: $695

TOM SOFTWARE, INC.

☐ BASIC
Interpretive BASIC 2 language emulator. Customized for each OS. Transfers applications regardless of implementation.
IBM PC ☐ 28 KB req. ☐ Copies sold: 25 since 1983 ☐ Cost: $800-$3,500

TRANSERA CORP.

☐ TBASIC
BASIC language for technical engineering. Comprises built-in GPIB syntax for graphic and instrument type peripherals. Permits adaptation of software written for HP and Tektronix engineering computers to PC environment. Conforms to ANSI proposed BASIC standard.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $495

TRUE BASIC, INC.

☐ True BASIC Language System
Reviewed Jun 1986 p. 52.
Portable structured programming language with ANS BASIC pseudocompiler and full-screen editing capabilities. Performs graphics on user-defined coordinates and includes 2D transforms, animation and windowing. Supports 8087/80287 on IBM. Access to ROM routines on Macintosh.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $150

UNIVERSITY OF TORONTO

Computer Systems Research Institute

☐ Concurrent Euclid
Language for implementing OSs, compilers and microprocessor applications. Supports systems programming with concurrency using monitors, absolute address variables, and controlled type violations.
IBM PC ☐ 256 KB req. ☐ Copies sold: 250 since 1978 ☐ Cost: $2,500-$10,000

☐ Turing
String handling, modules, safe variant records, dynamic parameters and arrays.
IBM PC ☐ 256 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $75

UXA CORP.

☐ UX-BASIC
Interpreter language with 140 commands, statements and functions and can be compiled for execution and source code protection.
IBM PC ☐ 512 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $683

VICTOR TECHNOLOGIES, INC.

☐ VBASICA Interpreter
BASIC Advanced language. Maps IBM color to Victor 9000 gray scale for color emulation or displays in full IBM color with color display hardware interface and IBM-compatible color monitor. Features advanced graphics, sound, telecommunications support, event trapping, on-screen editor, and GW-BASIC superset.
IBM PC ☐ 256 KB req. ☐ Cost: $295

WANG LABORATORIES, INC.

☐ Advanced PC Basic Compiler
Complements BASIC interpreter included as standard software with Wang Professional.
IBM PC ☐ 256 KB req. ☐ Cost: $295

☐ PC Advanced BASIC Compiler
IBM PC ☐ Cost: $295

☐ PC MS COBOL
Compiler.
IBM PC ☐ Cost: $695

☐ PC MS Compiled BASIC
Compiler.
IBM PC ☐ Cost: $295

☐ PC MS FORTRAN
Compiler.
IBM PC ☐ Cost: $345

☐ PC MS PASCAL
Compiler.
IBM PC ☐ Cost: $295

WATCOM PRODUCTS, INC.

☐ APL Interpreter
Reviewed Feb 1985 p. 126.
Provides APL array files, reporting facilities, full-screen editing, string handling capabilities, event trapping and simulation, manipulation of memory and devices, and machine language functions. Includes color graphics support for 8087 numeric co-processor.
IBM PC, XT, AT, Portable PC, PCjr ☐ 192 KB req. ☐ Copies sold: 450 since 1982 ☐ Cost: $295-$450

☐ BASIC Interpreter
Reviewed Feb 1985 p. 126; Jun 1986 p. 52.
Provides structured programming control, multi-line functions, sequential and relative file capabilities, formatted I/O, integer arithmetic, short or long precision floating point numbers and MAT statements. Allows character-string manipulation.
IBM PC, XT, AT, PCjr, Portable PC ☐ 192 KB req. ☐ Copies sold: 600 since 1982 ☐ Cost: $250

☐ COBOL Interpreter
Reviewed Feb 1985 p. 126.
Features include nucleus, sequential and relative I/O, table handling, symbolic debugging, and statement trace.
IBM PC, XT, AT, Portable PC, PCjr ☐ 192 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $250

☐ FORTRAN Interpreter
Reviewed Feb 1985 p. 126.
Supports integer, real and character data types. I/O subset includes sequential/direct I/O and some format specifications. Statement entry simplified by free format.
IBM PC, XT, AT, PCjr, Portable PC ☐ 192 KB req. ☐ Copies sold: 600 since 1982 ☐ Cost: $225

☐ Pascal Interpreter
Reviewed Feb 1985 p. 126.
Provides string and I/O extensions, string manipulation routines, debugging, single-step statement execution, execution trace, a method of reading string input and an extended case statement. Supports color graphics and precision 8087 math.
IBM PC, XT, AT, PCjr, Portable PC ☐ 192 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $225

☐ WSL (Waterloo Systems Language)
Used to implement compilers, interpreters, operating system software and application programs.
IBM PC ☐ Copies sold: 1 since 1982

WHITESMITHS, LTD.

☐ C Compiler
Reviewed Jan 1984 p. 91.
Multi-pass compiler supporting full K & R language/library. File output and subroutines may be compiled separately. Features portable library with string manipulation and math functions, and I/O formatting support.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20,000 since 1978 ☐ Cost: $900-$3,500

☐ C/370
C compiler supporting full K & R C language. Produces IBM assembly language. Usable with Whitesmith's assembler and universal linker.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $5,000

☐ Pascal Compiler
Consists of four sequential passes, each with a degree of optimization. Files can be compiled separately, then linked with C or Assembly. Translates Pascal into C code for compilation. Features portable library with string manipulation and I/O formatting support.
IBM PC ☐ 64 KB req. ☐ Copies sold: 20,000 since 1981 ☐ Cost: $1,200-$3,500

MARK WILLIAMS CO.

☐ C Programming System
Reviewed Jan 1986 p. 82.
Supports full K & R C language with extensions, small and large memory models, MSDOS object module format, UNIX compatible libraries, register variables, floating point and 8087 math processor. Includes C source debugger and editor.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $495

Here's what the experts are saying:

"Summit Software Technology's BetterBASIC is potentially one of the most powerful languages on the market."

Art Huston, BYTE Magazine, October 1985 © McGraw-Hill, Inc.

"You could say that this is a completely new language, derived from GW-Basic but with the completeness of Pascal or C. . . . The system is a treat. . . it has so many unique features that it qualifies for a position of its own, and a lofty one at that."

John B. Harrell III, 80-Micro, June 1985

"If you're a BASIC programmer and you'd like to extend yourself into the power of a language like C in a relatively painless way, this is for you."

John Seward, Whole Earth Review, May 1985

Better
BASIC™

"BetterBASIC may be the best of all BASIC programming worlds. It combines all the best features of other microcomputer BASIC environments."
Richard Aarons, PC Magazine, October 29, 1985

PC MAGAZINE EDITOR'S CHOICE—*"To us, Summit Software Technology's BetterBASIC system stands out from the crowd because it combines the best elements of interpreters, compilers, and language structures in a single environment for the programmer of typical talents. Its authors have taken those extra steps to make the language usable in day-to-day programming tasks. . ."*
Richard Aarons, PC Magazine, October 29, 1985

ABLE TO ACCESS FULL MEMORY—BASIC programmers may now overcome Microsoft's 64K barrier. *"BetterBASIC does provide compiled programs, functions and procedures, a windowing environment, extensibility, graphics, and access to 640K bytes. For some people, the last feature alone will be enough reason to discard standard interpretive BASIC."*
Art Huston, BYTE Magazine, October 1985 © McGraw-Hill, Inc.

STRUCTURED—Create well-organized programs using procedures and functions that are easily identified and understood and completely reusable in future programs.

AN INTERACTIVE COMPILER—BetterBASIC compiles to an intermediate code giving you five to six times the speed of traditional BASICs while there is still immediate feedback on line entry, just like an interpreter. When a change is necessary, concise error messages pinpoint the portion of the code where the change is needed.

EASY TO LEARN—BetterBASIC offers sophisticated programming features in a familiar environment—the syntax is 100% GW-BASIC, PC-BASICA compatible. *"With this package, a BASIC programmer will be able to write better, more maintainable code without the learning curve that is associated with learning a new language from scratch."*
Matthew Trask, Dr. Dobbs Journal, May 1985
"The BetterBASIC interactive compiler environment does offer some delights. . . it is syntactically identical to the later versions of Microsoft BASIC."
Richard Aarons, PC Magazine, October 29, 1985

POWERFUL—*"Summit Software Technology's BetterBASIC is potentially one of the most powerful languages on the market. It provides access to a full 640K bytes, speedy compiled programs, windows, a complete system for creating functions and procedures, access to machine-language and to the basic input/output system (BIOS), graphics, event trapping, and extensibility, which allows you to create new BetterBASIC commands. Moreover, the language maintains the interactive nature of structured BASIC while letting you create structured, modular code. All are great features, and they would probably require the purchase of many separate library modules if you were programming in say, C."*
Art Huston, BYTE Magazine, October 1985 © McGraw-Hill, Inc.

NOT COPY PROTECTED—Install BetterBASIC on your hard disk. BetterBASIC is licensed to the programmer, not the machine, so you can compute at work and at home with the same copy of BetterBASIC.

FAST—Depending on how you write your code, BetterBASIC is about six times faster than interpretive BASIC. *"Incremental compiling, however, is what separates BetterBASIC from the pack. The software compiles each line of code when you enter it. As a result, BetterBASIC is both fast and interactive."*
Art Huston, BYTE Magazine © McGraw-Hill, Inc.

"The system is a treat."
John B. Harrell III, 80-Micro, June 1985

"... it's hard to think of a feature of C or Pascal that has not been included in BetterBASIC."

John Seward, Whole Earth Review, May 1985

TRUE FUNCTIONS AND PROCEDURES— *"The best feature of BetterBASIC is the use of true procedures with variables of local scope that exist only inside the procedure. Global variables can be used by declaring them as EXTERNAL in the procedure and providing the actual declaration at a level outside the procedure. A procedure can be declared as RECURSIVE if its name is declared as EXTERNAL inside the procedure. GOSUB and RETURN are both supported, but as you gain experience with BetterBASIC, they will probably fall by the wayside in favor of these Pascal-like, parameterized procedures."*

Matthew Trask, Dr. Dobbs Journal, May 1985

"One way to think of BetterBASIC is as Pascal using Microsoft Basic keywords, commands, and built-in functions and procedures."

Richard Aarons, PC Magazine, October 29, 1985

USER DEFINED KEYWORDS—BetterBASIC can be extended by adding procedures and functions to the language as keywords. *"The MAKE MODULE command will convert all procedures and functions currently in memory to a module that can be added to the B.CNF configuration file. Like C language function libraries, useful procedures can be distributed to other BetterBASIC users as modules with a good degree of source code protection because the source code cannot be derived from a module."*

Matthew Trask, Dr. Dobbs Journal, May 1985

RUNTIME SYSTEM—This module allows a BetterBASIC program to be converted to a stand-alone program in EXE. file format. The resulting programs can be freely distributed without any sub-licensing and/or royalties.

8087/80287 MATH CHIP SUPPORT—Gain the speed which is available by accessing the powerful 8087/80287 math co-processor chip with the optional BetterBASIC 8087/80287 math module.

ACCLAIMED DOCUMENTATION—The BetterBASIC programming manual is a hefty IBM style binder and slipcase chock full of easy to follow programming information. It has an easy-to-read index, several appendices and an alphabetical syntax section which explains each command and gives examples of its uses. *"There are two words that describe the BetterBASIC documentation, they are massive and thorough."* Matthew Trask, Dr. Dobbs Journal, May 1985

WINDOWS—You can define up to five windows, each with independent scrolling, their own borders, titles, foreground and background colors and character attributes. Windows can have eight colors on the screen at one time.

LIBRARIES—BetterBASIC enables you to write reusable code. You can create libraries of pre-tested, error-free procedures and functions for repeated use in different programs.

AND MORE—such as DOS and BIOS calls; chaining and shelling; assembly language calls.

"It could be renamed Much Better BASIC without exaggeration."

Shammas et. al., Computer Language Magazine, May 1985

Better BASIC SPECIFICATIONS

BetterBASIC is GW-BASIC and PC-BASICA compatible; runs on IBM PC and compatibles.

HARDWARE REQUIREMENTS

CPU: IBM PC, IBM PC XT AT, COMPAQ, IBM PC Compatibles
Memory: 256KB min up to 640KB
Display: Monochrome or Color
Disk Drive: One 5¼" floppy, single or double sided
Operating Systems: MS-DOS 2.0, 2.1, 3.0, 3.1

DATA TYPES:

Numeric Data:
BYTE, range: 0 to +255
INTEGER, range: − 32768 to + 32767
REAL, range: Single Precision 8.43×10^{-37} to 3.37×10^{38}
Double precision 4.19×10^{-307} to 1.67×10^{308}
Binary Math, Single/Double/Mixed Precision
Mixed mode numeric expressions will always be REAL.

String data:
Variable from 0 to 32767 characters in size.

Record Variables:
Allows grouping of dissimilar data types into a single logical variable. Elements of a RECORD are addressed as FIELDS and can be of any type, including ARRAY, RECORD and POINTER.

Array Variables:
N-dimensional arrays of any type, including ARRAY, RECORD and POINTER. Dynamic arrays like PC-BASICA

Pointer Variables:
Allows indirect reference to any data type. Can be used with RECORD variable to create linked lists, or to create relational data structures.

In addition supports PC-BASICA record types.

"All are great features, and they would probably require the purchase of many separate library modules if you were programming in say, C."

Art Huston, BYTE Magazine, October 1985 © McGraw-Hill, Inc.

BetterBASIC is GW-BASIC and PC-BASICA compatible. It runs on IBM PC and compatibles.

BetterBASIC—You can easily load your old BASIC programs into BetterBASIC. You can access the full memory of the computer and BetterBASIC gives you most of the advanced features of languages like Pascal and C. $199

RUNTIME SYSTEM—Creates stand-alone EXE. files. Developers can distribute their programs written in BetterBASIC without royalties. $250

8087/80287 MATH CHIP SUPPORT—Adds support for the 8087 math co-processor chips, which are available as an option for most 8086/8088-based computers. It also supports the 80287 for 80286-based computers such as the IBM PC-AT. This significantly increases the speed of floating point (REAL math). $99

BTRIEVE™ INTERFACE MODULE—This module provides a high-level interface between BetterBASIC and the popular Btrieve ISAM File Manager from SoftCraft Inc. With this module and Btrieve you can use BetterBASIC to build sophisticated data-base application programs. $99

SAMPLE DISK—Includes a demo, a tutorial, a comparison to MS BASIC, and allows you to use an abbreviated form of BetterBASIC. It allows you to try the product out. It also contains a 60 page on-line mini manual. The full BetterBASIC manual is more than six hundred pages. $10

TECHNICAL SUPPORT—Direct phone support is available for all registered users.

BULLETIN BOARD—(617) 769-0148
300/1200 baud, 8 bits, no parity, 1 stop bit.

New!

VIRTUAL MEMORY MANAGER—Accesses up to 4 Giga-Bytes of Virtual Data Array Space. Supports Virtual Memory on hard and floppy disks, as well as any memory extension/expansion scheme which provides Ram-Disk access, such as the Intel/Lotus/Microsoft EMS specification. $99

***C* INTERFACE**—Now *C* object code libraries will interface with BetterBASIC, enabling you to use HALO graphics, GSS graphics, ISAM File Management, and more. $99

☐ Let's C
Reviewed Aug 1986 p. 176.
Supports full.K & R C language with extensions, register variables and UNIX-compatible libraries. Includes full screen editor, assembler, linker, librarian and other utilities. C source level debugger option available. Users may upgrade to C Programming System.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $75

WIZARD SOFTWARE SYSTEMS, INC.

☐ Wizard C
Full Lint checking, 6 memory models, 8087 support, in-line assembly language, ROMable data support and full library source code.
IBM PC ☐ 256 KB req. ☐ Cost: $450

WORDTECH SYSTEMS, INC.

SEE AD ON PAGE 321

☐ dB/Compiler
Distributes compiled applications without licensing fees and provides source code protection. Includes cross environment linkers.
IBM PC ☐ 64 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $750

☐ dBIII Compiler
Compiles applications to execute without dBASE III interpreter. Built-in memory management.
IBM PC ☐ 190 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $750

☐ HOT C
C language compiler, program editor and symbolic debugger. Includes preprocessor, code generator, optimizer, macro-assembler, large and small memory models, and UNIX-compatible function library.
IBM PC ☐ Cost: $99

ZEDCOR

☐ ZBasic
Faster version of BASIC retaining most commands and syntax. Supports RS-232 serial communication, string commands, scientific functions configurable up to 54 digits of accuracy and tools for machine language programmers. Device-independent graphics and file commands. Shell/quick sort capability. Portable programs.
IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Cost: $90

COMPUTER PERFORMANCE MEASUREMENT

ANAFAZE, INC.

☐ Anasoft
Measurement and control. ASCII commands. Sets channel sensor types to establish alarm setpoints and control output, and define data storage/printout formats.
IBM PC ☐ 128 KB req. ☐ Copies sold: 125 since 1984 ☐ Cost: $295

AUTOMATION DESIGN, INC.

☐ MORT I, II
Reports IBM 3278 terminal response times on IBM PC. Captures and reports keyboard activity from any 3278 user session, including think, entry, response, delay and elapsed times. Reports measurements as totals, maximums, minimums, averages, medians and standard deviations.
IBM PC ☐ 128 KB req. ☐ Copies sold: 30 ☐ Cost: $495

COMPUTER TECHNOLOGY ASSOCIATES, INC. (CTA)

☐ PATB (Performance Analysis Tool Box)
Provides performance analysis modeling techniques. Designed for distributed system design, capacity planning and performance engineering. User interactively defines conditions for model execution, executes model and analyzes results. Employs analytical multi-class/chain queueing network algorithms and approximation techniques.
IBM PC ☐ 640 KB req. ☐ Cost: $10,000

ELSEVIER SCIENTIFIC SOFTWARE

(subsidiary of Elsevier Science Publishers)

☐ Instrumentune-Up
Assists in instrument tuning. Uses sequential simplex techniques to vary more than one factor at a time. Optimization strategy ensures proper tuning. Applicable for laboratory and field instruments. Program interrupt/restart capability. Includes printer output option.
IBM PC ☐ 48 KB req. ☐ Cost: $150

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ PECOMON (Personal Computer Monitor)
IBM no. 6467-045. Monitors application performance by recording system response time and application availability at end-user locations. Collects system, network and application availability figures at customer rather than host locations. Measures network response time.
IBM PC, XT, AT, 3270-PC, Portable PC ☐ 128 KB req. ☐ Cost: $325

IBM PERSONALLY DEVELOPED SOFTWARE

☐ PCWATCH
Reviewed Dec 1985 p. 29.
IBM PDS no. 6276-603. Monitors computer activity at system interface level. Traces external interrupts, BIOS functions, DOS services and user-defined functions built around int instruction. Outputs non-interfering view of system service usage in real time or slow motion. Monochrome and color EGA support.
IBM PC, XT, AT, Portable PC ☐ Cost: $50

INFORMATION RESEARCH ASSOCIATES

☐ GPSM (Graphical Programming of Simulation Models)
Front end to IRA's PAWS. Builds simulation models as annotated graphs. Manipulates graphs by pointing to nodes, arcs and elements using mouse. Analyzes program performance during design. Defines transaction paths flowing between workstations.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 14 since 1986 ☐ Cost: $5,000

THE LAURIER GROUP

☐ Pendulum-RTM (Response Time Monitor)
PC monitors mainframe response time on ongoing basis. PC emulates terminal executing user-defined scripts. Stores results on diskette. Includes report programs with source.
IBM PC ☐ 64 KB req. ☐ Copies sold: 15 since 1985 ☐ Cost: $395

PHOENIX COMPUTER PRODUCTS CORP.

☐ Pfinish
Performance analyzer which analyzes programs during execution, producing reports and histograms on amount of activity and time spent on routines. Reports on interrupts, number of times routines are called and number of instructions executed. Accesses symbol table information and overlays.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $395

POWER UP

☐ Computer Checkup
Tests system memory, disk drives, keyboard, monitor, peripheral cards, printer, 80-column card and game controls. Warns of problems in early stages. Prints test results.
IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Cost: $60

SIMWARE, INC.

☐ SIM/RTM
Monitors response time experienced by end-users within any network. Provides performance data from different parts of network including local vs. remote, SNA vs. non-SNA. Generates response time bar graphs. Command files already existing on disk can be modified, or new ones can be written.
IBM PC, XT, AT ☐ 256 KB req.

SUPERSOFT, INC.

☐ Diagnostics II
Includes memory test to test every byte. CPU test interprets program designed to execute single/multiple instruction sequences. Printer test executes printer functions. Terminal prints ASCII characters. Disk test detects disk drive malfunctions.
IBM PC ☐ 32 KB req. ☐ Introduced: 1981 ☐ Cost: $125

☐ PC/AT, XT Service Diagnostics
PC/XT tests components of IBM PCs and compatibles including nonIBM hardware. PC/AT tests additional features of IBM AT including 80286 instruction set, 16 MB memory range, DMA/8259 interrupt controllers, timer, CMOS RAM and real-time clock.
IBM XT, AT ☐ Cost: $225

SYSTECON

☐ Systereport
Computerized reporting, performance measurement, maintenance, design of information and control.
IBM PC

TECHNETRONIC USA, INC.

☐ Explicit
Performance measurement modules include Mainframe Performance Anaylzer, Network Analyzer and MVS, MVS/XA Mainframe Workload Measure. Capacity planning modules include Mainframe Performance Model, MVS, MVS/XA Capacity Planner, VM Capacity Planner, SNA Network Model and Datacommunication Network Designer.
IBM 3270-PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 12 since 1985 ☐ Cost: $7,500-$17,500

TEXAS INSTRUMENTS

☐ Maintenance Package (Diagnostics)
Disk-based diagnostics to aid in identifying hardware problems.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $195

TRAEGER AND ASSOCIATES

☐ Systems and Programming Project Monitor
Monitors requests for services generating reports on request backlog, abend corrections, programmer and programs involved, hours to complete and staff skill inventory statistics for assigning projects.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $95

CROSS COMPILERS/ PROGRAM TRANSLATORS

ACTION COMPUTER ENTERPRISE, INC.

☐ Concurrent PC-Attachment
Integrates PCs and terminals on one system sharing MSDOS and CP/M-86 applications and sharing hardware resources. Allows multiprocessing and multitasking.
IBM PC ☐ 384 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $1,350

AD & P ANALYSIS DESIGN & PROGRAMMING

☐ IBM PC DATABUS
Compiler, interpreter and utilities. Features AIM, 50 index files, 21 arithmetic digits, color, subwindowing, printer support, 64K UDA, file locking and LAN capability. Novell Netware compatible.
IBM PC, XT, AT ☐ 16 KB req. ☐ Cost: $800

THE ALTERNATE SOURCE

☐ Gee-Whiz Convert
IBM PC ☐ Cost: $100

ALLEN ASHLEY

☐ **Mac COP4**
Cross assembler for National Semiconductor COP400 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac F8**
Cross assembler for Fairchild/Mostek F8/3870 processor. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac mu-4**
Cross assembler for NEC muCOM-4 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $150

☐ **Mac Z8**
Cross assemblers for Zilog Z8 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $150

☐ **Mac Z80**
Cross assembler for Zilog Z80 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $150

☐ **Mac 1000**
Cross assembler for TI TMS 1000 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $150

☐ **Mac 1804**
Cross assembler for RCA 1802/4/5/6 processors. Macro-asembler and off-loading facilities. Includes full macro/conditional assembly features and instruction mnemonics defined by processor manufacturer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $150

☐ **Mac 320**
Cross assembler for TI TMS 32010 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $150

☐ **Mac 40**
Hitachi HMCS-40 processor cross assembler.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $150

☐ **Mac 455**
National Semiconductor NS455 cross asssembler.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $150

☐ **Mac 48**
Cross assemblers for Intel 8048 processors. Macro-assembler, cross-reference generators, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 150 since 1983 ☐ Cost: $150

☐ **Mac 51**
Cross assembler for Intel 8051 processors. Macro-assembler and off-loading facilities. Includes full macro/conditional assembly features and instruction mnemonics defined by processor manufacturer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac 65XX**
Cross assembler for MOS Technology/Rockwell 65XX Series processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac 6800**
Cross assembler for Motorola 6800/01/03/11 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac 6805**
Cross assembler for Motorola 6805 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac 6809**
Cross assembler for Motorola 6809 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **MAC 7000**
Cross assembler for TI TMS 7000 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $150

☐ **Mac 7500**
Cross assembler for NEC 7500 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac 7810**
Cross assembler for NEC 7810/11 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $150

☐ **Mac 8070**
Cross assembler for National Semiconductor 8070 Series processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac 8085**
Cross assembler for Intel 8085 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $150

☐ **Mac 8096**
Intel 8096 processor cross assembler.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $150

☐ **Mac 9900**
Cross assembler for TI 9900 processors. Macro-assembler, cross-reference generator, screen editor, hex file converter and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $150

☐ **Xmac F8**
Relocating macro assembler for Fairchild/Mostek F8/3870 processors. Linking loader, absolute macro assembler, text editor, cross-reference generator and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $250

☐ **Xmac Z8**
Relocating macro assembler for Zilog Z8 processors. Linking loader, absolute macro assembler, text editor, cross-reference generator and off-loading facilities.
IBM PC ☐ Copies sold: 50 since 1984 ☐ Cost: $250

☐ **Xmac Z80**
Relocating macro assembler for Zilog Z80 processors. Linking loader, absolute macro assembler, text editor, cross reference generator and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $250

☐ **Xmac 1804**
Relocating macro asembler for RCA 1802/4/5/6 processors. Linking loader, absolute macro assembler, text editor, cross-reference generator and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

☐ **Xmac 51**
Relocating macro assembler for Intel 8051 processors. Linking loader, absolute macro assembler, text editor, cross-reference generator and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

☐ **Xmac 65XX**
MOS Technology/Rockwell 65XX series processor relocating macro assembler.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

☐ **Xmac 6800**
Motorola 6800/01/03 processor relocating macro assembler.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

☐ **Xmac 6805**
Motorola 6805 processor relocating macro assembler.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

☐ **Xmac 7000**
Relocating macro assembler for TI TMS 7000 series processors. Linking loader, absolute macro assembler, text editor, cross-reference generator and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $250

☐ **Xmac 8070**
Relocating macro assembler for National Semiconductor 8070 series processors. Linking loader, absolute macro assembler, text editor, cross-reference generator and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

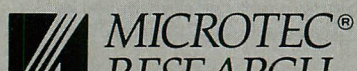
☐ **Xmac 8085**
Intel 8085 processor relocating macro assembler.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

☐ **Xmac 9900**
Relocating macro asembler for TI 9900 Series processors. Linking loader, absolute macro assembler, text editor, cross-reference generator and off-loading facilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $250

AVOCET SYSTEMS, INC.

☐ **HEXTRAN**
Universal hexfile converter. Converts to and from Intel, Motorola, MOS Technology, Mostek, RCA, Fairchild, Tektronix, Texas Instruments and Binary formats.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $250

☐ **XASM**
Cross assemblers for 8085, 6809, 6805, 6502, 8051, Z80, NEC 7500, COP400, F8/3870, 8048, 1802, 6804, Z8, 6800 and HD 64180 microprocessors. Disk-to-disk. Uses manufacturer's mnemonics and operand syntax. Object files in Intel Hex format.
IBM PC ☐ 64 KB req. ☐ Cost: $249



☐ **XMAC68K**
Cross assembler for 68000 microprocessors. Handles Macro instructions and relocatable code. Includes linker.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $595

☐ **XMAC68K2**
Cross assembler for 68020 microprocessors. Handles Macro instructions and relocatable code. Includes linker.
IBM PC ☐ 64 KB req. ☐ Cost: $750

C, Pascal Assemblers Debuggers Compilers

Manufacturer-Compatible, Fully-Supported, Cost Effective, Cross and Native Development Tools

Quality, Compatibility, and **Service** are the differences which set us apart.

3930 Freedom Circle, Suite 101, Santa Clara, CA 95054
Mailing Address: P.O. Box 60337, Sunnyvale, CA 94088

TARGET MICROPROCESSORS

80286/80186/8086, 8096, 8080/8085, 8051, 8048, 68020/10/08/00, 68HC11, 6809, 6800/01/02, 6805, 6301, 6305, Z8002, Z80, 64180, Z8, NSC 800, 6500, R65C00, R6500/1, NEC V20/30/V40/V50.

SOFTWARE TOOLS

C Compilers, Pascal Compilers, Assemblers, Linking Loaders, Librarians, Debuggers, Communications Utilities, VT-100 Emulator.

C Cross Compiler 68000/08/10/20

Features:

- **Full, Standard C**
- **Easy to Use Compiler Options**
- **Complete User Documentation**
- **Global Code Optimization**
- **Optional Register Allocation Via Coloring**
- **ROMable and Reentrant Code**
- **Comprehensive Royalty Free Run-time Library**
- **Floating Point Library Routines**
- **Intermix MCC68K C with ASM68K Assembly Language or Microtect PAS68K Pascal**
- **Optional Assembly Language Listing Intermixed with MCC68K C Source Line Number**
- **Symbolic Debug Capability**

The Microtec MCC68K C Cross Compiler is a complete implementation of the 'C' programming language as defined in The C Programming Language by Kernighan and Ritchie with extensions.

MCC68K emits highly optimized assembly language code for the Microtec ASM68K Motorola compatible assembler.

The Microtec MCC68K package includes the compiler, relocatable macro assembler, linking loader, run-time library, and comprehensive user's guide.

Host computers include: DEC VAX, DG MV-Series, Apollo, IBM PC and PC-compatibles.

Call our sales department to order Microtec products. Or, call for product brochures and price lists.

800-551-5554,
In CA call (408) 733-2919.

CIRCLE NO. 300 ON READERS SERVICE CARD

BASIC BUSINESS SOFTWARE, INC.

☐ ULTRA-BASIC Translator
IBM PC ☐ Cost: $75

BOS NATIONAL, INC.

☐ File Converters
Converts files to proper BOS CP/M, PCDOS, RT-11 and IBM Basic Data Exchange formats.
IBM PC, XT, AT ☐ Cost: $100

BUZZWORDS INTERNATIONAL, INC.

☐ M2C
Converts BASICA to C source code. Supports C source function library. GEM, TOPVIEW and windows can be called from C source.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $180

☐ M2CBASIC
Converts BASIC to C BASIC compiler source code. Converts single user programs to multi-user syntax with Record Lockout and Access Manager Support.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3,100 since 1983 ☐ Cost: $225

CALIFORNIA SOFTWARE PRODUCTS, INC.

☐ Baby/34, 36
Reviewed May 1985 p. 193.
Allows RPG II code for System/34 and System/36 to be downloaded and used on micro. Edits and compiles RPG II programs. Supports noncontiguous index keys. Allows numeric fields. Handles multiplication and division. Creates/maintains libraries. Prints data files. Operates on token-ring LANs.
IBM PC, XT, AT, 3270-PC ☐ 256-384 KB req. ☐ Copies sold: 9,000 since 1983 ☐ Cost: $650-$3,500

COMPUTER SYSTEMS CONSULTANTS

☐ Cross-Assemblers
Program development for 1802/5, 6800/01/11/6303, 6804, 6805, 6809, 6502/3, 8080/5, 8048, 8051, Z-8, Z-80 and 68000 processors. Provides assembly language and listing formats used on target machine. Produces Motorola S-text for machine independence. Includes load/unload utilities and macro preprocessor.
IBM PC ☐ Cost: $50-$200

CORE INTERNATIONAL

☐ PC-51
Moves IBM 5110 and 5120 software to run on IBM PC, XT, AT without modifications. Allows networking via COREnet using mix of 5110s, PCs, XTs and ATs. Files are 5110/20 format.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 263 since 1984 ☐ Cost: $2,995

CS LABORATORIES, INC.

☐ Translator
ICOBOL to RM/COBOL translator. Accepts CRT or CARD format input. Syntax translation. Complex screen section translation. ICOBOL environment emulation. Inserts diagnostics and warnings.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5 since 1986 ☐ Cost: $600-$2,000

CYBERNETIC MICRO SYSTEMS

☐ CYS-320
Assists in developing TI Series 320 digital signal processor code.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $295

EMS, INC.

☐ DOS Connection
Allows UCSD Pascal to run simultaneously in MSDOS or PCDOS environment.
IBM PC ☐ 128 KB req. ☐ Copies sold: 75,000 since 1982 ☐ Cost: $100

ENERTEC, INC.

☐ IAR Cross Assemblers, Linker and Librarian
Development system. Output of assembly and link can be downloaded to burn PROMs or put into in-circuit emulators for debugging purposes.
IBM PC, AT ☐ 170 KB req. ☐ Copies sold: 700 since 1983 ☐ Cost: $395 and up

GTEK, INC.

☐ Cross Assemblers
Handles 8748, 8751, 28, 6502 and 68X microprocessors.
IBM PC ☐ Cost: $200-$250

JMI SOFTWARE CONSULTANTS, INC.

☐ BASTOC
Reviewed Oct 1984 p. 117.
BASIC migration tool and BASIC compiler. Minimal external library assumptions. All library calls isolated to a few modules in run-time library.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $495-$695

☐ Series 32000 C Cross Compiler
Downloads programs to DB32016 development board. Implements C language as defined by K & R. Employs 6 32-bit machine registers for declaration. Supports floating point. Comprises native code generator for host and code generator for Series 32000, cross assembler, linker and librarian.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $1,000-$3,500

MANX SOFTWARE SYSTEMS, INC.

☐ MS-DOS - Macintosh Cross
Develops applications on MSDOS. Downloads program in executable form to Macintosh.
IBM PC ☐ Cost: $750

MERIDIAN SOFTWARE SYSTEMS, INC.

☐ C"
Standard implementation of C language. Available in both self-hosted and cross-compiler configurations.
IBM PC

☐ Pact
Pascal-to-Ada conversion toolkit.
IBM PC

☐ Pascal
Extended systems programming dialect of Pascal. Compatible with ANSI/IEEE and UCSD Pascal. Borrows additional language concepts from Ada and C. Available in self-hosted and cross-compiler configurations.
IBM PC

MICRO FOCUS, INC.

☐ Upgrade III
Preprocessor and migration aid for applications written in RM/COBOL migrating to Micro Focus' Compact Level II COBOL/ET.
IBM PC, RT

MICROTEC RESEARCH, INC.

SEE AD ON PAGE 306

☐ Cross-Assemblers for Micro Processors
Relocatable macro-assemblers. Includes linking loader, conversion and download utilities and object module librarian option.
IBM PC ☐ 64 KB req. ☐ Introduced: 1975

☐ Cross-Compilers
For C, Pascal and PL/M. Global code optimization. Optimal register allocation. ROMable and reentrant code. Floating point library and symbolic debug capability.
IBM PC

☐ mcASM
Retargetable microcode assembler. Non-positional keyword syntax. Macros with keyword parameters. Values defined local to field. Fields assigned to any bits. Variable formats. Relocatable segments. Overlays. Multiple output formats.
IBM PC

☐ Microtec 85
Pascal cross-compiler. Includes relocatable Macro Assembler, linking loader, object module librarian and source level debugger.
IBM PC ☐ 64 KB req.

☐ PL/86
PL/M cross-compiler for Intel 8086, 8088, 186, 188 and 286. Translates source statements into binary object code. Includes 8086 family macro cross-assembler, linking loader, object module, librarian, download utilities and PL/86 compiler. Produces ROMable, re-entrant code for embedded microprocessor applications.
IBM PC, AT ☐ 64 KB req.

MODULA CORP.

☐ Pascal-to-Modula 2 Translator
Accepts superset of Jensen/Wirth Pascal and produces equivalent Modula-2 code for Pascal constructs.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $100

ORACLE CORP.

☐ Pro*FORTRAN
Precompiler. Embeds SQL data base language statements in middle of FORTRAN programs. Used for FORTRAN programs that must access or manipulate SQL/RT data base information.
IBM RT PC ☐ Introduced: 1986 ☐ Cost: $600

RAPITECH SYSTEMS, INC.

☐ Fortrix-C+, Fortrix-C+/Micro
Translates FORTRAN code to C code. Translates FORTRAN comment lines in place so that internal documentation is retained. Translates typical 50,000 line program in 1-2 weeks.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $995

☐ Fortrix-C, Fortrix-C/Micro
Translates FORTRAN code to C code. Translates FORTRAN comment lines in place so that internal documentation is retained. Translates typical 50,000 line program in 1-2 weeks.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $995

RELMS (RELATIONAL MEMORY SYSTEMS)

☐ ASM NSC-800
Relocatable macro-assembler. Includes RLINK, RLOC and OBJHEX. Files in Intel Hex format.
IBM PC ☐ 65 KB req. ☐ Cost: $395

☐ ASM Z8
Contains Z8, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates statements into relocatable object modules.
IBM PC ☐ 128 KB req. ☐ Cost: $395

☐ ASM Z80
Relocatable macro-assembler. Includes RLINK, RLOC and OBJHEX. Translates code into relocatable object modules. Combines relocatable object modules into single module. Files in Intel Hex format.
IBM PC ☐ 65 KB req. ☐ Cost: $395

☐ ASM Z8000
Relocatable macro-assembler. Includes RLINK, RLOC and OBJHEX. Translates code into relocatable object modules. Combines relocatable object modules into single module. Files in Intel Hex format.
IBM PC ☐ 65 KB req. ☐ Cost: $495

☐ ASM 1802/04/05
Relocatable macro-assembler. RLINK, RLOC, OBJHEX and OBJMOT. Translates code into relocatable object modules. Combines relocatable object modules into single relocatable object modules. Files in Intel Hex and Motorola S-record format.
IBM PC ☐ 64 KB req. ☐ Cost: $495

☐ ASM 6800/01/02
Relocatable macro-assembler. Includes RLINK, RLOC, OBJHEX and OBJMOT. Files in Intel Hex and Motorola S-record format.
IBM PC ☐ 65 KB req. ☐ Cost: $395

☐ **ASM 6800/1/2/3/8**
Contains ASM6800, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into relocatable object modules. Combines relocatable object modules into a single relocatable object module.
IBM PC ☐ 128 KB req. ☐ Cost: $395

☐ **ASM 68000/8/10/20**
Relocatable macro-assembler. Contains ASM68000, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into relocatable object modules.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $495

☐ **ASM 6805**
Relocatable macro-assembler. Includes RLINK, RLOC, OBJHEX and OBJMOT. Translates code into relocatable object modules. Combines relocatable object modules into single module. Files in Intel Hex and Motorola S-record format.
IBM PC ☐ Cost: $395

☐ **ASM 6809**
Relocatable macro-assembler. Includes RLINK, RLOC, OBJHEX and OBJMOT. Translates code into relocatable object modules. Combines relocatable object modules into single module. Files in Intel hex and Motorola S-record format.
IBM PC ☐ 65 KB req. ☐ Cost: $395

☐ **ASM 6811**
Contains ASM-6811, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into relocatable object modules. Combines relocatable object modules into a single relocatable object module.
IBM PC ☐ 128 KB req. ☐ Cost: $395

☐ **ASM 8048/42/43/44/50**
Relocatable macro-assembler. Contains ASM, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into object modules.
IBM PC ☐ 128 KB req. ☐ Cost: $395

☐ **ASM 8051**
Relocatable macro-assembler. Includes RLINK, RLOC and OBJHEX. Translates code into relocatable object modules. Combines relocatable object modules into single module. Converts absolute object module to object code file in Intel Hex format.
IBM PC ☐ 65 KB req. ☐ Introduced: 1982 ☐ Cost: $395

☐ **ASM 8080/85**
Relocating macro-assembler. Includes RLINK, RLOC and OBJHEX. Files in Intel.
IBM PC ☐ 65 KB req. ☐ Cost: $395

☐ **ASM 9900/95**
Contains ASM9900, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into relocatable object modules.
IBM PC ☐ 128 KB req. ☐ Cost: $495

☐ **ASM 99000**
Contains ASM 99000, RLINK, RLOC, and OBJCON. Translates code into relocatable object modules. Combines relocatable object modules into single module.
IBM PC ☐ 128 KB req. ☐ Cost: $595

☐ **ASM-6301**
Contains ASM6301, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into relocatable object modules. Combines relocatable object modules into a single relocatable object module.
IBM PC ☐ 128 KB req. ☐ Cost: $395

☐ **ASM-6500**
Contains ASM6500, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into relocatable object modules. Combines relocatable object modules into a single relocatable object module.
IBM PC ☐ 128 KB req. ☐ Cost: $395

☐ **ASM-6804**
Contains ASM 6804, RLINK, RLOC, OBJHEX and OBJMOT. Accepts user's program source code statements and translates them into relocatable object modules. Combines relocatable object modules into a single relocatable object module.
IBM PC ☐ 128 KB req. ☐ Cost: $395

☐ **HD64180**
Contains ASM HD64180, RLINK, RLOC, OBJHEX and OBJMOT. Translates code into relocatable object modules. Combines relocatable object modules into single module.
IBM PC ☐ 128 KB req. ☐ Cost: $495

☐ **TRU 80/86**
Translates 8080/8085 source code into 8086 source code.
IBM PC ☐ 128 KB req. ☐ Cost: $700

RR SOFTWARE, INC.

☐ **PasTran**
Source code translation tool with 95% translation capability from ANSI standard Pascal to Ada.
IBM PC, AT ☐ Introduced: 1982

J.H. SHANNON ASSOCIATES

☐ **Metamorphosis**
Translates source program from one language to another. Handles FORTRAN to ADA, JOVIAL to ADA, any language to C and dialect conversions. Implements compilers, assemblers, macro processors and command/query language processors. Reformats character-oriented data base files.
IBM PC ☐ Cost: $387

SOLUTIONWARE CORP.

☐ **ASM32K**
Cross-assembler for National Semiconductor NS32000 family. Macros, conditional assembly, include files, 32-bit expression arithmetic, procedures and string variables.
IBM PC ☐ 56 KB req. ☐ Copies sold: 75 since 1982 ☐ Cost: $500

☐ **CX-32**
Cross-compiler for ASM 32K, UTIL 32 and IDEBUG 32. Creates assembler source or relocatable object code. Object code is compatible with Solutionware's Pascal.
IBM PC ☐ 56 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $300

☐ **Idebug 32**
Communicates with National Semiconductor's In-System Emulator ISE-32. Operates with ASM-32 and UTIL-32.
IBM PC ☐ 56 KB req. ☐ Copies sold: 10 since 1983 ☐ Cost: $750

☐ **PAS-32**
Cross-assembler and cross-compiler for ASM-32K, UTIL-32 and IDEBUG 32. Compatible with ANSI standard, bit variables, NS32000 module linking, register variables and RTS32 run time support.
IBM PC ☐ 56 KB req. ☐ Copies sold: 30 since 1982 ☐ Cost: $500

☐ **Util 32**
Supports ASM32 and cross compilers. Facilitates software development for NS32000 based sytems. Downloads code via serial port to DB16000 development board for execution and debugging. Cross linker, librarian and file conversion utility.
IBM PC ☐ 56 KB req. ☐ Copies sold: 60 since 1982 ☐ Cost: $500

SPECTRUM TECHNOLOGIES

☐ **BASIC to Pascal Translator**
Converts BASIC programs to Pascal, showing Pascal code which corresponds to BASIC code.
IBM PC ☐ 128 KB req. ☐ Cost: $50

SUPERSOFT, INC.

☐ **C Cross Compiler**
IBM PC

TGL, INC.

☐ **Converter**
Translates Pascal into C. Enables p-System, DEC VAX/VMS, or MS Pascal programs run on UNIX or MSDOS micro.
IBM PC ☐ 256 KB req. ☐ Copies sold: 15 since 1984 ☐ Cost: $5,000

2500 AD SOFTWARE, INC.

☐ **6502 Cross Assemblers for IBM P.C. 8086/88 CP/M86**
Cross assembler.
IBM PC ☐ Cost: $100-$200

☐ **6502 Cross Assemblers for IBM P.C. 8086/88 MSDOS**
Cross assembler.
IBM PC ☐ Cost: $100-$200

☐ **8086/88 Assembler with Translator**
Assembles and links code for MSDOS or PCDOS and CP/M-86. MSDOS produces exefile. CP/M-86 produces cmdfile. Submit mode invocation, code, data stock, extra segments, and complex overlay support.
IBM PC ☐ Cost: $100

UNITED STATES SOFTWARE CORP.

☐ **AX/RX Cross Assemblers**
Absolute version translates assembly source file to a downloadable object file in Intel hex format. Relocatable version translates an assembly source file to a relocatable file which may then be linked with other relocatable files, using an included linker, to form a downloadable object file in Intel hex format.
IBM PC ☐ Introduced: 1985 ☐ Cost: $250-$400

UNIVERSAL CROSS-ASSEMBLERS

☐ **CROSS-8**
Table-based cross assembler. Compiles Assembly language programs for most 8-bit processors. Outputs hexadecimal machine language file in Intel, Motorola and Tektronix 8-bit formats. Supports 1802, 3870, 6502, 6801, 6805, 8048, 8051, 8085, 8096, COP400, Z8 and Z80 processor families.
IBM PC ☐ 128 KB req. ☐ Copies sold: 125 since 1985 ☐ Cost: $100

WILD HARE COMPUTER SYSTEMS, INC.

☐ **Choice**
Allows DG's Interactive COBOL programs to run on almost any computer.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $500-$10,000

DATA BASE/ FILE MANAGEMENT

ACCTEX INFORMATION SYSTEMS (AIS)

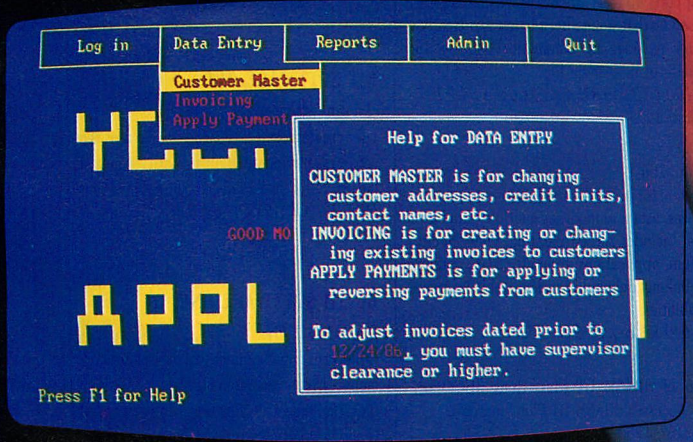
☐ **FIND (Filed/Indexed Documents)**
Modules cover document control/distribution, records management, biographical/hierarchical searches, image retrieval, office automation, correspondence tracking/scheduling, and optical disk image retrieval. Allows user to download data. Used with word processing, spreadsheet and electronic mail.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 300 since 1979 ☐ Cost: $9,000-$100,000

ACUMEN INFORMATION SYSTEMS, INC.

☐ **ViewFinder**
Information retrieval from dBASE II or III data files. Links windows so related information can be retrieved and displayed. Views up to 5 data files simultaneously. Allows user-controlled window size and position on screen. Presents data as tables or forms.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $79

AD & P ANALYSIS DESIGN & PROGRAMMING

☐ **ULTRA-BASE**
Relational DBMS. Key generation with 64 keys per record, 127 characters per search key, search ability with partial keys. Unlimited number of files per data base and security by physical terminal and/or user-supplied code. Word processing, report writing, calculator and spreadsheet. Novell Netware compatible.
IBM PC, XT, AT ☐ 4 KB req.



DataFlex does windows!

The best DBMS just got better! Pop up help screens and pull down menus are now easy to accomplish in your DataFlex applications. Revision 2.2 gives you full and easily-programmed control over the size, color and location of every screen page and allows each to be displayed without disturbing other on-screen data. A new DataFlex command even allows you to temporarily suspend execution of your DataFlex application, run any other program or DOS command, and then return to DataFlex at the point you left it! But best of all, DataFlex applications can run flawlessly on over 30 single user, multi-user and LAN operating systems! See your nearest DataFlex dealer today or write us and ask for your free DataFlex demo kit.

GUARANTEED to run as specified on over 200 single-user and multi-user systems including IBM TOKEN RING NETWORK.

DATAFLEX®

Single-User • Multi-User • LANS • XENIX • UNIX V • VAX/VMS

Data Access Corporation

CIRCLE NO. 272 ON READERS SERVICE CARD

ADVANCED DATA INSTITUTE, INC.

☐ Aladin

Relational DBMS which interfaces with Wordstar, dBASE II and Lotus 1-2-3.

IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $595-$795

ALL EASY CORP.

☐ Datafax

Free-form relational filing. Organized as series of folders which can be filed by 60 to 100 keywords identifying folder, such as name, date or category. Non-key word search. Highlights key word in text. Password protection optional. Uses IBM function keys.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $199-$299

ALPHA SOFTWARE CORP.

☐ Data Base Manager II- The Integrator

Provides multi-level search capability. Generates reports and form letters. Supports copy and reconfigure. Numerical planning data and word processing text can be integrated into data bases developed by program. Includes color and multiple input forms. Integrates with Lotus 1-2-3, dBASE II, dBASE III, VisiCalc and MultiPlan.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 30,000 since 1983 ☐ Cost: $295

AMERICAN PLANNING CORP.

☐ BOSS

Data processing/management system. Accepts user's application system performance specifications. Inquiry subsytem performs processing operations on specifications. Complex report generation handled by RPG II report generator. The fourth subsystem, Companion, creates custom application software.

IBM AT ☐ 256 KB req. ☐ Copies sold: 800 since 1983 ☐ Cost: $990

ANSA SOFTWARE

☐ Paradox

Reviewed Apr 1986 p. 154.

Contains Lotus-like menu structure. Uses query-by-example interface for querying. Constructs command files called scripts. Stores data in 2D tables. Provides PAL programming language. Supports date and time, financial, mathematical, statistical and string manipulation functions. Generates reports and forms.

IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $695

APPLIED DATA RESEARCH, INC.

(an Ameritech Co.)

☐ PC Datacom

Supports data exchange between PC and mainframe. Provides query facility, data download/upload, data export/import for exchanging data between PC spreadsheet and application software, report writer and unattended/repetitive task support. Requires ADR's Datacom/DB, Datadictionary and Dataquery systems.

IBM PC, XT, AT, 3270-PC ☐ 512 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $495 per unit

APPLIED SOFTWARE TECHNOLOGY

☐ VersaForm XL Business Form Data Base

Application generator, data base and business form preparation. Imports/exports information from one file to another. Defines/writes procedures using embedded programming language. Data entry checking. Retrieves forms based on values contained. Prepares tabular management reports. Columnar layout. Mailing label printer program.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 10,000 since 1984 ☐ Cost: $89-$389

ARGOS, INC.

☐ Tracker

DBMS. Describes activities or events by eight sortable variables and two sortable dates. Five quantities/amounts per record. All codes displayed in window fashion. Tracks activities, production, receipts, shipments, equipment, test results, inventory and personnel.

IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $195

ARITY CORP.

☐ SQL Development

Implements SQL data base language. Works with Arity/Prolog to build intelligent data base applications. Requires Arity/Prolog Compiler or Interpreter.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $295

ARTS COMPUTER PRODUCTS, INC.

☐ DOS/Assist

Used with PC Voice or PC Lens by visually impaired. Summarizes and illustrates commands for DOS 2.0, 2.1, and 3.0.

IBM PC ☐ Cost: $75

ASAP, INC.

☐ ASAP Six

DBMS. Incorporates Universal Relation technology, which indexes, arranges data items into files and organizes files into data bases. No syntax or commands are required to operate system. Opens up to 12 files simultaneously for screen design and report generation.

IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 3,500 since 1984 ☐ Cost: $395

ASHTON-TATE

☐ dBASE cTool Series/The Graphic Library

Creates customized bar graphs, pie and line charts. Includes built-in C functions and engine for adding functions to dBASE III Plus applications.

IBM PC, XT, AT ☐ Cost: $90

☐ dBASE cTool Series/The Programmers Library

Handles numerical functions. Includes built-in C functions and engine for adding functions to dBASE III Plus applications.

IBM PC, XT, AT ☐ Cost: $90

☐ dBASE II

Reviewed Jun 1984 p. 56; Jun 1984 p. 181.

Relational DBMS. Manipulates data in one or more files at same time. Supports customer profiling, medical office management, securities, portfolio analysis, production scheduling and management, time billing, job costing and subscription fulfillment. Includes ZIP, a screen builder/report writer.

IBM PC ☐ 128 KB req. ☐ Copies sold: 300,000 since 1981 ☐ Cost: $495

☐ dBASE III

Reviewed Jan 1985 p. 64.

Supports over a billion records per file, limited only by user's computer system. Supports up to 10 open files. Accesses information in one file based on data in another related file. Handles procedures, parameter passing and automatic variables. Includes up to 32 procedures in a single file.

IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 197,000 since 1984 ☐ Cost: $695

☐ dBASE III Plus

Reviewed May 1986 p. 166.

Data management system for standalone or LAN environments. Assistant feature creates, uses and modifies multiple data bases via pull-down menus. Includes screen painting, view facility, advanced query system, applications generator, data catalog, code encryption and linking, debugging and assembly language calls. Multi-user capabilities.

IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $695

☐ dBRUN III Plus

Execute-only version of dBASE III Plus. Runs dBCODE/dBLINKER utilities. Accesses dBASE III Plus functions.

IBM PC, XT, AT ☐ Cost: $250

☐ MultiMate On-File

Permits users to search, select, sort, edit, view, print, transfer and cross reference data. Stores up to 2,200 text characters per card. Generates and prints reports, lists and labels. Transfers information from Document Summary screens to card boxes.

IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $145

☐ RunTime

Includes dBCODE and dBRUN modules. dBCODE encrypts dBASE II command file, protecting it from being read or copied by the end user. dBRUN runs code condensed by dBCODE and implements most dBASE II features. End user never has access to dBASE dot-prompt and cannot write a program.

IBM PC ☐ 128 KB req.

AUTOMATA DESIGN ASSOCIATES

☐ VMI PROLOG

DBMS. Virtual and resident data bases may be mixed. Updating algorithim preserves the format of the data base as typed while making only necessary changes to the data base in central memory.

IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $100

BAR CODE APPLICATIONS, INC.

☐ File Tracker

For 10,000-100,000 files. Bar codes and scanners control movement of material. Searches by file number, subset department, file name, contents of file, user name. Reports late return notification, material out by user, activity and last date used by item and customized user requests.

IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 6 since 1985 ☐ Cost: $995

BATTERIES INCLUDED

☐ Consultant

Built-in templates include inventory, budgets and catalog. User customizes file formats. Features in context, on-screen help, 5 search operators plus wild card capability, unlimited number of open files and extensive macro capability. Supports special print features and generates forms.

IBM PC, PCjr ☐ 128 KB req. ☐ Cost: $100

BENEDAT SYSTEMS GROUP

(division of Benefit Management Corp.)

☐ DB Task

Relational, multi-file data base manager. Creates 99 interactive applications each with 99 defined tasks. Protects data integrity and application access by ID entry. Accommodates unlimited records and 24 index fields. Multi- or single-user versions.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $99

BIT SOFTWARE, INC.

☐ Form Manager

User creates forms on the screen and uses them for data storage, retrieval and update. Built-in math formula allows on-line calculations. Sorts on 3 fields. Includes report writer.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $195

BLYTH SOFTWARE, INC.

☐ OMNIS 3 Plus

DBMS and development tool for vertical applications. Provides mouse-driven programming language. Supports up to 12 open files simultaneously. Relational or hierarchical. Links screen and report formatting with user-defined entry sequences allowing overlays and custom messages/menu screens.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $495-$990

BORLAND INTERNATIONAL, INC.
SEE AD ON INSIDE COVER & PAGE 1

☐ Reflex, the Analyst
Reviewed Apr 1986 p. 189.
Retrieves data from user's data base or other applications for analysis. Generates columnar, summary or sorted reports, and bar, stacked bar, pie charts, line and scatter graphs. Calculates totals, averages, counts, maximums, minimums, standard deviations and variances.
IBM PC, XT, AT, PCjr, 3270-PC, Portable PC ☐ 384 KB req. ☐ Cost: $100

BOS NATIONAL, INC.

☐ Finder
Multi-user data storage and retrieval system. Stores, controls and maintains facts and figures. Maintains inventory, personnel records, real estate property, insurance policies and mailing lists.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1978 ☐ Cost: $450 (single-user); $900 (multi-user)

BPI SYSTEMS, INC.

☐ Information Management System
Adds, deletes and redefines items in records without rebuilding entire file. Edits entries for format of numeric, alphanumeric and data fields, preventing data entry errors. Permits information in any field to be compared to other fields. Performs basic math functions.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $195

BRITTON LEE, INC.

☐ IDM Host Software
Manages relational data bases by off-loading routine functions from host computer. Includes an integrated report/query system and report generator.
IBM PC

BSC COMPUTER SYSTEMS, INC.

☐ QL/1 (Quantum Leap/1)
DBMS and application generator. Includes screen, menu and report generators, B-Tree Indexed Access Method and sort. File maintenance module included. Parameter driven. Generates images.
IBM PC, XT, AT ☐ 96 KB req. ☐ Cost: $6,000

BUSINESS TOOLS, INC.

☐ TAS-Plus
Relational DBMS. Offers procedural programming language, data dictionary, source code editor, screen and report format painter, program generator, run-time compiler and data restructure facility. Exports data in ASCII files. dBASE conversion utilities. Creates applications transportable across OS.
IBM PC ☐ 384 KB req. ☐ Copies sold: 7,000 since 1985 ☐ Cost: $69

BUTTONWARE, INC.

☐ PC-File III
Menu driven with optional encrypted data security. Sort and fast binary search on any field. Supports DOS subdirectories and exchanges data with other programs. Automatic time, date, unique, or constant fields. User defined macros. Comparison, generic, wildcard, and soundex searches.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500,000 since 1982 ☐ Cost: $60

☐ PC-File/R
Menu driven with optional encrypted data security. Relational read capabilities and built in word processor with mailmerge. Supports DOS subdirectories and exchanges data with other programs. Includes automatic fields, binary search and search or sort on any field. User-defined macros utilizing any command or key.
IBM PC ☐ 256 KB req. ☐ Copies sold: 6,000 since 1986 ☐ Cost: $149

CACTUS COMPUTERS, INC.

☐ Easy-K
Front end for Knowledgeman DBMS. Menu-driven ad hoc query and reporting. Allows user to create, save, recall and modify all settings. Provides printer settings, titles, column headings and environment and utility variables.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3 since 1984 ☐ Cost: $120

CASHER ASSOCIATES, INC.

☐ TRACS
Tracks 1,000,000 files. Includes retention facility. Controls references or withdrawals. Provides activity and usage information, report generator and custom data base fields. Captures deposit information upon its receipt by file clerks. Includes MIS and retention schedule.
IBM PC ☐ 512 KB req. ☐ Copies sold: 2 since 1984 ☐ Cost: $5,000

C.D.A. INTERNATIONAL SOFTWARE CORP.

☐ Datamaster
Interfaces with word processing and telecommunications systems. Provides on-line information retrieval and update of single or multiple data base sources. Allows mixed fields on same screen. Updates 1 or more data bases from same screen. Links screens.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $495

CHAMPAIGN SYSTEMS, INC.

☐ PC Dossiers
Records and cross-references detailed customer profiles, targets sales opportunities, identifies purchasing trends, recalls which products clients are interested in, provides specific descriptions of clients best suited for particular products, prints reports and mailing labels and merges data with word processors and spreadsheets.
IBM PC ☐ 128 KB req. ☐ Copies sold: 8 since 1985 ☐ Cost: $245

CHANG LABORATORIES, INC.

☐ FilePlan
User views data in worksheet single record mode. Files may be defined before or after entry, and re-named without losing material. Prompts may be user-defined.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $295

CHASE ECONOMETRICS
(subsidiary of Chase Manhattan Bank)

☐ XPLORE
Data retrieval. Locates data by subject. Prints description of each series, including data range, periodicity and source. Moves data directly to XSIM or the PC ready for analysis.
IBM PC, XT, AT

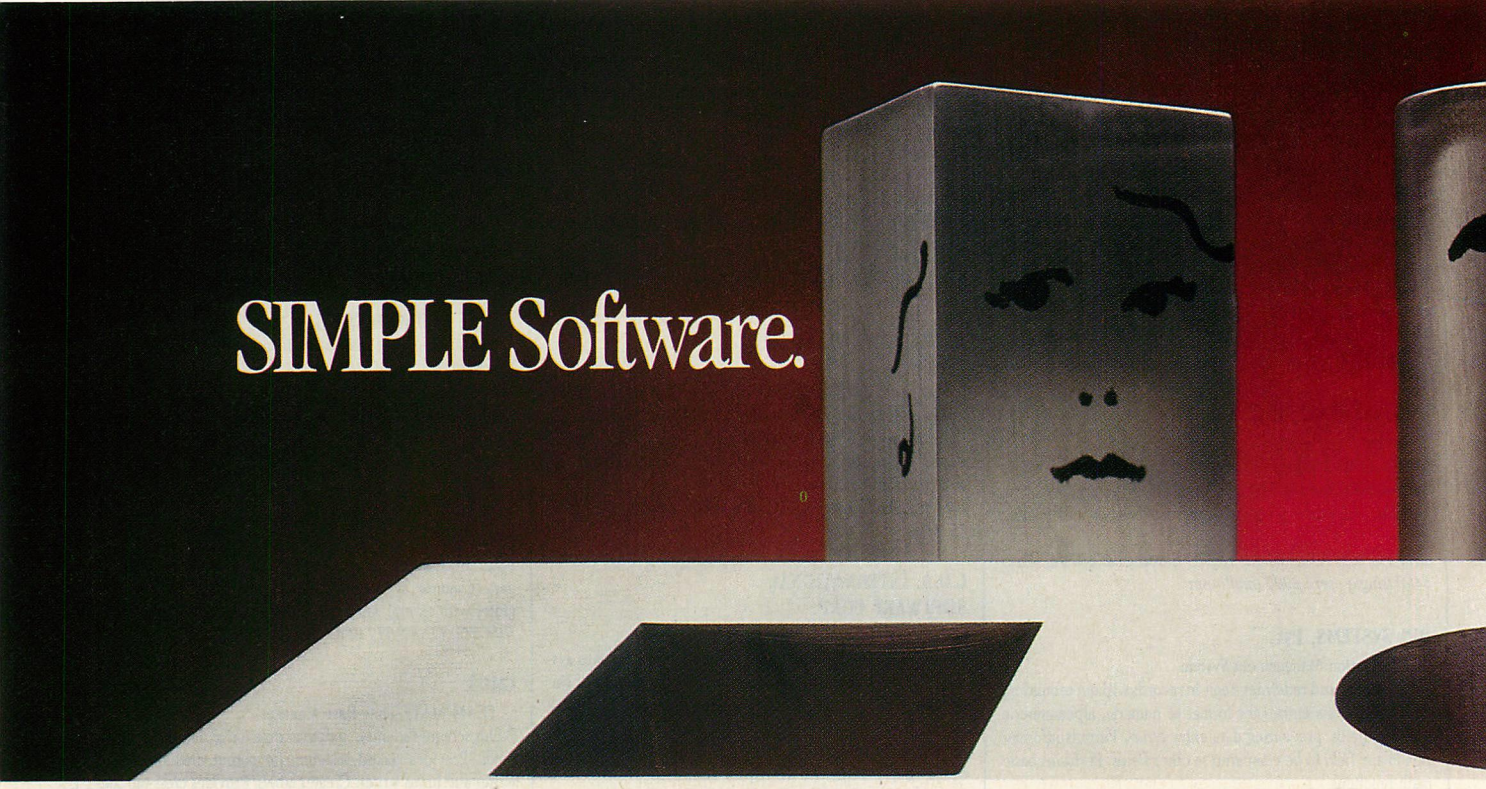
CLG TECHNOLOGIES CORP.

☐ Swift-Tech
File retrieval with natural language and text interface. Disregards grammar, syntax and spelling errors. Stands alone or integrates with several word processing and DBMSs.
IBM PC, XT, AT ☐ 112 KB req.

CMDS

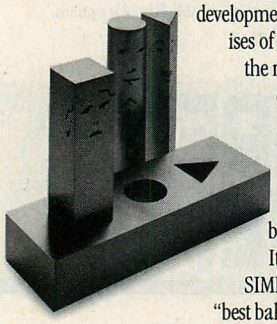
☐ TEAM MATE Data Base Manager
Builds screens for entry, update or deletion of data in up to 160 fields. Provides record selection for output. Includes report writer and forms writer. Creates labels. Provides cross-tab statistics.
IBM PC, XT, AT ☐ 128-256 KB req. ☐ Copies sold: 100 since 1980 ☐ Cost: $500

CODE CRAFT CORP.



☐ dCOLOR III
Interactive module for setting and resetting color attributes in dBASE III. Distributed as either clipper object code modules or DBRUN files. Supports all dBASE III color options.
IBM PC ☐ 156 KB req.

MANUFACTURERS TAKE NOTE!



When your product or company is covered by this magazine, you can order custom designed reprints* for use in promotional mailings, sales kits, press releases and point-of-purchase displays.

For more information on how you can take advantage of this wonderful promotional opportunity, call or write:
Jennifer Locke—Reprints Manager, Ziff-Davis Publishing Company, One Park Avenue, New York, NY 10016 212-503-5447.

*Minimum quantity—500 reprints.

The 3-in-1 applications development

Presenting the first database applications development tool that delivers the promises of 4th-generation languages on the microcomputer. Now you can develop business applications with a richness of features, the high-standards of performance, the ease-of-use, and the maintainability that you demand.

It's SIMPLE Software.

SIMPLE delivers the new absolute "best balance" of power and ease-of-use for everyone from users frustrated with the complexities of so-called powerful command languages to computer professionals harried by time-consuming procedural development techniques.

SIMPLER THAN EVER BEFORE.

You can jump right in at virtually any level of experience and unleash the full processing power of the PC easier than ever imagined.

SIMPLE has a totally non-procedural way of doing things that literally flattens-out the learning curve. Its unique and innovative user-interface makes you more productive from the word "go." You can automate everyday business tasks or prototype new applications without ever having to write a single line of procedural code.

If you are an experienced programmer, SIMPLE takes you farther faster. SIMPLE allows you to apply your skill and experience to achieve higher levels of productivity. And if you are developing mainframe applications, SIMPLE is the perfect prototyping tool. It combines ease-of-use, speed, and high-quality system documentation for your applications development on large systems.

YOU GET 3-IN-1.

SIMPLE stands for SYSTEM IMPLEMENTATION by EXAMPLE.™ It's an easy-to-use applications *design tool,* a powerful *relational database manager,* and a non-procedural, full-featured *applications generator.*

1. It's a Design Tool.

SIMPLE allows you to quickly prototype applications on the microcomputer. You can sit right down and draw, edit, and specify, processing logic with a few key-strokes.

SIMPLE's unique human engineering aids you in the process of structured design by organizing your development efforts in a building-block fashion. For less experienced developers, this built-in process literally guides you through the entire applications development process. This same structure enables experienced developers to move quickly and easily from task to task.

2. It's a Relational Database Manager.

SIMPLE offers exceptional speed performance because it is written in Assembler and incorporates a highly-optimized B-tree data access method that eliminates record sorting.

SIMPLE uses a dynamic single-record index. You can have an unlimited number of indices in any record. Each index may be either a single or concatenated key. SIMPLE's efficient, automatic up-date indexing schema optimizes record retrieval and minimizes development efforts.

SIMPLE's relational joins are easy to construct and the most efficient to process. Rather than a physical view, you get a logical view without the need to create an additional physical file at any time. Joins are accomplished dynamically at time of processing and support one-to-many and many-to-many relationships.

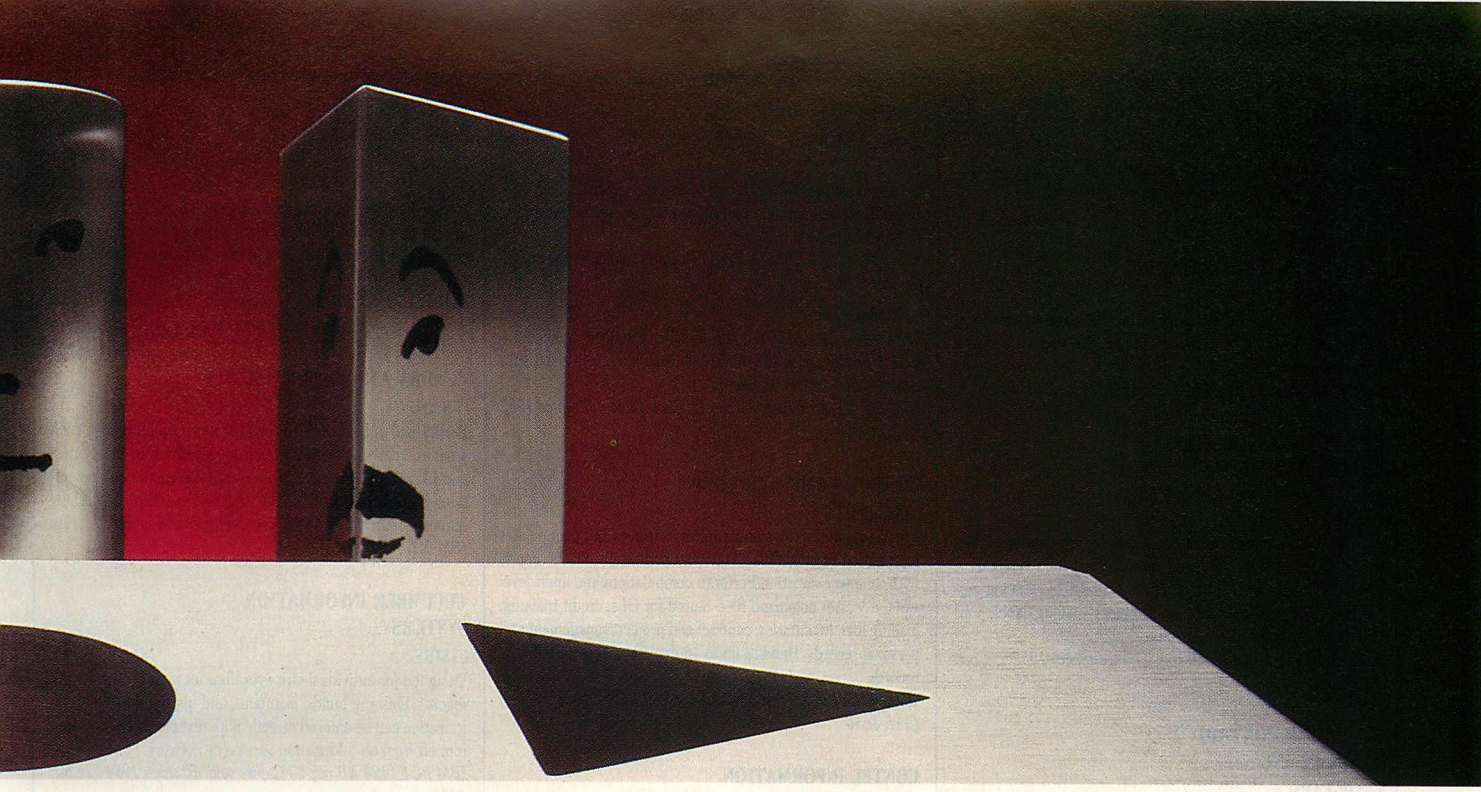
With SIMPLE, database management becomes more than just a question of "how many" files or "how many" fields, but a question of "how much more" you can do, and "how easily" you can do it.

3. It's an Applications Generator.

It is the most practically functional applications generator on the market today. SIMPLE is a completely non-procedural applications generator, never forcing you back to procedural methods, letting you accomplish even the most complex data-based applications in the most easy-to-use-and-understand fashion.

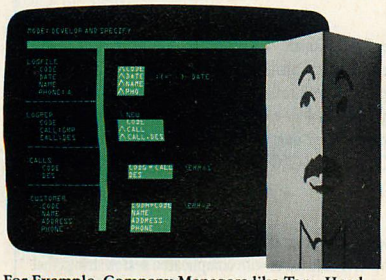
A SINGLE, VISUAL 4GL LANGUAGE.

Uniquely, every step in program development from input screens, to reports, to complex processing logic is accomplished in SIMPLE's three all-visual worksheets. It is fully non-procedural and totally picture-oriented. Design right on the screen, and SIMPLE's built-in pattern-recognition logic automatically generates all the application code for you. You never have to leave SIMPLE's 4GL non-procedural technique. SIMPLE creates solutions right in front of your eyes making it a picture-perfect application development environment.



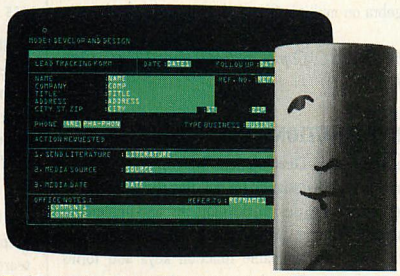
POWERFUL & EASY-TO-LEARN WORKSHEETS.

Now, here's how to turn "do-it-tomorrow" backlogs into "done-yesterday" working programs.

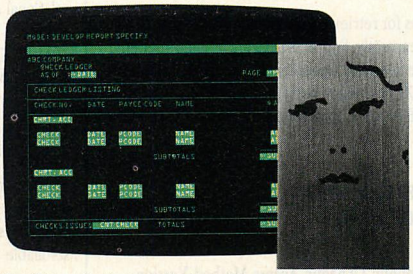


SIMPLE provides three worksheets — a File Worksheet, Specify Worksheet and Design Worksheet. Developing a program in SIMPLE requires you only to define a file; SIMPLE creates the basic program for you. You can enhance the program on SIMPLE's Design and Specify Worksheets.

In the Design Worksheet, you simply paint or draw an example of the input screen or report you want. The Design screen may be painted exactly the way you want it using SIMPLE's built-in editor.



IBM PC is a trademark of International Business Machines. System Implementation by Example is a trademark of Software Merchants Unlimited.



tool for every Tom, Dick and Harriett.

For Example, Company Managers like Tom, Head of Customer Support for a Chain of Retail Outlets, easily develop customized applications. SIMPLE lets Tom develop a Branch Reporting System which reports information from support service calls. Tom wants a system which validates certain information and provides a customer history to improve the branch's support capabilities. With SIMPLE's Specify Worksheet on screen, Tom simply joins data from four different files and establishes their relationship. This enables the user to pull-up call classifications, also verify if the caller has been called on before.

For Example, Information Center Staff Members like Dick, who works for a major Computer Hardware Manufacturer, develop new microcomputer applications systems with SIMPLE. Dick is working with the Director of Marketing on a lead-tracking system. Today, they're reviewing the data entry screens developed with SIMPLE. Dick sits down to review the main data entry screen which shows the prospect demographic information, the media source and date from which the lead was generated, and the fulfillment literature to be sent.

For Example, System Analysts/Programmers like Harriett easily prototype design changes, interacting directly with department heads. Harriett has completed the prototyping with the help of SIMPLE of some previously requested changes in a large Insurance Company's Mainframe Payables System. She has built a test database with data imported from the mainframe and is going to review a check-ledger report in the Controller's office on her portable computer. Harriett shows the Controller exactly how the new system gives a report of all checks issued.

The full-screen editor offers a wide range of capabilities to aid you — including the ability to delete or insert a character or an entire line, move or copy blocks of information, lasso text or variables to move around the screen and window to other worksheets in one or two keystrokes.

Your design worksheet invokes powerful specification macros that provide your application user with a richness of features and functionality that you demand from a development tool. Pop-up a window and browse through another file, interrupt data entry to perform another program, provide context-sensitive help, and perform conditional processing based on the user's input.

SIMPLE's sophisticated, built-in pattern-recognition logic automatically creates your program.

In the Specify Worksheet, you implement your processing logic. No longer do you have to fall back to procedural programming to get the processing power you need. Range checking and data validation are easily implemented, visually. Conditional processing statements are quickly set up. Arithmetic operators, date operators, and a full set of string functions are available. You specify an example of how you want your data processed, and SIMPLE creates the program.

POWERFUL & EASY-TO-WORK-WITH MENUS.

SIMPLE gives you unlimited design flexibility in "point-and-shoot menu" creation. You have the total freedom to build menus before, during or after development, unmatched in other systems.

SIMPLE, SIMPLER, SIMPLEST.

The SIMPLE software package — with SIMPLE's Program Disk, Help Disk with an on-line tutorial, and easy reference User's Manual — is available for $395.00. It has a 30-day money-back guarantee and includes 90 days of the most user-friendly tech-support you'll find in the industry.

Ask for SIMPLE at your computer dealer. Or call us direct for the dealer nearest you and a full-functioning SIMPLE demo package with a Quick-Start manual for only $9.95.* Call 800-874-6753, in California 800-826-3069.

*Includes shipping and handling. California residents add sales tax.

CIRCLE NO. 326 ON READERS SERVICE CARD

COMPUFIRM CORP.

☐ Data Base Manager
ISAM management facilities. Configurable as task or procedure. Capacity of over 5,000 records per data base.
IBM PC ☐ Cost: $495

COMPUMAX ASSOCIATES, INC.

☐ Microbase
Information manager and report writer. Features explanations, safeguards, key word search capabilities, file access, updated options and reporting.
IBM PC ☐ 64 KB req. ☐ Introduced: 1977 ☐ Cost: $149

COMPUTER ASSOCIATES INTERNATIONAL, INC.

Micro Products Division

☐ EasyFiler
Uses ISAM file management for access by any one of 10 key fields without sorting. Offers 7 user-defined field types. Provides phonetic search. Subgrouping and 5-level sequencing supported. Mail merge capability produces mailing labels and letters from a full-screen text editor.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $195

COMPUTER CONTROL SYSTEMS, INC.

☐ DB-FABS
Allows for relational data modeling with interfile relationships. Transfers data to and from other applications via standard ASCII files. Run-time mode handles file I/O, indexing, sorting, screen management and reports.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $295

☐ FABS Plus
Maintains key files for retrieval in large data files. Up to 20 files may be open concurrently. Supports network or multi-user environment. Generic searches, multi-level sequencing, duplicate key support, ASCII or integer keytype permitted.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $195

COMPUTER DEVELOPMENT SPECIALISTS OF LONG ISLAND, INC.

☐ SDAM/II (Symbolic Dynamic Access Method-Version II)
Creates and maintains data base with multiple keys and generates custom report formats. Includes subroutine package, which incorporates data management capabilities into user's software. Modules include SCREATE, SLOAD, SQUERY, SWRITER, SREPORT and SPACK.
IBM PC ☐ 48 KB req. ☐ Copies sold: 15 since 1981 ☐ Cost: $50

CONCENTRIC DATA SYSTEMS, INC.

SEE AD ON PAGE 19

☐ C.I.P. (The Concentric Information Processor)
DBMS and report generator. User creates reports and data entry screens in any format by moving fields interactively, on-screen. Allows up to 40 fields per record, any or all of which can be keys. Saves up to 76 reports per file. Accommodates up to 50 characters per field and 65,000 records per file.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $295

CONCEPT OMEGA CORP.

☐ Thoroughbred IDOL Data Base Management System
DBMS for on-line microcomputer development of business/personal applications. Uses dictionary approach to build data base from data element, record and file definitions. Includes English language screen prompts. Features self-documenting and increased control redundancy.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1979 ☐ Cost: $695 and up

CONCEPTUAL SOFTWARE, INC.

☐ Prodas/Database
Relational DBMS. Performs data base printout, data entry, data base sort, menu building, access to external program, data base transfer, macros and text editing. Syntax and operation similar to SAS's Data Step.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $720

☐ Prodas/Eval
Data bases contains 20 records. Includes PRODAS documentation, 5 floppy disks, PRODAS/Database, descriptive statistics modules and PRODAS/Graph.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $40

CONDOR COMPUTER CORP.

☐ Condor 3
Uses English-like commands. Stores, retrieves and manipulates information on single files. Maintains audit trails. Prints reports with summary statistics. Performs computations and multi-level sorts. Accesses command files. Suited for GLs, credit tracking, mailing lists, inventories, contract and project management and personal records. Handles up to 18 decimal places and 65,534 records.
IBM PC ☐ 128 KB req. ☐ Copies sold: 150,000 since 1977 ☐ Cost: $650

CONTEL INFORMATION SYSTEMS, INC.

(subsidiary of Continental Telecom, Inc.)

☐ RTFILE
Interactive, relational DBMS. Includes set of FORTRAN, PASCAL and MACRO-11 callable subroutines to access data base. Paints CRT screens for use in data base maintenance and retrieval, performs full or partial key searches, generates reports using relational algebra on multiple files and adds or deletes keys in a record.
IBM PC ☐ 64 KB req. ☐ Copies sold: 600 since 1979 ☐ Cost: $500-$5,000

CONVERGENT SOLUTIONS, INC.

☐ ADS (The Application Development System)
Fourth generation DBMS designed for building systems on CT's hardware. Permits users to design, develop, test and implement complex systems. Features programming language, multiple scrollable windows, programmable function keys and forms management.
IBM PC ☐ 512 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $6,000

COSMOS, INC.

☐ Network REVELATION
Transaction oriented data base with record locking and filing system. Manages data in a network environment. Accepts converted, single-user REVELATION applications.
IBM PC ☐ 320 KB req. ☐ Introduced: 1984 ☐ Cost: $495

☐ Revelation
Reviewed Feb 1986 p. 160.
Data base application building tools include dictionary builder, structured programming language, fourth generation design tool, English-like query language and report writer.
IBM PC ☐ 320 KB req. ☐ Copies sold: 18,000 since 1983 ☐ Cost: $950

COURTNEY BUSINESS SYSTEMS, INC.

☐ Courtney Database
Interfaces with accounting, graphics, spreadsheet and word processing packages. Combines or separates data files, posts accounting or other data from another file and transfers fixed or variable length data from or to other software packages or ASCII files.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $195

CP INTERNATIONAL, INC.

(division of Computer Power Group)

☐ Status
Text and unstructured information storage and retrieval. Allows references to be retrieved from large volumes of text, by word, phrase or number. Displays the number of references found, and the actual reference. Allows user to browse around reference.
IBM PC ☐ 1,000 KB req. ☐ Copies sold: 300 since 1975 ☐ Cost: $15,000-$80,000; lease plans available

CUADRA ASSOCIATES, INC.

☐ Star/PC
DBMS and information retrieval system. Applicable to such areas as archives, electronic publishing, federal records centers and libraries, information centers and clearinghouses, law offices, museums, patent-search offices, rare book publishing houses, research organizations, universities and special libraries.
IBM XT, AT

CUCUMBER INFORMATION SYSTEMS

☐ SIRE
Designed for individual offices or libraries to store and retrieve records. Designs, builds, maintains, and queries data bases. Information can be entered directly with text processing or transformed from an information service or network.
IBM PC ☐ 128 KB req. ☐ Copies sold: 70 since 1984 ☐ Cost: $600

DATA BASED SOLUTIONS, INC.

☐ dBASE III dLetter Generator
Merge letter generator for dBASE III. Allows end users to print form letters from dBASE III data files.
IBM PC ☐ 256 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $15

☐ dNames Professional
Reference and master mailing program for dBASE II. Produces 1-up, 4-up and Cheshire labels. Produces user-defined labels, mail merge files, Rolodex cards, 80- and 132-column reports. Includes menu-based query system for selective searches.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,501 since 1982 ☐ Cost: $49

☐ dQ
Menu-based query program for dBASE II. Allows end-users to search dBASE II data bases with complicated search strings that are created based on responses to simple menus. Lets user select data base and field and then specifies search criteria from menu.
IBM PC ☐ 64 KB req. ☐ Copies sold: 532 since 1984 ☐ Cost: $15

☐ dSolutions ProPak
Utility/application toolkit for dBASE II. Provides mailing label generator that creates and stores up to nine custom label formats. Creates multi-column reports instead of single-column dBASE II listings. Creates dBASE II directory on each disk.
IBM PC ☐ 64 KB req. ☐ Copies sold: 278 since 1983 ☐ Cost: $49

☐ Memo Searcher
Search utility for dBASE III. Allows end users to search for keyword occurrences in dBASE III memo fields. Reports results of search to screen or data base file where list is created showing record numbers where matches were found.
IBM PC ☐ 256 KB req. ☐ Copies sold: 217 since 1985 ☐ Cost: $15

DATA LANGUAGE CORP.

☐ Progress
Reviewed Mar 1986 p. 142.
Fourth generation language, data dictionary, I/O formatter, full screen syntax checking editor, and automatic recovery and data base restoration after system failures.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $695-$19,500

THE SOURCE FOR ALL IBM PC EXPERTS.

There's one place to find the information about the sophisticated applications and products you need at your work place. PC TECH JOURNAL.

It's the magazine that brings you the in-depth coverage about the products and issues you have to know more about 13 times a year!

Guarantee delivery of the technical information and insights the systems experts of PC TECH JOURNAL deliver issue after issue and *save 50%!*

TECH JOURNAL P.O. Box 2996 Boulder, CO 80322

YES Send me PC TECH JOURNAL for:

☐ One year (13 issues) only $26.70.

☐ Two years for only $53.35.

SAVE 50%!

Savings based on annual single-copy price of $53.35.

Attention **Realia COBOL** Users:

SCREENIO 2.0

Screen Manager for COBOL Professionals.

A strictly COBOL approach to screen management, written by and for COBOL professionals. Screen Design is easy with SCREENIO. You take care of your application. We take care of the screens! Fully compatible with Realia COBOL.

What does it do?

Interactive Screen Design, Full Feature Screen Painter, COBOL Data Field Specifications, Edit Masks, Automatic Error Detection, Data Validation, High Speed Video, Full Compatibility, Window Panels, Hot-Fields, Key Redefinition, Foreign Language Capability, Full Color Support, Cursor Management, PC Speaker Control, Screen Libraries, and Very User Friendly. We've thought of everything!

And Best of all:

No Runtime Facility, No Runtime Fees, Superb Support. Only $400 Plus Shipping. Ask about our FREE demo pack and SCREENIO+Realia Package Deal!

CIRCLE NO. 345 ON READERS SERVICE CARD

DATACOMP SYSTEMS, INC. (PA)

☐ B-Tree Record Management System

C subroutine library. Includes library management tools. Maintains records/keys of varying size. Allows search and retrieval of records. Provides B-Tree indexed access.

IBM PC ☐ 24 KB req. ☐ Introduced: 1985 ☐ Cost: $1,000

DATAMATE CO.

☐ FASTFILE

Allows user to define fields for numbers, dates and alphabetic information. Uses Datamate's English language report writer, EnQuery, to compare, select and retrieve information. Includes interactive screens, value-checking and user-defined defaults. Reads information to or from data base via standard sequential files.

IBM PC ☐ 128 KB req. ☐ Introduced: 1984

DATAMED RESEARCH, INC.

☐ LogiQuest II and III

File management system with relational structure, sorting, searching, rearrangement and selection of data. LogiQuest III adds data independence, allowing each user individual access regardless of how the data is stored.

IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1981 ☐ Cost: $650

DATAMYTE CORP.

☐ Attribute

Stores and analyzes data collected by DataMyte 1000. Transforms data into various charts. Displays graphs on color/graphics system before printing. Allows files to be saved, copied, deleted, reviewed and edited. Prompt loops for data collection. Prints barcode labels.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $995

☐ Fan

SPC data base. Stores and edits SPC data collected by DataMyte data collectors in factory area network. Transforms data analysis into X-bar and R, X-bar and sigma, CuSum, histogram, capability and data reports. Converts data files to Lotus 1-2-3 import file format.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $995

☐ SQC

Quality control data base with review and editing, setup and sending of data collection routes to DataMyte.

IBM PC ☐ 256 KB req. ☐ Cost: $795

DATANETICS

☐ Data-Trac

Supports 26 users and standard or user-defined data bases, menus and reports. Provides create/modify functions, data update/retrieval, search capabilities, file security, message feature and interface to other programs. Tags items that require attention.

IBM PC, XT, AT ☐ Copies sold: 2 since 1986

DAYFLO, INC.

☐ DayFlo

Text data base. Manages structural and text information. Tracks clients and key accounts, manages projects and handles office correspondence.

IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $495

☐ ReportFlo

Creates reports, lists, tables, letters and documents from records stored in DayFlo. Incorporates text and columnar tables in the same document. Includes calculations and formula capabilities as well as totals, counts, and averages. Features document titles, headers, footers, page numbering and mail merge capabilities.

IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $195

D&B COMPUTING SERVICES

(a Dun and Bradstreet Co.)

☐ PC NOMAD

Relational fourth generation language/DBMS. Provides procedural and non-procedural languages, active data dictionary, windowing and communications.

IBM XT, AT, 3270-PC ☐ 640 KB req. ☐ Cost: $795

DBI SOFTWARE PRODUCTS

☐ Kaleidoscope

Integrates data into the word processing programs. Calc merge interfaces data base files with a bi-directional data exchange.

IBM PC ☐ 64 KB req. ☐ Copies sold: 750 since 1983 ☐ Cost: $495

DESKTOP SOFTWARE CORP.

☐ NPL Information Management System

DBMS and application developer. Creates files, performs edit and validation checks, paints data entry screens, selects, sorts and merges data records and prints simple or formatted reports. Uses English-based commands. Applications range from mailing lists and form letters to accounting, payroll, scheduling and IC.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1981 ☐ Cost: $495-$990

☐ NPL/R Database Applications System

Fourth generation language for relational DBMS. Uses English-like sentences for queries and report generation and for business applications. Handles application programming and menu development. Users may open up to ten files at one time. Reads and reports on data in ASCII text format from any source or directly from dBASE II files.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $595

DTRO, INC.

☐ GDBS (General Data Base System)

Interactive file definition and maintenance. User specific field name and length and type (numeric or data). Adds or reviews records, changes contents, lists files and selects and lists records by specific criteria.

IBM PC ☐ 128 KB req. ☐ Copies sold: 2 since 1986 ☐ Cost: $100

EAGLE ENTERPRISES

☐ CITATION Fact Management

Text-oriented data base. Supports access and record selection by keywords and wildcard strings. Uses WordStar-compatible on-screen editing. Produces MailMerge-compatible files for printing.

IBM PC ☐ 128 KB req. ☐ Copies sold: 2,500 since 1982 ☐ Cost: $185

ELLIAM ASSOCIATES

☐ Superfile

Uses free-form data base created by word processor. Searches for key words including and/or/not. Displays, prints or saves on file data retrieved. Handles multiple disks and data bases.

IBM PC ☐ 48 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $175

ENSIGN SOFTWARE

☐ ISAM (Indexed Sequential Access Method)

Provides keyed data storage in random files. Handles record storage, retrieval, sorting, updating, deleting, buffering, searching and disk space management. Supports 32,767 records per file, seven simultaneously accessed files and multiple keys.

IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 800 since 1982 ☐ Cost: $70

EVANS NEWTON, INC. (ENI)

☐ Info-Select

Supports 400 records per disk, each with 15 definable data input fields. Categorizes records by any combination of 10 fields, each with 12 subcategories. Search/report feature generates mail labels, category counts and record listings.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $100

EVOLUTION

☐ Masterfile

DBMS. Customer, marketing and statistical information. Merges with word processing. Predefined list and label printing formats if word processing is not desired. Features 26 search methods. Service, fact finding and marketing information manipulation producing electronic prospect selector or market analyzer.

IBM PC ☐ 128 KB req. ☐ Copies sold: 93 since 1982

EWDP SOFTWARE, INC.

☐ Filebase

Variable length fields DBMS. Comma delimited format for such letter-merge programs as MailMerge, MultiMate, WordPerfect, Freestyle and Displaywrites. Creates subset files. Built-in computation and report generation. Sorts on embedded last names and zips. Functions as file processor.

IBM PC ☐ 64 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $125

EXECUWARE, INC.

☐ NEXT STEP

Provides for creation of data base records containing 16 to 510 characters and inclusion of up to 99 data fields per record. User may specify edit criteria. Two levels of password protection are available. Compiles generated programs using Microsoft 1.0 BASIC compiler.

IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 550 since 1983 ☐ Cost: $345

EXIM SERVICES OF N.A., INC.

☐ Formatted File Manager

DBMS. Generates customized screens, data bases and reports. Includes password protection, record selection using relational and Boolean logic operations, sorting, data reformatting, global editing, indexed, direct and/or sequential access, control of display attributes from user-written programs and multi-user support.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $295

EXOFT SOFTWARE SYSTEMS

☐ Squirrel

Information manager. Organizes data on multi-level tree network enabling user to browse network, go directly to data, search by key word or modify network.

IBM PC

EXPRESSWARE CORP.

☐ File Express

Information management program. Allows manipulation of small- and medium-sized data bases. Includes editor, sorting, label printing, report generator, import, export and cloning.

IBM PC ☐ 192 KB req. ☐ Copies sold: 30,000 since 1984 ☐ Cost: $40

FAIRCOM

SEE AD ON PAGE 317

☐ C-tree

File system for the C language. Provides multi-key ISAM routines and B+Tree functions. Works with single-user and network systems.

IBM PC ☐ Cost: $395

FASTWARE, INC.

☐ THOR, The Thought Organizer

Maintains text entries and called thoughts with built-in word processor. Establishes relationships between thoughts by user-defined categories. Retrieves thoughts by category, date of entry or matching text.

IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $295

MERVIN G. FAULKNER ASSOCIATES, LTD.

☐ Flextract Writer

Generates source code for information retrieval programs.

IBM PC ☐ 32 KB req. ☐ Copies sold: 50 since 1976 ☐ Cost: $1,200

FINCH, INC.

☐ File Minder

Window-oriented, file storage management. Tagging functions and mapping capabilities. Reads catalog files into data base systems. Protects files by setting DOS file attributes to make them read-only or hidden. Multiple display environments.

IBM PC, XT, AT ☐ 196 KB req. ☐ Cost: $70

FINDER INFORMATION TOOLS, INC.

☐ FINDERLink

Allows user to move electronic files from commercial mainframes or other microcomputer data base systems, word processor files or optical character scanners into Finder's text management system.

IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $300

☐ Retrieval Software

DBMS. Creates and searches inverted files capable of indexing every word in a data base. Features Boolean logic, truncation, sorting and flexible output. Retrieval speed is independent of data base size.

IBM PC ☐ 256 KB req. ☐ Copies sold: 600 since 1984 ☐ Cost: $1,500

THE FINOT GROUP

☐ KeepTrack

File management via visual picture of disk. User can copy, move, rename, view, and delete files and directories. Includes searching for files, sorting, and printing.

IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $39

☐ KeepTrack Plus

File management via visual picture of disk. User can copy, move, rename, view and delete files and directories. Includes backup and restore, searching for files, sorting and printing.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $79

FOX & GELLER, INC.

☐ Quickindex for dBASE

High-speed indexer for user of dBASE II and III.

IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $149

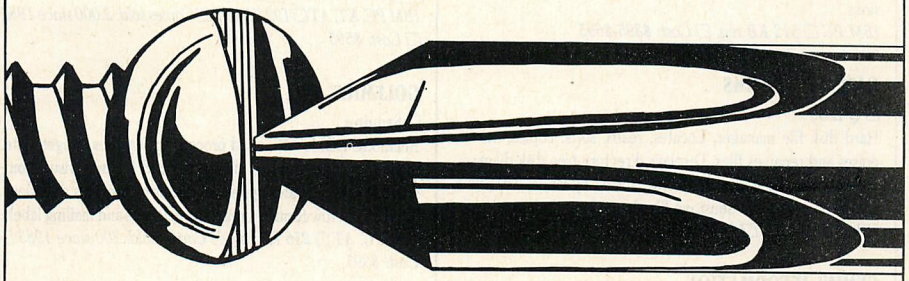
FOX RESEARCH, INC.

(subsidiary of ComGen Technology)

☐ 10-BASE

Fourth generation data base language. Joins up to 16 files with an unlimited number of records per file. Provides a data dictionary, and bridge feature that allows user to interface to application programs such as Lotus 1-2-3 and WordStar. Includes a procedural language processor which allows user to custom design menu-driven applications. Offers batch processing and a basic interface.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost:



FOX SOFTWARE, INC.

☐ FoxBASE

Relational DBMS. Performs computational, file and index operations. Sorts data bases and permits up to 48 fields per record. Supports full type-ahead keyboard operations. Provides 14 digit precision. Uses 8087 math processor. Multi-user versions available. PCDOS network compatible.

IBM PC ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $395-$695

ISN'T IT A PITY...

Everything Isn't As Accommodating As

c-tree™ / **r-tree**™

FILE HANDLER — REPORT GENERATOR

Performance and Portability

For all the time you devote to developing your new programs, doesn't it make sense to insure they perform like lightning and can be ported with ease?

c-tree: Multi-Key ISAM Functions For Single User, Network, & Multi Tasking Systems

Based on the most advanced B+ Tree routines available today, **c-tree** gives you unmatched keyed file accessing performance and complete C Source Code. Thousands of professional C programmers are already enjoying **c-tree**'s royalty-free benefits, outstanding performance, and unparalleled portability.

Only FairCom provides single and multi-user capabilities in one source code package, including locking routines for Unix, Xenix, and DOS 3.1., for one low price! In addition, **c-tree** supports fixed and variable record length data files; fixed and variable length key values with key compression; multiple indices in a single index file; and automatic sharing of file descriptors.

r-tree: Multi-File Report Generator

r-tree builds on the power of **c-tree** to provide sophisticated, multi-line reports. Information spanning multiple files may be used for display purposes or to direct record selection. You can develop new reports or change existing reports without programming or recompiling and can use any text editor to create or modify **r-tree** report scripts including the complete report layout. At your option, end users may even modify the report scripts you provide.

Unlimited Virtual Fields; Automatic File Traversal

r-tree report scripts can define any number of virtual fields based on complex computational expressions involving application defined data objects and other virtual fields. In addition, **r-tree** automatically computes values based on the MAX, MIN, SUM, FRQ, or AVG of values spread over multiple records. **r-tree** even lets you nest these computational functions, causing files from different logical levels to be automatically traversed.

Unlike other report generators, **r-tree** allows you to distribute executable code capable of producing new reports or changing existing reports without royalty payments, provided the code is tied to an application. Your complete source code also includes the report script interpreter and compiler.

How To Order

Put FairCom leadership in programmers utilities to work for you. Order **c-tree** today for $395 or **r-tree** for $295. (When ordered together, **r-tree** is only $255). For VISA, MasterCard and C.O.D. orders, call 314/445-6833. For **c-tree** benchmark comparisons, write FairCom, 2606 Johnson Drive, Columbia, MO 65203.

Complete C Source Code & No Royalties!

Xenix is a registered trademark of Microsoft Corp. Unix is a registered trademark of AT&T.

CIRCLE NO. 310 ON READERS SERVICE CARD

☐ FoxBASE Plus
Compiler/interpreter relational DBMS. dBASE III Plus and PCDOS network compatible. Performs computational, file and index operations. Sorts data bases and permits 128 field per record. Supports full type-ahead keyboard operations. Provides 14 digit precision. Uses 8087 math processor. Multi-user versions.
IBM PC ☐ 512 KB req. ☐ Cost: $395-$695

GAZELLE SYSTEMS

☐ Q-DOS
Hard disk file manager. Locates, reads, sorts, copies, moves, erases and renames files. Displays directory tree disk diagram. Provides list of files in subdirectory sorted by name, extension, size or date. Protects sensitive files by making them read-only.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $70

GEMINI INFORMATION SYSTEMS, INC.

☐ DDQuery
DBMS including query subsystem for accessing data, report writer and transaction processor. High-level language included for design of CRT screens.
IBM PC ☐ 384 KB req. ☐ Copies sold: 300 since 1977 ☐ Cost: $3,750 and up

GENASYS CORP.

☐ TITLE III (Arranger)
Provides full screen definition for data collection. Data collection includes browse and search with update, search, sort, multi-key Boolean search through files and multi-key sort. Report format allows user definition of multiple reports per file.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $650

GENERAL DATA SYSTEMS, LTD.

☐ Dx Data Dictionary
On-line and batch facilities define data, with optional input edits, storage formats and output edits. Supports multiple relations, screens, reports, tables or transactions. Handles descriptive reports, cross-reference and program-structured reference reports. Allows for portable applications and distribution control.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

☐ Dx Host Language Interface
Allows Dx to interface with any language callable on mainframe or PC.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

☐ Dx Relational Data Base
Run-time DBMS. Set of integrated tools for data base monitoring, data security, memory and performance control, audit, logging/reset, backup/recovery and maintenance of data base. Utilities available for restructuring, consistency audits and testing/debugging.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

☐ Dx Transaction Generator
Non-procedural input/edit, update and reporting. User defines which data items belong to file or relations and chooses on-line or batch system or both. Non-procedural input edits include data base lookups. Subsystems run on micro, mini or mainframe. Security checking provided.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

GENERAL PHYSICS CORP.

☐ J/T Pak
Job and task analysis system. Includes Task Editor, Name Editor, Job Survey Sheet Editor, Data Editor, Task Prioritizer, Element Editor, Skill and Knowledge Statement Editor/Printer/Cross-Referencer, Terminal Objectives Editor, Enabling Objectives Editor, and Terminal/Enabling Objectives Cross-Referencer.
IBM PC, AT ☐ 192 KB req.

GOLDATA COMPUTER SERVICES, INC.

☐ Goldatabase
DBMS. Features multiple keys per data base, multiple values per key, on-line updating of keys, multi-screens per data base. Single user and LAN environment.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $595

GOLEMICS, INC.

☐ Sequitur
Relational DBMS with word processing. Handles integer, date, money, decimal and text data types and features visual command syntax. Updates appear in results of previous selections. Tabular and row format. Creates form letters and mailing labels.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $395

GRID SYSTEM CORP.

☐ File
Provides horizontal and vertical scrolling. Allows sorting and nested sorting on up to six columns. Records and data items can be added or deleted at any time. Size of data base limited by amount of storage. Provides calculated data items such as totals, averages and variances.
IBM PC

GROUP L CORP.

☐ Textbank
Searches and manages structured/unstructured information. Handles text from ASCII and word processing files or communications link to another computer. Supports text from documents that have been sent out to service bureau for optical scanning. Search-only and LAN versions available.
IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1985 ☐ Cost: $995

GRYPHON SYSTEMS

☐ FAS-FILE
Index-card style data base. Organizes, stores and retrieves information by subject. Defines records containing up to 36 fields and 100 keywords for cross-referencing. Information is entered into data base using fill-in-the-form input.
IBM PC ☐ 256 KB req. ☐ Copies sold: 180 since 1983 ☐ Cost: $195

☐ PFAS (Pascal File Access Systems)
Initializes an index. Reads records randomly, sequentially or reverse sequentially by key and updates records by key. Supports variable length records by partial key; recovery of space when records are deleted; unlimited file size, record length and number of secondary indexes. Indexed file is a B+Tree.
IBM PC ☐ 7 KB req. ☐ Copies sold: 600 since 1981 ☐ Cost: $200-$245

GUARDIAN AUTOMATED SYSTEMS, INC.

☐ Unicorn/DB Database Management
DBMS. Permits up to 32,000 records per file and records with up to 512 bytes and 36 fields. Report Generator totals and subtotals numeric fields and sorts. Can be used for mailing lists, customer lists, inventories, directories and appointments.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 200 since 1980 ☐ Cost: $295

G & Z SYSTEMS, INC.

☐ Dataquick RDBMS
DBMS. Creates data entry screens and files and prints reports with multiple lookup, formatting and subtotals. Generates mailing labels and merges with word processors.
IBM AT ☐ 64 KB req. ☐ Copies sold: 150 since 1982 ☐ Cost: $495

HABA/ARRAYS

☐ UltraFile
DBMS with integrated file manager that can accommodate up to 32,000 records, 50 data items per record and 100 characters per data item. Performs calculations such as integer, square root, and logarithm on screen. Produces various graphs with up to five data items in various color combinations.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $195

HAI SOFTWARE, INC.

☐ HAI*LINE FILEKEEPER
Defines HAI*LINE file and record structures, including index files. Maintains files including create, amend, delete, display, print and load constants. Generates reports in dialogue mode. Available in foreign languages.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1976 ☐ Cost: $195

HARRIS/LANIER

(formerly Lanier Business Products, Inc.)

☐ DataManager II
DBMS for accounting, legal and insurance professions. Performs information retrieval and reporting.
IBM PC ☐ 256 KB req. ☐ Copies sold: 15,000 since 1982 ☐ Cost: $1,200

HARRIS/3M DOCUMENT PRODUCTS, INC.

Facsimile Products Division

☐ File Saver
IBM PC, XT, AT ☐ Introduced: 1985 ☐ Cost: $3,000-$4,000

HAYES MICROCOMPUTER PRODUCTS, INC.

SEE AD ON PAGE 143

☐ Please
Sets screen and field characteristics. Data integrity insured by optional high/low values, skip fields and 3-level password protection. Manipulates up to 999 characters per field, 99 fields per record, 2,000 characters per record and several million records per data base.
IBM PC, AT, XT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $199

HENCO SOFTWARE, INC.

☐ INFO
Relational file management and fourth generation application development language. Dictionary, data entry/update with screen generator, data manipulation, interactive editing, ability to join ten files, programming, debugging and security.
IBM PC, XT, AT ☐ 160-750 KB req. ☐ Copies sold: 3,500 since 1975 ☐ Cost: $1,200

☐ PC INFO
Relational data base. Offers upload/download capability which accesses existing INFO applications, reports and files. Associates meaningful names with data files and their content.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $1,200

HIPPOPOTAMUS SOFTWARE, INC.

☐ 1985 Hippo Computer Almanac
Allows user to retrieve almanac-type data in English. Data base includes interest calculations, U.S. and international area codes and currency exchanges, time zone differences, metric conversions, capitol cities, populations, latitude and longitude, foreign word translations, calorie counts, toll-free 800 numbers, and astronomical information.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $35

Clipper is the fastest dBase III and dBase III Plus™ compiler available. Nothing else comes close. When performance counts, experts rely on Clipper for more speed, more power, and more creative freedom. You can, too. Call for details.

- *Clipper compiled programs run 2 to 20 times faster.*
- *No royalties...no runtime fees.*
- *Source code security.*
- *User defined functions.*
- *Arrays.*
- *Simple menu commands.*
- *Context sensitive help can be included with programs.*
- *More fields; more memory variables.*
- *Call C and Assembly programs.*
- *Complete debugging facilities.*
- *Multiple file relationships.*
- *IBM PC, XT, AT, 3270 compatible™.*
- *Multi-user capability.*

Clipper™

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **Business Adviser - Information Management Edition**
Creates data files to send and receive program information using DIF and ASCII files. Assembles custom reports from other Business Adviser modules. Supports data file design by field type or length or decimal point. Allows multi-factor data searches.
IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $525

☐ **Business Library Series-Information Retrieval**
IBM no. 6871-455.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $395

☐ **File Command**
Reviewed Nov/Dec 1983 p. 30.
IBM no. 6024-062.
IBM PC ☐ Cost: $35

☐ **Filing Assistant**
IBM no. 6024-145. DBMS. Handles information storage, organization and recall. Can be used to provide data to IBM Writing, Reporting, Graphing and Planning Assistant programs.
IBM PC, XT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $165

☐ **Personal Decision Series - Data Edition**
IBM no. 6410-936; 6466-983. Provides integrated data management for Personal Decision Series. Utilizes data from other IBM PC computer programs, public data base services or IBM Business Management Series. Performs arithmetic calculations on file data and allows for five levels of subtotals on sorted data.
IBM PC, XT, 3270-PC, Portable PC, XT/370, AT, AT/370, PC Convertible ☐ 256-320 KB req. ☐ Cost: $275

☐ **RT PC SQL/RT (Structured Query Language/RT)**
IBM no. 5669-058. Relational DBMS. Tables for data manipulation. Query support for selection criteria, arithmetic expressions, nested queries and combining data from different tables. Report generation including sorting, calculations, subtotals, formatting and titles. Pop-down windows. SQL tables and views.
IBM RT PC ☐ Cost: $1,000

IBM PERSONALLY DEVELOPED SOFTWARE

☐ **DB/Editor/Writer**
IBM PDS no. 6276-554. Data entry, record maintenance, utility and report writing. Full-screen editor edits data and provides data entry. Selection function defines and locates data subsets. Output Writer formats reports. Designates up to 32 fields, sorts up to 16. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $50

☐ **INFOPC**
IBM PDS no. 6276-556. Stores and maintains multiple data bases in single file or separate files. Entries consist of title, index terms or keywords and text. Matches keywords on 100 entries using search function. Writes data base entries to DOS file. Includes record compression. Color EGA support.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Cost: $40

☐ **Personal Productivity Package**
IBM PDS no. 6276-581. Consists of DB/Editor Writer, INFOPC and Member Services.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ 192 KB req. ☐ Cost: $75

IMSI

☐ **Bisybase**
Schedules time and organizes financial, background and communications data for business and personal contacts. Provides reports of financial position with United States and foreign accounts. Generates mailing lists.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $95

INCO, INC.

(subsidary of McDonnell Douglas Corp.)

☐ **SQL/UNIVERSE**
Relational DBMS which uses back-end processor. Interactive package for using SQL from on-line terminals, high-level language interface to allow custom application programs to access IDM-500 data base, report generator and facility for developing screen-formatted applications.
IBM PC ☐ 200 KB req. ☐ Copies sold: 8 since 1982

INFO-PROS, INC.

☐ **Info-Gen**
Multi-key record management system which generates menu-driven applications. Aids in defining application including data files, screens and reports. Provides descriptive prompts, help messages. Allows definition of up to 50 data fields per record including ten primary keys.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $245

INFOCOM, INC.

☐ **Cornerstone**
Relational DBMS with a built-in report writer. Can be used in conjunction with Lotus 1-2-3, WordStar and MailMerge. Runs under IBM's TopView, multi-tasking windowing software. Accepts input from dBase II and PFS systems.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $100

INFORMATION BUILDERS, INC.

☐ **PC/Focus**
Reviewed Nov 1985 p. 124.
Fourth-generation, nonprocedural DBMS. Includes report writer, window manager, graphics, financial modeling, statistical analysis, dialogue manager, screen manager, full-screen editor and host language interface. Supports transaction processing, forms design and micro-to-mainframe communications. Multi-user version available for LANs.
IBM PC, AT, XT, 3270-PC ☐ 512 KB req. ☐ Copies sold: 35,-000 since 1983 ☐ Cost: $798-$1,295 (single user); $4,000-$6,-000 (multi-user)

☐ **PC/HLI**
Host language interface. Supports creation and maintenance of PC/Focus data bases from programs coded in Assembly, C, FORTRAN and Pascal third-generation languages. Accesses PC/Focus data bases through calls from application programs. Includes retrieve, input, change and delete data calls.
IBM PC, XT, AT, 3270-PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $2,500

INFORMATION CONCEPTS, INC. (DC)

☐ **ULTIMATE**
File management. Includes screen-driven, system-generated prompts, user-designed screens, sort capability and mail merge option.
IBM PC ☐ 128 KB req. ☐ Copies sold: 12 since 1985 ☐ Cost: $70

INFORMATION DIMENSIONS, INC.

(a subsidiary of Battelle)

☐ **MicroBASIS**
PC version of Information Dimensions' BASIS data management system.
IBM PC, XT, AT

INFOSYSTEMS TECHNOLOGY, INC. (ITI)

☐ **Rubix**
DBMS. Features relational views, dated relations, relational editors, superior data types, compilable query language, multiple data base support and data base dictionary. Provides extensions to the relational model.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $975-$5,995

☐ **Rubix Master**
Integrates Rubix with visually-oriented user. Allows user access to all Rubix capabilities. Includes custom data entry format, logical record level concurrency, transaction logging, menu manager and report writer.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $595 and up

INMAGIC, INC.

☐ **INMAGIC**
On-line information management and indexing with report generator for single- or multi-users. Features built-in Boolean query language and password security. Manages text and bibliographic records of variable length. Includes text editor and mathematical capabilities in report designer.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1980 ☐ Cost: $975

INNOVATIVE SOFTWARE, INC.

☐ **Smart Data Base Manager**
Relational DBMS. Allows 1,000,000 records per file and 255 fields per record, and 4,096 characters per record. Performs calculations and multiple file interactions within a file, between files and in report, and form generation. Includes communications and programming language.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 50,-000 since 1984 ☐ Cost: $495

☐ **Smart Data Base Manager LAN Multi-user Version**
DMBS for LANs. Includes communications, programming language, project processing, access to DOS without quitting, extended memory support. File and record locking. Reads and writes ASCII, DCA, Lotus and DIF files.
IBM PC, XT, AT, 3270-PC ☐ 320 KB req. ☐ Introduced: 1986 ☐ Cost: $995

☐ **T.I.M. IV**
DBMS. Organizes, files, retrieves, sorts, displays and prints information. Separate files can be viewed through multiple windows for data queries and updates. Includes B+tree organization, character and numerical range verification, projection processing through command files and security password entry at both screen and file levels.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 100,000 since 1979 ☐ Cost: $245

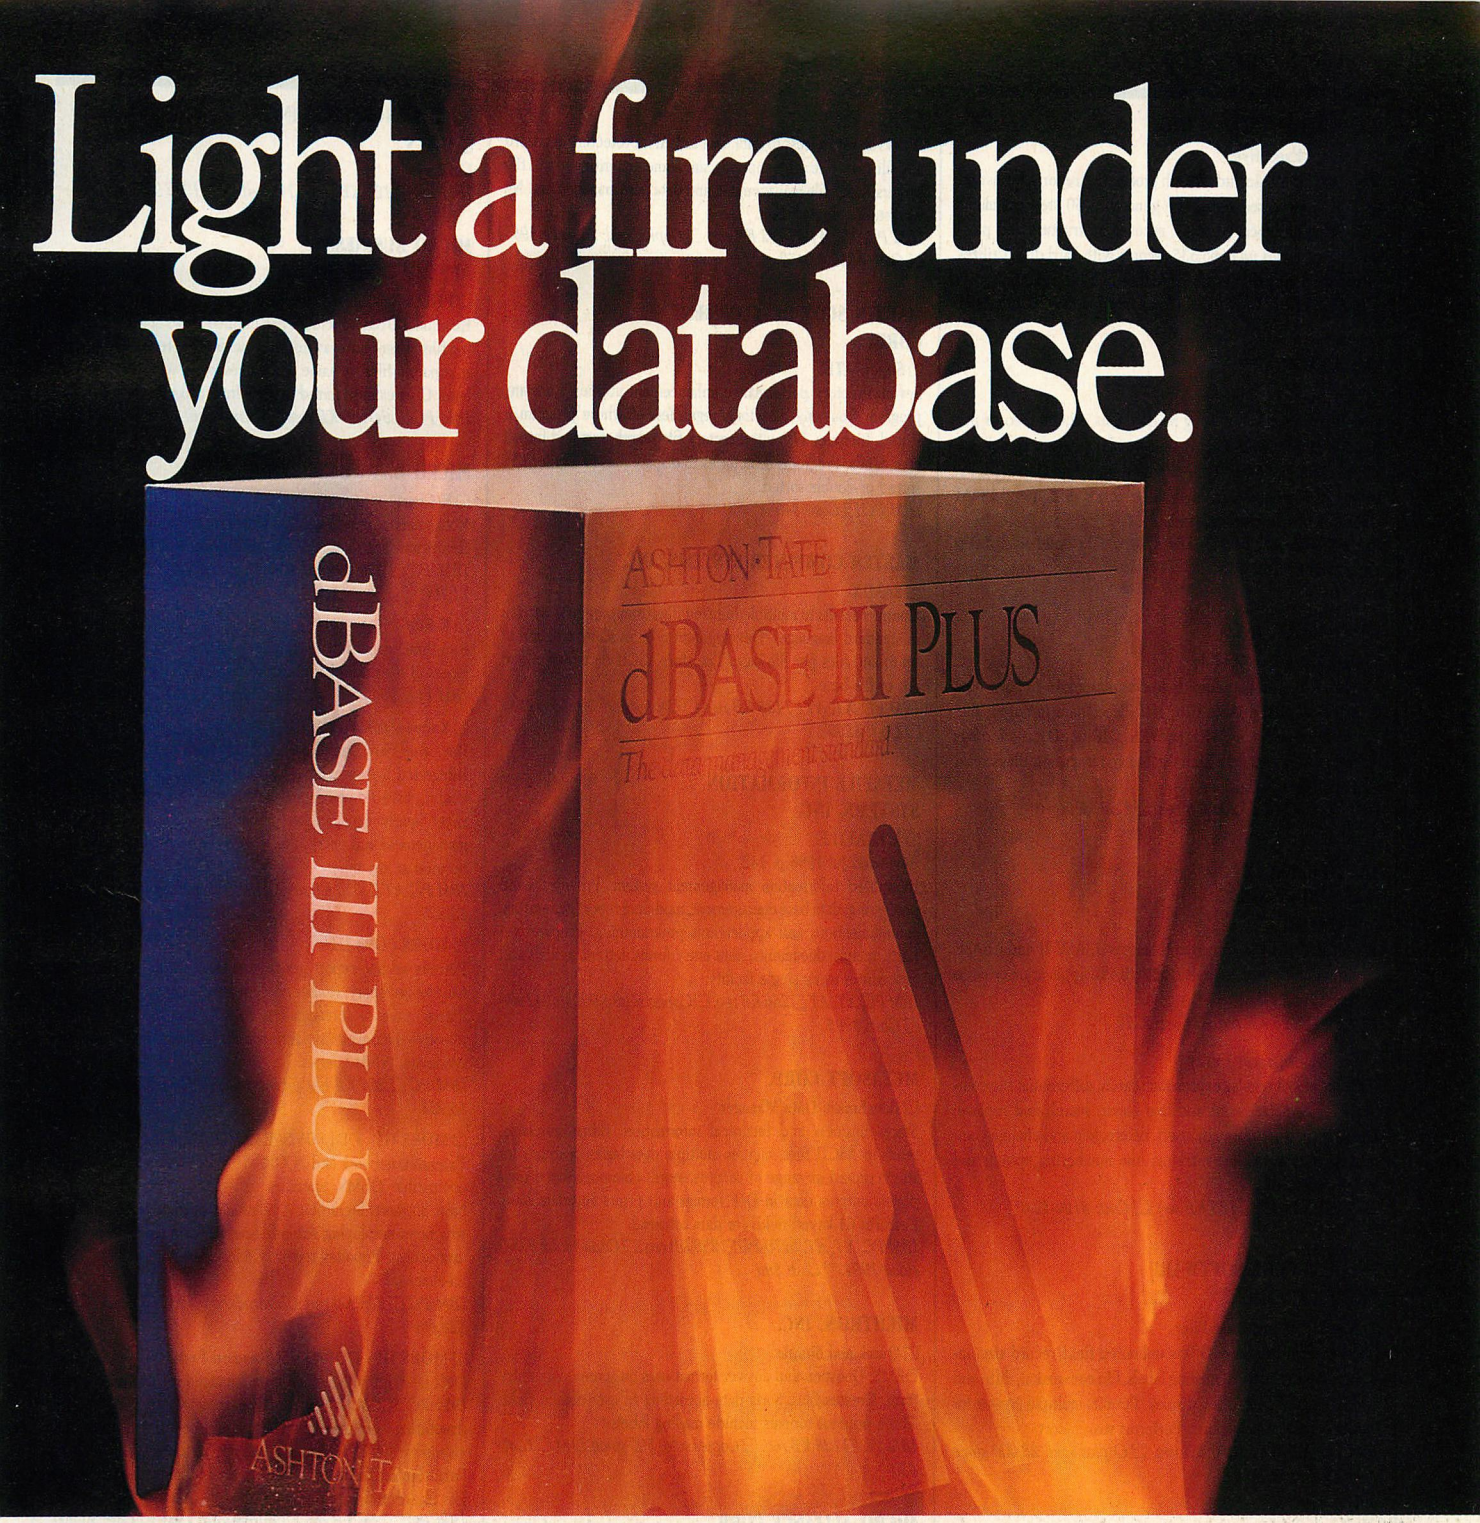
INSPIRATION SYSTEMS, INC.

☐ **Prevail - Data Base Management System**
Integrated forms-oriented data base definition facility, DBMS command language with query, and updating and reporting features. Supports relational and hierarchical data structures. Allows custom query-by-forms, update-by-forms and create-by-forms.
IBM PC, AT

INSTITUTE FOR SCIENTIFIC INFORMATION (ISI)

☐ **Sci-Mate Manager**
Information storage and retrieval. Maintains reprint file. Organizes research results. Tracks activities and projects. Generates reports and mailing labels. Integrates with ISI's Sci-Mate Searcher and Sci-Mate Editor.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $399

☐ **Sci-Mate Searcher**
On-line data base searching. Accesses BRS, Dialog, NLM, SDC, Orbit and Questel. Translates search terms and menu choices into specialized language of each host. Downloads data base records. Integrates with ISI's Sci-Mate Manager and Sci-Mate Editor.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $399



INTERNATIONAL TECHNOLOGY GROUP, INC.

☐ **FACTMATCHER**
Inverted file information retrieval system. Interfaces with IBM PCs and compatibles and with PC word processors. Synonym dictionaries, proximity searches, security.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 12 since 1978 ☐ Cost: $2,250

JASPIR INTERNATIONAL, INC.

☐ **PC-File 'N Report**
DBMS. Creates custom design screens for IC, payroll, mailing lists, AR, AP, invoicing, medical records, check book, memoirs, and archival information. Prints reports, labels, invoices and special forms. Handles up to 99,999 records.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $99

Light a fire under your database.

We've been carrying a torch for dBASE for years.

So we're pleased to announce Quicksilver,™ our totally new dBASE III Plus compiler.

Quicksilver produces native assembly code which runs dBASE applications like wildfire, faster than anything else on the market.

It also supports all the programming commands of dBASE III Plus, including multi-user syntax and memo fields. It includes a faster SORT and INDEX. And it uses the same data, index and other files as dBASE.

For greater flexibility, Quicksilver lets you create your own User-Defined Functions. It also supports "dBASE Tools For C," and lets you link in your own C code for complete control of your database applications. (Our own powerful HOT C™ compiler is available for just $99.)

With Quicksilver you can even create your own windowing environment, because we've added a full set of dBASE-like commands that give you up to 99 crisp, quick windows without any other software.

And Quicksilver speed, power and compatibility are all yours for just $599.

To order, call the WordTech Systems, Inc. HOTline at (415) 254-0900. But do it today. Because we all know that the race goes to the quick.

QUICKSILVER™
by WORDTECH

QUICKSILVER™ and HOT C™ WordTech Systems, Inc. Other products trademarked by others.

CIRCLE NO. 343 ON READERS SERVICE CARD

JINI MICRO-SYSTEMS, INC.

☐ JINSAM Executive

Multi-user DBMS. Includes batch processing, reports, forms and label generators, sequential file generator, 50 step calculator with global and local registers, recover, restructure and password entry. Holds up to 65,535 records with hard disk. Utilizes hard disk, floppy disk or multiple disk units at same time.

IBM PC ☐ 32-128 KB req. ☐ Introduced: 1982 ☐ Cost: $495

THE KEY BOARD

☐ Data Base

Data base management using relative files, 32,000 records per file, 4K record size, 100 fields, sequential file interface, multiple logical field queries, screen editor and indexing. Generates reports and mailing labels. Mailmerge, forms design and ISAM record retrieval programs available.

IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $50

LANG-ALLAN, INC.

☐ Data Extraction Module

Extracts captured data files on line-by-line basis. Imports data into Lotus 1-2-3, dBASE II or III. Places data in output file. Formats output file as WRK or WKS. DIF or SDF file formats available. Captures data from remote systems using Bluestreak. Can operate as standalone.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $150

LATTICE, INC.

SEE AD ON PAGE 279

☐ dBC II, III

Toolkit that allows C program to access dBASE II and dBASE III files. Can be used to extend any dBASE application or write an application.

IBM PC ☐ 128 KB req. ☐ Cost: $250

☐ Text Management Utility

Includes global regular expression search; differential file comparator; character, word and line count; search and replace; block move/copy; append, insert, delete, join and change commands; read/write; line marking; line numbering option; and global command.

IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $120-$240

LEADING EDGE SOFTWARE PRODUCTS, INC.

☐ Nutshell Information Filer

Menu-driven data base. Offers unlimited field/record size, indexing, data validation, mailing labels, file conversion, ditto and undo. User-defined screen display. Permits multiple layouts for viewing/generating reports. Performs search/sort.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 28,000 since 1984 ☐ Cost: $150

MARTIN MARIETTA DATA SYSTEMS

(operating company of Martin Marietta Corp.)

☐ AskIT

Data base manager front end. Interfaces to KeepIT. Allows user to request reports, perform calculations, run cataloged procedures, display records and query data base. Retrieves information from data base by selecting options from pop-up menus.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $100

☐ KeepIT

Relational data base management program. Functions as central core of the ITSeries. Integrates with other PC software. Command files, indexing, interface to mainframe files, sorting, and customized data entry screen.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 8,250 since 1983 ☐ Cost: $450

☐ ShareIT

Allows shared access to data base in LAN. Protection of record and file lock. File server options, simultaneous writing to two file servers, index file management, and data base management. No workstation degradation.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $850-$1,450

MARTIN SCOT DEVELOPMENT CORP.

☐ SuperPATH

Seven directory performance enhancement utilities. Runs any program from any directory, regardless of where program is stored. Includes 17 multi-directory file search, sort and format commands. Programs directories to display files in any format, sorted or double sorted.

IBM PC ☐ Cost: $40

MASTER COMPUTER SYSTEMS, INC.

☐ SAMIX

Controls access to multiple indexed files from programs written in standard languages. Development utilities allow creation of up to 240 files per file base. Transfers ASCII data files in and out of file base.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $295

METAFILE INFORMATION SYSTEMS, INC.

☐ METAFILE

Reviewed Jul 1986 p. 142.

Integrated information management system. Provides word processing, data base management, modeling report generation, communications and applications programming. Prepares reports, menus, documents, data entry forms, letters, models and procedures using single facility.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 5,000 since 1980 ☐ Cost: $995

METASOFT CORP.

☐ Benchmark Data Manager

Stores business and technical information. Edits templates, reads in ASCII files, merges multiple data bases, searches for single record or range of records, stores commonly used templates, outputs data in DIF format and prints any data base. Features 64 keyed fields for data retrieval.

IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 9,000 since 1984 ☐ Cost: $99

MICHTRON, INC.

☐ Quick and Simple

DBMS. Question and answer format uses on-screen data entry form. Creates files. Sorts data according to user-chosen field. Three printout formats include mailing labels.

IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $50

MICRO ALLIANCE CORP.

☐ Search

Locates any or all files in every drive and subdirectory that pertain to a certain subject or person. Allows 16 selected criteria words at a time. Counts number of occurrences of selected word in file and can ignore lower and upper case.

IBM PC ☐ 48 KB req. ☐ Introduced: 1983 ☐ Cost: $49

MICRO-AP

☐ Selector V

Relational hierarchical/applications management system. Utilizes two report generators and creates columnized and formatted reports, single and multi-paged invoices and labels from up to six data files. User-designed screens handle data entry, range testing, multi-file verification and on-line query.

IBM PC ☐ 52 KB req. ☐ Copies sold: 16,000 since 1981 ☐ Cost: $450

MICRO ARCHITECT, INC.

☐ IDM-X

DBMS.

IBM PC ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $49

MICRO BUSINESS APPLICATIONS, INC.

☐ PHD - Relational Data Base

Relational DBMS. Includes pre-defined views of MBA accounting files. User may draw forms on screen and relate information in separate files by name. Calculates totals, subtotals and averages. Creates customized reports from MBA Accounting files.

IBM PC ☐ 64-128 KB req. ☐ Introduced: 1984 ☐ Cost: $495

MICRO DATA BASE SYSTEMS, INC.

☐ K-Chart

Vocabulary of more than 500 words for requesting information from KnowledgeMan/2. User can supplement word list.

IBM PC ☐ 320 KB req. ☐ Introduced: 1986 ☐ Cost: $295-$1,100

☐ K-Run

Run-time versions of KnowledgeMan/2 and options for developers of distributed application systems.

IBM PC ☐ 320 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ KnowledgeMan/2

Reviewed Nov/Dec 1983 p. 72; Jun 1986 p. 156.

Integrated system with menus and on-line help. Security includes password checking, read/write access controls, spreadsheet, query language, programming, math, statistics, forms management and encryption. Unlimited number of tables may be used at any time.

IBM PC, AT ☐ 320 KB req. ☐ Introduced: 1983 ☐ Cost: $595-$3,325

☐ MDBS - QRS III

Permits ad hoc report generation from MDBS III data base. Customizes query. Routes query report to console, printer, disk file or inputs to spreadsheets. Permits conditional clauses for selective data retrieval. Defines data base entities by titles and synonyms. Nests queries.

IBM PC ☐ 256 KB req. ☐ Introduced: 1981 ☐ Cost: $1,575-$5,955

☐ MDBS III - DDL/DMS: Full RTL Form

Extended network and 3COM-, IBM PC-, Nestar- and Novell-compatible DBMS. Specifies structure and contents of data base. Supports hierarchical, relational and CODASYL network structures employing extended-network design with multiple user access. Provides recovery and transaction logging (RTL) mechanisms.

IBM PC ☐ 256 KB req. ☐ Introduced: 1981 ☐ Cost: $7,025-$28,600

☐ MDBS III - DDL/DMS: Standard Form

Data description language/data management compatible with IBM PC 3COM, Novell and Nestar networks. Supports data structuring, performance control and security features furnished by Full RTL form but does not perform RTL processing. Furnishes buffer flushing facility for reducing chance of data loss in event of interruption.

IBM PC ☐ 256 KB req. ☐ Introduced: 1981 ☐ Cost: $3,900-$15,900

☐ MDBS III - IDML (Interactive Data Manipulation Language)

Creates and accesses MDBS III data bases. Supports all statements of DML allowing each to be interactively executed one at a time. Defines macro commands. Supports learning and testing of DML logic.

IBM PC ☐ 256 KB req. ☐ Introduced: 1982 ☐ Cost: $1,550-$4,760

☐ MDBS III-RDL

Report definition language. Specifies characteristics of a report and the prompting behavior of a program. Handles sorting, control breaks, formatting and computation.

IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $1,950-$3,970

Why this publication and more than 1,200 others let us go over their books

once a year.

Some publications, we're sorry to say, keep their readers undercover. They steadfastly refuse to let BPA (Business Publications Audit of Circulation, Inc.) or any other independent, not-for-profit organization audit their circulation records.

On the other hand, over 1,200 publications (like this one) belong to BPA. Once a year, BPA auditors examine and verify the accuracy of our circulation records.

The audit makes sure you are who we say you are. The information helps advertisers to determine if they are saying the right thing to the right people in the right place.

It also helps somebody else important: you. Because the more a publication and its advertisers know about you, the better they can provide you with articles and advertisements that meet your information needs.

BPA. For readers it stands for meaningful information. For advertisers it stands for meaningful readers. Business Publications Audit of Circulation, Inc. 360 Park Ave. So., New York, NY 10010.

MEDIA INTELLIGENCE

MICROFORMS TRANS-LINGUAL

☐ D*CAR*E (Documents Captured and Retrieved Easily)
Provides retrieval for use with paper files, microforms, floppy disks and optical disks. Can be installed on mainframes, micros or minis computers that use a hard disk.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 10 since 1984

MICRORIM

☐ MicroRIM
Relational DBMS with commands for file manipulation and comparison, full screen entry/edit module, query capability and report writer. Host language interface accesses a data base using a high level language, and reduces system development time.
IBM PC ☐ 52 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $595

☐ R:base CLOUT
Natural language inquiry option for R:base Series of relational DBMS. Permits data base to be questioned in free-form English words and phrases without concern for syntax or data base structure. Retrieves information from up to five files in data base in single request.
IBM PC ☐ 256 KB req. ☐ Cost: $249

☐ R:base Series 2000
Relational DBMS. Includes prompted commands, tutorial instruction, and help commands. Retrieves rows of data, sorts and displays desired attributes from these rows with column headings. Calculates column totals. Specifies display column widths for word wrap on text fields.
IBM PC ☐ 128 KB req.

☐ R:base Series 4000
Relational DBMS. Updates multiple files concurrently, accessing up to 40 files at same time and sorting and qualifying data by ten attributes or criteria concurrently. Selectively retrieves certain rows of data, calculates column totals and specifies display column widths for word wrap on text fields.
IBM PC, XT ☐ 64-256 KB req. ☐ Cost: $495

☐ R:base Series 5000
Reviewed Sep 1985 p. 82.
DBMS allowing application development using automated screen, menu builders, date entry forms and reports, and prewritten commands. Programming tools include procedural language, custom macros, report writer and compiler. Transfers data from Lotus 1-2-3, PFS:File, dBASE II and DIF, SYLK and ASCII files.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $700

☐ R:base Series 6000
Multi-user capabilities. Password security restricts ability to read and/or modify data at relation level or for entire data base. Operations restricted on basis of shared vs. exclusive access to assure data base integrity. Automatic relation level locking and queuing occur during sorting or modification functions.
IBM PC ☐ 256 KB req.

☐ R:base System V
Relational DBMS with networking capabilities and application generator. Allows unlimited workstations. Includes Definition Express for data base structures creation, Forms Express and Reports Express. Compatible with IBM's PC, 3Com's 3+, Novell's Advanced Netware 86/E and 86/PCN and Microsoft's networks and Ungermann-Bass Personal Connection.
IBM PC ☐ Cost: $700

MICROSOFTWARE INTERNATIONAL, INC.

☐ CBS Easy Base II
Consists of Data Base Builder/Manager and Report Generator. Report generator lets user print or display data in tabulated formats with column headings, subtotals and totals. Data Base Builder/Manager allows up to 108 fields per record. Mini-calculator displayed on screen during input.
IBM PC, AT, XT ☐ 128 KB req. ☐ Copies sold: 2,200 since 1984 ☐ Cost: $695

MICROSTUF, INC.

☐ Infoscope
Accesses up to 8 files simultaneously. Sorts information, re-arranges it into any category, focuses on specific sub-categories and compares segments of information side by side. Creates 12 scopes or windows on one screen, each containing different grouping of information that can be scrolled within scope.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $79

MINOLTA CORP.

☐ MinCAR
Computer-assisted micro image retrieval system. Provides document tracking, ad hoc reporting, multi-level search capability, Boolean logic and multi-level security access to files and functions. Uses data in existing files to create index.
IBM XT, AT

MIRACLE COMPUTING

☐ Eazyfile
Sets up categories for data and stored text. Searches for any word/phrase combination across all categories and display/print results.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 55 since 1982 ☐ Cost: $35

MONROE SYSTEMS FOR BUSINESS

☐ Condor
Relational DBMS with customizable report writing. Includes English-like commands. Features computations using basic arithmetic operators, decisions using relational operators and data computations. Sorts data using a maximum of 32 data item keys.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $295-$650

MONTEREY COMPUTER CONSULTING

☐ DBRescue
Recovers a compromised dBASE II data base file. Dumps to ASCII file, regardless of number of records in file.
IBM PC ☐ 64 KB req. ☐ Copies sold: 250 since 1982 ☐ Cost: $100

☐ Scrunch
Condenses dBASE code into its briefest form. Allows dBASE II programs to be written with comments, documentation of revisions, spacing and indentation. Detects syntax errors before a program is run. Programs are written with the file extension SRC changed into CMD files. Checks for misspelled commands, unmatched quotes and unbalanced parenthesis.
IBM PC ☐ 64 KB req. ☐ Copies sold: 245 since 1982 ☐ Cost: $100

MORGAN COMPUTING CO., INC.

☐ Formula IV
Relational data base applications generator. Multi-user. Provides 150 help screens and query language. Accesses up to 99 million records with up to 200 fields per record. Built-in dual-window text editor can relationally access up to 12 files.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $695

MOSAIC SOFTWARE, INC.

☐ Twin
Spreadsheets in 15 types of business presentations. Sparse matrix management.
IBM PC, XT, AT, 3270-PC ☐ Cost: $99

NEW HAMPSHIRE SOFTWARE, INC.

☐ Curator
Creates, maintains and displays any collection of data consisting of uniform fixed-length items. Includes stamp collections, membership lists, recording collections and parts lists. Features up to 80 characters/field, 128 fields/collection and reference keying on any field.
IBM PC ☐ Cost: $85

OCELOT COMPUTER SERVICES, INC.

☐ Database Management System
Accesses up to 25 files and up to 16 million records, each up to 2,048 characters long. Provides variable field/record storage, multi-key indexing, retrieval with and/or/and not/parentheses, relational-style joins and projects or network-style set navigation.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1981 ☐ Cost: $300

☐ Relational Database Program
24 commands are available for defining new data bases, retrieving, sorting, reporting, single- or multiple-record updating, joining and projecting. Compatible with Ocelot's DBMS.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $150

O'HANLON COMPUTER SYSTEMS

☐ Database Solution
Fourth generation procedural programming language with data base management facilities. Features multi-level file structure, soft file relationships, arithmetical operations, conditional logic, help and error messages and record-locking for multi-user systems. Includes data dictionary, screen painter and report generator.
IBM PC ☐ 64 KB req. ☐ Copies sold: 10,000 since 1982 ☐ Cost: $695-$995

O'NEILL SOFTWARE

☐ Electra-Find
Finds and collects information from multiple text files. Allows Boolean, wildcard, phonetic, and standard searches. Retrieves sentences, paragraphs, fixed-length records or any size blocks of text. Saves retrieved material including each item's file name and location.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $65

OPEN SYSTEMS, INC.

(subsidiary of Uccel Corp.)

☐ Harmony Information Manager
Available as standalone DBMS or as part of Harmony Integrated Business Software Series. File lookup and verification. User-created menus for data entry, reports, labels, batch updates or links to other menus. Three levels of sorts.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $595

ORACLE CORP.

☐ Oracle
Relational DBMS. Statements entered through terminal interface or embedded in programming languages through host language interface. Creates screen-oriented processing. Includes data compression, compressed indexes, data clustering and virtual buffer paging. Options include fourth generation language and DSS.
IBM PC, XT, AT, RT PC/AIX ☐ 512 KB req. ☐ Copies sold: 4,000 since 1979 ☐ Cost: $600-$2,000

☐ Pro*SQL
General-purpose call interface to SQL/RT. Accesses SQL/RT data using set of programming calls from various languages.
IBM RT PC ☐ Introduced: 1986 ☐ Cost: $600

☐ SQL*Plus
Fourth generation language interactive command utility for ad hoc data access and report writing.
IBM PC

PANSOPHIC SYSTEMS, INC.

☐ Easytrieve Plus.PC
Information retrieval system. Supports forms creation for data entry, data base and editor for entering/correcting jobs. Reads Lotus and ASCII files. Includes report-writing capabilities. User can browse, add, delete or update records.
IBM PC, XT, AT ☐ 256 KB req.

PAPERBACK SOFTWARE INTERNATIONAL

☐ Executive Filer
Files and indexes text, graphics and spreadsheets. Retrieves related information by selecting combinations of keywords. Each item can store over 8,000 characters of text. Each item can be indexed by 1-10 14-character keyboards. Stores over 64,000 items.
IBM PC, PCjr, XT, AT ☐ 192 KB req. ☐ Copies sold: 3,000 since 1985 ☐ Cost: $50

☐ VP-Info
High-speed DBMS. Supports 256 fields and 8 KB per record. Accesses 6 data base files and 7 index files simultaneously. Reads/writes dBASE II and III files. LAN support. Supports 8087 co-processor. Communications port I/O.
IBM PC, XT, AT ☐ Cost: $100

PASCAL SYSTEMS, INC.

☐ TDM (The Data Machine)
Pascal DBMS for large data bases. Provides file maintenance and reporting from large data bases, including files resident on hard disk systems. Exchanges files with other systems. Each data base handles 32,767 records and supports related data bases. Report procedures may include if-then-else and gosub statements.
IBM PC, XT ☐ 64-256 KB req. ☐ Copies sold: 1,000 since 1980 ☐ Cost: $295

PC MANAGER, INC.

☐ PC Manager
Relational DBMS and fourth generation application builder. Report generation. Automated field validation. Lets user create or compute data element for display or reporting without having to store it on disk.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $595

P. C. STAT, INC.

☐ N-DBMS Numeric Data Base Management System
Includes facilities to transfer data between this system and most spreadsheets, data bases and text editors. Major sections include design data base, design entry screens, data entry, sorting, query, report generation, data exchanges, and graphics.
IBM PC, XT, PCjr ☐ 128 KB req. ☐ Cost: $350

PEACHTREE SOFTWARE, INC.

(an Intelligent Systems Co.)

☐ PDQ (Peachtree Data Query)
Accesses data stored in Business Accounting System or Back to Basic files. Displays data on screen, graphs data in line/bar charts or transfers to spreadsheets or data base managers. Prints formatted and custom reports, graphs or extracted data files. Maintains accounting files integrity.
IBM PC ☐ Cost: $395

PEARLSOFT, INC.

☐ Personal Pearl
Relational DBMS and program generator. Designs forms or reports, enters data and prints reports. Performs calculations and interfaces with WordStar and SuperCalc. Features keyword and wild card in 256 KB version.
IBM PC ☐ 52-256 KB req. ☐ Copies sold: 140,000 since 1982 ☐ Cost: $295

PECAN SOFTWARE SYSTEMS, INC.

☐ KSAM (Keyed Sequential Access Method)
Writes applications such as IC and accounting programs. Accesses files dynamically, intermixing sequential and random operations. Records identified by a user-defined data field. Operations include add, close, create, delete, erase, load, open, read current, read random and update.
IBM PC, XT, PCjr, AT ☐ 64 KB req. ☐ Introduced: 1981 ☐ Cost: $60

☐ Swan's Relational Database
IBM PC, XT, AT ☐ Cost: $60

PERSONAL COMPUTER SUPPORT GROUP, INC.

☐ Data+
File manager with input screens and output formats including merging. Accepts data from user-defined 16-field screen. Prints mailing address labels or lists of any records or selected fields of records in columns or other configurations.
IBM PC ☐ 24 KB req. ☐ Introduced: 1983 ☐ Cost: $60

PHACT ASSOCIATES, INC.

☐ PHACT-dbrm
Accesses and manipulates records by relative or ISAM and is available as library of C programming language functions. Describes data bases in data dictionary which is compiled into data base and creates C header file. Supports char, short, long, quad and double data types.
IBM PC ☐ Copies sold: 2,000 since 1983 ☐ Cost: $295-$950

THE POISE CO., INC.

☐ DMS-Plus and DMS-Micro
Includes file maintenance, report generator, word processing, label program, text editing, list processing, on-line inquiry, information retrieval and user-defined screen formatting.
IBM PC, XT, AT ☐ 64-2,000 KB req. ☐ Copies sold: 300 since 1977 ☐ Cost: $495

POLYTRON CORP.

SEE AD ON PAGES 348/382

☐ PolyWindows Archivist
Memory-resident document storage and retrieval utility. Compresses data and stores files on hard or floppy disk in single archive volume. Retrieves data by keyboard, date, file name, or longer descriptive name. Requires PolyWindows DeskPlus.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $49

☐ VMFM (Virtual Memory File Manager)
Virtual file access and buffering for text and binary files with buffer-to-disk swapping. Handles data structures larger than memory allows. Includes subroutines which can link with user's application code to provide random access file buffering.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $99-$2,500

POSTLEY SOFTWARE, INC.

☐ DBS/Experience
DBMS and reporting system. Develops prototype systems. Collects, updates, retrieves, organizes, manages, processes and analyzes data. Performs computations on stored data. Mailing label printing. Custom data entry screens, output display screens and printed output.
IBM PC, XT, AT, Convertible ☐ 96 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $195

POWERBASE SYSTEMS, INC.

(division of Compuware Corp.)

☐ PowerBase
Accesses data in related files. Exchanges data with spreadsheets, word processors, other data bases, mainframes and online information systems. Supports multifile/sort report writer, file redefinition, global update, search, command mode, labels, quicklist, lookup, table validation, password protection and international characters.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 30,000 since 1983 ☐ Cost: $349

PRACTICORP INTERNATIONAL, INC.

☐ PractiBase
Relational DBMS. Handles up to 2,000 characters per record and 254 characters per field. Providing file compatibility with PractiCorp's PractiWord and PractiCalc III. Reads and converts dBase II files and runs existing dBase II programs. Includes programming language and report generator.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $100

PRIME COMPUTER, INC.

☐ Information/pc
Relational DBMS. Includes English-like nonprocedural query and report language, interactive data definition and defaulted data entry screens based on dictionary. Allows application prototyping. Multi-valued fields and associations. Concatenated, conditional, computed, other-file-related and programmable fields. Phonetic search capabilities in query language.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $895

PRO/TEM SOFTWARE, INC.

☐ Notebook II
DBMS for research notes and bibliographies, with text editing and word wrap. Manages up to 28,000 characters in 50 fields and ten pages of text per record. Reads files from word processors, public data bases, and other DBMS. Accepts and controls extended characters.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 7,000 since 1985 ☐ Cost: $189

PROBASE GROUP, INC.

☐ Probase
Relational DBMS. Handles full or partial accounting systems, IC customer files, payroll, checkbook balancing and check writing, scheduling, mailing label production, portfolio management and personnel records. Capable of handling up to 65,536 records per file, each record a maximum of 1,024 bytes.
IBM PC ☐ 64 KB req.

PRODATA, INC.

☐ Easyscreen/PC
Draws screen layouts to process data in full screen or block mode. Includes multiple data types, screen attributes, screen overlays, simple windowing and screen processing interrupts. Custom designed screens may be included in BASIC programs or can be used with the data base program.
IBM PC ☐ 64 KB req. ☐ Copies sold: 65 since 1982 ☐ Cost: $190

☐ KSAM/PC
Provides keyed or indexed file access from Microsoft BASIC. Allows partial or generic key lookup, duplicate keys and multiple key files. Includes multiple access levels for file security. Key can be up to 249 bytes and data records can be up to 32 KB. File commands include open, close, read by key and read next record.
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $90

PROGRAMMED INTELLIGENCE CORP.

☐ IQ (Intelligent Query)
Lotus 1-2-3 and dBASE II/III compatible integrated reasoning-based query, report writing and graphics system. Arithmetic, selection, sorting, batch reporting and conditional functions. Merges information from numerous files, sorts, totals and subtotals. Performs graphic analysis of data.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $150-$500

QAX INTERNATIONAL SYSTEMS CORP.

☐ **Page*One**
Capable of adding integration type features to existing applications. Uses pre-existing data files. A single command and a key accesses information in readable format. Available as standalone or with Super Spreading spreadsheet, 3*16 word processor, inquiry action express.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $395

QINT DATABASE SYSTEMS CORP.

☐ **NIAM (Nijssen's Information Analysis Methodology)**
Enterprise modeling. Analyzes end user needs prior to design phase of data bases. Assures accurate representation of information meaning.
IBM PC, XT, AT

☐ **SQL**
Relational DBMS. Compatible with IBM's SQL for mainframes. Includes integrated application development tool, graphics capabilities and data conversion utility. Allows micro-based prototypes of mainframe.
IBM PC ☐ 512 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $995

☐ **TINA (Tool for Information Analysis)**
Provides information analysis. Generates normalized data bases. Data dictionary. Expert system handles modeling process. Handles large numbers of conceptual schemas. Includes command language to manipulate data base. Defines scope of schema. Generates overall, selective and statistical reports.
IBM PC ☐ 300 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $3,000

QSR SERVICE CORP.

☐ **MAKPROG**
DBMS. Generates UX-BASIC (OASIS) structured source code for relational and hierarchical file structures. Features an interactive screen generator to paint data capture screen formats, arbitrary subroutine processing on any field and English language query with QRPT report generator on all files. Menu generator. Word processing interface.
IBM PC, XT, AT ☐ 44 KB req. ☐ Copies sold: 5 since 1982 ☐ Cost: $600-$1,200

QUADRAM

(subsidiary of Intelligent Systems Corp.)

☐ **Data Base Manager**
Creates and modifies a large data base of over 32,000 records. Produces form letters and prepares and maintains a mailing list. Can be reconfigured, altering and adding to its form. Contains global search and replace. Performs up to 18 mathematical and statistical calculations. Integrates with WordStar, Lotus 1-2-3, MultiPlan and VisiCalc.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 20,000 since 1984 ☐ Cost: $199

☐ **Key II, Data Management for 1-2-3**
Changes Lotus 1-2-3 data without having to use Lotus commands. Adds, deletes, edits, views and sorts data. Prints reports in various preset forms from Lotus 1-2-3 data. Searches data base and extracts information to meet specified conditions. Performs mathematical and statistical operations on numeric fields.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $99

☐ **4-1-1, The Retrieval System**
Maintains a data base of every word in every document. User can specify one word or several words which are contained in document and program will locate file. File encryption provided. Organizes back-up floppy disk according to subject matter or data.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $149

QUADRATRON SYSTEMS, INC.

☐ **Q-File**
Text management, search and retrieval. Reviews information from multiple data bases and across networks. Performs wild card, combined and Boolean searches. Works with foreign languages and multi-font text.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $495-$695

☐ **Q-Phact**
Business environment data base system. Includes data dictionary and variable length records. Extracts keys from records. Supports data base/record locking. Password protection. Provides report/forms generators and query language capability. Accesses records by relative position or key sequence. Checks for duplicate records.
IBM PC ☐ 196 KB req.

QUICKVIEW SYSTEMS

☐ **Zoomracks**
Integrated project organizer, data base, card file and word processor based on electronic rack concept. User can define, view and manipulate many fields, cards and racks simultaneously. Handles 27 fields per card, 10,000 cards per rack. Resides in memory.
IBM PC, XT, AT ☐ 256 KB req.

RAF SOFTWARE, INC.

☐ **Rank and File I**
Maintains information of clients, customers, employees, inventory, billing, mailing lists and personal finances. Searches on any combination of fields or by browsing forward and backward. Reports detail titles, comments, fields, running totals, page totals, grand totals and computed fields directly on the screen.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 4,000 since 1983 ☐ Cost: $195

RAIMA CORP.

SEE AD ON PAGE 327

☐ **db—VISTA**
Network model DBMS consisting of a data definition language processor and a library of C functions. Multi-user capability, translation processing, dBASE II/III, R:base and ASCII file transfer. Data base consistency check and data field alignment check utilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $195-$990

RAPID SYSTEMS

☐ **Data Recording**
Includes direct data acquisition to disk, selectable data paths, strip chart recorder and selectable sample rates to 1,000 seconds per sample.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $99

☐ **Lotus 1-2-3/dBASE III Interface**
Transfers Rapid Systems' data format into Lotus 1-2-3 or dBASE III.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $49

THE RAPPORT CORP.

☐ **Rapport**
Relational DBMS. Includes facilities for backup/recovery, password access, concurrent update protection, interactive development environment. Screen data entry and SQL interface.
IBM PC, XT ☐ 500 KB req. ☐ Copies sold: 250 since 1979

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ **Data Base Manager**
Uses ISAM. Accesses records by 32 bit (dword) key valve stored in index. Integrates with application programs under PC/RTX, AT/RTX and iRMX86 OS. Works with The PL/M Connection.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $495

REALTY MICROSYSTEMS, INC.

☐ **Profiler**
Allows 80 fields and 2,000 characters per record. I/O formats can be drawn on screen with keyboard. Sorts up to nine fields per file and searches 80 fields. Reports hold up to nine records horizontally and 99 vertically per page. Permits 999 lines per page with 255 characters per line.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $795

REFERENCE TECHNOLOGY, INC.

☐ **Clasix STA/F Text**
Retrieves text from data bases stored on read-only optical disks. Performs free-text or structured searches. Searches using Boolean operators to find documents containing selected words, phrases or word prefixes. Interfaces with Clasix STA/F File.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1985

RELATIONAL DATABASE SYSTEMS, INC.

☐ **C-ISAM**
B-tree based. Library of C functions. Creates/manipulates indexed file systems. Standard access method for UNIX. Provides retrieval, storage and protection.
IBM PC, XT, AT ☐ 28 KB req. ☐ Copies sold: 125,000 since 1981 ☐ Cost: $225

☐ **File-it**
Provides interactive file creation and context sensitive help facilities. Maintains, modifies, adds to and retrieves information. Interactive operating environment simplifies file creation, data entry and query-by-forms procedures. File and command compatibility with RDS' INFORMIX-SQL.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 76,000 since 1984 ☐ Cost: $295

☐ **Informix-SQL**
Reviewed Dec 1985 p. 118.
Relational DBMS based on industry-standard SQL. Creates and maintains data bases. Designs custom screens and menus. Produces custom-formatted reports.
IBM PC ☐ 512 KB req. ☐ Copies sold: 76,000 since 1985 ☐ Cost: $795 and up

RELATIONAL TECHNOLOGY, INC.

☐ **Ingres Relational Database Management System Release 5.0**
Relational DBMS. Includes interactive SQL terminal monitor and integrated data dictionary. Manipulates data via forms-based visual programming tools, 4GL language or embedded 4GL commands within traditional languages.
IBM PC, RT ☐ 512 KB req. ☐ Copies sold: 3,000 since 1981 ☐ Cost: $1,000 (micro); $3,000-$140,000 (mini, mainframe)

☐ **Ingres/ESQL**
Host language interface. Preprocessor translates embedded SQL commands to host language including Ada, BASIC, C, COBOL, FORTRAN, Pascal and PL/1. Prototypes data management portions of applications interactively. Converts data. Handles variables. Controls forms. Integrates with Ingres/Applications.
IBM PC, RT ☐ 512 KB req. ☐ Copies sold: 3,000 since 1981

RETRIEVAL TECHNOLOGY CORP.

☐ **Para-Tools**
Enhancement for Ansa Software's Paradox DBMS. Includes browsing, labeling, and menu creating. Provides over 30 add-on scripts, forms and tables.
IBM PC, XT, AT ☐ Cost: $75

ROCKY MOUNTAIN SOFTWARE SYSTEMS

☐ **MAG/base**
Three upward compatible levels include personal filing system, multifile information management and advanced application development system.
IBM PC ☐ Copies sold: 8,000 since 1981 ☐ Cost: $495-$795

☐ **MAG/base 2**
DBMS and report writer. Calculates at detail, subtotal and grand total time. Bases record selections on any combination of field, calculation and constant comparisons using Boolean logic. Sorts up to 10 record fields in ascending, descending or user-defined order.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $495

First High-Speed DBMS written exclusively for C applications is also Transportable

"db_VISTA™ lets you easily build complex databases with many interconnected record types..."
Dave Schmitt, President, Lattice, Inc.

High-Speed data retrieval and access, are the result of db_VISTA's unique database model. db_VISTA is designed exclusively for C application programmers and developers. Now your applications can retain key benefits of C such as speed, transportability and efficiency.

Independent Benchmark proves High-Speed model 2.76 times faster

An independent software developer benchmarked db_VISTA against a leading competitor. Eleven key retrieval tests were executed with sequentially and randomly created key files.

*Result of 11 Key Retrieval Tests

db_VISTA	:671.24 seconds
Leading Competitor	:1,856.43 seconds

db_VISTA's high-speed database model lets you precisely define relationships to minimize redundant data and only those functions necessary for operation are incorporated into the run time program.

Transportable DBMS Applications with db_VISTA

To give your applications maximum transportability every line of code for db_VISTA is written in C and complete source code is available. db_VISTA operates on most popular computers with over 10 operating systems supported. So whether you write applications for micros, minis, or mainframes...db_VISTA is for you.

How db_VISTA works...

db_VISTA uses your C compiler to build the run-time program. The programmer's interface to db_VISTA is syntactically consistent with the C language.

To use db_VISTA design then compile the schema with the database definition language processor (DDLP). Test your design with the Interactive Database Access program provided. Design your C application with appropriate calls to db_VISTA. Compile and link your C program with the db_VISTA run-time library, and your application is ready to run.

Multi-user and LAN capability

Information often needs to be shared. db_VISTA has multi-user capability and supports simultaneous users in either multi-tasking or local area networking environments, allowing the same C applications to run under UNIX and MS-DOS.

db_QUERY™ lets you ask more of your database

db_QUERY is a linkable, SQL-based ad hoc query and report writing facility. It's also royalty-free.

Royalty-Free Run-Time

Whether you're developing applications for a few customers, or for thousands, the price of db_VISTA is the same. If you are currently paying royalties for a competitor's database, consider switching to db_VISTA and say goodbye to royalties.

FREE Technical Support For 60 days

Raima's technical support program includes 60 days of free telephone support, 60 days of free software updates, and complete documentation. Technical support personnel are available to answer questions about our software or yours. Extended technical support available.

Order Schedule

	db_VISTA	db_QUERY
☐ Single-user	$195	$195
☐ Single-user with Source	$495	$495
☐ Multi-user	$495	$495
☐ Multi-user with Source	$990	$990

Not Copy Protected

30-Day Money-Back Guarantee

Try db_VISTA for 30 days and if not fully satisfied, return it for a full refund.

Read what others say about db_VISTA

"If you are looking for a sophisticated C programmer's database, db_VISTA is it. In either a single or multi-user environment, db_VISTA lets you easily build complex databases with many interconnected record types. The multi-user implementation handles data efficiently with a LAN, and Raima's customer support and documentation are excellent. Source code availability and a royalty-free run-time is a big plus."
Dave Schmitt, President Lattice, Inc.

"Not 'yet another user-friendly database,' it is a DBMS aimed at the technical C programmer instead of the non-technical end-user."
Hal Schoolcraft, Data Based Advisor March, 1985

"On the whole, I have found db_VISTA easy to use, very fast with a key find, and powerful enough for any DBMS use I can imagine on a microcomputer."
Michael Wilson, Computer Language September, 1985

db_VISTA Version 2.11

Database Record and File Sizes
- Maximum record length limited only by accessible RAM
- Maximum records per file is 16,777,215
- No limit on number of records or set types
- Maximum file size limited only by available disk storage
- Maximum of 255 index and data files

Keys and Sets
- Key length maximum 246 bytes
- No limit on maximum number of key fields per record—any or all fields may be keys with the option of making each key unique or duplicate
- No limit on maximum number of fields per record, sets per database, or sort fields per set
- No limit on maximum number of member record types per set

Operating System & Compiler Support
- Operating system's MS-DOS, PC-DOS, UNIX, XENIX, SCO XENIX, UNOS, ULTRIX, VMS
- C compiler's Lattice, Microsoft, DeSmet, Aztec, Computer Innovations, Xenix and Unix

Features
- Multi-user support allows flexibility to run on a local area network
- File structure is based on the B-tree indexing method and the network database model
- Run-time size, variable—will run in as little as 64K, recommended RAM size is 256K
- Transaction processing assures multi-user database consistency
- File locking support provides read and write locks on shared databases
- SQL-based db_QUERY is linkable
- File transfer utilities included for ASCII, dBASE optional

Utilities
- Database definition language processor
- Interactive database access utility
- Database consistency check utility
- Database initialization utility
- Multi-user file locks clear utility
- Key file build utility
- Data field alignment check utility
- Database dictionary print utility
- Key file dump utility
- ASCII file import and export utility

*The benchmark procedure was adapted from "Benchmarking Database Systems: A Systematic Approach" by Bitton, DeWitt and Turbyfill, December 1983.

High-Speed Programming Tools Transportable by Design

CIRCLE NO. 297 ON READERS SERVICE CARD

RVA TECHNOLOGY, INC.

☐ Flexquery

Produces reports, creates new data files and combines existing files while maintaining data base. Provides relationship file to integrate data from multiple files. Sorts on any number of keys. Unlimited selection parameters. Compatible with WordStar, RealWorld ABS and Flexaccount.

IBM PC ☐ 64 KB req.

SAN DIEGO COMPUTER CORP.

☐ CPQ

Catalog, pricing and quotation. Maintains pricing catalog with cost, source, retail price, discount rate and vendor information. Prints sales pricing catalog of items suitable for use by customers. Generates quotations to customers with in-house report of profit margins.

IBM PC ☐ 256 KB req. ☐ Copies sold: 40 since 1985 ☐ Cost: $75

SAPANA MICRO SOFTWARE

☐ Sapana: File

Auto-indexing on up to 24 fields, Boolean logic, sorting, merging of files, and exporting and importing ASCII files. Files hold unlimited number of records. Maximum file size supported is over 4 billion bytes. Maximum record size is 4,090 bytes.

IBM PC, PCjr, XT, AT ☐ 256 KB req. ☐ Copies sold: 15 since 1986 ☐ Cost: $195

SAUER COMPUTER SYSTEMS, INC.

☐ Key/500

Maintains multiple indices and allows real-time alteration of indices. User can establish new files and update and print file contents in various formats. Loads variable length text fields via on-board word processor.

IBM PC ☐ Copies sold: 250 since 1974 ☐ Cost: $350-$3,450

SB ASSISTANT

(division of Advanced Creative Technologies, Inc.)

☐ File n' Report

DBMS. Employs CAPASS (Cross Tabbing Routine) algorithm and Soundex intelligence to phonetically find information that user can't spell or pronounce. Features global edits, calculated fields, screen building routines, duplicate options, five level cross tab search, formatted prints, report generator and sort files.

IBM PC ☐ 48 KB req. ☐ Copies sold: 7,000 since 1979 ☐ Cost: $150

SCHNEIDER ASSOCIATES

☐ FIND-IT

Develops and runs multiple data processing applications. Provides tools that design and build data files, enter and edit text with verification and automatic field fill-in, search, sort and display selected data and generate user-defined reports or mail labels.

IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $695-$1,995

SDA ASSOCIATES

☐ File Path

Reviewed Apr 1985 p. 138.

File search utility. Searches all subdirectory levels defined in tree structure for requested file if not found in current directory. Crosses disk drives searching for data files as user requests. Edits current paths with screen editor or modify path option.

IBM PC, XT, AT ☐ Cost: $35

SEASIDE SOFTWARE

☐ askSam (Access Stored Knowledge via Symbolic Access Method)

Text-oriented DBMS. Routes retrievals to screen, printer or disk. Uses variable-length fields and records. Performs arithmetic. Updates records with text editor and batch operations. Uses passwords. Exchanges ASCII files with other systems. Lets user design and use templates and overlays.

IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 650 since 1985 ☐ Cost: $150

SELECT INFORMATION SYSTEMS, INC.

(division of Summa Technologies, Inc.)

☐ 4-1-1

Content-based document locator for hard disk PCs. Maintains a data base of every word in every document. Provides document security through a two Key Public Key Cryptography and document archiving with on-line index.

IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $149

SENTINEL COMPUTER CORP.

☐ Interactive Query/Report Writer

Retrieves non-routine information from data base. Results are displayed or printed. Totals and other arithmetic operations can be performed. Selection sorting and formatting.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 20 since 1980 ☐ Cost: $695

THE SMALL COMPUTER CO., INC.

☐ filePro 16

DBMS. Allows 999 fields per record, 4,608 characters per record, 16,000,000 records per file, 12 indexes per file and 24 digits per numeric field. Includes facility for creating custom screen and report layouts. Permits 10 files to be used concurrently. Provides built-in field types for error checking.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 100,000 since 1984 ☐ Cost: $495

☐ filePro 16 Plus

DBMS and applications developer. Supports file creation, screen definition, report writing, labels/forms printing, records viewing, information processing and file indexing. User can post information to other files while in update mode. Includes processing table debugger.

IBM PC, XT, AT ☐ Cost: $990

SOFISTRY, INC.

☐ Private Files

B+Tree structured file management system. Provides full screen and design of file. Allows up to 40 keyed fields to file. Includes built-in report generator.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 2,200 since 1985 ☐ Cost: $149

☐ Private Files PLUS

B+Tree structured file management system. Allows 40 keyed fields to file. Built-in report generator. Import/export features. Moves information into and out of mail merge word processing, spreadsheet and other programs. Performs as front-end processor to other data bases.

IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 2,200 since 1985 ☐ Cost: $149

SOFTCRAFT, INC. (TX)

☐ Btrieve

Record retrieval system for application programmers. Uses subroutine calls to retrieve records equal to, greater than or less than specific key values. Recovers indexes if system fails. Defines up to 24 keys per file. Maximum record length is 65,535. Maximum key length is 255.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 6,000 since 1983 ☐ Cost: $245

☐ Btrieve/N

Record retrieval system for multi-user and LAN applications. Transaction bracketing and pre-image logging guarantees integrity of data files despite concurrency problems that arise in network. Allows up to 24 keys per file and maximum file size of more than four billion bytes.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,200 since 1984 ☐ Cost: $595

☐ Xtrieve

Window-oriented query tool. Enters and retrieves data without writing program. Allows users to build full relational models of data by providing capability of linking multiple Btrieve files. All information needed to build query, including help files, are displayed on screen.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 800 since 1984 ☐ Cost: $195

SOFTSTAR INTERNATIONAL, INC.

☐ Data MANager

Screen design and data field control. Accesses indexed record. Searches data base randomly or sequentially. Redefines fields. Compatible with Mail MANager files. Includes report and printer manager.

IBM PC ☐ 256 KB req. ☐ Copies sold: 40 since 1985 ☐ Cost: $79

THE SOFTWARE BOTTLING CO. OF NEW YORK

SEE AD ON PAGE 401

☐ Flash Code

Program developer for dBase II, III and III plus. Creates and displays screen, reads and edit-checks input data. Specifies variable names, file variables, data types, acceptable data ranges, pictures for edit checking, initial values, calculated fields and indexes.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $150

SOFTWARE CONNECTIONS, INC.

☐ DATASTORE:file

File manager. Stores, manipulates and retrieves information. Includes report writer. Upgradable to relational LAN versions.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $145

☐ DATASTORE:lan

Multi-user relational DBMS for LANs. Handles concurrent access protection for multicomputer LAN, data access security for different levels of users and 32 MB data base. Hidden internal audit trails. Keys stored in B+ Tree structure. Includes custom report writer. Menu-driven.

IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $395-$495

☐ LAN: DATACORE

For software developers and MIS Professionals. Provides MSDOS routines to handle information storage and retrieval. Provides concurrent access protection for multicomputer LAN, data access security for different levels of users and 32 MB data base. Callable from BASIC, Pascal, Assembler and C.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $495

SOFTWARE CONSULTING SERVICES

☐ TEQLIB

Allows a combination of storage of index structures and off-line storage of article abstracts. Attaching a hard disk to a desk top computer allows a system for 50,000 to 100,000 abstracts. Retrieves information from the data base using QUERY program.

IBM PC, XT ☐ Cost: $1,500-$30,000

THE SOFTWARE LINK, INC.

SEE AD ON PAGE 265

☐ MultiLink Advanced Version of Btrieve/N

File management for applications development in BASIC, Pascal, COBOL, C, FORTRAN and APL. Accesses data base. Controls simultaneous record updates. Provides file recovery in event of system crash.

IBM PC ☐ Cost: $595

SOFTWARE MARKETING ASSOCIATES

☐ FYI 3000 Plus

Free-format text management. Handles information filing, cross referencing and retrieval. Accommodates entries up to 2,000,000 characters in length. Provides capacity of 65,000 unique alphanumeric key words and 65,000 individual entries.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $395

☐ SuperFile
Stores and retrieves text information. Text can be free form. Search topics are combined with AND/OR/NOT for retrieval across files.
IBM PC ☐ 64 KB req. ☐ Copies sold: 6,000 since 1982 ☐ Cost: $195

SOFTWARE PUBLISHING CORP.

☐ PFS:Professional File
File management/reporting. Organizes, updates, retrieves, analyzes and reports information. Customized field calculations. Global search/replace. Imports/exports data from other office programs. Accommodates 29,500 records, 100 fields per page and 3,200 fields per record. Compatible with IBM PC Network, Novell Advanced Netware/86 and 3Com 3+.
IBM PC, XT, Convertible, AT ☐ 256 KB req. ☐ Introduced: 1986

SOFTWARE SOLUTIONS, INC. (CT)

☐ Dataease
Includes any number of indices per file, wild card searches, up to eight screens per file and report, up to 99 choice field selections, and data interface formats of DIF, ASCII, Multi-Mate, Mail Merge and dBase II.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $600

SOFTWARE STUDIOS, INC.

☐ Personal Data Base
Features 200 names in RAM, mail merge, sort/select, labels and envelope printing. Rolodex card printing, telephone directory, auto-dial and name search.
IBM PC ☐ 128 KB req. ☐ Cost: $1,545

SOFTWARE SYSTEMS TECHNOLOGY, INC. (MD)

☐ XDB
Interactive system with help, directory and tutorial functions. Query language compatible with IBM's SQL, report and graph writers, and data base editor that combines search, input, update and delete functions and forms processor for data base access.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $375-$750

SOFTWEST PROGRAMMING

☐ Data Reporter I, II, III
Data base and report generator. Data Reporter III includes file converter, utilities, plotter/analyzer and modem for Apple or graphs and statistics for IBM PC.
IBM PC ☐ 48 KB req. ☐ Cost: $99-$199

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ DB plus
Adds/deletes files or categories, finds and changes data, sorts and reads disks. Transfers data into log or polynomials. Plots data on screen with statistical analyses.
IBM PC ☐ Cost: $99

☐ Super Manager II
Allows related functions except calculator and graphics output.
IBM PC ☐ Cost: $50

☐ Synthesis II
Creates files. Adds, reviews, changes and deletes records. Provides protection against entry errors. Numeric fields right justified. Displays reports vertically or horizontally. Performs calculations, mass deletions. Records contain up to 1,024 bytes.
IBM PC ☐ 64 KB req. ☐ Cost: $99

SPECIALIZED SYSTEMS CONSULTANTS

☐ HEXPOSE
Binary file editor. Edits in hex or ASCII. Patches object modules. Examines word processing files. Repairs damaged files and verifies results of I/O operations. Handles object files of programs and files in development. Modifies sector contents. Views 2 sectors simultaneously.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $75

SSR CORP.

☐ Omnifile
Includes query capabilities. Provides multiple field indexes, password protection and editing function. Shares data with spreadsheet, word processing and graphics when combined with DIF and ASCII interfaces. Designed for law, finance, marketing, medicine, real estate and insurance.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $425

STANTON SOFTWARE

☐ BEAST Data Manager
Maintains and retrieves data. Supports selection, sorting, break levels, and totals.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $65

STILWELL SOFTWARE PRODUCTS

☐ FreeFile
Relational data base. Supports up to 2 billion records. Records can be up to 1,000 characters long. Rebuilds damaged data base. Report writer.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Copies sold: 5,000 since 1985 ☐ Cost: $45

STRUCTURED SYSTEMS GROUP, INC.

☐ Analyst
File management system with report writing. Customized data entry with checking features. Computes totals, subtotals, cross-footings, cross rows and down columns. On-line inquiry function on selected records and user-specified report formatting.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 5,000 since 1979 ☐ Cost: $250

SUMMA TECHNOLOGIES, INC. (OR)

☐ 411
Document retrieval and security system. Indexes each word and file on hard disk. Provides encryption using passwords.
IBM PC ☐ 256 KB req. ☐ Cost: $149

SYNERCOM TECHNOLOGY, INC.

☐ INFODAPT
Open-architecture interface between INFORMAP II data base and various office automation type work stations and terminals manufactured by companies other than Synercom.
IBM PC ☐ 2,000 KB req.

SYSTEM AUTOMATION SOFTWARE, INC.

☐ reQuest
Multi-user relational DBMS. Provides menu-driven operation. Features multi-file data structures, down or up loading, interfaces with Lotus 1-2-3 and WordStar, screen paint entry forms, calculated fields, statistics, security to field level, ASCII integration and 16 key fields. Generates reports.
IBM PC ☐ 384 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $695

TEKTON SYSTEMS, INC.

☐ Aspen/2
Data management system with data dictionary and optional CRT formatting. Uses set theory inquiry methods.
IBM PC ☐ 36 KB req. ☐ Introduced: 1980 ☐ Cost: $24,500-$36,750

TELION SOFTWARE

☐ Free Filer
Divides diskette into parcels of information; text files into paragraph parcels. Allows user-defined parcels. Searches, sorts and prints parcels. Searches all or selected files. Full Boolean search capabilities. Enters free-form text.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $80

TEXAS INSTRUMENTS

☐ TI dBASE III
TI version of Ashton-Tate's dBASE III DBMS. Stores up to 1 billion records per file and 128 fields per data base. Reads ASCII files from Framework, WordStar and Lotus 1-2-3.
IBM PC ☐ 256 KB req. ☐ Cost: $695

TIMEWORKS, INC.

☐ Data Manager 2
Items can be retrieved and printed by category, index code, date range or amount range. Allows a cross search of categories. Allows user to arrange stored items in increasing or decreasing order, alphabetically, numerically or chronologically.
IBM PC, PCjr ☐ 64 KB req. ☐ Cost: $130

TOM SOFTWARE, INC.

☐ EZ-SPEED Records Management System
Includes nine input displays for each file, 255 fields per file and 32 files, holding 4,000 characters per record. Performs mathematical operations. Produces detailed lists of structure and contents of files. Supports custom file format, screen displays and reports. Stores and recalls reports.
IBM PC, XT ☐ 28 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $800-$3,500

TOMINY, INC.

☐ Data Base-Plus
DBMS with query/report writer, screen handler, print handler, utilities and optional development language. Includes application portability, logical data base structure, programming productivity tools, data input and retrieval, English-like query language and distributed data base concepts.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1978 ☐ Cost: $1,700

☐ DataBASICplus
DBMS and command interface to BASIC programming language. Builds, accesses and maintains files. Provides logical data base for storing and accessing information. Provides data independence to accommodate changing requirements.
IBM PC ☐ 192 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $100

TRANSACTION SYSTEMS, INC.

☐ Advance Numeric Data Base Management System
DBMS for use with numerical data and descriptive data. Interfaces to popular data bases and spreadsheets.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 128 KB req. ☐ Cost: $250

TRANSTIME TECHNOLOGIES CORP.

☐ DATAMAT
Relational DBMS and productivity decision support system for business, research, government. Provides bar charts and scatter plots, math functions, statistics, form generation and text processing with built-in interface for other word processors. Partial and total batch processing capability incorporated.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $125-$17,600

TRAVELING SOFTWARE, INC.

☐ T-base

Relational DBMS. Customized files with up to 50 fields. Allows sharing and borrowing of information among multiple files. Provides spreadsheet-like capabilities. Field descriptors limited to five primary and five secondary plus 13 report commands.

IBM PC ☐ 16 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $100

☐ Ultimate ROM II

Provides T-base DBMS, T-Word text formatter and IDEA outline processor.

IBM PC ☐ 16 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $230

TRIO SYSTEMS

☐ C-Index/Plus

ISAM and variable length data management for C programmers. Functions are provided for data storage handling. Includes B+Tree ISAM indexing, variable length data storage, virtual memory buffering and multiple files open simultaneously. Multi-user record locking for LAN and UNIX.

IBM PC ☐ 26 KB req. ☐ Introduced: 1983 ☐ Cost: $395

☐ Forth Index+

Provides extensions to the Forth system for ISAM indexing capabilities. Includes B+Tree structure, multiple OS files or screen file operation and variable length and duplicate keys. Compatible with Laboratory Microsystems Forth (fig-Forth and 83 standard versions).

IBM PC ☐ 8 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $300

UNIFY CORP.

SEE AD ON PAGE 331

☐ UNIFY

Integrated, multi-user, relational DBMS with application development tools, interactive menu handler, command line functionality, screen data entry, query by forms, SQL (structured query language) and report writer. Allows sorting, subtotaling, totaling , complex arithmetic expressions and output formatting.

IBM RT ☐ 384 KB req. ☐ Copies sold: 15,000 since 1981 ☐ Cost: $1,495 and up

UNIPRESS SOFTWARE, INC.

☐ Phact ISAM File System, Report Writer and Query Language

Keyed B+Tree file system for maintaining records. Allows formatted reports from single or multiple Phact data bases. Provides ad hoc Phact-query canned inquiries into Phact data bases.

IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $265 and up

UNISOURCE SOFTWARE CORP.

☐ LEVERAGE-IBM PC/UNIX

List management package. Includes a makescreen utility and standard templates. Generates documents, letters and mailing lists.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $395

UNIVAIR, INC.

☐ UNI-FILE

DBMS with report generator. Supports 99 fields, math functions, external files, and most word processors. Includes electronic 10-key calculator and typewriter modes. Multiple keys can be changed anytime.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $195

UNIVERSAL DATA RESEARCH, INC.

☐ Data Base Management System

Creates files, adds, deletes or modifies information, organizes file in different ways and prints reports and labels according to operator set parameters. Accesses 32,000 records with 36 fields per record. Can be used as programming tool.

IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1978 ☐ Cost: $295-$595

UNLIMITED PROCESSING, INC.

☐ INFORMA

Information management system for single and multi-user, multi-tasking and multi-processing networking. Structures data for storage and retrieval. Menu-driven, screen oriented tutorial response techniques create, modify or customize programs.

IBM PC ☐ 192 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $320-$795

☐ Team-Up

Total environment for application management system. Single- and multi-user and multi-processing networking. Structures data for storage and retrieval. Screen-oriented tutorial response techniques create, modify or customize programs. Enters, updates and deletes records across 255 data base boundaries.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 1,600 since 1985 ☐ Cost: $795-$1,795

VALUATION SYSTEMS CO.

☐ DSR (Data Storage and Retrieval System)

DBMS. Stores data by number, code or letter, accesses files with specific search criteria, handles multi-level sorts, retrieves records meeting search specifications, builds unlimited number of files, retrieves specific record for inspection or editing and design formats for listing or printing.

IBM PC ☐ 28 KB req. ☐ Copies sold: 57 since 1979 ☐ Cost: $750

VERSASOFT CORP.

☐ dBMAN

DBMS. Compatible with dBASE II and III. Provides ten open files, memory variables, debugger, 64 fields and 2,000 characters per record, and updates index file.

IBM PC ☐ 256 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $292

VIA TECHNOLOGY, INC.

☐ IntelliView

User can retrieve, analyze and merge information from related data files in single query or report. Handles Lotus 1-2-3, dBASE III, pfs:file and user-defined ASCII data files. Displays fields, sorts, selects, adds calculated fields, summarizes, formats and saves/recalls view commands.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $50

WANG LABORATORIES, INC.

☐ PC Data Base

DBMS.

IBM PC ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $650

☐ PCDB

Enters information into data base, selects records for review or processing and processes retrieved data. Provides information in form of summary and calculated fields. Prints or displays results of queries and creates data dictionary.

IBM PC

WATCOM PRODUCTS, INC.

☐ WATFILE Data Management System

Interactive, command-oriented package provides facilities to enter, edit, sort and merge files. Handles arithmetic, character and logical calculations, and performs extractions. Generates reports.

IBM PC, XT, PCjr, Portable PC, AT ☐ 192 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $295

WORDPERFECT CORP.

☐ SSIData

DBMS. Includes special fields for free form text, data forms defined without programming with function keys. Reports compatible with WordPerfect and other word processing programs.

IBM PC, XT, PCjr ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $195

WORDTECH SYSTEMS, INC.

SEE AD ON PAGE 321

☐ dBXL

Uses same data/index files as dBASE III Plus. Supports dBASE syntax, reports and format files. Provides networking capability. Allows 10 files open simultaneously and 7 open index files open per file.

IBM PC ☐ Cost: $169

WOS DATA SYSTEMS, INC.

☐ WOSbase Data Management System

Multi-user DBMS. Allows for up to 45 concurrent users per file on local area network. Functions include file creation, windowing, file maintenance, report creation and an update function which allows for creation of posting and updating routines.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $195-$995

XYTON, INC.

☐ Fileon

IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $99

ZANTHE INFORMATION, INC.

☐ ZIM

Reviewed Oct 1985 p. 96; Jun 1986 p. 195.

Fourth generation DBMS and application developer with English-like command language and Entity-Relationship Model of data. Integrates data base manager, report generator, query language, interactive forms design and manipulation, data base definition, data dictionary, programming language and a compiler.

IBM PC, AT ☐ 448 KB req. ☐ Copies sold: 2,200 since 1983 ☐ Cost: $795

ZYLAB CORP.

☐ ZyIndex Plus

Indexing, full-text Boolean logic and selective searching for up to 15,000 documents and 15,000 files. Searches text stored on CD-ROMs and WORMs. Provides simultaneous multi-user read/write access to network file servers on leading LANs. Annotated mark and save capability

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $695

☐ ZyIndex Professional

Indexing, full-text and selective searching for up to 15,000 word processing documents and 5,000 word processing files. Includes clean-up utility. Searches text stored on CD-ROMs and WORMs. Annotated mark and save capability.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $295

☐ ZyIndex Standard

Indexing and full-text searching for up to 15,000 word processing documents and 500 word processing files. Searches text stored on CD-ROMs and WORMs. Annotated mark and save capability.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 ☐ Cost: $145

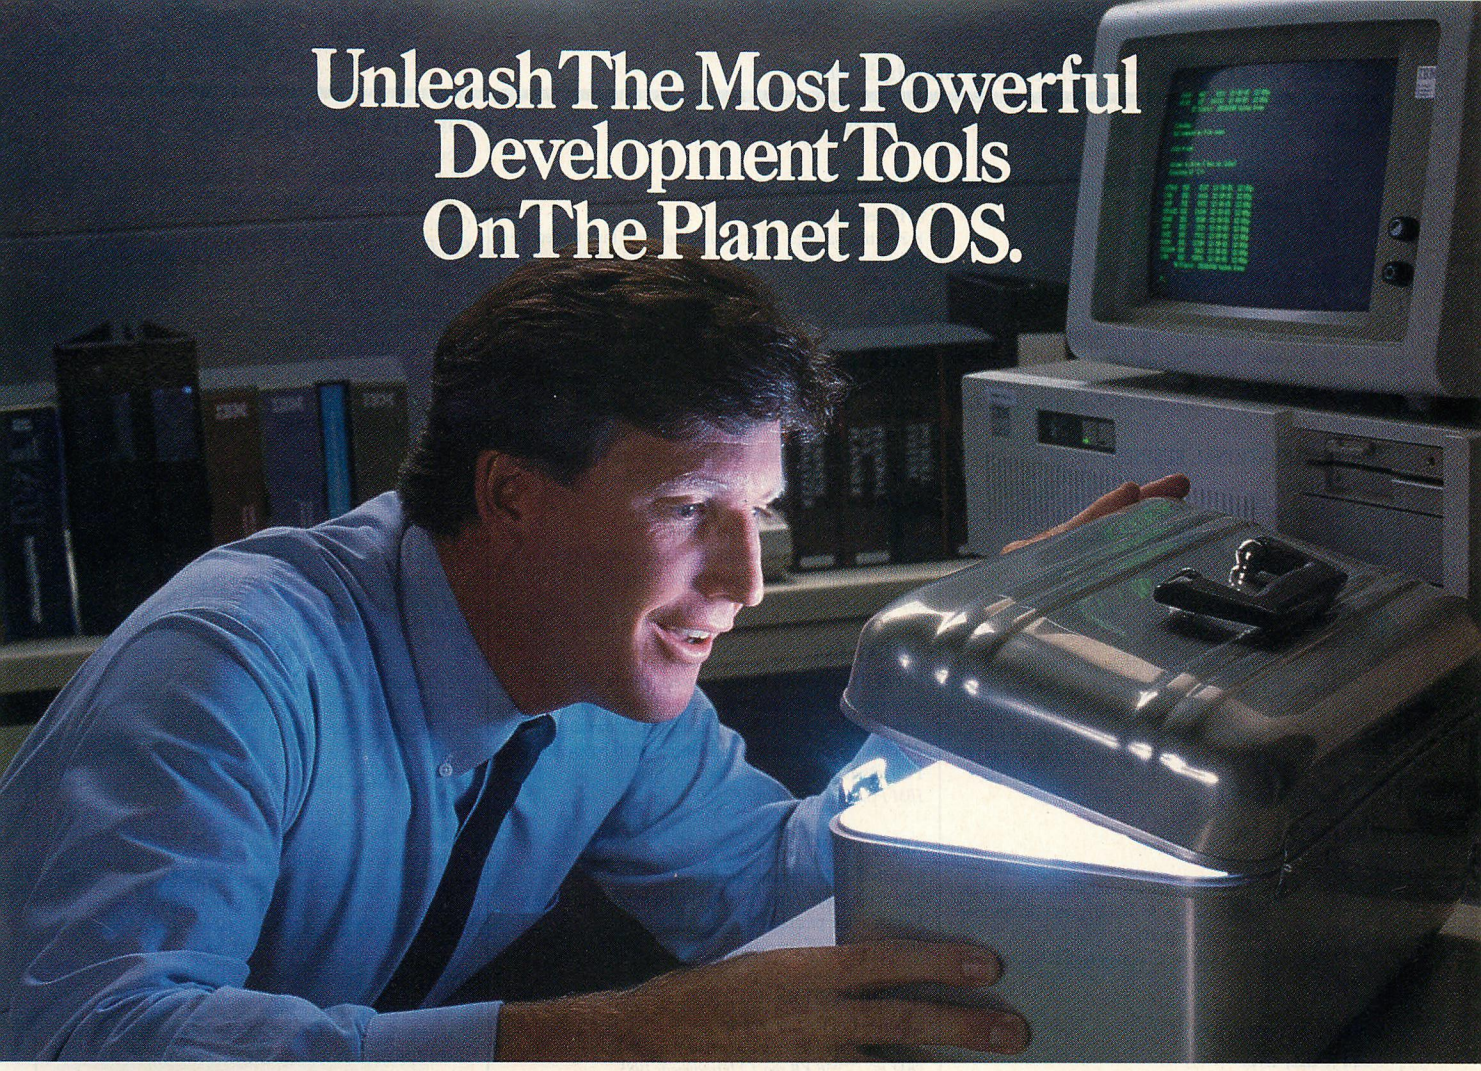
DATA CENTER MANAGEMENT

APEX RESOURCE

☐ Syslog

Logs the usage of computer time. Works as a non-resident extension to DOS. Reporting options include selective printing by single entry, entry range, date, date range, operator or project.

IBM PC, PCjr, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $50



BENDATA MANAGEMENT SYSTEMS, INC.

☐ CATS (Computer Assets Tracking System)

Provides on-line support for managing on-order and installed equipment, problem management and change management. Features on-line invoice approval, budgeting, attached to pointers and charge-back and numerous analytical and informational reports. Files are accessible by dBASE III and Lotus 1-2-3.

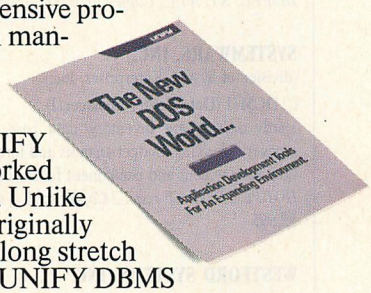
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $695-$5,900

Unleash The Most Powerful Development Tools On The Planet DOS.

UNIFY DBMS/DOS. The UNIX World Leader Brings A New Dimension To DOS Application Development.

What happens as the DOS world expands? As a new generation of hardware takes over? As networking becomes more important? The potential is enormous. But until now, the tools to achieve it have been limited.

Now a leader from another world unleashes that potential: UNIFY® DBMS. The leading relational DBMS in the UNIX™ world. And now, the most advanced set of application development tools in the DOS world.



With UNIFY DBMS, DOS developers have new power to build more sophisticated applications than ever before possible.

The power to write high performance "C" programs that will access the data base, using Unify's Direct Host Language Interface.

The power of an industry standard query language—SQL.

The power of unmatched speed in production applications. Only UNIFY DBMS is specifically engineered for transaction throughput. With unique performance features like PathFinder™ Architecture multiple access methods, for the fastest possible data base access.

The power of comprehensive program development and screen management tools. Plus a state-of-the-art fourth generation report-writer.

What's more, with UNIFY DBMS, the potential of networked applications becomes a reality. Unlike DBMS systems which were originally single-user (and which have a long stretch to accommodate more users), UNIFY DBMS is a *proven* multi-user system.

And because UNIFY DBMS/DOS is the best of two worlds, it offers you the most powerful benefit of all: DBMS applications that can grow as your needs grow. From single user DOS. To networked DOS. To multi-user UNIX. All without changing your applications.

Call the Unify Information Hotline for our free booklet: The New DOS World.

CIRCLE NO. 294 ON READERS SERVICE CARD

COMPASS

☐ Job Queue
Job scheduling and processing. Schedules multiple jobs at one time. Performs restart of active jobs.
IBM PC, AT

CONGENIAL SOFTWARE

☐ Easy Log
Logs and summarizes amount of time spent using computers for up to 10 users and 10 activities. Creates and prints a periodic general log. Records date, time, and number of hours used.
IBM PC ☐ 64 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $30

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Time Manager
IBM no. 6024-019. Resource tracking systems.
IBM PC ☐ Cost: $100

DOUGLAS D. JOHNSON

☐ PC Usage Log
Builds journal of computer usage. Generates reports showing daily and monthly usage of all activities with user's initials, date, sign-on/off times and elapsed time in hours. Corrects input errors. PC identification distinguishes reports of different PCs.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 53 since 1984 ☐ Cost: $35

MICROCLEAR, INC.

☐ AutoLOG
Records time spent on computer for cost allocation and tax deduction purposes. Defines up to 30 categories. Stores time intervals. Provides summary reports.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $50

SYSTEM AUTOMATION SOFTWARE, INC.

☐ Logger
Tracks and documents computer usage. Reports usable as audit trails or billing out time used. Features file outputs to Lotus 1-2-3 and reQuest DBMS. Reports include username, day, date time-in and-out, directory name and user-defined parameters.
IBM PC, XT, AT ☐ Copies sold: 200 since 1985 ☐ Cost: $75

SYSTEMWARE, INC.

(division of System Enterprises, Inc.)
☐ DCM/I (Data Center Manager/I)
Hardware/software inventory data base. Supports disaster recovery planning, budget analysis and forecasting, configuration management and component failure impact analysis.
IBM PC ☐ 512 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $2,995

WESTFORD SYSTEMS, INC.

☐ Micro-Track
Records and reports PC usage for businesses. Tracks through LOGON/LOGOFF procedure that associates user-ID, system-ID and account code with computer session. Generates log listings and summary histograms by machine, user or account.
IBM PC, XT, AT ☐ 96 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $60

WYSSWARE

☐ WorkLog
Keeps data base of PC usage including idle time and keystrokes entered. Implements security features. Reports include time-of-day usage histograms and summary breakdowns by 5 use-categories.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $75

DATA CONVERSION AIDS

THE ALTERNATE SOURCE

☐ Hypercross II
Formatting package. Alien to alien transfers. Lists tagged files to be copied. Handles random files with record lengths other than 256.
IBM PC ☐ Cost: $50-$100

ALTERTEXT, INC.

☐ Altertext System I and II
Transfers data between different PCs, word processors and typesetting equipment. System I reads floppy disks and transmits files. System II provides disk-to-disk conversions.
IBM PC ☐ 64 KB req. ☐ Copies sold: 380 since 1982 ☐ Cost: $4,500 and up

☐ Graphic Arts Software Package
Converts documents from one system to another while maintaining format integrity of documents being converted.
IBM PC ☐ Cost: $4,500

ANIMAT/USA

☐ VALID to Paragon Netlist Conversion Interface
Converts parts and wiring data derived from Valid Logic Scald-system into Paragon/EIS compatible data. Allows user to read data from 9-track mag tape or IBM-formatted floppy disk into PCB design system.
IBM PC, XT, AT ☐ Cost: $2,500

ARITY CORP.

☐ Arity File Interchange Toolkit
Allows programs written in Arity/Prolog to read and write files to/from other programs.
IBM PC, XT, AT

ARMOR SYSTEMS, INC.

☐ Series-To-Plus Conversion
Transfers data files from Excalibur series to Excalibur Plus.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985

AWARD SOFTWARE, INC.

☐ Crossdata
Converts CP/M to DOS and reads disks from other systems. Does not require additional hardware or software to convert and transfer files. All format conversion is performed in disk to disk transfer operation.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $99

DAVID R. BLACK & ASSOCIATES, INC.

☐ COBOL Converter-Batch
Table-driven COBOL computer-to-computer conversion. Produces conversion listing of original program with comments reflecting changes and new program listing including expanded copy library items.
IBM PC ☐ 40 KB req. ☐ Copies sold: 100 since 1977 ☐ Cost: $10,000

BOSS SYSTEMS, INC.

☐ CPI/CPO
Allows MS-DOS systems with correct density drives and Tall Trees Q-drive disk driver and format utility to read and write 5 ¼ inch diskettes in UNIX System V CPIO format. Defines number of tracks, sectors and bytes per sector separately for each function.
IBM PC

THE COMPUTER CONSULTING CENTER, INC.

☐ PCLYNX/36, PCLYNX/38
Data transfer from micro to mainframe. Facilitates transfer between PC and S/3X. Uses PC for off-line data entry. Uploads/downloads to/from PC and IBM S/34, 36, 38.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4 since 1984 ☐ Cost: $695

COMPUVIEW PRODUCTS, INC.

☐ Systran, Transys
CP/M-86 to MSDOS file transfer. Initializes MSDOS diskettes, erases files, displays records and directory. Boots MSDOS from CP/M-86 system.
IBM PC ☐ 64 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $120

☐ Translator Macro
VEDIT Plus macro translates Assembly code to 8086 source file. Requires VEDIT Plus.
IBM PC ☐ Cost: $50

CONTROL-C SOFTWARE, INC.

☐ BIChange
Converts programs to new OS format.
IBM PC, AT ☐ Cost: $495

☐ BIFCON/BI-Change
BIFCON converts Business BASIC programs/data files to ASCII format and vice versa. BI-Change converts program/data files from one OS to another.
IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $175

☐ DChange
Converts data to new OS format.
IBM PC, AT ☐ Cost: $325

DATACHANGE, INC.

☐ Utilities
Includes Data Translator, Field Handler, File Splitter, Line Ender, Underscore and I/O modules. Changes/reformats PC application files, data and information to virtually any output type. Handles word processing, data base and spreadsheet files.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $995

DYNACOMP, INC.

☐ CP/M Data File Translator
Translates file formats from sequential to random and vice versa.
IBM PC, PCjr ☐ 48 KB req. ☐ Cost: $40

FLAGSTAFF ENGINEERING

☐ Word and Typesetting Connection
Transfers data from NBI, CPT, OS/6 and Displaywriter to revisable format text or ASCII text file. Reads/writes between eight inch word processing systems and IBM PC.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $695

GENERIC COMPUTER PRODUCTS, INC.

☐ F-Trans
Transfers files between CP/M-80 and/or MSDOS computers regardless of system and disk formats. Transmits over phone using modems or directly via serial ports. Allows multiple file transmission with single command.
IBM PC ☐ 32 KB req. ☐ Introduced: 1984 ☐ Cost: $60

GENERIC SOFTWARE, INC.

☐ Auto-Convert
Transfers AutoCAD drawing files to Generic CADD and Generic CADD drawing files to AutoCAD, or 3D drawings from MEGACADD's Design Professional and MicroCADD's 3D package to Generic CADD.
IBM PC ☐ Cost: $25

GENESIS MICROSYSTEMS

SEE AD ON PAGE 373

☐ Access-II
Allows Intel's 8080-based ISIS software and Intel's 8080 linking and locating utilities to run on an IBM PC or compatible computer.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $1,995

☐ Access-86
Runs UDI-based 8086 development software on IBM PC or MSDOS-based systems.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $995

☐ GENCOM
Converts located files to MSDOS com files. Produces symbol table for Genesis GeneScope.
IBM PC, XT, AT ☐ 192 KB req.

☐ GENEXE
Converts located, linked files to MSDOS exe files. Produces debug symbol table for Genesis GeneScope.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $300

☐ OH86
Converts object files to standard Intel hex format.
IBM PC, XT, AT ☐ 192 KB req.

GTEK, INC.

☐ CPEmulator
Copies CP/M programs to MS-DOS or PC-DOS diskettes. Includes CP/M conversion utility.
IBM PC, XT, AT ☐ Cost: $199

HAI SOFTWARE, INC.

☐ HAI*LINE Data Converter
Accesses HAI*LINE data files. Creates duplicate files in DIF, ASCII, SYLK format.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $145

IBM PERSONALLY DEVELOPED SOFTWARE

☐ File Conversion Utility
IBM PDS no. 6276-629. Converts selected rows and columns of ASCII data into Lotus-retrievable file for spreadsheet use or into new specification specific PC file. Monochrome and color EGA support.
IBM PC, XT, AT, 3270-PC, PCjr, Portable PC ☐ 128 KB req. ☐ Cost: $30

INTERSECTING CONCEPTS, INC.

☐ Media Master Plus
Converts CP/M software to run on MSDOS and PCDOS machines.
IBM PC ☐ Cost: $60

JAMES RIVER GROUP, INC.

☐ Convert
Creates new ASCII file from any JRG data file. ASCII files are readable by all word processors and many spreadsheets. Extracts data from GL and makes data readable by Lotus 1-2-3 or Symphony. Places AR customer names into WordStar file.
IBM PC, XT, AT, PCjr ☐ 192 KB req. ☐ Cost: $40

KEYWORD OFFICE TECHNOLOGIES, LTD.

☐ Com.File
Document conversion. Translates documents for transmission to previously incompatible word processors or PCs. Ensures document integrity/security. Stores information in encrypted format indefinitely at source or target sites. Uses existing PBXs, LANs and WANs. Requires Keyword 7000.
IBM PC ☐ Cost: $495

MICHTRON, INC.

☐ SuperCalc III ZAPS
Converts SuperCalc III for IBM PC version 1 to run on Sanyo.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $30

MICRO INTERFACES CORP.

☐ RUN/CPM
Allows IBM PC or compatible to run CP/M-80 programs at microprocessor speed without co-processor board.
IBM PC ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $100

MICROTECH EXPORTS, INC.

☐ Reformatter Conversion Software: MSDOS-IBM 3740
Bi-directional file conversion. Allows micros running under MSDOS to read and write single-sided, single-density IBM 3740 formatted diskettes. Blocked and/or spanned records on IBM diskette can be read and written.
IBM PC ☐ 128 KB req. ☐ Copies sold: 700 since 1983 ☐ Cost: $350

☐ Reformatter Conversion Software: PCDOS-IBM 3740
Bi-directional file conversion. Allows IBM PC to read/write IBM 3740 formatted single-sided, single-density diskettes. Blocked and/or spanned records on IBM diskette can be read and written.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $350

MID-AMERICAN CONTROL CORP.

☐ Prompt Personal Computer Interface
File transfer from MACC's PROMPT or EDX data sets to PC with Lotus or other files.
IBM XT, AT ☐ 25 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $2,500

NATIONAL SOFTWARE ENTERPRISES, INC.

☐ File Converter
Converts ASCII files to PFS:File, IBM Filing Assistant or dBASE III. Merges up to 9 ASCII records into one data base and splits one ASCII file into multiple data base files. Runs in batch file mode.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $150

PCX

☐ Read-DOS
File transfer and conversion. Inspects directory of MSDOS/PCDOS diskette and transfers any or all files onto CP/M-86 diskette.
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $75

PUBLISHER CONTROL SYSTEMS, INC.

☐ TRS/DOS Basic Files to Xenix Conversion Software
Converts BASIC data files from TRSDOS to XENIX file format at high speed. If a file follows more than one fielding structure, program changes to the appropriate field structure.
IBM PC

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ UDI
Transfers utilities, languages and programs from Series II, III, IV to IBM PC, XT or Compaq. Transfers files from IBM to Intel Series II, III, IV. Runs Intel software on IBM PC.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 13,500 since 1982 ☐ Cost: $500

SAMKHYA SOFTWARE CORP.

☐ PIK'r, MACROPIK'r
File format conversion utility. Reformats mainframe reports into micro formats and micro data into other micro formats.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $95 (PIK'r); $249 (MACROPIK'r)

SELFWARE, INC.

☐ Convert
Reads, writes and formats CP/M diskettes on IBM compatibles. Moves files between CP/M and MSDOS at disk copy speed. Supports over 115 CP/M formats on menu. Creates CP/M formats.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 3,500 since 1983 ☐ Cost: $69

SOFTOOL CORP.

☐ FACT (FORTRAN Automatic Conversion Tool)
Converts FORTRAN code from one machine to another or from one dialect to another. Remaining incompatibilities are documented.
IBM PC ☐ Copies sold: 1,500 since 1980 ☐ Cost: $4,000

SOFTSYNC, INC.

☐ All Around Converter
Converts files from data bases or spreadsheets to another file format. Works with files created by dBASE, Lotus 1-2-3, Symphony, SuperCalc, Multiplan, ASCII, Sylk, DIF and Delta. User can change field names using up to 22 characters and definition of field types.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $49

SUNRAY SALES, INC.

☐ Timesaver 10
Converts WordStar, MultiMate, WordStar 2000 and OfficeWriter files to ASCII character files. Removes word processing codes and soft CR. New files used by typesetting equipment, other word processing programs, host computers or bulletin boards. Includes hex search and replace utility.
IBM PC ☐ Cost: $40-$150

TRAX SOFTWORKS, INC.

☐ TieLine
File transfer system designed to transfer data between an Apple II and an IBM PC or XT using only standard hardware supplied with each machine.
IBM PC, XT ☐ 48 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $395-$495

UNIFORM SOFTWARE SYSTEMS, INC.

(subsidiary of Locus Computing Corp.)

☐ Connector
Runs Lotus 1-2-3 concurrently with UNIX tasks under XENIX.
IBM AT/XENIX ☐ 640 KB req. ☐ Cost: $149

☐ PC/IX Connector
Runs DOS applications such as Lotus 1-2-3, WordStar and TopView under UNIX OS.
IBM PC, XT, AT/PC/IX ☐ 512 KB req. ☐ Cost: $349

USLYNX

☐ InterMedia
Maintains custom data base of I/O and translation table configurations. Swaps tables in and out while processing files. Merges or splits files and adds job formats. User can create fonts. Displays more than 1 programmable character set at once. Counting translations, decipher tabular matter and fielded information.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 500 ☐ Cost: $10,950 and up

VERICOMP

☐ dB III Export
Translates Lotus 1-2-3 or Symphony worksheet files into dBASE III data base files. Allows data in Lotus 1-2-3 or Symphony worksheet files to be appended to existing dBASE III data base file. Works with dB III Import to provide 2-way conversion.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $75

☐ dB III Import
Translates dBASE III data base files to Lotus 1-2-3 or Symphony worksheet files. Creates data base ranges and form window during conversion to Symphony worksheet file. Sets up data query input range during conversion to Lotus 1-2-3 worksheet file.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $75

WESTERN WARES

☐ ICX-ISIS EXchanger
Initializes disks with ISIS file structure. Includes object checksummer for ISIS and checksumming patch utility.
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $89

WOODCHUCK INDUSTRIES

☐ P-tral
Language translator. Converts BASIC to Pascal. Reads BASIC source program from disk and generates equivalent Pascal source code. Supports BASIC instructions excluding shape/DOS commands and immediate mode instructions.
IBM PC ☐ 64-128 KB req. ☐ Introduced: 1985 ☐ Cost: $179

DATA ENTRY/ ACQUISITION

ALTEK CORP.

☐ MICRODIJ

Digitizing interface allowing for area, length and volume calculations, point and stream mode digitizing and screen graphics while digitizing. Permits rectangular grid and multiple linear regression transformations. User-defined ASCII format output.

IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $995

ANNIS-MILLER SYSTEMS, INC.

☐ PDS Data Collection

Uses personal data station terminals to network to PC. Terminals display prompts to operator for data entry. Supports keyboard or bar code entry.

IBM PC ☐ Cost: $3,000

APPLIED INFORMATION SYSTEMS, INC. (NC)

☐ EasyEntry

Forms management and data entry tool. Validity checking, verification, data retrieval and modification, math capabilities, forms chaining, windowing and color.

IBM PC ☐ 60 KB req. ☐ Copies sold: 350 since 1980 ☐ Cost: $500-$7,500

AUSDATA/USA, LTD.

☐ Ausdata Entry

Replaces such dedicated terminals as IBM 3741 or 5280 or Olivetti 523 to run data entry and other programs. Includes utility programs for copying, reformatting, printing and deleting batches of data and for maintaining format programs, defining data-entry jobs and copying disks.

IBM PC ☐ Copies sold: 2,000 since 1980 ☐ Cost: $750

THE BRIDGE, INC.

☐ Sides/PC

IBM PC

CDS COMPUTING, INC.

☐ Key Base

Key-to-disk data entry. Alpha, numeric, decimal and special editing, operator statistics, multi-level formatting, zip code/state code verification and keypunch verification. Range checks, tables, COBOL subroutines, check digit and reformat I/O.

IBM PC ☐ Introduced: 1982 ☐ Cost: $25,000

CIVILSOFT

(division of The Technical Group, Inc.)

☐ Digiplus

Digitizing input program which operates as planimeter to calculate areas and lengths. Creates output file of X, Y, Z (northing, easting and elevation) coordinates. Output may be used as input to CIVILSOFT's Contour.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $290

COMPUTER CONTINUUM

☐ LAB 40-PC Scope

Data acquisition and graphics for scientists, researchers and technicians. Digitizes and then displays 1, 2 or 4 channels simultaneously. Samples frequency from 3-650,000 samples per second. Displays up to 16K samples per scope sweep with adjustable squash factors.

IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $175

COMPUTER KEYES

☐ Data Entry Emulator

Data entry and two-pass verification of batch input data. Formats created and maintained by operators. Alpha/numeric check, field totals, range checks, table lookups and check digits.

IBM PC ☐ 192 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $395

CONTROL DATA CORP.

Science Information Services

☐ VistaFORM

Data entry/validation system. Consists of two programs. VistaFORMAT creates data entry forms. VistaSCREEN enters data using forms created during a VistaFORMAT session.

IBM PC

CORE TECHNOLOGY CORP.

☐ QuicKey

Collects data off-line on disk for later transmission to mainframe. Replaces keypunches and key-to-disk machines. Data validation.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $495-$1,595

CYBERRESEARCH, INC.

☐ CyberDAS 1 and 2

Integrated local and remote data acquisition. Interfaces transducers, processes data, controls process apparatus and graphs results. Provides real-time graphics, curve fitting, FFT, and Lotus 1-2-3 and RS/1 interfaces.

IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $1,245-$1,995

☐ PCDAS

General-purpose data acquisition. Controls DAS I/O and set-up functions. Supports specialized routines for thermocouples and chromatography.

IBM PC, XT, AT ☐ Cost: $250-$450

DATA BASED SOLUTIONS, INC.

☐ dValidate

Generates data entry screens and monitors data entry. Validates input data on field-by-field basis. Generates documentation.

IBM PC ☐ 64 KB req. ☐ Copies sold: 301 since 1985 ☐ Cost: $15

DATA CONSULTING GROUP

☐ DATA*EASY Data Entry and Edit

Creates data entry-edit screens and files. Record modes available include add, change, delete, inquiry, search, verify and field duplicate. Accumulates hash totals. Allows 14 fields per record, 64 characters per field and 255 characters per record. Includes file repair utility.

IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $128-$178

DATA NET CORP.

☐ Co-Log

Converts terminal into a communications processor that controls up to 128 DNT 1000 terminals on factory floor. Question and answer configuration sequence, help messages for each question and soft-key driven command-line formation.

IBM PC, XT, AT ☐ 386 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $5,000

DATA TRANSLATION, INC.

☐ PCLAB/PCTHERM

Real-time subroutines for Data Translation's IBM PC compatible data acquisition and control boards. BASIC callable macro routine library supports analog and digital I/O for 2801 and 2805 series of plug-in acquisition boards.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $249-$349

DATACOPY CORP.

☐ OCR

Optical character recognition. Converts standard business 10 and 12 pitch mono-spaced typestyle to computer code on Datacopy's image/page scanners. Includes 12 typestyles including dot matrix and laser printer. Allows post-formatting for word processing programs.

IBM PC ☐ Cost: $695

☐ OCR Plus

Converts text pages to computer code. Adds ability to train for specific 10 and 12 pitch monospace typestyles to OCR. Trains in manual or batch modes. Works with Datacopy's image/page scanners.

IBM PC ☐ Cost: $995

DATALEX, INC.

☐ Entrypoint

PC-based data entry. Features paint-the-screen design, immediate validation of data, editing, full logic, data management, data output reformatting and multiple screen capability with hierarchical form management. Batch totaling, table look-ups, rekey verification, proof listings and operator statistics.

IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 5,000 since 1981 ☐ Cost: $545

DATASYSTEMS SOFTWARE CORP.

☐ EntryManager

Creates series of screens for data entry and defines edit rules for validation. Collects data. Changes data into new formats to facilitate transmission, retrieval or manipulation. Integrates custom menu shells with operations.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $450-$695

DATRONIC SYSTEMS, INC.

☐ EDE-I

1-3, 1-16, 17-32, 33-48 and 49-64 terminal key-to-disk system. Allows IBM Series 1 or PC to be used as key-to-disk data entry device on on-site and remote basis. EDX applications can be run concurrently with data entry.

IBM PC ☐ 64 KB req. ☐ Copies sold: 15 since 1971 ☐ Cost: $2,400-$19,200

DPX, INC.

☐ RODE/PC

Input validation, automatic reformatting, continual processing, operator statistics, table and file access, modify, verify, append, search and insert functions, 029 keyboard option and validation language.

IBM PC ☐ 256 KB req. ☐ Cost: $595

FLORIDA STATE UNIVERSITY COMPUTING CENTER

☐ Key2Disk

Data entry station driver. Emulates keypunch machine and performs key-punch-like edit checking. Copies, renames files and lists file directory. Creates standard text files which permit interfacing to other programming languages or applications.

IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $250

JAMES GALLAGHER AND ASSOCIATES

☐ GEN.DE

Program generation screen with 14 line capacity. Up to 120 fields, any number values per field. Permits multiple screens. Checks fields for range, minimum/maximum length and pattern. Duplicates prior field, same field on previous record, any constant and date. Supports columnar format.

IBM PC, XT, AT ☐ Copies sold: 8 since 1980 ☐ Cost: $500

GEMIDEX

☐ GEMIDEX

Data entry with 18 program levels, 99 fields per screen and software-controlled 029 keyboard. Records up to 2,000 characters. Provides record back, forward, delete, insert, global search, batch balance and key verify. Includes 2780/3780 file transfer program.

IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $300-$750

GENERIC COMPUTER PRODUCTS, INC.

☐ Forms-Kit

Data entry kit for terminals. Contains editor to create screen forms. Includes routines to link or merge with user's program. Sequential and random access file structures supported. Provides sample program.

IBM PC ☐ 48 KB req. ☐ Introduced: 1982 ☐ Cost: $50

HAMILTON RENTALS

☐ Micro-DACS

Data acquisition and control. Color graphics with zoom units conversion and data communications. Calculates square fits to functional forms, standard deviations, variance or covariance. Scan frequency, point range, units, labels and control schemes.

IBM PC

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Data Acquisition and Control Adapter

IBM no. 6451-502. Data collection and monitoring for chromatography, electro-chemistry, energy management, electronic testing, process control, data logging and robotics. Monitors pressure, flow, temperature, displacement, voltage, light intensity and rotational speed.

IBM PC, XT, AT, Portable PC ☐ Cost: $1,275

☐ Personal Computer Data Acquisition and Control Adapter Distribution Panel

IBM PC, XT, AT, Portable PC

KAYE INSTRUMENTS, INC.

☐ KVIEW

Industrial process data acquisition reporting and control. Provides real-time, multi-tasking and historical trending with color graphics. Includes 5 levels of analog/contact alarm handling with messages. Utilizes 128 elements to graph valves, boilers, motors, pumps, fans and relay logic symbols.

IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $6,500

KEITHLEY INSTRUMENTS, INC.

Instruments Division

☐ Plus 500

Data acquisition. Interfaces IEEE-488 instruments.

IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $595

LAWSON LABS, INC.

☐ PC64

Data logging of up to 64 channels, each with its own label, scaling factors and high/low alarm limits. Linearizations for assorted thermocouples and direct reading in C, F or K. Hi-res stripchart software included. Integrates with Lotus 1-2-3 for data analysis/presentation

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $150

LOGIC, INC.

☐ Data Entry

IBM PC

MCC SYSTEMS, INC.

☐ MicroMAST-MT

Data acquisition and control. Multitasking allows user to run other tasks which can access real time data base.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 4 since 1985 ☐ Cost: $5,000

MEGASYSTEMS, INC.

☐ MIDAS (Multitasking Integrated Data Acquisition Software)

Configures IBM PC into data acquisition, monitoring, display and control host station. Offers data base and spreadsheet interface including process graphics display. Optional trendline graphics and report generation.

IBM PC ☐ 640 KB req. ☐ Introduced: 1985

METRABYTE CORP.

☐ Interface Utility Software

Provides calibration, data logging, strip chart recorder, graphics and polynomial linearization routine. Assembly driver for writing custom applications for boards.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $25

OCR SYSTEMS, INC.

☐ Optical Character Recognition

Inputs typewritten documents into computer in word processor format. Reads documents with up to 23 fonts on a single page. Supports underlined or boldface text and multiple page documents. Writes text in Wordstar or ASCII formats.

IBM PC, AT ☐ 384 KB req. ☐ Introduced: 1986 ☐ Cost: $495

PENCEPT, INC.

☐ Penform

Creates and uses business forms for data entry in conjunction with Lotus 1-2-3 and most data base systems.

IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $195

RAPID SYSTEMS

☐ Data Acquisition Software

User-definable software interface to Rapid Systems' R400 data acquisition hardware.

IBM PC, XT, AT ☐ Cost: $99

SEMI-CUSTOM SOFTWARE

☐ Data Collection

Allows designers to control sequence and wording of questions, lists of answers and up to 4 screens of user aids. Includes real-time edit checking, encoding and logical branching. Handles hierarchically structured information.

IBM PC ☐ 256 KB req. ☐ Cost: $2,000-$9,000

SIERRA/MISCO, INC.

☐ 5073E Enhanced Alert

Environmental data acquisition and control system. Collects data from sensor types, performs data quality control, manages current data base, and provides alarms, analysis, forecast and control functions. Receives and files data from rain, river level and weather stations. Includes graphics.

IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $3,000

SOFTWARE CONSULTING SERVICE, INC.

☐ SIDES/PC (Personal Computer Version of Series/1 Data Entry)

Menu-driven data entry system. Provides screen builder with 20 field edit options. Includes operator statistics. Heads-down data entry supported.

IBM PC, XT, AT, 3270-PC ☐ 128 KB req. ☐ Copies sold: 700 since 1984 ☐ Cost: $199 and up

SOLUTION TECHNOLOGY, INC.

☐ AdvanTex

Imparts OCR capabilities to scanners. Converts scanner into intelligent page reading translator. Reads multiple typefaces and sizes on printed page. Translates/recognizes symbols, diagrams and foreign languages. Compatible with WordStar, Volkswriter and Microsoft Word. Requires Graphics card.

IBM PC, AT ☐ 512 KB req. ☐ Cost: $1,500

SOUTHERN COMPUTER SYSTEMS, INC.

☐ KeyEntry III

Data entry system for PCs. Handles entry, validation, editing, searching and verification. Provides heads-down high-speed production entry and heads-up phone-order and casual entry operations. Includes multiple display formats, multiple record types, table/file look-up, columnar/partial entry modes, two-pass verification and operator statistics.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $395-$895

☐ Radar-II

Data entry system with range of entry, searching, verification and editing. Includes multiple key entry, specific constants, auto/manual duping, range checks, multiple record formatting and mass edit. Modes for high-speed and casual entry.

IBM PC ☐ 128 KB req. ☐ Copies sold: 2,700 since 1980 ☐ Cost: $395-$695

SPECIALIZED DATA SYSTEMS, INC.

☐ GEMIDEX Operator

Data entry/application development, key verify, output reformat, file transfer, batch balance, value tables, check digits, operator statistics, 99 fields per screen and 18 screens or program levels per job. Enters data for jobs built by GEMIDEX Supervisor.

IBM PC ☐ Cost: $300

☐ GEMIDEX Supervisor

Data entry/application development with key verify, output reformat, file transfer, batch balance, value tables, check-digits, operator statistics, 99 fields per screen and 18 screens or program levels per job. Builds screens. File transfer and data entry.

IBM PC

SPERRY CORP.

Information Systems Group

☐ DCR (Data Capture and Retrieval)

Allows Sperry PC to operate as data entry system. Functions include enter, verify, format, directory, delete, output, report and interface to UNIX-based applications.

IBM PC

SPSS, INC.

☐ PC+ Data Entry

Option to PC+. Designs data entry forms on screen. Creates system files. Allows data to be entered in spreadsheet-like format. Provides cleaning features for data integrity. Sets logical conditions data must meet. User can view/edit existing files. Detects problems in existing data.

IBM XT, AT ☐ 384 KB req.

STRAWBERRY TREE COMPUTERS

SEE AD ON PAGE 230

☐ Analog Connection

Data acquisition and control. Accepts analog inputs with up to 16-bit resolution. Logs data to disk. Controls digital outputs. Sounds alarms. Displays data. Logged data compatible with spreadsheets including Lotus 1-2-3. Allows simultaneous data collection/analysis with DoubleDOS and Microsoft Windows. Menu-driven.

IBM PC, XT, AT ☐ 48 KB req. ☐ Introduced: 1983 ☐ Cost: $490-$2,190

TAURUS COMPUTER PRODUCTS, INC.

☐ TSOFT

Data acquisition and process control. Configuration table, editing program and BASIC callable I/O device routine. Records all I/O points and tracks control and processing options for each analog, digital and counter point/channel.

IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $565

The Answer to your Debugging Problems

ICD286

At last! An 80286 emulator which is affordable, compact, and easy to use.

FAST—Full speed, real-time emulation up to 10 Mhz.

AFFORDABLE—From $2400 to $5400, depending on options.

EASY TO USE—On-line HELP with a screen oriented display.

KEY FEATURES:

- Hardware and software breakpoints
- 2048 bus cycles of real-time trace
- 64K of emulation memory
- Symbol and line number support
- Source-level debugging
- Real and virtual (protected) mode support
- On-line symbolic assembly and disassembly
- Macros with parameters
- Installs in an IBM-PC/XT/AT* or compatible

IDEAL for development, debugging, testing, and field service.

For further information, please contact:

CIRCLE NO. 214 ON READERS SERVICE CARD

VERMONT CREATIVE SOFTWARE
☐ Windows for Data
Provides control over screen display and entry of data within a flexible windowing environment. Includes pop-up data entry windows, conversion to all variable types, lotus-style menus, field-specific and context-sensitive help, and data validation functions.
IBM PC, XT, AT ☐ Copies sold: 1,000 since 1985 ☐ Cost: $295

VIKING SOFTWARE SERVICES, INC.
☐ VDE (Viking Data Entry System)
Full screen data entry used with video display terminals to key enter data. Ensures data accuracy with editing and rekey verify.
IBM PC ☐ 15 KB req. ☐ Copies sold: 400 since 1981 ☐ Cost: $600

WANG LABORATORIES, INC.
☐ PC Micro Focus Forms-2
Creates data entry forms.
IBM PC ☐ Cost: $150

DEBUGGING & TESTING

A. K., INC.
☐ TRACE
Debugger/emulator for IBM 370 type programs. Simulates execution of programs plus path lengths. Prints condition code, branches taken, instruction address, instruction mnemonic, instruction in machine, contents of involved registers and contents of storage areas.
IBM XT/370, AT/370 ☐ 20 KB req. ☐ Copies sold: 5 since 1972 ☐ Cost: $595

ANSWER SOFTWARE CORP.
SEE AD ON PAGE 336
☐ RBUG86
Displays/modifies memory and I/O ports. Supports dual display adaptors and external terminal or uses screen swapping to preserve application display. Loading/symbolic support for PCDOS, PLINK86, and Intel object formats. Symbolic assembler/disassembler, macros, command/macro execution on breakpoints, floating point, EGA and EMS support.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $395

AWARD SOFTWARE, INC.
☐ CROSS-CHEX
Diagnostic test for data and computers. Visual feedback on eight tests. Runs diagnostics on diskette drives, Winchester disk, video display, RAM memory, video memory, ROM character generator, printer and keyboard.
IBM PC, AT, XT ☐ 128 KB req. ☐ Copies sold: 2,500 since 1984 ☐ Cost: $99

☐ PC/DOS-Test
Validates computer's design and OS implementation for PC compatibility.
IBM PC, XT, AT ☐ Copies sold: 25 since 1983 ☐ Cost: $11,000-$22,000

AWARECO
☐ Active Trace
BASIC development tool, debugger and learning aid. Variables and functions followed and displayed, with current value and line number on screen, printer or disk. Disk file combines with word processor to find source of error and display circumstances surrounding occurrence.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $80

CIPHERLINK CORP.
☐ Any/QA
Enters test data into application to review performance and accuracy. Tests terminal emulation, screen handling and keyboard manipulation. Prepares audit trails and documentation of screen output and Any-generated keyboard input.
IBM PC ☐ 640 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $8,950

CITADEL COMPUTER CORP.
☐ CMX-900
ROM resident general purpose monitor and debugging utility configured for CMX-820 80C88 CPU. Upload/download capability for system testing and development. Access memory and I/O ports. Map system configuration. Breakpoints and TRACE support.
IBM PC ☐ 256 KB req. ☐ Cost: $200

COMPLETE SOFTWARE, INC.
☐ CDÉBUG
C-language debugger.
IBM PC ☐ Cost: $300

COMPUTER INNOVATIONS, INC.
☐ C1 PROBE
For use with C-86 C Compiler. Single-step traces through C and Assembly codes. Full macros. Sets breakpoints. Views and/or alters C variables during execution. Breaks into program while debugging. Offers source code windows while stepping through code. Configures symbol tables or source window sizes.
IBM PC ☐ 192 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $225

CONCURRENT SCIENCES, INC.
☐ Hard-Scope
Interactive, source-level, symbolic debugging tool which accelerates software development on hardware target system. Accesses program variables and Assembly level debugging. Source code interface and on-line listings.
IBM PC, XT, AT

☐ Soft-Scope
Source-level debugger. Uses symbolic references to examine and test code. Supports 8087 Numerical Data Processor. Inserts breakpoints at machine addresses, line numbers and execution labels.
IBM PC, XT, AT ☐ Cost: $500-$995

CYBERNETIC MICRO SYSTEMS
☐ Simulator/Debugger for IBM PC
Executes and debugs code for single chip microcomputers.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $295-$995

DATA BASE DECISIONS
SEE AD ON PAGE 337
☐ Periscope
Reviewed Jan 85 p. 88; Jan 86 p. 29; Mar 86 p. 65.
Memory-resident symbolic debugger. Model I includes breakout switch and write-protected RAM board for crash recovery. Model II contains breakout switch for spontaneous debugging. Model II-X contains software only.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $118-$298

DATA BASED SOLUTIONS, INC.
☐ dCRef
Writing/debugging for dBASE II, dBASE III, and dBASE III+ program files in paginated listings. Cross-reference of variables by name contained in dBASE II files.
IBM PC ☐ 64 KB req. ☐ Copies sold: 610 since 1983 ☐ Cost: $15

DUBERT INTERNATIONAL, INC.
☐ Atlas Syntax Verifier
Identifies and corrects syntax in accordance with IEEE Std 716-1982 C/Atlas test language. Activates verifier as statements are created on keyboard. Enables verification of large foreign files. On-screen prompting flags error.
IBM PC ☐ 256 KB req. ☐ Copies sold: 16 since 1985 ☐ Cost: $400

Here's why you should choose Periscope as your debugger...

You'll get your programs running fast.

"It works great! A problem we had for three weeks was solved in three hours," writes Wade Clark of MPPi, Ltd.

You'll make your programs solid.

David Nanian says, "I can't live without it!! BRIEF, a text editor my company wrote, would not be as stable as it is today without Periscope."

You'll protect your investment.

We won't forget you after the sale. You'll get regular software updates, including a FREE first update and notice of later updates. You'll get technical help from Periscope's author. And you'll be able to upgrade to more powerful models of Periscope if you need to. One Periscope user writes, ". . . your support has won over even the heart of this hardened programmer!"

PERISCOPE

The Periscope Company, Inc.

(Formerly Data Base Decisions)

14 Bonnie Lane, Atlanta, GA 30328, 404/256-3860

You deserve the best.

Thousands of programmers rely on the only debugger that PC Tech Journal has ever selected as **Product of the Month** (1/86). You owe it to yourself to find out why, first hand.

You can try it at no risk.

You get an unconditional 30-Day, Money-Back Guarantee, so you can't lose.

Start saving time and money now — order toll-free, 800/722-7006.

Use MasterCard, Visa, COD, or a qualified company purchase order. As one user puts it, Periscope is "one of the rare products, worth every penny!"

Periscope I, software, manual, protected memory board and breakout switch	$295
Periscope II, software, manual, and breakout switch	$145
Periscope II-X, software and manual	$115

Add shipping - $3 US; $8 Canada; $24 elsewhere. Ask about air shipment if you can't wait to get your programs up and running!

P.S. Watch for Periscope III, the new hardware-assisted debugger with real-time traceback and breakpoints! Available December, 1986.

CIRCLE NO. 285 ON READERS SERVICE CARD

FIRST SYSTEMS CORP.

☐ MicroSCOPE Debugger
Source level symbolic cross debugger. Permits direct connection of real-time target systems to IBM RT. Processes Intel object module formats for compatibility with in-circuit emulators.
IBM RT

JOHN FLUKE MANUFACTURING CO., INC.

☐ TechproPC Tester
For use with Fluke's 9005A or 9010A Micro-System Troubleshooter and 8088 Microprocessor Interface.
IBM PC ☐ Cost: $1,500

GENESIS MICROSYSTEMS

SEE AD ON PAGE 373

☐ APXLOD
Uses Intel SBC-957 monitor to debug target system.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $450

☐ GeneScope/PC
Reviewed Jan 1985 p. 88.
Macros, on-line assembly, disassembly and trace with scrolling, simultaneously supporting separate screens for debug and source-file viewing during debug session.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $8,995

GIMPEL SOFTWARE

☐ PC-Lint
Diagnostic facility for C programming language. Reports on bugs, glitches and inconsistencies. Supports K&R C and ANSI extensions. Supports user-modifiable library definition files for most major compilers. Turns messages on and off, globally and locally.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,500 since 1985 ☐ Cost: $139

GRID SYSTEM CORP.

☐ Debug
Uses Grid User Interface commands, windows and menus. Symbolically displays and modifies structured array and record variables. Sets breakpoints at program statement numbers and displays status information about application tasks.
IBM PC

HEWLETT-PACKARD CO.

☐ Diagnostics
Designed to check out all system functions.
IBM PC

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ COBOL Interactive Debug XT/370
IBM no. 5734-CB4/01.
IBM XT/370

☐ FORTRAN VS Interactive Debug XT/370
IBM no. 5668-903/01.
IBM XT/370 ☐ Cost: $1,152

☐ Professional Debug Facility
Reviewed Mar 1985 p. 60.
IBM no. 6024-143. Realtime interrupt capability with Non-Maskable interrupt (NMI) card and four types of windowing including trade, disassembly, memory display and co-processor. Dual full-screen support for color and monochrome displays.
IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Cost: $150

IBM PERSONALLY DEVELOPED SOFTWARE

☐ DOS Enhanced Debug
IBM PDS no. 6276-594. Assists in developing programs. Provides full-screen environment for monitoring and controlling program execution. Displays and alters memory, code or any register. Runs all or part of any program to help diagnose any problem. Monochrome and color EGA support.
IBM PC, XT, AT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $25

INTEL CORP.

☐ ICE (In-Circuit Emulators)
Reviewed Jan 1985 p. 88.
Aids in shortening hardware/software debug and integration phases of projects.
IBM PC

☐ PScope, DOS PScope, XENIX PScope-286, iRMX PScope-86
Traces execution at statement, procedure, source or machine instruction level. Makes source patches using HLL-like syntax and creates debug macros.
IBM PC ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $800-$1,400

LATTICE, INC.

SEE AD ON PAGE 279

☐ C-Sprite
Symbolic debugger. Features help screens, macro capabilities, command files, conditional commands, and debugging through communications port and support for PLINK86 overlays.
IBM PC ☐ 128 KB req. ☐ Cost: $175

MCGRAW-HILL CCIG SOFTWARE

☐ X-VIEW 86
Software analyzer. Profiles internal operations of each application. Identifies execution hotspots, program segment usage, system memory map references, I/O port calls, software interrupt calls and instruction set usage. Requires PC DOS Debug or MS-DOS Debug.
IBM PC, XT, AT, PCjr ☐ 30 KB req. ☐ Cost: $60

MERIDIAN SOFTWARE SYSTEMS, INC.

☐ C Debugger
Source level debugger for use with C compiler. Supports conditional breakpoints, subprogram traces, single stepping and full C variable reference syntax.
IBM PC

☐ Pascal Debugger
Source-level debugger for use with Pascal compiler. Supports conditional breakpoints, subprogram traces, single-stepping and full Pascal variable reference syntax.
IBM PC

MICRO-SOFTWARE DEVELOPERS

☐ Cdebugger
Source-level debugger for Lattice C, Microsoft C and Computer Innovation C89. Sets, displays and deletes multiple breakpoints on C line level. Sets execution trace on function, C line and machine instruction level. Displays or sets memory registers. Disassembly.
IBM PC, AT, 3270 PC ☐ 256 KB req. ☐ Cost: $165

MICROPLOT SYSTEMS

☐ UnPlot
Reads picture files saved using PC-PLOT and interprets Tektronix 4010 commands. Prints commands in terms of move to X, Y and draw to X, Y. Prints control codes. Diagnoses system problems.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $40

MICROTEC RESEARCH, INC.

SEE AD ON PAGE 304

☐ Symbolic Debuggers
Interactive debugging tool for microprocessor programs. Executes object modules of target microprocessor, interactively or in batch mode, in host development system controlled environment. Performs interpretive execution of microprocessor's object modules by implementing, in software, registers and logic functions of each processor.
IBM PC ☐ 64 KB req. ☐ Introduced: 1975

MICROTECH INTERNATIONAL

☐ Bug Zapper
Hardware/software debugging tool.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $195

MICROWAY, INC.

SEE AD ON COVER 3

☐ 87 Verify
Verifies 8087 accuracy. Performs stress test which causes errors when 8087 environmental problems including overheating, inadequate decoupling or low voltage occur.
IBM PC, XT, AT ☐ Cost: $49

☐ 87Debug
Debugger with 8087 support. Displays and sets 8087 registers. Displays and enters real numbers stored in memory. Traces user's own commands. Avoids tracing through subroutine calls and interrupts. Sets breakpoints in code or on guarded addresses.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $150

MORGAN COMPUTING CO., INC.

☐ Advanced Trace86
Symbolic debugger and Assembler interpreter. Traces execution of compiled program. Programs specific conditions for breakpoints. Directly edits in Assembly and saves code as .com or .exe file.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $175

☐ Trace86
Reviewed May 1984 p. 110.
Disassembler trace debugging tool. Toggles between program output and constant display of machine registers, flags, stack, address calculations, data in memory and the 8088 Assembler version of object.
IBM PC, AT, XT, PCjr ☐ 128 KB req. ☐ Copies sold: 2,500 since 1983 ☐ Cost: $39

PECAN SOFTWARE SYSTEMS, INC.

☐ Symbolic Debugger
IBM PC, XT, AT ☐ Cost: $50

PERENNIAL

☐ C Compiler Validation Suite
Tests functions of C compiler according to The C language, Kernighan and Ritchie and ANSI C Standard. Library, compile time, link time and execution time tests. CPU utilization for each test case.
IBM PC ☐ 1,000 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $10,000

PHOENIX COMPUTER PRODUCTS CORP.

☐ Pfix86 Plus
Multi-window symbolic debugger with breakpoint and trace facilities. Source code and Assembly language translations displayed.
IBM PC, XT, AT ☐ Cost: $395

QUINCY STREET CORP.

☐ PPS (Personal Programming System)
Produces test programming. Permits simultaneous test program development by multiple users. Includes tools for preparation, analysis, syntax checking and documentation. Downloads/executes programs and images when used with GenRad 2225 or 2235 testers.
IBM PC ☐ 512 KB req. ☐ Copies sold: 6 since 1985 ☐ Cost: $5,995

RAYTRONICS

☐ PC-DEBUG
Loads and runs any DOS-compatible exe program. Assigns stock size during load. Examines, modifies and sets breakpoints for any loaded program. Disassembly and trace facilities. 10 breakpoints with multiple passes.
IBM PC ☐ 8 KB req. ☐ Cost: $95

RDT SOFTWARE

☐ **Bugscreen**
Reviewed Jan 1985 p. 88.
Symbolic debugger for Assembly programming language. Provides windows for source listing, registers/flags, stack and selected memory. Highlights changes on screen. Interrupts execution on checkpoint conditions. Allows debugging at source level. Displays data as decimal, hex or character.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $95

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ **PC957**
Debug monitor firmware for Intel SBC. Works with PCSBC and RTCS/UDI.
IBM PC ☐ Copies sold: 860 since 1983 ☐ Cost: $750

SDD, INC.

☐ **DCATS (Data Communication Applications Test System)**
Tests on-line application software residing in mainframe, intelligent workstation, message switch and cluster controller. Result verification.
IBM PC ☐ 320 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $75,000

SLT, INC.

☐ **PC Doc**
Diagnostic tool for troubleshooting motherboard faults to component level. Provides 3-trace digital scope. Tracks diagnostic work by work order number. Maintains data base of previously repaired computers.
IBM PC, XT

SOFTADVANCES

☐ **DSD86 (Dynamic Screen Debugger)**
Debugging tool with user interface. Overlapping windowing system. Supports source level debugging and handles FORTRAN, C and Pascal. Offers symbolic memory, register and stack displays. Reads MAP files for symbol information. Command interface capabilities include control flow, macros and configurable keyboard.
IBM PC ☐ Cost: $70

☐ **DSD87 (Dynamic Screen Debugger)**
Source level debugging. Overlapping windowing system. Offers symbolic memory, register and stack displays. Command interface capabilities include control flow, macros and configurable keyboard. Supports 8087 numeric coprocessor. Shows current state of coprocessor's flags and floating point registers to 18 digits of precision.
IBM PC ☐ Cost: $100

SOFTWARE DEVELOPMENT FACTORY

☐ **dBFind**
Designed to find bugs in dBASE command files. Lists syntax errors. Generates cross and single module cross references.
IBM PC ☐ 128 KB req. ☐ Cost: $99

SOFTWARE RESEARCH ASSOCIATES

☐ **CapBak**
Keystroke capture and playback system. Capture and playback modes can be used simultaneously.
IBM PC, XT, AT ☐ 15 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $575

☐ **IBM PC BASIC Validation Test Suite**
Interpreter/compiler validation. Tests include versions of NBS Minimal BASIC Test Suite. Tests confirm standard language capabilities, analyze end cases and identify significant exceptions for language features.
IBM PC ☐ Copies sold: 10 since 1984 ☐ Cost: $4,500

☐ **O-Scope**
Visual and dynamic display of test trace files. Requires SRA-built software instrumentation system such as TCAT/C or TCAT/Pascal.
IBM PC, XT

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ **Interactive Evaluation**
Evaluates software quality using 16 criteria. User compiles data base of criterion oriented responses, numerical ratings are then calculated. Summarizes scores from several raters statistically.
IBM PC ☐ Cost: $99

SYSTEMS & SOFTWARE, INC. (CA)

☐ **SoftProbe/PC**
Debugger for PC application software that operates on multi-user host development system while controlling and monitoring program execution on PC.
IBM PC ☐ Cost: $4,750

VISUAL AGE

☐ **CodeSmith-86**
Reviewed May 1984 p. 110; Jan 1985 p. 88.
Multi-window symbolic debugger. Full-screen 8086/88/186 machine language disassemblies can be scrolled through, commented, searched and breakpointed. Built-in multi-line patching symbolic assembler. AutoBrowse window allows single-stepping of high-level source code.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $145

WALLSOFT SYSTEMS, INC.

☐ **dFlow**
Speeds debugging of dBASE systems. Reads source PRG files and produces flow diagrams. Cross references all modules in system. Builds variable concordance.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $129

WORDTECH SYSTEMS, INC.

SEE AD ON PAGE 321

☐ **dB/Debugger**
For dBASE II programs. Compatible with WordTech's dB Compiler syntax. Sets execution breakpoints by file and line or executes a file line by line. Diagnostics and on-line help menu.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $240

DISASTER RECOVERY

CHI/COR INFORMATION MANAGEMENT, INC.

☐ **Recovery/1**
Maintains disaster recovery plan. Relational data base design. Accesses/stores company and personnel profiles, equipment forms, recovery teams and action plans. Forms-oriented data entry. Project management orientation. User-defined reporting.
IBM PC

EDP SECURITY, INC.

☐ **Disaster Plan/80**
Provides structure for development, implementation, maintenance and testing of EDP disaster recovery plan.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1979

EXECUTIVE COMPUMETRICS, INC.

☐ **Model Disaster Recovery Plan**
Plan for coordinated off-site processing of central site on-line and batch processing after total loss of normal data processing services. Time-sequenced decision points. Fill-in-the-blank format for custom-tailoring and maintenance. Multiple data forms, check lists, and keyword indexing.
IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 8 since 1984 ☐ Cost: $7,000

MECTEL INTERNATIONAL, INC.

(division of American Mitac Corp.)

☐ **Playback**
Data recovery system that protects WIP from accidental loss. Makes video tape of work. Replays entries at fast, slow or character-by-character speed. Features auto mode. Plays back work once or continuously and can serve as demonstration tool.
IBM PC, PCjr, XT, AT ☐ 64 KB req. ☐ Cost: $50

ROBERT L. NICOLAI

☐ **BASIC Program Mender**
User can reconstruct and rewrite lost files. Reads tokenized BASIC file or protected file.
IBM PC ☐ 64 KB req. ☐ Copies sold: 5 since 1986 ☐ Cost: $20

SOFTWARE INTEGRATION, INC.

☐ **Bakup**
Reviewed Mar 1986 p. 78.
Backs up, restores and manages information transferred from hard disk of IBM PC or compatible. Creates catalog data base containing directory information needed to restore any or all versions of changed files. Prints management reports that document what has been backed up, where and how frequently.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 26,000 since 1984 ☐ Cost: $180

TAMP COMPUTER SYSTEMS, INC.

☐ **DRS (Disaster Recovery System)**
Methodology including generic procedures, questionnaires, interoffice memos, external letters and all instructional information necessary to complete disaster recovery project. Formatted disaster recovery plan.
IBM PC ☐ 256 KB req. ☐ Copies sold: 5 since 1986 ☐ Cost: $7,500

DISK/TAPE/FILE UTILITIES

A & T SYSTEMS, INC.

☐ **DMS (Disk Management System)**
Disk and file management. Recovers lost data. Locates/reorganizes information. Realigns fragmented files. Customizes file attributes. Ensures file readability. Erases file or group of files. Executes applications. Browses and edits hex information. Performs rename, search, sort and wipe.
IBM PC, XT, AT ☐ Cost: $99

ACS

☐ **Flirt**
Fixed-length file editor evaluates and corrects data files. Examines files for consistent fields and field lengths and corrects records. Allows user to edit or create files and add records.
IBM PC ☐ 64 KB req. ☐ Cost: $295

AIMS+PLUS, INC.

☐ **Datatools**
Data file and disk management utilities. Add-on module for AIMSPLUS. Functions include purge and migrate, AIMS tools, disk copy and maintenance. Performs search, sort and batch update.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $800-$1,000

☐ **Printools**
Allows data from multiple files and records within file to be combined and printed in one of several report formats. Combines 69 records on single report page. Prints information from several files at once. Performs math calculations while printing.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $800-$1,000

A. K., INC.

☐ **UTIL**
Data file handler for data base processing, mailing lists, letters, labels and other preformatted material. English-like commands retrieve and print data records, or copy and reformat them onto another file.
IBM XT/370, AT/370 ☐ 40 KB req. ☐ Copies sold: 4 since 1972 ☐ Cost: $595

ALLIED COMPUTER GROUP, INC.

☐ DOS Partner
Features include flagging individual or group files for copy and deletion, changing attributes of files, viewing files in either direction and sorting user's directory. Hides and protects valuable files.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $40

ALPHA LOGIC BUSINESS SYSTEMS, INC.

☐ Locksmith/PC
Bit copier backs up copy protected software. Edits disk track sector, file and directory. Features file encryption, decryption, restoration, disk recovery, creation of protected diskettes and search replace of data.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 4,000 since 1985 ☐ Cost: $80

ARMOR SYSTEMS, INC.

☐ Excalibur Plus Import Data Utility
Accepts standard ASCII files containing unlimited amounts of data. Lets user design templates which import data desired for Excalibur Plus IC, AR, AP and customer information/data base management applications.
IBM PC

ASTRO CORP.

Information Technology Division

☐ SCAN
System management tool for disk and file maintenance.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1981 ☐ Cost: $99

AVCOM, INC.

☐ Safe-Gard Disk Security System
IBM PC, XT

AWARD SOFTWARE, INC.

☐ Crossave
File utility. Copies and restores data from/to Winchester disks to floppy diskettes when file is larger than capacity of floppy diskette. Operates as file backup, or as backup/restore for contents of entire Winchester disk.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $99

BOS NATIONAL, INC.

☐ Tape Dump Restore
IBM PC, XT, AT ☐ Cost: $100

BROWN BAG SOFTWARE

(division of Software Resource Group)

☐ File Recovery System
File recovery with drive management, full-screen editor and control functions. Changes file's attributes and disk labels, modifies screen color and locates lost file.
IBM PC ☐ 128 KB req. ☐ Cost: $70

BUSINESS-PRO

☐ SAV KEY
Backup utility for IBM and compatible hard disk computers. Keeps track of backups by type, date, time and location. Produces reports for backup accountability control. Includes preprinted labels, status reports and restore feature.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $90

C SOURCE, INC.

☐ EC
Multiple files, print formatting, DOS interface, paths, keystroke macros, file merge, screen-handling, search/replace, word-wrap and reformatting. Reads WordStar document files. Supports dBASE II files. Customizable on-line menu reference system. Saves and reloads editing environment.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $50

CALIFORNIA SOFTWARE PRODUCTS, INC.

☐ BackPak
Backs up and restores hard disk data on PCs. Copies and reports new or modified files since last backup. Indicates how many fresh diskettes are required for new data. Formats diskettes. Verifies correct copying. Includes California 10 Pak and DOS shell.
IBM PC ☐ 256 KB req. ☐ Copies sold: 109 since 1985 ☐ Cost: $175

CENTRAL POINT SOFTWARE

☐ Copy II PC
Disk backup utility. Uses all available memory to make archival backups of most protected software with no parameter changes. Includes drive speed check and bulk erase. Runs business programs from hard disk without inserting their original in drive A.
IBM PC ☐ 64 KB req. ☐ Copies sold: 220,000 since 1983 ☐ Cost: $40

☐ PC Tools
Memory resident utility. Includes undelete files, search disk for file, search file for text, view/edit any sector on disk.
IBM PC ☐ 64 KB req. ☐ Copies sold: 15,000 since 1985 ☐ Cost: $40

CHALCEDONY SOFTWARE

☐ Scout
Memory resident disk directory utility. Controls directories and printers without leaving working program. Features pop up windows. Formats floppy disks from within resident programs. Removable from memory without rebooting.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $50

CHANNELMARK

☐ Disk Quick
Optimizes disk performance by re-assembling fragmented files.
IBM PC ☐ Cost: $60

☐ FileClerk
Saves up to 500 files in single master for archival purposes.
IBM PC ☐ Cost: $50

☐ Retriever
Builds index of every character in data file to aid searches from 3 to 45 Character strings.
IBM PC ☐ Cost: $80

CIVILSOFT

(division of The Technical Group, Inc.)

☐ Collect
Transfers files collected with field data collectors to COGO-PC and COGO-80/86 file formats. Requires Lietz SDR2, Wild GRE3, Nikon DR-2 or Topcon FC-1 field data collectors.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $290

COGITATE, INC.

☐ COGTREE Utilities
Hard disk backup. Consists of cogtree.exe, cogdir.exe, cogbkup-.exe, cogrstr.exe, cogbatch.exe and cogx.exe. Provides graphic tree display. Performs directory search and selection. Packages commands or batch commands to single file.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 800 since 1984 ☐ Cost: $130

COLORCORP

☐ ColorBIZ PC-Saver
Insures clean drives and diskettes.
IBM PC ☐ Cost: $15

COMPUTER SYSTEMS CONSULTANTS

☐ Disk and Basic Utility Programs
Disk utility programs for 6809 FLEX. Locates strings in and edits disk sectors interactively. Tests diskettes for CRC errors/bad links. Linearizes free list. Sorts, rewrites, lists and accumulates disk catalogs. Resequences some or all of BASIC programs.
IBM PC ☐ Cost: $50-$100

CONCEPTUAL SOFTWARE, INC.

☐ Prodas/Standalone
Required to obtain power of PRODAS/Statistics and/or PRODAS/Graphics without PRODAS/DATABASE. Reads and writes disk files from other products and transfers them into PRODAS data base and processes them. Exports reports by transfering generated PRODAS data base into data file for target system.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $110

CORE INTERNATIONAL

☐ Gigafile
Stretches files and/or directories to 1 GB. Allows files to expand across 8 physical storage devices. Accommodates 100,000 grid pages and 10,000 squares per page. Requires Core International's 40, 56 or 72 MB drives.
IBM PC, AT

COUGAR MOUNTAIN SOFTWARE

☐ LYNX
Data file translator reads into or out of CMS's files.
IBM PC ☐ Copies sold: 500 since 1983 ☐ Cost: $495

CYAN CO., INC.

☐ RPCE Software
Reads perforated tape into PC, punches tape from PC, verifies tapes against one another and supports tape editing. Sets user-defined RS232C parameters. Converts to and from ASCII format.
IBM PC, XT, AT ☐ Cost: $895

CYBERENGINEERING CORP.

☐ CyberTools Disk Utilities Library
COM file sets default drive. Disk cleaning exerciser. Inspects and patches sectors. Patches to Diskcopy for production copying. Disk cataloging. Examines and modifies directories. Creates batch file for copying files. RAM and electronic disk support. Directory manipulation. Tests disk drive.
IBM PC

☐ CyberTools Files Utilities Library
DOS file maintenance and modification. Changes file attributes. Converts EXE and COM files to ASM. Squeezes hex files. Catalogs and prints diskette labels. Sorts directory. Compares 2 directories and listing file. Inserts/deletes CR and LF in files.
IBM PC

DATA CONSULTING GROUP

☐ DATA*EASY PC File Utilities
Displays, prints or edits user data files. Compresses files, displays diskette contents, deletes files or records, displays data in 4 formats, changes function keys and displays ASCII graphics characters. Lets user set up printer fonts and features.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $48

DESIGN SOFTWARE

(division of Design Systems, Inc.)

☐ DSBackup
Reviewed Mar 1986 p. 78.
Screen oriented backup/restore utility which can work to/from any logical DOS device. Not copy protected.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1985 ☐ Cost: $70

DIGITAL PATHWAYS, INC.

☐ Disk P.M. (Disk Preventative Maintenance)
Diagnoses and condenses hard disks.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $50

DUTCHTREAT SOFTWARE, INC.

☐ Files
Dual-window display of files. Sorts a directory four ways. Forward and backward paging. Directory and attribute control.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $50

DYMEK CORP.

☐ Rid-A
Evaluates 7 operational parameters to determine disk drive ability to function within manufacturer's specifications and interchange data with similar systems.
IBM PC

DYNACOMP, INC.

☐ DFILE
Diskette organizer. Locates any file or program. Each diskette assigned 4-character ID. List of files maintained on diskette. Maintains data base. System used on single/double density and single/double-sided drives.
IBM PC ☐ 8 KB req. ☐ Cost: $20

DYSAN CORP.

☐ Interrogator
Reviewed May 1985 p. 142.
Drive diagnostics and analysis. Evaluates performance of computer's disk drives without need to disassemble machine or use other test equipment. Checks read/write head alignment, ability to read and write without errors and drive's spindle speed. Manual/drive testing.
IBM PC, XT ☐ 48 KB req.

ELITE SOFTWARE DEVELOPMENT, INC.

☐ Best Friend
Allows DOS commands to be single key menu selections. File services include copy, delete, rename, view, sort and spool files. Disk services include format, copy and compare disks. I/O options, printer output redirection, typewriter and scientific/business calculator. Pops up behind application program.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $85

☐ P-File
Routes printer output to disk file. Applications programs that usually only print reports to printer can now print reports directly to disk.
IBM PC ☐ 56 KB req. ☐ Copies sold: 800 since 1983 ☐ Cost: $49

☐ P-SPOOL
Prints contents of file while other program is being used.
IBM PC ☐ 56 KB req. ☐ Copies sold: 750 since 1983 ☐ Cost: $29

☐ PC-Sweep
Single keystroke commands include copy, rename, delete, sort, view, print and tag. Displays drive directory. Protects user from invalid drive designators. Displays disk parameter information and tagged and untagged files.
IBM PC ☐ 56 KB req. ☐ Copies sold: 650 since 1984 ☐ Cost: $49

ELLIAM ASSOCIATES

☐ BOBCAT 3
Catalogs disk files. Records disk number, user area or subdirectory, and file name, type and size. Additional file or disk information can be added. Prints all or select portion of catalog in various formats.
IBM PC ☐ 48 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $50

ELLICOTT SOFTWARE, INC.

☐ DataCare
Backs up hard disks to diskettes to protect against hard-disk failures. Backs up just-changed files. Ensures diskettes' integrity through 3-way verification. Controls re-use of diskettes. Maintains diskettes catalog.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 600 since 1985 ☐ Cost: $99

EMERALD SYSTEMS CORP.

☐ TIE (Tape Import/Export)
Downloads data from mainframe tape off line. Converts to ASCII, Lotus 1-2-3, dBASE III, DIF and CSV. Allows preselection of download data.
IBM PC, AT

ENSIGN SOFTWARE

☐ Electronic Disk
Creates equivalent of disk drive in excess memory. Memory drive created to be 320KB for DOS 1.1 and 640KB for DOS 2.x. All DOS commands treat electronic disk same as a regular floppy diskette or hard disk drive. Includes print spooler.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $50

EVEREX SYSTEMS, INC.

☐ Streaming Tape
Conducts file-by-file operations at close to streaming speed. Performs backup on multiple tapes. Places multiple backup sessions on same tape. Includes movable, nesting windows and on-line help.
IBM PC, XT, AT ☐ Cost: $150

REPRINTS AVAILABLE

When an article about your product or company appears in this magazine, you can order custom-designed reprints for national publicity and promotion!

Reprints are perfect promotional tools for:

- Trade Shows
- Mailings
- Press Releases
- Sales Kits
- Point-of-Purchase Displays *and more!*

Ziff-Davis Publishing Company will work with you in creating a custom designed reprint* of the article or review covering your product! We'll handle all the details and even incorporate the reprint into promotional material supplied by your company.

For more information, write or call:
Jennifer Locke–Reprints Manager, Ziff-Davis *Publishing* Company, One Park Avenue New York, NY 10016 212-503-5447.

*Minimum quantity—500 reprints.

Hard Disk Drive Integration and Diagnostics Software

SpeedStor

Go Beyond the 32Mbyte DOS barrier . . .

EFFORTLESSLY!

- Integrate virtually ANY hard disk drive
- From 10 to 320Mbytes
- Into ANY PC, XT, AT or Compatible
- 100% DOS Compatible

$99

Dealer and distributor pricing available

Storage Dimensions
408-370-3304
14127 Capri Drive Suite 1 Los Gatos CA 95030

Here are a few of SpeedStor's many features:

- Friendly, menu-driven programs
- Select from internal table of over 100 drive types
- Increases data throughput speed up to 30%
- Replaces advanced diagnostics, FDisk and Format
- Up to 8 user-defined partitions
- Files as large as 160Mbytes
- Comprehensive diagnostics
- Batch mode for simple, unattended operation
- Flexible interleave
- Media analysis
- Park heads
- Data security features, install read-only partitions
- Custom file structure for improved disk performance
- Comprehensive, step-by-step manual

PC, XT and AT are registered trademarks of IBM. SpeedStor is a trademark of Hexis Design

CIRCLE NO. 176 ON READERS SERVICE CARD

E-X-E SOFTWARE SYSTEMS

☐ DOS200LS

Collection of 35 utility programs. Allows user to directly examine and alter computer's RAM and the contents of disks, perform various text-file filtering, and test the run-time efficiency of your program code.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $99

EXECUTIVE SYSTEMS, INC. (CA)

☐ X-Tree

Reviewed Jul 1986 p. 167.

Graphic file and directory handling. Accesses, copies, deletes, renames, views, moves, lists or prints any and all files within any and all directories.

IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $50

FIFTH GENERATION SYSTEMS, INC.

SEE AD ON PAGE 343

☐ Fastback

Reviewed Oct 1985 p. 31; Mar 1986 p. 78.

Backs up any size hard disk onto floppy disks. Creates file-oriented backup with imbedded error correction.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 55,000 since 1985 ☐ Cost: $179

FORD SOFTWARE

☐ Diskcat-5

Reads up to 32,000 file names. Adds category and description to each entry. Prints all or part of catalog sorted by file name, extension size, date or by disk or category. Prints directory-listing labels. Allows manual entry for nonDOS disks.

IBM PC, AT ☐ Cost: $69

FOX RESEARCH, INC.

(subsidiary of ComGen Technology)

☐ 10-NET RM/COBOL Runtime

Allows RM/COBOL users to share files and lock records of common files with concurrency control while operating on the FOX 10-NET LAN system. Permits programs compiled for MSDOS/PCDOS with any version of RM/COBOL, to access common data sets in a multi-user environment. Implements Ryan/McFarland COBOL, Version 2.0.

IBM PC ☐ 35 KB req. ☐ Introduced: 1985 ☐ Cost: $495

GENERIC COMPUTER PRODUCTS, INC.

☐ Archive

Allows binary and text files to be saved in one file. Creates an archive file whose contents can be listed, updated, appended, extracted or deleted. Date, time and comments may be added.

IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $35

☐ Catalog-Master

Disk cataloging program. Provides selection criteria and file descriptions for master directories sorted by file name. Output directed to user's terminal, line printer or disk file.

IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $40

☐ CP/M Utilities Disk 1

Features H19 text screen list and graphic screen saved by line numbers. Provides enhanced file manipulation for copying, renaming and listing files. Recovers pie file after system abort. Displays file in hex and ASCII format. File copy/verification.

IBM PC ☐ 32 KB req. ☐ Introduced: 1984 ☐ Cost: $30

☐ Disk Patch

Disk dump/patch. Full-screen editing. Disk information displayed in ASCII and hex formats based on absolute track/sector locations. User can select specific sector or search for specified data values. Useful for restoring damaged directories or fixing corrupted disks.

IBM PC ☐ 32 KB req. ☐ Introduced: 1984 ☐ Cost: $40

☐ File-Patch

File dump/patch. Full-screen editing. File contents displayed by logical blocks within file. Data displayed in ASCII and hex formats by selecting specific block or searching for specified data values. Makes patches to binary program files.

IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $40

GENESIS MICROSYSTEMS

SEE AD ON PAGE 373

☐ NET

Datalink program which transfers files in either direction between Intel and IBM PC.

IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $200

GLENCO ENGINEERING, INC.

☐ SUPER DUP

Allows in-house duplication of diskettes. Completes read/write verification during duplication. Counter tracks number of successful targets produced. Maximum number of tracks duplicated is user-settable. Diagnostics program for disk drive maintenance available. Compatible with Glenco Engineering's copy protection products.

IBM PC, XT, AT ☐ 440 KB req. ☐ Introduced: 1983 ☐ Cost: $99

GOLDATA COMPUTER SERVICES, INC.

☐ Your Move

Allows data to be shared between programs. Captured data from first program becomes input to second program without rekeying. Macro capability.

IBM PC ☐ Cost: $60

GOLDEN BOW SYSTEMS

☐ California 10 Pak

Utilities to interrogate files, compare files, browse around memory, sort files, disassemble programs and provide DOS shell for functions such as time, date, path, lock key status and command history.

IBM PC ☐ Cost: $75

☐ FiXT

BIOS interface for hard disks and controllers. Boots system from hard disk, formats drive and partitions it. Operates with disk equipment from Davong, Datamac, Great Lakes, Percom, Tandon, Tecmar, VR Data, Xebec and Zobex.

IBM XT ☐ Cost: $80

☐ FiXT/B PLUS, FiXT/B PLUS/AT, FiXT/B PLUS/PC2

Hard disk BIOS for IOMEGA disk cartridge systems. Boots OS directly from removable cartridge. Defines partitions for nonOS use. Bootable cartridges may operate program/data storage, interchange with existing disks or be copied onto other disks.

IBM PC, XT, AT ☐ Cost: $95 (B PLUS, B PLUS/PC2); $110 (B PLUS/AT)

☐ V CACHE

Caches up to 16 MB of expanded memory, extended memory or one-half MB of normal memory of fixed disk data. Transfers cached sector chains to user's program. LRU algorithm identifies and prioritizes sector chains vs. single sector accesses.

IBM PC, XT, AT ☐ Cost: $65

☐ V feature and V feature Deluxe

Reviewed May 1986 p. 94.

Partitions hard disk to 12 33MB (V feature) or 12 280 MB (V feature Deluxe) logical volumes. Treats 2 physical devices as 1 logical device. Single file can span 2 drives (Deluxe only). Multi-level security. Password- or write-protect for individual volumes. Diskette access/keyboard lock out.

IBM PC, XT, AT ☐ Cost: $80 (V feature); $120 (V feature Deluxe)

GRAND MAX SOFTWARE CORP.

☐ Filemax

DOS file system backup, directory management and data defragmentation. Provides data compression, file encryption, data validation and on-line directories of stored file archives. Allows cut and paste of visually displayed directory tree.

IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $80

GUARANTEED SOFTWARE

☐ Arkive

Tracks and archives files. Manages storage. Searches and retrieves files based on subject matter, creating program and dates. Creates and maintains file information data base. Archives obsolete files to archive media. Supports file versions.

IBM PC ☐ Cost: $80

HEWLETT-PACKARD CO.

☐ Tape Backup System

Designed to protect data from system interruptions or loss of files.

IBM PC, XT, AT

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ DEF/36 (Diskette Exchange Facility/36)

IBM no. 5799-CCN. Interchanges data between IBM S/36 Model 5360 and 5362 8-inch diskettes and IBM S/36 Model 5364 5.25-inch diskettes. Utilizes PC virtual disk areas and transfers images as PC files directly on AT or via interim storage.

IBM PC, XT, AT ☐ 48-256 KB req. ☐ Cost: $325

☐ File Transfer 3270-PC Attachment

IBM no. 5799-WXJ. File transfer. Exchanges files between IBM 3270-PC Attachment for 3278 Display Station and IBM 8100 DPPX/SP system.

IBM 3270-PC

☐ Fixed Disk Organizer

IBM no. 6024-111. Command/instruction processing. Performs complex sets of IBM, DOS commands and instructions. Options created can be stored and retrieved for later use by single keystroke. Accesses application program on fixed disk and returns to main menu.

IBM PC, XT ☐ Cost: $50

IBM PERSONALLY DEVELOPED SOFTWARE

☐ DOS File View

IBM PDS no. 6276-593. Views files without invoking editor. Searches for specific words/characters. Reads files in 64KB segments with single command. ASCII or hexadecimal display. Assigns program commands to any function key. Chooses different screen colors to view files when using color display. Color EGA support.

IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $20

☐ Executive Phone Directory - Build Your Own

IBM PDS no. 6276-524. Builds company or organization directories from other files down-loaded from host. Supplies Executive Phone Directory and Executive Phone Directory With Message Feature users with compact files of organization directories. Color EGA support.

IBM PC, XT, AT, Portable PC, 3270-PC ☐ 128 KB req. ☐ Cost: $150

☐ File Facility

IBM PDS no. 6276-530. Selects file placement. Accesses files across subdirectories. Redefines search path at any time. Remains permanently available once loaded into memory. Color EGA support.

IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $20

☐ FileCommand II

IBM PDS no. 6276-558. Manages files using file directory with multi-line command area. Sorts files by size, date created or saved, alphabetical listing or drive and directory path. File and directory scrolling. Assigns DOS commands to function and alt keys to issue multiple commands. Color EGA support.

IBM PC, XT, AT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $20

☐ Object Library Maintenance

IBM PDS no. 6276-543. Permits individual object files to be combined into one library file so that DOS linker program can process them as single file rather than individually. Lists library file contents. Saves diskette space. Rebuilds libraries to remove unused modules. Color EGA support.

IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $20

Imitation is the sincerest form of flattery.

But for *fast* backups, FASTBACK* is still the only choice

It seems that everyone with a floppy-based hard disk backup program is comparing themselves to **FASTBACK*** these days. Well, we're flattered.

The Industry Standard

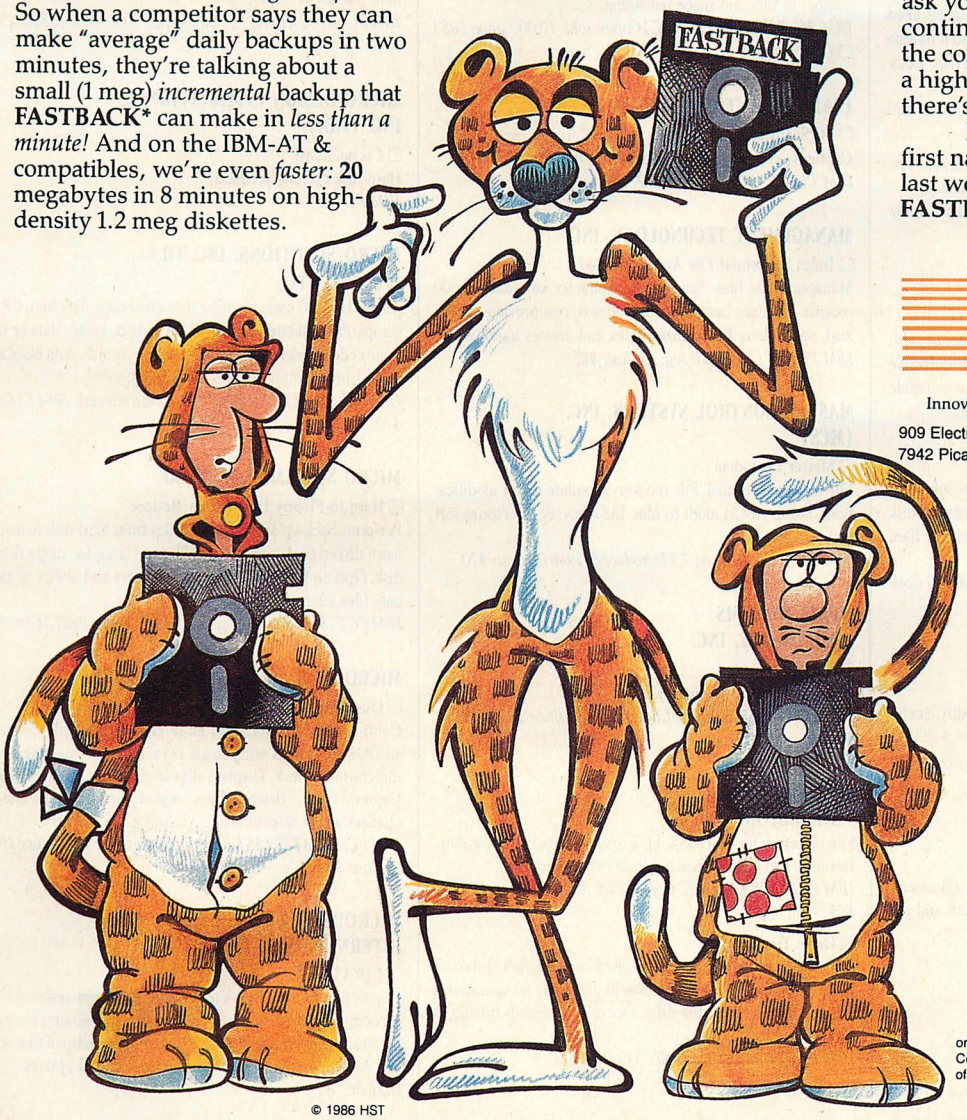
After all, with the majority of *Fortune 500* companies *standardized* on **FASTBACK***, it's only natural for our competitors to compare themselves to us. Problem is, there's no comparison.

The *fastest* backups, period.

FASTBACK* can back up a *full* 10-megabyte hard disk in less than 8 minutes flat on standard 360K floppy diskettes! *No other program can even come close to matching our speed.* So when a competitor says they can make "average" daily backups in two minutes, they're talking about a small (1 meg) *incremental* backup that **FASTBACK*** can make in *less than a minute!* And on the IBM-AT & compatibles, we're even *faster:* **20** megabytes in 8 minutes on high-density 1.2 meg diskettes.

Simple power.

You won't find **FASTBACK*** cluttered with "file management" utilities and complex options to slow you down. **FASTBACK*** is a sleek, powerful program designed for *one purpose:* to safely back up and restore the vital data on your hard disk *as fast as possible.* Easy-to-understand prompts, interactive screen display and full wildcard naming conventions give you total flexibility to make full, partial or incremental backups quickly and easily.



Error-correction vs. "disk mapping"

Some of our erstwhile flatterers try to make a virtue of the fact that they use standard DOS disk format for backups and "map out" bad sectors. But that won't do anything for disks damaged *after* the backups were made. **FASTBACK***'s special brilliance is a proprietary format that not only allows each disk to receive *more* data *much* faster than DOS, it also encodes Advanced Error Correction information that allows your vital data to be recovered *even if you staple, scratch or mutilate your finished backup* (tolerates up to 80 damaged sectors per disk)!

You get what you pay for.

The one thing *all* our imitators say is, they're *cheaper* than **FASTBACK***. And they are. So we ask you: since **FASTBACK*** continues to sell more copies than all the copycats put together — even at a higher price — don't you suppose there's a reason?

Find out for yourself why the first name in fast backups is still the last word on the subject. Get **FASTBACK*** today.

CIRCLE NO. 134 ON READER SERVICE CARD

☐ SuperC
IBM PDS no. 6276-575. Shows text differences in document files. Generates output for application programs. Compares ASCII and non-ASCII data files. Uses unlimited file sizes. Audits files for changes. Creates change activity reports. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $20

☐ System Support Package
IBM PDS no. 6276-580. Consists of DOS File View, File Command II, Personal Print Control and Super C.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $55

☐ Utilities I
IBM PDS no. 6276-517. File Compress and Expand compresses files in place, creates compressed backups and expands files to original size for processing. DOS Command Retriever manipulates commands and provides abbreviations for frequently entered commands to save keystrokes. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $20

☐ Utilities II
IBM PDS no. 6276-520. File Locater locates and displays files by dates of entry, paths or sizes. Backup and Unmark handle file maintenance. DOS Tree Display searches for subdirectories by graphically mapping each subdirectory as it occurs alphabetically. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $20

☐ Utilities III
IBM PDS no. 6276-574. Sort reorders files according to character, hex or ASCII values. Loadram and Saveram handle file transfer. Compare shows file differences. Errorlog signals need for preventative maintenance on diskette drives. Patch routine simplifies correcting of com and exe files with patch files. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $20

☐ Utilities Package
IBM PDS no. 6276-546. Consists of DOS File Tracker, The StarProof Bridge, Utilities I, Utilities II and File Facility.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $57

INTERSECTING CONCEPTS, INC.

☐ File Mate
Integrated file maintenance program. Copies files between different word processing programs, repairs files with defective end-of-line sequences, detects and processes non-printable characters, and displays the exact contents of a file.
IBM PC ☐ Cost: $30

☐ Media Master
Disk-to-disk format conversion. Accesses programs and data from CP/M and MSDOS. Reads, writes and formats 70 disk formats. From within one program, displays directories or files, copies and erases files.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 15,000 ☐ Cost: $40

J. L. SCHULLER & ASSOCIATES

☐ Filemaster
Disk utility. Includes file mode, display, print, modify, sector mode, browse and search.
IBM PC ☐ Cost: $40

J & M SYSTEMS, LTD.

☐ Memory Minder
Reviewed May 1985 p. 142.
Tests disk drives to monitor long-term drift of head alignment, index hole timing, spindle speed, hysteresis, azimuth and eccentricity.
IBM PC ☐ Cost: $79-$99

K PLUS L SOFTWARE

☐ DiskView
MSDOS disk and file management program. Provides directory management, graphical subdirectory tree displays, file locating and editing and erased file recovery. Lists files alphabetically or by file extension. Can change any byte in a binary or text file.
IBM PC ☐ 192 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $40

KOCH SOFTWARE INDUSTRIES, INC.

☐ PC Sweep
Utility that searches files and provides memory usage of files. Sorts through designated memory devices. Tracks edited/unedited files.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $80

KOLOD RESEARCH, INC.

☐ HTest/HFormat
Hard-disk testing/controller-level formatting. Displays location of tracks in which error was encountered and error code itself. Maintains up to 10,000 errors in memory. Formats/tests each track of hard-disk unit for default minimum of 32 times.
IBM PC, XT, AT ☐ Cost: $90

LASSEN SOFTWARE, INC.

☐ Diskette Manager II, Plus
Reads directory from each diskette and prepares catalog with user-provided comments. Each catalog stores information for up to 200 diskettes. Provides cross-reference and wild card searches. Prints labels with six lines of comments, creation date, number of files and space remaining.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $40-$80

LEARNING AUTOMATION, INC.

☐ PC Snapshot
Captures screen display and saves it as disk file.
IBM PC, XT, PCjr ☐ Cost: $49

MANAGEMENT TECHNOLOGY, INC.

☐ Index Sequential File Access Method
Manages index files. Supports 30 character keys and 32,000 records. Routines include read, readnext, readprevious, write, load, and delete. Reorganizes index and creates initial index.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $25

MASTER CONTROL SYSTEMS, INC. (MCS)

☐ Master Custodian
File management tool. File recovery, absolute sector modifications, hex or ASCII mods to files, file recovery directories sort and backup tool.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $70

MEDIA SYSTEMS TECHNOLOGY, INC.

☐ Format Manager
Generates formats on diskette.
IBM PC ☐ 128 KB req. ☐ Copies sold: 36 since 1979 ☐ Cost: $4,950

MICHTRON, INC.

☐ DI-RECTORY
File directory for MSDOS 2.11. Lists and sorts by size or date. Reverses sort order. Locates file anywhere on drive.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $25

☐ Drive Timer Plus
Adds password security to files. Redates, renames, lists and prints directories. Copies or moves files. Checks for operational status of drive. Times disk drive's speed and records timings to disk.
IBM PC ☐ Introduced: 1985 ☐ Cost: $25

☐ Super Directory
Disk cataloging system. Attaches 25 character description to each file name.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $40

☐ SUPER ZAP
Traps and corrects disk errors. Displays disk tracks in hex and ASCII formats. Reads any combination of single and double sided disks with 8 or 9 sectors.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $50

☐ TRANSFER
Transfers data between TRS-80 Models I, III, 4 or 4P and MSDOS diskette. Converts TRS-80 BASIC programs to include necessary spaces required by MS-BASIC. Saves programs in ASCII form.
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $60

MICRO ANALYST, INC.

☐ Mac Zap
Copies protected disks. Reads, analyzes, edits and writes. Hard disk compatible. Provides windows for disk control, disassembly, graphics, hex/ASCII display, file information, volume information and file/disk recovery.
IBM PC ☐ Cost: $60

MICRO CONCEPTS, INC.

☐ Digitizing Overlay
Hard disk management tool. Stores and retrieves large numbers of programs or data files. Creates various levels of security. Features file commander, file generator, scratchpad, time manager and time-log recorder.
IBM PC ☐ 192 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $143

MICRO DESIGN INTERNATIONAL, INC. (MDI)

☐ Cache/Assist
Hard disk caching program.
IBM PC, XT

MICRO SOLUTIONS, INC. (IL)

☐ UniForm - PC
Allows IBM PC users to utilize data on or copy data from CP/M compatible diskettes. Supports ASCII text, binary data or program code. Works with word processing records, data bases and spreadsheets. Supports 110-160 formats.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $70

MICRO SYSTEMS SOFTWARE

☐ Hard-to-Floppy Disk Dump/Restore
Performs back-up and restore of files from hard disk to one or more diskettes. Accommodates files too large for single floppy disk. Options include wild card characters and ability to copy only files after specified date.
IBM PC ☐ 8 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $50

MICRO-Z CO.

☐ Direc-Tree
Controls files/directories on large hard/floppy disk. Operates all DOS commands using single keys. Includes tree diagram of directories on disk. Displays files in directory, sorted 8 ways. Copies, views, deletes files, makes new/renames/erases/changes active directories.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $50

MICROBRIDGE COMPUTERS INTERNATIONAL, INC.

☐ CPYATZPC
Copies files from hard disk to 320/360 KB floppy disks on high capacity 1.2 MB diskette drive. Calculates checksum for each file during copy procedure. Transfers related group of files with one copy operation. Copies files using wildcard options.
IBM PC, AT

MICROCOMPUTER CONCEPTS, INC.

☐ McFormat
Adds to hard disk capacity by allocating space in smaller units than PCDOS.
IBM XT ☐ Cost: $50

MICROTASK, INC.

☐ Virtual/Volume/Manager
IBM PC ☐ Cost: $50

MICROWAY, INC.

SEE AD ON COVER 3

☐ DCache
Caches hard disk or floppy diskette using Intel Above Board, MicroWay's Megapage or conventional memory. Stores repetitively used tracks in memory. Memory selected can be selected in 64 KB banks.
IBM PC, XT, AT ☐ Cost: $49

☐ Dfixer
Checks for and solves bad sectors on hard disk. Checks unallocated sectors only eliminating data destruction. Changes file allocation table to indicate bad sector.
IBM PC, XT, AT

MIX SOFTWARE

☐ ASM Utility
Allows user to link object files created by Microsoft's MASM or M80 assemblers.
IBM PC ☐ Cost: $10

MLI MICROSYSTEMS

☐ Disk Mechanic
Backs up protected diskettes and works with protection schemes. Repairs diskettes. Exhibits hidden files. Restores deleted files. Determines physical location of each file on disk. Permits any byte of any sector of file to be examined, repaired, or changed.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $70

MORGAN COMPUTING CO., INC.

☐ Disk Toolkit
Floppy and hard disk utility for recovery of erased or damaged files. Allows examination of and changes to all files or sectors and the directory and file allocation table.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $75

MULTIPRO

☐ CATalog II
Diskette librarian. Reads/maintains cross-referenced index of disks/files. Reads/supports PCDOS V2.0 tree-structured directories. Supports 7,000 files on 320KB disk with any number of volumes. 40 character comment field for each volume and file.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,789 since 1983 ☐ Cost: $70

NEW GENERATION SYSTEMS, INC.

☐ BRX
Hard disk backup program that handles files larger than one floppy disk, backing up only changed files and selective file restoration.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $195

☐ Disk Maker
Formats, reads, writes and duplicates over 350 floppy disk formats including CP/M, PCDOS, MSDOS, UNIX and TurboDOS. Supports dedicated word processing formats such as Wang, DECmate II, Xerox, and such phototypesetting formats as Compugraphic's MCS.
IBM PC ☐ 256 KB req. ☐ Copies sold: 350 since 1983 ☐ Cost: $1,095

ROBERT L. NICOLAI

☐ BASIC Program Printer
Reads any BASIC program file from disk whether saved in ASCII, tokenized or protected BASIC. Outputs file to a printer, disk or video display. Types source in normal or condensed mode at 6 or 8 lines per inch. Multiple copies available.
IBM PC ☐ 64 KB req. ☐ Copies sold: 40 since 1985 ☐ Cost: $20

NORTH AMERICAN BUSINESS SYSTEMS, INC.

☐ MEMORY/SHIFT
Partitions memory and holds 9 programs in memory simultaneously. Offers data transfer between software programs already in use by user. Supports 2 monitors, all levels of MSDOS and EGA color card.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20,000 since 1983 ☐ Cost: $99

NOSTRADAMUS, INC.

SEE AD ON PAGE 240

☐ Hardrunner
Allows user to run Lotus 1-2-3 version 1A, Sidekick and Symphony version 1.0 from hard disk without having to place system diskette in drive A. Does not copy or make alterations to any copyrighted Lotus program.
IBM PC, XT, AT, 3270-PC ☐ 64 KB req. ☐ Copies sold: 12,000 since 1984 ☐ Cost: $50

ONTRACK COMPUTER SYSTEMS, INC.

☐ Disk Manager
Initializes, partitions and prepares ST-506 disk drives. Aids installation and addition of drives to systems. Provides automatic or customized installation. Permits multiple partitions and selectable interleave value for each partition.
IBM PC, XT, AT

☐ Disk Manager-N
Attaches ST-506 disk drives to file server using Novell. Initializes, partitions and prepares drives. Allows automatic or customized installation. Permits multiple partitions and selectable interleave value for each partition.
IBM PC, XT, AT

PARAGON COURSEWARE

☐ DiskOrder
Organizes files. Simplifies mass copies between sub-directories. Checks file dates and copies only most recent versions. Locates files, returning paths.
IBM PC ☐ 128 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $25

PCX

☐ Read-CP/M
File transfer to inspect directory of CP/M-86 diskette and transfer most or all files onto MSDOS diskette.
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $75

PEARLSOFT, INC.

☐ File Load Utility
For use in bringing ASCII files from external software into Personal Pearl relational data base.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $100

PECAN SOFTWARE SYSTEMS, INC.

☐ Advanced File System
IBM PC, XT, AT ☐ Cost: $60

☐ Disk Recovery Toolkit
IBM PC, XT, AT ☐ Cost: $30

☐ XenoFile
IBM PC, XT, AT ☐ Cost: $30

PERSONAL BUSINESS SOLUTIONS, INC.

☐ Dpath+Plus
Allows programs running in one disk directory to access data files located in other directories. Supports file name aliasing and virtual drives. Protects from accidental formatting of hard disks by DOS format command. Can be deactivated/reactivated. Searches up to 128 different directories.
IBM PC, XT, AT ☐ 4 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $45

PERSONAL COMPUTER SUPPORT GROUP, INC.

☐ Disk+
Disk storage. Uses such other computers as Apple or IBM PC as disk storage device. Saves files from RAM to diskette and loads files from diskette to RAM via single function key. Transfers files.
IBM PC ☐ Cost: $70

PHOTON SOFTWARE

(division of Care Computer Systems)

☐ Media Magician
Full-disk editor. Works on volume names, file allocation tables, directories, sub-directories, boot tracks, mode bytes and file areas. Hex or ASCII input. Displays clusters allocated to specific file, bit map of F.A.T. disk structure dynamics and file names.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $49

PICO PUBLISHING

☐ Browse
Scans text files page by page, left, right, home and end. Makes no changes to files.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $10

☐ Diskmate
User can list string of file names on 1 command line. Reports progress of program. Contains multcopy and multdel for replacing DOS copy and erase commands. Eliminates repeated commands. User can quit command with 1 keystroke.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $10

☐ G-DIRECT
Lists directory of hard disk or diskettes. Sorts on file name, extension, date or size. Shows disk space used by set of files and amount of free space on given drive.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $10

☐ G-Whiz
File manager. Displays menu of files on given drive or directory. Copies, moves, deletes or prints indicated files. Sorts files by name or extensions.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $10

☐ New View
Includes Dump and Showable. Dump reads file and displays characters in hexadecimal format. Shows ASCII characters on side. Showable reads file and displays only printable characters.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $10

☐ Slicers
Chunk breaks files into smaller parts based on line count input. PULLCOL extracts columns from file. PRINTL extracts every n'th line from file where N is interval. Truncate trims every line in file to specific length.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $10

POLARIS SOFTWARE

☐ Crunch
Reduces graphic file sizes to meet LaserJet and LaserJet Plus memory requirements. Eliminates unnecessary commands.
IBM PC, XT, AT ☐ Cost: $50

POPULAR PROGRAMS, INC.

☐ DOS Help
On-line assistance for PCDOS and MSDOS. Features extra commands such as backup, restore, and the ability to search directories and alphabetize files.
IBM PC, XT, AT, 3270-PC, PCjr ☐ Cost: $40

☐ Pop-Up PopDOS
IBM PC, XT, AT, 3270-PC, PCjr ☐ 128 KB req. ☐ Cost: $40

POWER UP

☐ **Disk Quick**
Reassembles fragmented files and restores file handling speed. Sorts files and directories by name, extension, date/time or length. Spots failing sectors and moves affected data to new location on disk. Marks failing sectors so they will not be used again.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Cost: $60

☐ **File Clerk**
Organizes storage of data files. Places up to 500 files in single master file and allows user to attach descriptive note to each individual file. Displays notes and original file names on screen. Locates notes by words or phrases.
IBM PC, XT, AT, PCjr ☐ 192 KB req. ☐ Cost: $50

PROBITY, INC.

☐ **Genu**
Multi-function disk utility. Supports diskette or hard disk. Provides display sorted directories. Displays files or absolute sectors with option to change for making changes in hex or character on same screen. Includes search files or absolute sectors for hex or character searches.
IBM PC, XT ☐ 32 KB req. ☐ Copies sold: 23 since 1983 ☐ Cost: $45

THE 'PUTER GROUP

☐ **PC-Transfer**
Transfers files in batch to MCS disk. Handles files up to 150,000 characters. Utility breaks larger files into smaller sizes. User-definable keys. Includes Replace data conversion program.
IBM PC ☐ Cost: $695

QUADRAM

(subsidiary of Intelligent Systems Corp.)

☐ **Quad Master III**
Accesses files stored on QuadRAM disk drive. Requires Quadboard, Quadboard II, or Quad 512+. Functionally identical to single-sided or double-sided disk drive using part of computer's memory as solid-state disk drive. Only variable is number of memory blocks.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $20

QUAID SOFTWARE, LTD.

☐ **CopyWrite**
Makes backup copies of commercially distributed software. Provides backup copies of IBM PC software, including copy protected software. Not copy-protected.
IBM PC, AT, XT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **Disk Explorer**
Examines and displays disk contents. Changes formats, corrects bad tracks, restores deleted files, displays and changes file allocation tables and directories and displays odd formats. Reviews sector IDs and spacing. Displays sectors in ASCII or hexadecimal and changes sector contents.
IBM PC, XT, AT PCjr ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $75

☐ **ZeroDisk**
Runs copy-protected business packages from user's hard disk without requiring a key disk in floppy drive. Revised monthly to add new packages and to track changes in copy protection. Not copy protected.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $75

READIWARE SYSTEMS, INC.

☐ **ReadiScope**
Reviewed May 1985 p. 142.
Diagnostic program that analyzes current status of diskette drive. Tests completed without requiring removal of disk drive. Adjustments to head and spindle hub alignment made without special equipment, skills or knowledge.
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $295

REALIA, INC.

SEE AD ON PAGE 295

☐ **RealFILE**
Supports sharing of indexed files among multiple machines. Central journal communicates task record locks, current positions, and block alterations. Files not controlled via journal may be accessed exclusively or shared among multiple machines.
IBM PC, XT, AT, 3270 PC ☐ Cost: $295

☐ **Spacemaker**
Compresses .EXE and .COM format executable files. Reduces programs with large data or stack segments. When executed, compressed programs expand and relocate, recreating original program. Replaces EXE2BIN and converts any .EXE program to .COM, providing compressed version is smaller than 64KB.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,250 since 1982 ☐ Cost: $75

REFERENCE TECHNOLOGY, INC.

☐ **Clasix STA/F File**
Read-only optical disk file manager. Raises PC data capacity to mainframe levels. Supports file size up to 4 GB. Interfaces with CLASIX STA/F Key and CLASIX STA/F Text.
IBM PC, XT, AT ☐ 32 KB req. ☐ Introduced: 1985

RIGHT ON PROGRAMS

☐ **Disk-It**
Categorizes and catalogs software. Performs job by subject, title, grade level and computer.
IBM PC, XT, PCjr ☐ 48 KB req. ☐ Copies sold: 2,000 since 1981 ☐ Cost: $50

SAMKHYA SOFTWARE CORP.

☐ **SWEEP'r**
Protects sensitive data from recovery. Cleans deleted files from any disk. Cleans around active files, leaving file intact. Cleans entire disk with 1 command. Cleans away all drafts of deleted documents.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $40

SBT CORP.

☐ **.dBackup II**
Combines main menu with room for nine data base programs, inserts password for each program, provides backup of hard disk on to multiple floppies of any capacity.
IBM PC ☐ Cost: $45-$65

SOFCAP, INC.

☐ **H.D. Tuneup**
Disk optimization. Divides disk into directory and file areas, collects subdirectories and moves them close to root directory.
IBM PC, XT, AT, PCjr ☐ 196 KB req. ☐ Cost: $40

SOFTFOCUS

☐ **BTree**
Creates b-tree indices for data files. Determines key and record contents in each file. Random and sequential file processing. Deleted space automatically reclaimed. Applies key value and long data record pointer to each index entry. K & R standard C, Lattice C, Aztec C, DeSmet C and Microsoft C compatible.
IBM PC, XT, AT ☐ Introduced: 1984 ☐ Cost: $75

☐ **ISAM Driver**
BTree Library interface. Applies identical format to calls and requires only integer descriptor of file system and pointer to its structure to read and write from. Updates indices upon any key value changes. Supports definitions for multiple indices.
IBM PC, XT, AT ☐ Copies sold: 1,000 since 1984 ☐ Cost: $40

SOFTLOGIC SOLUTIONS, INC.

☐ **Cubit**
Data compression/disk expansion. Reduces number of bytes required to store file, then converts file back to original size when retrieved.
IBM PC ☐ Cost: $50

☐ **Disk Optimizer**
Collects files and organizes them on disk. Disk analysis, password protection and file examination.
IBM PC, XT, AT ☐ 18 KB req. ☐ Copies sold: 40,000 since 1985 ☐ Cost: $50

SOFTWARE MASTERS (IN)

☐ **Calc-Pad**
RAM-resident calculator. Hex, octal, binary and decimal. Works in any graphic mode. Unlimited parenthesis nesting.
IBM PC, AT, XT, PCjr ☐ Cost: $50

☐ **Data-Path**
Sets up paths to find data and overlay files.
IBM PC, AT, XT, PCjr ☐ Cost: $50

☐ **Flash**
Increases speed of disk access.
IBM PC, AT, XT, PCjr ☐ Cost: $70

☐ **MoreHard**
Increases hard disk space.
IBM PC, AT, XT, PCjr ☐ Cost: $50

☐ **Super-Ram-Disk**
Sets up multiple RAM disks.
IBM PC, AT, XT, PCjr ☐ Cost: $50

THE SOFTWARE STORE

☐ **Mastersweep**
Disk file maintenance utility. Accesses disk directories/files. User can find, view, copy, print, rename, move, delete or tag files.
IBM PC ☐ 64-128 KB req. ☐ Introduced: 1986 ☐ Cost: $49

SOFTWARE STUDIOS, INC.

☐ **Stripper: Global File Editor**
Finds and replaces up to 100 word strings in one pass, writing out the edited file. Strips carriage returns, word processing commands or characters within a file, replacing them with another set of commands or deleting them entirely.
IBM PC ☐ Cost: $125

SOFTWARE SYNERGY, INC.

☐ **Respond/ETU 34/36/38 File Transfer**
Transfers capabilities between PC running RESPOND/5251/12 Remote and IBM S/34/36/38. Transfers all files including text or binary. Runs by PC disk drives in host environments. Transfers and prints simultaneously.
IBM PC ☐ 256 KB req.

THE SOFTWARE TOOLWORKS

☐ **Super Zap**
Makes system patches and repairs damaged data. Combines menu control with 2D screen interaction. Allows full screen display of disk records by absolute sector number or by file and sector. Displays data in hex, octal or ASCII.
IBM PC ☐ 48 KB req. ☐ Introduced: 1980 ☐ Cost: $25

STERLING SOFTWARE

Dylakor Division

☐ **DYL-IB**
Performs daily backup of files that have been changed or informs user of elapsed time since last backup. Maintains index including time of last backup, number of backup copies and age of backup. Runs other programs during backup. Full-screen editor.
IBM PC, XT, AT ☐ 256 KB req.

STOK SOFTWARE, INC.

☐ BackRest
Intelligent hard disk to floppy backup and restore. Handles sparse files and splits large files. Provides fault tolerant restore and bad sector lockout. Traps system and user errors.
IBM PC ☐ 48 KB req. ☐ Copies sold: 20,000 since 1982 ☐ Cost: $180

SUMTECH, LTD.

☐ MISS (Multiple Index Search Services)
Manages data file indexing. Allows programmer to develop data base programs in languages including BASIC, Assembly, C, FORTRAN and Pascal. Provides simultaneous access to 250 indices.
IBM PC ☐ Introduced: 1985 ☐ Cost: $70

SUPERSOFT, INC.

☐ Disk Doctor
Recovers crashed diskettes. Verifies diskettes and locks out bad sectors. Copies whatever can be read from crashed file. Copies diskettes and replaces bad sectors with spaces. Recovers erased files and displays directory of recoverable erased files.
IBM PC ☐ 48 KB req. ☐ Introduced: 1981 ☐ Cost: $250

☐ Disk Edit - The Professional Programmer's Disk Utility
Screen-oriented disk editor. Examines/alters files that cannot be examined with normal text editor. Provides raw information in hex and ASCII. Scrolls through information and alters it using text editing commands. Allows back and forth movement between hex and ASCII windows.
IBM PC ☐ 32 KB req. ☐ Introduced: 1982 ☐ Cost: $100

SYSTEM FACILITIES, INC.

☐ XPIP-Integrated Utility System
Lists files on the printer or monitor with several formatting options. Renames and deletes files. Sets or clears the MSDOS hidden, system, read-only and archive file attributes or all CP/M attributes. Searches files for the occurrence of a string. Compares two files of any type.
IBM PC ☐ 44 KB req. ☐ Copies sold: 275 since 1984 ☐ Cost: $30

SYSTEMS AND SOFTWARE, INC.

☐ FASTCOPY
Allows PERSTOR hard disk system user to make usable Winchester copy backups. Copies between PERSTOR's fixed Winchesters to portable Winchester 12 MB removable cartridge drives. Provides security.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $65

TACHYON CORP.

☐ Nibbler
Reviewed Jul 1986 p. 168.
Manipulates disk and memory data at sector level. Recovers erased files. Renames directories. Gathers lost data in memory and stores on disk. Collects and saves sectors from disk with trashed directory. Transfers files from formatted diskettes to DOS disks.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $50

TALL TREE SYSTEMS

SEE AD ON PAGES 207/209

☐ JETDRIVE
Creates RAMDisk. Contents of RAMDisk are not damaged by warm re-boot. Includes JET file transfer utility. Selects files by date, presence in list or presence of earlier versions.
IBM PC, XT ☐ 192 KB req. ☐ Introduced: 1983 ☐ Cost: $60

☐ JFORMAT-2
Reviewed Jan 1984 p. 66.
Supports dual, quad, 8-inch and high-density diskette drives. Accommodates 22 formats. Permits 4 drives on 1 machine. Stores 800 KB on standard diskettes using 96 tpi drives and diskette controller.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $60

TALLGRASS TECHNOLOGIES CORP.

SEE AD ON PAGE 137

☐ Backtrack
Reviewed Mar 1986 p. 78.
Backs up files from user's hard disk to backup device. Runs in background allowing user to continue processing as usual. Backs up entire hard disk or only some directories. Can exclude files from backup and splits files. Restores files in any order.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $129

TECHNISOFT

☐ File Savior
ASCII and hexadecimal data. Recovers erased files and salvages data from damaged disks. Displays, searches and modifies EBCDIC files.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $50

3COM CORP.

☐ 3+Backup
Provides tape backup/restore using 3Server tape units. Insures data integrity on network server disks. Allows preprogramming for scheduled backup. Handles backup for multiple servers to single tape unit across network.
IBM PC, XT, AT ☐ Introduced: 1986

TRAVELING SOFTWARE, INC.

☐ T-backup
All information in one bank of user memory is transferred to or from cassette simultaneously including all BASIC, text and machine language fields.
IBM PC ☐ 8 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $20

TRISYSTEMS

☐ DC (Directory Copy)
Copies any MSDOS hard or soft disk. Checks dates so new files are not replaced with older ones. Copies directories with or without paths. Optionally prints date and time of files being copied.
IBM PC

☐ SRCOM (Source Compare)
Compares 2 sources and prints lines which are different, along with line numbers associated with file. Realigns files once there are more than 5 lines found which look alike.
IBM PC

UNIQUE AUTOMATION PRODUCTS, INC.

☐ LINK
Communications file transfer to move binary or text files between mixed or matched computers using standard ports. Reliable protocol corrects line errors and compresses transmitted data. Files are ready to be used as stored, with no conversion necessary.
IBM PC, XT ☐ Copies sold: 1,000 since 1982 ☐ Cost: $250-$1,500

UNITED SOFTWARE SECURITY, INC.

☐ Take Two
Reviewed Jun 1986 p. 198.
Backs up information stored on hard disks. Formats backup floppies automatically. Allows customization. Preset defaults. Allows for configuration to change status of specified files, directions or backup frequency. Restores file, directory or hard disk with full-screen displays.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1986 ☐ Cost: $165

VERICOMP

☐ Micro VMS
Virtual memory for programs designed to Lotus/Intel/Microsoft expanded memory specification. Uses fixed disk or RAM disk to simulate one or more expanded memory boards. Supports Lotus 1-2-3, Symphony, SuperCalc 4 and Reflex. Adjustable size of virtual memory set up from 64 KB to 4 MB.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $75

VICTOR TECHNOLOGIES, INC.

☐ Hard Disk Tool Kit II
Creates non-standard hard disk configurations, remaps bad tracks, and performs hard disk diagnostics. Defines and initializes additional hard disk configurations. Identifies, logs, and replaces defective media. Runs hard disk confidence test of new unit when hardware errors are suspected. Reformats and protects hard disk.
IBM PC ☐ 128 KB req. ☐ Cost: $195

WESTLAKE DATA CORP.

☐ SafetyNet
File recovery system. Recovers files or subdirectories of files that were accidentally erased. Provides preventive measure. Recovers data from accidentally reformatted hard disk.
IBM PC ☐ Cost: $50

XIDEX CORP.

☐ Investigator
Diagnostics for testing performance of flexible disk drives. Test profile checks read/write accuracy, spindle speed, static head alignment, timing of index to data, azimuth head rotation, dynamic head alignment and disk centering.
IBM PC ☐ Cost: $35

DOCUMENTATION GENERATORS/AIDS

CAINE, FARBER & GORDON

☐ PDL/81 (Program Design Language)
Aids software design and documentation. Controls page layout. Provides security banners with document classification and sheet count. Defines primary/secondary keywords and layout/characteristics of segment types. Generates table of contents, document indexes and cross-references.
IBM PC ☐ Cost: $5,700

COMMUNICATIONS SCIENCES, INC.

☐ Explain System
For writing, maintaining and viewing manuals. Creates manual linked to any program or set of programs. Combines text editing facilities with data base structure. Template screens create user manual, printing functions, and documentation data base.
IBM PC ☐ 256 KB req.

ELECTRONIC RESEARCH ASSOCIATES, INC.

☐ Wizeman
Produces disk-based manuals and tutorials. Provides interpreter and text/graphic editor. Defines concepts and illustrations. Uses pointing device.
IBM XT, AT ☐ 512 KB req. ☐ Introduced: 1986 ☐ Cost: $2,000

GENERAL DATA SYSTEMS, LTD.

☐ Dx Documentation Generator
Maintains text extracted for selective composition. Uses elements from data bases, including tables, reports on parts of other documents, as text for composition purposes. Provides word processing output. Performs on global or selected basis.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

HAVENTREE SOFTWARE, LTD.

☐ Interactive EasyFlow
Graphics program for preparing and maintaining flowcharts and organization charts. Creates charts up to 16 shapes wide by 16 shapes high. Provides editing, three levels of zoom, text centering and line routing. Requires IBM PC compatible graphics adapter.
IBM PC ☐ 384 KB req. ☐ Copies sold: 2,000 since 1985 ☐ Cost: $150

P. C. STAT, INC.

☐ ASAP Flow-Chart System

Allows 12 flow-charting symbols, connecting lines and arrows. User inserts, deletes and edits text or figures. Outputs charts to any printer with EPSON graphics.

IBM PC, XT, PCjr ☐ 128 KB req. ☐ Cost: $55

SOFTOOL CORP.

☐ FORTRAN Programming Environment

Shorthand language, structured languages, source code auditor and documenter, interface documenter, error detectors, libraries of pre-fabricated code, testing and tracing aids, optimizers, dynamic memory managers, flow analyzers and mini-mainframe to PC communications.

IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 1,500 since 1980

TRANSACTION SYSTEMS, INC.

☐ ADG (Automatic Documentation Generator)

Develops outline and answers series of questions regarding items in that outline. Organizes and controls input of text while maintaining a documentation log. Revision and update control for documents and automatic notification letters. Prepares boiler plate information.

IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 128 KB req. ☐ Cost: $350

TULSA COMPUTER CONSORTIUM

☐ BASIC Aids Student

Generates program documentation. Menu selections include modular program source listing, double sorted line cross-reference map, sorted index of BASIC statements including variable names, and program table of contents. Generates list of changes while new program file is created.

IBM PC ☐ 160 KB req. ☐ Introduced: 1982 ☐ Cost: $39

PolyLibrarian

The Premier Object Module Library Manager

For serious programmers and professional programming teams, PolyLibrarian is an essential tool. If you already have a primitive librarian such as MS-LIB, you will realize a dramatic improvement in your productivity by switching to PolyLibrarian. You can make your linking process more efficient by organizing and managing code with PolyLibrarian because you can effectively control programs with large numbers of object modules. PolyLibrarian lets you create libraries from related object modules. Your linker will then select only the modules necessary to produce an executable file. You can also organize, modify and reconstruct existing libraries of object modules. You can even change the public names in object modules to resolve conflicts without access to the source code. You can create object module libraries using C, Pascal, Assembler, FORTRAN, Ada, Basic, COBOL and other languages that run under MS-DOS and produce compatible object modules. Compatible with compilers and assemblers that produce object modules compatible with the MS-DOS (IBM PC) Linker, PLink86, PLink86 Plus or other compatible linker. Requires MS-DOS 2.0 or higher. PolyLibrarian ($99) supports Microsoft format libraries. PolyLibrarian II ($149) supports both Microsoft and Intel format libraries.

For complete details write for the POLYTRON Programmer's Catalog. Also refer to review in PC Tech Journal, Oct. 1984 issue.

$99

"It is no small feat for a microcomputer program that costs $99 to hold its own against a supermini program that costs many thousands or tens of thousands of dollars. PolyLibrarian is one software product that can't be outgrown."

Kuryan Thomas
PC Tech Journal

POLYTRON®

High Quality Software Since 1982

CIRCLE NO. 281 ON READERS SERVICE CARD

LIBRARIANS

APPLIED MANAGEMENT SYSTEMS, INC. (MD)

☐ Microcomputer Based Configuration Management System (CMS)

Maintains acquisition, location, vendor, maintenance and documentation information on user's hardware and software. Provides management reports including insurance listings.

IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1985 ☐ Cost: $500

☐ Microcomputer Clearinghouse System (MCS)

Central directory of applications. User can create catalog of applications developed by different offices within organization. Tracks submission dates, testing dates and release dates. Prints in various formats.

IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1985 ☐ Cost: $1,500

GENERAL DATA SYSTEMS, LTD.

☐ Dx Source Librarian

History of activity against each member, directory management, program restoration, password, rename copy, global editing, security, COBOL macro facility, formatting program generation, cross-reference keyword abbreviations and installation-defined standards.

IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

GENESIS MICROSYSTEMS

SEE AD ON PAGE 373

☐ CREF86

Cross-reference listing of modules and libraries show where each symbol is defined and referenced.

IBM PC, XT, AT ☐ 192 KB req.

☐ LIB86

Combines program modules into a single library file for use with Genesis LINK86.

IBM PC, XT, AT ☐ 192 KB req.

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Business Library Series-Librarian

IBM no. 6871-410, 420.

IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $95

☐ Diskette Librarian

IBM no. 6024-050. Creates catalog of file names over multiple diskettes.

IBM PC ☐ 64 KB req. ☐ Cost: $45

IBM PERSONALLY DEVELOPED SOFTWARE

☐ DOS File Tracker

IBM PDS no. 6276-518. Identifies each file with user-specific comments. Adds security classification to designated files. Arranges files by alphabetical filename, extension, size, comment or name of diskette holding files. Prints diskette labels and content-identifying inserts. Identifies duplicate files among diskettes. Color EGA support.

IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Cost: $20

MICROTEC RESEARCH, INC.

SEE AD ON PAGE 306

☐ Librarians

Includes library creation, activation of individual public symbols, addition or deletion of individual modules and listing of library contents and symbol information.

IBM PC

PERSONAL BIBLIOGRAPHIC SOFTWARE, INC.

☐ Pro-Cite
Stores bibliographic records of any length. Full text searching. Unlimited key word searching and indexing. Retrieves information through Boolean logic. Customized bibliographic formats. Supports IBM extended character set for foreign character and scientific symbol entry. Sorting on all fields.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $295

SYSTEM ENGINEERING TOOLS, INC.

☐ SET:SCIL
Historical record of changes to programs in library including date, author and comments. Version and release labels. Supports concurrent development on a program while detecting overlapping changes.
IBM PC ☐ 64 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $349

MENU FACILITIES

THE DAVID L. ALDRIDGE CO., INC.

☐ PreCursor
Hard disk menuing system. Accesses any program, DOS command or batch file from built-in utilities menu. One-screen menu set up. Includes printer setup options, passwording capability and screen color choices.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $74

ARISTO SOFTWARE

☐ DOS-Helper
Provides help files for DOS commands, debug commands and additional items. User can delete, modify or add own help files for any subject. Includes standard and memory-resident versions.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $35

ARRIX LOGIC SYSTEMS, INC. (ALSI)

☐ APS/Dialog
Allows interactive customization and creation of user-defined menus and dialogues while menu responses are edited on input. Function key definitions under user control and stored in profile data set.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $210

☐ APS/Flist
Displays and sorts any directory. Executes programs with two keystrokes. Multiple commands stacked for execution. Supports mono and RBG screens and IBM 3270 PC.
IBM PC, XT, AT, 3270-PC ☐ 128 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $65

AUSTEC, INC.

☐ ACEMenu
Menu/security system. Creates/maintains menu hierarchies at screen. Optional password controls available at menu levels. Caters to software development and commercial applications environments. Facility to execute nominated sequence of programs. Requires ACEBridge.
IBM PC

BLT BUSINESS SYSTEMS, INC.

☐ Menu-EZ
Creates and changes menus with edlin editor. Transfers to any menu screen. Menus nested to 32 levels deep. Generates tutorial documentation.
IBM PC ☐ 128 KB req. ☐ Copies sold: 12 since 1983 ☐ Cost: $150

BMS COMPUTER, INC.

☐ EASY-DOS-IT
One keystroke access to programs, DOS functions and tutors. Supports password protection, color, multi-user networks and RAM drives.
IBM PC, XT, AT ☐ 32 KB req. ☐ Copies sold: 7,000 since 1984 ☐ Cost: $60

BUSINESS SYSTEMS MARKETING, INC.

☐ MShell
Menu/security and user assistance system. Provides selection of UNIX operating commands. Option selection feature.
IBM PC, AT ☐ Cost: $125

BYTEL CORP.
Software Development Division
SEE AD ON PAGE 364

☐ Menupro
Menu processor for business applications interface. Interactive process allows menu modification, security, listings of operators and programs and multi-user capabilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $250-$700

COMMAND SOFTWARE SYSTEMS, INC.

☐ MenuCommand
User selects one of four menu formats and defines each menu selection's title, program or procedure on which it will run and device and subdirectory path on which program resides. System security provides program exits.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $90

COTTAGE INDUSTRIES, INC.

☐ Menu System
Front end for DOS. Simplifies operation through unlimited number of user-defined menus each with up to 19 selections. Screensaver function. For single-and multi-user systems.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $50

DANNYSOFT, INC.

☐ Cmenu
Nested menus and password protection. Allows color defaults to be changed. Menus can be modified and set up with any text edition or included menu generator.
IBM PC ☐ 256 KB req. ☐ Cost: $50

DATA BASE CONSULTING

☐ EasyMenu
Creates numerous menus each with up to 96 selections. Supports up to 99 operators. System supervisor allows customization for each operator. System log provides audit trails of usage by operator/task. Accessible by other programs. Password protection available.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $50

DEERESOFT, INC.

☐ Magic Menu
Tailored menu system. Moves from program to program without directly using DOS. User log on/off, 20 entries per screen, variable menu formats and passwords, user lockout from DOS, half second display time, screen blanking and sequence screens. Audit trails. Novell NetWare compatible.
IBM PC, XT, AT, 3270-PC ☐ 16 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $99-$500

DELTA TECHNOLOGY INTERNATIONAL

☐ Direct Access
Hard disk management and access. Allows single keystroke access to programs on hard disk. Crosses subdirectory boundaries. Features time usage tracking with report generator, batch file processing, DOS command execution, password protection and diskette prompting. Requires no file restructuring.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 20,000 since 1984 ☐ Cost: $90

DMS, INC.

☐ Menu Master
Menu-controlled OS shell supporting submenus, color, time and date. Executes complex command streams when user makes menu selection.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $175

FEROX MICROSYSTEMS, INC.

☐ Encore HelpMate
User-created help message system for Ferox Microsystem's Encore. Helps developers document, debug and demonstrate applications. Consists of screen editor, help file builder and indexer. Indexes Encore's files and models. Presentation aid.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 200 since 1986 ☐ Cost: $95

FINANCIAL DYNAMICS

☐ dBASE III Utility
Includes menu system, data maintenance, archival routines and dynamic help routines. Interfaces dBASE III.
IBM PC, XT, AT, 3270-PC ☐ 320 KB req. ☐ Copies sold: 70 since 1985 ☐ Cost: $50

☐ Pascal Utility
Menu generation for Turbo Pascal. Creates Lotus-like menus. Includes date math, time math and formatting routines similar to dBASE picture format. Provides string and numeric functions. Accesses dBASE II and III files.
IBM PC, AT, XT, PCjr ☐ 256 KB req. ☐ Copies sold: 60 since 1985 ☐ Cost: $50

FRONT ROW SYSTEMS

☐ Menu Maker
Creates customized menus in Lotus 1-2-3. Utility worksheet may be inserted in any current worksheet.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $35

GETC SOFTWARE, INC.

☐ Lazy Susan
For hard disk computers. Single keystroke selection. Up to 100 items per menu. Allows user-designed menus. Runs batch files. Lock password feature.
IBM PC ☐ 128 KB req. ☐ Cost: $50

GURDAK SOFTWARE DEVELOPMENT

☐ Menu System Manager
Provides system management via user-created menus. User can invoke any DOS command or program file name. Stores date, time, user ID, command invoked and purpose of access for menu entry.
IBM PC ☐ Cost: $129

HARVEY
(division of BHC, Inc.)

☐ FirstMenu
User can create numerous menus with up to 20 selections each and nested within other menus. Incorporates customized front screen to show screen of dealers, user or company information. Paging facility. RAM-resident.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $40

THE SOFTWARE BOTTLING COMPANY OF NEW YORK
6600 Long Island Expressway
Maspeth, NY 11378
(718) 458-3700
Flash-up Windows creates, controls and manages menus and help windows for every application and language. Uses windows to send repetitive keystrokes and commands automatically to program. Most application languages can send commands directly to Flash-Up Windows to control when windows should pop up. Creates consistent user interfaces across applications, includes password protection. Price $90.

INSURANCE SYSTEMS GROUP

☐ Mr. Menu

Executes batch files and MSDOS commands from series of menus. Runs on fixed disk. Manages over 1,000 files.

IBM XT, AT ☐ 70 KB req. ☐ Copies sold: 750 since 1985 ☐ Cost: $50

INTERACTIVE IMAGES, INC.

☐ Easel/Layout

Creates PC-based icon oriented human interfaces to existing mainframe applications and data bases for use by non-technical people.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 25 since 1984

K-QUAL SYSTEMS CONSULTING

☐ K-Qual Menu Manager and Security Plus

Organizes fixed disk software. Executes program or batch file from fixed or floppy disk. Prompted DOS command interface and on-line tutorial. Password security on any program. Passwords encrypted. Floppy disk boot protection.

IBM PC ☐ 128 KB req. ☐ Copies sold: 491 since 1984 ☐ Cost: $80

KELLER SOFTWARE

☐ Sideview: A PC DOS Security Menu

DOS shell and PC hard disk organizer. Allows programs to be run by pressing enter key. Password security, sensitive data and subdirectory access restrictions and system re-start restraints. Lotus 1-2-3, dBASE and WordStar compatible. Utilizes 12,000 bytes of hard disk space.

IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $39

MAGEE ENTERPRISES

☐ Automenu

DOS menu system. Creates software management system. Accesses programs, batch files and DOS commands. User can switch between 2 monitors. Provides password protection and screen blanking. Supports unlimited menus, menu-building facility and use of mouse.

IBM PC, XT, AT ☐ 30 KB req. ☐ Copies sold: 7,200 since 1983 ☐ Cost: $46

MASTER CONTROL SYSTEMS, INC. (MCS)

☐ Master Control

Single/dual column menu system. Program or menu panel entry password security. Screen blank. DOS command processor for entry of 10 commands at once. Standard parm passing. File management. Directory sort. File rename.

IBM PC ☐ 256 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $80

MICRO BUSINESS SYSTEMS, INC. (NY)

☐ Menu Mode

Selects a 20 item single list format. Enters help text for each menu item. Submit facility launches jobs and returns to menu when job is finished.

IBM PC ☐ 64 KB req. ☐ Copies sold: 45 since 1980 ☐ Cost: $75

MICRO DESIGN INTERNATIONAL, INC. (MDI)

☐ Command Assist

DOS manual disk. Creates help displays.

IBM PC, XT, AT ☐ Cost: $50

MICRO INTEGRATION SERVICES, INC.

☐ DOS Link

Menu-driven interface accesses applications and data on fixed disk. User-created menus and application names. Supports up to 99 menu selections. Password protection for up to 99 users restricts access to each menu selection.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $49

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Mouse Menu

Reviewed Aug 1984 p. 74.

Initiates commands on PC application programs that formerly were entered with keyword.

IBM PC

MODTECH

☐ Hard Desk

Works as menu driver, file directory manager, file router and DOS interface. Provides commands in English, addressable with function keys. Organizes applications and data files on hard disks. Accesses programs that reside in any combination of directories.

IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $95

MOUSE SYSTEMS CORP.

☐ Designer Pop-up Menus

Mouse interface software for use with word processing, spreadsheets and DBMS. Edits existing pop-up menu with text editor word processor which creates ASCII text files and user-defined menus.

IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $50

NATIONAL SOFTWARE ASSOCIATES

☐ Menu One

Executes program in any disk drive, sub-directory or another disk. Works on floppy diskette and hard disk based computers.

IBM PC, XT, AT, Portable PC ☐ 64 KB req. ☐ Copies sold: 800 since 1985 ☐ Cost: $19

☐ Menu Two

Multi-level menus in tree-like structure.

IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 650 since 1985 ☐ Cost: $39

NELSON DATA RESOURCES

☐ Master Menu

Menu to install application systems and DOS procedures. Implements utilities such as security, backup, restore, install and test data.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $200

NYNEX SERVICE CO.

☐ AOS (Advanced Office System)

Standardized menu interface. Bypasses DOS commands and moves from program to program. Can be used on standalone PC or connected to network.

IBM PC ☐ 64 KB req. ☐ Copies sold: 1,200 since 1986 ☐ Cost: $100

OPT-TECH DATA PROCESSING

SEE AD ON PAGE 2

☐ On-Line Help

Integrates help windows into user's programs. Includes help manager. Interfaces to languages that allow user to access, display, help members and restore original screen contents.

IBM PC, AT, XT ☐ 64 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $149

ORACLE CORP.

☐ SQL*Menu

Menuing tool. Creates portable, customizable menu trees.

IBM PC

PECAN SOFTWARE SYSTEMS, INC.

☐ MenuMaker

IBM PC, XT, AT ☐ Cost: $40

QUADRATRON SYSTEMS, INC.

☐ Q-Menu

Menu generation package. Component of QSI's Q-Office. Calls strings of menus, with those menus calling other menus and programs. Providescancel command reverse order, stepping back through major menus. Includes highlighting, reverse display and underlining.

IBM PC ☐ 196 KB req. ☐ Copies sold: 75,000 since 1982 ☐ Cost: $295-$395

RAINBOW SOFTWARE SYSTEMS, INC.

☐ AMI Master Menu Interface

Creates main menus for running AMI software on a hard disk. Provides password security.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 160 since 1984 ☐ Cost: $60

SIGMA SOFTWARE, INC.

☐ Menu Plus+

Single keystroke access to DOS commands including format, copy, backup and restore. Allows for 676 options. Menu maintenance including optional password protection, color choices and hidden sub-menus. Parameter passing and batch file editor. Optional hold function prevents listings from flashing by.

IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1986 ☐ Cost: $40

SOFT SYSTEMS

☐ Menu Master

Loads and executes user-defined programs, batch files, printer commands and system commands from custom defined menu with touch of function key.

IBM PC, XT, AT ☐ Cost: $59

SOFTSTAR INTERNATIONAL, INC.

☐ Menu MANager

Designed for hard-disk users. Creates menus and displays on powerup. Accesses program with single keystroke. Rearranges menu choices order. Assigns passwords. Displays free space, date, day, and time. Includes ASCII chart and notepad. Built-in editing, calculator and color screen control.

IBM PC ☐ 256 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $79

SOUTHERN COMPUTER SYSTEMS, INC.

☐ MenuManager

Allows programs, commands and batch files to be organized into clean menu screens. Provides sample menus including DOS commands. Includes MenuEditor for control over messages, prompts and operations.

IBM PC, XT, AT ☐ 20 KB req. ☐ Copies sold: 1,500 since 1986 ☐ Cost: $50

STAR, INC. (SOFTWARE TECHNOLOGIES AND RESEARCH, INC.)

☐ Workstation Manager

Window-based menu system with integrated menu design. Executes COM, exe and bat files, displays and selects from file directories and writes DOS files. Library management provides menu documentation, directory listings, add, copy and delete and library compression.

IBM PC, XT, AT, 3270-PC ☐ 74 KB req. ☐ Copies sold: 5,000 since 1985 ☐ Cost: $125

STARBRIDGE TECHNOLOGIES CORP.

☐ DOS

Menu interface with one-key access to DOS commands. Custom menu building for application programs. Accesses on-line help prompts, graphics, DOS reference guide and Starbridge Electronic Support Hotline.

IBM PC, XT, AT, PCjr, Portable PC

SYNCHRONY SYSTEMS

☐ Backbone
Manipulates groups of menus. Links menus as desired, creating linear, tree-structured and circular organizations. Sets up 50 menus that give access to up to 450 programs. Supports multiple users.
IBM PC, XT ☐ Cost: $40

SYSTEMATE, INC.

☐ SysteMate
Menuing system with integrated security.
IBM PC ☐ 256 KB req. ☐ Cost: $80

GP TAURIO, INC.

☐ GP Thors
Access shell. Integrates program and data into single unified system. Uses standard menu format and tree structure diagrams. Features user-created scratch pad screens, customized help screens, menu generator, hard disk manager, box isolation feature and hardware status checking function.
IBM PC ☐ Cost: $40

3COM CORP.

☐ 3+Menus
Full-screen menu interface. Provides configurable access to network commands, application programs and DOS utilities.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $150

TRILLIAN COMPUTER CORP.

☐ VisuALL Plus
Windowing interface for Lotus 1-2-3, WordStar and DOS. Groups application commands in Macintosh-like pop-up menus. Makes menu selections from keyboard or by using mouse or touch screen.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $80

UNIVAIR, INC.

☐ UNI-LINK
Hard disk control menu (shell) linking all Univair programs together along with DBMS, word processing and telecommunications systems.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 3,200 since 1983 ☐ Cost: $75

OPERATING SYSTEMS

ACTION COMPUTER ENTERPRISE, INC.

☐ DPC/OS (Distributed Processing Computer Operating System)
Downloads CP/M to 8-bit or 16-bit user processors.
IBM PC ☐ 96 KB req. ☐ Copies sold: 3,000 since 1981 ☐ Cost: $595 and up

BOS NATIONAL, INC.

☐ BOS/LAN
LAN OS. Includes run time BOS/MicroCOBOL. Supports up to 64 users. Multi-processor, multi-file sharing.
IBM PC, XT, AT ☐ Cost: $1,500

☐ BOS/5, MBOS/5, BOS/NET
Disk OSs.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 10,000 since 1978 ☐ Cost: $500

☐ CBOS/5 (Concurrent)
Single-user OS. Includes run time BOS/MicroCOBOL.
IBM PC, XT, AT ☐ Cost: $900

CONCEPT OMEGA CORP.

☐ Thoroughbred/OS
BASIC OS. Supports 16 users. Creates 30 directories. Executes programs by disk sector caching. Includes ghost tasking, conditional and unconditional branching, error branching and B Tree file structure. Supports program overlays.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 40,000 since 1982 ☐ Cost: $795 and up

THE DESTEK GROUP

☐ OSRT-PC
Multi-tasking OS.
IBM PC ☐ 12 KB req. ☐ Cost: $490

☐ Portx
Real-time OS kernel for iAPX86 CPUs. Includes interrupt handling, memory allocation and interprocess communications. Run-time libraries for C, Pascal and FORTRAN and MSDOS utilities available.
IBM PC ☐ 6 KB req. ☐ Cost: $980

DIGITAL RESEARCH, INC.

☐ Concurrent PC DOS
Reviewed Mar 1985 p. 45; Dec 1985 p. 52.
Runs four PCDOS or CP/M applications simultaneously. Supports Lotus 1-2-3, Wordstar and dBASE II. Supports windowing, foreground and background processing and cutting and pasting. User can attach 2 terminals to the serial ports for multi-user capability.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 20,000 since 1984 ☐ Cost: $295

DIGITROL COMPUTERS, INC.

☐ pcShare
Multi-user OS. Supports up to 6 users running Lotus 1-2-3, dBASE or WordStar. Runs compiled BASIC, Pascal and C programs with DOS compatible record locking.
IBM XT, AT ☐ 640 KB req.

DISC

☐ DBL/MSDOS/PCDOS
Allows development of programs of any size without overlaying. Random and sequential file-access techniques. ISAM, fixed-point decimal data type, symbolic debugger, subroutine libraries linking, and object libraries creation. Chains to non-DBL programs and interfaces subroutines written in other languages.
IBM PC

TASKVIEW™

WHY GIVE UP. . .
BATCH FILES,
I/O REDIRECTION
SIDEKICK™
DOS MENU PROGRAMS,
MOST OF YOUR RAM,
EXECUTION SPEED?

Compatible, efficient DOS multi-tasking.
We designed Taskview with efficiency in mind. During normal operation, TASKVIEW hides behind DOS, providing you with control of up to 10 concurrent or non-concurrent programs. Just the touch of a key instantly switches a program to the foreground. Included desktop utilities let you cut and paste from program to program. Simple to use and reasonably priced, no well equipped PC user should be without it.
Requires: PC/AT/Jr compatible, DOS 2.0-3.1, 256K RAM, 1 Floppy drive.
Taskview trademark of Sunnyhill Software
Sidekick registered trademark of Borland Intl

8080 Z80 6809 AMX 8086 8088 Now 68000

Real-Time Multitasking Executive

- No royalties
- Source code included
- Fault free operation
- Ideal for process control
- Timing control provided
- Low interrupt overhead
- Inter-task messages

Options:
- Resource Manager
- Buffer Manager
- Integer Math Library
- Language Interfaces : C Pascal PL/M Fortran
- DOS File Access : CP/M-80 IBM PC DOS

AMX is TM of KADAK Products Ltd.
CP/M-80 is TM of Digital Research Corp.
IBM, PC DOS are TM of IBM Corp.

CIRCLE NO. 316 ON READERS SERVICE CARD

DYAD TECHNOLOGY CORP.

☐ PC/VRTX
Board-based. Provides 64kb RAM and utility programs, IBM Macro Assembler and Lattice C Language interfaces. Supports up to 448 kb of RAM and up to 128kb of EPROM.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $1,495

DYNACON COMPUTERS, INC.

☐ BITS
BASIC OS. Supports indexed contiguous, tree structured files.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 350 since 1977 ☐ Cost: $3,500

EMULEX CORP.

☐ DCP/Exec
Real-time, event-driven OS for Emulex's DCP-88/VM communications coprocessor board. Allows communications channels supported by DCP-88/VM to be configured with different protocols to run communications tasks concurrent with another application on PC.
IBM PC

FARADAY ELECTRONICS

☐ MS9200
Sold in support of Faraday motherboards.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $50

FILLMORE SYSTEMS, INC.

☐ Utopia FORTH
OS and language.
IBM PC ☐ 128 KB req. ☐ Copies sold: 6 since 1983 ☐ Cost: $395

GATEWAY COMMUNICATIONS, INC.

☐ Advanced Netware 286/G
File server OS for G/NET LAN. Supports 100 PC workstations and 32 dedicated file/print servers. Provides electronic mail, directory caching and hashing, disk optimization, security, print spooling, file/record locking and handling, print queuing and application development tools.
IBM PC, XT, AT ☐ Cost: $2,095

☐ Advanced NetWare/G
Network and file server OS. Supports 100 workstations. Allows up to 8 file servers on network. Supports DOS 3.1. Incorporates electronic mail, directory caching and hashing, print spooling and file/record locking.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $1,595

☐ Netware/G
File server OS for G/NET LAN. Supports 50 workstations and one shared file/print server. Incorporates electronic mail, directory caching and hashing, print spooling and file/record locking.
IBM PC, XT, AT

GRID SYSTEM CORP.

☐ GRiD-OS
Provides security, shareable code by applications, relocatable code, device independent I/O, interprogram communications, screen management and graphics utilities, tailorable I/O and hierarchical file system.
IBM PC ☐ 512 KB req.

GULF DATA, INC.

☐ ARABDOS
Arabic/English data processing and DBMS. Develops bilingual applications. Writes Arabic/English programs in BASIC, COBOL, FORTRAN, Pascal, C or Assembly. Creates Arabic/English data base systems using dBASE, MDBS and Access Manager.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $675

HUNTER & READY, INC.

☐ VRTX (Versatile Real-Time Executive)
Reviewed May 1986 p. 75.
Develops and maintains embedded microprocessor applications. Implements critical kernel services of real-time OS. Standalone or in combination with other components in applications that require I/O and/or file management facilities.
IBM PC ☐ 4 KB req. ☐ Copies sold: 1,000 since 1982

HURRICANE SYSTEMS, INC.

☐ Master Operating System
Includes programming language, editor and system utilities. For single high-level language. Optimized for business applications. Contains table-driven data formatting commands for exploding data elements into forms and disk file commands for processing ISAM-oriented data base.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1978 ☐ Cost: $995

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Advanced NetWare/C
IBM no. 6404-010. Network Control OS utilizing IBM PC Cluster Adapter and allowing IBM PC Network and IBM PC Cluster to be internetworked.
IBM PC, XT, AT, Portable PC, PCjr ☐ 256 KB req. ☐ Cost: $1,595

☐ Disk Operating System and Basic Language Extension
IBM no. 6024-061.
IBM PC ☐ Cost: $60

☐ DOS (Disk Operating Subsystem Version 1)
IBM no. 6024-001.
IBM PC ☐ Cost: $40

☐ DOS (Disk Operating System Version 2.1)
IBM no. 6024-120.
IBM PC, XT, PCjr ☐ Cost: $65

☐ DOS 3.0
Reviewed Dec 1984 p. 74.
IBM no. 6024-180.
IBM PC, XT, PCjr, Portable PC, AT ☐ Cost: $65

☐ DOS 3.1 (PC Network)
IBM PC, XT, AT, PCjr, Portable PC ☐ Cost: $65

☐ DOS 3.2
IBM no. 6280-057. Upwardly compatible from DOS 3.1. Supports IBM PC and Token-Ring Networks. New commands added including replace designed to replace all occurrences of a file on disk and xcopy designed to allow copying of files from multiple subdirectories where source and target drives are of different densities.
IBM PC, XT, AT, Portable PC, PCjr, Convertible ☐ 128 KB req. ☐ Cost: $95

☐ PC/IX (Personal Computer Interactive Executive)
Reviewed May 1985 p. 54; Jul 1985 p. 80.
IBM no. 1753-369. Provides UNIX-compatible processing and hierarchical file structure. Executes sequential async and background processes. Controls and tracks changes in programs and documents. Supports or emulates 8087 or 80287 Math Co-processor.
IBM PC, XT, AT, XT/370 ☐ Cost: $900

☐ RT PC AIX (Advanced Interactive Executive) Operating System
IBM no. 5669-061. UNIX-like OS with demand-paged virtual memory management, device-independent I/O, controlled direct access to display devices and user extendable realtime interrupt handling. Multi-tasking, single or multi-user.
IBM RT PC ☐ Cost: $3,400

INDUSTRIAL PROGRAMMING, INC.

☐ MTOS-86/PC
Allows PC to work for data acquisition and control applications.
IBM PC, XT ☐ 10 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $495

INFORMATION PROCESSING, INC.

☐ PC-BLIS
Multi-user OS and COBOL compiler. Supports up to 3 BLIS/COBOL users or 2 BLIS/COBOL users and 1 DOS user concurrently.
IBM XT, AT

INTERACTIVE SYSTEMS CORP. (CA)

☐ IS/3
General-purpose, timesharing OS. Supports program development, document preparation and text processing. Includes system management facilities and queuing system.
IBM AT/PC/IX

JMI SOFTWARE CONSULTANTS, INC.

☐ C EXECUTIVE
ROMable OS kernel. Includes formatted I/O, pre-emptive scheduling, interrupt driven I/O and shared text facilities. Accommodates C and Pascal languages. Includes configurable memory cache and block size, up to 32,000 named files and file transfer.
IBM PC, AT ☐ 5 KB req. ☐ Copies sold: 5,000 since 1981 ☐ Cost: $575

KADAK PRODUCTS, LTD.

SEE AD ON PAGE 351

☐ AMX Multitasking Executive
Reviewed Apr 1986 p. 99.
For dedicated control and communications systems. Provides prioritized task scheduling and message passing. Coordinates execution of tasks in response to external events. User-configurable with optional modules.
IBM PC ☐ 4 KB req. ☐ Introduced: 1979 ☐ Cost: $800-$1,600

LIFEBOAT ASSOCIATES

SEE AD ON PAGE 291

☐ SB-86
MSDOS for S-100 business architecture.
IBM PC ☐ 64 KB req. ☐ Cost: $350

LINK DATA, INC.

☐ UNI-DOS
Multi-user, multi-tasking capabilities. Language compilers run library of manufacturing and accounting software. Source-to-source compatible with DIBOL, CADOL and COBOL. Priority scheduler. Disk file management. Concurrent file sharing. Record/file locking. Full screen editor. Symbolic debugger.
IBM PC, XT, AT ☐ 128 KB req.

MAXEY SYSTEMS, INC.

☐ GASS (General Accounting & Scientific System)
Numbered OS. Written in Assembly and FORTRAN. Written as control sequence establishing CP/M that decodes high ordered operations. Handles I/O as store and forward packet switching network.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 12 since 1976

MDS QANTEL, INC.

(a Mohawk Data Sciences Co.)
☐ Best/AOS
OS. Allows Qantel applications to be run in PC environment.
IBM PC

MERIDIAN SOFTWARE SYSTEMS, INC.

☐ NetOS
Takes advantage of computer networks and provides distributed processing. Uses network to match work with available resources.
IBM PC

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ MS-DOS
Single-user and multi-user 16-bit OS.
IBM PC ☐ 64 KB req. ☐ Copies sold: 600,000 since 1981

☐ XENIX Operating System
Commercial adaptation of UNIX OS. Includes timesharing, software development and text processing system. Provides visual shell, system maintenance utilities, record/file locking, source code control, semaphores and scatter-loaded processes.
IBM PC ☐ Copies sold: 25,000 since 1981

MICROWAY, INC.
SEE AD ON COVER 3

☐ RTOS
Configured version of iRMX-86 OS. Re-entrant DOS. Includes Intel Assembler, ASM-86. Utilities include LINK-86, LOC-86 and LIB-86. Loads anywhere in RAM. Resolves external references between run-time modules. Supports overlays with single root job by linker.
IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $600

MOLECULAR COMPUTER

☐ n/STAR
File sharing and interprocessor communications. Includes file server module. Handles communication over high-speed m/BUS interprocessor link. Allows processors operating independently to share files and communicate.
IBM PC ☐ 64 KB req. ☐ Copies sold: 6,500 since 1981

NETWORK CONSULTING, INC.

☐ p-System
Includes DOS file support to read and write files on p-System and PCDOS. Supports Corvus Constellation II, Tallgrass and Davong hard disks. Allows 640 Kb total system memory and auto booting.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $595-$845

NOVELL, INC.

☐ Advanced NetWare/ARCNET
Combines Advanced NetWare OS with Standard Microsystem's ARCNET-PC Network Controller module. Allows concurrent program execution, file exchange, electronic mail and network printer sharing. Supports IBM Token-Ring Network.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985

☐ Advanced Netware/Ethernet+
LAN program. Combines Advanced Netware OS with EtherLink plus card and keycard.
IBM PC, XT, AT ☐ 192 KB req.

☐ Advanced NetWare/G-Net
Combines Advanced NetWare OS with Gateway Communications interface module. Includes remote system reset, print spooling and system security. Used for distributed processing, directory caching/hashing, file caching and elevator seeking.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985

☐ Advanced NetWare/S-Net
LAN which supports multiple file servers, gateways, bridges, remote workstations, 2GB of disk storage and 5 printers. Accommodates 100 workstations per file server.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 4,300 ☐ Cost: $12,295

☐ Advanced NetWare/286
LAN OS. Supports multiple file servers, DOS 3.1, gateways, bridges and remote workstations. Accommodates 100 workstations per file server. Includes electronic mail. Supports IBM Token-Ring Network, 3Com EtherLink, AT&T StarLAN and Standard Microsystems Arcnet.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $1,695

☐ Advanced NetWare/86
Handles transaction processing, file/record locking and direct communication between networked stations. Disk/directory caching and hashing, and elevator seeking. Supports DOS 3.1, bridges, gateways, remote workstations and multiple file servers. Works on IBM Token-Ring Network, 3Com Etherlink, AT&T StarLAN and Standard Microsystems Arcnet.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1983 ☐ Cost: $1,595

☐ NetWare Server 286B; 286A
Manages disk storage and data communications on network. Bridges 4 different LANs. Includes Advanced NetWare OS. Provides 366 MB (286B)/30 MB (286A) of internal storage and 2 GB of external storage. Supports IBM Token-Ring Network.
IBM PC, AT, XT ☐ 192 KB req. ☐ Cost: $9,395 (286A); $13,995-$18,595 (286B)

☐ NetWare Server 68B
File server. Supports NetWare/68 OS. Upgrades 24 networking ports, 2 GB of disk storage, 8 MB of memory and 5 shared printers. Supports IBM Token-Ring Network.
IBM PC, AT ☐ 192 KB req. ☐ Cost: $7,000-$8,000

☐ SFT NetWare (System Fault Tolerant NetWare)
Designed to help increase failure resiliency for LANs. Supports multiple file servers, gateways, bridges, DOS 3.1, remote workstations, 5 printers and 2GB of hard disk storage. Accommodates 100 workstations per server. Electronic mail. Compatible with 3Com EtherLink, AT&T StarLAN, IBM networks and Standard Microsystems Arcnet.
IBM PC ☐ 192 KB req. ☐ Introduced: 1986 ☐ Cost: $2,495

PANATEC, INC.
(a Decision Industries Co.)

☐ Pana/BASIC
BASIC language processor. Sequential, random and ISAM file management. String handling and graphics. Includes file utilities, intercomputer communications, sort and merge. Interpreter and compiler versions available.
IBM PC ☐ 48 KB req. ☐ Copies sold: 5,000 since 1977 ☐ Cost: $100

PECAN SOFTWARE SYSTEMS, INC.

☐ Power System Bootable Operating System
For text processing and application execution. Combines with p-System language for application development. Includes screen editor, file manager, Turtlegraphics, printing and configuration utilities, command menu, library manager and p-machine emulator.
IBM PC, XT, PCjr, AT ☐ 64 KB req. ☐ Copies sold: 250,000 since 1980 ☐ Cost: $100

PHOENIX TECHNOLOGIES, LTD.

☐ ROM BIOS
Emulation for IBM PC, XT ROM BIOS. Routines encoded into read-only non-volatile memory. Initializes hardware. Manages keyboard, CRT serial port, printer, floppy diskette drives and timer.
IBM XT, AT ☐ 8 KB req. ☐ Copies sold: 15 since 1984 ☐ Cost: $100,000-$400,000

PICK SYSTEMS

☐ PICK
Relational data base management OS for business oriented applications. Virtual memory manager, report generator, file-memory manager, data security, variable length data architecture, multi-value and sub-values within data element and communications facilities.
IBM PC, XT, AT ☐ Copies sold: 75,000 since 1972

QUANTUM SOFTWARE SYSTEMS, LTD.

☐ QNX 2.0 - Ultimate Distributed Network Operating System
Reviewed May 1985 p. 54.
Fourth generation LAN support. Enables task to access serial ports, printers or disks on network. Provides file security. Supports distributed processing and devices. Allows transparent access to DOS file system partition and floppies.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 22,000 since 1982 ☐ Cost: $900

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ AT/RTX
Configuration of Intel's iRMX86 OS.
IBM AT ☐ 512 KB req. ☐ Copies sold: 2,500 since 1985 ☐ Cost: $1,495

☐ PC/RTX
Implementation of Intel's iRMX86 OS preconfigured to run on IBM PC and XT. Based on event-driven scheduler. Provides foundation for process control, office systems, data communications and medical electronics. Includes hierarchical error handling.
IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 3,200 since 1983 ☐ Cost: $995

☐ RTX286
Multi-user OS. Manipulates IAPX 80286 protected mode 16M addressibility. Processes different randomly-occurring events. Protection features include access rights that can be assigned to blocks of memory and hardware traps. Applications include medical patient monitoring, energy control and factory automation.
IBM PC, AT ☐ Cost: $2,795

RYAN-MCFARLAND CORP.

☐ RM/COS
Multi-user/tasking OS optimized for RM/COBOL application programs. Provides record level locking, data integrity across power failures, data file compression, sort/merge, data structuring, interactive and batch job control commands and a 2780/3780 communications option.
IBM PC, XT, AT ☐ 150 KB req. ☐ Copies sold: 1,700 since 1980 ☐ Cost: $2,950

THE SANTA CRUZ OPERATION, INC. (SCO)

☐ SCO XENIX V Operating System
Reviewed May 1985 p. 54; Jun 1985 p. 129.
Includes system kernel and over 100 utility programs with text editor. C Merge compiler allows developing software for DOS and XENIX from single set of source code. Contains linker, source code control system, C libraries, formatters and spelling checker.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1984 ☐ Cost: $195-$1,295

SENTINEL COMPUTER CORP.

☐ Data Base Operating System
Supports up to 32 terminals and printers. Includes print spooling, job control procedures and 1024 data files. Operates in async serial mode. Integrates with Sentinel DATABASE system. Allows time-sharing with data and program security.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1980 ☐ Cost: $3,850

SOFTWARE KINETICS, LTD.

☐ VENIX
System V UNIX.
IBM PC ☐ 128 KB req. ☐ Introduced: 1981 ☐ Cost: $495-$1,995

THE SOFTWARE LINK, INC.
SEE AD ON PAGE 265

☐ MultiLink Advanced
Reviewed Dec 1985 p. 52.
Interfaces with PCDOS 3.1. Supports 8 users. Runs text-oriented software designed for PC. Runs concurrent tasks. Partition access facility allows switching from task to task. Interfaces with non-CRT devices. Record-locking, file sharing, and dial-up facility. Supports IBM NETBIOS communications interface standard.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 25,000 since 1983 ☐ Cost: $495

SOFTWARE 2000, INC. (CA)

☐ TurboDOS
Allows mixing 8- and 16-bit processors. Networking provides file and record interlocks, multi-queue print spooler, failure detection and recovery. Performs diagnostic self-test at start-up. Optimizes processing of console status and console output functions.
IBM PC ☐ 64 KB req. ☐ Copies sold: 30,000 since 1981 ☐ Cost: $250-$1,250

☐ TurboDOS/PC
IBM PC ☐ Cost: $100

SOLUTIONWARE CORP.

☐ Task Lord
Controls up to 256 levels of async, external events. Performs task and event management, communication, interrupt handling, memory pool management and timer management. Supports process control, security systems, robotics, instrumentation, test and measurement.
IBM PC☐2 KB req.☐Copies sold: 5 since 1984☐Cost: $1,000

THE TARI GROUP

☐ TariSoft BASIC
Multi-user/tasking OS. Runs multi-user Business BASIC programs and single-user MSDOS/PCDOS applications concurrently. Utilizes direct data interchange to retrieve information for word processing, spreadsheet and DOS programs. Employs ghost tasking and spooling. Includes infinite variable length, floating point and file/record locking.
IBM PC, XT, AT☐256 KB req.

TELECOMPUTE INTEGRATED SYSTEMS, INC.

☐ APL, IDEAL APL
Includes language interpreter, communications and DBMS capabilities.
IBM PC☐64 KB req.☐Copies sold: 500 since 1979☐Cost: $295-$1,195

THEOS SOFTWARE CORP.

☐ Theos 286
Multi-user/tasking OS for Intel 80286 microprocessor. Provides password protection and file/record locking. Supports up to 4 printers, 1 to 6 users and keyed/indexed file systems.
IBM AT☐384 KB req.☐Introduced: 1985☐Cost: $595

☐ Theos 286-V
Multi-user/tasking OS. Addresses up to 16 MB of real memory. Supports 10 to 32 users. Provides data protection, task concurrence, 3-level file directories and B-tree ISAM files. Runs in protected virtual address mode of Intel's 80286 microprocessor.
IBM AT☐512 KB req.☐Introduced: 1986☐Cost: $695

☐ Theos 8
Multi-user OS based on Z80 microprocessor designed for vertical market business environments. Supports 2 to 6 users.
IBM XT, AT☐64 KB req.☐Copies sold: 50,000 since 1981☐Cost: $495

☐ Theos 86
Multi-user/tasking OS for Intel 8086/8088/80186 processors. Provides password protection and file/record locking. Allows up to 4 printers. Supports keyed/indexed file systems.
IBM XT☐384 KB req.☐Copies sold: 4,000 since 1984☐Cost: $495

THE ULTIMATE CORP.

☐ Ultimate
OS with DBMS capabilities. Turns around new applications or revises existing ones. Performs character moves, searches and compares. Expands/contracts variable length files, records and fields. Virtual memory. Includes Ultimate update, word processor, business graphics, recall and PROC processor.
IBM PC, XT

UNISOURCE SOFTWARE CORP.

☐ VENIX/86 IBM PC/UNIX
Reviewed May 1985 p. 54.
Organizes hierarchical files and designates security level of files. Shares resources, storage and printer of single PC. Includes four editors, C-compiler, BASIC, UC Berkeley enhancements, documentation preparation programs, assembler, spelling checker and UNIX to UNIX communications.
IBM PC, XT, AT☐192 KB req.☐Introduced: 1983☐Cost: $800-$1,075

UNITED STATES SOFTWARE CORP.

☐ USX51 Executive
For embedded applications. Includes dynamic task management, adjustable resource allocation, inter-task communication, priority task scheduling and free memory management. Customizes to required job.
IBM PC☐3 KB req.☐Introduced: 1984☐Cost: $1,950

☐ USX68K
Includes dynamic task management, user-defined resource allocation, inter-task communication, priority task scheduling and free memory management.
IBM PC☐3 KB req.☐Introduced: 1985☐Cost: $1,950

☐ USX86 Executive
For embedded applications. Includes dynamic task management, adjustable resource allocation, inter-task communication, priority task scheduling and free memory management. Customizes to required job.
IBM PC☐3 KB req.☐Introduced: 1985☐Cost: $1,950

☐ USX96 Executive
For embedded applications. Includes dynamic task management, adjustable resource allocation, inter-task communication, priority task scheduling and free memory management. Customizes to required job.
IBM PC☐3 KB req.☐Introduced: 1984☐Cost: $1,950

VENTURCOM, INC.

☐ VENIX
Multi-tasking, multi-user OS. Handles async raw I/O, high speed inter-process communication and record locking. Supports large network protocol drivers including TCP/IP. Includes compilers for FORTRAN, Pascal and C programs. Emulates floating-point arithmetic coprocessor. Offers graphics.
IBM PC, XT, AT☐256 KB req.☐Copies sold: 4,000 since 1980☐Cost: $195

☐ VENIX/System V
UNIX System V implementation. Handles interprocess communication with shared data segments, async I/O for high speed data throughput and real-time priorities. Supports large network protocol drivers including TCP/IP, compilers for FORTRAN and large C programs.
IBM PC, XT, AT☐256 KB req.☐Copies sold: 4,000 since 1985☐Cost: $1,195

WANG LABORATORIES, INC.

☐ PC System Software
Consists of Enhanced MSDOS plus Interpretive BASIC.
IBM PC☐Cost: $200

☐ PC UCSD-p Runtime System
IBM PC☐Cost: $100

WATERLOO MICROSYSTEMS, INC.

☐ Port Network Operating System
Multi-tasking network OS. Integrated LAN and inter-LAN capabilities. Multiple file, print and communication servers. Allows DOS 3.1, 3.0, 2.1 and 2.0 to run as guest OS. Features spooling and transparent access. Supports VRAM card providing a full 640KB space for application processing.
IBM PC, XT, AT☐640 KB req.☐Copies sold: 890 since 1985☐Cost: $1,695

WENDIN, INC.

☐ PCUNIX
UNIX-like OS. Incorporates Bourne and C shells. Multi-user, multi-tasking support. Runs program images in .comand.exe formats.
IBM PC, XT, AT☐256 KB req.☐Copies sold: 1,000 since 1986☐Cost: $99

☐ PCVMS
Multi-tasking, multi-user OS designed to access DEC's VAX/VMS command set. Supports dynamic mix of timeshared and real-time processes with event-driven scheduler. Runs program images in .comand.exe formats. Allows porting of VAX/VMS source programs to IBM PCs.
IBM PC, XT, AT☐256 KB req.☐Copies sold: 1,000 since 1985☐Cost: $99

WHITESMITHS, LTD.

☐ Co-Idris
Cohabitating OS with VMS and MS/PC DOS.
IBM PC☐128 KB req.☐Copies sold: 500 since 1984☐Cost: $1,000

☐ IDRIS Operating System
UNIX-compatible OS for microprocessors. Supports file system and object file formats. Event-driven resident includes scheduling. Provides solid host base for developing cross software. Supports read-only devices. Includes read-only bootstrap device and root file system.
IBM PC☐128 KB req.☐Copies sold: 10,000 since 1979☐Cost: $1,000-$3,500

MARK WILLIAMS CO.

☐ Coherent
Reviewed May 1985 p. 54.
Compatible with UNIX V.7 at system call level. Includes over 100 utilities and subroutine library to permit tailoring of system.
IBM PC☐256 KB req.☐Introduced: 1980☐Cost: $495

ZENITH DATA SYSTEMS

(subsidiary of Zenith Electronics Corp.)

☐ ZDOS
Permits I/O to different devices. Error recovery procedure. Relocatable linking loader. Blocks and reblocks physical sectors. Minimizes access to directory track. Provides for duplicate directory information. Swaps disks without logging in.
IBM PC☐128 KB req.

OPERATING SYSTEM ENHANCEMENTS

ACS

☐ MATCHPOINT/86
PCDOS and MSDOS OS access program library under CP/M-86. Acts as if all programs run under one OS. Provides unified file structure.
IBM PC☐9 KB req.☐Cost: $199

ADVANCED COMPUTER TECHNIQUES CORP.

☐ SkyView
Doubles number of lines displayed on PC monitor. Runs 8 DOS tasks concurrently without hardware modification, assigning processing priorities for each. Provides various windowing utilities. Configures regions for memory size, processing priority, start time and interval time for application activation.
IBM PC☐66 KB req.☐Cost: $300

ALOS MICROGRAPHICS CORP.

☐ Alosware
CAR system for document retrieval from rollfilm images from microform reader/printer equipment. User-specific search parameters.
IBM PC, XT

ALPHA SOFTWARE CORP.

☐ Keyworks
Reviewed Oct 1985 p. 131.
Keyboard utility. Allows the user to create keyboard macros, menus, perform DOS function from within other programs, encrypt files for security. Includes macro editor and printer control. Performs cut and paste.
IBM PCjr, PC, XT, AT, 3270-PC☐64 KB req.☐Copies sold: 10,000 since 1985☐Cost: $90

AST RESEARCH, INC.
SEE AD ON PAGES 161/172/173/174/175

☐ SuperPak
Includes SuperDrive, Fastdisk and SuperSpool. Creates electronic RAM drives emulating floppy and hard disks via SuperDrive and Fastdisk respectively. SuperSpool runs print jobs while continuing to enter/process data.
IBM PC, AT, XT ☐ Introduced: 1985 ☐ Cost: $45

ASTRO CORP.
Information Technology Division

☐ HAL
Commercial interface system manager for multiple OSs. Provides for network access and security locks. Includes multi-user system managers' control system.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $500

☐ SEIZE/RELEASE
Multi-user to single-user conversion and release.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $198

☐ XRAY
System management tool for multi-user and network system management, control and debugging.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1981 ☐ Cost: $99

AUSTEC, INC.

☐ ACEBridge (Austec Conformable Environments)
Record-oriented, I/O system for general purpose and proprietary OSs which implements ANSI standard for file systems. Includes file management system, distributed data access methods, data/program portability, OS/language interfaces, support for networking/native ACE COBOL programs.
IBM PC

AWESOME TECHNOLOGY, INC.

☐ Multiple Choice
Accommodates multiple programs in memory. Integrates application programs. Batch files and I/O redirection. Data capture facility.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $99

BOURBAKI, INC.
SEE AD ON PAGE 41

☐ 1 DIR
Reviewed Nov/Dec 1983 p. 30.
Directory command system. Composes and executes commands using cursors to point to commands and file names. Eliminates typing of commands by selecting file names from screen-displayed disk directory.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 20,000 since 1983 ☐ Cost: $95

CATSPAW, INC.

☐ UDI/DOS
Provides program development environment similar to Intel Series III MDS under MSDOS. Runs Intel UDI-compatible translators, utilities, program maintenance tools, linkers and debuggers. Supports path command, pipes, I/O redirection and 8087.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $300

CHORUS DATA SYSTEMS

☐ PhotoBase
OS extension merges pictures with data base systems for applications such as personnel files, real estate listings, product cataloging, credit verification and photo/data archives.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 450 since 1984 ☐ Cost: $295

COMMUNICATION MACHINERY CORP.

☐ Link Level Driver
Allows ENP to act as link level Ethernet controller and utilize TCP/IP resident in 4.2 BSD UNIX or protocols contained in OS.
IBM PC, AT ☐ Cost: $100

COMPUFIRM CORP.

☐ PL/M Connection
Provides interface between IBM PC and Intel's PL/M compiler. Accesses PC's DOS, BIOS and graphic functions. Includes development support for software control of PC peripherals.
IBM PC ☐ 256 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $295

COMPUTING

☐ MENU/POWER
Twenty-command front-end for CP/M, CP/M-86 and MSDOS. Copies, erases, reclaims, renames and tests disks for bad blocks. Sorts directory 4 ways. Password protects sensitive files. Autoboot, built-in disk reset and optional user customizations.
IBM PC ☐ 16 KB req. ☐ Copies sold: 12,275 since 1983 ☐ Cost: $149

☐ POWER
OS with 55 utility front-end. Allows direct access and change of disk and memory locations. Test checks tracks and sectors on disk and determines location of bad sectors. Fixes glitched directories or data, sorts directory four ways. Password protection.
IBM PC ☐ 16 KB req. ☐ Copies sold: 8,000 since 1982 ☐ Cost: $169

CONNECTICUT SOFTWARE SYSTEMS CORP.

☐ DOS Commander
Reviewed Oct 1984 p. 36.
Provides 40 function keys, 20 programmable keys, and directory/display. Handles file look-up, command make-up, and file deletion. RAM disk. Arranges files and searches alphabetically. Bootable from autoexec.bat file.
IBM PC, XT, PCjr, AT, 3270-PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $80

CXI, INC.
SEE AD ON PAGES 266/267

☐ IBM 3270 PC API
Allows IBM 3270-PC application programs to run on CXI-enhanced PCs.
IBM 3270-PC

CYBERENGINEERING CORP.

☐ CyberTools DOS Utilities Library
Provides ASM macros to access BIOS functions. Inputs to batch file. Transfers color and mono from DOS or BASIC compiler patches. Resident command COM generator. Patches to activate command COM in subdirectories. Disk sector modifier. Supports color setting via batch file.
IBM PC

DATEM, LTD.

☐ dDCM 870
MSDOS ladder control language. Creates ladder programs which operate on Datem dDCM331 BITBUS control node. Allows dDCM331 to operate in numerous programmable controller environments. Provides screen-oriented editor supporting 100 ladder rungs with 8 ladder elements per rung.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $1,275

DIGITAL RESEARCH, INC.

☐ GEM Desktop
Icons, drop-down menus, scroll bars and windows replace commands needed for copying, deleting, opening and closing a file. Includes applications environment for other GEM products.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $50

DRASTECH SOLUTIONS

☐ UPDCLK
Reads clock/calendar on AST and Quadram multi-function boards. Displays date/time and puts date/time in DOS. Determines whether boards are missing or contain erroneous data and/or time values.
IBM PC ☐ Cost: $795

EASTERN COMPUTERS, INC.

☐ CCGTS (Chinese Character Generator Transparency Software)
Allows user to input, display and print Chinese characters. Programs that were originally written in English will still display English prompts, but Chinese prompts may be added. Requires ECI's CCG.
IBM PC ☐ 192 KB req. ☐ Copies sold: 800 since 1985 ☐ Cost: $295

EMERALD SYSTEMS CORP.

☐ Hard Disk
Installs and runs user's OS on Emerald products. Menu selections partition disks into 1-24 volumes, configures system for LAN and provides password security. OS boots from hard disk.
IBM PC, XT, AT

EMULEX CORP.

☐ Insta-Drive
RAM resident disk simulator for 320 KB and 360 KB of memory. Compatible with PCDOS command library. Accesses resident reference programs and data files.
IBM PC ☐ 320 KB req. ☐ Introduced: 1982

GETC SOFTWARE, INC.

☐ DOS Services
Provides separate windows for command menu, directory, and drive and directory data display. Creates, removes and renames directory. Sorts files by name, extension, size and date. Displays text and binary files. Supports up to 26 drives.
IBM PC ☐ 128 KB req. ☐ Cost: $50

GRID SYSTEM CORP.

☐ Record/Playback
Generates keystroke file, providing playback of keystrokes for single program or program set. Keystroke editing. Displays screen images for sideshow. Pause and slowdown.
IBM PC

HAI SOFTWARE, INC.

☐ HAI*LINE Run Time
Interpreter and utilities for HAI microware. Includes menus, disk directory, file copy, allocate, delete and reorganize. Available in foreign languages.
IBM PC ☐ 128 KB req. ☐ Copies sold: 8,000 since 1976 ☐ Cost: $50

THE SOFTWARE BOTTLING COMPANY OF NEW YORK
6600 Long Island Expressway
Maspeth, NY 11378
(718) 458-3700
Flash-up Windows creates, controls and manages menus and help windows for every application and language. Uses windows to send repetitive keystrokes and commands automatically to program. Most application languages can send commands directly to Flash-Up Windows to control when windows should pop up. Creates consistent user interfaces across applications, includes password protection. Price $90.

HAMMER COMPUTER SYSTEMS, INC.

☐ E-Z-DOS-IT
Reviewed Dec 1985 p. 52.
Runs 4 programs at once on IBM PC or compatible. Processes communications in multi-tasking mode. Integrates with Lotus 1-2-3, dBASE II, WordStar and PFS:File.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 5,000 since 1985 ☐ Cost: $60

HARVEY
(division of BHC, Inc.)

☐ ProDisk Control
Creates, saves, changes menus to run applications, performs DOS operations or selects other menus at a keystroke. Password protected menus and menu selections. Includes installation batch files for floppy and hard disk systems, menuing system, framed DOS prompt, time and date display, and paging facility.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 3,000 ☐ Cost: $90

HELMSMAN SYSTEMS, INC.

☐ H-CHAMP
Commercial user/system interface. Applications environment. Provides utility tools. LAN compatible.
IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $995

BOB HOWARD

☐ Still River Shell
Visual PCDOS shell. Converts directory into menu. Finds, views, copies, moves, deletes and lists files/directories with single key command. Systemwide find, file view, display of directory trees and user-defined command extensions.
IBM PC, XT, AT ☐ 76 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $39

HUMAN COMPUTING RESOURCES CORP.

☐ Hi
Visually-oriented interface to UNIX. Predefined and user-defined single keystroke commands for UNIX use. Navigational/productivity tool. Includes direct entry and UNIX shell commands, in-line command and history editing.
IBM PC, AT, RT ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $500 and up

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ DOS 3.0 Upgrade to 3.1
IBM no. 6024-212.
IBM PC, XT, AT, PCjr, Portable PC ☐ Cost: $30

☐ PC/IX Upgrade to 1.1
IBM no. 6317-009.
IBM PC/PC/IX ☐ Cost: $40

☐ RT PC AIX VRM (Virtual Resource Manager)
IBM no. 5669-060. Provides device independence and system expandability. Collection of processes, device drivers and run-time routines that combine to support virtual machine interfaces and architected interfaces to an OS.
IBM RT PC ☐ Cost: $1,000

☐ RT PC Data Management Services
IBM no. 5669-059. Extends AIX OS file and directory system, providing multi-user data storage structure. Provides record management services, field management services, multiple indexing of files, multiple-request data sharing across files and file utilities.
IBM RT PC ☐ Cost: $500

☐ RT Personal Computer/Personal Computer AT Coprocessor Series
IBM no. 5669-057. Executes AT BASIC and object code programs. Concurrent execution with AIX OS. Shared display and fixed disk. Connectivity to other IBM systems via hardware adapters. Shared main memory. Optional support of AT math coprocessor.
IBM RT PC, AT ☐ 512 KB req. ☐ Cost: $550

☐ VM Bond plus Professional Debug Facility
IBM no. 6214-143.
IBM PC, XT, XT/370 ☐ Cost: $275

IBM PERSONALLY DEVELOPED SOFTWARE

☐ DOS Memories
IBM PDS no. 6276-607. Adds full screen console capabilities to DOS allowing user to scroll and edit commands on previously displayed screens. Assigns multiple DOS commands of up to 255 characters to a single key. Locks displays to prevent messages from scrolling. Monochrome and color EGA support.
IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Cost: $35

☐ Phone Directory & Print Buffer On-Line
IBM PDS no. 6276-523. Controls Print Buffer On-line via Phone Directory. Color EGA support.
IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Cost: $35

INETCO SYSTEMS, LTD.

☐ Inspeed
Allows XENIX systems to operate faster by offloading communications tasks to coprocessor card. Leaves main processor dedicated to application. Includes coprocessor card that supports 4 serial lines.
IBM AT/XENIX ☐ Cost: $1,135

THE INFORMATION PEOPLE

☐ KYSS System Enhancement Facilities
Front-end menu driver, job control processor and OS aid. Selects programs, execution sequences, and maintenance functions from standard-form menus disregarding language, command syntax, program name recall, or operation order.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1981 ☐ Cost: $149

INNER LOOP SOFTWARE

☐ ScrollMate
Adds off-screen scrolling memory to IBM PC. Internal buffer keeps up to 14 full screens on-line. Used with dir, type, edlin, debug, compilers, assemblers, link, and independently developed software. All saved lines can be printed.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $39

INNOVATIVE TECHNIQUES

☐ FrontEnd
Personalizes MSDOS and PCDOS OS and keyboard. Includes artificial intelligence features. Remembers frequently used commands. Allows user to create menu screens.
IBM PC ☐ 256 KB req. ☐ Cost: $75

INSPIRATION SYSTEMS, INC.

☐ Prevail - User Interface
Window and system manager for Prevail tool set. Incorporates full-screen editor. Facilitates user access through function keys and simple commands.
IBM PC ☐ 2,000 KB req. ☐ Copies sold: 100 since 1984

KADAK PRODUCTS, LTD.
SEE AD ON PAGE 351

☐ Buffer Manager
Manages memory buffers. User defines set of buffer pools (256 supported), each containing fixed number of buffers suitable to application. Application modules request buffer from specific pool. Fully re-entrant.
IBM PC ☐ 1.5 KB req. ☐ Introduced: 1981 ☐ Cost: $150

KERKHOFF COMPUTERS

☐ POS-Lotus 1-2-3 Interface
Interface and templates linking Panasonic POS and Lotus 1-2-3. Nine pre-formatted templates supplied to allow access to data.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $100

LATTICE, INC.
SEE AD ON PAGE 279

☐ LMK
Product generation utility initiates system rebuild by a single command based on relationships of various system pieces. Performs any executable command invoking batch text editor to make replacements in number of files and updating data base.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $195

LIONHEART PRESS, INC.

☐ Memory
Provides routines, called from interpreted or compiled BASIC, which increases active RAM capacity up to 512Kb, and which accesses memory locations up to 967Kb. Reserves memory segments for special routines, sets dimension and type for arrays, and handles string variables.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $75

LOCUS COMPUTING CORP.

☐ Multisystem Merge
Allows simultaneous transparent execution of UNIX and DOS. Permits record level file sharing, low/high level resource sharing. Provides full memory and I/O protection.
IBM PC ☐ 1000 KB req.

☐ PC-Interface
Allows UNIX system to act as file server to IBM PC running MSDOS. Users can toggle between UNIX and MSDOS. UNIX and PC treat files as own. UNIX runs in background. Coexists with standard network protocols.
IBM PC, AT ☐ 40 KB req. ☐ Introduced: 1984 ☐ Cost: $250

MARCSOFT SOFTWARE

☐ Screen Colors
Controls color monitor for PCDOS.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $35

MARTIN MARIETTA DATA SYSTEMS
(operating company of Martin Marietta Corp.)

☐ RunIT
DOS shell program. Provides an interface to all PC routines.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $100

MATRIX SOFTWARE TECHNOLOGY CORP.

☐ Synergy
Multi-tasking, graphics-based, TOPVIEW-compatible operating environment. Offers pull-down menus, icons, windowing, dialog boxes and context-sensitive help facilities. Standalone or overlay for TOPVIEW. Twelve K code size.
IBM PC ☐ 64 KB req. ☐ Copies sold: 650 since 1985 ☐ Cost: $395

☐ Synergy Desktop
DOS interface and desktop accessory. Acts as intermediary between DOS and applications. Manages system memory and multi-tasking processes. Includes calculator, notepad, clipboard and install utilities functions.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $70

MAXAMEDIA CORP.

☐ MAXAM
Context-sensitive, RAM-resident utility. Provides condensed DOS manual which opens to correct command.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $50

METAWARE, INC.
SEE AD ON PAGE 283

☐ DOS Helper
UNIX-like utility programs for OS enhancement under MSDOS hierarchical directory structure. File archiving and searching functions.
IBM PC ☐ 128 KB req. ☐ Copies sold: 7,500 since 1984 ☐ Cost: $50

MICHTRON, INC.

☐ DS DOS PLUS 2.11
Enhances MSDOS 2.11. Reads 40-track disk in 80-track drive. Controls any combination of 40- and 80-track drives. Reads or writes 8, 9 or 10 sectors per track on 40-track drives and 10 sectors per track on 80-track drives.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $50

☐ M DISK
Uses RAM to act as additional disk drive.
IBM PC ☐ 192 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $35

MICRO ASSOCIATES, INC.

☐ MICA/PI (Productivity Interface)
Provides bridge between MICA Accounting Series and productivity packages such as spreadsheet, data base and word processing.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1982 ☐ Cost: $295

MICROCORP

☐ INTELLITASK
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $225

MICROTOUCH SYSTEMS, INC.

☐ DrivePoint
Provides buffered I/O to serial port of MSI's Point-1 Monitors. Configures, programs and communicates with intelligent touch screen controller. Formats/sends commands to controller. Reads responses from controller.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $125

MICROWAY, INC.

SEE AD ON COVER 3

☐ 87FORTRAN/RTOS
ANSI-77 subset. Generates 8087 code to use 8087 data types. Supports subset I/O including internal/external files and listed directed I/O. Accesses 8088 ports. Logical operations on 8- and 16-bit operands. Requires Intel 8087 NDP.
IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 350 since 1984 ☐ Cost: $1,350

THE MOM CORP.

☐ PC/COM - VS
Virtual storage and process control. Transparent mainframe diskette support for PC. Configures process controller to define programs, utilities and systems used on system.
IBM PC, XT, AT ☐ Cost: $250

PETER NORTON COMPUTING

☐ Norton Utilities
Reviewed Jul/Aug 1983 p. 70.
Extends DOS for IBM PC. File recovery, disk display and screen control.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 100,000 since 1982 ☐ Cost: $100

NOSTRADAMUS, INC.

SEE AD ON PAGE 240

☐ Noblink/Accelerator
Pop-up window for choosing cursor and accelerated speed of cursor. Provides 26 choices of colored cursors or reverse video non-blinking and conditional blinking for monochrome monitors.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $50

OPT-TECH DATA PROCESSING

SEE AD ON PAGE 2

☐ Scroll & Recall
Screen and keyboard enhancement. Scrolls back through data that has gone off top of screen. Captured data can be saved to a disk file.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $69

ORCHID TECHNOLOGY, INC.

☐ PCturbo Concurrency System
Concurrent processing on both PCturbo's 80186 processor and on processor in 8088 or 80286 in base machine. Full size window and keyboard to each application. Works under Virtual Machine Architecture running applications independently, sharing peripherals.
IBM PC, XT, AT

PERCON (PERIPHERAL CONNECTIONS, INC.)

☐ BARCOM
Makes input from COM1 or COM2 serial port on MSDOS computer appear as keyboard input to applications software. Permits serial port and keyboard input to be intermixed. Works with Lotus 1-2-3, WordStar, dBASE III, MSDOS command processor, and utilities.
IBM PC, XT, AT ☐ 600 KB req. ☐ Introduced: 1984 ☐ Cost: $99

PERSOFT, INC. (WI)

☐ Referee
Manages RAM-resident programs. Allows PC user to load multiple memory-resident programs without data loss/malfunctions. User can team up only those RAM-resident programs that are appropriate with particular application program.
IBM PC ☐ 128 KB req. ☐ Cost: $70

PERSONAL COMPUTER SUPPORT GROUP, INC.

☐ Lightning
Increases processing speed of IBM PC by disk caching.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1985

PHOENIX TECHNOLOGIES, LTD.

☐ MSDOS Integration
I/O routines and utilities to implement Microsoft's MSDOS version 2 OS for OEM's hardware. Supplies IO.SYS portion of MSDOS and utility programs.
IBM PC ☐ 128 KB req. ☐ Copies sold: 15 since 1982 ☐ Cost: $50,000

POWER UP

☐ One-Key DOS
Memory-resident interface to DOS. Executes most DOS commands including copy and delete files and change directories. Runs small programs from within.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $30

☐ Program Director
Creates applications menu by assigning each program's start command to menu number. Accepts DOS commands without having to exit to DOS. Three optional levels of password protection. Turns monitor off when user is absent for over 5 minutes.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $50

PROFIT SYSTEMS, INC.

☐ Team-Master
Runs nine tasks simultaneously.
IBM, PC, XT, AT ☐ 50 KB req. ☐ Introduced: 1982 ☐ Cost: $475-$1,175

☐ Team-Mate
Enables multi-user operation on single IBM PC, XT or AT.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $195

PROXIMITY TECHNOLOGY, INC.

☐ PF-BIOS
DOS-like software interface for PF-PC board for IBM PC.
IBM PC

RAYTRONICS

☐ DRIVEPLUS
Emulates four disk drives with eight names. Allows alias names for software compatibility. Works with RAMPLUS memory cards with memory sizes over 1 Mb.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $60

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ PL/M Connection
Interfaces with PL/M language. Accesses DOS and BIOS functions, and high-speed graphics functions which interface with color graphics and monochrome display adapters.
IBM PC ☐ 256 KB req. ☐ Copies sold: 650 since 1985 ☐ Cost: $295

ROCKY MOUNTAIN SOFTWARE SYSTEMS

☐ Carousel MicroTools
Supports UNIX functions including pipes, filters, re-directed I/O and scripts. Desk calculator, compress/expand, encrypt/decrypt, file split, text formatter, file compare, macro processor, text pattern search, number lines, sort, stream editor, data manipulation, command search, archive files, transliterate characters and command shell.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $90

ROSESOFT, INC.

☐ ProKey
Reviewed Oct 1985 p. 131.
Creates macros to customize programs. Assigns definitions to keys. Retrieves stock histories from Dow Jones. Updates Lotus 1-2-3 spreadsheets. Manages log-on protocol for networks.
IBM PC, XT, AT, PCjr, 3270-PC ☐ 96 KB req. ☐ Copies sold: 65,000 since 1982 ☐ Cost: $130

SCHUCHARDT SOFTWARE SYSTEMS, INC.

☐ InteMate
Accesses any program without going through OS. Transfers data from one program to another. Major DOS commands replaced with function key. Secondary file manager selects files to be run. Allows 80 character description of file. Screen editor.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $249

SDA ASSOCIATES

☐ FilePaq
Six utilities to enhance PCDOS commands. Operates on all subdirectory levels defined by tree structure. Uses global characters in directory names.
IBM PC, XT, AT ☐ Cost: $40

SOFTLOGIC SOLUTIONS, INC.

☐ DoubleDOS
Reviewed Dec 1985 p. 52.
Allows IBM PC to operate as multi-tasking system, performing 2 or more operations concurrently, using existing software, with total DOS compatibility.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 65,000 since 1984 ☐ Cost: $50

☐ Software Carousel
Memory manager puts programs into high-end memory for temporary storage when not in use. Simulates slide projector. Switches 10 programs from extended RAM, expanded RAM or disk itself.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $50

SOFTSTAR INTERNATIONAL, INC.

☐ DOS MANager
Supports DOS functions. Archives, unerases, moves, views, encrypts, copies, deletes, hides, prints and renames files. Searches for directories and cannot find files. Sets up configuration system file. Includes write and printer manager.
IBM PC ☐ 256 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $79

SOFTWARE MASTERS (IN)

☐ Buffer-Master
Keyboard buffer extender from 15 to 2,000 key type ahead.
IBM PC, AT, XT, PCjr ☐ Cost: $30

SOFTWARE RESEARCH TECHNOLOGY

☐ SmartKey II Plus
Reviewed Oct 1985 p. 131.
Keyboard configuration program supporting Dvorak layout. Allows redefinition of any key as any other character or character string. Keys may be redefined while other software is in operation.
IBM PC, XT, PCjr ☐ Cost: $90

SOFTWARE SOLUTIONS, INC. (CT)

☐ DOSease
Reviewed Oct 1984 p. 36.
Menu interface to PCDOS. Accesses full power of DOS. Eliminates need to memorize cryptic DOS commands. Supports execution with fewer keystrokes. Screen highlighting and color capabilities. Integrates with SSI's DATAEASE, information management system.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $100

THE SUCCESS PRESS

☐ DOS HELP
On screen help for DOS commands. User-modified screens and user-selected topics.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $20

SUNNY HILL SOFTWARE

SEE AD ON PAGE 351

☐ TASKVIEW
Provides multi-tasking enhanced functionality to Lotus 1-2-3, Sidekick and MultiMate. Partitions may be selectively suspended by user.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Cost: $70

SYSTEM SOLUTIONS ASSOCIATES

☐ ESP 1 (Extended System Power One)
Stores up to 18 PCDOS applications in memory at same time. Users can switch among several RAM-resident tasks by pressing system request key. Allots 640 KB per application up to 16 MB.
IBM PC, AT

TANGENT TECHNOLOGIES

☐ PC MacBridge
IBM PC users can share the Apple LaserWriter with up to 31 work group users on a network.
IBM PC ☐ Cost: $595

TEXAS INSTRUMENTS

☐ NaturalLink Access to MS-DOS
Translates English sentences constructed by user into MSDOS commands. User chooses from presented words/phrases with software guidance.
IBM PC ☐ 256-512 KB req. ☐ Cost: $75-$125

THEOS SOFTWARE CORP.

☐ BASIC 87
Enhances speed/accuracy of floating point arithmetic operations. Uses Intel's 8087 numeric processor extension. Source code compatible with existing BASIC/C programs.
IBM XT, AT ☐ Cost: $695

☐ Theo-DOS
DOS emulator for Theos 286-V OS. Interprets DOS commands and executes corresponding Theos 286-V commands. Supports multi-user environment. Runs various MS-DOS programs.
IBM AT ☐ 35 KB req. ☐ Cost: $150-$250

THOMPSON AUTOMATION

☐ Percent
Provides UNIX compatible command environment for MSDOS. Consists of command interpreter and numerous utility commands. Provides functionality of UNIX Bourne Shell with some extensions consistent with Berkeley C-Shell including command history, aliases, directory stack and enhanced I/O redirection.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $95

THORNHILL CORP.

☐ File Ease
Performs DOS file and directory functions without complicated DOS commands. Incorporates Lotus 1-2-3-like structure. Allows single command operation to affect multiple files for copy, move, erase, rename and view functions. Locates lost files. Includes wildcard option. Adds, deletes and moves between directories.
IBM PC ☐ 56 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $55

UNISOURCE SOFTWARE CORP.

☐ Connector
Allows PC user to run both DOS and UNIX application programs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $350

UNITED SOFTWARE SECURITY, INC.

☐ TallScreen
DOS session manager. Scrolls screen to review previous DOS output. Includes features that remember typed commands. Manages screen output.
IBM PC, XT, AT ☐ Cost: $40

U.S. DIGITAL CORP.

☐ CPeMulator, Z80 CPeMulator
MSDOS systems read Kaypro-formatted CP/M disks and load and run CP/M-80 programs by preceding object code file name with RUN. Runs 8080 and Z80 code.
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $100

☐ V20 CPeMulator
Runs CP/M-80 software at full speed. Replaces 8088 CPU chip with NEC V20 chip. Reads Kaypro II disks.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $150

UNITED STATES SOFTWARE CORP.

☐ USXZ80 Multi-Tasking Operating System Executive
Multi-tasking OS kernel for embedded applications. Includes dynamic task management, user-defined resource allocation, inter-task communication, priority task scheduling and free memory management.
IBM PC ☐ 3 KB req. ☐ Introduced: 1986 ☐ Cost: $1,950

VAXON, INC.

☐ ConCur
Multi-tasking/user system. Runs 10 application programs concurrently. User can switch any program to foreground with 1 keystroke.
IBM PC, XT, AT ☐ Cost: $195

☐ ConCur Plus
Multi-tasking/user system. Runs 10 application programs concurrently. User can switch any program to foreground with 1 keystroke. Supports 3 workstations.
IBM PC, XT, AT ☐ Cost: $395

☐ ConCur 2/Job
Runs 2 application programs concurrently.
IBM PC, XT, AT ☐ Cost: $99

WANG LABORATORIES, INC.

☐ UJ-3199 Upgrade to Enhanced MS/DOS Operating System
IBM PC ☐ Cost: $100

WESTLAKE DATA CORP.

☐ PathMinder
IBM PC ☐ 256 KB req. ☐ Copies sold: 8,000 since 1984 ☐ Cost: $40

WORKMAN & ASSOCIATES

☐ Z-Shell
Edits and reruns previous DOS commands. Runs multiple commands on one line. UNIX-like commands. Works with Borland's SideKick.
IBM PC ☐ Cost: $80

PERIPHERAL DEVICE DRIVERS

JOHN BEALL & CO., INC.

☐ Expert
Peripheral switching between IBM compatible mainframes. Controls up to 64 local or remotely distributed channel switches. Prompts user to enter single or multiple port requests. Executes prestored configurations/sequences.
IBM PC ☐ 256 KB req. ☐ Cost: $2,500-$15,000

GSS

☐ Device Drivers
Includes 3 volumes of device drivers. Volume 1 comprises display controllers, plotters, printers and input devices. Volume 2 adds several mouse and plotter drivers. Volume 3 contains drivers for graphics tablets and camera film recorders. Conforms to ANSI VDI graphic standards.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $50-$150

☐ Drivers
Set of micro device drivers conforming to ANSI VDI graphic standard. Provides device-independent interface to graphic/alphanumeric capabilities of I/O devices. Includes drivers from GSS Device Drivers with additional display controllers, camera film recorders, printers and virtual device metafile driver.
IBM PC ☐ 128 KB req. ☐ Cost: $200

HERSEY MICRO CONSULTING, INC.

☐ Fansi-Console
ANSI.SYS replacement with more escape sequences. Scroll recall. Screen save. Supports 255-character typeahead and 50- and 43-line displays. DEC VT-100 emulation. Speeds up screen writing. Controls color.
IBM PC, XT, AT, Portable PC ☐ 64 KB req. ☐ Copies sold: 1,800 since 1984 ☐ Cost: $25

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ VDI (Virtual Device Interface) Drivers
IBM no. 6168-460. Supports IBM 5151 Monochrome Display and IBM 5272 Color Display under IBM 3270-PC Control Program.
IBM 3270-PC, 3270-AT

☐ 5218 Printer Driver
IBM no. 6293-576. Peripheral driver. Allows IBM PC users to utilize IBM 5218 Printer with its cut sheet paper handling and envelope feed devices for letter quality print applications.
IBM PC, XT, AT, 3270-PC, Portable PC ☐ 23 KB req.

IBM PERSONALLY DEVELOPED SOFTWARE

☐ Joy Mouse
IBM PDS no. 6276-606. Allows joystick to be used for cursor movement. Assigns 1 of 9 speeds. Supports horizontal or vertical movement. Assigns key functions to and redefines functions for joystick buttons as appropriate. Monochrome and color EGA support.
IBM PC, XT, AT, PCjr, Portable PC ☐ 64 KB req. ☐ Cost: $15

INTELLUTION, INC.

☐ Fix: I/O Drivers
Operable with Allen-Bradley Data Highway, Gould/Modicon Modbus, Honeywell TDC-3000 Data Hiway and Model 200 Gateway, Westinghouse Numalogic, TI Host Interface Adapter, Foxboro 99SC, 99UCB and 760, Acrosystems ACRO-900, Analog Devices uMac-4000 and RTI-8000 series, Data Translation DT2808, Digitronics Sixnet, ETI Micro, IBM Data Acquisition/ Control Adapter and Opto-22 Optomux.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $795-$1,095

☐ Parallel I/O Driver Tool Kit
Library modules and documentation for developing custom I/O drivers that interface The Fix with plug-in IBM bus devices.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $1,200

☐ Serial I/O Driver Tool Kit
Library modules and documentation for developing custom I/O drivers that interface The Fix with serial RS-23C devices.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $1,200

KRAFT SYSTEMS CO.

☐ Executive Cursor Control
Allows Kraft's Premium joystick to assume cursor control functions for use with spreadsheets, word processors and other business software. Supports IBM's TopView and special Lotus 1-2-3 macros.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Cost: $70

MCS GROUP, INC.

☐ Printer Drivers
Compatible with over 65 printers including HP LaserJet, Diablo, Epson, Okidata and Toshiba. Supports Wang word processing features.
IBM PC ☐ 256 KB req. ☐ Copies sold: 20,000 since 1983 ☐ Cost: $100

MICROPLOT SYSTEMS

☐ PlotDev
Device driver. Adds graphics command capabilities to any program language. Imitates DEC VT-100's alpha terminal commands and Tektronix 4010/4014/4027 graphics terminals. Supports most graphics boards including Tecmar and IBM Color. Does not interfere with other memory resident programs. Programmable.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $39

POLARIS SOFTWARE

☐ Ram Resident PrintMerge
RAM-resident print driver for LaserJet or LaserJet Plus. Prints from word processing, spreadsheet or data base programs. Changes fonts anywhere in program. Merges charts, maps and symbols. Includes proportional spacing and justification, shading, patterns, keyboard translation tables and overlay macros.
IBM PC ☐ Cost: $149

RIX SOFTWORKS, INC.

☐ EGA - 123
Set of driver programs for Lotus 1-2-3. Graph mode drivers support color and monochrome displays and hi-res mode of 640 X 350 pixels. Print screen drivers support most graphics printers, some laser printers and Okimate 20 color printer.
IBM PC

TECMAR, INC.

☐ Device Master Software
Enables easy scheduling of devices which are controlled by Tecmar BSR X10.
IBM PC ☐ Cost: $35

WARP SPEED COMPUTER PRODUCTS, INC.

☐ Conductor
Light pen driver and enhancement program for Symphony and Lotus 1-2-3. Enables new menu system adding features and putting light pen control onto existing features.
IBM PC, XT, AT ☐ 126 KB req. ☐ Copies sold: 4,000 since 1985 ☐ Cost: $60

☐ Gemlight
Light pen driver and enhancement program for GEM-Desktop and Collection Series by Digital Research. Overlay program selects menus by touching pen to monitor on word or character being selected.
IBM PC, XT, AT ☐ 126 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $50

☐ Penmouse
Converts mouse driver software to light pen control.
IBM PC, XT, AT ☐ 126 KB req. ☐ Copies sold: 5,000 since 1985 ☐ Cost: $50

☐ Warpstar
Light pen controller and enhancement driver for WordStar. Edits documents on monitor. Enhancement targets speed menu selection using light pen.
IBM PC, AT, XT ☐ 126 KB req. ☐ Copies sold: 700 since 1985 ☐ Cost: $50

PRINT UTILITIES/ SPOOLERS

ACORN PLUS, INC.

☐ Easy Laser
Enables user to select laser printer and enter values to insert into word processor file. Includes default files. Positions text lines/ columns. Indents, centers and justifies text. Underlines, superscripts or subscripts text. Draws rules and boxes. Supports HP and other laser printers.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 200 since 1986 ☐ Cost: $100

ADVANCED MATRIX TECHNOLOGY, INC.

☐ AMTfont
Creates, edits and saves custom characters and symbols for printing on AMT Office Printer.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $295

ALLEN, EMERSON & FRANKLIN, INC.

☐ TPFilter
DOS filter program. Traps special characters in text file and replaces them with appropriate Epson/IBM printer commands to activate special printer features.
IBM PC ☐ 96 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $30

APG SOFTWARE

☐ PNP Capture
Screen dump utility for IBM graphics board on laser and dot matrix printers. Print options include clipping, rotation, expand size and double pass.
IBM PC ☐ 21 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $49

APPLIED SOFTWARE TECH, INC.

☐ Snapshot
Screen-dump utility. Sends screen images to printer. Prints in color on color printers and gray shadings on non-color units. Includes screen to color redefinition.
IBM PC ☐ Cost: $65

ATC SOFTWARE

☐ Big Print
Prints messages in letters to eight inches high including letters, numbers and special symbols.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 4,800 since 1980 ☐ Cost: $50

AVATAR TECHNOLOGIES, INC.

☐ Print-Net
Allows PCs tied to IBM 3270 network to share mainframe printer resources. Switches dynamically between locally-attached PC printer or any 3270 system printer for output.
IBM PC ☐ Introduced: 1985 ☐ Cost: $195

BCS DATA SYSTEMS, INC.

☐ BCS ELPH
Local printer handler. Allows user to plug printer into auxiliary port of CRT. Printer and CRT operate from same modem.
IBM PC ☐ Cost: $295

BUSINESS SYSTEMS INTERNATIONAL, INC.

☐ Lasersoft
Forms generation for Xerox, HP LaserJet and Laser Jet/Plus laser printers. Performs data merging with electronically created forms. Data entry module available to fill out electronic forms. User can create software documentation including CRT printing.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $995

C. ITOH DIGITAL PRODUCTS, INC.

☐ PC Itoh Utilities
Printer utility program. Allows IBM PC users to print spreadsheet graphics in color, run software written for competitive printers and create custom character sets.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $55

CIVIL COMPUTING CORP.

☐ PropStar
Type-set, proportionally-spaced printout for WordStar and NewWorld. Compatible with most daisy wheel printers including Diablo, Qume, NEC and with ps-type wheels.
IBM PC ☐ 85 KB req. ☐ Copies sold: 800 since 1983 ☐ Cost: $50

COMMONWEALTH COMPUTER ASSISTANCE FOR BUSINESS

☐ Printmac
Printer utility for Symphony. Controls 64 Epson font and line-per-page options including elite, pica, condensed, enlarged, single/double-strike and emphasis font options and 33, 66, 88 and 99 lines per page options.
IBM PC, XT, AT ☐ 33 KB req. ☐ Introduced: 1986 ☐ Cost: $20

COMPANION SOFTWARE, INC.

☐ Facelift 2
Accesses 96 typefaces, styles and sizes on Epson printers and compatibles. Selects typeface, style or size from menu.
IBM PC ☐ 256 KB req. ☐ Copies sold: 40,000 since 1985 ☐ Cost: $50

COMPUTATIONAL SYSTEMS, INC.

☐ ADAPTA-Print
Memory resident driver. Contains a print spooler, a forms generator, a sideways print package and IBM to non-IBM print code translator. Makes dot matrix printers compatible with IBM PCs.
IBM PC ☐ 40 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $89

COMPUVISION INTERNATIONAL

☐ Total Printer
Controls features of HP Laserjet and Laserjet Plus. Includes envelope formatting, counters for numbering pages or paragraphs, bold and underline toggle switches, date variable and file merging/separation.
IBM PC ☐ Cost: $79

CONNECTICUT SOFTWARE SYSTEMS CORP.

☐ Printer Boss
Double/quad density letter quality, RAM printer buffer to 32K. Prints sideways from print file or application program. Custom font design in normal and quad density, and in 24x9, 25x15 and 24x37 density on Epson LQ printers. Provides 16 fonts. Block/ line graphics, Greek and math symbols.
IBM PC, XT, PCjr, AT, 3270-PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $130

☐ Sideline
Prints sideways from print file or application program. RAM resident. Unlimited file size. Includes 6 type fonts, custom sideways character font design, full IBM screen character set and unlimited menu settings storage and recall. Supports path names. Right-side up printer control.
IBM PC, XT, AT, PCjr, 3270-PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $70

CONOGRAPHIC CORP.

☐ ConoFonts
Library of name-brand type for use with popular laser printers and PC word processing applications. Includes 20-30 fonts in each package in Times, Souvenir, Triumvirate and display styles. Math/Greek, commercial symbols and borders.
IBM PC, XT, AT ☐ Cost: $100

☐ ConoFonts Manager
Manages and downloads ConoFonts, HP Soft Fonts and internal fonts on LaserJet+ printer. Supports production of configuration files needed by word processors to use downloaded fonts.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $70

CONTROL-C SOFTWARE, INC.

☐ StarBeam
Prints WordStar documents on Canon LBP-8 A1 and A2 Laser Beam printers as is. Provides fonts, horizontal and vertical lines, shaded and unshaded boxes, text in boxes, multiple columns per page, proportional spacing with justification and underline spaces.
IBM PC ☐ Cost: $150

☐ StarJet
Utility to print WordStar documents on HP LaserJet. Provides formatted multiple column output, right justification of unjustified lines, underlining of spaces and multiple fonts. Draws shaded areas. Loads and prints envelopes. Provides horizontal and vertical lines, boxes and monospaced font microjustification.
IBM PC ☐ 45 KB req. ☐ Cost: $150

CYBERENGINEERING CORP.

☐ CyberTools Dot Matrix Printer Fonts Utilities & Library
Font generation. Includes 14-alphabet Hershey Occidental Repertory of fonts with total of 1,377 characters, and Hebrew character set. Different Greek, Roman, Italic, Gothic and Cyrillic fonts. Stores fonts in ASCII files as successive coordinate pairs.
IBM PC

☐ CyberTools Printer Utilities & Library
Prints AUTOST.BAS files, large banner-like print-outs, BASIC programs with highlighted REMS and printer's character set. Supports different biorhythm chart printers. Includes code to suppress printer buzzer. Epson printer utilities, different printer spoolers, and utilities for Wordstar printer set up.
IBM PC

DATACOMP SYSTEMS, INC. (PA)

☐ Business Printf
Output formatting. Replacement for printf, fprintf and sprintf to support comma insertion, floating dollar signs and parentheses for negatives and field fill.
IBM PC ☐ Introduced: 1983 ☐ Cost: $250

DIGITAL CONCEPTS, INC.

☐ Character Library Disk
Additional character fonts for use with DigiCon Print and DigiCon Edit. Font sets include Gothic, western, stencils, shadows, wide or capital letters, thin 12, triangles, darks and stripes.
IBM PC ☐ 128 KB req. ☐ Cost: $20

☐ DigiCon Edit
On-screen editor for foreign language and special symbol character sets and forms for use with DigiCon Print. Insert, exchange and template editing modes. Draft, medium and high-quality printing. Prints single or multiple fonts per document.
IBM PC ☐ 128 KB req. ☐ Cost: $50

☐ DigiCon Print
Variety of character size and style fonts for Epson printers. Allows sideways printing. Includes foreign language characters. Forms creation capability. Multi-directional printing. Sections text in columns or blocks. Draft, medium and high-quality printing. Automatic scaling to size.
IBM PC ☐ 128 KB req. ☐ Cost: $50

DORING LABELS, INC.

☐ Make-A-Label
Electronics label printing system.
IBM PC ☐ 256 KB req. ☐ Cost: $1,295-$1,610

ELLIS COMPUTING, INC.

☐ BigPrint
Prints large block characters horizontally. Characters available include letters A through Z, upper and lower case; numbers 0 through 9; and 27 special characters.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $20

EMULEX CORP.

☐ Wait-Less Printing
Prints from PC while processing other tasks at keyboard. Deactivates spooler, sending data to printer. Multiple printers, parallel and serial printers, 2 communications lines, 4 line printer terminals. Assigns spool buffer. User-defined comm support handshaking including Xon/Xoff.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982

ENTELEKON

SEE AD ON PAGE 372

☐ Superfonts for C
Provides character and image font libraries or allows user to build custom character/image libraries. Extra-size letters and fonts.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $50

EURO-SOFTWARE SERVICES, INC.

(division of ESS Software Trading)

☐ LaserSet
Assists set up of HP Laserjet and Laserjet Plus printers. Memory resident. Allows user to switch fonts during printing. Font attributes include print orientation, symbol set, spacing, pitch, point size, style, stroke weight and typeface.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $50

FIELD COMPUTER PRODUCTS

☐ FX256 & NUCHAR
For use with Epson FX-80 and FX-100 printers. Extends printers to use IBM's 256 characters. Allows customization of up to 128 printing characters available through FX256.
IBM PC, XT ☐ Cost: $35

☐ PR256 & NUCHAR
Extends Epson MX-80 and MX-100 printers to provide IBM's 256 characters. Customizes up to 128 printing characters available through PR256. Requires Epson GRAFTRAX-PLUS or GRAFTRAX printer options.
IBM PC, XT ☐ Cost: $35

FORMMAKER SOFTWARE, INC.

☐ FormMaker II
Creates forms and labels for output through Laser printers. Utilizes mouse for creating lines, boxes, borders, bar codes and other graphics, or for moving lines of text, changing type font sizes or repositioning sections on the monitor.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $495

GENERIC COMPUTER PRODUCTS, INC.

☐ Prnspool
Saves print-ready file to buffer. Executes output without having to exit application program. Supports multiple printers or plotters on one computer allowing simultaneous and independent spooling to every device. Provides spooling control from DOS command level.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $40

GENERIC SOFTWARE, INC.

☐ Dot Plot
Converts 100 dot matrix printers into hi-res plotters. Plots can be up to 14 inches wide with unlimited length, rotated 90 degrees and fitted or scaled. Works with Generic CADD.
IBM PC

GETC SOFTWARE, INC.

☐ PrintMission
Support for Toshiba 3 in One printers. Comprised of font editor, screen print utility, graphics character set and pop-up printer controller.
IBM PC ☐ 128 KB req. ☐ Cost: $85

GRANNY'S OLD-FASHIONED SOFTWARE

☐ LQ
Printer enhancement. Produces near-letter-quality print in boldface, underline, italics, superscript and subscript. Provides large and extra-large characters. Allows proportional spacing. User can switch fonts within document. Includes character editor. Compatible with Epson and most dot matrix printers.
IBM PC ☐ 80 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $35

HAMMERLAB CORP.

☐ Lettrix
Prints proportionally-spaced, letter-quality text in 20 typefaces plus foreign languages with accents. Works with word processing programs. Prints lines and boxes with IBM graphics characters. Designs letters on monochrome or graphics screen in 24x16 matrix. Prints scientific formula.
IBM PC, XT, AT, PCjr ☐ 55 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $99

HEWLETT-PACKARD CO.

☐ Print Central
Connects HP PCs and IBM XTs via RS-232C direct connections to such HP 3000-based printers as the 2688A, 2680A and 2686A laser printers, 2601A/2602A letter-quality daisywheel printers and 2934A dot-matrix printers in U.S and U.K English, French and German.
IBM XT ☐ 384 KB req. ☐ Cost: $180

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ IBM 3812 Pageprinter Font Management System
IBM no. 6466-982. Customizes 3812 fonts shipped with printer, changes power on default options, selects and includes special fonts and creates enterprise-specific 3812 font libraries. Creates logos and signatures.
IBM XT, AT ☐ 512 KB req. ☐ Cost: $375

☐ LAN Print Manager
IBM no. 6317-042. Allows workstations attached to IBM PC Networks or Corvus OMNINET LANs to share IBM 3820 Page Printer on LAN.
IBM PC

☐ Pageprinter Driver
IBM no. 6466-981. Exploits features of 3812 Pageprinter. Allows selection of fonts, page orientation, paper drawer, margins, tabs, lines per inch and other Pageprinter options. Up to 8 users can connect to Pageprinter with its optional sharing card feature.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $49

☐ Print Screen Utility
IBM no. 6024-186.
IBM PC, XT ☐ Cost: $35

IBM PERSONALLY DEVELOPED SOFTWARE

☐ PC Print

IBM PDS no. 6276-613. Creates and edits printer fonts and allows normal and sideways printing. Prints 10, 12, 15 or 17 characters per inch. Uses large type styles. Reflows text to desired width and right justifies text. Specifies indentation. Monochrome and color EGA support.
IBM PC, XT, AT, PCjr, Portable PC ☐ 128 KB req. ☐ Cost: $25

☐ Personal Print Control

IBM PDS no. 6276-573. Marks and positions printer to jobs in printer buffer for reprinting. Compressed, double-struck, double-width, emphasized or underlined print. User-specific printer control character strings. Multiple copies. Printed output spooling. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $30

☐ Print Buffer On-Line

IBM PDS no. 6276-521. Passes data to an up to 62 KB print buffer to allow one job to be printed while host processes other jobs. Controls printing process via such commands as pause/resume, reprint page and reprint documents. Color EGA support.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ 128 KB req. ☐ Cost: $20

☐ PrintDW

IBM PDS no. 6276-604. Converts IBM DisplayWrite files to standard ASCII files. Prepares IBM DisplayWrite files for use on printers capable of printing files with only graphics characters. Can be customized to recognize and strip out escape sequences for specific printers. Monochrome and color EGA support.
IBM PC, XT, AT, PCjr, Portable PC ☐ 128 KB req. ☐ Cost: $20

☐ Select-A-Font

IBM PDS no. 6276-514. Provides such basic formatting controls as centering, indenting, text justification, line skipping, tabbing and underlining. Type styles are selectable from 3 type sizes, 9 character widths and 2 print densities. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $20

IMAGE COMPUTER SYSTEMS

☐ Metatext

Converts dot-matrix print to letter-quality type. Intercepts characters sent to printer and converts them into hi-res plot data. Contains 6 fonts. Emulates IBM Graphics Printer. Drives most dot-matrix printers that recognize Epson control codes.
IBM PC ☐ Cost: $129

INSIGHT DEVELOPMENT CORP.

☐ LaserControl 100, 200, 300

Printer driver and utility setup system. Includes downloadable fonts, pop-up menus and proportional right justification. Compatible with 24,000 applications. Supports Diablo, Qume, NEC, Epson, DEC LN03, Xerox, IBM, QMSKISS, Smartwriter, Cannon and Ricoh printers.
IBM PC, XT, AT ☐ 13 KB req. ☐ Copies sold: 3,500 since 1985 ☐ Cost: $150 (100); $499 (200); $749 (300)

INTEGRATED MARKETING CO. (IMC)

☐ Data Manager

Connects 5 PCs with RS-232 interfaces to any printer with RS-232 interface. Stores finished copy for final printout on first-in, first-out basis. Allows data transportation up to 19.2 K bits per second. Provides 1 MB of memory storage.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $695

INTERACTIVE SYSTEMS CORP. (CA)

☐ INpost/LQP

Postprocessor for Diablo 1600 series, Qume Sprint/5 and NEC Spinwriter printers. Translates text and Interactive's INword intermediate language into control codes and text to be sent to letter quality printers.
IBM RT, AT/AIX, PC/IX

☐ INpost/6670

Postprocessor for IBM 6670 laser printer. Translates text and Interactive's INword intermediate language into control codes and text to be sent to IBM 6670 laser printer.
IBM RT, AT/AIX, PC/IX

JEWELL TECHNOLOGIES, INC.

☐ GRAFPLUS

Produces black/white or color scaled dot matrix reproductions of user's display.
IBM PC ☐ Cost: $50

KELLER SOFTWARE

☐ Laser Fonts

Memory-resident font selection for HP LaserJet and LaserJet Plus printers. Utilizes 3-digit codes and A through W font cartridges. Allows font changes in middle of page, sentence or word. Works within spreadsheets, DBMSs, word processors and text editors.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $39

KOCH SOFTWARE INDUSTRIES, INC.

☐ Fontastic

Controls font selection, printout orientation, printer resetting, page ejecting, margin setting and page shading segments. Supports all font cartridges and most laser and dot matrix printers.
IBM PC, XT, AT ☐ Cost: $90

LEBAUGH SOFTWARE CORP.

☐ LePrint

Used with word processors that convert to ASCII text file. Allows change of type styles/sizes within line. Tracks separate/independent fonts. Superimposes 1 character over another. Prints selected page numbers or entire document. Fourteen type styles available. Prints mathematical equations/fractions.
IBM PC ☐ 256 KB req. ☐ Cost: $149-$275

LOWELL SYSTEMS, INC.

☐ Labeltronic 1000 System

Produces labels by replacing preprinted labels with label templates. Specifies over 24 bar codes. Prints horizontally or vertically. Operates in immediate or production mode. Features serial number tracking.
IBM XT

MACRO SYSTEK, INC.

☐ Macro-Net Software

Allows users of Corona laser printer to attach up to 4 computer devices. Network host runs transparent to users. User redirects printer port to appropriate com port on PC system. Stores/prints tasks on previously defined priority basis.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 180 since 1985 ☐ Cost: $795

MARCSOFT SOFTWARE

☐ OKI/PC Connection

Controls printing modes of Okidata printers for MSDOS from menu-driven program.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $35; $60 (source)

☐ Printer Interfacer

Interface for MSDOS to any printer. Sets software selectable print codes for printer.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $60

MARVEL SOFTWARE

☐ Print

Provides proportional spacing, user-created graphics and character sets, backspacing, label printing, subscripts, superscripts, underlining, enhanced or emphasized print, double width, pica, elite or condensed text.
IBM PC ☐ Cost: $70-$90

MICHTRON, INC.

☐ Freeze Frame

Handles text or graphic screen dump to printer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $40

☐ Soft Spool

RAM spooler for printing.
IBM PC ☐ 192 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $35

MICROPLOT SYSTEMS

☐ CasPrint

Saves entire CAS on-line session which includes pages of text with graphic representations of molecules in disk file. Prints on dot matrix printer off-line. Prints graphics images at 1024 X 780 resolution.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $40

☐ PrintPlot

Prints image of picture file on dot matrix printer using full resolution of Tektronix 4010 data file, 1024 X 780, rather than reduced resolution from direct dump.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $50

NORTHWEST SOFTWARE ASSOCIATES (NWSA)

☐ PrintKey Universal Printer Driver

Memory resident. Allows access to printer features from within any other software. User-defined command sequences. Access by keystrokes and/or embedded characters. Pop-up menu.
IBM PC, XT, AT ☐ 20 KB req. ☐ Introduced: 1986 ☐ Cost: $90

OASYS

(division of XEL, Inc.)

☐ LaserPro Editor I, II

Provides LaserPro laser printer users with expanded control over font variations. Fonts created or modified can be used with most standard word processing, spreadsheet and graphics programs.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $50 (Editor I); $399 (Editor II)

OKIDATA

☐ Okifont

Includes standard, italic, roman, gothic, Symbol II and Symbol 10 fonts. Allows any combination of fonts to be used within same document. User can create new fonts.
IBM PC, XT ☐ Cost: $50

ORBIT ENTERPRISES, INC.

☐ SETHP

Font setup utility for HP LaserJet Printer. Controls printer options, sets feed type, number of copies, font selection, margins, line wrap and underline features. Works from menu or within batch files.
IBM PC ☐ 64 KB req. ☐ Cost: $50

PECAN SOFTWARE SYSTEMS, INC.

☐ Print Spooler
IBM PC, XT, AT ☐ Cost: $30

PHOTON SOFTWARE
(division of Care Computer Systems)

☐ PrintMate
Imbeds user-defined printer control codes. Can imbed one product's printer code to access features on another unsupported printer.
IBM PC, XT, AT ☐ 9 KB req. ☐ Introduced: 1986 ☐ Cost: $30

☐ Softype
Provides four functions while working inside another program. Emulates memory-typewriter. Allows instant printing of short letter or memo. Completes office forms. Selects print characteristics.
IBM PC, XT ☐ 35 KB req. ☐ Copies sold: 3,000 since 1985 ☐ Cost: $69

POEMS

☐ POEMS Font Editing System
Changes existing characters and creates new characters on graphics display. Stores characters in master font format for later printing.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985

POLARIS SOFTWARE

☐ PrintMerge
Print control. Uses WordStar commands. Allows changing fonts anywhere in program. Merges graphics into document. Includes proportional spacing and justification, page layout commands, multiple headers/footers, tables with proportional fonts, super/subscript and underlining. Works with HP LaserJet and LaserJet Plus printers.
IBM PC, XT, AT ☐ 196 KB req. ☐ Cost: $124

☐ Setup Utility
Downloads soft fonts to HP LaserJet and LaserJet Plus. Works with Polaris systems.
IBM PC, XT, AT ☐ Cost: $25

POWER UP

☐ Banner Builder
Prints message sideways on 80-column paper in bold, 6-inch-high capital letters.
IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Cost: $30

☐ Print Commander
Provides access to printer commands from within current application. Stops or clears spooler without restarting system. Pop-up menu converts control codes to plain English. Switches among multiple printers or between several modes for single printer. Accepts custom preconfigurations.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $50

☐ Sign Designer
Prints sideways on 80-column paper. Type styles include executive, block and Gothic. Character height is adjustable from ¼" to 8", up to 10 lines deep with up to 122 characters per line. Print options include high-density or fast-print.
IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Cost: $60

☐ Typewriter
Prints each character as typed or one line at a time. Wordwrap. Status line tells current line length, typing mode and cursor position. Sets tabs and margins.
IBM PC, XT, AT ☐ 48 KB req. ☐ Cost: $40

☐ Widespread
Prints documents horizontally. Prints 3 type sizes including 14, 12 and 9 characters per inch.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $50

RIX SOFTWORKS, INC.

☐ TV Spool
Printer spooler for TopView environment. Disk resident queue, page buffer, banner processor, delete after and multiple copies. Maintains queue of up to 100 files to be printed.
IBM PC

ROCKY MOUNTAIN SOFTWARE SYSTEMS

☐ WordPatch
IBM PC ☐ 64 KB req. ☐ Copies sold: 4,000 since 1983 ☐ Cost: $50

SCIENTIFIC ENDEAVORS CORP.

☐ TFONT
Collection of utilities for Toshiba printers with down-loadable fonts. Includes font editor and font loader. Turns printer into typewriter.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $20

SDA ASSOCIATES

☐ OkiPaq
Prints 255 IBM PC characters and graphics screen images for Okidata 92/93 printer. Checks to ensure that printer device actually exists. Sets attributes of printer from PC terminal. Supports character sizes, print quality, tab settings and standard defaults.
IBM PC, XT, AT ☐ Cost: $30

SOFTCORP, INC.

☐ Side Step
Printer utility that allows text to be printed sideways. Rotates documents 90 degrees. Contains 18 combinations of font size and print quality. Provides hard disk path and wildcard filename support, operation from DOS command and display of directories or subdirectories.
IBM PC, XT, PCjr ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $60

SOFTCRAFT, INC. (WI)

☐ Fancy Font
Provides fonts in sizes 8 to 24 points and in styles including Roman, Bold, Italic, Script and Old English. New characters or logos, up to 1" x 1", can be created by user.
IBM PC, PCjr ☐ 196 KB req. ☐ Copies sold: 75,000 since 1982 ☐ Cost: $180

☐ Fancy Word
Produces type styles and sizes for Microsoft Word users. Includes Roman, sans serif, bold, italic, script, Old English in 10-24 point sizes. Offers optional fonts in sizes from 6 to 72 points. User-created special characters and logos.
IBM PC ☐ 196 KB req. ☐ Copies sold: 15,000 since 1985 ☐ Cost: $140

☐ Laser Fonts
Downloads fonts in sizes 8-24 points and in styles including Roman, bold, italic, script and Old English. User creates new characters or logos up to 1" x 1". Comes with over 1,500 mathematical, foreign language and other special symbols.
IBM PC, PCjr ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $180

SOFTKEY SOFTWARE PRODUCTS, INC.

☐ KeyType
Allows user to select printer's font type and printing options by selecting desired settings from single menu.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 9,000 since 1984 ☐ Cost: $60

SOFTSTYLE, INC.

☐ Printworks For Dot Matrix
User selects combinations of print modes (including emphasized and proportional), type size, line spacing, page size, additional print modes and foreign character sets. Prints sideways down page. Includes font editor and math and science symbols.
IBM PC, AT, XT, PCjr ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $70

☐ Printworks For Lasers
Menu-resident utility and enhancement for laser printing. Provides menu selection of laser printing features, merged text and graphics, and on-call Epson MX printer emulation.
IBM PC, XT, AT, PCjr ☐ Cost: $125

SOFTWARE CONSULTANTS INTERNATIONAL

☐ PrinScil
Eliminates escape or printer codes. User-tailored output. Prints and/or saves output for later use.
IBM PC, PCjr, XT ☐ 128 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $30

SOFTWARE DIRECTIONS, INC.

☐ PrintQ
Prints up to 255 copies. Views documents without printing. Prioritizes document printing. Prints same form types together to minimize changes. Handles each individual report or print file based on specifications.
IBM PC, XT, AT, PCjr ☐ 192 KB req. ☐ Cost: $89

SOFTWARE MASTERS (IN)

☐ Spool-Master
RAM print spooler. Multiple copies. Handles single sheets. Any buffer size.
IBM PC, AT, XT, PCjr ☐ Cost: $50

SOFTWARE RESEARCH TECHNOLOGY

☐ Smart Print II
Enhancement to SmartKey II. Accesses printer functions normally unavailable. Characters imbedded in text. Translates characters into printer's control codes. Supports printers accepting function sequences for bold face and italics.
IBM PC ☐ Cost: $50

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ EPSWord
Modifies WordStar to provide Graftrax-Plus capabilities on Epson or IBM printers. Print features include compressed font, italics, doublestrike, emphasized characters or half-height superscripts.
IBM PC ☐ Cost: $40

☐ PC Form
Text formatting system designed for operating with line printer. Supports macro commands 10 deep, and printer specifications for overstrike and doublestrike. Functions include setting text characteristics, text formatting, page control, printer control and macros.
IBM PC ☐ 32 KB req. ☐ Cost: $50

☐ Super Print
For use with Wordstar to optimize printer features. Includes create/print on empty pages, chaining different files, changes strikeover character, alternate Greek character set and redefining control characters.
IBM PC ☐ Cost: $30

☐ Transfer Tex
Heat transfer of printer output to other surfaces. Prints enlarged letters in reverse in order to have a correctly transferred image.
IBM PC ☐ 64 KB req. ☐ Cost: $30

STRAIGHTFORWARD

☐ ZDirector
Font management and printer support system. Manages fonts, sets up printer, down loads fonts, modifies fonts for special requirements and creates new fonts.
IBM PC, XT, AT

THE SUCCESS PRESS

☐ FX
Sets or modifies any option or set of options on any Epson FX or RX series printer interactively or from batch file. Emulates an electronic typewriter.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $20

TALL TREE SYSTEMS

SEE AD ON PAGES 207/209

☐ JSPOOL
Handles up to eight serial and parallel printers. Buffer may be any size. Files marked to any printer, and may contain printer control codes. Parameters adjustable.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $60

TELEXPRESS, INC.

☐ XPD (XENIX Print Daemon)
Directs XENIX print files from any micro equipped with Teleterm EM, terminal or console, to any micro, terminal or console acting as printer workstation. Pauses between pages, controls queue functions and adjusts forms on printer.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $250

TEXAS INSTRUMENTS

☐ Font Gen
Custom font generator for TI's OMNI 800 series of microprinters. Creates non-Arabic character sets such as Chinese or Japanese alphabets. Stores custom characters, recurring symbols or corporate logos for repetitive use.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $50

TJ SOFTWARE, INC.

☐ Label Maker
Prints bar codes, OCR-A like and large characters from data entered at keyboard or from disk. Creates and saves unique printing formats and record layout. Performs record add, change, delete, sort and select.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $195

☐ Matrix Printer Analysis
Determines if matrix printer bar codes meet ANSI standards. Dot pattern configuration for 3-of-9 and Interleaved 2-of-5 bar codes, determined from horizontal and vertical dot spacing and printed dot size.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $2,500

WANG LABORATORIES, INC.

☐ PC Brother EM100 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Brother HR15 and HR25 Printer Driver
IBM PC ☐ Cost: $100

☐ PC C.Itoh Prowriter 8510 Printer Driver
IBM PC ☐ Cost: $100

☐ PC C.Itoh Starwriter F10 Printer Driver
IBM PC ☐ Cost: $100

☐ PC C.Itoh 8600B Printer Driver
IBM PC ☐ Cost: $100

☐ PC Daisywriter 2000/1500 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Datasouth DS180 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Diablo 620 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Diablo 630 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Diablo 630 with F3200 F33 Printer Driver
IBM PC ☐ Cost: $150

☐ PC Epson FX80 and FX100 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Epson LQ1500 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Epson MX80 and MX100 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Hewlett-Packard Laser Jet Printer Driver
IBM PC ☐ Cost: $100

☐ PC IDS Prism 132 Printer Driver
IBM PC ☐ Cost: $100

☐ PC NEC 3510 Printer Driver
IBM PC ☐ Cost: $100

☐ PC NEC 3515 Printer Driver
IBM PC ☐ Cost: $100

☐ PC NEC 3530 Printer Driver
IBM PC ☐ Cost: $100

☐ PC NEC 3530 with NEC SF Printer Driver
IBM PC ☐ Cost: $150

☐ PC NEC 7710 Printer Driver
IBM PC ☐ Cost: $100

☐ PC NEC 7715 Printer Driver
IBM PC ☐ Cost: $100

☐ PC NEC 7730 Printer Driver
IBM PC ☐ Cost: $100

☐ PC NEC 7730 with NEC SF Printer Driver
IBM PC ☐ Cost: $150

☐ PC Okidata 2410 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Okidata 82 and 83 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Okidata 84, 92 and 93 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Olympia ESW 3000 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Olympia ESW 3000 with Olympia SF Printer Driver
IBM PC ☐ Cost: $150

☐ PC Qume Sprint 11/55 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Qume Sprint 11/55 with Olympia SF Printer Driver
IBM PC ☐ Cost: $150

☐ PC Toshiba P1350 and P1351 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Wang 2233 and 2235 Printer Driver
IBM PC ☐ Cost: $100

☐ PC Wang 2281 with Wang SF Printer Driver
IBM PC ☐ Cost: $150

☐ PC Wang 2281W Printer Driver
IBM PC ☐ Cost: $100

WAYMAN AND ASSOCIATES, INC.

☐ Laser-Pac
Interfaces word processing documents and data processing reports to laser printer. Assists user in changing fonts and typesetting.
IBM PC ☐ Copies sold: 50 since 1985

WRITING CONSULTANTS

(division of Microlytics, Inc.)

☐ ProportionalStar
Modifies WordStar, enabling proportionally spaced printing and typeset-like text on page.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,500 since 1984 ☐ Cost: $75

XYTON, INC.

☐ Typeon
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $40

ZEBRA SYSTEMS

☐ Mini-Print
Uses 216 dots-per-inch line-spacing and dual-density graphics capabilities of printer to produce 6-point font, 2 lines at a time. Prints 6 mini-pages on each 8 ½ X 11 sheet. Tab size and size and number of mini-pages on each sheet are adjustable.
IBM PC ☐ Cost: $30

Z-SOFT CORP.

☐ FontPak S1
Contains additional stroke fonts for PC Paintbrush. Includes other versions of standard Paintbrush typestyles and cartographic/drawing symbols. Provides Cyrillic characters and mathematical symbols.
IBM PC, XT, AT ☐ Cost: $50

PROGRAM GENERATORS

ACS SYSTEMS, INC. (VA)

☐ QAD (Quick-Quality Application Development)
IBM PC ☐ Copies sold: 1 since 1986 ☐ Cost: $1,999

ALLEN, EMERSON & FRANKLIN, INC.

☐ GTP
Produces source code from paint-the-screen input. Field edits, 3-way data base search, table look-up functions, full-screen input, color and help facility.
IBM PC ☐ 96 KB req. ☐ Copies sold: 120 since 1985 ☐ Cost: $100

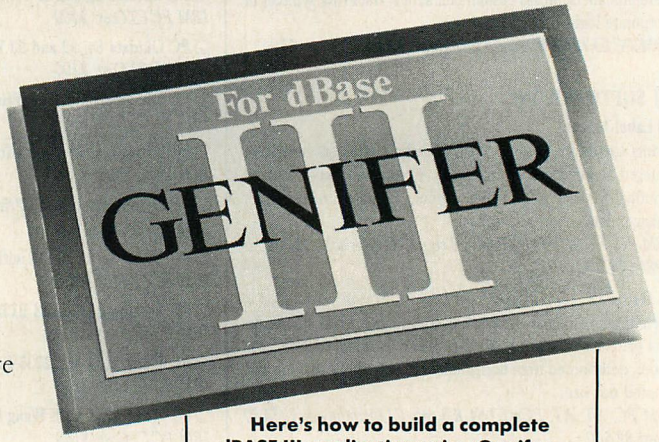
AUSTEC, INC.

☐ ACEGen
COBOL source code generator. Data dictionary creates data base specification. Screen generation defines screen displays for I/O. Program generation creates interactive file maintenance/inquiry, report/forms printing and file processing programs. Requires ACE COBOL and ACEBridge.
IBM PC

DAVID R. BLACK & ASSOCIATES, INC.

☐ COBOL Program Generator
Supports data entry, reporting and utility functions. Maintains central data dictionary. Provides master system menu control, multi-file reports and sorted reports. Includes screen building and project control functions.
IBM PC ☐ 60 KB req. ☐ Copies sold: 150 since 1979 ☐ Cost: $40,000-$50,000

☐ Information Support System
Generates COBOL programs via screen painting. Handles touch screens, color CRTs and multiple printers. Provides multi-languages. Contains COBOL program generator, data dictionary, screen builder and report writer. Produces ANSI standard COBOL programs.
IBM PC ☐ Copies sold: 125 since 1979 ☐ Cost: $30,000-$50,000



THE SOFTWARE BOTTLING COMPANY OF NEW YORK
6600 Long Island Expressway
Maspeth, NY 11378
(718) 458-3700

Screen Sculptor creates professional looking, fully functional screens in minutes, then writes the program either in IBM BASIC, Turbo Pascal, IBM Pascal, or QuickBASIC. Uses simple word processor style screen editor. Instantly generates fully commented, bug-free program source code to provide data entry. Price $120.

THE SOFTWARE BOTTLING COMPANY OF NEW YORK
6600 Long Island Expressway
Maspeth, NY 11378
(718) 458-3700

Flash code is a program developer for dBase II, III, and III Plus. Comes with a powerful screen editor, window editor, a program generator, and flash-up feature to put pop up windows and menus into dBase application. The window editor and flash-up feature together, create menus and windows that add new dimensions to dBase applications. No more license fee for flash-up module. Price $150.

IF YOU'VE GOT MORE IMPORTANT THINGS TO DO THAN CRANK OUT dBASE III CODE, YOU NEED GENIFER!

Now, get the highest quality programs in the shortest possible time.

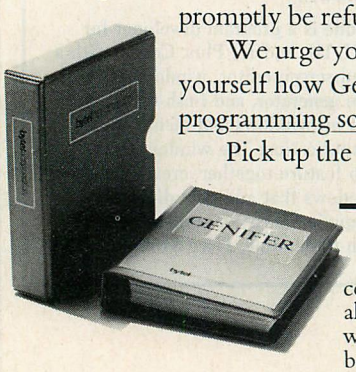
Looking for a great way to slash development time and make yourself a lot more productive? Take a look at Genifer.

It's a remarkable dBase III application generator that lets you get a lot more work done in the same amount of time. And frees you up to do more creative things, like working on system design.

You see, Genifer generates code of truly superb quality in minutes. Well structured, self-documented code that's easy to understand. (Forget about studying programs for hours just to do a little modification!). You can even design-in your application specific features by quickly modifying Genifer's skeletons.

The bottom line? You can offload the grunt-work to Genifer and use your time more creatively and profitably. What's more, you can start delivering every job on time and on budget.

Sound too good to be true? Keep reading.



Here's a special no-risk offer.

If you'd like to see for yourself what Genifer can really do. How it can quickly create applications and save you precious time, we invite you to take advantage of this money-saving, no-risk offer.

Just see your dealer, or call the toll-free number below, and order Genifer for only $395. You get the full Genifer package, complete with 190 page manual, sample tutorial data, a tutorial version of Genifer, and the sealed product disk. Then try our tutorial and see for yourself if everything we say is true. If you're not completely delighted, return the material (including the sealed product disk) within thirty days of shipping. Your money will promptly be refunded. No questions asked.

We urge you to act immediately. Don't miss seeing for yourself how Genifer can provide you with a total programming solution!

Pick up the phone and call us right now.

Iron-clad money-back guarantee!

If, after trying the tutorial disks, you're not convinced that Genifer is all we say it is, just return all materials (including the sealed product disk) within 30 days of shipping, and your money will be promptly refunded.

Here's how to build a complete dBASE III application using Genifer.

- Describe your files and fields to Genifer's data dictionary.
- Paint the main menu, sub-menus and help screens with your text editor.
- Paint your interactive update and inquiry screens, marking the fields.
- Paint your reports – with headers, footers and up to 9 nested breaks.
- Give Genifer the rules to fill in the fields marked while painting.
- Tell Genifer how to link together your multiple databases.
- Now, let Genifer create all your dBASE programs – module-by-module.

Any changes? Genifer remembers! Just enter the new data and regenerate only your changed dBASE III modules.

Look at what you get in the dBASE III application Genifer creates for you.

- Standardized, high-quality, fully commented dBASE III source code.
- A bullet-proof end-user application that meets your unique requirements.
- Automatic validation of user entries against a list, range, or other file.
- Run-time filters and reporting sort options add to end-user flexibility.
- Unique "zoom" between multiple files helps you create realistic systems.
- Full featured, multi-file reports can exactly match user standards.
- And much more.

CIRCLE NO. 283 ON READERS SERVICE CARD

BRUBAKER SOFTWARE

☐ Baler

Program generator for Lotus 1-2-3 spreadsheet templates. Converts templates into Compiled BASIC programs that operate independently. Supports cell attributes, windows and titles, iteration, optimization, keyboard macros and nondestructive formula overrides.

IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $495

BYTEL CORP.

Software Development Division

SEE AD ON PAGE 364

☐ Cogen

Program generator for ANSI-74 COBOL including RM/COBOL, COBOL Plus and LEVEL II COBOL. Implements ANSI-74 standards. For business applications involving files, screens and reports. Self-documenting layouts.

IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1981 ☐ Cost: $950-$7,500

CYBERNETICS, INC.

☐ CRT (COBOL Reprogramming Tool)

RM/COBOL program generator. Produces source programs for report printing and file maintenance with formatted or scrolling screen displays.

IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1981 ☐ Cost: $950

DELPHI DATA SYSTEMS, INC. (MN)

☐ PC/Hibol

Tests IBM mainframe CICS/VS COBOL applications from PC. Generates COBOL and maps for mainframe operation and microcomputer COBOL. Produces maps for PC operation from same program specification.

IBM PC, XT, AT ☐ Cost: $995

E-Z GEN, INC.

☐ E-Z COB

Generates COBOL programs. Prototypes host systems including IMS, CICS and 8100/DPPX. Simulates data entry/display for 3270/3279 devices. Stores COBOL macros in reusable code library. Includes full-screen painting, user exits, color, windows and transaction scheduling monitor.

IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $495

EXTENDED APPLICATIONS, INC. (EAI)

☐ ABC (Application Builder Code Generator)

Application program generating system. Creates business-oriented application programs and source code. Handles data entry, report, sort, transaction processing, graphics, file reorganization and menu.

IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1981 ☐ Cost: $995-$5,500

FOURCOLOR DATA SYSTEMS, INC.

☐ Fastbase and Fastbase III

Reviewed Jun 1984 p. 200.

dBASE II and III program generator. Generates dBASE command files for file maintenance, record searching, reports, screens, menus, labels, merging data base and updating data bases. Comes with command file utility.

IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $249 (Fastbase); $295 (Fastbase III)

FOX & GELLER, INC.

☐ Quickcode

Reviewed Jun 1984 p. 129.

Program generator for dBASE II for micros. Writes programs in dBASE II code to set up and maintain any type of data base. Prints forms and mailing labels or transfers data to WordStar/MailMerge.

IBM PC ☐ 48 KB req. ☐ Introduced: 1982 ☐ Cost: $195

☐ Quickcode for dBASE

dBASE III and III Plus program generator. Creates application/file maintenance system. Retrieves, edits, deletes, prints and transfers data to WordStar/Mail Merge, or prints mailing labels from dBASE III data files. Generates dBASE III source code.

IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $295

GENERAL DATA SYSTEMS, LTD.

☐ Dx Program Generator

Non-procedural application generator. Takes design methodology as input and generates application including screens, databases, reports and processing logic. Generated code portable to micro, mini and mainframe.

IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

KOS & ASSOCIATES, INC.

☐ KOPE (KOBOL On-line Programming Environment)

Structured COBOL source code generator, standards enforcer, documentation generator and library facility. Screen data combined with structured COBOL program skeleton models providing standardized framework for all program development.

IBM AT/370 ☐ 128 KB req. ☐ Copies sold: 3 since 1980 ☐ Cost: $6,500

MAJIC SOFTWARE, INC.

☐ Pro-C

C-code generator. Modules include painters, menu generator, report generator, record definition, screen generator and update generator. Utilizes ISAM file handling technique. Interfaces with any ISAM handler being used.

IBM PC ☐ 256 KB req. ☐ Cost: $70

☐ Pro-C Workbench

Distributed source code. Facilitates porting to various machines.

IBM PC ☐ Cost: $200

MATRIX SOFTWARE TECHNOLOGY CORP.

☐ Synergy Layout

Generates graphics-based windowing software. User chooses from on-screen windows, menus, dialog boxes, fonts, desktop accessories and text, and follows fill-in-the-blank instructions. Creates applications such as desktop publishing, computer-aided instruction and graphic user-interfaces for text-oriented software.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $395

KEN ORR & ASSOCIATES, INC.

☐ Structure(s)/PC and COBOL Code Generator

Automates production and maintenance of Warnier/Orr diagrams. Data structured development workstation for design and generation of COBOL programs.

IBM PC, XT, AT ☐ 196 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $995

PROGRAMMING CONCEPTS, INC.

☐ CList

Provides printed output of source code for programs written in C. Sets program pagination, titling options, variable tabs and printer controls. Merges address information and program listing. Generates variable name, cross-reference list for each source code module. Supports software engineering metrics.

IBM PC ☐ 128 KB req. ☐ Copies sold: 42 since 1985 ☐ Cost: $129

SCANDURA INTELLIGENT SYSTEMS

(division of Intelligent Micro Systems, Inc.)

☐ Turbo FLOW and Turbo FLOW 512

Program design, documentation, implementation and maintenance in integrated top down structured environment. Personal model works with Turbo Pascal compiler. Accommodates FLOWforms six screens long. Turbo FLOW 512 allows FLOWforms of arbitrary size. Features structure embedding and arbitrary screen contraction.

IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 512 since 1986 ☐ Cost: $96-$148

PROGRAMMING UTILITIES

A-OK SYSTEMS

☐ TP*Linker

Converts Turbo Pascal procedures into linkable external procedures. Library procedures link into debugged code. Eliminates recompilation and relisting of already debugged code. Distributes procedures written in Turbo Pascal in nonsource code form.

IBM PC, XT, AT ☐ Cost: $69-$99

ABACUS PROGRAMMING CORP.

☐ BLINK-BASIC Library And Include Capability

Saves and reuses BASIC subroutines. Allows for reusable libraries for frequently used BASIC code. Symbol reference, subroutine and selective inclusion in problems controlled by contents of source.

IBM PC ☐ 64 KB req. ☐ Cost: $30

ADVANCED COMPUTER CONCEPTS, INC.

☐ APDL (Advanced Program Design Language)

Monitors software design, enforces design standards and ensures complete designs before coding. Table of contents, data structure descriptions, module overview/description/implementation, procedure index/cross reference, nesting trees and automatic pagination.

IBM PC ☐ 128 KB req. ☐ Copies sold: 42 since 1982 ☐ Cost: $695

DATA MANAGEMENT CONSULTANTS
5325 S. Valley Blvd.
Suite 7
Las Vegas, NV 89118
(702) 798-5910

ZVIEW: This C programmers' application screen development tool includes a full screen interactive screen design utility, a full set of runtime functions to manage screen displays and data screen processing, single level windowing feature, automatic data conversion and security level validation. Free product updates. IBM PC, XT, AT—Cost: $245

ESP SOFTWARE SYSTEMS, INC.
11965 Venice Blvd., Suite 309
Los Angeles, CA 90066
(213) 390-7408 in California
(800) 992-4ESP outside California

Command Plus is a programmer's shell that replaces MS-DOS® Command. It offers enhanced versions of DIR, COPY, and DEL, plus command macros and recall, command editing, file browsing, a LOG facility, and SCRIPT, a powerful batch processor that features a Pascal-like language. Priced at $79.95.

Fortran Support for
IBM PC/XT/AT & Compatibles

Versions Available For:
Microsoft, Supersoft, RyanMcFarland, IBM Professional, Lahey, & IBM Fortran.

Forlib-Plus
$69.95

Supports graphics, interrupt driven communication, program chaining, and file handling/ disk support. A Fortran coded subroutine is included which will plot data on the screen either in linear/linear, log/linear, linear/log, or log/log on the appropriate grid.

Strings & Things
$69.95

Supports string maipulations, command line usage, DOS call capabilities, SHELL generation and data transmission, BATCH file control, music generation, PEEKS and POKES, PORT access, and general register manipulations.

For-Winds
$89.95

Gives the Fortran programmer the capability of generating up to 255 windows on the screen. Each window can be individually scrolled, moved, sized, generated, and removed. Both color and monochrome type displays are supported. Full source code is supplied for customization.

ACS Time Series
$495.00

This is a COMPLETE time series analysis package which contains VERY HIGH SPEED FFTs, Filter generations, convolutions, transfer function calculations, auto and cross spectra calculations, Cepstrum, curve fitting algorithims, coherence calculations, and many other associated routines. The price includes FULL source code.

Fortran Scientific Subroutine Package
$295.00

There are approximately 100 Fortran subroutines included which fall under the following 12 categories:
1) Matrix storage and Operations 2) Correlation and Regression, 3) Design Analysis (ANOVA), 4) Descriminant Analysis, 5) Factor Analysis, 6) Eigen Analysis, 7) Time Series, 8) Nonparametric Statistics, 9) Distribution Functions, 10) Linear Analysis, 11) Polynomial Solutions, 12) Data Screening. Full source code is included.

Alpha Computer Service
5300 Orange Ave., Suite 108
Cypress, California 90630
(714) 828-0286

California Residents
Include 6% Sales Tax

There are NO license fees

CIRCLE NO. 101 ON READERS SERVICE CARD

AGS COMPUTERS, INC.

☐ Smart/C
Pre-compilation development environment for C. Provides syntax-directed editing and interpretation of C source. Edits and debugs programs created outside system. Testing can be done on a module by module basis.
IBM PC ☐ Introduced: 1985 ☐ Cost: $500

AIP

☐ BASIC Compressor
Relaxes size constraints of IBM BASIC compiler. Cross-reference list of variables, functions and line numbers. Shortens variable names, removes unreferenced statement numbers and packs lines. Produces BASIC source module 50 percent the size of original program.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $100

ALDEBARAN LABORATORIES, INC.

☐ Source Print
Outlines program structure nesting. Indents by nesting level. Prints key words in bold face. Adds table of contents to listings. Extracts routines by name from one or more files. Creates new files. Reindents source files. Performs pagination, indexing and cross-referencing.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1986 ☐ Cost: $139

ALDIA SYSTEMS, INC.

☐ PCLocate
Allows PC users to develop ROM-based code for execution on target system. Outputs files in extended Intel hex format for compatibility with PROM programmers, debuggers and emulators. Compatible with relocatable object modules from MSDOS, PCDOS and compatible linkers.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $250

ALLEN, EMERSON & FRANKLIN, INC.

☐ Turbo Tools
Sub-routines and functions include date, time, day-of-week, elapsed timer, hex, sort and sector I/O. 44 development routines.
IBM PC ☐ 96 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $30

ANALOG DEVICES, INC.

☐ ADDS-2121
Cross-software development for ADSP-2100. Includes assembler, linker, system builder and PROM splitter.
IBM PC ☐ Cost: $450

☐ ADDS-2122
Cross-software development for ADSP-2100. Includes simulator.
IBM PC ☐ Cost: $975

APPLIED DATA RESEARCH, INC.
(an Ameritech Co.)

☐ PC PTE (Person Terminal Environment)
Operates as extension of ADR's Roscoe and Vollie mainframe environments. Provides editor, windows and micro-to-mainframe transparent file transfer.
IBM PC, XT, AT, 3270-PC ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $6,695-$9,695

APPLIED KNOWLEDGE GROUPS, INC.

☐ FORMS
Screen display compiler and library package. C-language code generator and 60 utility functions. Redirected I/O and alternate keyboard mapping.
IBM PC ☐ 128 KB req. ☐ Copies sold: 22 since 1984 ☐ Cost: $395

ASHTON-TATE

☐ dBRUN
Runs the code condensed by dBCODE and implements most dBASE features.
IBM PC, XT, AT

☐ Runtinet
Includes dBCODE for encrypting dBASE programs and dBLINKER for linking dBASE program files together for faster execution.
IBM PC, XT, AT

AT&T
Electronic Photography and Imaging Center

☐ Truevision Image Capture Board Software Tools
Contains C-language source file utilities which demonstrate how to set control and display registers. Initializes ICB. Captures images. Writes data to display memory. Includes high-level tools for drawing geometric figures including lines, rectangles, arcs and ellipses, and text.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $25

☐ Truevision TARGA Software Tools
Contains C-language source file utilities which demonstrate how to set control and display registers. Initializes TARGA 8, 16, 24 or 32 board. Captures images. Writes data to display memory. Includes high-level tools for drawing geometric figures including lines, arcs, rectangles and ellipses, and text.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $25

☐ Truevision VDA/D, VDA Software Tools
Contains C-language source file utilities which demonstrate how to set control and display registers. Initializes VDA/D or VDA. Writes data to color map memory and display memory. Includes high-level tools for drawing geometric figures including lines, rectangles, arcs and ellipses, and text.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $25

AUTOMATED OFFICE SYSTEMS

☐ EZdBASE Programming Utility
Reviewed Jun 1984 p. 181.
Development tool for dBASE II and dBASE III. Creates menus, data entry screens and data files using 256 ASCII characters. Supports 128 fields/screens.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $100

AUTOMATED TECHNOLOGY, INC.

☐ Programmer's UtiliPac
Includes cross-referencing, program compare, list function, remark stripper and file conversion capability.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $159

AVOCET SYSTEMS, INC.

☐ AVMAC Series
Macro assembler for Motorola microprocessors. Linker produces absolute object file in Intel, Motorola or Tektronix hex format, suitable for downloading to EPROM programmer, debugger, or emulator. Library, cross-reference generator and utility programs.
IBM PC ☐ 256 KB req. ☐ Cost: $349

BASIC BUSINESS SOFTWARE, INC.

☐ IBM BASIC Utilities
Base source code references, full screen editor, program listing utility, line drawing basic subroutine, input and change message subroutine, random file search subroutine and matrix functions basic subroutine.
IBM PC ☐ 48 KB req. ☐ Cost: $75

BETATOOL SYSTEMS

☐ BDS (BASIC Development System)
Reviewed Jun 1986 p. 196.
Generates cross-reference table. Locates strings and keywords. Renumbers, relocates, duplicates and compresses code.
IBM PC ☐ 64 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $125

BIT SOFTWARE, INC.

☐ **Forms Designer**
Tool for IBM Pascal/FORTRAN users. Reduces time required to lay out forms. Data entry validation during screen design procedures.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $275

BLAISE COMPUTING, INC.

☐ **C Tools**
Reviewed Jun 1985 p. 100.
Enhances Microsoft, Lattice and Computer Innovations C compilers. String/data handling, graphics interface, prompt display, response reading and random number generator.
IBM PC, XT, AT ☐ Introduced: 1983 ☐ Cost: $125

☐ **C Tools Plus**
Library of C program utilities. String and screen handling including support for multiple monitors and EGA. Includes graphics interface, utility/keyboard functions, DOS file handling and directory maintenance. Windows stack, remove and accept user input. Supports interrupt service routine.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $175

☐ **C Tools 2**
Reviewed Jun 1985 p. 100.
Enhances Microsoft, Lattice and Computer Innovations C compilers. Manages memory, external execution, file handling, buffer management and write/invoke interrupt routines.
IBM PC, XT, AT ☐ Introduced: 1983 ☐ Cost: $100

☐ **C VIEW MANAGER**
Creates/modifies display screen, documents user-developed screens and accesses displays in Screen DataBase. Block mode capabilities, housekeeping functions and help facilities.
IBM PC, XT, AT ☐ Introduced: 1984 ☐ Cost: $275

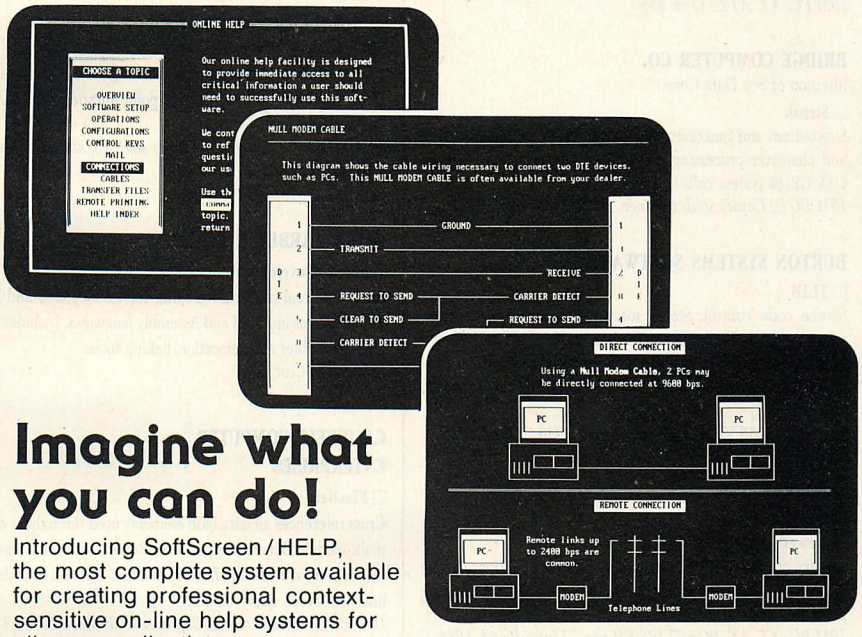
☐ **EXEC-The Program Chaining Executive**
Multiple program chaining for languages using DOS loader. Chains programs in another language. Consists of chaining monitor and chaining function library.
IBM PC, XT, AT ☐ 9 KB req. ☐ Introduced: 1984 ☐ Cost: $95

☐ **Pascal Tools**
Reviewed Feb 1984 p. 161.
Enhances IBM and Microsoft Pascal compilers. Basic intrinsic functions include string functions, screen handling, screen and keyboard I/O utilities, graphics interface and application routines. Gate to BIOS functions.
IBM PC, XT, AT ☐ Introduced: 1982 ☐ Cost: $125

☐ **Pascal Tools 2**
Enhances IBM and Microsoft Pascal compilers. Program control, memory management, file handling, directory maintenance and DOS information.
IBM PC, XT, AT ☐ Introduced: 1983 ☐ Cost: $100

☐ **Turbo ASYNCH**
Assembler and Turbo Pascal language interface. Functions library that initialize COM ports, interrupt services and transfer data between circular queues and communication ports. Supports transmission speeds of up to 9600 baud, I/O queues, XON/XOFF protocol and flexibility in configuring RS232 ports.
IBM PC, XT, AT ☐ Introduced: 1985 ☐ Cost: $100

☐ **Turbo POWER TOOLS**
String handling, screen support and window management. Accesses BIOS and DOS services. Program control allows execution of any program from within Turbo Pascal applications. Interrupt service routine.
IBM PC, XT, AT ☐ Introduced: 1985 ☐ Cost: $100



BLT BUSINESS SYSTEMS, INC.

☐ **UFIX1 Utility Program**
IBM PC ☐ 64 KB req. ☐ Copies sold: 20 since 1981 ☐ Cost: $65

BORLAND INTERNATIONAL, INC.
SEE AD ON INSIDE COVER & PAGE 1

☐ **Turbo Database Toolbox**
Reviewed Feb 1985 p. 102.
Contains Turbo-ISAM, Quicksort, GINST and modifiable data base in Turbo Pascal.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50,000 since 1984 ☐ Cost: $55

Using SoftScreen™/HELP we built this sample help system in under 2 hours without programming . . .

Imagine what you can do!

Introducing SoftScreen/HELP, the most complete system available for creating professional context-sensitive on-line help systems for all your applications.

Finally there is a tool that allows any creative person to build complete on-line help systems. With SoftScreen/HELP, screens that would take days to design, build and modify can now be done in hours.

SoftScreen/HELP features . . .

- **Screen Processor**—A complete WYSIWYG screen editor that gives you full control of your video display with features like line drawing, special characters and logical video attributes.
- **Screen Linker**—Creates a help file optimized for execution speed and efficient memory use.
- **Runtime Manager**—Simplifies the interface between the help system and your application.

SoftScreen/HELP is not a program generator. It creates a highly compressed, fully indexed data file which is accessed through our Runtime Manager. SoftScreen/HELP will not interfere with other software tools you use to build your applications.

SoftScreen/HELP runs on the IBM-PC™ and true compatibles with MS-DOS™ 2.0 or higher. It requires 256K memory (only 32K at runtime, in addition to your application) and supports Monochrome and CGA in text mode. A hard disk is recommended. SoftScreen/HELP supports most programming languages. Call for the latest information.

SoftScreen/HELP costs $195 and comes with a 30-day money back offer. Telephone support is provided from 8 a.m. to 8 p.m., Eastern time, Monday through Friday. Not copy protected and no royalties. Source code and UNIX™ versions are available.

To order or for more information: call (609) 424-0140.
Visa and MasterCard accepted
(NJ residents add 6% sales tax).
To order by mail, send check to:

CIRCLE NO. 284 ON READERS SERVICE CARD

BOS NATIONAL, INC.

☐ Development Pack
Combines BOS/MicroCOBOL, BOS/MicroCOBOL Advanced Programming Facilities and BOS/AutoClerk.
IBM PC, XT, AT ☐ Cost: $1,200-$2,400

☐ MicroCOBOL APF
Advanced programming utilities including screen formatter, job management, assembler interface and systems programming. Requires BOS/MicroCOBOL.
IBM PC, XT, AT ☐ Cost: $550

BRIDGE COMPUTER CO.

(division of Sea Data Corp.)

☐ Strpak
Subroutines and functions for FORTRAN-80 compilers. String and character processing. Directional character and number I/O. CP/M system calls and file controls.
IBM PC ☐ Copies sold: 60 since 1980 ☐ Cost: $55-$225

BURTON SYSTEMS SOFTWARE

☐ TLIB
Source code control. Stores successive versions of program source code in library file with date and comments for each version. Shares libraries with PC Network. Check in/out. Synchronized control of multiple related source files. Dyer MAKE Utility.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $100

C SOURCE, INC.

☐ BASIC-C Library
Reviewed Oct 1984 p. 117.
Library of functions that emulate M-BASIC. Functions can be called from C programs. Includes support for BASIC floating point format for file I/O.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $175

☐ Binary Coded Decimal C Library
BCD arithmetic functions. Twenty places of accuracy. Supports ± 8000 for exponent. Eliminates binary to decimal conversion errors. RPN option as front-end. ASCII to BCD conversion routines. Supports any MSDOS C compiler.
IBM PC ☐ Cost: $1,500

C WARE CORP.

SEE AD ON PAGE 368

☐ DeSmet C Development Package
Reviewed Jan 1986 p. 82.
Assembler, linker, librarian, full screen editor and example software. Contains 8087 and floating point libraries. DOS link option available.
IBM PC ☐ 128 KB req. ☐ Copies sold: 15,000 since 1983 ☐ Cost: $109-$159

CAINE, FARBER & GORDON

☐ 80/DS Development System
Integrated tool set for developing Intel 8080/8085 and Zilog Z80 programs in PL/M and Assembly languages. Includes compiler, assembler and relocation/linking tools.
IBM PC ☐ Cost: $750

CALDWELL COMPUTER ENTERPRISES

☐ FlexRef
Cross references all data base elements used throughout entire multi-module DataFlex application. Reports show data base element name, source code file, line number and source code text line. On-screen query module.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $70

CALIFORNIA SOFTWARE PRODUCTS, INC.

☐ California 10 Pak
Reviewed Nov/Dec 1983 p. 78.
Interrogates/compares/sorts files, browses memory, disassembles and creates screens with full-color manipulation.
IBM PC ☐ 128 KB req. ☐ Copies sold: 800 since 1984 ☐ Cost: $75

CARROLL TOUCH

☐ Touch-Mate
Development tool for use with Carroll Touch's scanning infrared touch input products. User can develop touch application programs. Includes target editor, target manager and touch library.
IBM PC ☐ Introduced: 1986 ☐ Cost: $400

CATALYTIX CORP.

☐ Safe C Standalone Interpreter
Development tool for C. Performs source-level debugging. Used in conjunction with editors, window managers and program analysis tools. Detects errors, out-of-bounds array indexes and bad arguments to function.
IBM PC ☐ 200 KB req. ☐ Copies sold: 1,500 ☐ Cost: $400-$4,000

CDI SYSTEMS, INC.

☐ DataPrep
Data-related problem solving routines that include Data EXTRACT, Data CONVERT, Data EXCHANGE, Data EXPORT and an application interface.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Cost: $195

COMPUTER APPLICATIONS CORP.

☐ FIP/Extra
Allows PC and mainframe users to extract source files for input into applications. Extracts files and edits/reformats files to conform to each application's input requirements.
IBM PC, XT, AT ☐ 124 KB req. ☐ Cost: $195

DeSmet C

now with 32-Bit Pointer Option

C88..... *still* **$109**

The editors' choice for fast compilation and execution. The **price/performance winner** in all major C benchmarks since 1983. Includes Compiler, Assembler, Binder, Librarian, Execution Profiler and Full Screen Editor. Supports both disk and memory resident Overlays. Contains both 8087 and Software floating point support. Full STDIO library.

Large Case Option..... **$50**

Makes a great C Compiler even better. Adds 32-Bit Pointers to C88 so you can utilize all of your PC. Groups scalar and static data for fast access. Supports the D88 debugger.

D88..... **$50**

Gain most of the benefits of an interpreter while losing none of the run-time speed of the C88 compiler. Display C source and variable contents during execution. Set breakpoints by function name or line number. Examine and set variables by name using C expressions.

order direct from:

C Ware Corporation
505 W. Olive, Suite 767, Sunnyvale, CA 94086 U.S.A.

dBASE II to C

the dBx™ translator

- **dBx** produces quality **C** direct from dBASE II or III programs.
- Move dBASE programs to UNIX or other machines.
- Improve program speed and reliability.
- Support multi-user/network applications.
- With power guidebook of conversion hints.
- Includes full screen handler and uses your current **C** database manager.
- May be used to move existing programs or help dBASE programmers learn **C** easily.
- For MSDOS, PCDOS, UNIX, XENIX, Macintosh, AMIGA. (Uses ANSI.SYS driver on MSDOS, CURSES under UNIX)
- Priced from $350, also available from distributors.

FREE

YOUR MIND FROM THE MANY TECHNICAL ASPECTS OF CREATING YOUR OWN MEMORY RESIDENT PROGRAMS!

JACK — The Only Resident Program Developer's Kit — administers memory management, opens and closes windows, saves and restores your video buffers and solves your DOS re-entrancy problems.

You, as the programmer, have absolutely nothing special to do! NO special code! NO special hooks! Simply link ***JACK*** into your C or Assembler program and ***JACK*** does the rest.

JACK lets you concentrate on how your program should run, instead of worrying about how to make it memory resident!

JACK FEATURES:

* Virtually any EXISTING **C** or **ASSEMBLER** source code can be made memory resident without any modification to the source code.
* Automatic screen save on pop up and automatic screen restore upon popping down.
* You can use DOS function calls within your memory resident program.
* ***JACK*** applications can be loaded in any order, pop up in any order and even pop up within other pop ups.
* ***JACK*** will beep if it is not possible to pop up at the time desired.
* ***JACK*** **does not** make use of any undocumented DOS function calls. Programs developed with ***JACK*** will not become obsolete should Microsoft release a new version of DOS. (***JACK*** requires DOS 2.0 or higher).
* You can assign and change the hotkey or interrupt vector at any time to avoid existing program conflicts.
* ***JACK*** will make use of the Intel Above Board if present.

* BEYOND — A library of memory management routines for the INTEL Above Board. Now all of your programs can take advantage of expanded memory. With our library and INTEL's board your programs can go Above and BEYOND their normal limitations.
* THE.C — An enhanced library of well-written and fast-executing routines used to create ***JACK.*** Complete with source code and no royalties.

JACK SUPPORTS the following C compilers:

* Datalight
* IBM
* Lattice
* Microsoft
* Wizard

JACK SUPPORTS the following Assemblers:

* IBM
* Microsoft
* Phoenix

Additional compilers will be supported in the near future. If your compiler is not listed above, then please contact us at the address below.

CIRCLE NO. 315 ON READERS SERVICE CARD

COMPUTER CONTROL SYSTEMS, INC.

☐ FABS/86M
Compatible 8086/8088 assembly subroutine providing rapid keyed access to large data files. Key sequential multi-path balanced tree structure. Called from Microsoft's BASIC-86, BASIC compiler, Pascal, FORTRAN, COBOL, Lattice C or IBM's BASICA.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $150

☐ FABS/86M
Compatible 8086/8088 assembly subroutine providing rapid keyed access to large data files. Called from Microsoft's BASIC-86, BASIC compiler, Pascal, FORTRAN and Lattice C. Key sequential, multi-path balanced tree structure.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $150

COMPUTER HANDHOLDERS, INC.

☐ FORTRAN Utility Subroutines for SuperSoft/Microsoft Compilers
Keyboard control, program output, video screen control, DOS/memory manipulation, string manipulation, time, date and data input with function key control. File/directory management, color support, screen-to-memory and memory-to-screen routines.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $50

COMPUTER SOLUTIONS (FL)

☐ Scomp
ASCII file comparison utility. Compares 2 files 1 line at a time. Upon mismatch, attempts to resync by finding 4 consecutive matching lines. Displays mismatching area. Handles additions, deletions and modifications.
IBM PC ☐ 64 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $15

COMPUTERLINE

☐ Batcher
Batch processor for repetitive functions.
IBM PC, XT, AT ☐ Cost: $150

CONCEPT OMEGA CORP.

☐ BASIC Librarian Concept
Business BASIC development/editor. Integratable, multi-user system through word processing features. Builds libraries.
IBM XT, AT ☐ 128 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $595

CREATIVE PROGRAMMING

SEE AD ON PAGE 370

☐ Vitamin C
Library of C functions. Features data entry, validation, attribute control and multiple virtual windows. Allows bordered/borderless windows, scrolling, insert and delete.
IBM PC ☐ Cost: $150

CROSS DATA SYSTEMS

☐ K Utilities for KnowledgeMan
Programming tools for KnowledgeMan. Performs cross-referencing, formatting and compression. Supports DOS subdirectories and wild card characters.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $35

CYBERENGINEERING CORP.

☐ CyberTools Math Library
Routines for C compilers. Supports K&R machine-independent code conventions.
IBM PC ☐ Cost: $95

☐ CyberTools Pascal Library
Editor, programming tools, disk read, directory manipulation, interrupt handler, dot matrix graphic printer dumping, TTY emulation for PC, I/O port control, and mathematical and statistical procedures. Provides source code for item indexing/inventory, personnel data base, and LISP AI program.
IBM PC

DAC SOFTWARE, INC.

☐ Easy Mate
File windowing while in different routines, road map to move among modules, macro capabilities and built-in calculator. Prints to screen requested information without printing full report.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $40

DALSOFT SYSTEMS

☐ UCRF (Universal Cross-Referencer)
Cross-referencer that works with all programming languages. Preconfigured for BASIC, C, Pascal, FORTRAN, Modula-2, COBOL, dBASE-II and IBM Macro Assembler. Reconfigurable to support other languages and any vendor's compiler, interpreter or assembler.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 65 since 1985 ☐ Cost: $60

DATA BASED SOLUTIONS, INC.

☐ dEFlate
dBASE II optimizer. Keywords to four characters, removes leading spaces, comments and blank lines.
IBM PC ☐ 64 KB req. ☐ Copies sold: 362 since 1985 ☐ Cost: $15

☐ dLineate
Formats and restructures dBASE II. Offsets do-while, if and do-case pairs, then draws lines between beginning and end. Reports number of pairs, errors and lines.
IBM PC ☐ 64 KB req. ☐ Copies sold: 215 since 1985 ☐ Cost: $15

DATA TRANSPORT SYSTEMS, INC.

☐ P-NUT Program Generator
Generates file maintenance/report system to specifications.
IBM PC, XT, PCjr ☐ 64 KB req. ☐ Copies sold: 30 ☐ Cost: $49

DATALIGHT

☐ Developer's Kit
Includes Datalight's C Compiler features. Supports large memory model for up to 1 MB of code and 1 MB of data. Contains UNIX library source and large model libraries.
IBM PC, XT, AT ☐ 180 KB req. ☐ Cost: $99

DATAMATE CO.

☐ GENIUS (Generator of Interactive User Systems)
COBOL programs composition. Adds, modifies, deletes, queries data base information. Line/position CRT control, data editing, range checking and multiple files for validation.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1980

DATASMITH, INC.

☐ BASIC Programmer's Tool Kit
Numbers programs with line labels, strips line numbers and converts entry points to labels. Includes crossreference, program compare, lister, DOS-level merge, remark stripper and compress/conversion of WordStar format files. For PC-BASIC or Microsoft GW-BASIC.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $50

DATEM, LTD.

☐ dDCM 844; dDCM 844/R; dDCM 844/Q
Assembler for Intel 8044 microcontroller. Generates RMX51 application code. Works with Datem's dDCM 820 utility support program. Provides network communications facilities and local processing capabilities. Employs HEX file format. Produces list file with original mnemonics, resulting object code and erroneous instructions.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $500

'C' the view

A "C" programmer's tool to increase screen development productivity for the IBM PC. Security checking and help screen display are available at both the screen and field level. The automatic conversion of data types, to and from ASCII screen format, and the many other productivity-oriented features, set ZVIEW apart from the rest.

Screen Painter Highlights:

- Border colors and all character attributes and colors are supported.
- Draw single or double lined boxes using preset key strokes.
- Automatic line centering.
- Move, copy and color blocks of data instantaneously.
- Three types of fields are available: "Protected," "Unprotected" and "Heading."
- Both 40 and 80 column screens are supported.

Optional Field Characteristics:

- Choose left or right justification, with zero or blank fill.
- Automatic key stroke conversion to upper or lower case.
- Edit fields to be numeric (signed or unsigned), decimal (zero to six decimals supported), alpha or alphanumeric.
- Display numerical values with or without commas.
- All "C" data types are supported, including a special long value which is displayed as a decimal field.
- From and to range checking and character matching edit.
- Security level settings to restrict inquiring or updating of a field.
- Override ZVIEW's default tabbing sequence.
- Assignment of a single or multiple screen help file, to be displayed when the field level help key is pressed.
- Compare one field to three other fields on the current screen.

Program Interface Highlights:

- Only nine run-time library functions control all aspects of the program to screen interface.
- Dynamically change any field characteristic at run-time.
- A wide range of run-time variables to further customize ZVIEW's operation.
- One call to ZVIEW's "Waitkey" function, performs all field edits and program to end user interface.
- Execute YOUR functions during the tabbing process.
- Automatic data conversion of all data types to and from data structures and buffers. Data goes directly from data type to screen format and back, with one call each way.
- Display screen files from disk or memory.
- Scroll function replaces vacated lines with data.

Windows:

- Windows are a built in feature of ZVIEW.
- Automatic handling of the window overlay process.
- Windows are fully functional for data display and data entry.

Requirements:

- Microsoft, Lattice, and Aztec compilers currently supported.
- IBM PC, XT, AT or compatible, MS/PC DOS, one 320k drive and a CGA, EGA or monochrome adapter.

Price:

- $245

DIGITAL MASTERS, INC.

☐ BPGEN/S
Creates data screens, output files, and reports for data dictionary. Application source code in BASIC uses standard source library for commonly used routines. Documentation of parameters entered. Interfaces to Knowmind Artificial Intelligence system and Digital Masters' Overlord.
IBM PC ☐ 64 KB req. ☐ Cost: $495-$5,000

☐ OVERLORD
Provides universal functional and operational compatibility between computer systems of different manufacturers. Stores data in data dictionary. Data screens, output files, and reports from data dictionary. Maintains directories and file structure in ANSI COBOL for transportability.
IBM PC ☐ 64 KB req. ☐ Copies sold: 7 since 1981 ☐ Cost: $5,000

DIGITALK, INC.

☐ Smalltalk/V
Tools for developing AI and general purpose applications. Features bit-mapped graphics, windows, mouse support, built-in Prolog compiler, object swapping virtual memory and source-level debugger.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $99

DYNACOMP, INC.

☐ North Star Utilities Package
Program compression/comparisons/expansion and formatted program displays.
IBM PC ☐ 16 KB req. ☐ Copies sold: 500 ☐ Cost: $30

☐ Super Zap
Displays disk records by absolute sector number, or by file and sector. Displays data in hex, octal or ASCII. Changes bytes using data format. Searches for sequence of data bytes in file or entire disk. Dumps to printer or data file.
IBM PC, PCjr ☐ 48 KB req. ☐ Cost: $25

☐ Tidy
Reassigns statement numbers. Indents. Collects format.statements to program end. Redistributes continuation lines. Adds/removes spaces. Begins program units at top of page.
IBM PC ☐ 64 KB req. ☐ Cost: $40

ELECTRONIC RESEARCH ASSOCIATES, INC.

☐ C-ISAM
C language functions library. Creates and manipulates indexed file systems. Record backing for multi-user environment available.
IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $295

☐ Grafmate
Provides set of functions to aid application programmers in developing user-friendly interfaces. Includes menu manager, dialog manager and icon editor.
IBM XT, AT, RT ☐ 256 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $495

☐ Profom
Aids in development of transaction processing systems. User can define/generate formatted screens on various terminals independent of application.
IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $295

ELFIN SYSTEMS

☐ Relocatable Assembler/Linker System
Partitions into required number of modules. Linker/locations allow ROMable code. Macro capabilities with nesting.
IBM PC ☐ 48 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $150

ENSIGN SOFTWARE

☐ Character Generator
Defines characters/shapes for ASCII codes 128 to 255 on IBM graphics card. Work space is tablet of three rows of eight enlarged cells per row. Designs larger figures composed of several graphic cells.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $25

☐ Cross Reference
Provides cross-reference listing of variables and referenced line numbers in BASIC. Program listing and cross-reference of keywords optional.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $25

ENTELEKON

SEE AD ON PAGE 372

☐ C Function Library
Includes screen handling, graphics, cursor/keyboard/data entry, string handling, status and control, utility DOS/BIOS/time/date and printer control.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $130

☐ MAKE Utility
Checks each program module for recent changes. Compiles, assembles and links separate program modules. Utilizes DOS pathing. Update all command updates entire program, update only command updates only modules affected by changes.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $60

ENVIRON SOFTWARE

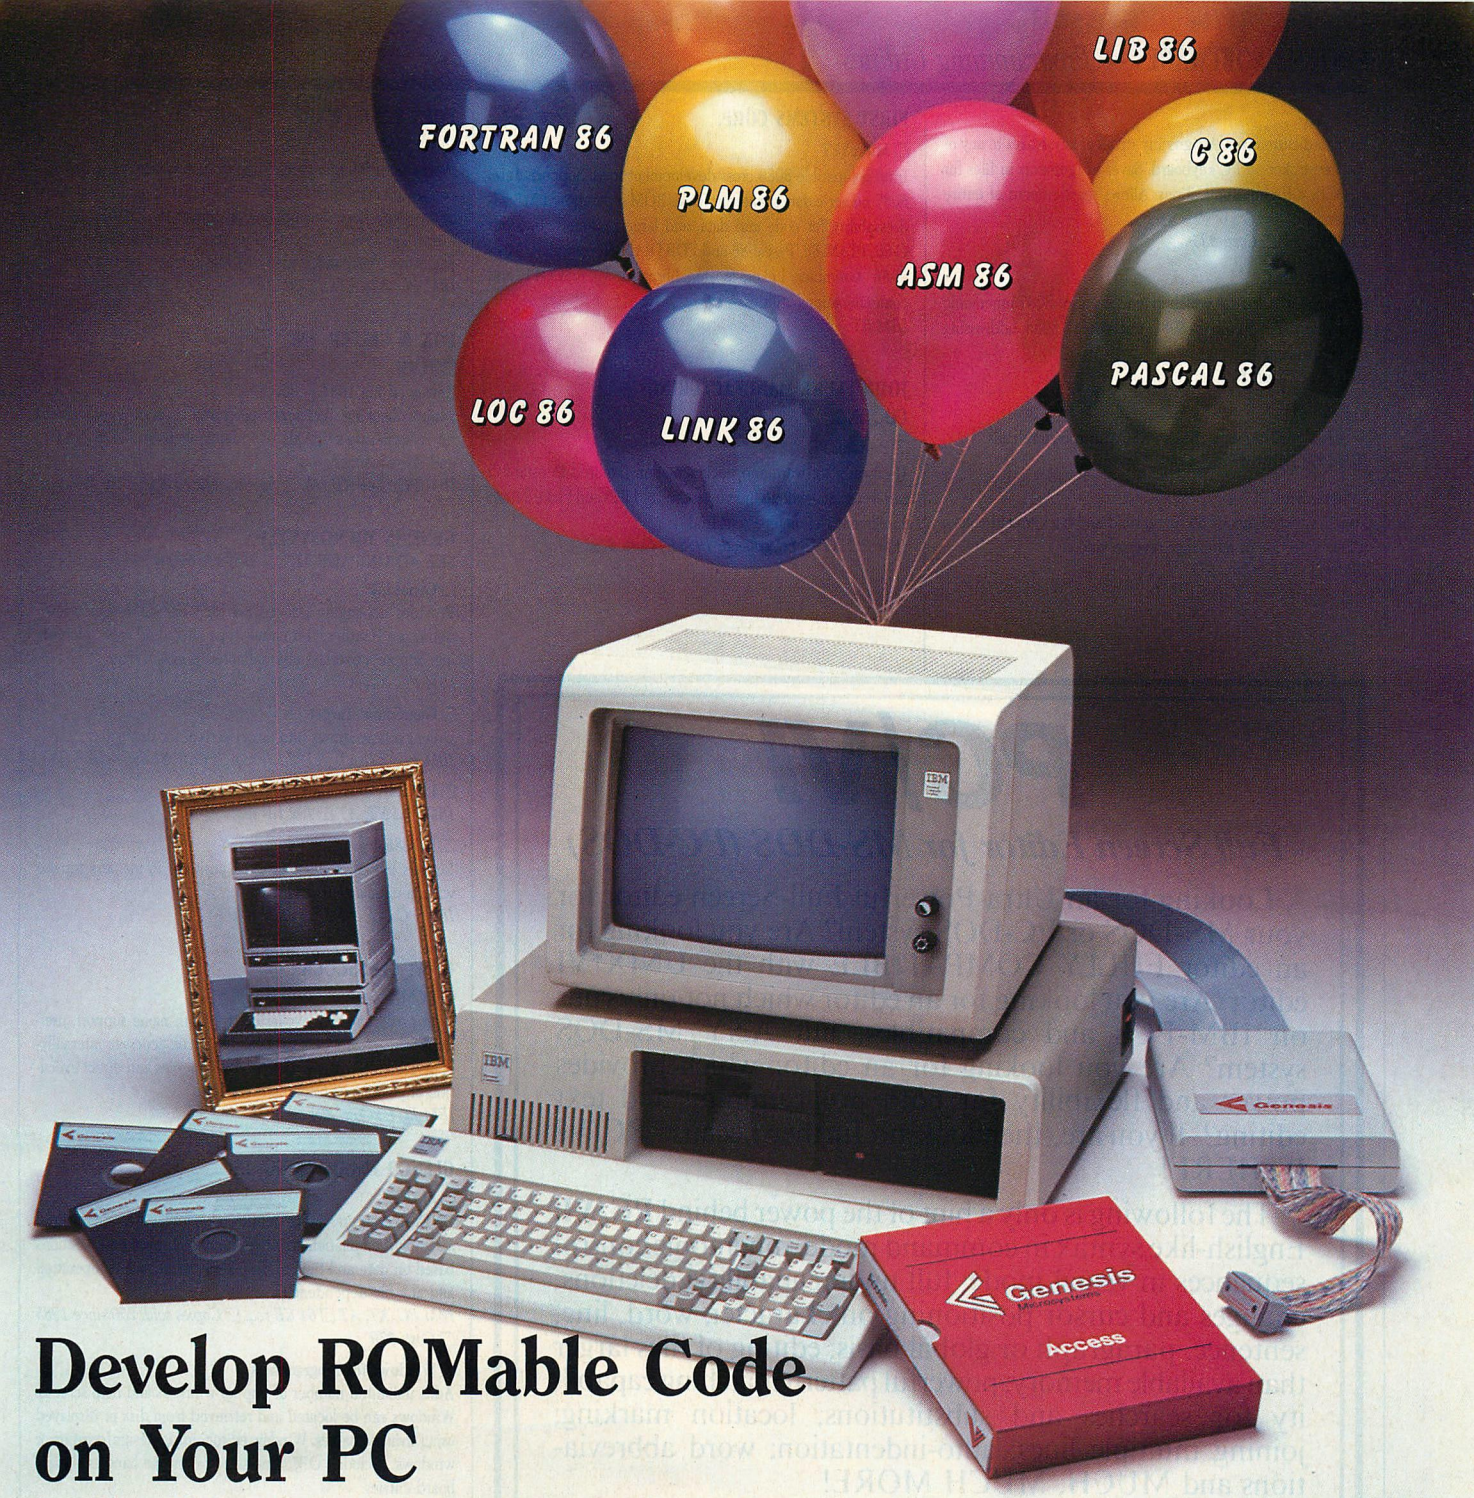
☐ Applications Environment
Software organizing utility for businesses that bill clients on reimbursable basis. Provides time accounting. Includes BASIC development toolkit with utilities for editing/creating programs from library of documented, structured modules with reserved line numbers/variables. Maintains user/project accounts and time used log.
IBM PC, XT, AT ☐ Cost: $30

ESSENTIAL SOFTWARE, INC.

☐ CEssentials
Includes video, strings, keyboard, directories, files and time/date.
IBM PC, XT, AT ☐ Cost: $100

☐ CUtility Library
Reviewed Jun 1985 p. 100.
Includes pop-up windows, business graphics, data entry, DOS command, program execution, polled async communications and sound.
IBM PC, XT, AT ☐ Cost: $185

EVEREST SOLUTIONS, INC.



☐ HELP (Help, Editor, Lint, and Productivity)
Multi-window programming environment which finds, researches, corrects and recorrects errors in C code programs. Utilizes virtual memory.
IBM PC, XT, AT ☐ Introduced: 1985 ☐ Cost: $395

EXPERT-EASE SYSTEMS, INC.

☐ QUICKRAM
Enables reliability engineer to perform RAM analysis. Supports hi-res graphical block diagrams and provides graphs, charts and reports. Maintains data base of system models and results.
IBM PC, AT ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $1,995

FIELD COMPUTER PRODUCTS

☐ BASIC87
Accesses 8087 through IBM's BASIC Compiler using standard call operations. Provides full 8087 instruction set.
IBM PC ☐ Cost: $50

Develop ROMable Code on Your PC

Genesis has a full line of products for producing ROMable code on the IBM PC:

- Our GeneLink™ linker generates ROMable code from standard MS-DOS tools like Microsoft C and others. It allows you to specify absolute locations for the segments of your program so you can divide up code and data to appropriate RAM and ROM areas.
- If you are developing for the PC, **GeneLink produces COM and EXE files 4 to 8 times faster** than other PC linkers, and supplies source-level debugging information to the GeneScope/PC debugger.
- Use our GeneScope™ source-level symbolic debuggers for debugging in in-circuit-emulators, ROM-based monitors, and the PC.
- We can also supply you with Intel compilers (PL/M-86, ASM86, PASCAL 86 and FORTRAN 86), which are especially designed for ROMable code. If you already have Intel compilers on an MDS, our ACCESS-86 package will allow them to run on a PC. Our ACCESS II is a similar product that runs 8-bit software like PL/M-51, ASM51, ASM80, LINK and LOCATE on the PC.

Order Today
Our products are available off the shelf and can be shipped the same day they are ordered.

☐ KeySet
Keyboard customizer. Assigns any string of keystrokes to any of 350 keystrokes on PC keyboard. Saves assignments in files for use with different applications. Allows reassignment of entire keyboard.
IBM PC, XT ☐ Cost: $35

☐ M8087.MAC
Provides set of macros which give user entire 8087 mnemonic instruction set. Supports 8087 operations. 8088 addressing modes available.
IBM PC ☐ Cost: $50

☐ PAS+87
Accesses 8087 through IBM's PASCAL procedure calls.
IBM PC ☐ Cost: $50

☐ ScreenSet
Displays text in any of 56 foreground and background colors. Allows selection of normal or reverse video.
IBM PC, XT ☐ Cost: $35

FIRST SYSTEMS CORP.

☐ MicroSET
Intel-compatible 8086 cross development tools. Supports Intel 8087 numeric data processor, RAM/ROM separation, 1 MB addressability for code and data, and large programs. Includes C-86, PL/M-86, Pascal-86 and FORTRAN-86 compilers; Macro-86 Assembler; linker; locater; librarian, MicroSCOPE and communications utilities.
IBM RT

JOHN FLUKE MANUFACTURING CO., INC.

☐ ProLink PC
Hardware, software and documentation required to establish serial communications links between IBM PCs and Fluke 2400B Intelligent Computer Front End.
IBM PC, XT ☐ Introduced: 1985 ☐ Cost: $795

PC/VI

Full Screen Editor for MS-DOS (PC-DOS)

Looking for an Ultra-Powerful Full-Screen editor for your MS-DOS or PC-DOS system? Are you looking for an editor FULLY COMPATIBLE with the UNIX*VI editor? Are you looking for an editor which not only runs on IBM-PC's and compatibles, but ANY MS-DOS system? Are you looking for an editor which provides power and flexibility for both programming and text editing? If you are, then look no further because **PC/VI** IS HERE!

The following is only a hint of the power behind **PC/VI:** English-like syntax in command mode, mnemonic control sequences in visual mode; full undo capability; deletions, changes and cursor positioning on character, word, line, sentence, paragraph or global basis; editing of files larger than available memory; powerful pattern matching capability for searches and substitutions; location marking; joining multiple lines; auto-indentation; word abbreviations and MUCH, MUCH MORE!

The **PC/VI** editor is available for IBM-PC's and generic MS-DOS based systems for only $149. For more information call or write:

Custom Software Systems
P.O. Box 678
Natick, MA 01760
617-653-2555

The UNIX community has been using the VI editor for years. Now you can run an implementation of the same editor under MS-DOS. Don't miss out on the power of **PC/VI!**

*UNIX is a trademark of AT&T Bell Laboratories.

CIRCLE NO. 313 ON READERS SERVICE CARD

FORT'S SOFTWARE

☐ V-EMM
Works with boards which support Lotus/Intel/Microsoft expanded memory specification. Provides additional virtual memory support. Uses demand paging similar to that used in IBM mainframe OSs. Intercepts requests from applications to map pages out of expanded memory. Minimizes page swapping.
IBM PC, XT, AT ☐ Cost: $90

FOX & GELLER, INC.

☐ dUTIL
Reviewed Jun 1984 p. 80.
Syntax checking, increased speed and program improvement for Ashton-Tate's dBASE II. Indents/aligns if/end if and do/end do sequences.
IBM PC ☐ 48 KB req. ☐ Introduced: 1982 ☐ Cost: $79

GENESIS MICROSYSTEMS
SEE AD ON PAGE 373

☐ GeneLink
Provides debugging information for GeneScope source level debugger. Handles intermodule type check and cross referencing. Supports overlays and unlimited program sizes.
IBM PC, XT, AT

☐ GeneScope/Target
Downloads programs into target system for debugging.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $1,395

☐ LINK86
IBM PC, XT, AT ☐ 192 KB req.

☐ LOC86
Locates linked modules to fixed positions in memory for use with in-circuit emulators.
IBM PC, XT, AT ☐ 192 KB req.

G. W. GLASSCOCK

☐ PCMK
Wild card character expansion, full path name support, user-defined macros, access to DOS via macros, access to internally-generated macros, user-defined built in rules and direct execution of commands using path variable.
IBM PC ☐ Cost: $21

GLENCO ENGINEERING, INC.

☐ MAKE
UNIX-like programming utilities which allows for conditional assembly/compilation or other functions. Permits operations based on date and time of files. User defines which operation and any file dependencies.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $79

☐ Windows for Programmers
Adds unlimited number of pop-up windows and help screens. Windows can be located and retrieved from disk or displayed using string variables. Window editor aids in design/creation of windows. Includes .OBJ. Line-selector routine handles all keyboard entries.
IBM PC ☐ Copies sold: 750 since 1985 ☐ Cost: $99

☐ Windows for Programmers with Data Entry
Handles all keyboard entry programming tasks. Supports 40 routines. User places call and links in library.
IBM PC ☐ Copies sold: 150 since 1986 ☐ Cost: $99

☐ Windows for Programmers with Graphics
Creates video screens using user's video camera, VCR or TV tuner. Works in 320 X 200 mode. Includes video board and linkable library.
IBM PC ☐ Copies sold: 50 since 1986 ☐ Cost: $399

GOLD HILL COMPUTERS

☐ GC LISP 286 Developer
Programming environment designed for GC LISP-based applications requiring extended memory and faster execution. Includes large memory interpreter addressing 15 MB of physical memory, large memory compiler and program development capabilities comprising lexical/dynamic scooping.
IBM PC, AT ☐ 512 KB req.

GOTOLESS CONVERSION

☐ **BCMP**

I/O of BASICA ASCII file. Compresses as many statements as possible into single multi-statement to relax size constraints of BASIC compiler. Syntax error list pinpoints error if syntax error is found.

IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $39

☐ **BEXP**

I/O of BASICA ASCII file. Expands multi-statement into many single statements. Indents for-next loop and while-wend loop. Line number, which is referred to by another statement, is commented. Syntax error list pinpoints the error if syntax error is found.

IBM PC ☐ Copies sold: 22 since 1985 ☐ Cost: $39

☐ **BX**

Cross-reference reporter. Prints identifier cross-reference line number cross-reference, statement cross-reference, dead code and undefined line number list and syntax error list. Sorts identifiers alphabetically.

IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $39

GRACON SERVICES, INC.

☐ **Turboref**

Reviewed Mar 1986 p. 179.

Cross-reference/lister utility for Pascal source programs. Provides control blocks, procedure name and source file for each line, highlighted comments and underlined reserved words. Lists line number for each use of variables/constants and type of use for each reference.

IBM PC ☐ 128 KB req. ☐ Cost: $50

GRAHAM SOFTWARE CORP.

☐ **Alice: The Personal Pascal**

Tool for novice Pascal programmers. Provides interactive programming and learning environment. Provides Turbo Pascal compatible interpreter, debugging facility, language-directed editor and over 600 help screens.

IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $95

GREAT LAKES SOFTWARE SYSTEMS, INC.

☐ **Turbo Forms**

Ensures user input is correct before reaching Turbo Pascal program. Provides unlimited character and field level data checking. Includes form creation and modification. Formats using color graphics and windows.

IBM PC ☐ Cost: $40

GREENLEAF SOFTWARE, INC.

☐ **Functions**

Reviewed Jun 1985 p. 100.

Library of 200 C functions. Access to DOS and BIOS functionality. String video, color text, printer, async, time and data random I/O functions.

IBM PC, XT, PCjr, AT ☐ 128 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $185

GRID SYSTEM CORP.

☐ **Develop**

Forms and menus for development process.

IBM PC ☐ 512 KB req.

GRYPHON MICROPRODUCTS, INC.

☐ **dB/RA - The dBASE II and dBASE III Plus Array/Windows Program**

Reviewed Jun 1984 p. 80.

Expands memory variables from 63 to 65,000. Uses 100 arrays in 1-2-3Ds. Pop-up, scrollable windows. Lotus-like menus, graphics and DOS interrupts. Compatible with Clipper and Lattice C.

IBM PC ☐ 128 KB req. ☐ Copies sold: 225 since 1983 ☐ Cost: $200

☐ **dBPOWERPAK III**

Keyword searches on dBASE III memo fields. Creates index file and DBF file containing all keywords. Updates any changes. Looks for occurrences of words which sound like requested keyword. Checks status of printer from within dBASE program.

IBM PC ☐ 384 KB req. ☐ Introduced: 1985 ☐ Cost: $99

☐ **dHELPER - The dBASE II debugger**

Pre-compiler for dBASE II. Sets listing parameters and performs macro substitution. Syntax checker. Groups loops, compresses out spaces and produces cross-referenced dictionary of variables, keywords, constants and files.

IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $150

GTEK, INC.

☐ **PALX**

Transfers PALASM source file or ASCII hex object code file. Works with GTEK's PAL programmers.

IBM PC

☐ **PGX Utilities**

Sends user-specified range of addresses to programmer. Verifies erasure and/or sets EPROM type. Includes GHEX utility to generate Intel hex file.

IBM PC

JAMES HALSTEAD & ASSOCIATES

☐ **Refer**

Reads any program on any disk saved in PC standard ASCII source. Simultaneously analyzes while pretty prints an ordered cross-reference of variables, values, keywords, line numbers and/or labels. Processes ADA, BASIC, C, COBOL, dBASE, FORTRAN, Pascal and R:base.

IBM PC ☐ 48 KB req. ☐ Copies sold: 60 since 1985 ☐ Cost: $39

Command Plus: What Command should have been.

Command was fine when it came out. But when it came out again and again and again with few substantial changes, it became a real roadblock for efficient programming.

Well, we always thought the programmer should be in command. So we designed Command Plus. An eminently reasonable shell that replaces MS-DOS® Command.

You don't have to forget the commands you already know. And Command Plus gives you an enhanced DIR, COPY and DEL. Plus features like command macros, command recall, file browsing, and lots more that you can't get anywhere else. There's even LOG to help track the time you spend on projects.

You also get Script, a batch processor that's easy to learn and unbelievably powerful. Its Pascal-like language includes control loops, conditionals and variables which let you create unique system utilities. Hassling with batch files is a thing of the past.

If you think you'd get more done if you were in command of all this, get Command Plus. It's even within a programmer's budget at $79.95.

To order or for more information, call us at (800) 992-4ESP. In California, call (213) 390-7408. VISA and MasterCard accepted.

11965 Venice Blvd., Suite 309, Los Angeles, CA 90066

MS-DOS is a registered trademark of Microsoft Corporation.

CIRCLE NO. 350 ON READERS SERVICE CARD

HEWLETT-PACKARD CO.

☐ Personal Application Manager

Built into ROM and designed to allow quick access, increase execution speed and free RAM for storing data.
IBM PC

HEX FF, INC.

☐ EDIT/HEX

Maintains and edits SMC BASIC programs. User can type over, insert or delete characters. Statements may be copied, renumbered, merged and searched. Checks for syntax errors. Provides error messages and help screens.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $199

SOPHISTICATED SOFTWARE
6586 Old Shell Road
Mobile, AL 36608
205-342-7026

TurboMAGIC™ For Turbo Pascal programmers. Input forms. Report forms. Help windows. Pop-up menus. Pull-down menu systems. TurboMAGIC saves hundreds of programming hours. For professionals or beginners. Only $99.

HILCO SOFTWARE

☐ Recode/Decode

Disassembles dBASE II runtime code to ASCII text, which can be modified/reassembled into runtime code file.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $49

H & S SOFTWARE

☐ Alliance

Replaces input statement in BASIC with multi-purpose subroutine for error trapping. Editing and error checking. Uses insert, delete and other functions in program prompts.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $15

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ BASIC Programming Development

Reviewed Jul/Aug 1983 p. 107.
IBM no. 6024-046.
IBM PC, PCjr ☐ Cost: $130

☐ CICS/CMS (Customer Information Control System/ Conversational Monitor System)

IBM no. 5668-795. Provides ability to edit interactively, translate, compile and assemble and initially test CICS command-level COBOL, PL/1 and Assembler application programs in VM/CMS environment.
IBM AT, XT, AT/370, XT/370 ☐ Cost: $15,000

☐ CVIEW (Cooperative Viewing Facility)

IBM no. 5664-296. Allows two VM/SP users at separate display stations to share single interactive terminal session. Provides centralization of data processing support and services. Used for remote consultation, education, problem management, program maintenance and demonstrations.
IBM 3270-PC, XT/370 ☐ Introduced: 1983 ☐ Cost: $6,600

☐ Data Acquisition and Control Adapter Programming Support

IBM no. 6024-202. Programming support utility for the scientific/industrial laboratory setting. Controls processes. Automates electronic testing. Monitors electronic sensor-based system.
IBM PC ☐ Cost: $160

☐ EZ-VU (ISPF/PC Runtime Facility)

IBM no. 6316-969. Conversational interface between user and application program. Receives commands and information through predefined screens and transfers information to PC application program. Returns information from application program to user.
IBM PC

☐ EZ-VU Editor (ISPF/PDF PC Editor)

IBM no. 6466-974. Allows users of host systems and PCs to transfer files from host to PC, use the host-compatible ISPF/PDF (Interactive System Productivity Facility/Program Development Facility) Editor and transfer files back to host for further processing.
IBM PC, XT, AT, PCjr, Portable PC, 3270-PC, 3270-AT ☐ 256 KB req. ☐ Cost: $150

☐ GPIB (General Purpose Interface Bus Adapter) Programming Support

IBM no. 6024-201. Scientific programming support utility. Controls, monitors and accesses multiple devices or instruments such as multimeters, plotters, disk drives and printers. Supports up to four GPIB Adapters and 48 devices.
IBM PC ☐ Cost: $395

☐ VM/IPF XT/370

IBM no. 5748-MS1/01.
IBM XT/370 ☐ Cost: $196

IBM PERSONALLY DEVELOPED SOFTWARE

☐ Assembler Programming Package

IBM PDS no. 6276-578. Consists of DOS Enhanced Debug, Object Library Maintenance and Structured Assembler Translator.
IBM PC, XT, AT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $50

☐ Extended BASIC Programming

IBM PDS no. 6276-625. LES-BASIC (Language Extension System-BASIC), BASIC Memory Extender and UnNumber utilities. LES-BASIC accesses DOS 2.00 or 2.10 only. Monochrome and color EGA support.
IBM PC, XT, Portable PC ☐ 128 KB req. ☐ Cost: $35

☐ Language Extension System-Assembler

IBM PDS no. 6276-584. Allows use of math co-processor with Assembly language programs. Uses macros to include 8087/80287 opcodes. Monochrome and color EGA support.
IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Cost: $25

☐ Short Hand

IBM PDS no. 6276-572. Defines up to 36 keys as alt-A through alt-Z and alt-0 through alt-9. Uses variable-length key definitions to define each new keystroke series. Color EGA support.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ 128 KB req. ☐ Cost: $15

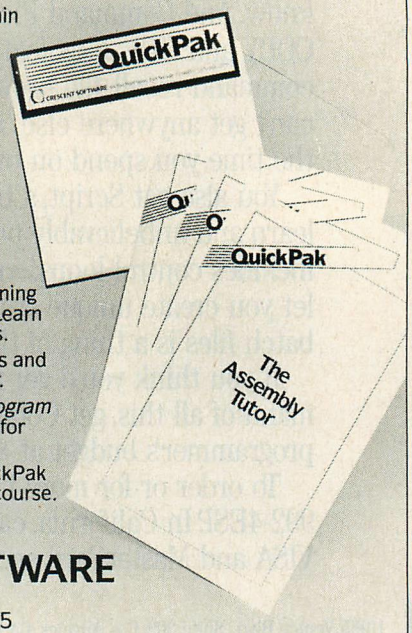
☐ Structured Assembler Translator

IBM PDS no. 6276-550. Nests if, else, elseif, while and repeat statements to depth of 256. Imbeds external files that should be included and translated. Defines synonyms for frequently used phrases. Chooses or can switch between signed and unsigned comparisons. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $35

☐ Structured BASIC Facility

IBM PDS no. 6276-618. Editor, preprocessor and generator. Creates/edits programs with line/full-screen editing. Converts Structured BASIC source files for BASIC Interpreter and BASIC Compiler. Converts existing BASIC source file into Structured BASIC source file. Monochrome and color EGA support.
IBM PC, XT, AT, PCjr, Portable PC ☐ 128 KB req. ☐ Cost: $55

ICR FUTURESOFT



☐ QUICKPRO+II Automatic Program Writer

Creates custom BASIC program. Asks questions and uses answers supplied. Writes independent programs.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $199

QuickBASIC just got quicker with
QuickPak

QuickPak is a superb collection of enhancements, subroutines, and instructional material designed to help you get the most out of programming in BASIC.

- Powerful assembly language routines to give your programs more speed, more power, and full access to DOS and BIOS services. SORT all or part of a string array with one command! FIND any string or sub-string within an entire array *regardless of capitalization* — accepts wildcards. READ directories into your programs from any drive or path. READ/WRITE disk sectors — create your own DOS utilities! CLEAR or SCROLL any part of the screen. MANY, many more programs included.
- Professionally written QuickBASIC routines and functions. Powerful input routines for text, dates, and numbers. Menus, scroll bars, date/time functions, and much more.
- The Assembly Tutor — a complete guide to learning assembly language *from a BASIC perspective.* Learn how to create your own routines and extensions.
- Tips and Tricks book — packed with clever ideas and techniques to help *you* be a better programmer.

You get all this, all of the source code for *every program included,* and a thirty-day money back guarantee for only $69.00.

No royalties are required for using any of the QuickPak routines in your programs. Not copy protected, of course.

by
CRESCENT SOFTWARE
64 Fort Point Street
East Norwalk, CT 06855
(203) 846-2500

QuickPak requires Microsoft QuickBASIC or BASCOM, DOS 2.0 or higher. Visa, M/C, C.O.D., or checks accepted.

CIRCLE NO. 320 ON READERS SERVICE CARD

IMAGING TECHNOLOGY, INC.

☐ ImageAction, ImageAction 151
Compatible with MSDOS OS running PCVisionplus image processing modules or Series 151 image processing subsystem. Mouse-selected menu, user-selectable area-of-interest, set/read registers, test hardware and graphics manipulation. Requires Imaging Technology's PCVISIONplus Frame Grabber or Series 151 image processing subsystem.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $995 (PCVisionplus); $1,495 (ImageAction 151)

IMSI

☐ Onelook
Co-resident utility including keyboard enhancements, macros, calculator, notepad, macro-editor, automatic dialer, rolodex and password security.
IBM PC ☐ Cost: $79

INFOCODE, INC.

☐ dTool Box
Utility program for dBASE II users. Modules include Database Operations Menu, Program Editor, Directory Manager and Program Printer, and System Manager. Includes source code.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $49

INFOLOGIC, INC.

☐ UNICON (Universal Icon System)
Object-oriented, icon-based, end-user interface to UNIX. Man-machine interface model, user-defined icons, GKS (Graphics Kernel System) standard and icon management.
IBM PC ☐ 50 KB req. ☐ Introduced: 1985 ☐ Cost: $395

INNOVATIVE TECHNOLOGY, INC. (CD)

☐ ProCommand
Handles batch file execution for DOS. Adds over 35 new commands and extends features of others. Adds subroutines, local variables and arithmetic calculations. Permits redirection of I/O. Contains 17 commands to control TopView windows. Runs under TopView, Microsoft Windows, DESQ and GEM.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $89

THE INTELLIGENT COMPUTER USERS GROUP

☐ Accelerator
Pin to pin replacement of 8088 or 8086 CPU. Speeds program execution.
IBM PC ☐ Copies sold: 50 since 1985 ☐ Cost: $50

INTERFACE TECHNOLOGIES CORP.

☐ M2SDS (Modula-2 Software Development System)
Syntax-directed editor for one-keystroke statement entry. Background compiler compiles line-by-line as program is entered. Windowing allows concurrent editing of two-or-more files. Standard library and link-and-run modules.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 6,000 since 1985 ☐ Cost: $81

☐ SDS-XP (Modula-2 Software Development System Expansion)
Expands capabilities of M2SDS. M2MAKE tool for recompiling and relinking program from roots up. Foreign object importer for importing programs written in assembly language. Extended libraries include 24 library modules and resource library.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 5,000 since 1985 ☐ Cost: $249

INTERLINK SYSTEMS, INC.

☐ Turbo Matrix
Creates large arrays at run time. Recovers memory when arrays are no longer needed. Reads/writes matrixes. Performs scaler/matrix multiplication and matrix addition. Copies all/part of matrix. Solves linear equations.
IBM PC, XT, AT ☐ Cost: $99

INTUITIVE DESIGNS, INC.

☐ PC/AMS (PC/Access Management System)
Enforces, maintains and controls PC resources, and provides user interface. Includes login procedure with audit trail. Allows customized and nested menus. Provides menu option parameters, control programs and maintenance facilities.
IBM PC ☐ 150 KB req. ☐ Cost: $185

JBSOFTWARE

☐ DASM
8086/88 disassembler. Generates symbolic assembler source from .exe, .com, or .sys input files. Generates segment assumes, offset loads for subsequent register addressing and maps code referenced via transfer vectors.
IBM PC ☐ 100 KB req. ☐ Copies sold: 140 since 1985 ☐ Cost: $50

KEA SYSTEMS, LTD.

☐ DECkHAND
Programming utilities. DIR utility includes switches for sorting by name, type, size and date. Copy, rename and type utilities include switches for querying and logging. Path name support and extended wildcard support.
IBM PC, XT, AT, PCjr ☐ 192 KB req. ☐ Cost: $69

KEY SOLUTIONS, INC.

☐ DataBurst
Contains source generators for BASIC and C. Develops mainframe-like on-line programs.
IBM PC, XT, AT ☐ 96 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $125

THE KEYSOFT NETWORK, INC.

☐ APL*Plus Tools Volume 2
Library of standardized programmers tools and application building software.
IBM PC ☐ 320 KB req. ☐ Cost: $475

KNOWLEDGEWARE, INC.

☐ Action Diagrammer
Action diagram editor automates creation and maintenance of color action diagrams. Environment for decomposing specifications to level of executable code. Generates control structure syntax for many languages. Prints hard copies of structured system overviews or executable code.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 850 since 1984 ☐ Cost: $495

KOALA TECHNOLOGIES CORP.

(division of PTI Industries)

☐ Speed Key
Replaces multiple keystrokes with single push-button command. Pre-print overlays for Lotus 1-2-3, WordStar, VisiCalc, pfs:Write, SuperCalc, MultiPlan, dBASE II, PCDOS and IBM BASIC. Provides 25 blank overlays.
IBM PC, XT

KOMPUTERWERK

☐ Finally
Library of documented subroutines. Handles arrays, loading disk directories into arrays, changing default drives, stripping leading and trailing blanks from strings, sorting, box drawing, determining memory/peripheral configuration, cross-referencing and maximum, minimum and averaging for arrays. Works with IBM's BASIC Compiler and Microsoft's QuickBASIC.
IBM PC ☐ Cost: $99

CQL

SQL Compatible Query System adaptable to any operating environment.

CQL Query System. A subset of the Structured English Query Language (SEQUEL, or SQL) developed by IBM. Linked files, stored views, and nested queries result in a complete query capability. File system interaction isolated in an interface module. Extensive documentation guides user development of interfaces to other record oriented file handlers.

Portable Application Support System

Portable Windowing System. Hardware independent windowing system with borders, attributes, horizontal and vertical scrolling. User can construct interface file for any hardware. Interfaces provided for PC/XT/AT (screen memory interface and BIOS only interface), MS-DOS generic (using ANSI.SYS), Xenix (both with and without using the curses interface), and C-library (no attributes).

Screen I/O, Report, and Form Generation Systems. Field level interface between application programs, the Query System, and the file system. Complete input/output formatting and control, automatic scrolling on screens and automatic pagination on forms, process intervention points. Seven field types: 8-bit unsigned binary, 16 bit signed binary, 16 bit unsigned binary, 32 bit signed binary, monetary (based on 32 bit binary), string, and date.

$395.00

C Interpreter. Run the interpreter on any hardware and on any operating system. Develops true intermediate code, allowing full C features in an interpreter. User configurable interface to compiler library allows linkage with compiled routines.

HARDWARE AND FILE SYSTEM INDEPENDENT

☐ C Food Smorgasbord
Reviewed Jun 1985 p. 100.
Routines for decimal/floating decimal arithmetic, low-level I/O on CRT keyboard printer and IBM PC or Victor 9000, BIOS interface for screen management. Supports graphics, memory management and BD Software C compatible functions.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $150

LUGARU SOFTWARE, LTD.
SEE AD ON PAGE 378

☐ Epsilon
Programming editor. C-like extension language, unlimited file size and number of files, EMACS-style command set, regular expression search/replace, source level tracing debugger, execution profiler, DOS path support and directory perusal. Runs programs while editing. Uses swap file.
IBM PC ☐ Cost: $195

MAJOR SOFTWARE

☐ PascalPac
Reviewed Mar 1986 p. 180.
Programming tools for cross referencing. Generates cross reference table for Pascal program. Lets user browse table and associated program simultaneously. Listing program allows printing of programs, cross reference tables and other text files. Works with TIDY.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $69

☐ Tidy
Reviewed Oct 1984 p. 22; Mar 1986 p. 180.
Formatter. Transforms Pascal program into form that is simpler to read and modify. Integrates with PascalPac.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $49-$69

Epsilon by Lugaru Software, Ltd.

The most advanced, customizable programmer's editor you can buy.

True Concurrency. Don't be fooled by misleading claims of concurrency from other vendors: this is *true concurrency,* not some simple "run the program and return" facility. Run compilers, linkers, etc., inside Epsilon and they run *as you work.* Epsilon's concurrency integrates buffer management and program I/O. The full power of Epsilon is always available to edit program input and output. You're free to edit other things while these programs run.

Ultimate Customizability. You may have seen some other vendors hinting that they have a C-like extension language. Don't be fooled. Ask them if their extension language has the syntax and types of C. Epsilon uses an embedded C interpreter for its extension language, complete with all the data types and operators of C. This is a *real language,* not an afterthought. All of Epsilon's commands were written in it, and it's fast!

No-Nonsense Help. Some editors offer a help screen or two listing the most basic commands—useless after the first week. Others spit out everything from a fixed file—which means they can't tell you about your changes to the keyboard, or commands you've added. We think an editor that claims to be reconfigurable should be smart enough to reflect your changes in its help system. Epsilon's extensive help system can tell you what commands apply to files, what a certain command does, which keys you can use to invoke it, what a certain key does. . . . Our help system remains helpful even if you make changes.

- Fast
- Concurrent Processes
- Multiple Windows
- Unlimited File Size
- On-line Tutorial
- Automatic Swap File
- Supports Large Displays
- Saves Deleted Text (n times)
- EMACS style command set
- Context Sensitive Help
- Regular Expression Search
- Unlimited Number of Files
- File/Command Name Completion
- Convenient Keyboard Macros
- Directory Perusal
- Uses All Available Memory

Our Guarantee to You. We know it's difficult to find software that works for you. That's why we made Epsilon the most customizable editor on the market. And that's why we offer a *30 day return privilege* with a complete refund. We're confident that once you've tried Epsilon, you won't go back.

So call **(412) 421-5911** to order Epsilon at no risk using your Visa, MasterCard, or American Express card. Company PO's and C.O.D. orders are also welcome. Epsilon runs on 256K IBM PC/XT/AT's, and costs only $195.00.

MATRIX SOFTWARE TECHNOLOGY CORP.

☐ Synergy Development Tookit
Aids developers in producing software using SYNERGY. Includes utilities such as menu maker, resource compiler, graphics resource editor, font manager, font compiler, and gateways for C, Pascal, MACRO, BASIC, dBASE II/III and TurboPascal. Provides SYNERGY runtime and sample fonts.
IBM PC ☐ 256 KB req. ☐ Copies sold: 810 since 1985 ☐ $395

MEF ENVIRONMENTAL, INC.
SEE AD ON PAGE 379

☐ I/O PRO
Programming support for interactive screen development with library of assembly subroutines to augment FORTRAN, Pascal and C compilers. Compatible with EGA, Hercules and CGA cards.
IBM PC ☐ 192 KB req. ☐ Copies sold: 76 since 1985 ☐ $450

☐ No Limit
Aids development of interactive FORTRAN or Pascal systems. Handles extensive I/O. Includes graphics, strings, screen control and communications. Compatible with EGA, Hercules and CGA cards.
IBM PC ☐ 50 KB req. ☐ Copies sold: 502 since 1984 ☐ $129

MERRILL STREET SOFTWARE
(division of BCC, Inc.)

☐ SuperBatch
Creates batch files that drive most programs including Lotus 1-2-3 and WordStar. Continues execution from program to program. Integrates individual programs to form system. Creates self-running demo systems.
IBM PC

MICHTRON, INC.

☐ Better Than B-Tree
Handles up to 16 files at once. Maintains 8 key fields per file with 8 subfields. Optional automatic error recovery. Duplicate modifiable key field values. Supports integer, unsigned, long, float, double, string and upper-case string key types.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $200

☐ MI KEY
ASCII and keyboard key translator. User can redefine any key on keyboard to represent up to 84 other keys, combination of keys or complete commands.
IBM PC ☐ 128 KB req. ☐ Copies sold: 700 since 1984 ☐ $35

MICRO-ART PROGRAMMERS

☐ MSBChart
Crossreference generator. Lines in numerical order, variables in alphabetical order. Requires ASCII-saved M-BASIC programs in English.
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1982 ☐ $49

MICRO ASSOCIATES, INC.

☐ MICA/AM
Password protection for hard disk systems. ID number and password to each user. Read only, no access, write and total access levels. Menu for MICA programs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $295

MICRO DATA BASE SYSTEMS, INC.

☐ K-C
Supports C programs by adding KnowledgeMan/2 functions such as record creation and locating, data retrieval and modification and record deletion.
IBM PC ☐ 320 KB req. ☐ Introduced: 1984 ☐ Cost: $1,175

MICRO FOCUS, INC.

☐ Animator
Follows program logic at source code level. Debugging commands allow programmer to interrogate data values, alter flow or provide instant replay.
IBM PC, AT, RT, 3270-PC ☐ 64-256 KB req. ☐ Copies sold: 5,000 since 1982

☐ VS COBOL - Workbench
Integrated COBOL programming environment for the development of mainframe COBOL programs on IBM PC workstations. Includes COBOL source code editor, interactive syntax checker, compiler, screen printer and animated source code analysis.
IBM PC, XT, AT, Portable PC, 3270-PC/G, GX ☐ 256 KB req. ☐ Introduced: 1985

MICRO PRISM

☐ Strokesaver
Keyboard buffering and editing utilities. Allows retention and scanning of previous commands input.
IBM PC ☐ 64 KB req. ☐ Copies sold: 125 since 1984 ☐ Cost: $25

MICROHELP, INC.

☐ Inside Track
Provides assembler-assisted speed and control in reading files, displaying data and loading programs.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $48

☐ Mach 2
BASIC and Assembly subroutine library. Calls utilize same syntax, whether compiled or interpreted. Modifiable shell program usable as template. Includes window and memory managers. Saves data arrays beyond 64KB. Sorts string arrays.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $75

☐ Peeks 'n Pokes
Illustrates peek, poke, inp, out and DOS/BIOS function calls.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $33

MICRORIM

☐ R:base Program Interface
Provides Pascal and FORTRAN programs access to R:base Series 4000 data bases.
IBM PC

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Microsoft Mouse
Mouse pointing device OS.
IBM PC ☐ 64 KB req.

MICROSTAR SOFTWARE, LTD.

☐ Encryption Library
Library of routines for ANSI DEA/FILPS-DES encryption. Four modes of operation available in object or source code format. Includes host and terminal modes.
IBM PC ☐ Cost: $500

☐ MVDI-T Development Toolkit
Programming tools using NAPLPS virtual device. Exec programs, language bindings, communications, device drivers and testing utilities. Designed for graphics developers. Provides text support bridge between application and video hardware. Resolution independent with up to 16,384 x 16,384 picture elements.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $500

MICROTOUCH SYSTEMS, INC.

☐ CommandPoint
ROM-based program that defines/manages touch-sensitive zones on touch screen. Lift-offs, touch-downs, lateral movements and continous touching actions.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $155

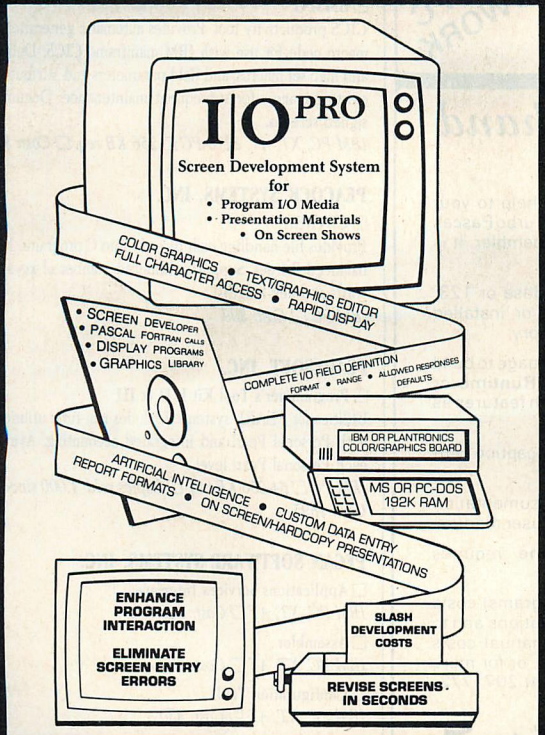
☐ HighPoint
Creates overlapping windows, constructs graphics and defines touch-sensitive zones. Utilities for video screen, keyboard, speaker and timing.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $1,375

☐ HighPoint GX
Graphics authoring package for developing touch front-ends to applications. Includes bit-mapped graphics editor, menu and forms generator. Screen grabber and multiple character sizes and fonts. Requires CommandPoint GX Firmware.
IBM PC ☐ Cost: $2,795

☐ KeyPoint
On-screen keyboard that replaces hardware keyboard. Toggles between character sets among alphanumerics, scientific characters and graphics. Requires Command*Point.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $250

MICROWAY, INC.

SEE AD ON COVER 3



☐ FOR-BAS
Allows MS FORTRAN programs to call IBM BASIC Compiler library and MicroWay-written screen primitives. Includes circle, line, pset, preset, random number generator, screen commands and cursor commands. Requires IBM BASIC Compiler and MS FORTRAN.
IBM PC, XT, AT

☐ OBJ-ASM
Multipass object module translator and disassembler. Builds assembly language listing that includes data and code segments, and assume statements. Contains same symbolic information as source object module, including labeled names of all public entries and names of external references.
IBM PC ☐ 128 KB req. ☐ Copies sold: 575 since 1984 ☐ Cost: $200

☐ 87FFT; FFT-2
Performs forward and inverse FFTs on real and complex arrays. Allows single and double precision data types. Performs convolutions, auto correlations, hamming, complex vector multiplication, and complex to radial conversions. 87FFT-2 performs 2D FFTs. Callable from MS FORTRAN, 87BASIC/INLINE, IBM or MS Assembler, Turbo Pascal or RM FORTRAN.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 375 since 1984 ☐ Cost: $200

☐ 87Macro/Debug
Software development for 8087. Converts 8087 opcodes and operands into 8088 escape codes and source code for library of 8087 macros. Object module performs extensions as transcendentals, trigonometrics, hyperbolic functions and number conversions. Requires IBM MACRO Assembler.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,275 since 1982

I/O A BORE? NOT ANY MORE!

I/O PRO is a screen development system that supports Microsoft Fortran, Ryan-McFarland, IBM Professional and Lahey compilers. I/O PRO is available for $390. For more information contact:

NEW!

turbo magic™

for Turbo
Pascal Programmers

turboMAGIC™ turns your ideas into state-of-the-art programs.

Your productivity increased, or **your money back!**

Let your imagination run wild! It's easy with *turboMAGIC, the slickest code generator available for Turbo Pascal.* Input forms. Report forms. Help windows. Pop-up menus. Pull-down menu systems. And more! *turboMAGIC* will turn 15 minutes of your time into code that would take you hundreds of hours to write. Whether you're a professional or just a beginner, you need *turboMAGIC.*

It's **POWERFUL!** It's **FLEXIBLE!** It's **FAST!** It's **MAGIC!**

Wouldn't you like some magic? Order *turboMAGIC* today. Only $99.00. You have nothing to lose with our 30-day full money-back guarantee. CALL NOW! 1-800-225-3165 (Outside Alabama, orders only) or 205-342-7026 (VISA & MC welcome, no PO, no COD)

Requires: Turbo Pascal 3.0 and an IBM PC/XT/AT or compatible 256k RAM minimum

Not copy protected.

MILLER MICROCOMPUTER SERVICES

☐ MMSFORTH Utilities Diskette

Features floating point, including transcendental functions, complex numbers, rectangular to polar coordinate conversion, cross-reference program and turtle graphics implementation.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $50

MINNOW BEAR COMPUTERS

☐ CBC Manager I

Allows increased memory for arrays in C-BASIC programs. Allows arrays larger than 64K. Supports 250 X 250 arrays of reals subject to bounds checking. Supports 1D, 2D and 3D arrays of reals, integers, and strings.
IBM PC ☐ 192 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $150

NOSTRADAMUS
5320 S. 900 East-Suite 110
Salt Lake City, UT 84117
(801) 261-0769

Demo, Tutorial, Prototype, and Menu generator creates replays of actual programs, or vaporware displays-only replay. Includes screen editor, text editor, keystroke/timing editor and sound editor. Insert pop-ups, prompts, prototypes, branch menus, end user & sound. Memorizes keystrokes, elapsed time between keystrokes and screens.

☐ CBC Manager II

Allows C-BASIC programmers to use additional memory. Locates functions in separate code segments and calls from there. Calls routines written in other languages.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $300-$400

☐ CBC Tools

Function library for C-BASIC compiler. Quicksorts, BDOS interface, dictionary interface, bit manipulation, radix conversion, string filters/handling, tracer and profiler.
IBM PC ☐ 32 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $175

☐ CBC XREF

Cross-reference utility for Digital Research's C-BASIC compiler. Contains options for configuring and sorting output. Includes local variables and labels.
IBM PC ☐ 64 KB req. ☐ Copies sold: 120 since 1985 ☐ Cost: $80

☐ MB+ Tools

Over 100 functions for Pascal MT Plus. Program profiler, radix conversion, directory access and string manipulation.
IBM PC ☐ Copies sold: 60 since 1985 ☐ Cost: $175

☐ MBPASLIB

Improved PASLIB for Pascal/MT Plus. Reduces programs by 2-7 KB on 8-bit and 5-10 KB on 16-bit computer.
IBM PC ☐ 30 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $125

NATIONAL SOFTWARE ENTERPRISES, INC.

☐ Code Generator

Creates data bases, screens, menus, reports, labels and converts files without writing program. Displays instructions on screen with manual cross-referencing.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $500

HELP

TESTED WITH PC NETWORK

is at hand

HELP/Control™ - an on-line help subsystem for the IBM-PC. Increases the value of your software. Save development time and money.

HELP/Runtime. A few simple subroutine calls add context sensitive on-line help to your application. **HELP/Runtime** includes tested interfaces for Microsoft C, Lattice C, Turbo Pascal, IBM BASIC (Interpreter and Compiler), Microsoft FORTRAN, IBM COBOL and assembler. It is distributed with demonstration programs in each language.

HELP/Popup. Add a powerful help system to existing applications, even in dBase or 123, without reprogramming, even without a programmer. It may be memory resident, or, installed with an application, it terminates when the application exits, releasing its memory.

HELP/Generation. Use your favorite editor and our concise screen definition language to build your help files. Compile them into a help system usable by either **HELP/Runtime** or **HELP/Popup**. The package includes sources for sample help files illustrating such features as full-sized or windowed screens.

HELP/Convenience. The screens include highlighted captions. The user selects a caption with the cursor control keys and advances to a new screen, just as with 123.

HELP/Documentation. A detailed manual, both on-line and printed, for the documentation writer and programmer includes instructions which may be incorporated into the user manual.

HELP/Environment. PC-DOS 2.0 or greater is required. **HELP/Runtime** requires approximately 9K for code and buffers for full size help screens.

HELP/Pricing. The complete package (software, both manuals, and demo programs) costs $125.00 and includes a royalty-free license to add **HELP/Runtime** to your applications and to make 25 copies of **HELP/Popup.** A demonstration diskette, including the on-line manual, costs $15.00. A free update to Release 1.1 is available to registered owners. To order, or for more information (including dealer, multiple-copy and site-license pricing) call MDS at 207/772-5436. We accept MasterCard and VISA.

BUILD BETTER SYSTEMS FASTER and EASIER WITH DesignAid®

An IBM PC-based design tool

Now available on Digital VAXstations

The right tool to automate your system design and documentation has to be right not only for today...but tomorrow as well.

In selecting the right tool, you'll want to ask:

- Will it meet my current requirements **and** future needs?
- Will it support technical **and** management tasks?
- Will it support the entire development life cycle?

DesignAid is right for you today, because it:

- Provides a full documentation editor — integrated word processing **and** graphics.
- Automates traditional design techniques as well as structured analysis and design — with extensive capabilities for validation and balancing of data flow diagrams.
- Supports multiple design techniques like Yourdon, Gane & Sarson, and Warnier-Orr.
- Improves communication via a common data base.
- Provides an easy-to-use interface for initial users, and an expert mode for advanced users.

DesignAid is right for you tomorrow, because it is a design tool **and more!** DesignAid is extensible and integrates with other CASE products, such as LifeCycle Manager (a powerful, PC-based planning, estimating and control tool to automate project management) and a comprehensive application generator system to complete the development process.

For information about DesignAid — **and more** — contact NASTEC, the leader in computer-aided software engineering.

PHOENIX COMPUTER PRODUCTS CORP.

☐ PASM86
Assembles MASM files. Supports 8086/88, 8087, 80186, and 80286 op codes. Symbols can be defined on the command line and are allowed within procedures. Generates symbol tables and listings.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $295

☐ PforCe
Library of object-oriented C functions and subsystems for writing in C. Manipulates objects like windows, fields, screens and menus. Changes objects characteristics globally or tailors them to specific applications.
IBM PC, XT ☐ Cost: $395

PolyMake *The Leading Make Utility*

Are you still using a prehistoric Make? Now, step up to PolyMake, the most powerful and flexible Make utility available for programmers using MS-DOS. PolyMake is like an intelligent assistant that remembers how to rebuild a program when you change one part of the program. PolyMake will automatically invoke your compiler, assembler, linker, librarian or other tools to update a single program or entire software systems when you type — MAKE. PolyMake comes with built-in rules for rebuilding programs but you can also teach it new rules so you don't have to remember the file dependencies in your program. Advanced programmers prefer capabilities like fully recursive makefile processing and the ability to invoke PolyMake with special "flags" and macros that automate a whole range tasks. New Make users appreciate the Step-By-Step tutorial and intuitive commands. Handles source files written in any language. Requires DOS 2.0 & higher. Compatible with LANs, the IBM PC, XT, AT and other MS-DOS PCs. **For complete details write for the POLYTRON Programmer's Catalog.** $99

PVCS *The Most Powerful & Flexible Source Code Revision & Version Control System.*

The POLYTRON Version Control System (PVCS) allows programmers, project managers, librarians and system administrators to effectively control the proliferation of revisions and versions of source code in software systems and products. PVCS is a superb tool for programmers and programming teams. (A special LAN version is also available.) If you allow simultaneous changes to a module PVCS can merge the changes into a single new revision. If changes conflict, the user is notified. Powerful capabilities include: Stores and retrieves multiple revisions of text; Maintains a complete history of revisions to act as an "audit trail" to monitor the evolution of a software system; Maintains separate lines of development or "branching"; Provides for levels of security to assure system integrity; Uses an intelligent "difference detection" to minimize the amount of disk space required to store a new version. Requires DOS 2.0 or higher. Compatible with the IBM PC, XT, AT and other MS-DOS PCs. Single User version $395. 5-station LAN version $1,000, add $500 for each additional 5 stations. $395

☐ Plink86
Linkage editor. Accepts object files conforming to Intel or Microsoft format and outputs executable program files.
IBM PC ☐ Cost: $395

☐ Pmaker
Tracks changes to files that make up programs. Reconstructs the program using updated modules and files. Constructs files describing dependent files and their sequence of operations.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $195

☐ Pre-C
Cross checks source files and libraries, reporting incorrect, obsolete and non-portable C usages. Detects unreachable code, unused variables, misdirected pointers and mismatched argument data types. Provides warning reports directed to disk, console or printer.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $395

PHOENIX TECHNOLOGIES, LTD.

☐ PLIB86
Handles Intel or Microsoft format libraries. Builds libraries, adds/deletes modules and produces cross-reference listing.
IBM PC ☐ 128 KB req. ☐ Copies sold: 6,000 since 1979 ☐ Cost: $195

PLACE MANAGEMENT CORP.

☐ Super Utilities
Provides over 100 programs and subroutines for PCDOS including macros, seektext/file, file recovery, backup, file encryption and decryption, BASIC sort, screen save, password protection and DOS menu creation. Saves 3D graphs to disk.
IBM PC, PCjr, XT, AT ☐ 128 KB req. ☐ Copies sold: 856 since 1984 ☐ Cost: $72

POLYGON SOFTWARE CORP.

☐ EasyPath
Reviewed Apr 1985 p. 138.
Permits programs and commands to find files in subdirectories other than current one. Search paths specified separately for particular files or groups of files using global filename characters. Predefined specifications for most major programs. Protects subdirectories against deletion or creation.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $100

POLYTEL COMPUTER PRODUCTS CORP.

☐ KEYWARE
Programming environment for defining touch keys on Polytel's KEYPORT 300 touchpad. Allows for KEYPORT macros to pause for user input. Custom help windows. Edits previously saved key definitions off line.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $109

POLYTRON CORP.
SEE AD ON PAGES 348/382

☐ C Beautifier
Reformats copy of C program input file, indenting each line to display structure of program. Utilizes K&R standard. Adjusts tab stop spacing to fit display or printed page.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $49

☐ C Library
Fifty high performance functions for Lattice C Compiler.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $99

☐ C Library 1
Supports 47 general purpose and 29 I/O routines. Enhances and adds Lattice C functions. LAN-compatible.
IBM PC, XT, AT ☐ Copies sold: 1,000 ☐ Cost: $99

☐ PolyCrossRef
Multi-lingual cross reference generator. Cross references variables, constants, functions, procedures and subroutines. Cross references source files, even if more than one source language is used in same program. Report generation.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $49-$219

☐ PolyFORTRAN Tools
Cross-reference listings, cleanup reformats, extract subroutines, functions, block data and screen position/color control. LAN-compatible.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $179

☐ PolyLibrarian
Reviewed Oct 1984 p. 80.
Creates/manages libraries of object code modules. Time stamping modules, 3 operating modes and searches for public/external names. Supports Microsoft format. Enhanced version supports Microsoft and Intel format libraries. LAN-compatible.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 4,000 since 1983 ☐ Cost: $99-$149

☐ PolyMake
Program builder and maintenance tool. Builds latest revision of software system with single command. Uses UNIX to make syntax. Batch file output mode. LAN-compatible.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $99

☐ PolyOverlay
Creates optimal memory overlay structures while building batch files to automatically drive overlay linker. Creates overlay structures for any modular language including Pascal, C, FORTRAN and Ada.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $99

☐ PVCS (POLYTRON Version Control System)
Source code control system for use with PCs and LANs. Stores/retrieves multiple revisions of text. Maintains history of changes. Maintains separate lines of development or branching. Merges simultaneous changes. Includes file locking. Single-user or network versions available.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 350 since 1985 ☐ Cost: $395

☐ Version Control System
Source code revision management. Maintains chronological history of source-file changes. Reconstructs prior revisions of any module, defines version of specified revisions of module and supports branching from previous revisions. Multiple copy and network licenses are available.
IBM PC

PRO/AM SOFTWARE
SEE AD ON PAGE 383

☐ DISnDATa
Disassembles .EXE and .COM files. Performs recursive flow- and segment register data-trace. Outputs appropriate segment and PROC pseudo-ops at proper places within assembly language output. Outputs data areas using most appropriate form of DB or DW. Labels code and data.
IBM PC, XT ☐ Cost: $145

QCAD SYSTEMS, INC.

☐ QPARSER
Translator writing system for language development, data translation and creation of compilers or interpreters. Generates source code.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $400

☐ QTOOLS
UNIX-style toolbox on MSDOS. File listing, pattern search, substitution, translation and file maintenance. Provides format and description of commands. Creates personalized filters.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $50

QUALITAS, INC.

☐ TallScreen
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $50

QUARTERDECK OFFICE SYSTEMS

☐ DESQVIEW
Reviewed Dec 1985 p. 52.
Memory-resident, multi-tasking integrator with bit-mapped graphics support for spreadsheet users. Supports mouse systems. Allows the use of batch files, supports virtual memory, and transfers data without requiring vendor-supplied files. Includes autodial.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $100

QUE CORP.
(division of Macmillan, Inc.)

☐ C Programmer's Library
Includes procedure for recursion, link lists, binary trees, sorting algorithms and ISAM fuction.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $125

QUILT COMPUTING

☐ QMAKE
For rebuilding systems. Compiles only routines which have been changed. Analyzes dependencies before rebuilding any part of system. Supports macros, multiple entry points and most languages.
IBM PC ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $99

☐ Software Revision Management System
Stores all versions of source/documentation in a single ASCII file. Allows retrieval of any version or source and application of changes, while recording when, why and where changes were made with no duplication of common code.
IBM PC ☐ 128 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $125

QUINN-CURTIS

☐ IPC-TP-017
DOS/BIOS tools for Turbo Pascal. Includes 170 procedures/functions. Provides equipment/memory size/DOS version number determination. Reads/writes/formats disks. Creates directories from within program. Sets/reads system time/date. Gets/sets interrupt vectors. Manages memory. Allows background printing.
IBM PC, XT, AT ☐ Cost: $75

RAYTRONICS

☐ C-CHAIN
Supports load and chain of independent programs which may occupy 64Kb of code plus 64Kb of data. Loads multiple programs. Different programs share common data space or have independent space.
IBM PC ☐ Cost: $95

THE SOFTWARE BOTTLING COMPANY OF NEW YORK
6600 Long Island Expressway
Maspeth, NY 11378
(718) 458-3700

Speed Screen is the new add-on utility for Software Bottling's Flash Code and Screen Sculptor. Compresses screens and makes them RAM resident, provides instant screen displays, takes existing screen files from Flash Code and Screen Sculptor and combines them into a single, compressed screen library that can then be loaded into RAM. Price $35.

DISnDATa,
The *Only* Disassembler That Tracks Down DATA!!!

- Fully disassembles both .EXE *and* .COM files!
- Performs recursive flow- and Segment Register data-trace to determine SEGMENT, PROC & *Data* Areas (even within 'CODE' segments)!
- Outputs appropriate SEGMENT and PROC pseudo-ops at proper places within the assembly-language output!
- Outputs data areas using most appropriate form of DB or DW (ASCII printable text as a character string, others as their hex value).
- Chooses data lengths (DB or DW) to match byte or word data references in *code*, allowing most memory references to be free of BYTE or WORD length operators.
- Outputs large, all-zero areas with "DB/DW nn DUP (?)" to prevent excessive output from large buffers, uninitialized arrays, etc.
- Fully labels both code and data. Labels are of the form 'Hxxxxx', where 'xxxxx' is the hex offset of labelled item from the beginning of the program.
- Outputs code, data & pseudo-ops in IBM* ASM or MASM assembler format. (Output may be directed to display, printer, and/or disk.)
- For IBM* PC*/XT* AT* & compatibles, 128K+ RAM, 1 or more disks, DOS 2.X+.

#8634-20 PC-DISnDATa 1.0 (SSDD 5-¼" diskette) and manual $145

U.S. Funds Only. Add $3 shipping (U.S. & Canada), $10 (overseas air) per item. Ohio residents please add 6% sales tax. *Registered trademark, IBM Corporation

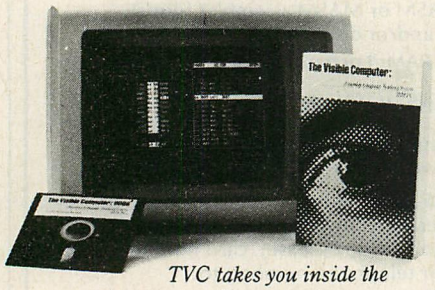
Get a Grip on Assembly Language.

The award winning Visible Computer: 8088.

The Visible Computer is a book and software combination for mastering the elusive skills of assembly language. PC Tech Journal took one look and made it their September '85 "Program of the Month."



It's an animated simulation of the PC's microprocessor that lets you see with your own eyes how assembly language works. You'll be using it as a debugging tool for years to come.

It's a tutorial. A lot of people think the 350 page manual is the best book on assembly language ever written.

It's 45 demonstration programs you'll execute with the simulator, from simple register loads to advanced programs that manipulate interrupts and perform file I/O. And what you'll learn applies to all 86 family processors, including the 80186 and 80286.

$79.95 not copy protected

The Visible Computer for IBM PC/XT/AT and true compatibles. If your dealer doesn't have it, order direct: Software Masters, 2714 Finfeather, Bryan, TX, 77801. (409) 822-9490. Please include $3.00 shipping. Bank cards accepted.

TVC takes you inside the processor as it executes programs.

Software Masters™

CIRCLE NO. 168 ON READER SERVICE CARD

REAL-TIME COMPUTER SCIENCE CORP. (RTCS)

☐ PCSBC
Uploads/downloads to allow IBM PC to control Intel single-board 88/86 via PC console. Requires Intel SBC 951B monitor or RTCS/957B on SBC.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $195

☐ X-TOOLS
Structured program development aid. Structogram editor converts Nassi-Schneiderman diagrams into source text readable for PL/M, Pascal, FORTRAN, C, COBOL or BASIC compilers. Interactive precompiler performs syntax checks.
IBM PC ☐ 256 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $950

RICKERDATA

☐ Keyswap 3.0
Reviewed Oct 1985 p. 131.
IBM PC keyboard enhancer. On-line macro editor, macro listings and design menus and windows. Fixed/variable field input and time delay on macro playback.
IBM PC, XT ☐ 48 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $80

SCIENTIFIC SOLUTIONS, INC.

☐ E+EEPROM Software Support
Library of subroutines for data acquisition, review and manipulation and EPROM programming.
IBM PC ☐ 64 KB req. ☐ Cost: $95

☐ IEEE488 Software Support
Library of subroutines that provide high-speed data transactions without requiring assembly language interfaces.
IBM PC ☐ 128 KB req. ☐ Cost: $95

SEIDL COMPUTER ENGINEERING

☐ Make Utility
Product generation and programming utility. Executes minimum set of commands that are needed to rebuild product, when changes are made to any modules that make up product.
IBM PC ☐ 256 KB req. ☐ Cost: $100

☐ Version Manager
Software development and version control system. Maintains revision history and audit trail for entire development project. Tracks changes to individual modules and stores version information which tracks how each version of product is made.
IBM PC ☐ 256 KB req. ☐ Cost: $300

SERIAL LAB PRODUCTS, INC.

☐ SL-60, SL-65, SL-70
Analog I/O, digital I/O, counter/timers, watching timer, local memory functions, interrupts and monitor/debugger.
IBM PC ☐ Copies sold: 50 since 1982 ☐ Cost: $175-$350

SHERBORN SOFTWARE SYSTEMS

☐ /N
Removes unused line numbers from source code for compiled BASIC programs.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 43 since 1983 ☐ Cost: $15

SIEMENS ENERGY & AUTOMATION, INC.

Programmable Controls Division

☐ Documenter
Enters text onto user program, cross-references program elements and prints hard copy. Program element labels, network text and function block descriptions for each network.
IBM PC, XT, Portable PC

☐ Ladpro
Includes definition of I/O module table configurations, entry and modification of MC-16 ladder diagram programs with screen-based free format editor, and entry and translation of complex functions using function blocks. Creates hard copy printouts of ladder programs.
IBM PC, XT, Portable PC

☐ Supervisor
Aids in start-up and debugging of control programs. Enables or disables various programs selectively.
IBM PC, XT, Portable PC

DAVID SMITH SOFTWARE

☐ Code Sifter
Performance execution profiler locates time-consuming code sections when tuning. Statistical data indicates percentage of run time spent in each of 32 areas of memory. Defines areas. Reruns programs in succession. Output contains symbols from user's link map.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $119

SOFTEXT PUBLISHING CORP.

☐ File XFER
Reads/transfers data from file formats including dBASE II, Multiplan/SYLK, VisiCalc/Lotus DIF, minimal BASIC, delimited and fixed-length file with field specifiers.
IBM PC, XT ☐ 170 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $40

☐ MT+ Tools for Pascal MT+86
Returns list of file names from disk, lists disk space, clears screen, dispositions cursor, sets blink, high intensity, renames file, returns logged disk and charges directory path/disk drive.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $40

SOFTFOCUS

☐ Snake
Compiles and links programs. Consults programmer-defined table that specifies what modules make up a given program. Checks timestamps to determine which modules have been changed and issues commands to perform necessary actions.
IBM PC, XT, AT ☐ Cost: $59

SOFTWARE ASSOCIATES

☐ BetterTOOLS
Application development tools for BetterBASIC programming language. Adds over 150 statements. Sorts data using Quicksort or Shellsort algorithms. Encrypts/decodes string data or entire files. Displays directories. Loads/accesses directories in memory. Manipulates file attributes and date/time stamps. Copies files.
IBM PC ☐ 256 KB req. ☐ Cost: $95

SOFTWARE DEVELOPMENT FACTORY

☐ CrossRefC
Multi-function professional software development tool creates cross module cross-reference of nonstatic variables, single module cross reference for each variable, finds occurrences of text in files. Portable. Supports K&R standards. Recognizes local variables with identical spelling.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 130 since 1983 ☐ Cost: $99

SOFTWARE GARDEN, INC.

SEE AD ON PAGE 385

☐ Dan BricKLin's Demo Program
Reviewed Mar 1986 p. 29.
Generates screen images. Features slide show-type of prototyping to produce simulations. Supports monochrome, color/graphics and enhanced graphics adaptors (text mode only).
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $75

SOFTWARE INNOVATIONS, INC. (CA)

☐ SOURCE-IT
Cross-reference utility and documentation aid for use with Microsoft's BASIC Interpreter and Compiler. Reads an ASCII BASIC program and generates a detailed formatted listing for program modifications and walk-throughs or debugging. Not copy protected.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 32 since 1983 ☐ Cost: $90

DAN BRICKLIN'S DEMO PROGRAM HAS EVERYONE TALKING.

Dan Bricklin's Demo Program is a new concept in prototyping and demo-making. With DEMO you can conceptualize programs, describe them to others, refine their functionality and human interface, and finally, teach users the finished product. The two most common applications are to prototype a product before it is written and to produce a demonstration or tutorial about an existing product or system.

- Create, edit and view a series of slides
- Each slide is 80x25 characters
- All 256 characters supported, including special characters
- All 256 attributes (color, underline, blink, etc.)
- Each slide can be the image of what a running program looks like
- Characters graphics only, no bit-mapped graphics
- Slides are stored compacted, allowing often hundreds and hundreds of slides to fit in memory for instant access (given enough RAM)
- Complete set of editing commands, including cut, paste and move
- Line, box and special character commands *built-in*
- Includes background "CAPTURE" program for importing screens from running programs
- Learn-mode macro facility
- Run command switches from slide to slide under automatic control
  Options include:
  - ☐ Adjustable delay between each slide
  - ☐ Wait for key or optional timeout
  - ☐ Display different slide next depending *upon keystroke*
  - ☐ Produce tones
  - ☐ Switch to another set of slides in another file
- Runtime-only version of program included, along with license to make up to 50 copies (see License for details).
- Additional volume runtime licenses available.
- Requires 256k IBM PC/compatible, DOS 2.0 or later. Supports Monochrome, Color/graphics, and EGA Adaptors (text mode only).

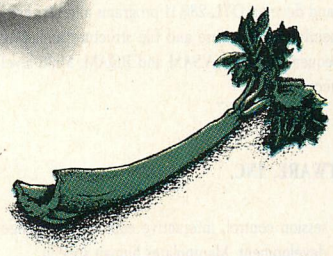
Thousands of developers are designing better products faster and producing more effective demonstrations using Dan Bricklin's Demo Program. You can, too. Act now!

"A winner right out of the starting gate.. After you use DEMO once, you'll wonder how you got along without it."—PC Magazine, 4/29/8

PRODUCT OF THE MONTH
—PC Tech Journal, 3/86

"Everybody who writes software, either commercially or for in-house applications, should immediately order a copy. Period. No exceptions."
—Soft•letter, 4/20/86

"Its low price, superb performance, and range o applications practically guarantee that it will be widely used. Four Floppy Rating (8.0)"
—InfoWorld, 3/31/86



"Apparently has a hit on its hands with... a development tool for personal computer software that has won rave reviews from early users."
—Computerworld, 4/7/86

CIRCLE NO. 123 ON READER SERVICE CARD

SOFTWARE MASTERS (IN)

☐ Super-Ed

Accepts any DOS command and runs any program. Turbo Pascal-like environment for any language. Multi-file window editing. Moves and copies between file windows. Finds and replaces. User-configurable editing commands and colors. Supports keyboard macros. Utilizes subdirectories.
IBM PC, AT, XT, PCjr ☐ Cost: $60

SOFTWARE STUDIOS, INC.

☐ Unnumber: Programmer's Tool

Strips BASIC or BASICA program of unreferenced line numbers prior to compiling. Preserves line numbers referenced by goto, gosub, if, then and all other line branching commands.
IBM PC ☐ 64 KB req. ☐ Cost: $25

SOLUTION SYSTEMS

☐ C Toolset Programming Utilities

Eight UNIX-like debugging programs. File compare, variable cross-reference and complex pattern search.
IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $95

☐ Faster C

Recompiles Lattice programs and loads directly into memory without linker. Performs link in memory. Call utility.
IBM PC ☐ 128 KB req. ☐ Cost: $95

SOLUTION TECHNOLOGY, INC.

☐ See-II

Compares ASCII text, date or program file against another or backup file to detect changes. Difference report written to console, filed or printed. Detects differences on line by line or word by word basis. Treats all letters as upper case.
IBM PC

SPS SOFTWARE PRODUCTS & SERVICES, INC.

☐ EPOS

Includes facilities for automatic code generation for selected high-level languages and analyses for redundancy, consistency, and completeness of design segments. Generates full documentation in text and graphic forms.
IBM AT ☐ 512 KB req. ☐ Copies sold: 175 since 1980

STERLING SOFTWARE

Dylakor Division

☐ DYL-280 II VMPC/370

User can test and develop DYL-280 II programs and retrieve/update any mainframe data base and file structure including IMS, IDMS, sequential, ISAM, VSAM and BDAM. Multi-level password protection.
IBM XT/370, AT/370/VMPC

STOK SOFTWARE, INC.

☐ Pilot

Language for session control, interactive command language and voicemail development. Manipulates human speech.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,500 since 1981 ☐ Cost: $900

STRATCOM SYSTEMS, INC.

☐ PC-FORTRAN Tools

PC-XREF develops cross-reference maps. PC-OVRLAY creates optimal memory overlay structures. PC-CNTROL is set of FORTRAN-callable screen attributes. PC-KLENUP improves FORTRAN source code readability. PC-XTRACT extracts main routine, subroutines, functions and block data from FORTRAN source code.
IBM PC, XT ☐ Cost: $179

STSC, INC.

☐ ALP*Plus PC Tools, Volume 2

APL programming utilities. Supports file documentation and editing, screen editing and exception handling.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $85

☐ APL*Plus/PC Tools, Volume 1

Screen management, PC-to-host data transfer, report formatting and software maintenance utilities.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,200 since 1984 ☐ Cost: $295

SUNNY HILL SOFTWARE

SEE AD ON PAGE 351

☐ Turbo Professional

Includes routines for windowing, RAM resident, pop-up programs, DOS memory allocation, absolute sector I/O, directory searches, background printing and resident module interfacing. Includes over 120 routines.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $70

SYNERGY

☐ XREF

Cross-reference for BASIC programs. Prints line reference for variables, subroutine calls, file statements and goto statements. Search facility. Debugs or modifies BASIC programs.
IBM PC ☐ Cost: $35

SYSTEMS GUILD, INC.

☐ Csharp Realtime Tool Kit

Event handling, device-independent graphics, processor dependent utilities, prioritized scheduler and state system control executive.
IBM PC ☐ 8 KB req. ☐ Copies sold: 40 since 1983 ☐ Cost: $600

TANDY/RADIO SHACK

☐ Macro Assembler

Radio Shack no. 26-6450. Assembly language mnemonics for I/O control. Requires Radio Shack's XENIX Development System.
☐ Cost: $399

TECHLAND SYSTEMS, INC.

(subsidiary of York Research Corp.)

☐ XTU

Utilities for ETV and print spooling. Maintains host source libraries on PC.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $99

TECHNOLOGICAL SYSTEMS GROUP, INC.

☐ FTNLIB

Collection of FORTRAN callable utilities allowing programmer to access keyboard, speaker and display of PC. Provides basic graphics functions and printer output for CGA and Hercules card. Provides cross-hair for graphical input.
IBM PC ☐ 196 KB req. ☐ Introduced: 1986 ☐ Cost: $100-$400

THEOS SOFTWARE CORP.

☐ Toolkit

Collection of utilities for Theos 8, 86 and 286 multi-user OSs. Aids development and distribution of software. User can transfer data between Theos OSs.
IBM XT, AT ☐ Cost: $150-$300

TOOL MASTER, LTD.

☐ TexSys

Records changes to text files, assigns ID to each recording why each change was made. Used instead of backup copy facility. Saves differences between changed versions. Stores 15-20 versions in disk space normally taken by 2 backup copies.
IBM PC ☐ 128-512 KB req. ☐ Introduced: 1985 ☐ Cost: $59-$99

TOUCH TECHNOLOGY, INC.

☐ PC Touch and SPC Touch

Installs PC Touch driver. Provides 1,000 by 1,000 point touch screen calibration, a keyboard utility, and a touch screen demonstration using black jacks. Compatible with most Microsoft mouse-compatible programs.
IBM PC, XT, AT ☐ 100 KB req. ☐ Copies sold: 20 since 1983

☐ PC Touch Option A

Adds preset touch pad patterns and custom touch pad design capabilities to basic PC TOUCH system.
IBM PC ☐ 185 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $500

☐ PC Touch Option B

Adds user-generated menus which pop-up when screen is touched, and then activated as macro commands when retouched.
IBM PC ☐ 202 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $650

☐ Program Writing Program

A text and linker program for writing and linking multi-color touch screens for any application.
IBM PC ☐ 260 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $725

TRAEGER AND ASSOCIATES

☐ PC-Dictionary

Utility product that documents dBASE programs and applications. Provides dBASE programmers method to document and generate application flows. Dictionary and documentation for dBASE applications. Impact analysis determines program calling sequences and hierarchical program calling structure for application viewing.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $99

TRISYSTEMS

☐ Softkey

Redefines keys on keyboard at run-time or with standalone, menu driven package. Frequently used words/phrases can be assigned to single key.
IBM PC

TULSA COMPUTER CONSORTIUM

☐ BASIC Aids Graduate

Superset of BASIC Aids Student program. Features interpretive option and function key manager. Performs source code global replace in .EXE and BAS formats.
IBM PC ☐ 160 KB req. ☐ Introduced: 1984 ☐ Cost: $79

☐ BASIC Aids Professional

Superset of BASIC Aids Graduate program. Floats BASIC statements between programs. Joins programs or libraries to create new programs or libraries. Resolves numbering conflicts while inserting new modules into program.
IBM PC ☐ 160 KB req. ☐ Introduced: 1985 ☐ Cost: $129

TURBOPOWER SOFTWARE

☐ Turbo Extender

Extends Turbo Pascal to modular large code model and large data support. Supports 640K code model, separate compilation, EXE file creation and program maintenance. Data arrays to 30 MB via expanded memory or virtual paging.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 2,000 since 1986 ☐ Cost: $85

☐ Utilities

Nine utilities for Turbo Pascal programmers. Pretty printer, Pascal structure analyzer, execution profiler, execution timer, pattern replacer, difference finder, command repeater and file finder.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 3,000 since 1985 ☐ Cost: $55-$95

UNIPRESS SOFTWARE, INC.

☐ EMACS-Gosling Version

Allows several files to be edited simultaneously. Extendable via macros and built-in MLISP compiler, which permits user-written functions, commands and packages.
IBM PC ☐ 250 KB req. ☐ Copies sold: 3,500 since 1983 ☐ Cost: $325 and up

FLASH

$49.95

SPEED UP YOUR COMPUTER!

NOT COPY PROTECTED

Increase the ***speed*** of your computer by as much as ***4-8*** times. Why buy a PC AT when all you may need is some ***FLASH. FLASH*** is just that, it gives disk accesses in a ***FLASH.*** Every PC owner can't be without ***FLASH*** once the powers of ***FLASH*** are discovered. The program is totally invisible to the user. There is nothing to learn. Make your floppies ***faster*** than a hard disk. Make your hard disks faster than ever before. Allows the user to have sub-directories on his floppies without the usual loss of speed. ***FLASH*** will also tell you just how much faster you are running than you would have been without ***FLASH. FLASH*** is handcrafted in ASSEMBLER. Upgrade your computer with ***FLASH.*** Batch files will ***fly*** like they had wings. Save wear & tear on expensive program disks.

You'll be so ***amazed*** with your improved performance, you will want to call us to tell us so!

BENCHMARKS for different programs utilizing ***FLASH***

	W/O FLASH	W/FLASH
WORD STAR	2.0	0.33
BASICA	2.7	0.40
LINKING	113.8	6.00
SORTING FILES	105.0	27.00

When ***FLASH*** increases your speed it generally makes you run **3-5** times faster. In favorable conditions like the ones above ***FLASH*** can make your PC run **6-16** times faster! PC's over the world are screaming for ***FLASH.*** Reach the speed of a RAM DISK, without their disadvantages. If you think you DON'T need ***FLASH,*** call us and tell us why!

Order Line 1-800-25-***FLASH***
Info Line 1-317-253-8088
MC, Visa, Check, C.O.D.
For: IBM PC, AT, XT, JR, or clone.

Now utilizes expanded & extended memory.

"The novice and expert alike will consider ***FLASH*** their most valued utility."

■ ***Buffer-Master,*** keyboard buffer extender from 15 to 2000 key type ahead.	~~29.95~~	**24.95**
■ ***Super-Ram-Disk,*** set up MULTIPLE ram disks and as MANY as you want.	~~49.95~~	**24.95**
■ ***Calc-Pad,*** ram resident calculator, hex octal binary and decimal. Works in ANY graphic mode. Unlimited parenthesis nesting. Many functions.	~~49.95~~	**24.95**
■ ***Sort-Merge-Copy,*** a super sort utility. Use it stand alone or call it from ANY language.	~~150.00~~	**49.95**
■ ***Unprotect,*** unprotects basic programs.	~~49.95~~	**29.95**
■ ***Data-Path,*** Have paths setup to find your data and overlay files. Works with ALL programs.	~~49.95~~	**29.95**
■ ***MoreHard,*** gain up to 10%-50% more hard disk space! ***ALL*** programs work in harmony with each other.	~~49.95~~	**29.95**

SUPER—ED Version 3.0

- Do ***ANY DOS*** command or ***RUN ANY*** program from within ***SUPER-ED.***
- Turbo Pascal like environment for ***ANY*** language.
- ***MULTI-FILE*** window editing. Move & copy between file windows.
- Extensive Find & Replace usage.
- ***ON-LINE*** editing ***HELP.***
- Editing commands & colors & more are fully user configurable.
- ***ON-LINE*** language-specific user definable ***HELP.***
- Full featured editor with ***WORD STAR*** like commands.
- Fully utilizes sub-directories.
- Supports keyboard ***MACROS.***

Reg. Price ~~***$59.95***~~
Limited Time ***$39.95***

We believe in the highest quality software at the lowest possible price!

Turbo Pascal is a trademark of Borland intl. Word Star is a trademark of Micro Pro intl.

UNITED STATES SOFTWARE CORP.

☐ Multi-Tasking Kernel
Develops multiple-time software tasks in microprocessor based product. Implements interrupt initiated, pre-emptive priority and dynamic task scheduling.
IBM PC ☐ 1 KB req. ☐ Copies sold: 300 since 1981 ☐ Cost: $250

VANCE INFO SYSTEMS

☐ C*lib (C Function Library)
Reviewed Jul 1985 p. 135.
UNIX-compatible, screen/window processing library; buffered, interrupt-driven, async communications library; string manipulation; and 8087/Microsoft floating point conversion. Versions are available for memory models of Lattice, Microsoft and Desmet C compilers. Supports 200 routines.
IBM PC ☐ 128 KB req. ☐ Copies sold: 60 since 1985 ☐ Cost: $195

VERDIX CORP.

☐ VADS (Verdix Ada Development System)
Compliance with ANSI/MIL-STD-1815A. Compiler, symbolic debugger, library utilities, runtime system and development tools. Maximizes rehostability and retargetability. Interfaces with existing environment. Develops, codes, compiles, debugs, tests and controls embedded microprocessors from single system linked to host computer.
IBM PC, XT, AT ☐ 1,000 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $7,500

VICTOR TECHNOLOGIES, INC.

☐ Application Programmer's II
Organizes key files in B-Trees. Creates character sets, defines functions of individual keys and configures system characteristics. Includes sorting utility, full-screen expandable editor, large files and overlays. Modifies library files.
IBM PC ☐ 128 KB req. ☐ Cost: $295

☐ Systems Programmer's II
Provides macro assembly, conditional assembly and assembled directives. Cross-reference utility. Helps debug Assembly language programs. Links separately produced modules of 8086-88 object code. Creates and modifies library files. Provides controlled testing environment for binary and executable object files.
IBM PC ☐ 128 KB req. ☐ Cost: $295

VOICE OPERATED COMPUTER SYSTEMS (VOCS)

☐ MOPI
Universal assembler. Generates absolute/relocatable code with no linking/loader required.
IBM PC ☐ 56 KB req. ☐ Copies sold: 30 since 1982 ☐ Cost: $195

WANG LABORATORIES, INC.

☐ PC C Developers Toolkit
Consists of a Wang 8086C Compiler, program statistics, C code program, C listing utility and 8087 Floating Point Emulation.
IBM PC ☐ Cost: $500

☐ PC Micro Focus Animator
IBM PC ☐ Cost: $500

☐ PC 2200 Support Utilities
IBM PC ☐ Cost: $125

WATCOM PRODUCTS, INC.

☐ WSL Development System
Screen editor, 8086 WSL compiler, 8086 assembly, 8086 linker and WSL run-time library.
IBM PC ☐ Cost: $450

WENDIN, INC.

☐ Operating System Toolbox
Software construction set used to build multi-tasking, multi-user OSs for PCs. Supports windows, mouse and pull-down menus. Performs multi-user scheduling, paged memory management and concurrent I/O.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $99

WESTERN WARES

☐ ZAS - Z-8000 and Z-8 Development Package
Macro assembler, linker, loading utilities and run-time monitor. Conditional assembly, 36 directives, full macro facilities. Builds overlay systems.
IBM PC ☐ 48 KB req. ☐ Copies sold: 250 since 1980 ☐ Cost: $195-$395

WHITE HERON CORP.

☐ CMP
Compares ASCII files and reports changes, moved blocks of lines, and changes within moved blocks. Optionally skips blanks and tabs or sends report to file. Allows 20,000 lines per file.
IBM PC, XT ☐ 52 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $89

YES SOFTWARE, INC.

☐ RE/Call
Reviewed Oct 1985 p. 131.
Macro processor with pop-up menus. Provides interactive correction and editing, single-step mode and macro zoom feature. Expands or shrinks menus as items are added or deleted.
IBM PC, XT, AT ☐ 24 KB req. ☐ Cost: $90

ZEDUCORP

☐ Dezign-PC
Structured program designer based on Jackson Design Method (JSP). Generates structured source code for programs written in Ada, C, Pascal, dBASE II, dBASE III, and PL/I.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $200

ZORTEC, INC.

☐ System Z
Software development and application maintenance. Contains data base manager, fourth generation programming language, text editor and intelligent compiler, runtime driver and real-time debugger and self-teaching program generator.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 200 since 1983

REPORT GENERATORS

AMERICAN BUSINESS SYSTEMS, INC.

☐ BACS Bridge
Accesses up to five BACS data files from other BACS systems. Bridges report data to Lotus 1-2-3.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984

AMERICAN INFORMATION SYSTEMS, INC.

☐ COBOLCRAFT RediWrite Report Writer and Data Bridge
User-designed management reports. Bridges data to word processing, spreadsheet, data base and graphics packages.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $695

ANALYTX INTERNATIONAL, INC.

☐ FormWorx
Forms design. Completes preprinted forms. Full-screen editing allows what you see is what you get. Various type sizes and line/box styles available. Accommodates 11" x 14" printout. Built-in macro capability. Provides graphics symbols. Supports most printers including LaserJet.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1986 ☐ Cost:

APPLICATIONS SYSTEMS CORP.

☐ PRO-IV Report Writer
Generates ad-hoc end-user reports from any PRO-IV files or data bases. Performs vertical totals through use of control breaks by numerical criteria. Accesses multiple files. Executable in run-time or development PRO-IV.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $300-$10,000

APPLIED MIND SYSTEMS, INC.

☐ APS
Aids in filling out forms and tracking flow. Defines set of forms. Inputs customer information once for required forms. Prints information on preprinted forms. Tracks which forms require response and when. Performs APR and other calculations required for form completion.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2 since 1986

BLOC DEVELOPMENT CORP.

☐ FormTool
Forms editor. Handles line drawing, editing, boldfacing, justification, block operations and variable form sizes. Produces prototype. Stores forms as standard ASCII files. Produces time sheets, expense reports, activity logs and productivity forms. Features windowing, word-wrap, reformatting, justifying and centering.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $95

BOS NATIONAL, INC.

☐ AutoClerk
Program generator. Produces reports and data entry/update modules. Assists in development of commercial applications. Handles routine programming tasks. Creates any file, screen format or print layout. Sorts, selects, amends, updates and calculates. Multi-user.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1978 ☐ Cost: $550

☐ AutoClerk (RT)
Run time version of BOS/AutoClerk.
IBM PC, XT, AT ☐ Cost: $100

BYTEL CORP.

Software Development Division
SEE AD ON PAGE 364

☐ Quepro
Forms and lists methods. Calculates data elements including addition, subtraction, multiplication, division and ratio percentages. List method sorts records in ascending or descending order and provides totals on numeric fields.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $595

CONCENTRIC DATA SYSTEMS, INC.

SEE AD ON PAGE 19

☐ dB Report Writer
Prepares presentation reports from dBASE file and in any format. English query and Lotus 1-2-3-like commands.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $125

CONCEPT OMEGA CORP.

☐ ConceptR
Creates financial reports, order forms, payroll checks and ad hoc reports. Permits placement of column headings, footings, boldfacing, underscoring and word processing text into any report. Executes control and page breaks, sorts any field and retrieves certain records or range of records.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $795

DATA LAW CO. (DLC)

☐ QPLEX-IV
Designed to be used in conjunction with Datalaw/PC. Produces custom management reports. Adds, subtracts, multiplies, divides and calculates percentages in creating special documents.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1980 ☐ Cost: $695

DATAMATE CO.

☐ EnQuery

Stores 28 report formats. Enters report specifications in free format. Reads COBOL file FD. Nested and compound if statements. Internal variables. Supports 25 totals and subtotals per report and 599 variables names per file.

IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1978

DCM DATA PRODUCTS

☐ Access

User can perform on-line query, format reports, transfer data to word processors/spreadsheets, catalog queries/reports, join files and define data file structure. Allows totals, subtotals, averages and level breaks in reports.

IBM PC, AT

FOGLE COMPUTING CORP.

☐ Universal Report Facility

Generates reports on stock paper, labels or screen. Variable column widths. Sorts report on any field, can be selective. Generates BASIC code.

IBM PC ☐ 128 KB req. ☐ Copies sold: 160 since 1982 ☐ Cost: $150

FOX & GELLER, INC.

☐ Quickreport

Combines up to 6 data base files into report. Reports include various types of calculations. Performs group breaks on up to 16 fields and selects data according to user-specific criteria.

IBM PC ☐ 256 KB req. ☐ Copies sold: 1984 ☐ Cost: $295

GENERAL DATA SYSTEMS, LTD.

☐ Dx Report Generator

Header and detail line controls, page number, date controls and editing, beginning and end of report and page, change in value of a data field, logical comparison of values of data fields or data field and literal.

IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ ADRS/PC (A Departmental Reporting System)

IBM no. 6428-092.

IBM PC

☐ Personal Decision Series - Reports + Edition

IBM no. 6410-937; 6466-984. Headings, footings and titles, numeric formats, four print sizes and four print colors, fixed text, constants and 200 variable fields. Application generator combines reports, screen design and file processing with user-written BASIC routines to generate programs.

IBM PC, XT, 3270-PC, Portable PC, XT/370, AT, PC Convertible ☐ 256-320 KB req. ☐ Cost: $165

☐ Reporting Assistant

Set of format, part, calculate and print commands produce reports based on output from IBM Filing Assistant program.

IBM PC, XT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $145

☐ XRW (Extended Report Writer)

IBM no. 6187-246. Extends report writing capabilities of R:base System 4000.

IBM PC, XT, 3270-PC ☐ Cost: $150

INFO-PROS, INC.

☐ Info-Reporter

Printer spacing chart shown on screen allowing positioning of fields and definition of contents as required. Multiple input files referenced for complex reports. Interfaces with four BASIC files.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $125

INSPIRATION SYSTEMS, INC.

☐ Prevail - Report Writer

Fourth generation report generation. Report formats include multiple summaries, heading, footing, and breaks. Retains report templates and generated code. Couples with Prevail, ADL and DBMS. Interfaces with other Prevail modules.

IBM PC ☐ 2,000 KB req. ☐ Copies sold: 100 since 1984

INTELLUTION, INC.

☐ On-Line Report Package

On-line snapshot reports for Intellution's The Fix. Details off-normal, off-scan and off-alarm points.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $150

MACOLA, INC.

☐ Report Writer

Step-by-step prompting, user-specified field formats and headings per column. Designates report breaks and subtotals with labels.

IBM PC, AT

MARTIN MARIETTA DATA SYSTEMS

(operating company of Martin Marietta Corp.)

☐ PC/Reporter

IBM PC version of RAMIS II fourth generation language reporter. Generates reports using any DIF, Fixed, sequential or comma-delimited ASCII file. Multi-window and pop-up help text. dBASE III compatible.

IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $350

☐ UNIX/Reporter

UNIX version of RAMIS II fourth generation language reporter. Generates reports from flat files. Window capabilities and menu-assisted or syntax reporting.

IBM AT ☐ Introduced: 1985 ☐ Cost: $995

MCDONNELL DOUGLAS INFORMATION SYSTEMS GROUP

(component of McDonnell Douglas Corp.)

☐ MRCS (Multiple Report Creation System)

Produces 32,767 reports and/or output files with single pass. Includes interpretive operation and /or execution of machine efficient precompiled load modules, free-format report generation command language and interactive select-list driven report definition. Transportable between IBM OS/VS and DOS/VSE.

IBM PC ☐ 140 KB req. ☐ Copies sold: 200 since 1974 ☐ Cost: $13,200-$24,000

MICRO DATA BASE SYSTEMS, INC.

☐ K-Report

For KnowledgeMan/2. Designs templates for reports. Includes headers, footers and detail. Stores templates for later use. Generates custom reports.

IBM PC ☐ 384 KB req. ☐ Introduced: 1985 ☐ Cost: $225-$850

MICRORIM

☐ R:base Extended Report Writer

Retrieves data from multiple relations, performs calculations based on ranges of values and causes line and page breaks to occur when a specified field changes in value.

IBM PC ☐ 256 KB req.

MICROTEK COMPUTER SERVICES

☐ MiniBase II

Library capabilities, forms design and on-line help. Supports 2,000 files.

IBM PC ☐ 128 KB req. ☐ Cost: $60

MMS INTERNATIONAL

☐ MCS-3 Report Writer

COBOL program generator that allows user to design reports using up to five data files with 20 column possibility. For use with MCS-3 and MBSI RealWorld. Provides interface between these packages and data base programs, spreadsheets and word processing packages.

IBM PC ☐ 64 KB req. ☐ Copies sold: 80 since 1984 ☐ Cost: $950

ORACLE CORP.

☐ SQL*RPT

Report writer and formatter for use with SQL/RT. Formats documents containing data base information.

IBM RT PC ☐ Introduced: 1986 ☐ Cost: $600

PERSONAL SOFTWARE CO.

☐ Report Writer

Specifies subtotals and grand totals where desired. Produces percentages, variances and other calculations using up to 30 data elements per report line in sequential REPTDATA.XXX DIF file. Allows global changes to common header information.

IBM PC ☐ 256 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $35

POLARIS SOFTWARE

☐ Forms

Prints/designs forms with word processing program. Merges data from other programs. Stores overlay macros in LaserJet Plus. Includes formatting commands. Updates forms. Adjusts vertical line and character spacing. Merges symbols/charts on forms. Numbers forms. Prints time/date.

IBM PC, XT, AT ☐ 196 KB req. ☐ Cost: $149

POLYMATHIC COMPUTER CORP.

☐ Report Generator

IBM PC

POWER UP

☐ Letters On-Line

Provides over 800 pre-written letters and forms that can be read, modified and printed by word processor. Areas covered include accounting and collection, employers and employees, general business, good will and sales, legal affairs, shipping and ordering, personal affairs, schools, charities and organizations. On-line index.

IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $60

RVA TECHNOLOGY, INC.

☐ Flexgen - Report Program Generator

Ineludes data dictionary maintenance programs and report program coder. User designs report layout and enters specifications into report format file. Allows changes to format file and additions of source statements for special processing.

IBM PC ☐ 64 KB req.

CONCENTRIC DATA SYSTEMS, INC.
18 Lyman Street, PO Box 4063
Westboro, MA 01581-4063
(617) 366-1122

R&R Relational Report Writer for dBASE III and dBASE III PLUS. Prepare reports faster and easier than with dBASE, and without programming. Relate and report from up to 10 files at once. Free-form layout of text and fields, Calculated fields, Grouping. Totals. Query. Automatic TRIM. Word-wrap character and memo fields. Run stand-alone or from dBASE programs.

Screen-Ace® Form Master

To Let You Master Forms

How often have you wanted to create a user interface as good or better than those found in the most successful software products? It's tough to develop one from scratch so you turn to one of the helpful software packages – only to find that they're too helpful, leaving little flexibility for your own creative impulses. Until now.

The Screen-Ace Form Master is designed to create and maintain forms, tables, text screens and menus. It gives you the ability to deal with fields instead of characters, with data management instead of forms management. The result is more time spent on the application because you need spend less time developing a more powerful, simpler use interface.

Form Master permits flexible function key definition, forms larger than the physical screen, toggling field colors and attributes at run time, and allows you to switch between screens without losing any of the data they contain. It's compatible with DESQview and TopView – two popular window management programs. And it's **FAST!**

Form Master requires an IBM PC, XT, AT, or any fully compatible computer with at least 256K and DOS 2.0 or above. The APL version supports STSC's APL*PLUS/PC System (version 4.0 or above). The C version supports Lattice C (version 2.03 or above) and Microsoft C (version 3.00 or above). Please specify language, vendor, and version number when ordering.

Form Master . . .
to make the difficult easy.
It's guaranteed.*

FREE Demo Disk Included with all orders

Demo Disk Available Only $3

Send orders to:
ACE Software Products, Inc.
Product Sales & Support
6934 Petit Avenue
Van Nuys, CA 91406

Please send me the SCREEN-ACE® Form Master. My check or money order for $195 (plus $5 shipping & handling) per copy is enclosed. Please make all checks payable to ACE Software Products, Inc. California residents, please add 6.5% sales tax.

*Use the demo disk and manual. If not completely satisfied, return the entire package within 30 days for a refund of the purchase price, less a 10% restocking fee.

CIRCLE NO. 308 ON READERS SERVICE CARD

SNOW SOFTWARE CORP.

☐ qPLEX IV Report Writer
All-language report writer. Selects/sorts existing data files. Produces reports, forms, ad hoc queries, and labels. Exports reports to spreadsheets and word processors. Reads BASIC, COBOL, ASCII, C, dBase II and III, and Informix.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984

SOFTCRAFT, INC. (TX)

☐ Rtrieve
Generates customized reports without writing a program. Sets page and form dimensions and defines headers and footers and variable length forms. Windows define and generate each form.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $85

SOFTSTAR INTERNATIONAL, INC.

☐ Report MANager
Horizontal/vertical report control. Handles page numbering, page titling, headers, sub/grand totals of numeric and dollar fields, and dynamic percentage of lines. Saves and modifies report format under user-assigned names. Includes printer manager.
IBM PC ☐ 256 KB req. ☐ Cost: $79

SOFTSYNC, INC.

☐ Reports Plus
Query system and report generator. Searches for information in data files from spreadsheets or data bases. Calculates results not in original files. Presents results in user-defined reports or formats. Links up to 10 files allowing mixed formats.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $99

TIMBERLINE SOFTWARE CORP.

☐ TS-Report I and II
Creates custom reports containing only information requested. Included in Medallion Collection. Generates reports from Medallion data file.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $190-$990

TLB, INC.

☐ Solomon III Reporter
Generates reports, tables and flat files. Selective retrieval, wildcard string matching, arithmetic expressions, character class matching, virtual tabular and user views, virtual fields, sorted output, control breaks with statistics, value labels, query nesting, environmental control options and parameterized macros.
IBM PC, XT, AT, RT PC/AIX ☐ 320 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $595

TYLOG SYSTEMS, INC.

☐ dB DOOR
Data from two data bases may appear on report. Ten accumulators available for totaling, subtotaling, averaging and counting.
IBM PC ☐ Copies sold: 500 since 1983 ☐ Cost: $149

YORK ST. SOFTWARE

Datamaster Corporation Ltd.

☐ Query
Report generator. Modular component of York St. Software integrated accounting system. Networking capabilities.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1979

SCREEN FORMATTING TOOLS

ACE SOFTWARE PRODUCTS, INC.

SEE AD ON PAGE 390

☐ Screen-Ace
Creates and maintains forms, tables, text screens and menus. Supports forms larger than physical screen, toggling field colors and attributes at run time. Switches between screens. Interfaces STSC's APL*PLUS/PC system, Lattice C, Microsoft C, DESQview and TopView.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $195

ADVANCED COLOR TECHNOLOGY, INC.

☐ ACT.COM
Screen dump utility. Reformats colored screen data and outputs to either ACT I or ACT II/Chromajet printer. Allows user control of number of copies, black/white reversal and bi-directional printing. Requires system using color graphics with monitor.
IBM PC ☐ 64 KB req. ☐ Cost: $70

☐ ACT.TXT
Screen dump utility. Full screen reformatting and output to ACT I or II printer. Requires Color Graphics Adaptor and Color Monitor.
IBM PC ☐ Cost: $70

ARITY CORP.

☐ Screen Design Toolkit
Includes text screen manipulation predicates. Contains object code. Designs and lays out screens. Builds menus and windows. Requires Arity/Prolog Compiler or Intepreter.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $50

ARTS COMPUTER PRODUCTS, INC.

☐ Expand-a-View
Enlarges and colors standard letters. Characters spread apart to reduce blur. Contains console device driver for operation with line-oriented packages. Maintains text buffer. Designed for computers that cannot contain separate monochrome and color graphics controllers.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $495

☐ PC Lens
Magnifies characters. Uses colors for contrast.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 99 since 1984 ☐ Cost: $495

☐ PC Voice
Verbalizes and enhances the standard screen image. Follows the cursor and speaks in English words the information on the screen.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $495

BCS DATA SYSTEMS, INC.

☐ DScreen
Allows user to dump contents of screen to sequential file to be stored, edited or printed as needed. Prints data entry screens for inclusion in manuals. Dumps exact image of screen.
IBM PC ☐ Cost: $295

BLAISE COMPUTING, INC.

☐ View Manager
Screen formatting manager for IBM PC and Microsoft Pascal compilers. View/Screen, View/Document, Data Base Utilities and View/Library.
IBM PC, XT, AT ☐ Introduced: 1983 ☐ Cost: $275

CALIFORNIA SOFTWARE PRODUCTS, INC.

☐ Baby/38 SEU
Emulates S/38 source entry utility. Provides editing and RPG III syntax checking. Off-loads program writing and verification. Performs insert, move, copy and delete. Copies from one file to another. Backs up file in memory.
IBM PC ☐ 384 KB req. ☐ Copies sold: 50 since 1986 ☐ Cost: $1,500

CHARANDON COMPUTER SYSTEMS, INC.

☐ Realform
Interactive screen design and on-line forms editor. Supports numerous data field types. Transforms form definition file into COBOL data division copy file.
IBM PC, XT, AT ☐ Cost: $295

COMPUTER SYSTEMS CONSULTANTS

☐ Full Screen Forms Display
Screen generator for 6809. Supports any serial terminal with cursor control and memory-mapped video displays. Generates forms and data field definitions.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1980 ☐ Cost: $60

DATA CONSULTING GROUP

☐ DATA*EASY PC Screens and Menus
Generates screen designs and BASIC code for data input. Creates BASIC menus. Fields can be specified as alpha, numeric, all capitals, first letter capitalized, integer, decimal or data type.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $48-$78

DATACOMP SYSTEMS, INC. (PA)

☐ Worksheet Layout System
C subroutine library. Provides user's application with spreadsheet-like features including virtual windowing, menus and data validation and display. Handles display formatting, input checking and screen scrolling. Includes simulator for checking screens prior to application development and debugging.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $1,000

DOMUS SOFTWARE, LTD.

☐ Print Screen
Prints text or graphics screens on dot matrix printer. Reverse video, high intensity, underlined, character set modification, vertical and horizontal orientation.
IBM PC ☐ 20 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $50-$60

DYNACOMP, INC.

☐ Dynamaster Database
Creates screen formats.
IBM PC ☐ Cost: $100

☐ Screen Sculptor
Designs and creates input screen programs.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $120

FLEXUS INTERNATIONAL CORP.

☐ Screenplay
Provides control over screen attributes, cursor, control keys and I/O fields. User can display pop-up panels for menus, help screens and multiple panels simultaneously. Defined panels compatible with Turbo Pascal, IBM/Microsoft Assembler, DeSmet C, Lattice C, IBM COBOL, Microsoft COBOL or Realia COBOL.
IBM PC ☐ 256 KB req.

FOGLE COMPUTING CORP.

☐ Screen Design Facility
Generates BASIC language code to handle screen displays and data entry. Displays protected mask and data is entered through alphanumeric or numeric windows. Insert, delete, erase-to-end-of-field, forward-tab and back-tab. Supports color monitor.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,200 since 1982 ☐ Cost: $150

FOOKS MATHEWSON CO.

☐ Lil' Jake
Full-screen editor. Productivity tool for data entry and modification of text files.
IBM PC ☐ Cost: $50

GENERAL DATA SYSTEMS, LTD.

☐ Dx Screen Generator
Non-procedural screen and menu generator. Defines menus as text and selection. Cursor control and function keys. Generates for CICS, PC or both.
IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1983

GRYPHON SYSTEMS

☐ PhosForm
Screen editor and set of screen input routines.

HARVARD SOFTWORKS

☐ EDPRO
Screen program editor. Ten search and replace buffers, ten block move buffers, insert, delete, change case, break line, edit template, and undo current line edit.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $95

HUMAN COMPUTING RESOURCES CORP.

☐ HCR/Edit
Screen editor. Exact image of working file displayed on screen. Standard UNIX line editor can be used through window at bottom of screen. Designed for terminal with cursor addressing and high baud rate which scrolls up at bottom screen line.
IBM PC, AT, RT ☐ 128 KB req. ☐ Copies sold: 175 since 1982 ☐ Cost: $500 and up

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ 3270-PC Control Program
IBM no. 1837-434; 6217-355; 6423-236. Selects screen configurations, manipulates and interacts with displayed data and manages screen presentations. Concurrent operation of up to four host interactive sessions. Window may be moved or altered and defined as a combination of up to ten logical screens.
IBM 3270-PC ☐ Cost: $300

INFORMATION ACCESS CORP.

☐ D2FORM
Facilitates development of data entry screens. Full cursor control, 256 ASCII characters set supported, X-Y coordinates and length of field stored in ASCII file for later retrieval by applications programs.
IBM PC ☐ 64 KB req. ☐ Copies sold: 20 since 1982 ☐ Cost: $45

INFORMATION DESIGN, INC.

☐ BasicWindow
Screen generator for BASIC programs. Designs screen formats, including field attributes and color combinations. Performs display, keyboard input and editing.
IBM PC, XT, AT, PCjr ☐ 96 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $100

JYACC, INC.

☐ Formaker
Screen and window manager. Consists of utility which allows free-form creation and modification of screens and collection of library routines which provide program access to screen.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $650-$5,000

KOLINAR CORP.

☐ Xmenu/E
Screen manager for IBM display terminals. Utilizes 3270 terminal features. Interactive screen editor, EXEC/REXX interface module, subroutine library callable from all IBM supported programming languages, 3279 programmed symbol set editor, DMS conversion program and CICS map generator.
IBM XT/370 ☐ 512 KB req. ☐ Copies sold: 162 since 1984 ☐ Cost: $1,100

MANAGEMENT TECHNOLOGY, INC.

☐ Screen Monitor
Menu selection, box title, title line, data input, data entry, data menu and enter message.
IBM PC, XT

MASTER COMPUTER SYSTEMS, INC.

☐ FORMIX
Panel-oriented screen management system that interfaces with multiple development languages. Provides application prototyping, system messaging, format and edit control, field level attribute control, and panel/field sensitive on-line help facility.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $695

MICRO DATA BASE SYSTEMS, INC.

☐ Screen Maker
Enables application developers to create end user interfaces. Screen and terminal independent. Single screen format can be used in multiple applications. Complement to MDBS III.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $2,500-$5,050

MICRO FOCUS, INC.

☐ CO-Maps
For CICS and IMS screen mapping on PC. Generates IMS/MFS and CICS/BMS macros and associated COBOL source statements. Converts CICS application screens to IMS. Screen painter. Map set, map and field definition, directory and copy facilities.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $500

☐ Forms-2
COBOL source code generator for Micro Focus' CIS COBOL, Level II COBOL, data entry/inquiry and application prototyping and screen form variable.
IBM PC, RT ☐ 64-256 KB req. ☐ Copies sold: 5,000 since 1979

MICRO PRISM

☐ Screensaver
Screen protection utility. Prevents monitor damage by automatically clearing screen after user selected time period.
IBM PC ☐ 64 KB req. ☐ Copies sold: 125 since 1984 ☐ Cost: $25

MICROPLOT SYSTEMS

☐ Piced
Allows user to make modifications to standard Tektronix 4010 format picture file. Inserts/deletes characters, deletes lines and adds page breaks. Displays full screen of ASCII characters which make up picture file. Strips out crosshair cursor control characters. Sorts pictures into separate files.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $40

NATIONAL SOFTWARE ENTERPRISES, INC.

☐ Demo Maker
Generates screens for presentations. Edits saved screens. New screens may be added and mixed with saved screens. Runs finished demo file, on timed basis or with viewer manually stepping through screens. Demonstrates an application's features without having to run program.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $125

THE SOFTWARE BOTTLING COMPANY OF NEW YORK
6600 Long Island Expressway
Maspeth, NY 11378
(718) 458-3700

Screen Sculptor creates professional looking, fully functional screens in minutes, then writes the program either in IBM BASIC, Turbo Pascal, IBM Pascal, or QuickBASIC. Uses simple word processor style screen editor. Instantly generates fully commented, bug-free program source code to provide data entry. Price $120.

NOSTRADAMUS, INC.
SEE AD ON PAGE 240

☐ Screen Genie
Creates and edits screens. Paints/unpaints. Draws/undraws in any direction. Copies/moves lines or window pieces with forgiving adjustment feature. Creates fields and generates code. Creates load files for any language, .obj files and .com external procedures.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $70

OAKLAND GROUP, INC.
☐ C-Scape
Screen generator for programmers using C language. Includes utility to produce C code from Dan Bricklin's Demo Program. Library provides functions including fields, menus, prompts, text, scrolling, full type support, definable validation and colors. Includes source code.
IBM PC

OMNISOFT ASSOCIATES
☐ OMNISCREEN
SCRNFMTR interactively formats and manages screen(s). SMAIN allows application program to display and control screen processing through function. SMAIN LANGUAGE INTERFACE provides interface to SMAIN for each language supported by OMNISCREEN.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $250

PACIFIC SOFTWARE (WA)
☐ SCREEN-EZ
Screen handler, interface for application programs using screen I/O. Supports numeric, alpha, alpha/numeric and unedited type data fields. Field attributes include highlights, underline and secret.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $85

PROCESS CORP.
☐ PC Forms
Formatted CRT screen management tool. Provides sequential, unformatted ASCII text file that can be created by standard CRT editor. Displays and edits information through direct CRT cursor control. Clear screen, display form, output information and get data from CRT commands. Backspace, tab, escape and linefeed controls.
IBM PC

RVA TECHNOLOGY, INC.
☐ Flexgen - Screen Program Generator
Creates file maintenance programs with screen painter and screen program coder. Full screen design capability of 80 characters on 22 lines. Full cursor movement over entire screen. Forward and backward scanning.
IBM PC ☐ 64 KB req.

THE SOFTWARE BOTTLING COMPANY OF NEW YORK
6600 Long Island Expressway
Maspeth, NY 11378
(718) 458-3700

Flash code is a program developer for dBase II, III, and III Plus. Comes with a powerful screen editor, window editor, a program generator, and flash-up feature to put pop up windows and menus into dBase application. The window editor and flash-up feature together, create menus and windows that add new dimensions to dBase applications. No more license fee for flash-up module. Price $150.

I. P. SHARP ASSOCIATES, LTD.
☐ FSDesign
Moves text on screen, controls color and intensity, specifies which fields are to be protected. Error messages and prompts. Stores and retrieves screens. Scrolling and paging, copying and moving fields, switching modes and resizing.
IBM 3270-PC ☐ Copies sold: 10 since 1984 ☐ Cost: $5,000

SOCIAL AND SCIENTIFIC SYSTEMS, INC.
☐ S3-Screen
Generates IBM's ADMS linkage for TURBO or C. Accesses screen input by record or variable in character format. Changes most screen features without recompiling. Screens accessible from many languages.
IBM PC, XT, AT ☐ Cost: $30

THE SOFTWARE BOTTLING CO. OF NEW YORK
SEE AD ON PAGE 401

☐ Screen Sculptor
Designs and creates data entry input screens. Generates source code in IBM BASIC, Quick BASIC, IBM Pascal, Quick BASIC or Turbo Pascal. Specifies variable names, data types, acceptable data ranges and pictures for edit verification.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $125

SOFTWAY, INC.
☐ MATIS
Windows screen management and data manipulation for BASIC applications. Seventy BASIC-like instructions define layouts, data acquisition fields and windows. Screens may be referenced by name, saved and loaded from disks.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $50

☐ MATIS/T
Window screen management and data manipulation system for BASIC applications in Turbo Pascal. Manages 8 user-defined windows.
IBM PC, XT, AT ☐ Cost: $30

SOURCEVIEW SOFTWARE INTERNATIONAL
☐ PCScreen
Screen generator. Designs user input screens for inclusion in user's programs. Converts screen into BASIC program segments that can be linked to program or screen control subroutine.
IBM PC ☐ Cost: $50

TECNOMICS, INC.
☐ IBM PC Xeditor (PCX)
Full-screen editor. Views, copies and modifies files. Provides more than 100 pre-set commands and creates additional commands. Executes second level of DOS commands and then returns to editor.
IBM PC, AT, XT ☐ 128 KB req. ☐ Copies sold: 70 since 1984 ☐ Cost: $55

TELESENSORY SYSTEMS, INC.
☐ PC Vert
Works with off-the-shelf synthesizers to enable visually-impaired user to access PC by touch typing with system giving verbal feedback of screen. Stops process with new command without waiting for completion of old command or without terminating voice. Built-in synthesizer and CPU.
IBM PC

☐ Soft Vert
Works with off-the-shelf synthesizers to enable visually-impaired user to access IBM and compatibles. User accesses by touch typing and system gives verbal feedback of screen. Works with add-on synthesizers, ranging from Echo PC to DEC Talk.
IBM PC ☐ Cost: $750

☐ VersaBraille II
Electronic braille microcomputer with standalone filing system and word processing. Supports TTY-type terminal to mainframes, minis, and data bases. Accessed by touch typing. Gives verbal feedback of screen.
IBM PC

☐ Vert Plus
Works with off-the-shelf synthesizers to enable visually-impaired user to access PC by touch typing with system giving verbal feedback of screen. Card plugs internally into PC with software. Requires no serial ports. Navigates without going into review mode, by using cursor keys.
IBM PC ☐ Cost: $1,995

☐ Vista System
Image enlarging system for visually-impaired user. Card plugs into PC with software. Magnifies print on IBM color or monochrome monitor. Mouse-controlled. Magnifications include color graphics, highlighted fields and cursor attributes.
IBM PC, XT ☐ Cost: $1,700

☐ 3278 Vert
Emulates 3278 terminal and accesses IBM mainframes. Designed for visually-impaired user. User accesses by touch typing and system gives verbal feedback of screen. Supports position referencing, editing and status information.
IBM PC, XT, AT ☐ Cost: $295

TEXAS INSTRUMENTS
☐ TIFORM/PC
Form-based screen management. Compatible with TIFORM 990. Allows several applications to access same form; keeps applications independent of terminal. Permits form testing. Data validation. Specification of predata entry attributes such as tab setting, blinking and initial values.
IBM PC ☐ Introduced: 1984 ☐ Cost: $400

TLM, INC.
☐ Screen Generator
C language screen generation. On-line hold, 3270 features, screen editor, data dictionary and field validation.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $395

TRAVELING SOFTWARE, INC.
☐ T-View 80
Transforms a 40-column screen into a movable 60-column window on a full 80-column display. Includes a Traveling Memory Manager program that keeps track of file sizes and manages laptop computers' memories. Used with TEXT and TELCOM.
IBM PC ☐ 16 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $40

VIKING SOFTWARE SERVICES, INC.
☐ Forms Manager
Full-screen fill-in-the-blanks CRT I/O system. Includes data validation and interactive screen painter.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1981 ☐ Cost: $600-$6,000

SECURITY/AUDITING

ABSOLUTE SECURITY, INC.
☐ Keystore
RAM-resident utility to copy keyboard activity. Protects against system interruptions. Writes to designated floppy or hard disk and allows playback or reprocessing by CPU. Multi-user, multi-file capability. Utility for diagnostics, training and security.
IBM AT ☐ 7 KB req. ☐ Copies sold: 500 since 1986 ☐ Cost: $99

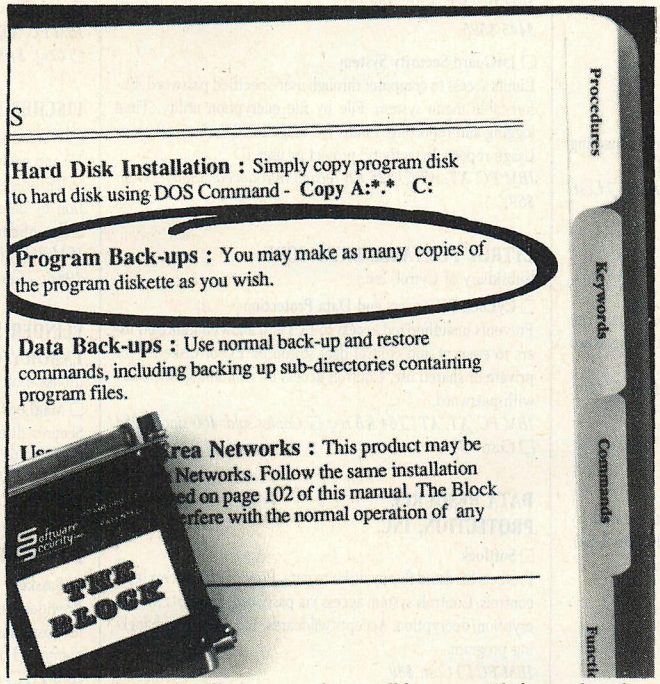
ADVANCED COMPUTER SECURITY CONCEPTS
☐ Cryptogard Generated Key System
Cryptographic security. Implements U.S. government approved data encryption standards. Provides authentication and communication security in financial transaction and other networks. Prevents software piracy.
IBM PC ☐ 8 KB req. ☐ Introduced: 1982

"How to protect your software by letting people copy it."

By Dick Erett, President of Software Security

Inventor and entrepreneur, Dick Erett, explains his company's view on the protection of intellectual property.

"A crucial point that even sophisticated software development companies and the trade press seem to be missing or ignoring is this:



Software protection must be understood to be a distinctively different concept from that commonly referred to as copy protection.

Fundamentally, software protection involves devising a method that prevents unauthorized use of a program, without restricting a legitimate user from making any number of additional copies or preventing program operation via hard disk or LANs.

Logic dictates that magnetic media can no more protect itself from misuse than a padlock can lock itself.

Software protection must reside outside the actual storage media. The technique can then be made as tamper proof as deemed necessary. If one is clever enough, patent law can be brought to bear on the method.

Software protection is at a crossroads and the choices are clear. You can give product away to a segment of the market, or take a stand against the theft of your intellectual property.

Soon all software installation procedures will be as straightforward as this. The only difference will be whether you include the option to steal your product or not.

"...giving your software away is fine..."

We strongly believe that giving your software away is fine, if you make the decision to do so. However, if the public's sense of ethics is determining company policy, then you are no longer in control.

We have patented a device that protects your software while allowing unlimited archival copies and uninhibited use of hard disks and LANs. The name of this product is The BLOCK™.

The BLOCK is the only patented method we know of to protect your investment. It answers all the complaints of reasonable people concerning software protection.

In reality, the only people who could object are those who would like the option of stealing your company's product.

"...eliminating the rationale for copy-busting..."

Since The BLOCK allows a user to make unlimited archival copies the rationale for copy-busting programs is eliminated.

The BLOCK is fully protected by federal patent law rather than the less effective copyright statutes. The law clearly prohibits the production of work-alike devices to replace The BLOCK.

The BLOCK attaches to any communications port of virtually any microcomputer. It comes with a unique customer product number programmed into the circuit.

The BLOCK is transparent to any device attached to the port. Once it is in place users are essentially unaware of its presence. The BLOCK may be daisy-chained to provide security for more than one software package.

Each software developer devises their own procedure for accessing The BLOCK to confirm a legitimate user. If it is not present, then the program can take appropriate action.

"...possibilities... limited only by your imagination..."

The elegance of The BLOCK lies in its simplicity. Once you understand the principle of The BLOCK, hundreds of possibilities will manifest themselves, limited only by your imagination.

Your efforts, investments and intellectual property belong to you, and you have an obligation to protect them. Let us help you safeguard what's rightfully yours. Call today for our brochure, or a demo unit."

Software Security inc.

870 High Ridge Road Stamford, Connecticut 06905

203 329 8870

AIP

☐ SoftGuard
Allows user-defined software to be used only on specific computers. Includes object module that links to BASIC program which allows program to be run on computer with protection module.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $75

AK TECHNOLOGIES CORP.

☐ GateKeeper Secure Menu System
Microcomputer administration. Provides security and reporting capabilities. Assigns private user passwords. Encrypts and decrypts protected files for authorized users.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $195

THE ANSWER IN COMPUTERS (TAIC)

☐ Security
Password protection for programs and files without impacting normal processing and with no modifications to OS.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $50

APG SOFTWARE

☐ XPACK
Packs/encrypts files to be sent over 7 bit electronic mail. Encrypts multiple sets of files simultaneously. Provides password security.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1986 ☐ Cost: $50

ASHTON-TATE

☐ Framelock
Encrypts files read by IBM PC including those created by Framework, dBASE II, dBASE III, WordStar and Lotus 1-2-3. Provides security, password protection and cipher.
IBM PC, XT, AT ☐ Cost: $40

AST RESEARCH, INC.

SEE AD ON PAGES 161/172/173/174/175

☐ Knight Data Security Manager
Password and copy protection utilities. File management features. Electronic message center allows messages to be sent to users in protected mail boxes. Network version available.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $295

BEST POWER TECHNOLOGY, INC.

☐ DATASAVE
Provides 2-way communications between PCs and MICROFERRUPS. Displays line power status information. Displays estimated backup time remaining when power failure occurs. Shuts down program and saves files during long power outage.
IBM PC, XT, AT ☐ Cost: $50

BORLAND INTERNATIONAL, INC.

SEE AD ON INSIDE COVER & PAGE 1

☐ SuperKey
Reviewed Jun 1985 p. 162; Oct 1985 p. 131.
Encrypts files, specifies password to lock unattended keyboard and turns off screen to protect data. Loads, edits and saves keyboard macros and cuts and pastes text from screen. Prokey compatible.
IBM PC, XT, PCjr, AT, Portable PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $70

CHAMPION BUSINESS SYSTEMS

☐ Password
Designed to allow or restrict access into any module or menu selection in Champion III Business Accounting System. Up to 10,000 user-definable codes.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $149

COMPUTER SECURITY CORP.

☐ Citadel Security System
Limits access to computer through user-specified password. Limits access to files stored on floppy diskette or fixed disk. Keeps audit trail log of various activities including illegal file access attempts. Defines access as read/write, read only or totally unavailable.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $295

☐ Sentinel Security System
Limits access to computer or files stored on floppy diskette or fixed disk through user-specified password. Encrypts image of protected files on disk. Keeps audit trail log of various activities including illegal file access attempts.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $445-$595

☐ 1stGuard Security System
Limits access to computer through user-specified password. Enforceable menu system. File by file encryption utility. Time logging and reporting. Limits PC usage to 20 authorized users. Usage reports by activity, project or user ID.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $69

CYTROL PORTABLE DATA CORP.

(subsidiary of Cytrol, Inc.)

☐ CyLock PC Access and Data Protection
Prevents unauthorized access to PCs and allows authorized users to encrypt and control data stored on PC or diskettes for private or shared use. Controls access by combining smart key with password.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $549

DATA RESOURCE PROTECTION, INC.

☐ Softlock
Protects hard and floppy diskette data. Provides file access level controls. Controls system access via password. Supports file encryption/decryption. Accepts wildcards. Includes system locking program.
IBM PC ☐ Cost: $89

DIGITAL DISPATCH, INC.

☐ Data Physician
Detects and removes self-replicating code generated by hackers. Tests data security and disaster recovery procedures.
IBM PC ☐ 128 KB req. ☐ Cost: $50

DIGITAL SIGNATURE

☐ Crypt Master/24, 16
Reviewed Jun 1985 p. 162.
Encryption package for microcomputer security. Implements RSA public-key cryptosystem and National Bureau of Standards DES. Requires passwords for decryption but not encryption.
IBM PC, XT, AT ☐ 196 KB req. ☐ Copies sold: 125 since 1983 ☐ Cost: $95 (16); $145 (24)

ELGAR CORP.

☐ FailSafetyNet
Protects PCs and LANs against lost or damaged data from power failure. Saves files and shuts down system when power fails. Returns program and completes unfinished tasks. Unattended operations include sorting, file merge, indexing and communications. Requires Elgar's battery backup systems.
IBM PC ☐ Cost: $199

ELITE SOFTWARE SYSTEMS

☐ ENCOMP
Data file security program which restricts user access by encrypting information and saves disk space by compressing data. User-specified password of up to 300 characters.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $100

ENIGMA LOGIC

☐ SafeWord System Integration Kit
Secures access to programs and data bases. Provides changing-password security. Includes calculator-like dynamic password issuing devices which serves as password dispenser. Works on security logic requiring new password each time protected program is used. Maintains successful/unsuccessful attempts audit trail.
IBM PC ☐ Cost: $100 and up

E-X-E SOFTWARE SYSTEMS

☐ Onguard III Executive
Prevents unauthorized use and destruction of data. Features audit trail, multi-level password security, transparent use and flexible file sharing or restriction. Encryption diskette available.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $495

FISCHER INNIS SYSTEMS CORP.

☐ Watchdog
ID and password access control to prevent unauthorized access to hard-disk data. Encryption/decryption provides data protection by default. Read-only/write-only permissions. Audit trail and confidential mail facility.
IBM PC, XT, AT/370, 3270-PC ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $295

FLINDER SOFTWARE LABORATORIES

(division of Michael Flinder & Associates, Inc.)

☐ MagLock
Secures directories, sub-directories or hard disk and restricts their use to authorized persons. User-assigned passwords.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $89

FOX & GELLER, INC.

☐ Passkey
Provides password protection for your Lotus 1-2-3 files. Lets user assign unique passwords to each worksheet, and all data is encrypted to prevent unauthorized access by other methods.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $49

GLENCO ENGINEERING, INC.

☐ Coupon Padlock
Copy prevention technique, which can be preset for number of times programs can run. Subroutine is provided which checks diskette. When last coupon is used, fingerprint is erased.
IBM PC ☐ Copies sold: 30,000 since 1984

☐ Data Padlock
Reviewed Jun 1985 p. 162.
Encodes files using National Bureau of Standards DES. Eight character password. Supported by command line options including hide/un-hide, verify, read/write, verify password and make file read only.
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $65

☐ HDCOPY
Sixteen KB .EXE program. Allows protected software to run on hard disk without protected floppy disk in drive A. Protects one hard disk per floppy.
IBM PC ☐ 64 KB req. ☐ Copies sold: 40,000 since 1985 ☐ Cost: $200

☐ PC Crypt
Gives any application program the security of DES without writing DES source. Implemented via call statement.
IBM PC ☐ Copies sold: 100 since 1984 ☐ Cost: $150

☐ PC Crypt Star
Subroutine to encrypt character strings. Supports DES algorithm. Password protection. Allows user to encrypt data in memory before it is stored on disk.
IBM PC ☐ Copies sold: 100 since 1984 ☐ Cost: $150

☐ **PC Padlock**
Unauthorized duplication prevention. Uses encryption scheme that will preclude program from running after an unauthorized duplication has been made. Requires additional line of code to user's program.
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $99

☐ **PC Padlock II**
Copy prevention technique which pre-formats and prepares each disk. Several formats available for single- and double-sided diskettes.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500,000 since 1984 ☐ Cost: $2-$6

HAWKEYE GRAFIX

☐ **DES-PAC**
Performs government approved data encryption in three modes. Features electronic code book, cipher feedback and cipher block chain. Provides data compression and SIXPAC formatting which allows for transmission or storage via any medium.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $59-$399

HARLAN S. HERSEY, INC.

☐ **CMPR (Text File Compare Program)**
Audits program/file changes. Compares line-oriented text files.
IBM PC, XT, PCjr, AT ☐ 64 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $50

HEWLETT-PACKARD CO.

☐ **Secure**
Provides access security to HP Portable Plus for confidentiality.
IBM PC

H-F COMPUTING SERVICES, INC.

☐ **HFTools For Disk Security**
Provides data locking mechanism. Works independently from data creation. Password protection.
IBM PC, XT, PCjr, 3270-PC ☐ 64 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $100

☐ **HFTools For File/Directory Security**
Prevents unauthorized access to files and subdirectories. Provides data locking mechanism. Lock stays with data. Uses user ID/password to gain access. Master user facility provides administration and control functions and ability to unlock all files/directories.
IBM PC, XT, AT, PCjr, 3270-PC ☐ 128 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $350

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **Data Encoder**
Reviewed Jun 1985 p. 162.
IBM no. 6024-149. File encryption. Uses algorithm to encode and decode files and programs for protection and security of sensitive data.
IBM PC, XT, Portable PC, AT, PCjr ☐ 192 KB req.

INFOCODE, INC.

☐ **InfoLok**
File security program with encryption, teleformatting, file-hiding and file-purging.
IBM PC, XT, AT ☐ 60 KB req. ☐ Cost: $149; lease plans available

INFOMAINT/HEALTHWARE, INC.

☐ **dKey**
Key and lock control. Allows layers of master keys. Lists lock/key by department, holders of any type of key, keys held by person and other related reports. Permits global updates.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 30 since 1984 ☐ Cost: $595

INTERNATIONAL PHASOR TELECOM, LTD.

☐ **PhasorCode 1000**
Reviewed Jun 1985 p. 162.
Public-key encryption package with menus, batch files, wildcards, e-mail interface and key management. Secures any type file in transmission and in storage.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $99

JONES FUTUREX, INC.

☐ **AutoCrypt I**
Data encryption key exists in data encryption processor. Generated by user's key phrase in conjunction with manager's master key. Encrypts data sent to disk and decrypts data retrieved from disk when used in conjunction with Jones Futurex Encryptor Series.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $95

☐ **BCP-3680 Cryptographic Module**
Works with emulation programs including IBM's BCP to provide cryptographic support of IBM's feature 3680. Called by BCP user exit routines or equivalent. Uses Encryptor hardware to perform cryptographic functions according to SNA definitions for cryptography.
IBM PC, XT, AT

☐ **Electronic Key Distributor**
Distributes cryptographic keys from central site to remote sites using protocols defined in ANSI 1985 Financial Institution Key Management Wholesale. Includes programs for remote sites and central site.
IBM PC, XT, AT

☐ **File Message Authentication Code**
Employs ANSI 1982 Financial Institution Message Authentication to append MAC to end of file. Stores files or sends to another location. Checks MAC prior to using file.
IBM PC, XT, AT

☐ **LoadKey**
Cryptographic key-loading program for Encryptor 304, 305 and 306 DES processors. Includes loading keys into fixed/variable key storage and loading SNA communications keys.
IBM PC, XT, AT

☐ **Private File Security**
Controls files to be transmitted, duplicated or stored. Encrypts files for storage, transmission over public communications networks or for mail shipments. Transfers secured files between users on private basis if sender and receiver exchange keys.
IBM PC, XT, AT

☐ **SNA-3680 Cryptographic Module**
Works with SNA emulation programs to provide SNA cryptographic support. Can be added to programs emulating IBM's 3274, 3276, 3776, 3777 and 3790 Control Unit/Display Stations. Compatible with IBM's VTAM and ICAM with encrypt/decrypt option.
IBM PC, XT, AT

K PLUS L SOFTWARE

☐ **N-Code**
Multi-layered security and file protection. Encrypts using DES or customized algorithm or superencipher using both. User option for ASCII only cipher characters. Password access to program functions.
IBM PC ☐ 192 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $99

KNIPFTY SOFTWARE

☐ **Tight Security**
Compression/encryption utility. Compresses standard ASCII or text files up to 50 percent of original size. Password protection. Creates separate key file necessary to unlock compressed/encrypted file. Displays summary screen that includes data relating to file that was compressed/encrypted.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $130

LAKE AVENUE SOFTWARE

☐ **Cover Your ASCII**
Encrypts dBASE II, dBASE III and dBASE run time. Includes optimizer to speed up programs. Can be used with Prolok to guard against unauthorized disk copies. Handles batch file processing.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $195

☐ **Cover Your Data**
Encrypts dBASE II and dBASE III data files. Requires 5 KB of disk space. Provides password protection to secure sensitive data. Can be used with Clipper or Word Tech compilers.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $195

LATTICE, INC.

SEE AD ON PAGE 279

☐ **SecretDisk**
Uses NBS Data Encryption Standards to provide security for user-selected files. Password-controlled command line switches protection on and off. Encrypted or un-encrypted backup.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $60

MCTEL, INC.

☐ **P/C Privacy: Personal/Confidential**
Reviewed Jun 1985 p. 162.
Protects data integrity with checksums. Offers DES option.
IBM PC, XT, AT ☐ 32 KB req. ☐ Copies sold: 2,500 since 1984 ☐ Cost: $95-$140

MEDIA SYSTEMS TECHNOLOGY, INC.

☐ **Flexlock**
Software protection system.
IBM PC, XT

MEGAWEST SYSTEMS, INC.

☐ **MegaSentry**
System security.
IBM PC, XT ☐ 32 KB req. ☐ Copies sold: 10 since 1980 ☐ Cost: $1,100

MICROCOMPUTER APPLICATIONS (CO)

☐ **Bit-Lock**
Multi-layered security system. Uses decryption algorithms and small port transparent security device. Available for parallel or serial port.
IBM PC, AT, XT ☐ Copies sold: 4,000 since 1982 ☐ Cost: $395

MID-AMERICAN CONTROL CORP.

☐ **Prompt Terminal Security**
Provides partition management and terminal security. When program is loaded next available partition is selected by searching partitions eight through one and selecting first available contiguous space of memory as specified by the user in a control file.
IBM XT, AT ☐ 18 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $2,500

RAINBOW TECHNOLOGIES, INC.
17971 Skypark Circle, Suite E
Irvine, CA 92714
(714) 261-0228
TELEX: 3860789

DATA SENTINEL—PRIVATE PC USER SECURITY
- Provides Seal and Open of Private Data
- Hardware Key Plugs Into Parallel Port
- No Systems Work Necessary
- Easy-To-Use Menu Driven Software
- Compression Reduces Files by 50 percent
- $195.00; Free Matching Key Included

MORGAN COMPUTING CO., INC.

☐ Copy Protector
Normal use of copy and diskcopy commands are rendered ineffective when disk is protected with system. Supports mass duplication from master disk. Protection embedded in source code.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 300 since 1982 ☐ Cost: $295

MPPI, LTD.

☐ PC Lock IV
Mainframe-like log-on security for PCs with auditing, encryption (DES option) and subdirectory access control. Controls A: B: and C: boots.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,900 since 1982 ☐ Cost: $299-$449

NEW ENGLAND MICROCOMPUTER CO.

☐ Encryptor
Encodes any file to protect against unauthorized access. Uses single password and can be used in electronic mail systems.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $60

OBSIDIAN COMPUTER SYSTEMS

☐ Super Encrypter II
Reviewed Jun 1985 p. 162.
Scrambles/encrypts files, groups of files, disks and subdirectories. Eight levels of password security with 255 characters each.
IBM PC ☐ 64 KB req. ☐ Copies sold: 6,239 since 1984 ☐ Cost: $100

P.C. HOLMES, INC.

(division of Morris Information Systems, Inc.)

☐ ShurLock
Protects information on hard disk. Prevents outsiders from entering system. Regulates access of authorized users. Uses ID/password combination. Controls which commands can be used by each user. Reports on computer use and access attempts covering up to 450 days.
IBM PC ☐ 256 KB req. ☐ Copies sold: 18 since 1986 ☐ Cost: $595

PICO PUBLISHING

☐ Crypt
Encrypts data files. Allows multiple encryptions.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $10

POLYTRON CORP.

SEE AD ON PAGES 348/382

☐ PolyWindows Cryptographer
Memory-resident data encryption/decryption utility. Protects data on disk or data sent via modem. Requires PolyWindows DeskPlus.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $49

POWER UP

☐ Off The Record
Permits only password holders to access files. Apple version encrypts individual DOS 3.3 files and entire DOS, ProDOS, Pascal and CP/M diskettes. IBM version hides files so they do not appear in on-screen directories and encrypts files.
IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Cost: $40

PRIME FACTORS, INC.

☐ Descrypt/MS
Micro Assembly source of DES. Can be used for PROM DES for ATM boards, POS terminals, integration into real-time or batch communications in smart terminals. A variety of sizes and speeds for 8088 family. Z80 family and 6502 microprocessors are available.
IBM PC ☐ 1 KB req. ☐ Copies sold: 10 since 1982

☐ Psypher
Uses variety of modes of DES. Encrypts any file supported by OS. Includes data compression. Keys may be entered interactively in DES hexadecimal form or as phrases.
IBM PC ☐ 32 KB req. ☐ Copies sold: 19 since 1981 ☐ Cost: $395

☐ u-Psypher
Encryption and decryption uses variety of modes of DES. Includes data encryption file by file, protection of data stored on diskette or hard disk and communications security.
IBM PC, XT, AT ☐ 50 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $395

THE PRINCETON SOFTWARE CO.

☐ Data Security Facility-ASM
General purpose, high speed data encryption and decryption library (DES). Provides multiple encryption algorithms, including NBS DES algorithm.
IBM XT/370 ☐ 15 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $500

☐ Secure/CMS
CMS file encryption utility. Implements system-wide encryption standards and incorporates modes of encryption for varying levels of data security.
IBM PC, XT/370 ☐ 30 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $300

QUALTEC, INC.

☐ Data-Lok
Locks access to files recorded on disks. Uses two commands, lock and unlock.
IBM PC ☐ 25 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $100

RSA DATA SECURITY, INC.

☐ Comsafe
Provides digital signatures to authenticate origin and content of electronic documents, allowing electronic documents to serve as legal contracts. Includes communication protocol with DES encryption and automated key management.
IBM PC ☐ 150 KB req. ☐ Cost: $350

☐ MailSafe
Data security system for electronic mail applications. Creates and verifies electronic digital signatures. Verifies the source of received messages. Assures the integrity and authenticity of received data. Electronically seals sensitive data for transmission.
IBM PC ☐ 128 KB req. ☐ Cost: $250

☐ Public Key Cryptosystem
Adds identification, authentication and privacy protection to communications programs. Provides data authentication via digital seal. Digital envelope provides privacy protection.
IBM PC ☐ 80 KB req.

SAFEWARE COMPUTER SYSTEMS

☐ SAVYOUR Software System
Generates user-specific security systems. Develops prevention procedures, risk analysis and disaster recovery plans.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $75

SAGE SOFTWARE, INC.

☐ CARS
Audit tool. Establishes data validity and produces reports. Portable across more than 20 environments. Includes report generating functions.
IBM PC ☐ 140 KB req. ☐ Copies sold: 500 since 1975 ☐ Cost: $12,000-$27,000

SECURE SYSTEMS TECHNOLOGY, INC.

☐ CONFIDANTE I
Provides transparent data security through active encryption/decryption. Operates as background program. Works with software such as Lotus 1-2-3 and dBASE. User may turn encryption off/on, select specific drives to secure or change passwords.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $99

☐ CONFIDE
Standalone file by file encryption/decryption system particularly suited to occasional file access. Uses SST or DES algorithm.
IBM PC ☐ 64 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $59

SECURITY MICROSYSTEMS CONSULTANTS

☐ LOCKIT I
Passwords of up to six characters. Utilities specify whether or not the machine will allow boot-up from A drive. Timlok sets time from 1-59 minutes after which machine will relock if no keys are pressed.
IBM PC, XT, AT ☐ Copies sold: 200 since 1984 ☐ Cost: $130

☐ LOCKIT II
Allows creation of password protected directories on the hard disk which are invisible to all but the authorized user.
IBM PC, XT, AT ☐ Copies sold: 400 since 1985 ☐ Cost: $40

SOFTGUARD SYSTEMS, INC.

☐ SUPERLoK
Copy protection provides full install/uninstall capabilities to hard or floppy disk. Vendor determines how many authorized copies can be made. Requires no special media or source code changes. Installation prompts and error message can be customized. Serialization option available.
IBM PC, XT, AT, PCjr, Convertible ☐ Copies sold: 1,000 since 1983

SOFTWARE AG OF NORTH AMERICA, INC.

(wholly owned operating subsidiary of Software AG Systems, Inc.)

☐ ADABAS/CPO
Delivers 24-hour data base availability. Detects and recovers from catastrophic I/O errors, providing transparent read/write access to current back-up data if primary data is inaccessible.
IBM PC

☐ Review
Resource tracking and auditing system for ADABAS and Software AG's Com-plete transaction processing system. Generates all summary, detail and exception reports to manage capacity, account for system usage, performance and detect abnormal or unauthorized activities.
IBM PC ☐ Introduced: 1984 ☐ Cost: $10,000

SOFTWARE MASTERS (IN)

☐ Unprotect
Unprotects basic programs.
IBM PC, AT, XT, PCjr ☐ Cost: $50

SOFTWARE STUDIOS, INC.

☐ Scrambler: Data Encryption
Data and text encryption program. Converts ASCII text into undecipherable representations with code key input. Code keys may be character, word or phrase up to 255 characters.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $49

SOFTWARE SYNERGY, INC.

☐ Respond/Secure Autocrypt
Protects files by encrypting and decrypting data written to and read from selected disk drives. Manages files, loads encryption key, and sends data to and from encryption board. Includes PC expansion board.
IBM PC ☐ 256 KB req. ☐ Cost: $450

☐ Respond/Secure Private Files
As each file is accessed, user must enter 8 byte key associated with that file. Encrypts or decrypts file using U.S. Govt. DES algorithm. Manages files, loads encryption keys, and sends data to and from encryption board. Includes encryption board.
IBM PC ☐ 256 KB req. ☐ Cost: $350

THE SOFTWARE TOOLWORKS

☐ Pack and Crypt
Disk utility. Saves disk space and provides security for sensitive data. Uses Huffman coding to compress files. Takes user-provided password and employs Tausworth-Lewis-Payne based cipher algorithm to protect files against unauthorized readers.
IBM PC ☐ 48 KB req. ☐ Introduced: 1980 ☐ Cost: $25

SOPHCO, INC.

☐ PROTEC
Five levels of protection including boot, password, file, customizable access, and external encryption for floppy disks. No-copy feature prevents users from copying from hard disk to floppy disk.
IBM PC, XT, AT, XT/370 ☐ 128 KB req. ☐ Copies sold: 6,000 since 1983 ☐ Cost: $195

SYSTEMS ASSOCIATES, INC. (OH)

☐ Key Inventory Control System
Controls 60,000 keys and 40,000 keyholders. Provides access security. Maintains keyholder information including name, social security number, title, department and 30 keys each with quantity, date issued/due back and person who authorized issuance. Includes lock installation record. Generates reports.
IBM XT, AT ☐ 320 KB req. ☐ Copies sold: 1 since 1985 ☐ Cost: $6,000

TACT TECHNOLOGY

☐ DiskSentry
Protects data stored on PC hard or floppy disks. Encrypts stored data. Predetermines user options. Concealed master key enables system administrator to decrypt user's files when original key is unavailable. Compatible with Wordstar, Multimate, Lotus 1-2-3, dBASE II and III and R:base.
IBM PC

TANDEM COMPUTERS, INC.

☐ Safe-T-Net
Data encryption subsystem. Provides message authentication and on-line master key change mechanisms. Encrypts SNAX terminal sessions and files.
IBM PC ☐ Cost: $35,000

TECHNICAL COMMUNICATIONS CORP.

☐ Key
File security/encryption. No passwords involved. Uses ciphering material on floppy disk to encrypt/decrypt. Copies, renames and backs up encrypted files. Checks each keystream statistically to ensure security.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $90

TRANSEC SYSTEMS, INC.

☐ UNlock
Removes copy protection on duplicate copies. Works with hard disks such as Bernoulli Boxes. Operates on RAM disk or microfloppy drive.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $50

TRIGRAM SYSTEMS

☐ DataSafe
Software implementation of DES for file security. Functions include encryption, decryption, verification, plain text destruction and MAC generation.
IBM PC ☐ 50 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $139

UNITED SOFTWARE SECURITY, INC.

☐ LazerLock
Authentication security system. Provides single product solution across manufacturers equipment from micros to mainframes.
IBM PC ☐ 6 KB req. ☐ Cost: $130

☐ Masterkey
Works with Privacy Plus 2.00 to recover files locked by Privacy Plus in case of lost or forgotten password.
IBM PC, XT, AT ☐ 60 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $350

☐ PrivacyPlus
Allows users to electronically and selectively lock data on all files, text and programs.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3,000 since 1984

☐ Private Eye
Blanks screen after period of keyboard inactivity on single control keystroke.
IBM PC, XT, AT ☐ 20 KB req. ☐ Introduced: 1985 ☐ Cost: $65

VAULT CORP.

☐ Chronolok
Limits number of times protected program can run. User specifies number of times desired, 1-32,000, during Proloking process. Recommended for demonstration diskettes and other limited application programs.
IBM PC, XT, AT, PCjr

☐ CopyWorks
Copy protection and enhancement for mass duplication software and data management programs. Duplicates protected and unprotected programs. Each master diskette includes Prolok option that protects software using Vault fingerprinted diskettes for duplication. Creates disks with 8 or 9 sectors per track.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 60 since 1986 ☐ Cost: $695

☐ Filelok
Protects confidential data files from unauthorized access and duplication. Encrypts data files based upon presence of physical fingerprint placed on diskette.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100,000 since 1984 ☐ Cost: $9

☐ Hard Disk Prolok, Floppy based Prolok
Maintains protection against unauthorized end-user duplication of software programs. Protection invisible to legitimate user.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,000,000 since 1982 ☐ Cost: $9

☐ Telelok
Allows software to be transmitted over ordinary telephone lines and received in form which prevents illegal copying by unauthorized users.
IBM PC ☐ 48 KB req. ☐ Copies sold: 100 since 1983

☐ Unilok
Uses identical fingerprinted diskettes in conjunction with Prolok protection to allow duplicate key protection systems, and to facilitate field updates. Recommended when limited series of interchangeable diskettes are desirable.
IBM PC, XT, AT, PCjr

VOXTRON SYSTEMS, INC.

(subsidiary of Detex Corp.)

☐ Veritron Series 1000
Voice verification access control products for facilities of up to 250 doors and 16,000 users. Access granted by using authorized person's voice as key. Features alarm reports and audit trails.
IBM PC, AT ☐ 640 KB req. ☐ Copies sold: 5 since 1986

WHELAN ASSOCIATES, INC.

☐ IWS/Sentry
Monitors remote PC access to data on Series 1 by providing access validation, transaction verification and transaction logging for remote users.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2 since 1984 ☐ Cost: $600

WINTERHALTER, INC.

☐ Secure
Provides centralized or user-controlled security administration and data encryption under US government approved DES algorithm. Graphic directory display, user-selectable encryption of files and/or directories, user password control and selection. Audit trail report generation available.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $325-$475

☐ Secure Master Key
Password recovery for security administration. Audit trail report generation. Tracks system usage including security violations. Records date, time and user information on valid/invalid login attempts, programs executed and file creation/access.
IBM PC, XT, AT ☐ Cost: $475

☐ Secure PS (Privacy Software)
Provides centralized or user-controlled security administration and data encryption under US government approved DES algorithm. Graphic directory display, user-selectable encryption of files and/or directories, user password control and selection. Audit trail report generation available.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $70-$100

WOLF DATA SERVICES, INC.

☐ Security System
User ID, password protection, security codes, user function and activity configuration, system logging and monitoring capabilities and system coding to create multi-company environment.
IBM PC ☐ 256 KB req. ☐ Copies sold: 40 since 1978

SORT/MERGE

COMPUTER ASSOCIATES INTERNATIONAL, INC.

☐ CA-Sort/CMS
OS sort capabilities under CMS. Include/omit record selection capability, in-core sort capability and compatibility with CA-SORT/OS. Supports user exits. May be invoked from COBOL, Assembly or PL/1.
IBM PC/VM/PC ☐ 30 KB req. ☐ Introduced: 1978 ☐ Cost: $750

COMPUTER CONTROL SYSTEMS, INC.

☐ AUTOSORT/86M
High-speed sorting. Standalone sort routine or may be called as subroutine from BASIC interpreter, BASIC compiler, FORTRAN, Lattice C or Pascal. Ten sort keys (ascending or descending), four select keys. Sorts and selects are on string, integer, single-precision and double-precision fields.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $150

ENSIGN SOFTWARE

☐ FASTSORT
Machine language shell sort for use with BASIC programs. Sorts any array into ascending or descending order. Callable from interpretive BASIC or may be compiled.
IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Copies sold: 700 since 1982 ☐ Cost: $25

HAI SOFTWARE, INC.

☐ HAI*LINE SORT
Sorts almost any field within HAI*LINE data file. Sorts include alphabetic sorts for customers, vendors and inventory items; inventory sort by product code, vendor code or bin number; and sorts by cumulative sales of customers and inventory items.
IBM PC ☐ 128 KB req. ☐ Cost: $145

HFK SOFTWARE, INC.

☐ QWERTY Text Merge
Mail/merge system. Custom copies of template document. Substitutions may be from zero to 1,200 characters. For use with QWERTY documents, but may be used with any ASCII files. Supports Professional QWERTY attributes and format parameters.
IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $59

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Sort
IBM no. 6024-138. Extended files and standalone support in BSEPP.
IBM PC ☐ Introduced: 1980 ☐ Cost: $175

INFO-PROS, INC.

☐ Info-Sort
Standalone or interfaces with existing applications. Sorts 1,000 records (64 bytes) on six-byte string key. Sorts on one to nine keys independently, ascending or descending. Character string, integer or single or double precision fields with 65,535 records processed with maximum record length of 4,096.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $95

INFORMATION RESOURCES, INC. (NY)

☐ Cosort
Sort/merge routine for interactive and batch operations. Sorts over 1,000 records per second, procedure-to-procedure and file-to-file. Unlimited records, files and keys. Fixed or variable length records. Fixed or comma separated keys. Standalone or called from BASIC and RM/COBOL.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 4,600 since 1982 ☐ Cost: $200

INNER ACCESS CORP.

☐ Power Sort
Skips over records, concatenates files, merges sorted files, selects records based on keys that may contain wild card characters. Up to 30 select and sort keys.
IBM PC ☐ 48 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $95

MARTIN MARIETTA DATA SYSTEMS

(operating company of Martin Marietta Corp.)

☐ SortIT
Fast I/O. Supports data types including ASCII characters, alpha, integer, word and floating point. Sorts data in ascending or descending sequence using up to 9 fields. Merges up to 10 input files into single file.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 770 since 1983 ☐ Cost: $125

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Sort Facility
Standalone and COBOL-hosted versions. Standalone version accepts user data files and arranges records in user-specified order. For COBOL-hosted version, source of input may be one or more disk files.
IBM PC ☐ 44 KB req. ☐ Introduced: 1980 ☐ Cost: $195

MIRACLE COMPUTING

☐ Qusort
Sorts mailing lists, stock listing, payroll and inventory. Handles 8,000,000 records.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 65 since 1982 ☐ Cost: $35

OPT-TECH DATA PROCESSING

SEE AD ON PAGE 2

☐ Opt-Tech Sort
Sort/merge/select utility. Fixed or variable length records. Ten key fields, record selection and reformatting, comma delimited files, and dynamic memory allocation. Runs as DOS command or can be called as subroutine from 25 languages including dBASE II and III.
IBM PC, AT, XT ☐ 64 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $149

PECAN SOFTWARE SYSTEMS, INC.

☐ Sort Utility
IBM PC, XT, AT ☐ Cost: $40

PERSONAL COMPUTER SUPPORT GROUP, INC.

☐ Sort 2+
File sorting.
IBM PC ☐ 16 KB req. ☐ Introduced: 1983 ☐ Cost: $30

PERSONAL SOFTWARE CO.

☐ Sort/Merge
Maximum record length allowed is 510 characters. Memory and workfile sorts optional. Six fields sorted in ascending or descending order. Sort program prints listing of sort specifications and I/O files.
IBM PC ☐ 128 KB req. ☐ Copies sold: 250 since 1982 ☐ Cost: $25

QUANTUMN INFORMATION SYSTEMS, INC.

☐ QISORTC
Callable from RM/COBOL. Handles V1.5X and V2.XX data files. Can use packed (COMP-3) and binary (COMP-1) files for sequence control selection. Up to 32 control fields, 32 record selection fields and 32 output fields.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $95

RAPI-SERV CASH SYSTEMS, INC.

☐ MEGASORT
Merges up to 70 files and scans any file for specified pattern. Stands alone or may be used from a subsystem such as BASIC.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 5 since 1984 ☐ Cost: $75

SOFTWARE MASTERS (IN)

☐ Sort-Merge-Copy
Sort utility. Standalone or called from any language.
IBM PC, AT, XT, PCjr ☐ Cost: $150

SOFTWARE RESEARCH TECHNOLOGY

☐ dFASTEST
Sort package.
IBM PC ☐ Cost: $90

STRUCTURED SYSTEMS GROUP, INC.

☐ QSort
For ASCII disk files. Sorts files up to eight Mb with one to five key fields. Sorts SSG programs.
IBM PC, XT, AT ☐ 32 KB req. ☐ Copies sold: 25,000 since 1977 ☐ Cost: $100

SYSTEMAT CORP.

☐ Sortex
Select/sort/merge facility. Runs via menu, control file and command line. Supports text, sequential and random file formats. Supports character and numeric data types. Output file contains full records, indexes, addresses or keys. Unlimited number or size of records and keys.
IBM PC ☐ Cost: $100

UNIVAIR, INC.

☐ UNI-SORT
Interface module between Univair's vertical application programs and UNI-FILE DBMS or WordStar, dBASE and Lotus 1-2-3. Creates sorted secondary database for auxiliary reports.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $95

SYSTEM DESIGN & METHODOLOGIES

AGS MANAGEMENT SYSTEMS, INC.

☐ Computer-Aided Methodology
Aid for evaluating, planning, organizing and measuring functions in information systems development process. Prioritizes service requests. Handles project scheduling, resource assignment and control. Provides system development guidelines. Describes phases in system life cycle and tasks to be performed to complete phase work.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $22,950

ARTHUR ANDERSEN & CO.

Management Information Consulting Division

☐ METHOD/1 Information Systems Methodology
Systems management guidelines address project management, maintenance management, work programs, estimating, project control, quality assurance and documentation. Uses structured approaches for analysis, design, programming, testing and maintenance.
IBM PC ☐ 512 KB req. ☐ Copies sold: 400 since 1979

CADRE TECHNOLOGIES, INC.

☐ Teamwork/RT (Real-time)
Provides real-time extensions to Teamwork/SA for real-time structured analysis. Includes unified control/data flow diagram, state transition diagram, state event matrix, decision table and process activation table. Displays data/control flows alone or simultaneously. Multi-user.
IBM RT ☐ 2,000 KB req. ☐ Introduced: 1986 ☐ Cost: $3,600-$8,900

☐ Teamwork/SA (Systems Analysis)
Multi-user. Integrates system development methodologies, distributed processing, CAD/CAM/CAE and interactive graphics. Formulates system requirement, organizes them into models and evaluates/maintains models. Manipulates project models. Examines requirements from multiple viewpoints. Checks for errors/consistency. Syntax-directed editing.
IBM RT ☐ 2,000 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $3,600-$8,900

☐ Teamwork/SD (Systems Design)
Manipulates/evaluates system designs. Evaluates completeness/accuracy. Creates/integrates structure charts with module specifications and data dictionary definitions. Combines CAD, interactive graphics and distributed processing. Includes project library, design rule checking, model configuration management, annotation and query. Multi-user.
IBM RT ☐ 2,000 KB req. ☐ Introduced: 1986 ☐ Cost: $3,600-$8,900

CHARLES RIVER DEVELOPMENT

☐ Data-Station
Systems analysis and process modeling system for use with Autodesk's AutoCAD. Produces hi-res, color graphics. Includes entity relationship, Gane & Sarson, Nassi-Schneiderman, Jackson charts, Yourdon, decision trees, access maps, flow charts and symbol library. Optional data dictionary interface.
IBM PC ☐ 512 KB req. ☐ Copies sold: 45 since 1985 ☐ Cost: $550-$1,450

COMPUTER ASSOCIATES INTERNATIONAL, INC.

☐ CA-Estimacs
System development effort, staffing and cost, hardware configuration, portfolio, maintenance and fiscal planning estimator. Raw estimates of total work hours needed for project completion. Color graphics display relationship between input and forecasts. Transfers estimating information to CA-Planmacs to produce project completion plan.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 300 since 1982 ☐ Cost: $15,000

COMPUTER SCIENCE INNOVATIONS, INC.

☐ **SDL (Software Design Language)**
Designs software at system level, process level, module level and algorithm level. Formatted output contains title page, table of contents, text segment bodies, data definition bodies, logic flow segment bodies, data item cross reference, flow segment cross reference and flow segment reference trees.
IBM PC ☐ 128 KB req. ☐ Copies sold: 29 since 1984 ☐ Cost: $400

DELTACOM, INC.

☐ **PRISM (People, Resources, Information Systems Management/Strategic Management)**
Systems life cycle management tasks, business/systems, strategic planning and applications development productivity. Module alternatives include strategic and tactical systems planning, management systems specification and implementation, information systems specification implementation and interactive processing and centralized and distributed systems management capabilities.
IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1974 ☐ Cost: $20,000

INDEX TECHNOLOGY CORP.

☐ **Excelerator/RTS**
Workbench for systems analysis. Support facilities for creating and modifying systems diagrams and charts, screen and report specifications. Project dictionary stores entries and tracks relationships between them. Includes block security device.
IBM PC, XT, AT, 3270-PC ☐ 512 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $8,400

INFORMATION DESIGN, INC.

☐ **SST**
System design. Incorporates text/graphic images in design. Includes text/graphic frame editors. Uses English-like commands. Provides event trapping for training and prototyping. File support/data manipulation. Offers visual special effects. Script editor/language checker. Accesses DOS sub-environment.
IBM PC

KOS & ASSOCIATES, INC.

☐ **KISS/COBOL**
COBOL standardization and maintenance methodology. Enforces uniform structure for programs.
IBM PC, AT ☐ 25 KB req. ☐ Copies sold: 5 since 1980 ☐ Cost: $5,000-$10,000

ARTHUR D. LITTLE, INC.

☐ **ADL-IRMA**
Manages definition and structure of data independently of any physical implementations including support for domains. Supports definitions of data flows, processes and external entities. Draws and prints data flow diagrams. Relates data flows to logical data design. Supports prototyping of screen and business systems planning.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 12 since 1984 ☐ Cost: $20,000

MCDONNELL DOUGLAS PROFESSIONAL SERVICES CO.

☐ **DFDdraw**
Graphic symbols template for data flow diagrams. Positions, connects and annotates symbols. Performs scale, size, pan, zoom and restore. Integrates with Stradis/Draw and ProfKit * Analyst.
IBM PC, XT, AT, 3270-PC ☐ 320 KB req. ☐ Copies sold: 1,200 since 1984 ☐ Cost: $500

☐ **ProKit * Analyst**
Systems design tool for application analysts. Assists in data flow diagram preparation while creating support documentation in data dictionary. Provides status information and analysis with 46 reports. Includes horizontal/verticle balancing.
IBM PC, XT, AT, 3270-PC ☐ 640 KB req. ☐ Copies sold: 350 since 1985 ☐ Cost: $2,450

☐ **SCdraw**
System design tool using structure chart graphic symbols.
IBM PC, XT, AT, 3270-PC ☐ 320 KB req. ☐ Introduced: 1986 ☐ Cost: $500

NASTEC CORP.

SEE AD ON PAGE 381

☐ **DesignAid**
Support tool for structured analysis and design. Supports word processing and graphics requirements. Validates and balances data flow diagrams. Extracts key information and loads it into design dictionary.
IBM PC, XT, AT, 3270-PC ☐ 640 KB req. ☐ Cost: $6,900

☐ **Nastec Case 2000**
Performs analysis and validation of requirements and design. Project planning, estimating, quality review and control. Accesses IBM host computers. On-line support for DSSD and JAD methodologies. Provides bridge to PSL/PSA, host-based design tool. Includes Tarkenton Software's application generator. GAMMA.
IBM PC ☐ 640 KB req. ☐ Introduced: 1985 ☐ Cost: $6,900

NEWKIRK MANAGEMENT SERVICES, INC.

☐ **SMM II (System Management Methodology)**
MIS management. Includes procedures for new development, enhancements and maintenances and estimating guidelines. Incorporates structured and prototyping techniques. Defines project deliverables, rolls and responsibilities, work to be done, sequence of tasks, and reviews and approvals.
IBM PC ☐ Copies sold: 15 since 1975

PROMOD, INC.

☐ **Promod**
Integrated systems engineering environment with structured analysis, modular design, code frame generators and pseudo code. User builds system models with data dictionary, data flow diagrams and mini-specifications. Transformation, system design, program design and implementation.
IBM XT, AT ☐ 640-4,000 KB req. ☐ Copies sold: 512 since 1980 ☐ Cost: $9,950

QUANTITATIVE SOFTWARE MANAGEMENT

☐ **SEAS (Software Engineering Assessment Service)**
Software productivity evaluation. Utilizes a combination of numeric measures, environmental analysis and graphical industry comparisons.
IBM PC ☐ Cost: $10,000-$55,000

☐ **SLIM (Software Lifecycle Model)**
Software cost schedule, risk and reliability estimation. Discloses minimum time to develop a system. Imposes management constraints on project including cost, manpower and schedule.
IBM PC ☐ 32 KB req. ☐ Copies sold: 80 since 1979

SCIENCE APPLICATIONS INTERNATIONAL CORP.

Computer Systems Operation

☐ **SAIC-SDDL (Software Design and Documentation Language)**
Table of contents, module cross-reference listings and invocation trees. User-defined keywords, structured design constructs, a top-down approach and iterative software design. Error summary report and level and metric directives. Page and line numbering, indentation and flow-of-control arrows.
IBM PC ☐ Copies sold: 70 since 1982 ☐ Cost: $800

SOFTWARE PRODUCTIVITY RESEARCH, INC.

☐ **SPQR/20 (Software Productivity, Quality and Reliability)**
Plans software development/maintenance. Predicts development schedules, resources, staff sizes, costs, defect rates, reliability and maintenance/enhancement levels of software projects. Predicts number of code lines required by project for 30 major software languages.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $5,000

TRANSACTION SYSTEMS, INC.

☐ **Automatic Flow Chart System**
Creates, edits and prints diagrams for system design and documentation.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $55

VISIBLE SYSTEMS CORP.

☐ **Analyst**
Selection of standard symbols, custom symbol creation capability selectable worksurface sizes with automatic panning/scrolling and zooming for large diagrams, dynamic symbol sizing, true point-to-point line drawing, selectable background color and nesting features for managing and accessing hierarchical decompositions.
IBM PC, AT, XT, 3270-PC ☐ 384 KB req. ☐ Copies sold: 350 since 1985 ☐ Cost: $595

☐ **Analyst's Workbench**
Integrated package including Visible Analyst, Visible Rules, and Visible Dictionary.
IBM PC, XT, AT, 3270-PC ☐ 384 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $1,785

☐ **Dictionary**
Maintains information created by Visible Analyst and Visible Rules. Entries automatically populate dictionary. Unlimited number of lines are available for minispecifications, composition values of data flows and value/meanings of data elements. Over 60 lines of notes available for other entries.
IBM PC, XT, AT, 3270-PC ☐ 384 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $595

☐ **Rules**
Design analysis tool used with the Visible Analyst. Accepts files created with the Visible Analyst. Provides a visible record, file and data base layout. Supports hierarchical set of data flow diagrams. Provides hierarchical numbering of process symbols and diagrams.
IBM PC, XT, AT, 3270-PC ☐ 384 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $595

TEXT EDITORS

APPLIED SOFTWARE TECH, INC.

☐ **SE**
Full screen text editor. Multiple text buffers with windows, macro definition, optional line numbering, multiple colors on screen, and global search and replacement of text strings or patterns.
IBM PC ☐ Cost: $88

ARRIX LOGIC SYSTEMS, INC. (ALSI)

☐ **APS/SPF**
Reviewed Mar 1986 p. 113.
Text editing and utilities package. Manipulates textual data. Creates, converts and edits files. Accommodates large files.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $145

☐ **APS/SPF Plus**
While compile is being executed, performs editing, browsing or other APS/SPF functions without degradation of response time.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $245

THE BRIDGE, INC.

☐ **SPF/FC**
ISPF-like text editor.
IBM PC

COMMAND TECHNOLOGY CORP.

☐ **SPF/PC**
Reviewed Mar 1986 p. 113.
Full screen text editor. PC version of mainframe ISPF editor. Virtual memory supports large files with hard disk or extended/expanded memory boards. Allows mainframe primary and line commands with line length to 954 bytes. Includes utilities and communications program.
IBM PC, XT, AT, PCjr ☐ 192 KB req. ☐ Cost: $195

COMPUVIEW PRODUCTS, INC.

☐ VEDIT

Cursor movement, editing, languages, automatic indenting for structured programming languages, printing, 38 scratch pad buffers for cut and paste operations, control of file handling and command macros. Word wrap, adjustable margins, reformatting of paragraphs, word and paragraph functions and macros.

IBM PC☐ 64 KB req.☐ Copies sold: 30,000 since 1980☐ Cost: $150

FINDER INFORMATION TOOLS, INC.

☐ PR

Text editor and reformatter. Squeeze and lower case functions convert irregular, inconsistent text downloaded from commercial data bases into finished reports.

IBM PC☐ 128 KB req.☐ Copies sold: 30 since 1984☐ Cost: $300

IBM PERSONALLY DEVELOPED SOFTWARE

☐ Browstext

IBM PDS no. 6276-635. Text, hex and sector editor. Selects files from directory listing. Finds files in subdirectory. Sets function keys. Executes external DOS commands. Uses IBM's EGA (Enhanced Graphics Adapter in 25- through 43-line mode.

IBM PC, XT, AT, 3270-PC, PCjr, Portable PC☐ 128 KB req.☐ Cost: $50

☐ Introductory Editor

IBM PDS no. 6276-589. Full-screen document editor. Edits ASCII data including document files or program source code. Displays files up to 1,500 lines in length and 254 characters wide. Edits files containing up to 50,000 characters. Monochrome and color EGA support.

IBM PC, XT, AT, 3270-PC☐ 128 KB req.☐ Cost: $20

☐ Lite Editor

IBM PDS no. 6276-637. Full-screen text editor. Organizes, outlines, composes, edits and formats data. Moves, copies, overlays and deletes blocks of text. Moves or copies text between different files. Monochrome and color EGA support.

IBM PC, XT, AT, 3270-PC, PCjr, Portable PC☐ 128 KB req.☐ Cost: $25

INTERNATIONAL SOFTWARE ALLIANCE

☐ Proscript Text Formatter

Interfaces with a text editor such as Edlin, VEDIT or PMATE to provide word processing.

IBM PC☐ 64 KB req.☐ Cost: $75

LATTICE, INC.

SEE AD ON PAGE 279

☐ LSE (Lattice Screen Editor)

Multi-window environment allows simultaneous editing and provides cut-and-paste functions between files. Includes block moves, keyboard macros, variable tab settings and insert or overwrite text entry. Provides Lattice C error tracking mode, 3 assembly language input modes and pattern searches.

IBM PC, XT, AT☐ 128 KB req.☐ Cost: $125

LIFEBOAT ASSOCIATES

SEE AD ON PAGE 291

☐ Pmate

Reviewed Sep/Oct 1983 p. 110.

Side-scrolling and two visible cursors. Macro facility with equivalents of if-then-else, do until, iteration, goto, I/O with prompting, user variables and user stack. 11 general purpose buffer registers available.

IBM PC☐ 128 KB req.☐ Copies sold: 10,000 since 1984☐ Cost: $225

MARTIN MARIETTA DATA SYSTEMS

(operating company of Martin Marietta Corp.)

☐ EditIT

Editor with word processing. Multiple files can be viewed or edited simultaneously through windows with user-defined size and color. File merging and document formatting.

IBM PC, XT, AT☐ 64 KB req.☐ Copies sold: 450 since 1984☐ Cost: $100

MERIDIAN SOFTWARE SYSTEMS, INC.

☐ F"

Screen-oriented text editor. Includes an associated marker generator, FF, that integrates editing with compilation tasks.

IBM PC

MICRO DATA BASE SYSTEMS, INC.

☐ K-Text

For use with KnowledgeMan/2 integrated information system. Text entry, editing procedures and formatting.

IBM PC☐ 320 KB req.☐ Introduced: 1984☐ Cost: $175-$660

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Notepad

Screen-oriented text file editor for use with Microsoft Mouse.

IBM PC

MIX SOFTWARE

☐ Editor

Programmable full/split screen text processor. Splits screen horizontally/vertically. Edits 2 files at once. Moves text back and forth between 2 windows. User-created macro commands. Over 100 predefined commands.

IBM PC☐ Cost: $30

MORGAN COMPUTING CO., INC.

☐ TED

Reviewed Sep/Oct 1983 p. 110.

Full-screen text editor with RAM-resident text files and programmable function keys. Provides block manipulation, line manipulation, allows file merge/search/replace. Works like IBM's TSO/SPF.

IBM PC, AT, XT, PCjr☐ 128 KB req.☐ Copies sold: 700 since 1983☐ Cost: $95

ROBERT L. NICOLAI

☐ Text Editor

Creates/updates programs written in any language. Stores up to 10 pages of text at 63 lines per page. Links longer programs. Provides file I/O routines. Includes calculator and hex number display option. Moves/deletes blocks of text. Adjustable margins/tabs.

IBM PC☐ 128 KB req.☐ Copies sold: 2 since 1986☐ Cost: $20-$25

POPULAR PROGRAMS, INC.

☐ ESP (Entry System for Programs)

Language-oriented program editor. Syntax checking, formatting, program structure manipulation language help and language-oriented abbreviations. Program structures built with single keystroke. Multiple file access, multiple windows, macro commands and power failure and disk full protection.

IBM PC, XT, AT, 3270-PC☐ 192 KB req.☐ Copies sold: 800 since 1983☐ Cost: $249-$399

QUAID SOFTWARE, LTD.

☐ OmniEdit

Supports 2D editor with built-in calculator and communications. Examines and edits DOS files created with other programs. Sorts/moves block or column of text in center of document. Receives text and sends files using Xmodem while other functions are performed.

IBM PC, XT, AT☐ 128 KB req.☐ Introduced: 1984☐ Cost: $40

SOLUTION SYSTEMS

☐ BRIEF, The Programmer's Editor

Text editor with windows, macro language and undo capabilities.

IBM PC☐ 192 KB req.☐ Copies sold: 1,200 since 1984☐ Cost: $195

SUNBELT COMPUTER SYSTEMS, INC.

☐ SUNED86M (MS-DOS DOS-type Text Editor)

Scrolling forward and backward, line or page editing, modification options in page or global edit with or without verification, block editing including insertion from other files, user-defined tab character and multiple scratch files updating original file at EOJ.

IBM PC☐ 128 KB req.☐ Copies sold: 1,500 since 1982☐ Cost: $125

THOMPSON AUTOMATION

☐ Vis

Screen-oriented vi-compatible editor. Permits editing of multiple files in memory and file read/write operations. Performs keyboard buffering, memory compaction and direct screen updating simultaneously.

IBM PC

WATCOM PRODUCTS, INC.

☐ Editor

Reviewed Feb 1985 p. 126.

Line positioning by number or context, line insertion or deletion, global and selective text changes, command recall and modification and file manipulation commands such as directory listing, file rename and deletion.

IBM PC☐ Copies sold: 10 since 1982☐ Cost: $125

WENDIN, INC.

☐ XTC

Multi-tasking text editor featuring multi-tasking macros, windows, text buffers, undo N times, macro programming control structures and variables.

IBM PC, XT, AT☐ 256 KB req.☐ Copies sold: 1,000☐ Cost: $99

WINDOWING SOFTWARE

APPLICATION EXECUTIVE CORP.

☐ APX Core Executive

Reviewed Dec 1985 p. 52.

Runs up to eight programs simultaneously. Cut and paste and keystroke macro facilities. Allows custom programs to call system's functions.

IBM PC☐ 43 KB req.☐ Copies sold: 30,000☐ Cost: $95

COMPUTER ASSOCIATES INTERNATIONAL, INC.

Micro Products Division

☐ EasyPlus Open Window System

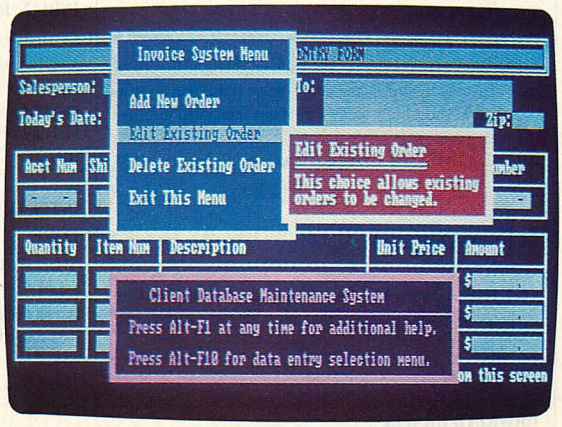
Integrates Plus Series programs with up to 10 windows. Runs SuperCalc3, SuperProject, Lotus 1-2-3 and dBASE II. Contextual help screens.

IBM XT, AT, 3270-PC☐ 256 KB req.☐ Introduced: 1985☐ Cost: $149

CXI, INC.

SEE AD ON PAGES 266/267

☐ PCOX/3270 PC Upgrade for IRMA



Allows IRMA users to view 5 interactive host application sessions, 2 notepads and PC session simultaneously on PC screen. Transfers information from 1 window to another. Provides CXI and IBM 3270-PC APIS.

IBM PC, XT, AT☐ 448 KB req.☐ Introduced: 1985☐ Cost: $395

Make Flashy Programs.

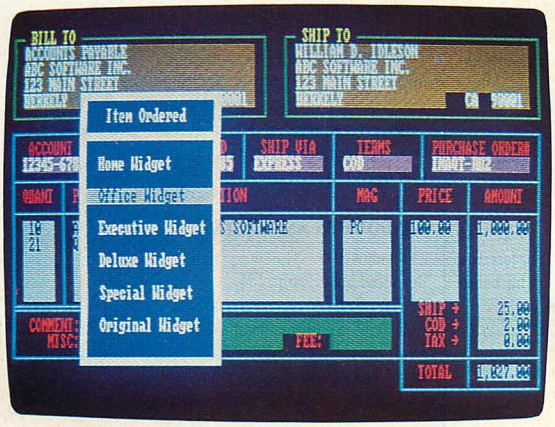
In dBASE, Turbo Pascal, BASIC, C, COBOL, Fortran, 1-2-3, DOS.

New! Flash-Up™ Windows.

Instantly flash-up menus and help windows.

From within almost any program language or application program. When the user makes a menu selection, a sequence of keystrokes is sent to the running program as if the user were typing it at the keyboard.

A keyboard macro utility that your programs can control!



Just like keyboard macro utilities, Flash-Up Windows can be used to send repetitive keystrokes and simplify commands for your users.

But Flash-Up Windows can do more. Your programs can send commands directly to Flash-Up. Powerful commands that control when and how windows appear. Flash-Up is a perfect tool for controlling programs and entire systems via menus.

The powerful window editor allows you to create windows, change their size, location, and color — all automatically.

Works with DOS, BASIC, Turbo Pascal, C, COBOL, Fortran, dBASE, 1-2-3, R:BASE ...and most other software. $90.

Flash Code.™ For dBASE II, III and III+.

The most powerful, most complete program developer for dBASE II, III, and III+.

Use Flash Code's advanced screen design editor and see how incredibly easy screen design can be. Draw boxes, lines, and select colors. Specify special parameters for edit checking, initial values, calculated fields, etc. All within one, easy to use editor.

Then tell Flash Code to write the program. Based on your screen designs, Flash Code can generate a full database program. Well written code that you can use as is, or merge with your own programs.

Menus and help windows add a new dimension to your dBASE applications.

Flash Code includes its own dBASE window editor. Use the window module to flash-up windows and screens instantly. The windows are easily converted when you move to the added power of our Flash-Up Windows product.

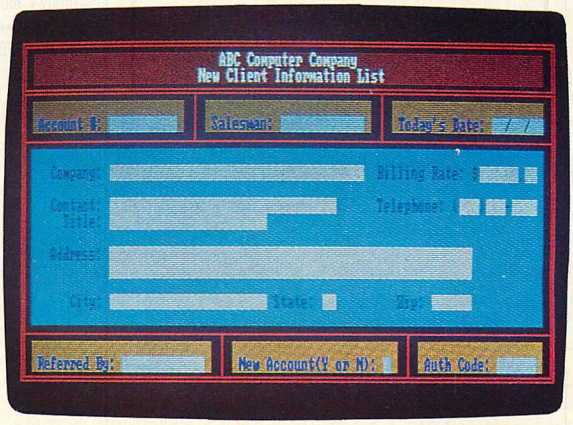
"...a truly remarkable product. Brand new, state-of-the-art and actually fun to use. The windows make it an even more amazing product."
— Gary N. Prague, Author, "The dBase III Programming Handbook"

Flash Code. $150.

Screen Sculptor.™ For IBM BASIC, Turbo Pascal, and Quick Basic.

Create screens in minutes, then Screen Sculptor writes the program.

In IBM BASIC, Turbo and Microsoft Pascal, and Quick Basic. Simply "draw" your screens with our advanced screen design editor and replace hours of tedious work with minutes of creative design.



Move pieces of the screen around, select colors from a menu, draw boxes, lines, paint, repeat last character. And more! Specify variable names, data types, acceptable data ranges, pictures for edit checking, etc., and you're ready to go.

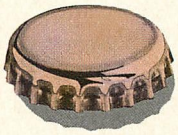
Generate tested program source code to merge with your own program.

Based on your screen design. The generated program flashes up the screen, allows data to be entered by the user, and edit checks the input data.

"...so well done that you may not need to refer to the manual."
"...an exceptional product that fills a real need in the development of new programs."
— Computer Language

Screen Sculptor. $125.

No Risk Demo Offer!



Order any package and receive a separately sealed demo disk of the product. Use the demo and the manual for 30 days. If you're not satisfied — for any reason — return the entire package for a full refund.

Credit card orders call 24 hrs/day: 1(800) 872-8787 operator 310.

All other orders and inquiries call or write Software Bottling Co., 6600 L.I. Expwy., Maspeth, NY 11378. 718-458-3700.

Requires an IBM PC, XT, AT or true compatible, 256K.

☐ Windows 4 C

Screen/window handling system. Provides printing to screen, color cursor positioning, scrolling, box printing and restoration of screen parts. Generates windows in text mode. User can open windows in layers and reactivate window any time. Works with Lattice and Microsoft compilers.

IBM PC ☐ Cost: $49

TECHNICAL APPLICATIONS

TECHNICAL APPLICATIONS SOFTWARE

CHEMICAL ENGINEERING

AAA TECHNOLOGY & SPECIALTIES CO., INC.

☐ **Tri*Therm**

Performs thermal design or rating of shell and tube heat exchangers and air coolers. Contains properties data bank and vapor-*liquid* equilibrium routines. Used by petrochemical, refinery, fabrication, power and gas industries.

IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 15 since 1976

ALGOR INTERACTIVE SYSTEMS, INC.

☐ **Asteam**

Includes set of FORTRAN subroutines for computing steam table values and a FORTRAN program for returning steam table values in response to input of temperature and pressure. Table values are calculated to approximate Kennan and Keys steam tables.

IBM AT ☐ 256 KB req. ☐ Copies sold: 12 since 1978 ☐ Cost: $250

APPLIED COLOR SYSTEMS, INC. (ACS)

(subsidiary of Armstrong World Industries)

☐ **1100 Color Quality Control System**

Uses measurements from Spectro Sensor spectrophotometer and color tolerances specified by user for pass/fail QC programs. New color matching, batch correction and waste material usage. Optional formula costing, material requirements and MSDS.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $24,500

☐ **1800 Color Control System**

Color/quality control system. Provides new color matching, color correction, waste material work-off, laboratory reformulations and batch corrections. Optional formula costing, materials handling and MSDS. Includes color graphics.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $42,900-$49,900

APPLIED OPERATIONS RESEARCH, INC.

Microcomputer Applications Group

☐ **Blending Master**

Blends and formulates chemicals and foodstuffs to minimum/maximum or exact specifications while using least-expensive components.

IBM PC ☐ Copies sold: 50 since 1983 ☐ Cost: $995

☐ **Formulation Tool for Least-Cost**

Calculates least-cost formulations and blends for agriculture, food industry and chemicals. Uses optimizing linear programming techniques.

IBM PC ☐ 192 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $995

BBN SOFTWARE PRODUCTS CORP.

☐ RS/1

For chemical, pharmaceutical, genetic engineering and semiconductor industries. Handles data transformation and analysis, graphics, statistical analysis and curve fitting. Data may be entered directly or from Research Data Entry system. Stores data in 2D table format. Creates bar charts, pie charts, X-Y graphs and 3D graphs. Includes programming language RPL.

IBM PC, XT, AT, 3270-PC, RT PC ☐ 48 KB req. ☐ Copies sold: 2,000 since 1979 ☐ Cost: $2,000

CHEMSHARE CORP.

☐ CHEMTRAN

Includes data base of thermophysical properties for 860 chemicals. Predicts properties for chemicals from 2D chemical drawing. Correlates thermophysical property data for pure components and mixtures.

IBM AT, XT ☐ 500 KB req. ☐ Introduced: 1977

COMPUTER SOFTWARE TECHNOLOGY

☐ Section Properties

Computes area, state and inertia moments on 400 points. Graphs results.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $60-$90

☐ 3-D Solids/Shells Inertia

Inertia properties calculation for such axisymmetric solids as shells and lumped masses.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $90

CTS ENGINEERING, INC.

☐ Steam Tables

Calculates thermodynamic properties of steam/water along saturated vapor and saturated liquid lines, and in subcooled, superheated and mixture regions. Calculates pressure, temperature, enthalpy, entropy, specific volume and quality when only 2 properties input.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 18 since 1983 ☐ Cost: $125

DATA ACQUISITION SYSTEMS, INC.

☐ Gas Chromatography - 200

Auto scales raw data of chromatogram in Y direction showing most intense peak at 100% intensity. Y-axis and X-axis expansion. Baseline subtract. Reports peak area, area percent, peak type, width, height and height percent. Smoothing. Calculates first and second derivatives. Creates standards files. Requires Macsym 120.

IBM PC ☐ 640 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $495

DATACOR, INC.

☐ CHEMPAX

Includes OE, Invoicing, Purchasing, Production, AR, AP, IC, GL, Future Pricing, Sales Analysis, Reorder Point Week/Telemarketing and Manufacturing Product Formulations modules.

IBM PC, XT, AT ☐ Cost: $5,500

☐ LABELPAX

Generates packaging labels and material safety data sheets in compliance with OSHA regulations.

IBM PC, XT, AT ☐ Cost: $2,100

DYNACOMP, INC.

☐ FCPAK (Fuel Cell Analysis)

Computes exit conditions at fuel cell anode and cathode from inlet conditions. Uses acid, molten carbonate and alkaline fuel cells. Calculates current density from voltage and operating conditions.

IBM PC ☐ 64 KB req. ☐ Cost: $375

☐ Fluidpak

Computes exit conditions from compressor or turbine from inlet conditions and power required to pump a gas. Calculates particulates removal from gas stream and size/cost of Rankine cycle turbines and generators.

IBM PC ☐ 64 KB req. ☐ Cost: $225

☐ HXPAK (Heat Exchanger Analysis)

Computes exit conditions from heat exchangers, boilers and condensers to yield thermal design information from their inlet conditions.

IBM PC ☐ 64 KB req. ☐ Cost: $275

☐ PDrop

Performs pressure drop distribution analysis for pipes. Handles incompressible flow of water and compressible flow of steam or air in circular crossection pipe valves and fittings. Handles laminar to turbulent flows.

IBM PC ☐ 64 KB req. ☐ Cost: $75

☐ Thermopak

Computes enthalpy, temperature, specific heat and rates of specific heats. Handles hydrogen, water, methane, carbon dioxide, oxygen and nitrogen. Eight species capacity. Handles aqueous fuel cell electrolytes. Calculates thermal conductivities and viscosities of seven gases modeled.

IBM PC ☐ 64 KB req. ☐ Cost: $200

DYNAMIC COMPUTER SYSTEMS

☐ Paint Formulating Control System

Creates and adjusts formulas. Expresses ingredient specifications as a weight or percentage of TNV cost, total volume, total pigment, or other ingredient. Can apply old stock to new batches. Includes metric and imperial measures.

IBM PC ☐ 128 KB req. ☐ Copies sold: 1 since 1983 ☐ Cost: $3,000

ENGINEERING-SCIENCE

☐ Wastetrax

Controls/manages/maintains wastewater treatment plants. Performs groundwater monitoring, hazardous waste management and air quality monitoring. Provides data base of daily operating parameters, multiple linear regression routines, reports, work orders, IC, maintenance scheduling and repair history/maintenance cost tracking. Interfaces Lotus 1-2-3.

IBM PC, XT, AT ☐ 448 KB req. ☐ Cost: $5,000-$20,000

ESDU INTERNATIONAL, INC.

(subsidiary of International Thomson Organization)

☐ Properties of Sea Water and Its Concentrates

Obtains density and specific heat capacity of sea water and its concentrates for temperatures exceeding 20C. Computes spot values of density and specific heat capacity to within .05 and .3 percent respectively.

IBM PC, XT, AT ☐ 192 KB req.

EXIM SERVICES OF N.A., INC.

☐ Formatted File Manager/dSCI (Scientific Data base for the Coatings Industry)

Provides chemical formulation management, analysis and quality control. Completes extrapolations with multi-variable and what-if calculation for experimentation, batch pilots or full production. Utilizes Formatted File Manager DBMS with multi-user, open architecture and DIF capability.

IBM XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $1,995

FEIN-MARQUART ASSOCIATES, INC.

☐ Mascot

Performs calculations used in elucidation of structures in mass spectroscopy. Supports library searching of two incorporated data bases of common environmental pollutants and forensic drugs. Graphic or tabular displays.

IBM PC ☐ 256 KB req. ☐ Copies sold: 35 since 1985 ☐ Cost: $490

☐ SuperStructure

Graphics program for drawing chemical structures for data base construction or querying. Uses lightpen or mouse. One version querying against the on-line Chemical Information System, the other for private data base construction.

IBM PC ☐ 384 KB req. ☐ Copies sold: 15 since 1985 ☐ Cost: $490

☐ uPDSM - micro Powder Diffraction Search Match

Implements mainframe search-match system for powder diffraction analysis of multiphase mixtures, searching entire JCPDS PDF library of any user-selected subfile. Elemental chemistry options, removal of found phases, and on-line user instruction facility.

IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $4,900-$8,800

☐ uThermo - microThermo

Calculates over 230 thermodynamic properties of pure substances. Generates properties of real gas or liquid phase and various equilibrium phases. Results displayed in tabular and/or graphic form or stored on diskette.

IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $1,000-$2,000

HAWK SCIENTIFIC SYSTEMS, INC.

☐ Molecular Presentation Graphics

Creates diagrams to illustrate chemical research reports. Reorients and resizes diagrams to fit in blank areas on pages of text. Chemical figures are built-in.

IBM PC ☐ 256 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $225

INTEGRATED SOFTWARE DESIGN, INC.

☐ CIBL (Chemical Industry Barcode and Labeling)

Designs, stores and prints chemical industry labels. Data base manager stores warning messages and chemical products. Prints warning messages in paragraph format on labels. Labels may include bar codes, graphics and logos. Graphic label/logo editors available.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 225 since 1985 ☐ Cost: $2,190

MOLECULAR DESIGN, LTD.

☐ ChemBase (A Chemist's Personal Software Series Program)

Chemical data base manager with search and display capabilities. Allows chemist to build and use data bases containing both molecules and reactions, and associated data.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $3,500

☐ ChemTalk/ChemHost (Chemist's Personal Software Series Programs)

Communications programs that perform terminal emulation and file transfer operations. Allows access to mini-mainframe based chemical data bases.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $1,000-$10,000

☐ ChemText (A Chemist's Personal Software Series Program)

Scientific word processor designed specifically for chemists. Combines full word processing features with the ability to interactively insert molecular structures, reactions, forms, and formulas into text.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $1,500

RADIAN CORP.

☐ CHARM (Complex Hazardous Air Release Model)

Predicts extent and concentration of toxic cloud resulting from a spill of toxic or hazardous materials. Gives emergency procedures, health hazards and safety precautions specific to material released. Requires 8087 math coprocessor, IBM or Plantronics graphics board and color monitor.

IBM PC ☐ 512 KB req. ☐ Copies sold: 65 since 1983 ☐ Cost: $9,500

DB ROBINSON & ASSOCIATES, LTD.

☐ AMSIM

Simulates processes for design of new gas sweetening units, optimization of existing units and debottlenecking of units under changing feed conditions. Uses fixed flowsheet simplified according to user's specifications.

IBM PC ☐ 512 KB req. ☐ Copies sold: 25 ☐ Cost: $4,000

☐ **EQUI-PHASE COLUMN**
Designed for hydrocarbon processing, natural gas, oil refining, NGL fractionation and petrochemical processing. Provides prediction of multistage separation processes by modeling absorption columns, reboiled absorbers, fractionation columns, presaturated absorbers and shortcut distillation.
IBM PC ☐ 512 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $2,000

☐ **EQUI-PHASE EOR**
Models laboratory experiments to evaluate reservoir performance and miscible enhanced oil recovery. Includes differential liberation, constant volume and composition depletion, first/multiple contact miscibility and formation volume factors. Property predictions use Peng-Robinson Equation of State.
IBM PC ☐ 440 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $2,000

☐ **EQUI-PHASE Hydrate**
Calculates hydrate forming temperatures of pressures in gas phase, totally condensed liquid phase or within dew point-bubble point phase envelope for petroleum fluids. Figures maximum allowable water content in gas without hydrate formation. Estimates hydrate depression by inhibitors.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1977 ☐ Cost: $1,500

☐ **EQUI-PHASE Phase Behavior**
Calculates single phase fluid properties, true critical properties for multicomponent mixtures, solid forming conditions for petroleum. Two/three-phase aqueous/non-aqueous systems operations, two/three-phase bubble points, and dew points. Handles constant enthalpy or entropy expansion/compression.
IBM PC ☐ 440 KB req. ☐ Copies sold: 200 since 1976 ☐ Cost: $2,000

SCIENTIFIC SOFTWARE

☐ **PINS (Pharmaceutical Information Network System)**
Networked data base and project management capabilities. Performs searches on entire data base or portion of data base. Table and report generating utilities.
IBM PC ☐ Cost: $25,000

☐ **Stability System**
Manages product stability testing program in pharmaceutical industry. Stability data base management. Assay/stability sample scheduling. Statistical data treatment with graphics. Audit trail capability.
IBM PC ☐ 256 KB req. ☐ Copies sold: 10 since 1983 ☐ Cost: $10,000

THE SOFTWARE GUIDANCE CO., INC.

☐ **MSDS Track & File**
Assists in creating material safety data sheets and tracks distribution. Complies with OSHA regulations regarding hazardous communications. Maintains customer and inventory item information.
IBM XT ☐ 512 KB req. ☐ Copies sold: 12 since 1985 ☐ Cost: $1,295

SOFTWARE SYSTEMS CORP.

☐ **Cogen**
Performs thermodynamic and economic analyses of in-plant cogeneration system using back-pressure steam turbines. Determines steam properties and correlations for turbine part-load performance. Produces lifetime energy utilization and cash flow report for specified configuration.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $495

STOLZBERG RESEARCH, INC.

☐ **Chemicals Distributor**
Provides IC, dot codes, un and na numbers, superfund, sales orders, bills of lading, AR, profitability and drop shipments for chemical industry.
IBM PC, AT ☐ 48 KB req. ☐ Copies sold: 10 since 1980 ☐ Cost: $3,995

☐ **Chemicals Manufacturer/Blender**
Accesses raw chemical inventory in manufacturing of chemical formulae. Tracks inventory by lot number. Provides BOM.
IBM PC, AT ☐ 48 KB req. ☐ Copies sold: 20 since 1980 ☐ Cost: $3,995

TECHDATA

☐ **COMPRESSOR**
Calculates points on centrifugal compressor curve given rate point and defines conditions such as speed, horsepower and outlet temperature for off-design points. Self-contained subprogram finds thermodynamic and physical properties for many gases.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $200

☐ **FLARE**
Helps size flares based on API RP521. Determines tip diameter, flame length and wind deflection, steam required for smokeless burning. Calculates radiation at grade for various stack heights and radiation at various distances for fixed height stack.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $125

☐ **Gas Combustion**
Calculates heat of combustion and flame temperature for gas mixtures. Provides internal data base of common gases.
IBM PC ☐ 92 KB req. ☐ Introduced: 1986

☐ **ORIFICE**
Calculates diameters for square edge orifice plates and calculates pressure drop for given flow. Has self-contained subprogram for calculation of physical properties for many common gases and gas mixtures. Both Spink and Miller calculation methods available.
IBM PC ☐ 92 KB req. ☐ Introduced: 1984 ☐ Cost: $100

☐ **PIPEDP**
Sizes pipe by calculating pressure drop per 100 feet for liquids and gases. Includes default conditions for water and menus for pipe diameters.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **PIPEQ**
Calculates heat loss to atmosphere from insulated pipe. Any pipe diameter, thickness and thermal properties can be considered. Accounts for effects of wind and surface emissivity. Contains help screens for thermal conductivity and pipe thickness.
IBM PC, XT, AT ☐ 92 KB req. ☐ Introduced: 1983 ☐ Cost: $60

☐ **PUMP**
Lotus template for sizing piping in pumped liquid system. Calculates equivalent lengths of bends and fittings, fluid velocities and pressure loss due to friction for suction and discharge. Produces graph showing pump and system curves. Finds control valve Cv.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $70

☐ **SCIPLOT**
Accepts X-Y data and produces presentation quality graphs. Performs polynomial regression on real (containing scatter) data then plots data along regression line. Chooses linear, reciprocal or multiple cycle logarithmic axes. Adjustable scaling. Drives small HP plotters.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $80

☐ **STEAM**
Calculates pressure drop of steam through pipe, performance of multiple inlet flash tanks, required flows in desuperheaters and performance of single stage steam turbines. Internal correlation for thermodynamic properties.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $80

☐ **TANKGAGE**
Produces calibration chart showing depth vs. volume for vertical and horizontal storage tanks and for spheres. Vertical tanks may have conical bottoms. Horizontal cylinders may have hemispherical or dished heads. Several volume units are built in or user can specify special units.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $55

☐ **VARIPUMP**
Analyzes performance of centrifugal pumps operated at variable speeds. Calculates speed required to meet flow and head requirement, economics and payback period.
IBM PC ☐ 64 KB req. ☐ Introduced: 1986 ☐ Cost: $70

☐ **WATER**
Accepts basic water analysis data on dissolved impurities as ions or as CaC03 and converts to both. Calculates Langelier and Ryznar indexes, hydroxide, carbonate and bicarbonate alkalinities, electrical conductivity, total dissolved solids, total hardness, ionic balance and strength. Considers effect of temperature.
IBM PC ☐ 92 KB req. ☐ Introduced: 1985 ☐ Cost: $100

WILEY PROFESSIONAL SOFTWARE
(division of John Wiley and Sons, Inc.)

☐ **Hycarb**
Computes the thermodynamic and transport properties of 78 hydrocarbons commonly found in the petroleum and chemical industries. Allows properties to be calculated in either English or SI (metric) units. Constants and/or reference values best suited to the particular application may be entered by the user.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $265

CIVIL ENGINEERING/ ARCHITECTURE

ABACUS COMPUTER SERVICES

☐ **Hydraulics**
HYDRAU, HYDROL, TBACK and PBACK modules. HYDRAU performs full-pipe hydraulics using Manning formula. HYDROL calculates storm run-off for up to 3 recurrence levels simultaneously using Rational Formula Method. TBACK and PBACK develop backwater curves.
IBM PC ☐ 64 KB req.

ABRACADATA, LTD.

☐ **Design Your Home**
Includes architectural, landscape and interior design.
IBM PC ☐ Cost: $70-$100

ACCI BUSINESS SYSTEMS, INC.

☐ **Facility Personnel/Space Requirements**
Describes company's organizational structure down to four levels per major grouping. Handles project personnel and non-people space requirements. Details personnel and space requirements by space standard. Generates data report and adjacency report.
IBM PC ☐ 128 KB req. ☐ Copies sold: 65 since 1983 ☐ Cost: $1,500

☐ **Income Property Analysis**
Can be used by property development firms, commercial loan officers and architects to sell design service to developers. Can be used for apartment complexes, office buildings, shopping malls, hotel/motels and/or their combination. Produces 8-page pro forma.
IBM PC ☐ 64 KB req. ☐ Copies sold: 345 since 1981 ☐ Cost: $995

☐ **Preliminary Project Cost Estimate**
Costs are categorized by foundation, structure, roof system, exterior walls, partitions, interior finishes, specialists, building equipment, heat, vent, air conditioning, plumbing, electrical, special building features and site and special outside work.
IBM PC ☐ 64 KB req. ☐ Copies sold: 800 since 1981 ☐ Cost: $995

☐ **Project Management/Accounting System**
Emulates AIA Structure and ACEC Uniform Cost Accounting Structures. Entry of time sheet and expense data updates all project files, payroll, AP and GL. Produces payroll and AP checks. Reports include project progress, office earnings, project summary, time analysis, cash requirements and invoice aging.
IBM PC ☐ 256 KB req. ☐ Copies sold: 450 since 1982 ☐ Cost: $6,250

AGTEK DEVELOPMENT CO., INC.

☐ Earthwork Analysis System

Computes sitework volumes, areas and lengths. Corrects for strip, subsidence and compaction. Balances dirt. Calculates roadwork haul lengths, haul grades and import/export locations. Stores and retrieves job data and creates bid documentation.
IBM PC, XT, AT

☐ Template Engineering System

Designed for roadwork. Computes station yards, cumulative yards. Corrects for strip, subsidence, compaction. Generates mass diagrams. Draws cross sections.
IBM PC, XT, AT

ALPHANETICS

☐ Civil Engineering Pac

Includes multiple data/job files support, coordinate geometry, erase/renumber points, listing of points including bearings and from any point, transform coordinates, rotate bearings and add point by bearing, distance or intersection. Includes stadia reduction and listing coordinates of points.
IBM PC, XT, PCjr ☐ 96 KB req. ☐ Copies sold: 6,000 since 1983 ☐ Cost: $200

AMERICAN SMALL BUSINESS COMPUTERS, INC.

☐ ProDesign II

Reviewed Apr 1986 p. 194.

CAD system for drafting applications. Supports mice and digitizing pads. Includes two type fonts which can be modified, editing features, zoom and scaling. Combines two drawings into one. Saves sections or entire drawing.
IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $299

APPLIED SOFTWARE TECH, INC.

☐ Architectural Tablet Menu

Serves architects from initial design through contract document. Includes step wall editing, predefined design blocks, user accessible blocks, proportional spacing, predefined layers and standard drafting functions and drawing setups.
IBM PC ☐ Cost: $395

☐ CLAM (Computerized Level Analysis Management)

For use by hydraulics engineers in study and monitoring of fluid flow in open channels. Data transfer routines, level to flow conversion, graphic level and flow conversion, graphic level and flow charting, graphic level and flow plotting and flow averaging and compiling.
IBM PC ☐ Cost: $1,750

ARCHITECTURAL COMPUTER SOFTWARE

☐ Architect's Business Manager

Job cost/AR, hourly payroll, AP and GL. Computes client billings using time and materials, fixed fee, multiple of DPE and percent completion formats. Features report library, custom and special financial reports, comparison of actual vs. budget, elimination of multiple position and out of balance entries.
IBM PC ☐ 128 KB req. ☐ Copies sold: 120 since 1980 ☐ Cost: $2,500-$3,200

AUTO-TROL TECHNOLOGY CORP.

☐ Electrical

Designs and drafts electrical construction documents used in industrial and commercial building design. Develops power, lighting, fire and communications systems on floor plans created with Auto-trol's PLAN.
IBM PC, AT

☐ HVAC

Creates heating, ventilating and air conditioning construction documents used in industrial and commercial building design. Develops ductwork systems using dimensioned fittings built to SMACNA standards. Creates piping system for hot, chill and domestic water, gas, sprinkler, waste and vent lines.
IBM PC, AT

☐ Illustrator

Architectural rendering design system that produces 70 symbols for creating presentation renderings of plan and evaluation views. Figure manipulation capabilities enable user to create symbols.
IBM PC, AT ☐ 1,000 KB req.

☐ Layout

Commercial and industrial building architectural layout system. Works together with Auto-trol's HVAC, PLAN, ELECTRICAL and A-FRAME. Produces workstation drawings, facility layouts and BOMs.
IBM PC, AT

☐ Plan

Architectural drafting and documention system that creates floor plans, reflected ceiling plans and door and finish schedules. Provides design symbols such as doors, windows, electrical symbols and bathroom fixtures.
IBM PC, AT ☐ 1,000 KB req.

☐ Series 5000 Advanced Graphics Software for Architecture, Engineering and Construction

Provides 3D geometry, random access with inplace updating capability, user-definable units and single or double precision data representation. Drawing tools include lines, line terminators, geometric figures, irregular curves, symbol creation, display, drawing manipulation, text and text manipulation, cross-hatching, dimensioning, layering, editing and interactive feedback.
IBM PC, AT ☐ 1,000 KB req. ☐ Copies sold: 500 since 1982

AUTOMATE COMPUTER SOFTWARE

☐ Professional Manager

Includes GL, AP, AR, payroll, job cost with billing, and project management. Provides report writing capabilities. Canadian version also available. Spreadsheet and business graphics included.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 81 since 1983 ☐ Cost: $3,995-$6,995

BIOCCA ENGINEERING

☐ CECSI (Civil Engineer's Computation System I)

Version 1 requires that coordinates be plotted for each calculation. Version 2 allows coordinates to be plotted once and then stored and retrieved as needed. Functions include random traverse, subdivision, horizontal curve staking, profile grade and volume computations and triangle and curve solutions.
IBM PC ☐ 128-192 KB req. ☐ Cost: $295-$595

BRACEWELL ENGINEERING, INC.

☐ SWRMDL

Models sewer or storm system data, computes flows and capacities, sizes sewers to estimated loads, and estimates facility costs. Lotus spreadsheet templates handle data input. FORTRAN program handles flow model, system model, flow data, design, and cost estimating.
IBM PC, AT, XT ☐ 256 KB req. ☐ Copies sold: 6 since 1985 ☐ Cost: $495

BRILLIG DATA SYSTEMS, INC.

☐ PMStar - Project Management Program

Data base lists clients, projects, consulting, vendors, employee rate schedules, employees, phase codes and work codes. Invoicing formats are flexible. Allows user-defined phase and work codes. Permits customized invoices and report formats.
IBM PC ☐ 64 KB req. ☐ Copies sold: 35 since 1981 ☐ Cost: $1,490

BST CONSULTANTS, INC.

☐ Management Information System

Integrated, multi-user business system for design firms. Includes on-line update, display and report generation, multi-period processing and matrix reporting with project budgeting, automatic revenue calculation and integrated billing. Full password and file security.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 65 since 1980 ☐ Cost: $8,000 and up

CASCADE GRAPHICS SYSTEMS

☐ Associate

Builds multi-dimensional model, views it from different angles, changes its size, eliminates hidden lines, saves and prints the drawing.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 135 since 1985 ☐ Cost: $3,000

C & C ENGINEERING

☐ Earthwork

Uses average end area method to compute earthwork volumes from station and cross-section data. Input details up to 200 cross sections per job, up to 40 existing ground and up to 40 finish grade points per cross section. Disk can hold up to ten jobs with job names up to 30 characters.
IBM PC ☐ 64 KB req. ☐ Copies sold: 40 since 1983 ☐ Cost: $350-$550

☐ EARTH3

Computes earthwork volumes for station and cross section data. Input details 1,000 cross sections per job. Up to 100 existing ground and 100 final grade points per cross section. Job saved to data disk. Inputs from digitzer pad or keyboard.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 4 since 1986 ☐ Cost: $1,500

☐ Pro-Surv

Surveys use traverse-angle, bearing, azimuth, open, closed, secondary loop, screen plotted as entered. Provides horizontal curves computing parameters or points. Utilizes graphical display prompts. Computed points may be on curves. Allows for saving and loading of files and job names that may be 30 characters long.
IBM PC ☐ 192 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $875-$1,200

☐ Topo

Computes coordinates/elevations from field data, interpolates even contours and plots points to scale. Holds 5,000 points. Enters point numbers and coordinates from disk to keyboard. Computes X,Y,Z of contour points between designated points for desired intervals.
IBM PC ☐ 64 KB req. ☐ Copies sold: 8 since 1984 ☐ Cost: $325-$400

CECOMP

☐ Micro Hardy Cross

Solves networks of up to 4,000 pipes. Draws loop profiles and contour maps.
IBM PC

CIVILSOFT

(division of The Technical Group, Inc.)

☐ COGO-PC

Set of 140 commands allows calculations of tract maps, subdivisions or boundary maps. Commands include open and close, traverse balancing, rotating and translating figures, intersecting figures and defining spirals. Includes pen plotting, scaling, rotating and annotation.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $2,190

☐ COGO-80/86

Coordinate geometry program for civil engineers and land surveyors for subdivision mapping, tract maps and field surveys. Double-precision math with 15-digit accuracy. Storage capacity of 6,000 coordinate points. Produces pen and screen plots.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $890

☐ **Contour**
Combines random northing, easting, elevation or x, y, z data and point descriptions for each point and creates contour maps. Options include title, point plot, point descriptions, contours grid lines, heavy contour lines at specified intervals, defined contour intervals, user-defined scales and borders.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $1,290

☐ **Earthwk**
Calculates cut and fill for cross sections along alignments. Makes 60 centerline stations in any run each with 50 x-y coordinate pairs for describing existing or proposed profiles. Adds or deletes cross sections at any point. Expresses results in English or metric units.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $540

☐ **HEC-1**
Flood hydrograph program developed by U.S. Army Corps of Engineers. Simulates surface runoff from river basins based upon model components such as stream network, runoff characteristics, and river and reservoir routing.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $200

☐ **HEC-2**
Water surface profile program developed by U.S. Army Corps of Engineers. Calculates water surface profiles for defined channels including losses due to bridges, expansions and contractions in each channel. Analyzes sub- or supercritical flow conditions.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $200

☐ **NCH**
Hydraulics program which calculates hydraulic characteristics of natural channel with any arbitrary cross section. Solves for unknown discharge, depth or bottom slope given any 2 of 3 characteristics. Optionally displays table of stage-discharge area or table of specific energy vs. depth.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 150 since 1982 ☐ Cost: $290

☐ **Resvoir**
Routes hydrograph through reservoir using principle of conservation of mass. Accepts as input inflow hydrograph, stage-storage and stage-discharge relationships of reservoir and generates inflow hydrograph.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $290

☐ **Retwall**
Allows engineers to design and check retaining wall structures. Calculates base and stem structure. Solves for minimum base width. Accepts and defines nearly any combination of loading conditions.
IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 75 since 1984 ☐ Cost: $290

☐ **SCSHYD (Soil Conservation Service Hydrograph Program)**
Calculates discharge hydrographs for watersheds as described in SCS National Engineering Handbook Section 4. Uses peak rate factor of 484 or user-defined factor, 6 standard rainfall distributions and user-defined distributions. Outputs list of input, peak discharge, time of peak and incremental/total runoff.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 75 since 1984 ☐ Cost: $290

☐ **Sewer**
Models existing or proposed sanitary sewage collection systems. Studies entire system or portion to assist in expansion or improvement plans. Uses Manning's or Hazen-Williams coefficients. Allows for 800 reaches and 500 manholes and can label 200 manholes with 20-character descriptions.
IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $590

☐ **Sprink**
Performs hydraulic analysis of fire sprinkler systems and fire hydrant and hose reel installations. Determines water flow in and pressure drop through each pipe. Handles networks with simple end, side or center fed configurations or looped and gridded systems.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 25 since 1986 ☐ Cost: $790

☐ **Storm**
Storm drain analysis. Calculates hydraulic grade line elevations of proposed or existing systems given physical characteristics and discharge. Calculates friction, minor and junction losses. Analyzes junction flows and calculates size of storm drain laterals based on maximum flows.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 275 since 1982 ☐ Cost: $590

☐ **TR-20**
Assists engineer in hydrologic evaluation of flood events for use in analyzing water resource projects. Calculates direct runoff resulting from any synthetic or natural rainstorm. Develops flood hydrographs from runoff and routes flow through stream channels and reservoirs.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $200

☐ **Water**
Simulates city or municipality water distribution systems. Simulates networks of pipes, pumps as sources, booster pumps, pressure reducing and pressure sustaining valves and check valves. Handles up to 750 pipes/nodes. PC version can support 8087 math co-processor.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $790

CIVILWARE

☐ **Cogo w/plot**
Coordinate geometry and graphics plotting system.
IBM PC ☐ Cost: $495

☐ **Earthwork w/plot**
IBM PC ☐ Cost: $295

☐ **Field Note Reduction/Contouring w/plot**
IBM PC ☐ Cost: $495

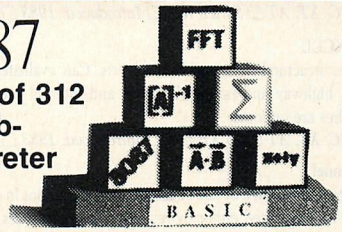
☐ **HEC-1 and HEC-2 DMS (Data Management Systems)**
IBM PC ☐ Cost: $100-$150

☐ **Hydrograph Generation/Pond Routing**
IBM PC ☐ Cost: $595

CLM/SYSTEMS, INC.

☐ **CECAD**
Single-user civil engineering, surveying, mapping system of more than 1,200 computing, graphics and data base management programs. Entry of field survey data through plotting of final construction drawings. COGO, COGO-CAD, TOPO, ROADS modules. Standalone or node in network.
IBM PC, AT, RT ☐ 640 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $4,000-$12,000

☐ **COGO (COordinate GeOmetry)**
Plots geometric points, lines, curves and chains. Data bases, command entry and automatic point/curve numbering. Double precision. Handles schedules, classifications, quantities, legal descriptions, translation/rotation, traverses and street intersections.
IBM PC, XT, AT, RT ☐ 640 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $4,000



☐ **COGO-CAD**
CAD/graphics commands and capabilities common to and accessible directly from integrated CLM modules. Interactive graphics, graphical displays, graphical input by digitizer, graphical output by plotter. Graph mode, plot mode, scale, range, plan/profile views, grids, plot code, symbols, text, dimensioning, and digitizing.
IBM PC, XT, AT, RT ☐ 640 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $2,000

☐ **Roads**
Interactive design, horizontal and vertical alignment design, roadway and cross section design, transition spirals, template specification, plan/profile and design section drawings, earthwork volumes, mass haul and earthwork analysis. Requires COGO, COGO-CAD, and TOPO.
IBM PC, XT, AT, RT ☐ 640 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $2,000

TURBO POWER FOR BASICA & QuickBASIC!
Array processing subroutines and 8087 speed
For IBM PC/XT/AT or Compatible. **$150**

Introducing VECTOR87

A building-block math library* of 312 assembly vector and matrix subroutines for the BASICA interpreter & QuickBASIC™ compiler

✓**HIGH SPEED & LOW COST**
- Native 8087 assembly code
- 20-50 fold speed increase
- Faster than compilers
- Less than 50¢ each

✓**VECTOR MATH**
- Algebra & transcendentals
- Statistics, polynomials
- Data merges, comparisons
- Histograms, logic

✓**MATRIX & ARRAY MATH**
- Inverse, transpose
- Matrix multiply
- Linear equations
- Matrix to vector map

✓**COMPLEX VARIABLES**
- Define complex vectors
- Complex algebra, trig
- Fast FFT (1024-2.5 sec)
- Over 40 subroutines

** Loads outside BASICA, requires 8087 or 80287 coprocessor and 640K memory, "CALL" from BASICA, not copy protected*

MAGIC SOFTWARE, INC.
7941 Paseo del Ocaso
La Jolla, CA 92037
To order VECTOR87 call: (619) 454-3750, VISA, MC, AE
$150 (BASICA + QuickBASIC), $130 (BASICA), add 5% CA tax

CIRCLE NO. 354 ON READERS SERVICE CARD

☐ TOPO
Creates and plots surface and terrain models, contour models and topo maps, terrain profiles and cross-sections, and digital maps and overlays. Computes volumes above, below or between surfaces, and areas of overlay zones. Requires COGO and COGO-CAD.
IBM PC, XT, AT, RT ☐ 640 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $2,000

CMDS

☐ Surveyor's Aide
Enters field notes directly into computer, which are then coordinated by the system. Uses COGO functions such as traverse, inverse, BBI, DDI, BDI, lot summary, area, rotation, translation, side shot, offset, radial stake-out or list coordinates with descriptions.
IBM PC ☐ 48 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $500

COMPUTAPIPE CORP.

☐ ArtLeaky
Calculates steady-state drawdown in leaky artesian aquifer, with fully penetrating wells without water released from storage in aquitard and constant discharge conditions. Uses Jacob's formulations. Up to nine wells. Prints results of computed drawdown in grid format. Includes contour plot.
IBM PC, XT, AT ☐ 48 KB req. ☐ Introduced: 1985 ☐ $200

☐ BFTHK
Computes thickness of flat face blind flanges. Utilizing various design stress limits and line pressures in accordance with ASME Boiler and Pressure Vessel Code.
IBM PC, XT, AT ☐ 41 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ BONDJT
Designs bonding jumpers across pipe joints for electrical continuity. Electrical resistance is directly proportional to length of conductor and is inversely proportional to area in cross-section. Generates a range of values of from 10 to 50 percent.
IBM PC, XT, AT ☐ 68 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ BOUSQ - Boussinesq's Equation
Determines live loads based upon Newmark's Integration of Boussinesq's Equation. Analyzes railroad loadings per area requirements. Tracks may be single, double or multiple. Accommodates reactions due to superimposed loads, either live or static, acting upon one or more equal rectangular areas.
IBM PC, XT, AT ☐ 58 KB req. ☐ Introduced: 1983 ☐ $100

☐ BOXCUL
Handles structural design of box culverts. Can evaluate earthloads, highway and railway liveloads and internal pressure. Haunches are optional.
IBM PC, XT, AT ☐ 93 KB req. ☐ Introduced: 1983 ☐ $250

☐ Channel
Handles profile entry by use of coordinates. Variations in depth can be accomplished either by revising end coordinates or by adding new end coordinates. Because roughness and depth may vary widely over parts of such a channel, breaking channel up into separate elements has been included.
IBM PC, XT, AT ☐ 58 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ Cones
Develops layout patterns in flat for concentric and eccentric cones. Concentric cones may be laid out by radii or by offsets, and eccentric cones by offsets only.
IBM PC, XT, AT ☐ 58 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ CRPLT - Crotch Plates
Design of crotch plates based on AWWA M11, SEC 19, NOMOGRAPH METHOD. Computes size of required plate for various thickness and finished plate weight and waste values. Referenced also to reprint from Journal AWWA 1955, design of wye branches for steel pipe.
IBM PC, XT, AT ☐ 56 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ Culvert
Analysis of 11 inlet types of concrete pipe culverts and corrugated metal pipe. Outputs pipe type and size, type of inlet, flow quantity, velocity, headwater and tailwater depths, critical and normal depths of flow, approach velocity, head loss and Manning's roughness coefficient.
IBM PC, XT, AT ☐ 40 KB req. ☐ Introduced: 1985 ☐ Cost: $200

☐ C300 Design
Designs steel cylinder reinforced concrete pressure pipe according to AWWA standard C300. Olander's bedding is used to determine moments and thrusts arising from water weight, pipe weight, soil weight and live loads. Design calculations are based on strength method of analysis.
IBM PC, XT, AT ☐ 68 KB req. ☐ Introduced: 1983 ☐ Cost: $250

☐ C301A Design
Examines steel cylinder type prestressed concrete pressure pipes also referred to as SP-5 pipe, based on the Cubic Parabola Design Method. Design curves are based on test results relating to final stress in the core. Design curves must be customized to each user's statistical test data for proper results.
IBM PC, XT, AT ☐ 75 KB req. ☐ Introduced: 1983 ☐ Cost: $150

☐ C301B Design
Examines steel cylinder type prestressed concrete pressure pipe based on Appendix B stress analysis method. Tries various allowable concrete strengths before it increments wire sizes. Using Olander bedding coefficients, program computes required coefficients for any bedding angle up to 180 degrees.
IBM PC, XT ☐ 103 KB req. ☐ Introduced: 1983 ☐ Cost: $150

☐ C302 Design
Designs AWWA C3032 noncylinder type reinforced concrete pressure pipes. Uses Olander's bedding to determine moments and thrusts arising from water weight, pipe weight, soil weight and live loads. Allows entering of special load coefficients if designer chooses not to use Olander's bedding.
IBM PC, XT, AT ☐ 93 KB req. ☐ Introduced: 1983 ☐ Cost: $200

☐ C303 Design
Handles reinforced concrete water pipe/steel cylinder type, pretensioned. Contains three options which include steel area computation, existing design analysis and cover loads and E' values computation. Permits user to select various soil coefficients and weights, and Spangler bedding coefficients.
IBM PC, XT, AT ☐ 56 KB req. ☐ Introduced: 1983 ☐ Cost: $150

☐ D Load - Steel Areas
Computes steel for elliptical cage, double circular and inner circular with outer elliptical cage for D-load type pipes.
IBM PC, XT, AT ☐ 72 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ Elbow
Evaluates fabrication dimensions for mitered elbows of various designs. Computes combined angle if horizontal and slope angles for each leg are entered. Any elbow can be designed by entering horizontal and setting slopes to zero.
IBM PC, XT, AT ☐ 71 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ EqPipe
Computes equivalent diameter for single pipe replacing system of parallel and/or series pipes. Single pipe transports same total flow rate for same head difference between connecting junctions. Up to 20 pipe units.
IBM PC, XT, AT ☐ 53 KB req. ☐ Introduced: 1985 ☐ Cost: $100

☐ FLGTHK - Flange Designs
Computes thickness of flat flanges. Uses various design stress limits and line pressure.
IBM PC, XT, AT ☐ 41 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ Gasket
Can be used to design ring gaskets used on USBR R2 type joints (Carnegie spigots) and USBR R4 concrete joints. Has an option to size groove ring for R4 type joints.
IBM PC, XT, AT ☐ 96 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ Hammer
For simple or complicated networks of up to 140 closed circular pipes. Calculates heads and flows for each time increment. Shows time history at end of transient along with maximum and minimum heads and times of occurrence. Available with arithmetic processor.
IBM PC, XT, AT ☐ 105 KB req. ☐ Cost: $275

☐ Hantush
Calculates unsteady-state drawdown in leaky artesian aquifer, with fully penetrating wells without water released from storage in aquitard and constant discharge conditions. Uses Hantush's formulations. Up to nine wells. Prints results of computed drawdown in grid format. Includes contour plot.
IBM PC, XT, AT ☐ 51 KB req. ☐ Introduced: 1985 ☐ Cost: $200

☐ HBolts - Harness Bolts Design
Stress analysis package for bolts used for harness pipe joints. Selects coarse-thread series or fine-thread series such as ASTM A-307 GRADE 1 or ASTM A-325 GRADE 5. User can enter data for any bolt desired. Computes number of bolts required.
IBM PC, XT, AT ☐ 52 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ HSulf - Hydrogen Sulfide Corrosion
Evaluates effects of hydrogen sulfide corrosion on concrete pipes. Outputs initial and final sulfide concentration of life expectancy as well as velocity, time of passage, quantity and depth of flow.
IBM PC, XT, AT ☐ 74 KB req. ☐ Introduced: 1983 ☐ Cost: $250

☐ Inflect
Computes transmissivity and storage coefficient; and leakance for leaky, isotropic, homogeneous aquifer of infinite areal extent under constant discharge conditions. Interactive prompts. Results determined by Hantush's Inflection Point Method. Outputs listing of entire input valves and computed results.
IBM PC, XT, AT ☐ 52 KB req. ☐ Introduced: 1985 ☐ Cost: $200

☐ Laypipe
Determines stalking information and laying schedules for pipelines, stations and elevations of each pipe in pipeline. Reports all elbows on project. Prints pipeline laying schedule.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $950

☐ Loads - External Loadings
Uses Marston's method to compute external trench earth loads on rigid conduits. Determines loads for various heights of cover and transition widths and loads. Calculates positive projecting earth loads on rigid conduits and transition width for each height of cover.
IBM PC, XT ☐ 60 KB req. ☐ Introduced: 1983 ☐ Cost: $125

☐ MOFI - Moment of Inertia
Determines areas, centers of gravity, moment of inertia and section moduli for irregular sections such as prestressed T-beams, L-beams and hollow core slabs. Sections may be all linear elements defined by coordinate points. Elliptical and circular elements, slots with circular elements and with circular ends are included.
IBM PC, XT, AT ☐ 58 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ M11 Pipe
Computes steel pipe wall thickness based on the ID or OD of the pipe. Prompts for minimum, maximum and increment of pressure. Allows type steel to be selected from standard menu or input of any steel to be entered and minimum yield. Computes appropriate cylinder weights and collapses pressures.
IBM PC, XT, AT ☐ 63 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ Net 55, 400, 750, 1500
Handles any type of pipe system configuration. Allows any number of storage tanks, pumps, valves, meters and fittings. Pumps are described by useful power or by inputing head-flow data. Detects and identifies user errors. Handles extended period simulations.
IBM PC, XT, AT ☐ 384 (Network 750); 640 (Network 1500) KB req. ☐ Introduced: 1983 ☐ Cost: $150-$875

☐ NETPKG
Includes NET 750, EqPipe, Hammer and Size P. Calculates transients, hydraulic pipe sizes and equivalent pipe sizes for parallel and series pipes.
IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $840

☐ **NEUPAN - Neutral Point Analysis**
Applications include study of redistribution of stresses after corrosion by Hydrogen Sulfide, study of pipes with concrete bedding to act integrally with the pipe wall and study of modified circular pipes with flat based flattened invert as proposed by Heger.
IBM PC, XT, AT ☐ 73 KB req. ☐ Introduced: 1983 ☐ Cost: $200

☐ **Offset**
Computes offset stations and equations for pipelines that are to run parallel to a survey line.
IBM PC, XT, AT ☐ 67 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **OLANDR - Olander Coefficients**
Computes coefficients using loading pattern in design of prestressed pipe and C361 pipe. For any given angle of bedding determines moments, thrusts and shears for any point on wall due to pipe weight, water weight and cover loads.
IBM PC, XT, AT ☐ 48 KB req. ☐ Introduced: 1983 ☐ Cost: $125

☐ **Outlet**
Designs outlet reinforcement per AWWA M11 Steel Pipe guidelines. Advises if run pipe or outlet is not thick enough, and notifies user of maximum pressure allowed if no reinforcement is required. Uses wrapper if necessary or advises user if crotch plate is required. Gives reinforcement collar size and weight and overall size.
IBM PC, XT, AT ☐ 53 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **Paris - Paris Coefficients**
Computes coefficients and resulting moments. Provides pipe weight, water weight, variable width vertical loadings and bedding reactions and lateral loads that are variable in width and magnitude. Output may be in coefficient form. Actual pipe sizes, wall thickness and cover loads may also be entered.
IBM PC, XT, AT ☐ 71 KB req. ☐ Introduced: 1983 ☐ Cost: $150

☐ **PCPKG**
Includes C301A-B, C303, BONDJT, HBOLTS, Loads, Size P and Thrust. Hydraulically sizes pipes, calculates external loads, performs structural design for prestressed pipe types A and B, and for pretensioned pipe. Designs bonding jumpers. Determines thrust at bends and number of bolts for harnessing.
IBM PC, XT, AT ☐ 103 KB req. ☐ Cost: $660

☐ **RCPPKG**
Hydraulically sizes pipes and calculates external loads and steel areas for various types of concrete pipe. Designs concrete joints and establishes proper gasket requirements. Includes C302, RCPULT, DLoad, NEUPAN, Gasket, Loads, REVR4, Size P, Thrust and USBRJT.
IBM PC, XT, AT ☐ 93 KB req. ☐ Cost: $820

☐ **RCPULT**
Inputs internal pressure and computes resulting area of reinforcement for RCP type of pipe such as ASTM C361 C76. Designer can use various concrete strengths, steel stress, and covers to centerline of reinforcement. Calculates compression and tension.
IBM PC, XT, AT ☐ 67 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ **REVR4**
Checking system for type R4 joint designs for concrete pipe. Modifies USBRJT with added feature of evaluating use of available tolerances based upon stretched gasket diameter. Flags designs that have poor tolerance ranges.
IBM PC, XT, AT ☐ 65 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **Size B - Hydraulics**
Sizes box culverts for full or partial flow conditions. Users can enter the required head in feet of PSI. Quantity can be entered in cubic feet per second or in millions of gallons per day. Manning's coefficient is entered from a table of commonly used values. For full flow conditions the length of the line is required. Haunch data may be included.
IBM PC, XT, AT ☐ 61 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ **Size E - Hydraulics**
Hydraulic sizing of elliptical pipe for both horizontal and vertical, full or partial flow conditions. Options try new slopes, and/or ratios and modifications to control relationships.
IBM PC, XT, AT ☐ 67 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ **Size P - Hydraulics**
Sizes circular pipes. Permits entry of required head in feet of PSI and required quantity in cubic feet per second or millions of gallons per day. Manning's coefficient can be selected from a table of commonly used values. Options try new slopes, flow and ratios and new diameters.
IBM PC, XT, AT ☐ 56 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ **Size T**
Analyzes trapezoidal and rectangular canals and channels based upon Manning's formula. To size, user enters slope and flow and cross-sectional characteristics desired. Side slope, maximum allowable depth or maximum allowable width are among options allowed. Once the canal shape and size is determined new flows may be entered.
IBM PC, XT, AT ☐ 62 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ **Span**
Calculates deflection at center of span and band radius and band deflection angle. Moment and stress in pipe wall are also computed. If pipe is cement mortar lined, size of lining crack in inches per foot is determined. Enters trial lengths for analysis.
IBM PC, XT, AT ☐ 43 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **STLPKG**
Hydraulically sizes and designs bonding jumpers, outlet reinforcement, flanges, weight coating, and fabricated elbow dimensions and reducers. Analyzes spans, thrusts at bends and harnessing bolts. Includes M11PIPE, BFTHK, BONDJT, Cones, CRPLT, Elbow, FLGTHK, HBolts, Outlet, Size P, Span, Thrust and WTCoat.
IBM PC, XT, AT ☐ 71 KB req. ☐ Cost: $600

☐ **Stress**
Designs concrete beams and slabs or walls with one-way reinforcement. Nominal axial loads are permitted. Required tensile reinforcement including size and spacing is determined. Reinforcement may be hot rolled or W-series mesh.
IBM PC, XT, AT ☐ 65 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ **Theis**
Computes unsteady-state drawdown for confined aquifer. Uses principle of superposition. Allows up to 20 wells.
IBM PC, XT, AT ☐ Cost: $200

☐ **Thrust**
Computes thrust values of pipe at turns and bulkhead types of conditions. Computes distance for each gauge of various cylinder gauges for pretensioned cylinder pipe. Stations are computed where each gauge should change due to thrust conditions. Designed for when harnessed or welded joints are required.
IBM PC, XT, AT ☐ 62 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **Twolay**
Calculates drawdown for each layer in two-layer leaky aquifer system of infinite areal extent which is penetrated by well of infinitesimal diameter and under constant discharge conditions. Uses Hantush's formulations. Prints results of computed drawdown in grid format.
IBM PC, XT, AT ☐ 49 KB req. ☐ Introduced: 1985 ☐ Cost: $200

☐ **Ultima**
Required tensile steel reinforcement, including size and spacing of steel, is determined for wall or beam of given dimensions. Reinforcement may be either W-series mesh or hot rolled rod.
IBM PC, XT, AT ☐ 65 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ **Unconf**
Computes unsteady-state drawdown by superposition, using linearized version of governing P.D.E. for unconfined aquifer. Allows up to 20 wells.
IBM PC, XT, AT ☐ Cost: $200

☐ **USBRJT - USBR Pipe Joint Designs**
Checks concrete pipe joints, including the R4 type. Revises data as initially entered and facilities investigation of new joint designs. Data is entered in sequence listed and on form required by USBR for submittal.
IBM PC, XT, AT ☐ 62 KB req. ☐ Introduced: 1983 ☐ Cost: $50

☐ **WTCoat**
Determines thickness of weight coat required on pipe to produce a selected amount of negative buoyancy in either fresh water or sea water. Users can enter any other specific gravity if desired. Determines river weights and spacing of same if desired.
IBM PC, XT, AT ☐ 44 KB req. ☐ Introduced: 1983 ☐ Cost: $50

COMPUTER AIDED PLANNING, INC.

☐ **CAP (Computer Aided Planning)**
Aids facility managers, interior designers and office furniture dealers in planning and management of contract furnishings. Generates plan drawings, elevations, specifications, reports and order forms through electronic catalog data bases. LAN and telecommunications capabilities.
IBM PC, AT ☐ 640 KB req. ☐ Copies sold: 350 since 1978 ☐ Cost: $12,500

COMPUTER SOFTWARE TECHNOLOGY

☐ **Beam Vibrations**
Analyzes beams with continuous and lumped inertias.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $95

☐ **General Column Buckling**
Defines and analyzes columns of variable sections for lowest failure loads.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $90

☐ **Perspectives, Three Points**
Views 3D bodies from perspective, rotated and scaled views.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $115

☐ **Plane Frames (Static and Vibrations)**
Computes displacements or mode shapes for joint loads or inertia.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $110-$125

☐ **Response Spectrum**
Produces spectrum table for frequency domain variable, useful for shock, vibration or RMS analysis.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $105

☐ **2-D Plane Stress/Strain Structures**
Allows for edge loads and concentrated forces for 2D stress-strain models.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $250

☐ **3-D Linear Elastic Static Structures (Beams)**
Provides structural analysis of 3D frame structures.
IBM PC ☐ 64-256 KB req. ☐ Introduced: 1983 ☐ Cost: $375-$760

CONCAP COMPUTING SYSTEMS

☐ **Civil Engineering/Land Surveying Library**
Interactive programs for civil engineer/surveyor and public works department. Features traverse geometry that interfaces with subdivision/road plotting routines, traverse adjustments, topo reductions, earthwork (site & roads) and drawing interface with AutoCAD.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1978 ☐ Cost: $1,000-$4,950

CONCEPT GROUP, INC.

☐ **Masterspec Diskette Libraries**
Contains architectural/engineering Master Specification Library Text on diskettes. Supports WordStar, Wordstar 2000, Microsoft Word, AppleWorks, AppleWriter, Macintosh Word and 3-E-Z Pieces word processors.
IBM PC, XT, AT ☐ Copies sold: 650 since 1981

CONTRAX SYSTEMS, INC.

☐ **Ultradata Series: Landscape Inventory System**
Tracks property, building, quadrant, plant type, total quantities, unit of measure and problems. Maintains original physical inventory. Updates current/new inventory. Provides file maintenance and analysis reporting. Produces data entry edit lists and inventory reports by property, plant type and problem.
IBM XT ☐ 256 KB req. ☐ Copies sold: 1 since 1985 ☐ Cost: $500

CONTROL DATA CORP.

☐ **Cybernet Express**
Engineering applications for structures, piping, power/systems, electronic design and petroleum reservoir simulation. Allows users to move among programs without interacting with the OS. Includes scratchpad, calendar, file cabinet and calculator.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $3,000-$20,000

☐ **Cybernet Express Project Manager**
Aids engineers in planning, controlling and tracking projects with up to 10,000 separate activities. Provides critical path scheduling, resource leveling, management reporting and graphics capabilities. Integrates Primavera Project Planner and Primavision plotter interface with Cybernet Express series.
IBM XT, AT, PC ☐ 512 KB req. ☐ Cost: $4,450

CREATIVE SOFTWARE SYSTEMS

☐ **PCMS (Project Control Management System)**
Multi-company financial accounting for architectural/engineering firms. Controls costs/fees/expenses by project, phase, task, department and employee. Maintains costs/billings histories. Produces invoices. Consolidated P&L. Includes project costing, AR, AP, payroll, GL, scheduling and PERT.
IBM PC ☐ Introduced: 1980 ☐ Cost: $2,500-$20,000

ROGER CREIGHTON ASSOCIATES, INC.

☐ **CAPCALC 85**
Calculates signalized and unsignalized intersection capabilities using procedures specified in 1985 Highway Capacity Manual. Displays/prints inputs, intermediate and final results in camera-ready form. Prints intersection diagrams showing lane group volumes, turning movements and number of lanes per lane group.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $845

☐ **IRAP 86 (Interactive Routing Assignment Process)**
Simulates peak or 24-hour traffic flow over complex roadway networks. Origin-destination trip table may be entered or simulated. Estimated traffic volumes are directional. Accepts up to 100 intersections for turning movement analysis.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986

DATA-BASICS, INC.

☐ **AEMAS**
Integrated job cost accounting for architects and engineers. Conforms to AIA accounting standards. Tracks information for life of project. Prints summary or detail reports. Includes job cost, AR, AP, payroll and GL modules.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 600 since 1974 ☐ Cost: $4,890

DATATRAK

☐ **TOPS**
Estimates jobs. Length and Count Probes accept any architectural or engineering scale. Divides any job into 72 phases. Calculates the effect of changes in material specifications and reflects them in bid. Conforms to traditional takeoff methods. Allows five labor conditions.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1979 ☐ Cost: $5,280

DESERT EARTH ENGINEERING

☐ **Flownet**
Uses finite element method to determine potential flow and head functions at nodes of anisotropic, nonhomogeneous, saturated porous media. Constructs flow and equipotential line contours. Requires that media be idealized into triangular elements and principal permeabilities and their orientation specified for all elements.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $150

DODSON & ASSOCIATES INC.

☐ **Box Culvert Analysis**
Analyzes pressure flow in culvert or determines type of flow in culvert.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $59

☐ **Circular Channel Analysis**
Calculates normal depth, critical depth and rating curve for flow in circular channel.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $59

☐ **Detention Basin Sizing**
Provides preliminary estimate of volume stormwater detention for particular drainage area. Calculates total runoff volume and peak rate of runoff from drainage area.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $59

☐ **Graphics HECsheet**
Produces cross-section plots of HEC-2 data. Automatic scaling. Zooms in on any part of cross-section including left or right overbank and channel.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $295

☐ **HECsheet**
Engineering data entry program for HEC-1 and HEC-2.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $195

☐ **Hydraulics Library**
Performs trapezoidal channel, circular channel, pipe culvert, and box culvert analysis and detention basin sizing.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $195

☐ **Pipe Culvert Analysis**
Calculates normal depth, critical depth and rating curve for flow in pipe culverts.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $59

☐ **Trapezoidal Channel Analysis**
Calculates normal depth, critical depth and rating curve for flow in trapezoidal channel.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $59

DYNACOMP, INC.

☐ **Heat Loss**
Calculates loss of heat through roof, walls and doors. Subtracts windows, doors and lower areas. Calculates heat loss for each room and sums up building totals. Stores and retrieves data, reviews and changes individual rooms or room elements and prints out results.
IBM PC ☐ 32 KB req. ☐ Cost: $40

☐ **Pipeline Pressure Loss**
Calculates pressure-head loss in plumbing and heating systems. Selects longest path and calculates its corresponding head loss. Operates based on user specified material such as copper, PVC or schedule-40 steel, maximum and minimum unit head loss, initial flow and number of elbows.
IBM PC ☐ 48 KB req. ☐ Cost: $40

☐ **Section Properties**
Calculates strength and stiffness properties of various structural cross sections to determine their capability to withstand axial, bending or torsional loads. Designed to solve for cross section area, location of section centroid, moment of inertia, section modules and radius of gyration.
IBM PC ☐ 24 KB req. ☐ Cost: $40-$44

ECOM ASSOCIATES, INC.

☐ **A2CE Accounting for Architects and Consulting Engineers**
Handles single entry accounting and audit trail. Provides help key and security password. Reports include job costing, invoicing, payables and financial status for any time period.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1976 ☐ Cost: $1,550-$4,500; $950 per module

ECOTOPE, INC.

☐ **Suncode PC**
Provides hourly simulation for multiple zone building. Performs thermal analysis for heating, cooling, venting loads, and air flows, between zones. Schedules variables. Models active or passive solar and convention building design. Provides graphics capabilities.
IBM PC ☐ 256 KB req. ☐ Copies sold: 12 since 1985 ☐ Cost: $650

☐ **Sunday**
Determines heating or cooling loads. Accounts for solar glazing, thermal mass, internal gains, building heat loss, and nighttime setback. Performs sensitivity studies of direct gain solar, superinsulated or conventional buildings.
IBM PC ☐ 64 KB req. ☐ Copies sold: 35 since 1984 ☐ Cost: $75-$500

ELITE SOFTWARE DEVELOPMENT, INC.

☐ **Life Cycle Economics Program**
Prepares an economic analysis using present worth method to determine lowest cost among project alternatives.
IBM PC ☐ 48 KB req. ☐ Copies sold: 895 since 1983 ☐ Cost: $295

ENGINEERING DATA SYSTEMS CORP.

☐ **Roadcalc**
Calculates centerline elevations. Computes cut and fill volumes. Draws cross-sections. Field data reduction, design template definition, and horizontal/vertical alignment selection functions. Station equation input and volume computations.
IBM PC, XT, AT, PCjr

ENGINEERING DESIGN AUTOMATION

(division of SSD, Inc.)

☐ **AutoPipe**
Interactive pipe stress analysis and design offers multi-windowing, interactive graphics and built-in property tables to analyze and review results. Link to AutoCAD provides access to drawing generation. Performs non-linear and dynamic analyses.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 40 since 1985 ☐ Cost: $5,900

ENGINEERING SERVICES

☐ **AUTOCOGO**
Provides Level I interactive COGO support for AutoCAD.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $500

☐ **COGOAID**
COGO-AutoCAD interface drafting system.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $495

☐ **CSEEP**
Confined seepage analysis. Evaluates 2D flow through porous media under confined conditions. Allows for irregularly spaced mesh intervals. Calculates potentials throughout mesh and seepage flow rates across user-specified section.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $249

☐ **Cut and Fill - AEA Method**
Performs earthwork quantity takeoffs using average-end-area method. Calculates areas of cut and fill for each station and volumes of cut and fill between stations and cumulatively. Samples up to 500 stations, each with up to 100 X-Y coordinate pairs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $219

☐ **GEOCOGO**
Geodesy COGO coordinate geometry system.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $500

☐ **GRAMP**
Groundwater recharge and mounding program. Uses Hantush's equation and numerical integration. Input consists of basin geometry, water table depth, fillable porosity, arrival rate and average horizontal permeability. Outputs table of groundwater mound tables above both water table and impermeable layer for user-specified range of time and locations.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $249

☐ **HEC-1 and HEC-2/Hard Disk**
U.S. Army Corps of Engineers developed flood hydrograph program.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $200

☐ **HYDRP**
Hydraulic rating system. Determines hydraulic performance of water control structures and channels. Rates sharp and broad crested weirs, circular, elliptical, arch and box culverts, trapezoidal and parabolic channels, risers and orifices and gates. Determines headwater elevations for each flow.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $249

☐ **HYNET**
Storm sewer/channel hydraulics system.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $269

☐ **I-CPR**
Inter-connected pond routing model. Constructs pond network configurations in any fashion with flow from and between ponds being dependent on type of outfall and headwater and tailwater conditions. Evaluates time variable tailwater conditions, submersence, flow reversal, multiple outfalls and local inflow for individual ponds.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $275

☐ **ISSAD**
Interactive storm sewer analysis and design. Calculates hydraulic grade line at each sewer network inlet. Handles circular, elliptical, arch and box sections. Considers sub- and super-critical flow regimes and open channel partially full and pressure flows.
IBM PC, XT, AT ☐ 256 KB req.

☐ **ISSAP**
Interactive slope stability analysis. Evaluates natural and man-made slopes. Uses Bishop method. Handles submergence and earthquake loading.
IBM PC, XT, AT ☐ 256 KB req.

☐ **Kentucky Pipes (900 Pipe Network Analysis)**
Simulates steady-state pressure and flow in pipe distribution systems designed to transport liquids.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $225

☐ **OVRFL-FEM**
Uses finite element method to determine stormwater runoff relationships for overland flow planes. Uses kinematic wave theory, catchment slopes and lengths, roughness coefficients and SCS curve numbers. Calculates hydrographs for multiple catchments in given run. Forms single or composite hydrographs and routes through lake/pond.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $249

☐ **PIPEVIEW - Kentucky Pipes Pre and Post Processor**
Plotting program for displaying pipe network configurations and results of analysis of pressure and flow in pipe distribution systems.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $275

☐ **RPP**
Results presentation program for Engineering Services' Kpipe and pipeview. Generates tables and plots of results of pipe network studies including time simulations and regular simulations of various conditions.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $150

☐ **SBUH (Santa Barbara Urban Hydrograph) System**
Simulates up to 200 sub-basins simultaneously. Calculates composite hydrographs. Bases rainfall on nondimensional mass curves. Uses SCS (Soil Conservation Service) curve number method for infiltration and incorporates directly connected impervious areas.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $219

☐ **SCS Unit Hydrograph System**
Calculates up to 100 hydrographs for small watersheds. Calculates rainfall excess. Obtains runoff throughout storm duration.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $249

☐ **TR-20/Hard Disk**
Performs hydrologic evaluation of flood events. Developed by U.S. Army Corps of Engineers.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $690

ENGINEERING SOFTWARE

☐ **Hydronet**
Analyzes hydraulic distribution systems for all fluids. Solves steady-state flows and head levels throughout pipe network as large as 1,250 pipes, 30 pumps and 30 fixed head conditions. Units in English or SI. Uses Hazen-Williams or Darcy-Wiesbach equations. Supports 8087 chip.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $250

ESDU INTERNATIONAL, INC.
(subsidiary of International Thomson Organization)

☐ **Strenth of Bonded Joints in Tension**
Obtains elastic shear and peel stresses in adhesive of balanced or unbalanced bonded single- or multi-step lap joint with up to six steps which may differ in lengths and thicknesses.
IBM PC, XT, AT ☐ 192 KB req.

FACILITIES MANAGEMENT SYSTEMS, INC.

☐ **SpaceTracker**
Analyzes space allocation and costs. Combines data and graphics. Forecasts future needs. Stores core data. Tracks staffing and workstations. Evaluates densities. Adds detail for each floor. Calculates square footage and generates reports.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 3 since 1982 ☐ Cost: $8,000

GALILEO SOFTWARE

☐ **HOBCW (Hydraulics of Bridge and Culvert Waterways)**
Hydraulic analysis of backwater. Based upon Bureau of Public Roads publication entitled HOBW (Hydraulics of Bridge Waterways). Analyzes circular, box and pipe arch culverts and bridges for backwater. Graphical and tabular output.
IBM PC ☐ 320 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $300-$400

☐ **Hydropak**
Six modules for hydrology/hydraulics analysis purchased as unit or individually. Performs SCS hydrograph generation, reservoir routing, open channel analysis, stream gauge statistical analysis and USGS regression equation analysis. Provides editing and graphics output to display or dot matrix printer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 35 since 1983 ☐ Cost: $500 (6 modules); $150 (per module)

☐ **Storm (Storm Sewer Design and Analysis)**
Hydraulic analysis of storm sewer networks using rational method. Up to 600 nodes and 600 pipes. Full screen input editor.
IBM PC ☐ 320 KB req. ☐ Copies sold: 10 since 1986 ☐ Cost: $150-$200

GEOCOMP CORP.

☐ **GEOFLOW**
Solves 2D steady state flow problems. Solves confined and unconfined flow problems. Plotting option plots finite element mesh and top flow line and specified equipotentials using high quality pen plotter.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $500

☐ **GEOLOG 3**
Data acquisition system designed for material properties testing. Allows continuous collection and storage of data while computer is free to do other tasks.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $3,000 and up

☐ **GEOSLOPE**
Performs analyses to determine factor of safety for slopes, fills and excavations. Search feature locates surface that gives minimum factor of safety.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $450

GEOTRANS, INC.

☐ **GR-GRAF**
Graphics post-processor for Gremlin.
IBM PC ☐ Cost: $400

☐ **SEFEDIT**
Preprocessor for SEFTRAN and SEFTRAN-PC.
IBM PC ☐ 640 KB req. ☐ Cost: $400

☐ **SEFGRAF**
Graphics post-processor for SEFTRAN-PC.
IBM PC ☐ 640 KB req. ☐ Cost: $550

☐ **SEFTRAN-PC**
Analyzes 2D fluid flow and contaminant transport problems in areal planes, vertical cross-sections or axisymmetric configurations. Handles Cartesian and cylindrical coordinates.
IBM PC ☐ 640 KB req. ☐ Cost: $1,200

☐ **SwanEdit**
Preprocessor for SwanFlow and SwanFlow-2D.
IBM PC ☐ Cost: $400

☐ **SwanFlow-2D**
Finite-difference 2D code for saturated-unsaturated water flow and nonaqueous or immiscible fluid transport. Applies to functions such as hazardous waste migration analysis, groundwater restoration, and fuel spills and leaks evaluation.
IBM PC ☐ Cost: $1,500

☐ **SwanGraf**
Graphics post-processor for SwanFlow-2D. Produces contour maps of pressure, potential, or saturation, grid diagrams, and time-series graphs.
IBM PC ☐ Cost: $550

☐ **Swift II-PC**
Finite-difference 3D code for coupled flow, heat, brine and contaminant transport.
IBM PC ☐ Cost: $2,500

GRAPHIC SYSTEMS, INC.

☐ **Space Program**
Space planning, design and facilities management. Handles space allocation of 50 elements. Exchanges graphic data files with AutoCAD. Supports data entry. Allocates spaces within vertical/horizontal building envelopes.
IBM PC ☐ Cost: $395

HEINIGER ASSOCIATES

☐ **Architects/Engineers Accounting System**
Modular Payroll, Job Costing and AP system. Interfaces to GL and word processing. Features multiple invoicing formats, departmental segregation, multi-company, customization via telecommunications, annual trial balance, federal 254/255 form filing, project management and scheduling.
IBM PC ☐ 28 KB req. ☐ Copies sold: 25 since 1977 ☐ Cost: $1,500-$4,000 per module

HOLGUIN CORP.

☐ **Civil Engineering and Surveying Solutions**
Applications include transportation projects, earthwork projects, hydraulic and hydrologic analysis, structural analysis, surveying and mapping, land development, construction control, and contour and topographical mapping.
IBM PC ☐ Copies sold: 900 since 1970 ☐ Cost: $1,500 per module

HOUSEMAN & ASSOCIATES

☐ **PC CAD**
CAD and coordinate geometry system for surveyors, civil engineers, and oil and gas concerns.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,200 since 1984 ☐ Cost: $1,450

HUFNAGEL SOFTWARE

☐ **Roomer2**
Creates rooms or floors, furnishes each room and produces perspective views with hidden line removal of each result. Produces scale drawings and area estimates of floor plans.
IBM PC ☐ 256 KB req. ☐ Cost: $295

HYDROP

☐ Storm Sewer Tabulation
Roadway design. Includes upstream analysis, pipe sizing, cost analysis, invert adjustments, oval pipe RCP or CMP, efficient grates and rational method with Manning's equation.
IBM PC ☐ Cost: $350

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Cable Data Management System
IBM no. 6317-002. Produces a color graphics layout of a building floor plan and cabling system. Calculates required cable lengths, wiring closet accessories and attaching product accessories. Generates cabling system report that shows office area origin and wiring closet destination.
IBM PC ☐ 256 KB req. ☐ Cost: $450

☐ DSL/VS (Dynamic Simulation Language/VS)
IBM no. 5798-PXJ. Suited to engineering and scientific application processing.
IBM AT/370, XT/370 ☐ Cost: $10,000

IN-SITU, INC.

☐ HJMatch
Finds best storage coefficient and transmissivity, values and leakage coefficient by matching pump test data with Hantush-Jacob (1955) type curve. If data for at least three observation wells is available, computes directional transmissivity.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $250

☐ Papadopls
Uses multi-well pump test data (one pumping well and minimum of three observation wells) to obtain mean directional transmissivity using all three-well combinations. Results can calculate directional dispersivity.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $150

☐ Plume
Calculates dispersion of contaminant in groundwater as function of time, distance and direction from contaminated area. Sources may be instantaneous or time-dependent, constant for finite time or exponentially declining. Includes effects of adsorption and conversion.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $900

☐ Tsmatch
Finds best values of storage coefficient and transmissivity by matching pump test data with well-known Theis type curve. If data for at least three observation wells is available, optionally computes directional transmissivities.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $250

☐ Vadose
Calculates fluid saturation as function of space and time for flow into unsaturated porous media. Calculations use quasi-analytical solution to 3-D Richard's equation of mass conservation. Considers leakage or drainage from several sources.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $700

☐ Water-Vel
Predicts direction and flow rate of groundwater based on piezometric measurements. Obtains hydraulic gradient with least squares fit to piezometric measurements and then groundwater velocity using Darcy's Law.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $100

☐ Wellsamp
Determines pump time required to obtain sample containing desired percentage of aquifer water. Suitable for fully penetrating confined aquifers or partially penetrating unconfined aquifers. Follows Papadopulos and Cooper, and Boulton and Streltsova methods respectively.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $250

INFOMAX CORP.

☐ A/E Marketing Manager
Marketing and proposal generation system for architectural or engineering design firms. Tracks project, personnel and client experience. Produces reports and statistics for strategic planning.
IBM PC

INTERLAKEN TECHNOLOGY CORP.

☐ Calfex
Handles engineering design, scientific calculations and analysis with equations. Produces graphics, table of results, backsolving, simple and array variables. Optional M.E. Pack 1 includes fourier series, beam analysis, helical springs, beams with end and side loads, duct flow and disk-shaft vibrations.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $200-$250

JAMES J. JORDAN, ARCHITECT-ENGINEER

☐ Diaframs
When used with Sherwall module, transfers needed information including number of floors, wall lengths and heights, and seismic shear.
IBM PC ☐ 48 KB req. ☐ Introduced: 1982 ☐ Cost: $97

☐ Retwalls
For simple cantilevered walls with single thickness. Accepts vertical dead and live loads, longitudinal loads and surcharge loads and soil weight.
IBM PC ☐ 48 KB req. ☐ Introduced: 1981 ☐ Cost: $97

JP AXE ID

☐ NAPS (Network Analyzer for Piping Systems)
Examines steady incompressible flow in single and multiple branch piping systems. Calculates pressure at selected points, flow in all branches and head loss in each component. Includes built-in library of 35 common piping system components. Prints list of system components for cost estimating.
IBM PC ☐ 128 KB req. ☐ Copies sold: 136 since 1984 ☐ Cost: $250

JUNG/BRANNEN RESEARCH & DEVELOPMENT CORP.

☐ Archibus
Utilizes Multimate, Masterspec, Power-Base and dBASE III, Lotus 1-2-3, and AutoCAD, CADPLAN and CADVANCE.
IBM XT, AT ☐ 512 KB req. ☐ Cost: $2,000

LANDCADD, INC.

☐ Irrigation Design
Performs layout, design and check calculations on irrigation system. Works with AutoCAD. Sizes/labels pipes in circuit zone. Calculates distance between nodes, flow, PSI loss and velocity for pipes. Totals entire circuit. Provides elevation adjustments and pressure checking before sizing valves.
IBM PC ☐ Cost: $395

LIBRARY OF ENGINEERING APPLICATIONS PROGRAMS, INC.

☐ SPAN
Designs and analyzes precast/prestressed concrete bridge girders. Handles longitudinal stringers, multi-beams, spread box girders and flat slabs. Includes tenth point analysis, truck lane and military load analysis by closed form solution. Draped or straight patterns with debending.
IBM PC ☐ 256 KB req. ☐ Copies sold: 46 since 1984 ☐ Cost: $2,950

MCGRAW-HILL

Cost/Information System Division

☐ Design Estimator II
Design level estimating. Includes material/labor cost data base. Enters project overheads, dimensional data and material selections. Produces building systems report with costs based on project locations zip code. Reports trade, UC1 and CS1 summary/detail. Labor/material cost overrides.
IBM PC ☐ 256 KB req. ☐ Copies sold: 450 since 1984 ☐ Cost: $845

MC2 ENGINEERING SOFTWARE

☐ Air Conditioning Group
Programs for calculating cooling/heating requirements, duct/hydraulic pipe design, heating fuel cost and life cycle cost. Available in package groups for commercial and residential air conditioning.
IBM PC ☐ 64 KB req. ☐ Copies sold: 560 since 1980 ☐ Cost: $1,745

☐ DD4M (Duct Design)
Interactive air duct design using static regain, constant velocity or equal friction methods of ASHRAE 1985. Handles 100 duct paths. Suggests suitable duct size. Total sections limited only by RAM size. Menu-driven.
IBM PC ☐ 64 KB req. ☐ Copies sold: 560 since 1980 ☐ Cost: $265

☐ HC3M (Heating Fuel Cost)
Uses ASHRAE modified degree-day method to calculate annual fuel cost for oil, gas or electronic resistance in residences or small commercial buildings. English or Metric units. Menu-driven.
IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1980 ☐ Cost: $95

☐ HP2M (Hydraulic Pipe Design)
Interactively sizes pipes for hydraulic systems without interconnected loops. Uses NFPA pressure drop equations. English or Metric units. Menu-driven.
IBM PC ☐ 64 KB req. ☐ Copies sold: 560 since 1979 ☐ Cost: $145

☐ HP3M (Hardy Cross Water System Analysis)
Performs Hardy Cross solution of water distribution systems having large numbers of interconnected loops, with common pipes between loops. Calculates hydraulically balanced flows and pressure drops in each pipe section. Auxilary routines for related hydraulic calculations. Uses NFPA equations.
IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1979 ☐ Cost: $245

☐ HP4M (Fire Sprinkler Grid System Design Program)
Grid sprinkler design system. Includes NFPA standards, shortcut inputs and FORTRAN matrix solution. Locates most remote area. Handles irregular pipe sections. Prints schematic diagram and outputs for underwriters.
IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1979 ☐ Cost: $995

☐ HP5M (Tube Bending)
Handles bend locations inputs for 3D shapes. Prints out cut length, clamp length, mandrel stop, backup, bend angle, angle between planes and bend direction. Metric or English units.
IBM PC ☐ 64 KB req. ☐ Copies sold: 160 since 1983 ☐ Cost: $995

☐ HP6M (Fire Sprinkler Tree System Design)
Designs tree fire sprinkler systems interactively using NFPA formulas. Prints standard NFPA format for presentation to underwriters. Starts at either end of system. Includes screens with help messages, windows, input checking and default values.
IBM PC ☐ 64 KB req. ☐ Copies sold: 170 since 1981 ☐ Cost: $150

☐ Hydraulic Group
Includes Fire Sprinkler Grid and Tree System Design, Hydraulic Pipe Design and Hardy Cross Water System Analysis and Tube Bending.
IBM PC ☐ 64 KB req. ☐ Copies sold: 195 since 1979 ☐ Cost: $2,310

☐ LC2M (Life Cycle Cost Analysis)
Calculates total life cycle owning cost by summing initial investment, annual fuel, power, maintenance and major overhaul costs over life of equipment, all brought back to present value at user-input discount rate. Program compatible with requirements for federal building projects.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1980 ☐ Cost: $115

☐ RL5M (Residential Manual J Heating and Cooling Load)
Residential, condominium and small commercial cooling/heating loads using ACCA Manual J, 7th Edition 1986 methods. 100 zones capacity. Includes input screens with help messages and windows.
IBM PC ☐ 64 KB req. ☐ Copies sold: 350 since 1980 ☐ Cost: $295

☐ **ST11M (Structural Out-of-Core Solution for Finite Element Analysis)**
Out-of-core solution module for ST10MB. Takes construction and solution out to disk line by line if matrices become too large within core RAM. Handles 3D plate, membrane and space frame problems. Placed on disk with ST10MB.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1980 ☐ Cost: $195

☐ **ST12M (Structural Auto Setup and Input for Finite Element Analysis)**
Designed to cut input time for Finite Element Program by factor of ten or more, when used to analyze in plane frame mode structures having 90-degree joints such as an office building. Opportunity for entry correction is offered during data entry.
IBM PC ☐ 64 KB req. ☐ Copies sold: 75 since 1980 ☐ Cost: $150

☐ **ST14M (Shear Wall Design)**
Designs reinforced concrete variable shaped shearwalls and columns by ACI 318-77 Ch. 10. Computes points for interaction curves and reverses wind. Recalculates for other steel schedules at other building levels. Interactive design.
IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1980 ☐ Cost: $295

☐ **ST15M (Steel Beam Design)**
Selects standard prismatic compact beams by AISC Manual for 33 locations, using W, M, S and HP3-36 sections. Provides optimum beam shape, deflection, lateral support spacing. Prompting and interactive. Metric or English.
IBM PC ☐ 64 KB req. ☐ Copies sold: 165 since 1980 ☐ Cost: $195

☐ **ST16M (Concrete Beam Design)**
Designs concrete beams by ACI 318-77 ultimate strength method. Outputs area of reinforcing steel, stirrup spacing, design moments and inflection points. Prompting, interactive, Metric or English.
IBM PC ☐ 64 KB req. ☐ Copies sold: 105 since 1980 ☐ Cost: $395

☐ **ST17M (Steel Column Design)**
Selects optimum steel column sections W, M, S and HP3-36 by AISC methods. Axial loads, with or without end bending moments. Provides AISC interaction results. Prompted, interactive. Metric or English units.
IBM PC ☐ 64 KB req. ☐ Copies sold: 120 since 1980 ☐ Cost: $195

☐ **ST18M (Concrete Column Design)**
Designs near-optimum reinforced concrete columns of round spiral and square tied types using Gaylord and Gaylord method. Meets ACI 1983 Concrete Design Code requirements. Runs both English and SI metric units.
IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1980 ☐ Cost: $295

☐ **ST19M (One-Way, Two-Way Concrete Slab Design)**
Designs concrete slabs under uniform applied loads, using Winter and Nilson and ACI 318-77 Direct Design Method. Computes minimum slab thickness required by codes and design moments. Runs SI metric and English units.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1980 ☐ Cost: $395

MFE ASSOCIATES

☐ **Digitworks**
Earthwork and takeoff system with digitizer input and interface to AutoCAD.
IBM PC, XT, AT

☐ **Siteworks**
Cut/fill and drainage/runoff calculations, horizontal layout and roadway design.
IBM PC, XT, AT

MICRO INFORMATION ENGINEERING CORP.

☐ **Keystone Project Management System**
For design firm's architects, engineers and interior designers. Interfaces accounting, job costing, word processing and 2D graphics design. Novell NetWare, PC-Net, Sharenet and STD Net compatible.
IBM PC ☐ 53 KB req. ☐ Copies sold: 38 since 1983 ☐ Cost: $6,000

MICRO MODE

☐ **Integrated Financial Management/General Accounting for Architects/ Engineers**
Tailored to follow AIA procedures. Entry of time sheet and expense data. Updates projects records, payroll, payables, receivables and GL. Project reports show profitability of projects and productivity of employees. Permits budgeting based on historical data. Produces aging reports and accommodates multi-company accounting.
IBM PC ☐ 256 KB req. ☐ Copies sold: 480 since 1982 ☐ Cost: $6,250

MICRO-VECTOR, INC.

☐ **Projections**
For smaller design/build companies and independent furniture dealers. Simulates the organization hierarchy of department levels, job titles, equipment and work areas. Graphics analysis reports feature bottom-line space requirements for single work areas, departments and for the entire project.
IBM PC, XT, AT

☐ **Space Management**
Searches facilities data base for space that matches any needs criteria user may define. Records actual space and personnel use, including room and floor inventories, occupancy information and area attributes.
IBM PC, XT, AT ☐ 512 KB req.

MICROCOMP ENGINEERING SOFTWARE

☐ **DYSPON (Pipe Network Dynamic Response)**
Quasi dynamic water distribution system that addresses changing demand, fire flow and reservoir elevation change effects on pipe networks. Output uses data generated by WATNET and includes two-hour interval flows, velocities and pressures over 24 hours.
IBM PC ☐ 48 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $295

☐ **WATNET (Pipe Network Analysis)**
Provides flows, velocities, pressures, and head loss on water distribution systems. Handles 100 junctions, 130-400 pipes, 25 reservoirs, 25 check/valves and pressure reduction valves and 25 pumps.
IBM PC ☐ 48 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $595

MTI SOFTWARE

(formerly DISCO-TECH, division of Morton Technologies, Inc.)

☐ **CAD**
Links Series 2000, 1000 and 800 to AutoCAD.
IBM PC ☐ 320 KB req. ☐ Copies sold: 20 since 1986 ☐ Cost: $350

☐ **Cut & Fill**
Compares existing, rough or finished grades. Provides section-by-section calculations and printout of cut or fill required. Supports total cut and total fill net cut or fill.
IBM PC ☐ 64 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $195

☐ **Disco-Specs**
Provides specifications for architect or engineer in format which develops specifications by modifying original text. Compatible with Spellbinder, WordStar, Perfect Writer, Microsoft Word, Scripsit and Super Scripsit word processing programs.
IBM PC ☐ 64 KB req. ☐ Copies sold: 900 since 1981 ☐ Cost: $195

☐ **Drainage Hydraulics**
Provides calculations relating to full-pipe or partially full-pipe hydraulics and storm drain design. Includes SD NET, Hydrol and T-Back.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $695

☐ **Pressure Hydraulics**
Includes Watnet and Dyspon. Analyzes water distribution system designs, develops solution information and provides quasi-dynamic system response for water systems over a 24-hour period.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1982 ☐ Cost: $895

☐ **Series 1000**
Civil geometric design and calculations for civil engineer. Contains Cogo, Travarea, Ptplot, Vercurve and Curve.
IBM PC ☐ 128 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $1,095

☐ **Series 2000**
Civil engineering and surveying calculations. Includes Locator, COGO, Travarea, Ptplot, Vercurve and HCS. 3D files provide 18 character alpha/numeric description of any or all points in data base. English/Metric measure units. Calculates coordinates for spiral curves, cul-de-sacs and street knuckles.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $1,795

☐ **Series 800**
For the civil engineer or surveyor. File structure is 2D and directions defined as bearings or relative angles. Handles field data reduction, coordinate geometry, mapping and plotting. Includes Finder, EDM/TOPO, Cogo, Mapcheck and Plotter.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1982 ☐ Cost: $1,295

☐ **Streets**
Calculates cut and fill volumes. Plots cross-sections of each station on pen plotter or dot matrix printer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $500

☐ **Tech Plot**
Pen plots lines and curves, drawing and labeling bearings and distances. Works with SURVEY 2000, 1000 or 800 using survey point numbers and coordinates. Plots elevations, descriptions, point numbers and coordinates in various positions. Creates curve data table as each curve is plotted. Includes AutoCAD interface.
IBM PC ☐ 128 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $1,000

O'HANLON COMPUTER SYSTEMS

☐ **Architect's & Engineer's Project Management**
Integrated general accounting and job costing system designed to monitor and budget labor and service intensive projects. Based upon standards adopted by the AIA. GL, AR, AP and Project Management.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $2,495-$2,795

THE PINKERTON/GALEWSKY PARTNERSHIP

☐ **Spec-Writer**
Specification development tool. Aids in editing, printing, and management of computer-based specification libraries. Works with MasterSpec and Spectext libraries.
IBM PC ☐ 256 KB req. ☐ Copies sold: 8 since 1980 ☐ Cost: $750

PIPING TECHNOLOGY & PRODUCTS, INC.

☐ **Computer-Aided Engineering Software**
Includes CAEPIPE for 3D piping analysis, CAEFRAME for 3D structural analysis, and CAENOZ LES to analyze nozzle penetrations in vessel heads/spherical shells.
IBM PC, XT, AT, Portable PC

PIXEL

☐ **DFP**
Calculates pressure drop and flow rate of fluids in piping systems. Includes English-like, keyword, free-field input format. All common piping components can be referenced by name. Four methods can be used to model special components. Contains expandable database files.
IBM PC ☐ 256 KB req. ☐ Cost: $295

PIZER INC.

☐ **Earth**
Computes cut and fill volumes for roadway and borrow pits. Reduces field survey data. Plots X-sections, each with up to 500 ground and templet points.
IBM PC ☐ Cost: $175

☐ **Hydra**
Storm/sanitary sewer design and analysis. Cost estimating. Sanitary, infiltration, storm and miscellaneous flows in any combination. Storm analyses by Rational Method or by Hydrographic Simulation. Analyzes pipes, odd shaped pipes, ditches, gutters, inlets, pumps, diversion structures and storage facilities.
IBM PC ☐ Cost: $495-$795

☐ **Pump**
Pump station wet well program. Simulates operation of multiple pumps, wet wells and force mains. Checks for possible cavitation problems, power consumption and number of starts per hour. Simulates up to 15 pumps simultaneously. Plots pump curves against dynamic head.
IBM PC

☐ **3D Cogo**
Coordinate geometry system. Interfaces with Lotus 1-2-3 and dBASE III.
IBM PC ☐ Cost: $95

PROTRAK

☐ **CADPAC**
Creates 3D drawings from geometrics, such as lines, circles, arcs and solid fill areas. Up to 64 layers can be utilized within a drawing with up to 256 levels of information within each layer. Displays line widths and colors in 16 pen weights.
IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 5 since 1984 ☐ Cost: $2,000

RESOURCE DYNAMICS, INC.

☐ **RDI/PC**
Features facility inventory, forecasting of personnel and equipment, affinity optimization, stack planning, and lease management. Works in mouse-driven user interface. Communicates area, symbol, and building outline information with AUTOCAD. Interfaces to CAP System.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $12,000

SEMAPHORE, INC.

☐ **SEMA 4 Professional Accounting System**
For architectural design and engineering firms. GL, AR, AP, time billing and job costing. Features invoicing and check writing formatted reports, hot-line support, financial statements, password security option, open-item AR and aged receivables.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 80 since 1984 ☐ Cost: $795

SIERRA CYBERNETICS

☐ **Coordinate Plotting**
Plots 2,000 pairs at a time with worst case to 1/60 inch. Plots descriptions and elevations. Allows range of coordinates to be specified. Identifies minimum scale that will fit on paper, larger plots may be made and pieced together. Matches marks for each page. Allows multiple copies.
IBM PC

☐ **Field Bearing Traverse**
Engineering and surveying software. Provides the capabilities of Sierra Cybernetics' Field Data Traverse allowing bearings or north azimuths.
IBM PC

☐ **Pioneer 8/16**
Includes Field Data Traverse, Field Bearing Traverse, Rotation, Coordinate Plotting, Screen Plotting, Coordinate Geometry and TOPO Plot Programs.
IBM PC

☐ **Plotter Program**
Engineering and surveying software.
IBM PC ☐ Cost: $1,200

☐ **Road Design Earthwork with Plot**
Engineering and surveying software.
IBM PC ☐ Cost: $800

☐ **Rotation Program**
Allows rotation and translation with scale factors of any range of coordinates. Rotates to a bearing or through an angle.
IBM PC

☐ **Subdivision and Borrow Pit Design**
Engineering and surveying software.
IBM PC ☐ Cost: $700

☐ **Surveying Full Version**
Engineering and surveying software.
IBM PC ☐ Cost: $900

☐ **Surveying Run Version**
Engineering and surveying software.
IBM PC ☐ Cost: $900

SIGMA DESIGN, INC.

☐ **PC Solutions**
For architects and engineers.
IBM PC

THE SOFTWARE ENGINEERING CO.

☐ **FLOWNET**
Finite element program for solving modified La Placian type differential equation governing seepage through general anisotropic, homogenous and nonhomogeneous saturated porous media at finite number of nodal points.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $300

STONER ASSOCIATES, INC.

☐ **LIQSS**
Determines the balanced steady-state head-flow relationship for liquid network systems composed of pipelines, pumps and valves. Useful in design and operation of water distribution systems, petroleum product pipelines, processed piping systems and fire sprinkler systems. Solves problems of up to 3,000 nodes.
IBM PC, AT, XT ☐ 500 KB req. ☐ Copies sold: 50 since 1971

SUN VALLEY SYSTEMS

☐ **Surveyors System**
Supports traverse with elevation, sideshots, closure, backsites, areas, traverse balance, stadia reduction, universal triangle solution, universal intersections, inverse and area from coordinates, coordinate transformation, circular curve solution, horizontal and vertical curve stakeout, cross section and borrow pit volume.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 300 since 1976 ☐ Cost: $300

SYS COMP CORP.

(an Easinet Co.)

☐ **COGO3D**
Designed for use in the computation problems involved in control surveys, highway design, right-of-way surveys, interchange design, bridge geometry, subdivision work, land surveying and construction layout. System tables can be accessed by other FORTRAN programs and can be presented in variable length with up to 9,999 geometric figures and coordinates.
IBM PC ☐ 32 KB req. ☐ Copies sold: 10 since 1976 ☐ Cost: $2,100-$3,500

☐ **COLFTGI-Column Footing Design-Axial Load Moments**
Adheres to the requirements of 1977 ACI code strength design method while considering column size. Designs any size concentric square or rectangular column footing according to axial load and biaxial applied moments for concrete pressure, steel stress pressure or soil pressure.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $200-$350

☐ **COMFTGI-Combined or Rectangular Footing Design**
Designs rectangular reinforced concrete footings that support two columns spaced a specific distance apart. Can also be used to design rectangular single column footings. Includes input and output capacity. Conforms to 1977 ACI code methods.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $375-$650

☐ **CONBGR**
Analyzes both the dead and live loads of a continuous span composite or non-composite highway bridge girder in accordance with the 1977 AASHTO specifications with 1979 interim excluding load factor design. Applies the AASHTO lane, truck and associated impact loadings for H10, H20, H15, HS15 and HS20.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $600-$1,000

☐ **CONCOL**
Designed to study reinforced concrete columns using the strength design method, to determine the minimum amount of reinforcement and its pattern for round spiral or tied columns subject to an axial load combined with uniaxial or biaxial bending. Conforms to the 1977 ACI building code.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1970 ☐ Cost: $400-$650

☐ **EARTH3**
Allows user to shift finish-grade cross-sections or templates horizontally and vertically, add a superelevation, compute the earthwork or ask system to balance the earthwork. Defines cross-sections, computes average and area earthwork volumes adjusted access or deficit of earth and generates reports.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $6,000-$7,000

☐ **FLPLT**
Studies continuous frame flat plate slab, flat slab or waffle slab of 12 spans with or without drop panels and column capitals. Uses elastic analysis. Conforms to 1977 ACI codes. Effects of vertical and lateral load moments can also be combined.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $895-$1,500

☐ **NONPBM2**
Accomplishes skip live load and dead load analysis and design for almost any shape, width or depth of beams of up to 12 spans as specified by 1977 ACI code strength design requirements.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1970 ☐ Cost: $750-$1,150

☐ **PRISBM2**
Determines complete dead and all possible skipped live load shears and moments for continuous beams of up to 12 spans with columns above and below. Loadings may be chosen and combined from any of 18 types of loading diagrams.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1970 ☐ Cost: $825-$1,350

☐ **PRSTRU/PRSTRS**
Analyzes simple-span, uniformly-loaded prestressed beams of either rectangular, single T, double T, or box shape. Design may include structural or nonstructural topping. Beams are examined at 20 points. System determines placement envelope. Conforms to 1977 ACI code.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1970 ☐ Cost: $375-$600

SYSTEK, INC.

☐ **Coordinate Geometry**
For locating points, calculating areas, distances, azimuths or bearings, traverse adjustment up to 100 sides and description of streets. Up to 400 points. Free-format input.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1981 ☐ Cost: $47

☐ **Earthwork**
Handles any number of stations with station equations and roadbed template exceptions including ditch widths and profile, slopes and shrinkage factor. Develops super elevation by rotation about centerline or median edge. Generates earthwork summaries or roadbed coordinates. Free-format input.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1982 ☐ Cost: $47

☐ **Matrix Methods**
Allows up to 900 elements. Basic matrix operations for multiplication, inversion and storage on disk.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $47

☐ **Pressure Sewer**
Up to 200 lines on tree-structured system. No loops allowed. Outputs discharge time. Sizes lines on velocity and head loss criteria. Free-format input.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $47

☐ **Quantity Estimation**
Determines volume of material, + cut or - fill, between set of original cross-sections and overlaid final set of cross-sections. Generates end areas at each station and cut, fill and cumulative volumes between stations. Checks cross-section data files for user-input errors. Virtual memory organization allows analysis of large structures.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $47

☐ **Roadway Geometry**
Horizontal alignment includes design and field notes for circular, spiralized and compound curves. Vertical alignment includes design and elevations for symmetrical and unsymmetrical parabolic curves. Free-format input. 1984 AASHTO design formulations.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1981 ☐ Cost: $47

☐ **Surveying and Land Measurements**
Reduction of differential level notes, three-wire level notes, cross-section notes and stadia notes. Polaris observation for determination of true azimuth and/or bearing. Traverse adjustment. Taping corrections.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $47

☐ **Water Distribution - Loops**
Standard Hardy-Cross technique handles approximately 1,000 pipes. Runs against a data file which may be modified for changes in demand, line size or fire flows. Calculates head losses, velocities and pressures. Free-format input.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1982 ☐ Cost: $47

☐ **Water Distribution - Nodes**
Hydraulic analysis based on Newton-Ralphson and Hazen-Williams methods. Adjusts heads to meet continuity criteria. Pressure reducers, opened and closed valves, check valves, inline booster pumps, pressure sustaining valves, constant flow valves and variable outputs. Up to 600 pipes.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $47

TARA DATA SYSTEMS, INC.

☐ **DuoCalc 2**
Works with foot and inch measurements, fractions of inches and decimal numbers. Arithmetic and trigonometric functions, squares, square roots, powers, angles/slope conversions, stair and riser design and conversion to decimal/metric equivalents.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $95

TIMBERLINE SOFTWARE CORP.

☐ **Aepex**
Modules include Architect/Engineer, GL, Payroll, AP and custom report writer. Provides detailed project costing and overall operation from time and expense entries. Rolling invoices can be designed to meet firm's particular contract needs.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $5,790

☐ **Architect/Engineer**
Component of Aepex. Performs billing and provides project information. Provides detailed costing of projects and data on overall operation from time and expense entries. Billing invoices can be designed to meet firm's particular client needs. Integrates with Medallion Collection.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 600 since 1984 ☐ Cost: $2,800

UNIVERSAL SOFTWARE APPLICATIONS, INC.

☐ **EARTH**
Calculates earthwork quantities for design of subdivisions and highway projects using average end area method. Input includes vertical curve data, original ground and rock data, proposed design section data for roadway or tract and design section data.
IBM PC ☐ Copies sold: 50 since 1980 ☐ Cost: $625

☐ **Storm**
Calculates hydraulic properties for pipe culverts, box culverts and open ditches up to 100 separate reaches. Records physical description of drainage system and area of watershed tributary to each reach of pipe and runoff factor for watershed.
IBM PC ☐ 64 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $300

☐ **UNIPROJ**
Allows 99 phases, 99 tasks and weekly, bi-weekly, bi-monthly or monthly periods. Billings summary by period, month and project-to-date, time/charge sheet summary by MTD and project to date, and summary and phase task report.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3 since 1982 ☐ Cost: $2,000

UNIVERSITY OF KENTUCKY

Civil Engineering Software Center Division

☐ **KYPipe**
Steady state/time simulations for pipe network liquid flow analysis. Hazen Williams or Darcy Weisbach head loss relations. Graphics produces network layouts and pressure or grade contours.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2,000 since 1976 ☐ Cost: $225

☐ **Pipeview**
Graphic displays of pipe network layouts and results of hydraulic analysis. Highlights pressure, velocity and losses. Plots elevation pressure or grade contours. Uses results generated by KYPipe.
IBM PC ☐ 256 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $275

☐ **Surge**
Analysis of transient pressure and flow conditions in piping systems due to valve operation, pump startup or shutdown and load changes. Surge tanks, air vessels, pressure relief valves, bypass lines and check valves. Prints and plots results. Graphics plots.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $400

VON GUNTEN ENGINEERING SOFTWARE, INC.

☐ **CONCSTAT**
Calculates, prints and charts statistics for concrete test results. Prints summary of test results. Output includes standard deviation, coefficient of variation and moving average values.
IBM PC ☐ 256 KB req. ☐ Cost: $299

☐ **CPR (Concrete Performance Reports)**
Concrete statistics system. Produces test result summaries, tracking charts, strength distribution charts and performance summaries.
IBM PC ☐ 256 KB req. ☐ Cost: $595

☐ **FSLOC**
Factor of safety location plotting utility for SB-SLOPE.
IBM PC ☐ 256 KB req.

☐ **GRN-SIZE**
Grain size distribution test calculation and drafting program. Supports mechanical and hydrometer tests. Graphics output includes up to 3 curves per page.
IBM PC ☐ 256 KB req. ☐ Cost: $399

☐ **Logdraft**
Soil test boring data management and drafting program. Drafts symbolic logs and sample test results. Soil symbols follow USCS conventions. Logs include up to 3 borings per page.
IBM PC ☐ 256 KB req. ☐ Cost: $449

☐ **PROCTOR**
Proctor test data reduction and drafting program. Follows ASTM D 698 and D 1557 procedures. Calculates optimum moisture and maximum dry density.
IBM PC ☐ 256 KB req. ☐ Cost: $349

☐ **SB-SLOPE**
Simplified Bishop slope stability analysis. Features pore pressures, free water surface, distributed loads, tension crack, and pseudo-static seismic, up to 19 soil types, graphic data checking and interactive graphics failure surface selection.
IBM PC ☐ 256 KB req. ☐ Cost: $595

☐ **TRIAX**
Triaxial test data reduction and drafting program.
IBM PC ☐ 256 KB req.

WESTERN WARES

☐ **FREHEAT**
Finds energy gains and losses, solar load ratios, BTUs needed to maintain given temperature, outside vs. inside temperature, amount of heat absorbed by mass floor or wall. Optimizes solar performance by altering key parameters and comparing daily, monthly, and end of simulation statistics.
IBM PC ☐ 60 KB req. ☐ Copies sold: 150 since 1982 ☐ Cost: $175

WILEY PROFESSIONAL SOFTWARE

(division of John Wiley and Sons, Inc.)

☐ **Cadlight I**
Evaluates natural and artificial interior lighting for architects and designers.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $595

☐ **Gasflo**
Computes the pressure loss and power consumption for a series of up to 20 sections of pipe. Facilitates pipe sizing, determines compressor power requirements and aids in the design of piping systems. Calculations can be performed in either English or SI metric units.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $185

☐ **Power Transmission I**
Consists of Routine Moment of Inertia, Drive Calculations, Shaft Properties, Shaft Stress and Belt and Chain Length/Center Distance Calculations. Printouts or inputs, calculated data and job identifiers are obtained with a single keystroke.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $125

☐ **Psychro**
Computes the properties of air-water mixtures over a wide range of temperatures and pressures in either English or SI metric unit systems.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $145

☐ **Refrig**
Calculates thermodynamic properties of eleven common refrigerants, R11, R12, R13, R14, R22, R23, R113, R114, R500, R502 and ammonia. Calculates properties of saturated vapor, saturated liquid, superheated vapor and sub-cooled liquid. Determines phase and properties.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $185

COMPUTER-AIDED DESIGN

ACCUGRAPH CORP.

☐ **multiDRAW**
2D and 3D design and drafting for mechanical and electrical engineering, manufacturing, architectural and facilities planning. Features cell manipulation, file management, keyboard interaction and dimensioning capabilities.
IBM AT ☐ 512 KB req. ☐ Copies sold: 31 since 1984 ☐ Cost: $7,000

ALGOR INTERACTIVE SYSTEMS, INC.

☐ **Superdraw**
2D and 3D CAD. Encompasses civil, architectural, and mechanical engineering, electrical/logic layouts, art work for documentation, flow charts, and slide preparation. Provides graphic data entry and editing commands. Allows development and access of a symbols or functions library.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $1,500-$8,000

APPLICON
(a Schlumberger Co.)

☐ **Interface Analysis**
Provides interference checking and clearing analysis on models created with Applicon Solids Modeling II package.
IBM PC

☐ **Mechanisms-3D**
Assists in creating, checking and viewing models of 2D and 3D rigid mechanical assemblies and subsequent analysis results.
IBM PC

☐ **Solids Modeler**
Creates 3D graphic solids models for calculating shaded images, boundary representations, hidden-line removed views and mass properties of complex parts and assemblies.
IBM PC

☐ **Surface Modeler (Editor)**
Augments capabilities of Applicon 3D Modeler by providing tools for creating and manipulating analytic and free-form surfaces. Provides techniques for creating surface.
IBM PC

☐ **3D Modeler**
Provides 3D modeling for design, drafting and drawing management.
IBM PC

APPLIED DATA SYSTEMS, INC.

☐ **UniCad**
CAD. Drawing editor and parts librarian.
IBM PC ☐ Cost: $1,395

APPLIED SOFTWARE TECH, INC.

☐ **AutoSe**
Full screen text editor for AutoCAD. Reformats paragraphs and inserts/deletes text and lines. Includes word wrap, underline, tabs, search and replace and ASCII text importing and exporting.
IBM PC ☐ Cost: $88

AT&T INFORMATION SYSTEMS

☐ **OmniDraft**
CADD.
IBM PC ☐ 512 KB req.

AUTO-TROL TECHNOLOGY CORP.

☐ **Series 7000 Solids Modeling System**
Creates and displays solid models with multiple views simultaneously. Positions view windows on drawing overlay. Performs local pan, zoom and rotate. Renders model with surfaces removed or as color-shaded image. Integrates with Series 7000 Advanced Graphics.
IBM PC

AUTODESK, INC.

☐ **AutoCAD**
Reviewed Jan 1986 p. 50.
2D, 3D-wireframe architectural, piping/landscape drawings, mechanical, electrical, chemical, structural, and civil engineering and printed-circuit design. Allows annotation, insertion, storage, brick walls and memory arrays. Stretch, trim, extend, offset, rotate, scale, divide, measure and explode. Runs micro applications on workstation driving host applications.
IBM PC, XT, AT, RT, 3270-PC, 3270-PC AT/GX, 3270-PC AT, 3270-PC AT/G, 3270-PC/GX ☐ 384 KB req. ☐ Copies sold: 58,000 since 1982 ☐ Cost: $300-$2,750

☐ **AutoCAD AEC**
Used by architects, engineers and design professionals in the building construction industry. Automates drawing tasks and schedule documentation, constructs walls from dimensions, joins walls at intersections, breaks walls to insert doors and windows, draws stairs, plumbing fixtures, appliances and structural elements.
IBM PC ☐ Cost: $1,000

☐ **AutoSHADE**
3D rendering system. Produces full color facet-shaded, smooth-shaded and global-shaded images. Controls image realism. Requires medium to hi-res display with 256 simultaneous colors and math coprocessor. Compatible with AutoCAD.
IBM PC ☐ 640 KB req.

☐ **CAD/camera 2**
Digitizes paper drawings into AutoCAD drafting system. Applies AI techniques to interpret dot patterns of raster image file produced by scanning camera. Translates interpretations into lines, polylines, solids and text/symbols representations. Edits within drafting program.
IBM PC ☐ Cost: $3,000

☐ **CADAM/AutoCAD Translator**
Allows users to work at PC-based engineering workstations that run AutoCAD, Lotus' 1-2-3 and Symphony, Ashton-Tate's dBASE III, Microsoft's Word and MicroPro's WordStar.
IBM PC, XT, AT, 3270-PC ☐ Cost: $10,000 per CADAM site; $200 per AutoCAD workstation

BENTLEY SYSTEMS, INC.

☐ **MicroStation I**
Reviews and plots 2D or 3D Intergraph design files. Performs window, pan, zoom, fit, levels and views on/off, rotated views, fast/slow text, line weights, grids and named views. Scales, rotates and clips 32 reference files. Supports monochrome and color displays.
IBM PC, AT ☐ Cost: $695

☐ **MicroStation II**
Designed for production environment. Includes MicroStation I capabilities. Places, modifies and deletes elements. Places cells. Manipulates fence contents. Handles snaps and locks. Attaches command/matrix menus. Attaches/manipulates reference file.
IBM PC, AT ☐ Cost: $2,995

☐ **PseudoTerm**
Works with PseudoStation to access Intergraph CAD/graphics data base. Attaches matrix/command menus. Allows swapping between 2 logical screens. Emulates Tektronix 4105 terminal and DEC VT100. Supports monochrome and color graphics adapters.
IBM PC, XT, AT ☐ Cost: $595

CAD COUNSEL

☐ **AUTO IGES**
Converts AutoCAD 2.1 DXF to IGES. Searches for BTEs and transfers coordinates of the point, end points, radius, and center points. BTEs include points, lines, circles, arcs, traces, solids, text, and blocks.
IBM PC ☐ 512 KB req. ☐ Copies sold: 240 since 1984 ☐ Cost: $500

CAD DESIGN SYSTEMS, INC.

☐ **ACADPLUS**
Consists of CADmenu and CADcalc.
IBM PC ☐ 512 KB req. ☐ Cost: $975

☐ **Design Board Professional**
Consists of 3D link interface to AutoCAD and AutoCAD peripheral compatibility.
IBM PC ☐ 512 KB req. ☐ Cost: $1,750

CAD, INC.

☐ **CAD-Scan**
Edits and disassembles raster images into layers including text, lines, boilerplate and dimensions. Vectorizes appropriate layers into CAD and reassembles drawing.
IBM AT ☐ 512 KB req. ☐ Copies sold: 1 since 1986 ☐ Cost: $8,000

CADGRAPH SYSTEM, INC.

☐ **CADIS**
Creates commands for line, circle, arc and point. Creates crosshatch with holes suppressed. Inserts text by height, width, angle and slant. Modifies drawings by trimming, splitting, changing, erasing, moving, mirroring and rotating. Includes horizontal, vertical, point-to-point, circular and angular dimension.
IBM PC

CADPLUS PRODUCTS CO.

☐ **CadPack**
Electrical, architectural and mechanical design.
IBM PC ☐ Cost: $750

☐ **CadPack 11-A**
HVAC, plumbing and utilities design.
IBM PC ☐ Cost: $195

☐ **CadPack 11-B**
Piping and plumbing isometrics design.
IBM PC ☐ Cost: $295

CADTRAK CORP.

☐ **Plant*Trak**
Supports retrofitted processing and power plant design functions. Stores 3D models of large plant volumes and complete ANSI piping and AISC steel catalogs. Produces error-free graphics reports such as fabrication isometric drawings. English language data base query system.
IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $15,000

THE CADWARE GROUP, LTD.

☐ **Design Graphics System/Rule Tool**
Ruled-based procedural expert graphics for CAD applications. Interactive Icon graphics. Facilitates rapid conceptual design. Flags design errors. Integrates with existing CAD systems.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $3,000 (Design Graphics System); $10,000 (Rule Tool)

☐ **DGS/Compose**
Format documentation. Merge text and graphics.
IBM PC

☐ **DGS/Extract**
Extracts design data from schematic design files. Extracts by type or property. Produces ASCII file.
IBM PC

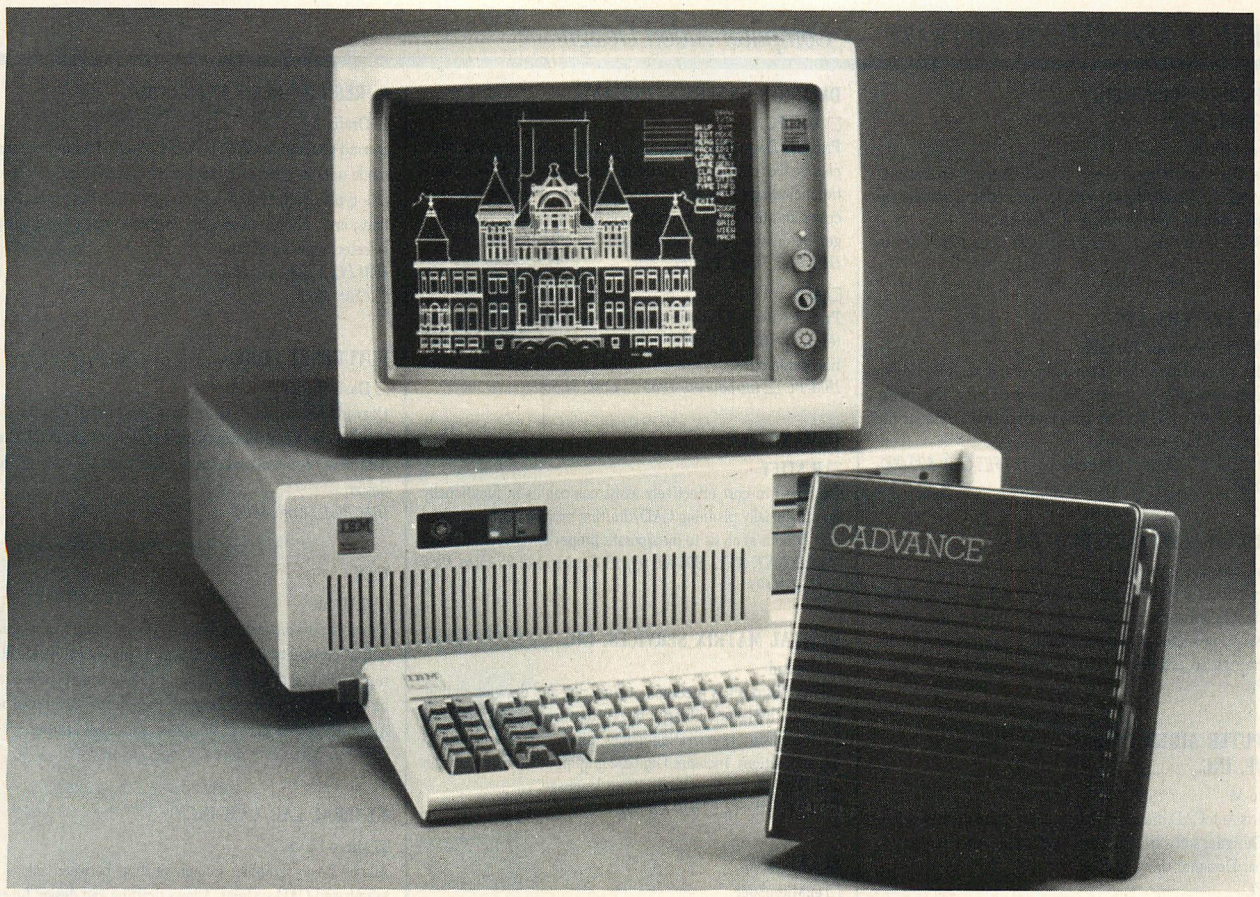
☐ **DGS/Schematic Design**
Combines rules with symbols.
IBM PC

☐ **DGS/Schematic Verify**
Verifies design completeness, accuracy and consistency.
IBM PC

☐ **DGS/Sketch**
Graphic user interface. Constructs diagrams. Control windowing and ICON movement.
IBM PC

☐ **DGS/Utilities**
File handlers, printer/plotter drivers and text editor.
IBM PC

CALCOMP
(subsidiary of Sanders Associates, Inc.)



☐ **Cadvance 25**
Conversion and transfer utility. Transfers drawings and data bases between PC-based workstations and Calcomp's System 25 CAD system. Converts Cadvance drawing into System 25 600 or 300 drawing or vice versa. Creates System 25 drawing file or Cadvance view file.
IBM AT ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $2,500

CALCOMP
Personal Systems Unit

☐ **CADDRAFT**
Includes DBMS functions. Performs cost analyses of building and floor plans. Requires mouse or digitizing tablet.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $495

☐ **CADPLAN**
Creates 2D designs for engineers, designers and architects. Optional data base extraction performs job costing analysis and automatic dimensioning.
IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $2,500

☐ **CADVANCE**
Reviewed Mar 1986 p. 87.
2D PC-based CAD system. Includes building design, floor plans, office layouts, report generation and BOM applications.
IBM AT, XT ☐ Introduced: 1985 ☐ Cost: $2,500

CADVANCE.
THE EASIEST PC CAD SYSTEM.

CADVANCE is the easiest PC-based computer aided design and drafting software on the market. The easiest to learn: an interactive menu structure lets you pick your commands without having to learn extensive routines.

The easiest to use: nested macros reduce often-used routines to a single keystroke while keeping you in the design commands. And CADVANCE's open architecture lets you develop your own tablet menus to meet your special software application needs.

All this ease, and speed, too. That means faster productivity. Both in getting you up to speed and in finishing your projects. It also means faster profits. More jobs completed in less time make your bottom line look very good.

CADVANCE features faster redraw without expensive graphics cards, co-processors or expanded memory cards. Speed and precision in a 16-bit world.

In addition, CADVANCE offers important exclusives: A 3D projections capability included in the basic 2D package price. Upgradability to a family of mid-range and high-end systems from one vendor. And CADVANCE is the only PC CAD package backed by a Fortune 500 company.

CADVANCE: The right tool for the right job at the right price.

Call 1-800-CALCOMP for the name of your nearest CADVANCE dealer. Or write CalComp, P.O. Box 3250, Anaheim, CA 92803. Dealer and end-user inquiries welcome.

CALCOMP

CIRCLE NO. 348 ON READERS SERVICE CARD

CALIFORNIA SCIENTIFIC SOFTWARE

☐ Micro-CSMP
Models time-domain response of servos, filters, chemical processes, and stress and strain forces. Designs control systems for defense, computer peripherals and robotics.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $900

CAMAX SYSTEMS, INC.

☐ CAMAND Software Package
Provides geometric modeling capabilities and analysis, design documentation and multi-axis NC programming. Networks workstations of various performance levels to share common file structures and user interfaces.
IBM AT ☐ 2,000 KB req. ☐ Introduced: 1976 ☐ Cost: $20,000-$100,000

CARR LANE MANUFACTURING CO.

☐ Tool Designer's Assistant
Library of over 6,000 2D detailed line drawings representing 5,100 tooling components such as jig and fixture bases, toggle clamps, spring-loaded positioners, clamp straps, and assemblies and fixturing accessories.
IBM PC

COMPUTER AIDED TIME SHARE, INC.

☐ Auto-M
Converts AutoCAD drawings to Computervision PC-based Personal Designer software. Converts blocks and nested blocks into Personal Designer drawing files.
IBM PC

☐ Auto-3
Converts AutoCAD drawings to Computervision mainframe-based CADDS 3 software. Converts blocks and nested blocks into CADDS 3 drawing files. Stores mainframe data base files on PC in ASCII-coded data.
IBM PC

☐ Auto-4
Converts AutoCAD drawings to Computervision mainframe-based CADDS 4 software. Converts blocks and nested blocks into CADDS 4 drawing files. Stores mainframe data base files on PC in ASCII-coded data.
IBM PC

☐ Auto-4X
Converts AutoCAD drawings to Computervision mainframe-based CADDS 4X software. Converts blocks and nested blocks into CADDS 4X drawing files. Stores mainframe data base files on PC in ASCII-coded data.
IBM PC

COMPUTERVISION CORP.

☐ Personal Designer
Provides visualization of 3D designs from any orientation. Supports drafting and complex surfaces. User can create complex design layouts, detailed drawings and shaded pictures.
IBM PC

CYBERRESEARCH, INC.

☐ CyberCAD
CAD for architectural design, mechanical, civil and electrical engineering.
IBM PC, XT, AT ☐ Cost: $8,995; lease terms available

DATAGRAPHIC SYSTEMS

☐ CAD Master 2000
Auto-dimensioning, auto-tolerancing, architectural dimensioning, curve fitting, filleting, mirror imaging and computation of volume and perimeter. Isometric grids, wall generator, line and arc editor, symbol edit, BOM, data base extractions, finite element processor and windowing. IGES data format and device independence.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 360 since 1983 ☐ Cost: $2,495

DECISION GRAPHICS, INC. (AL)

☐ ACI/PC
Provides 2-way conversion between AutoCAD drawing interchange files and Intergraph design files. Converts drawing entities including elliptical arcs, blocks/cells, layer/levels, line style, colors and text styles. Features polyline processing, control file generator, cell library handling and specification parameters.
IBM PC ☐ Cost: $3,500

☐ ACS
Provides two-way conversion between AutoCAD drawing interchange files and Intergraph ISIF files. User-defined translation parameters.
IBM PC ☐ Introduced: 1985 ☐ Cost: $1,500

DEMAND, INC.

☐ JU$TIFY
Designed to cost effectively assist companies in functionally and financially planning CAD/drafting projects. Uses standard cost benefit analysis to incorporate proper CAD-related costs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 35 since 1985 ☐ Cost: $495

DIGITAL MATRIX SERVICES, INC.

☐ Digicad
Allows PC to act as precision engineering and drawing station. Supports 99 layers, library objects, drawing tools, edit/utility functions, various operating modes, dimensioning and surveying annotations. Includes Digibase graphics data base manager and Digitran graphics applications language.
IBM PC, XT, AT ☐ 640 KB req.

ECLAT, INC.

☐ ei:MicroSpec
Develops furniture, wall covering, lighting fixtures and mechanical parts data bases. Selects and specifies products, materials and services. Manages/schedules logistics. Inserts products/materials into design drawings. Maintains product inventory. Reallocates resources. Integrates with CAD, accounting and word processing programs.
IBM PC, XT, AT ☐ Cost: $2,000

ENGINEERING SERVICES

☐ ACAD
Provides 1, 2 and 3D CAD support for AutoCAD.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $2,500

ENGINEERING SYSTEMS CORP.

☐ Design Graphix CADD
3D. Features multiple layers and pens, geometrics, user-definable symbols and figures, editing, test fonts, dimensioning, BOM and automatic training, simultaneous plotting and telecommunications. Supports Tektronix 4000 and 4100 graphics and plotters by Hewlett-Packard, Calcomp and Houston Instrument.
IBM XT, AT ☐ 640 KB req. ☐ Copies sold: 2,500 since 1980 ☐ Cost: $1,500

EXPERT-EASE SYSTEMS, INC.

☐ EASE+Tools
Engineering workstation combining graphics, data management and generators for schematics, forms and reports. Includes plotting and statistical routines. Supports complex engineering codes running on minicomputers and mainframes.
IBM PC, AT ☐ 640 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $8,000

FACTRON ELECTRONIC DESIGN AUTOMATION (EDA)

(division of Factron/Schlumberger)

☐ E.S.P (Expert Silicon Products)
CAE/CAD for VLSI design. Employs expert system and knowledge-based design technologies in custom hierarchical system. Handles chip design from concept to product test. Includes connectivity data base. Knowledge-based cell design and interactive design rule checking.
IBM PC ☐ Cost: $25,000 and up

FORESIGHT RESOURCES CORP.

☐ Drafix 1
Second generation CADD. Displays menu hierarchy and snap-mode options constantly. Includes 16 pen colors, 255 layers, 8 line types, 12 text fonts and 32 point marker types. Handles lines, arcs, circles, fillets and chamfers. Allows operations on selected drawing groups.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 1,500 since 1986 ☐ Cost: $295

FUTURENET CORP.

☐ Dash-Strides
Drawing file manager. Allows true hierarchical structured relationships between drawings, pinlists, netlists and BOM. Creates data base of schematics, netlists and parts list covering entire design.
IBM PC ☐ Cost: $800

GAV

☐ CADout
Drawing post processor giving AUTOCAD system photoplotter output capability for PCB design technologies. Builds library representation of design. Design rule checking parameters can be redefined and implemented. Includes CAD in (Gerber to AutoCAD), Photoplotter simulator, and GAV utilities.
IBM PC, XT ☐ Introduced: 1985 ☐ Cost: $500

GENERAL CAD/CAM INC.

☐ Micro-LINK
Allows 2-way graphics communication between micro- and mini-based CAD systems. Allows drafting and design functions performed on micro- to be passed to mini- and mainframe-based systems for detailing, analysis, number crunching, and interfacing to Drawing Management and Control Systems.
IBM PC ☐ Copies sold: 40 since 1986 ☐ Cost: $1,000

GENERIC SOFTWARE, INC.

☐ AutoDimension
Adds dimensions and legends to computer-generated drawings. Generates linear and angular dimensions, extension lines, leaders, labels and arrow heads.
IBM PC ☐ Cost: $50

☐ FirstCADD
Component libraries allow up to 256 components to be included on single drawing. Drawings can be transferred to GenericCADD, AutoCAD or MegaCADD.
IBM PC ☐ 256 KB req. ☐ Cost: $50

☐ Generic CADD
Draws points, straight lines, rectangles, regular polygons, circles, arcs, ellipses and curves. Accommodates 256 components per drawing. Measures length, angle and area. Performs edits, snaps, rubberbanding, rotate, rescale, plot spooling and zooms. Displays absolute, relative and polar coordinates.
IBM PC ☐ 256 KB req. ☐ Copies sold: 300 ☐ Cost: $100

GRASP, INC.

☐ PC-GRASP (General Robot Arm Simulation Program)
Allows modeling and multi-image display of 1-6 jointed robot. Includes PC-Arm PC-Hand and PC-Work. Analyzes manufacturing workcells. Evaluates and compares industrial robots.
IBM AT ☐ 512 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $2,500

HAWORTH, INC.

☐ CADvantage
Generates drawings, proposals, specifications and documents. Provides library of products and pricing, elevation and plan view images and workstation images.
IBM PC, XT, AT ☐ Cost: $12,000

Drafix 1: The experts agree

For months we've been telling you that Drafix 1 delivers incredible CAD performance for only $295.

Now someone else agrees — the experts.

"Drafix 1 features a remarkable user interface that is easy to learn and use — perhaps the best on any CAD." *–PC Magazine*

EASY TO USE. We designed Drafix 1 so anyone can reach one-to-one productivity far more quickly than with other CAD software.

The entire menu hierarchy is on display all of the time so there's no searching, backtracking or memorizing required.

Snap-mode options are continually shown on the left screen border and can be selected on the fly by mouse or single keystroke. And roll-down menus give you instant access to the virtually unlimited drawing, display and editing options.

"Drafix 1 is more than most people will ever need and costs an order of magnitude less than a full copy of AutoCAD ($2,750)." *–PC Magazine*

POWERFUL FEATURES. Feature for feature, Drafix 1 offers all the 2-D CAD capabilities of the expensive programs such as AutoCAD 2.5. In fact, many features which were recently added to AutoCAD such as multiple colors and linetypes per layer, drawing ellipses and polygons, exploding a symbol and rotating, scaling, stretching and trimming objects have always been offered in the $295 Drafix 1 package.

Drafix 1 is a breakthrough in design that organizes sophisticated CAD functions into smooth, fast, accessible operations. You don't need to write or buy macros to take advantage of Drafix 1's power.

If you have an IBM PC or compatible and a graphics card you're ready to go.

Even if you already have AutoCAD, Drafix 1 is still a smart buy because we offer "OTTO", a Drafix/AutoCAD file exchange utility. This allows you to expand your design capacity for a lot less money and take advantage of applications software providing the DXF format.

And, since Drafix 1 is not copy protected, no special hardware locking devices are required.

"Undeniably the best CAD buy in town." *–PC CADD, A Buyer's Guide*

NEW DOTPLOTTER OPTION. Drafix 1 is even a better buy with the new Drafix DotPlotter utility which eliminates the need for expensive pen plotters.

It allows you to use your dot matrix printer or laser printer for high resolution hard copy output. You can print to fit or to scale, in landscape or portrait orientation and can even print a large drawing from multiple pages.

For the cost of a copy of AutoCad, Drafix 1 with the new DotPlotter option gives you an entire workstation.

"At $295 Drafix 1 is a steal." *–Architectural Technology*

A NO-RISK, TOTAL SOLUTION. Thousands of users have tried us and agree. And you can get an even better bargain by taking advantage of our low-cost Drafix CAD-Kit with options.

Buy the Drafix 1 with mouse for just $395. Or choose the digitizer solution you need and get the entire package for as low as $595. Our Kurta Series One pads offer an integrated power supply and exceptionally small footprint with active areas ranging from 8½"x11" to 12"x12" to 12"x17".

Whatever you decide you can't lose with our 30-day money back guarantee.

Use our toll-free number and any major credit card to order your copy of Drafix 1 today.

The experts call us the "best bet for affordable CAD." All it takes is $295 to draw your own conclusions.

Order Now! Call Toll-Free!

☐ **Drafix 1**	$295
☐ **Drafix 1** plus mouse	
Logimouse C-7	$395
Mouse Systems Field Mouse	$395
Torrington Manager Mouse	$395
☐ **Drafix 1** plus Kurta digitizer	
Kurta 8½ x11 Series 1	$595
Kurta 12x12 Series 1	$795
Kurta 12x17 Series 1	$895
☐ **Drafix DotPlotter** (high resolutions graphics dot matrix printer output)	$ 45
☐ **Drafix 1 Large Plot** (D & E size plotting capability)	$150
☐ **OTTO** (AutoCAD file exchange utility)	$ 95
☐ **Symbol Libraries**	
Architectural	$ 80
Mechanical Engineering	$ 80

Check, money order, Visa & MasterCard accepted. Dealer inquiries welcome.

FORESIGHT RESOURCES CORP.™

932 Massachusetts
Lawrence, KS 66044
913/841-1121

CIRCLE NO. 274 ON READERS SERVICE CARD

HITACHI AMERICA, LTD.
Computer Sales & Service Division

☐ **GM-1000**
Creates symbols and drawings, files them for reuse or merges them into design. Moves, copies or rescales.
IBM PC, XT, AT ☐ Cost: $1,950

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **CADAM Drawing Viewing - PC/Industrial Computer**
IBM no. 5796-TBQ. Allows user to display CADAM drawing from diskette or hard disk attached to system. User may window and scale drawing as appropriate.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Cost: $750

☐ **Professional CADAM**
IBM no. 5669-193. Interactive 2.5D CAD for designers, draftsmen, engineers and other technical professionals. Creates production drawings with IBM 5080 Graphics System. Generates points, lines, circles, ellipses and splines. Shows interfacing components, subassemblies or drawing details concurrently to ensure compatibility. ANSI/ISO compliant.
IBM RT ☐ 2,000 KB req. ☐ Cost: $15,000

ICAM TECHNOLOGIES CORP.

☐ **CAM.DES**
Color or monochrome 2D CAD. Full dimensioning, scaling and layering. Keyboard and tablet input. Tektronix 4014 terminal required.
IBM PC, XT, AT ☐ 1,000 KB req. ☐ Introduced: 1985 ☐ Cost: $2,836 and up

☐ **CAM.PAC**
Full 2 1/2D CAD/CAM with IGES interface, APT output and interfaces at CL file level with CAM-POST, ICAM's Post Processor Generator. Handles design to NC tape. The APT output file may be enhanced with full 5 AXIS tool motions and sculptured surfaces by ICAM's CAM-APT-SURF.
IBM PC ☐ 1,000 KB req. ☐ Introduced: 1985 ☐ Cost: $12,250

IMSI

☐ **Designer**
Offers dimensioning, output scaling, gravity function, ellipses and elliptical arcs at any angle, and semi and quarter circle commands. Enlarges, rotates, copies, paints, zooms-in-on, undo and inputs text at any size, angle or location.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $249

JERGENS, INC.

☐ **CAD/CAM Tooling Data Base and Software Package**
Tooling and fixture design. Builds workholding fixtures using standard tooling components. Allows arranging and rearranging of components in any view.
IBM PC, AT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $1,500

☐ **FixturePro**
Computer-aided fixturing for micros. Provides 1,800 standard tooling components and 4,000 drawings.
IBM PC ☐ Cost: $1,500

KELAR CORP.

☐ **Enhancedmenu**
Customizes existing menu of AutoCAD programs for use with PROJECAD. Creates Primavera drawings.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $195

KERN INTERNATIONAL

☐ **CAD-BASIC**
Creates 2D drawings. Stores, recalls and positions drawings on screen. Generates standard shapes such as arcs and circles, applies text and dimensions, scales and rotates drawings. Includes automatic curve fitting and semi-automatic dimensioning.
IBM PC ☐ 64 KB req. ☐ Cost: $120

☐ **Engineering Software for Microcomputers**
CAE and analysis. Tutorial shows creating drawings on a micro, attaching physical properties, 3D rotation, storing, recalling, and updating. Applications programs carry out mechanism simulation, fourier analysis and optimization matrix analysis.
IBM PC ☐ 48 KB req. ☐ Cost: $22

LANDCADD, INC.

☐ **E-Z Estimate**
Estimates drawings created by AutoCAD or paper drawings. Includes unlimited pricing alternatives for projects, cost editing, writing text files, inputting text files into AutoCAD drawings, user-defined subtotal categories and data reordering/addition/deletion. User-specified supplemental factors include labor, overhead and contingencies. Two-way scrolling of output.
IBM PC ☐ 256 KB req. ☐ Cost: $395

☐ **LandCADD**
Landscape architectural applications for AutoCAD. Includes Site Planning, Landscape Design, Irrigation Design and Takeoff/Estimating. Includes symbols library of trees, shrubs, ground cover, cars, people, rocks, tables and lights. Scales, rotates, copies and moves. Compatible with AutoCAD A/E/C.
IBM PC, XT, AT, 3270-PC ☐ 640 KB req. ☐ Copies sold: 500 ☐ Cost: $395-$1,095

LOVELACE LAWRENCE & CO., INC.

☐ **Commercial Parts Expert System For Design Standardization**
Design managers require classified files of parts and materials to guide designers in use of economic choices in new design. Standardization is readily achieved and audited using classified interactive file systems.
IBM PC ☐ Copies sold: 200 since 1979 ☐ Cost: $10,000

☐ **Designfile-Design Erector Set for Expert Systems Development**
Provides all designers with total recall of all existing designs. Parts are retrieved by shape descriptions and assemblies by function. Search leads to all similar designs on file for use, reuse or reference.
IBM PC ☐ Copies sold: 75 since 1979 ☐ Cost: $15,000

☐ **Materials Data Bank For Engineering, Manufacturing and Purchasing**
On-line interactive materials databanks are necessary to provide for effective control of variety of materials in use in product design. Materials file provides data on preferred types and sizes of materials for selected applications as determined by company standards.
IBM PC ☐ Copies sold: 100 since 1979 ☐ Cost: $5,000

MANUFACTURING AND CONSULTING SERVICES, INC.

☐ **Anvil-1000MD**
2D CAD/CAM generates isometric views and cross-sections. Draws points, lines, arcs, ellipses, chamfers, free-form and offset curves. Zooms, rotates, translates, mirrors, scales, and duplicates. Horizontal, vertical, parallel, radius, diameter, angle, baseline, chained and ordinate dimensions. Drafts at 1,024 levels in 32 colors.
IBM XT, AT ☐ 640 KB req. ☐ Introduced: 1984 ☐ Cost: $2,995

☐ **Anvil-4000**
Drafting base package provides user controlled environment, basic geometry, viewing and manipulation, family of parts, file management, production planning and drafting. Integrated functions include design/drafting, drafting/base NC and 3 and 5 axis NC machining.
IBM RT

MEGA CADD, INC.

☐ **Design Board Link**
Links Mega CADD's 3D design products with most 2D drafting packages including Autocad, Versacad and Cadplan. Transfers orthographic, axonometric, isometric, perspective, sectional and exploded views, and curved surfaces with user-specified resolution, with or without hidden lines removed.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $295

☐ **Design Board Professional**
Reviewed Feb 1986 p. 88.
Conceptual/schematic 3D design. Full 360 rotation; perspective, isometric, orthographic, and walk-through views; component libraries; free-form curved surfaces; hidden-line removal; .001 inch accuracy; and scaled drawing. Produces 3D/2D drawings with line plotters. Links to 2D drafting programs including Autocad, Versacad and Cadplan.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 2,000 since 1985 ☐ Cost: $1,750

META SYSTEMS, LTD.

☐ **Structured Architect**
Integrated graphics, analysis and documentation system based on ISDOS' Integrated Encyclopedia, a unified DBMS of processes, data and relationships. Draws and edits dataflow diagrams with zoom and pan across a virtual drawing surface.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $3,500

MICRO CONCEPTS, INC.

☐ **MicroConcepts Digitizing Overlay**
Drafts/edits drawings on AutoCAD systems. Features placement of text and dimensioning on different layers, insertion of standard and user-programmed shapes and parallel lines. Uses Osnap features. Fourteen standard hatch patterns accessible from overlay. 3D drafting. Polyline features.
IBM PC ☐ 512 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $235

MICRO CONTROL SYSTEMS

☐ **Advanced Space Graphics**
Designs, digitizes, transforms and dimensions complex, irregularly shaped objects in 3D. Connects x, y, and z points of wireframe drawing. Scaling, rotating and moving. Includes three simultaneous views and output to plotter or printer.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,500 since 1982 ☐ Cost: $1,495 and up

☐ **CADKEY**
Reviewed Jun 1986 p. 80.
Integrated 2D/3D CADD system for mechanical design drafting and front-end for NC and finite element analysis. Includes bidirectional IGES translator and 3D cubic parametric splines. Supports most digitizers and plotters.
IBM PC ☐ 512 KB req. ☐ Copies sold: 9,000 since 1984 ☐ Cost: $2,695

☐ **Space Tablet/Advance Space Graphics**
3D data acquisition and manipulation. Moves, points and modifies for specific applications. Arm indicates point of interest within drawing and physically pulls it and all connecting lines to location in 3 spaces.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,500 since 1982 ☐ Cost: $995-$1,495

MICRO DESIGN AUTOMATION, INC.

☐ **Ski Cap**
Schematic capture/netlist extraction for AutoCAD2 users. Schematic editor subsystem contains custom menus and script files that place and connect component symbols from symbol libraries. Optional menu tables available. Builds multiple page schematic diagrams. Netlist generation utility and linkage editor and postprocessor.
IBM PC ☐ 640 KB req. ☐ Copies sold: 2 since 1986 ☐ Cost: $1,500

MICRO-VECTOR, INC.

☐ **CADRover**
Finds and retrieves stored images from diverse picture sources. Organizes and controls drawings within visual data base environment. Features graphics translater which integrates CAD file formats and application tools.
IBM PC ☐ Cost: $495

MICROCAD, LTD.

☐ M.CAD/ME

3D CAD/CAM system for design and manufacturing in mechanical engineering and architecture. Full modeling with surface capabilities, data base management, drafting, 2-,3-,5- axis NC machining and solids modeling.

IBM AT ☐ 640 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $5,000

MICROCOMPUTER GRAPHICS, INC.

☐ CADD

Designed for symbolic schematic drafting and 2D to scale mechanical and architectural drawings. Supports mouse and keyboard for cursor movement and symbol placement or coordinate location. Infinite scroll and zoom in all directions. Auto-scroll and auto-zoom feature.

IBM PC, AT ☐ 384 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $895

MICROGRAFX, INC.

☐ PC CAD and Windowing

Produces drawings and designs. Includes windowing and multitasking capabilities for editing multiple documents or for drawing while printing hard copies. Standalone or integrates with Microsoft's Windows, Microsoft's Mouse is optional. Keyboard, light pen and joystick are available.

IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $495

NATIONAL SEMICONDUCTOR CORP.

☐ PLAN (Programmable Logic Analysis by National)

Tools for programmable logic designs. Enhancement for systems with National Semiconductor and Monolithic Memories, Inc. Programmable Array Logic (PAL) devices.

IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $195

NORTH CAROLINA STATE UNIVERSITY RESEARCH CORP.

☐ CAD-PAC2

Design, analysis and drafting system. Displays explicit instructions, explains function syntax and prompts user's response. Applicable to mechanical analysis, manufacturing floor review, mainframe interface and archival and vendor design exchange.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $2,400

☐ CAD-REVU

Read-only module for CAD-PAC2. Uses CPTR (CAD-PAC2 Transfer Routine) to bring drawings from mainframe to PC for viewing, analysis or plotting.

IBM PC, XT, AT

PELTON ENGINEERING, LTD.

☐ ECAD Drafting Software

Data entry supported by keyboard, digitizer and mouse. Lines, circles, arcs, ellipses, curves, hatching and fill, BOM, data base links, drawing interchange files, panning, zoom, dimensioning, component libraries, arrays, file directory, plotting, calculations, and move and copy.

IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1984 ☐ Cost: $489

PENCEPT, INC.

☐ Pencad

CAD/CAM interface. Runs AutoDesk's AutoCAD on the Penpad 320 tablet. One input device combines text and graphics functions. Invokes series of commands for each handprinted letter on tablet. Enters text onto tablet without moving to keyboard.

IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $195

PERSOFT, INC. (WI)

☐ SmarTerm 4014

Uses PC as graphic terminal to connect to CAD/CAM mainframe graphics packages such as SAS/Graph, Tellagraph, RS/1, Disspla and Plot-10. Emulates Tektronic 4010, 4012 or 4014 graphics terminal, or DEC VT100, VT102 or VT52 intelligent text terminal.

IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 627 since 1985 ☐ Cost: $225

QDP COMPUTER SYSTEMS, INC.

☐ Quickcad

Configures/designs shape library for architectural, mechanical drafting and interior designs. Circuit board design shape library available. Allows high-speed drawings on large monitors utilizing QDP's Viva 1024 X 1024 hi-res gold card.

IBM PC ☐ 512 KB req. ☐ Copies sold: 25 since 1986 ☐ Cost: $995

RCT DESIGN

☐ Cadalog Image Filer

Provides DBMS functions for storage, retrieval, and documentation of drawing elements created using CAD methods. Interfaces with AutoDesk's AutoCAD.

IBM PC ☐ 128 KB req. ☐ Cost: $300

RENISHAW-MAE

☐ MAECAD

Interactive 2D drafting, 3D wireframe and solids modeling. Optional parameters design module.

IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 250 since 1981 ☐ Cost: $5,000-$10,000

ROBO SYSTEMS CORP.

☐ CAD-PC

High speed, icon-based CAD program. Features rubberbanding of all drawing elements, smooth dragging of symbols, fillets of lines and arcs, tangents from circle to point and circle to another circle, cross-hatching and partial erase of all elements. Measures lines, circles and arcs on display as they are drawn.

IBM PC ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $1,495

ROSAL SYSTEMS, LTD.

☐ Field Based Design System

CAD. Performs road and canal designs. Generates multiple horizontal and vertical alignments which can be displayed with stationing on AUTOCAD. Generates cut and fill volumes. Produces final cross-section and plan profile drawings.

IBM PC ☐ 640 KB req.

SUN-FLEX CO., INC.

☐ Bill of Materials Reporting System

Allows AutoCAD 2 users to turn drawings into project management reports, based on parts information stored in BOM Report System. Reports include job cost, materials requirement and bid estimation. Reports are based on AutoCAD attribute extraction file.

IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $500

TECHNICAL SOFTWARE, INC.

☐ AUTOWORD

Integrates Autodesk's AutoCAD, with word processors to text in drawing. Supports automatic drawing schedule generation, superscripts and subscripts.

IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $100

TERAK CORP.

☐ Micro Minn-Draft

3D data base. Digitizer. Drafting features include overlay layers, dimensioning, zoom, and project, translate, rotate, and copy operators. Provides hi-res of 640 x 480 x 2 monochrome or 640 x 480 x 6 color.

IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $2,995

TEXAS INSTRUMENTS

☐ AE/CADD

Set of template-driven drafting commands for use in conjunction with Autodesk's AutoCAD. Template contains various symbols and objects commonly used by architect. Decrease time designer spends drawing and re-drawing architectural renderings.

IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $1,000

T & W SYSTEMS, INC.

☐ EasyCAD

Includes full-precision floating point data base. Features associative dimensioning, object grouping ability, drag function and connect feature that combines move, scale and rotate. Editing, curve and infinite zoom capabilities. Allows file interchange with VersaCAD and AutoCAD.

IBM PC, XT, AT

☐ VersaCAD - Entry Level

Graphics input devices range from joystick to graphics tablet. Designer aids included. Auto-dimensioning, zoom, scaling and snap-to.

IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 2,100 since 1984 ☐ Cost: $495

☐ VersaCAD-Advanced

Manipulates collections of objects as a group. Moves, rotates, copies, scales, mirrors images at any angle. Calculates center of gravity, moment of inertia, perimeter, area and component dimensions. Polygons, ellipses, free-form (Bezier) curves and points. Update function.

IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 4,000 since 1985 ☐ Cost: $1,995

☐ VersaDATA

Relational data base integrated with VersaCAD Advanced. Allows 2-way interaction between data base and drawings on graphics screen. User-created single-page form layouts. Creates data base masks to act as templates. User-formatted reports.

IBM PC

UNIRAS, INC.

☐ RASPAK-CAD

Solids modeling system. Transforms 3D designs into solid color models with smooth shading and artificial light source. Produces 3D graphics with hidden surface removal and light shading.

IBM RT, AT

UNIVERSAL INTERGRAPHIX CORP.

☐ 3-D GRAPHIXX

Full function 3D design and production drafting system with colors defined by line, geometrics, line/plane intersections, figures, notations, perspectives, real-time animation, round-off/snap to, scaling, fillets, splines, crosshatching, pan and zoom, windows, 256 layers, auto-dimensioning, and text import/export.

IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 835 since 1984 ☐ Cost: $3,995

VECTRIX CORP.

☐ Quickzoom

Works with AutoCAD. Accesses hardware pan and zoom features of Pepe Graphics Board without exiting AutoCAD.

IBM PC, XT, AT

VIRGINIA TEK, INC.

☐ Autorout 20

Router/programming system.

IBM PC ☐ 64 KB req. ☐ Copies sold: 16 since 1981 ☐ Cost: $10,000

VISUAL NUMERICS, INC.

☐ AutoLIB

Block manager and librarian for AutoCAD. Supports multiple libraries. Drawing library file includes 1,500 elements, each with 360-character description and WordStar-like editor. Draws borders, labels and tables. Summary files list descriptions, block names, linetypes, layers, styles and shape files.

IBM PC, XT, AT ☐ Cost: $149

WEST COAST CONSULTANTS

☐ Curve Digitizer
Creates, edits, and plots 2D drawings using computer's numeric keypad and/or sequential data files. Digitizes X, Y coordinates from any diagram placed on plot bed. Drawings and symbols dynamically positioned with keypad controlled cursor. Thirty-three manipulative edit modes.
IBM PC ☐ 256 KB req. ☐ Cost: $400

☐ Curve Perspective
Displays arrangement of objects in orthographic or perspective projection from any point in space. User can describe complex geometries by using interconnecting line segments, planes, arcs, circles, cones and cylinders. Translates, rotates and scales.
IBM PC, XT, AT ☐ 48 KB req. ☐ Cost: $450-$650

YOURDON CORP.

☐ Analyst Toolkit
Provides dataflow, entity relationship and state transition diagrams and free-form graphics. Includes data dictionary, diagram extraction facility, data base manager, error checking and compose facility for combining text and graphics.
IBM, PC, XT, AT

ELECTRONIC MAIL

ACTION TECHNOLOGIES, INC.

☐ Coordinator
Electronic mail system.
IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 2,200 since 1985 ☐ Cost: $695

APPLIED DATA RESEARCH, INC.

(an Ameritech Co.)

☐ PCeMail
Interfaces Datacom DB, Empire and ETC for document distribution. Acts as a pipeline to move information from PCs to mainframe network for distribution.
IBM PC, 3270-PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $195

APPLIED MICROS, INC.

☐ SYMON
Electronic help desk provides on-line data processing system status. Displays messages to users up to 150 feet away via LED display. PC acts as message controller to enter, store and distribute messages.
IBM PC ☐ 512 KB req. ☐ Copies sold: 800 since 1985 ☐ Cost: $1,295 per display

BEAMAN PORTER, INC.

☐ PowerNet
Designed for use with PowerText word processing. Provides unattended electronic mail and terminal operation. Implemented only for Hayes Smartmodem boards and external Smartmodems.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $200

CAPPCOMM SOFTWARE, INC.

☐ MAIL CALL
Enables PCs to send and receive telexes and electronic mail. Incorporates word processors to create messages off-line. Designated for either Western Union's EasyLink, MCI Mail, AT&T Mail or ITT TIMETRAN. Features archive organization and control, itemized batch transmission, message tracking and ability to dial into systems.
IBM PC ☐ 128 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $150

COMMNET SYSTEMS

☐ FoReM PC
Bulletin board system with message editor. Checks for messages to or from user. Reads flagged or marked messages. Email distribution lists. Supports multiple data bases. Supports Xmodem, Amodem Kermit and Kermit batch files. Includes 255 access levels.
IBM PC ☐ 384 KB req. ☐ Cost: $100

COMPUTER TECHNOLOGY ASSOCIATES, INC. (CTA)

☐ Teamwork
Mailbox maintenance, address lookup, scheduling of delivery, acknowledgement and reply tracking, and logging incoming and outgoing mail. Retrieves large documents, graphics, spreadsheets and data bases. Password protection. Unattended operation. User directory. Library of customized forms. LAN configurable.
IBM PC, XT, AT, 3270-PC

CROSS INFORMATION CO.

☐ Cross/Point
Electronic mail system with computer teleconferencing, computer conferencing or thought processing. Includes bulletin board, on-line messaging and windowing.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $50

CYGNET TECHNOLOGIES, INC.

☐ Get
Accesses 7 mail services to check for messages without interupting work-in-progress. Checks for mail at user-selected interval.
IBM PC ☐ Cost: $90

DIGISOFT COMPUTERS, INC.

☐ Mail-COM
Accesses MCI Mail system and sends mail from computer. Sends programs, Lotus spreadsheets or other files with error checking. Scrambles confidential mail. Includes built-in word processor. Reads WordStar letters.
IBM XT ☐ 64 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $190

GENERAL ELECTRIC INFORMATION SERVICES CO. (GEISCO)

(subsidiary of General Electric Co.)

☐ PC Mailbox
Accesses GE Information Service's QUIK-COMM global electronic mailbox service. Creates, stores and organizes messages off-line. Operates unattended. Serves as terminal for on-line access to data base.
IBM PC ☐ Cost: $189

HEWLETT-PACKARD CO.

☐ Message for the IBM PC
Electronic mail system. Communicates with HP Desk Manager on HP 3000. Document conversions for integration of PC and HP 3000 word processing.
IBM PC ☐ Cost: $300

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Personal Communications Manager
Reviewed Aug 1984 p. 155.
IBM no. 6024-100. Includes electronic mail over standard telephone lines, terminal emulation with functions to access information services and edit file facility to create or edit mail. Sends and receives letters, memos and such DOS-based files as spreadsheets, charts and graphs.
IBM PC, XT, PCjr ☐ Cost: $100

☐ RT PC INmail/INnet File Transfer Program
IBM no. 5669-053. Provides queued transfer of files and interactive engineering of commands to be executed on remote systems. Sends mail to one or more users and one or more mailing lists. Forwards mail. Sends messages interactively. Appends messages to secondary mailboxes. Exchanges mail on separate but interconnected systems.
IBM RT PC ☐ Cost: $625

INSTANT INFORMATION, INC.

☐ Instantcom AR
Allows background communications. Provides message sending, receiving or dial-out to mailbox while running foreground applications. Prints and archives on-line sessions. PC buffering provides session scan, print and write-to-disk functions. Keyboard toggling to background/foreground.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $69

☐ Instantcom ESL
Accesses Western Union's Easylink. Offers error checking and data compaction. Auto-dial and auto-log on to Easylink. Formats messages. Prints and archives on-line sessions. Built-in word processor or imports other word processing files. Includes general communications module.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $120

INTERACTIVE SYSTEMS CORP. (CA)

☐ INmail
User can reply to/forward/print messages and review past correspondence. Moves messages between primary and supplemental mailboxes. Includes subject, sender, recipient ID and date in messages.
IBM RT, AT/AIX, PC/IX

☐ INnet
Provides queued transfer of electronic messages/files. Includes message manipulation features of Interactive's INmail. Includes remote-copy, remote-mail and remote-print facilities. Supports dedicated/dial-up, sync/async connections. X.25 packet switching protocol support available.
IBM RT, AT/AIX, PC/IX

INTERMATION CORP.

☐ Electronic Mail
Electronic mail system compatible with CT*OS. Management communications system includes directory of users, log of communications, acknowledge and nudge capability. Transfers any file on system. Creates and reads messages with word processor.
IBM PC ☐ 30 KB req. ☐ Copies sold: 2,500 since 1982 ☐ Cost: $20,000

MARTIN MARIETTA DATA SYSTEMS

(operating company of Martin Marietta Corp.)

☐ MailIT
Document conversion and transfer program that facilitates electronic mail and other office automation tasks for companies with IBM mainframe electronic mail systems. Translates documents prepared using PC-based word processors such as WritIT or MultiMate into IBM mainframe format.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 800 since 1985 ☐ Cost: $300

MCI COMMUNICATIONS CORP.

☐ Mail Access
Connects user to MCI Mail. Sends text files created by work processing. Spreadsheets and DBMS. Features data encryption. Learn feature accommodates log-on and retrieval sequences.
IBM PC ☐ 128 KB req. ☐ Cost: $50

MCTEL, INC.

☐ Electronic Envelope
Formats binary data to make it appear to electronic mail systems as ASCII text. Exchanges spreadsheets with workers in different locations for collaboration on budget forecasts, financial reports, and what-if analyses.
IBM PC ☐ 32 KB req. ☐ Copies sold: 2,700 since 1985 ☐ Cost: $50

MICRO-SYSTEMS SOFTWARE, INC.

☐ BBS-PC
Electronic bulletin-board. Supports electronic mail, binary or ASCII file transfers. Includes message reformatting to caller's terminal, permanent user records, and message transfer system that creates files accessible only by addressee or sysop. Supports message threading. DOS gateway.
IBM PC ☐ 256 KB req. ☐ Cost: $249

MICROPRO INTERNATIONAL CORP.

☐ TelMerge

Electronic mail service. Integrates telecommunication into WordStar environment, Mail services include EasyLink, MCI Mail, Ontyme Messaging Service, TELEXTRA and TIME-TRAN. Speaks with such executive information services as CompuServe, Dow Jones News/Retrieval, Official Airline Guides Electronic Edition and The Source.

IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $145

MODEM CONTROLS, INC.

(division of Generation 3, Inc.)

☐ Channel One

Recognizes modem type and incoming baud rate, analyzes active communications ports and provides hang-up recovery. Includes electronic copying and user-defined mailing lists. Transfers data, program and spreadsheet files without need for conversion. Provides 9 security levels.

IBM PC, XT ☐ 320 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $495

NBI, INC.

☐ Oasys Mail

Attaches five documents to each message. Three levels of security. Accesses messages by providing recipient's name or initials. Sends messages to individuals or to standard distribution lists. Messages may be viewed, edited and forwarded. Provides electronic filing cabinet.

IBM PC ☐ Cost: $7,500

NETWORK TECHNOLOGIES INTERNATIONAL, INC.

(division of NETI Technologies, Inc.)

☐ eForum

Electronic meeting system. Works like electronic mail, but for groups. Organizes, indexes, files and leaves written record of entire meeting. Gives user time to think before responding. Allows geographic or time zones. Determines who can attend meeting.

IBM PC ☐ 185 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $150

OMNI COMPUTER SYSTEMS, INC.

☐ Flash+4

Integrated electronic mail system. Prepares mail for first/second/third class with mailing statements as per postal requirements. Provides on-line and batch inquiry of 9 digit zip codes and carrier route numbers. Includes word processing/forms manager.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 1 since 1986 ☐ Cost: $550-$25,000

☐ Flash-Com

Electronic mail and mailing list management. Interfaces with word processing, text editor and modeling software, built-in forms creation, management and file handlings and interfaces with over 20 other carriers.

IBM PC, PCjr ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $300

ORCHID TECHNOLOGY, INC.

☐ PCnetMAIL

PCnet-based store-and-forward electronic mail system. Stores messages on hard disk until designated recipient requests their delivery. Can send data over domestic and worldwide phone lines and within single office network. Recognizes networks via host table. Includes error correction.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $595

PAIR SOFTWARE

☐ Electronic Mailman

Allows use of E-COM format electronic mail carriers.

IBM PC ☐ 256 KB req. ☐ Cost: $100

PCC/SYSTEMS (PROFESSIONAL AND CORPORATE COMMUNICATIONS)

☐ cc:Central

Turns PC connected to telephone network into file server that acts as central electronic mail clearing house. Integrates with cc:Mail for Modems.

IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $495

☐ cc:Mail for LANs

Text, graphic and file electronic mail program. Sends electronic envelopes containing contents of PC screen to another PC or LAN. Messages include graphics screen output from other applications, DOS file contents and text.

IBM PC ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $995

☐ cc:Mail for Modems

Text and graphic electronic mail program. Sends electronic envelopes containing text, graphics, files and contents of user's PC screen to remote PC, central PC or LAN. Includes graphics screen output from other applications, DOS file contents and text.

IBM PC ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $295

PERSONAL COMPUTER SUPPORT GROUP, INC.

☐ Logon+

Electronic mail functions to review messages, leave messages and access files.

IBM PC ☐ 24 KB req. ☐ Introduced: 1983

PROTOSOFT

☐ Idea-Tree

Bulletin board/message system. Supports general/private message entry and retrieval, file transfer, uploading/downloading, file directory, message archiving and DOS interface. Enters/reads messages under user-created topics allowing discussions to take place simultaneously. Locates specific data.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 5,400 since 1983 ☐ Cost: $89

QUADRATRON SYSTEMS, INC.

☐ Q-Mail

Electronic mail. Component of QSI's Q-Office. Provides network capability between users and hardware. Sends message, document or file to a person or list of persons in directory, independent of UNIX machine. Can be used to annotate received document or add attachment or another document.

IBM PC ☐ 128 KB req. ☐ Copies sold: 75,000 since 1982 ☐ Cost: $1,520-$1,960

I. P. SHARP ASSOCIATES, LTD.

☐ Mailbox

Electronic mail system allowing communications between two or more people without regard for location. Includes individual or group addresses, ability to append, carbon copy and put messages to file, classification of messages and confirmation of receipts and editing or withdrawing texts. Available in 800 cities.

IBM PC ☐ Copies sold: 6,000 since 1972 ☐ Cost: $60

SOFTWARE CONNECTIONS, INC.

☐ LAN: MAIL MONITOR

LAN oriented electronic mail. Includes file transfer and message sending. Sends letters and data files to remote users over telephone lines. Screen-oriented editor and standard letter form are provided. Mail is kept confidential with mail box passwords.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $745-$1,195

TANDEM COMPUTERS, INC.

☐ PS Mail

Distributed electronic mail with built-in instructions, directory of other users, forward and reply, user-specific distribution lists, assured delivery, delivery certification, facsimile and PC document delivery, filing and retrieval, resource utilization, vacation feature and editor.

IBM PC ☐ Cost: $1,000-$2,000 plus $100-$200 monthly license fee per processor

TANGENT TECHNOLOGIES

☐ Mailbox

Delivers information between IBM PCs and Apple Macintosh. Sends memos, reports, files, spreadsheets and graphics.

IBM PC ☐ Cost: $595

TEXAS INSTRUMENTS

☐ EtherMail Server Kit

Sends electronic messages over Ethernet network. Requires EtherLink board and EtherShare Server Kit.

IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $595

☐ EtherVoice

Addition to EtherMail. Provides voice recorder in high quality and normal quality mode. Appends up to 8 minutes of messages to test message in normal quality mode.

IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $150

3COM CORP.

☐ EtherMail

Reviewed Jan 1984 p. 55.

Electronic mail system. Messages created with screen-oriented message editor. Attachment files containing text, programs or data may be sent with any message. Serves as method of transferring files among PCs. Up to 26 DOS files may be sent to all recipients.

IBM PC ☐ 192 KB req. ☐ Cost: $395

☐ 3+Mail

Allows network users to exchange messages, route messages between networks and to remote PCs. Includes message editor. Tracks conversations. Stores/preserves messages. Works with 3+Remote and Route.

IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1986 ☐ Cost: $250

TITN, INC.

☐ Twice MHS X.400

Message transfer protocol exchanges mail between electronic mail servers. Interfaces to Twice ISO or Twice X.25/X.29. Conforms to CCITT recommendations.

IBM PC ☐ 128 KB req. ☐ Introduced: 1985

TRANSEND CORP.

☐ PC Complete

Supports electronic mail, file transfer, terminal emulation, word processing, filing, DOS shell, windowing, address book, macro scripts, X-Modem, VT-100 and unattended operation.

IBM PC ☐ 256 KB req. ☐ Copies sold: 15,000 since 1983 ☐ Cost: $229

WESTERN UNION TELEGRAPH CO.

(subsidiary of Western Union Corp.)

☐ Easylink Instant Mail Manager

Communication, word processing and data base for addresses.

IBM PC ☐ 256 KB req. ☐ Copies sold: 12,000 since 1984 ☐ Cost: $150

ELECTRONICS/ ELECTRICAL ENGINEERING

AFTERTHOUGHT ENGINEERING

☐ Wiremaster

Generates wire lists for wire-wrap circuit board, network maps, cross-references, parts lists, and debugging checklists. Inputs from schematic entered via text editor.

IBM PC ☐ 47 KB req. ☐ Copies sold: 500 since 1981 ☐ Cost: $195-$295

ANALOG DESIGN TOOLS

☐ **PC Workbench**

CAE Workstation for analog circuit design. Includes schematic entry, editing, analysis, instrument display, parameter entry with subcircuits and sample device library. Optional modules include Basic Device Library, General Device Library, Statistical Analysis, Parametric Plotting, Power Design and Smoke Alarm.

IBM PC, AT ☐ 512 KB req. ☐ Introduced: 1986 ☐ Cost: $12,500 and up

ANIMAT/USA

☐ **PCB Analysis**

Projects design, cost, fabrication and manufacturing parameters of PCBs. Reports integrated circuit equivalent, density and feasibility of design, specifically defining level of difficulty and success using 2, 4, 6, 8 or 10 layer boards. Includes 5 utilities for printing, storage and retrieval.

IBM PC ☐ Cost: $99

☐ **SMT Design Analysis**

Projects design feasibility of SMT project and establishes fabrication requirements, manufacturing techniques and design parameters.

IBM PC ☐ Cost: $695

BV ENGINEERING

☐ **ACNAP**

Electronic circuit analysis program that analyzes passive and active circuits consisting of resistors, capacitors, inductors, transistors, operational amplifiers and FETs. Analysis capacity of 200 components and 30 nodes in single pass. Performs Montecarlo analysis, sensitivity analysis and noise equivalent bandwidth.

IBM PC ☐ 62 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $70-$80

☐ **Actfil**

Filter design and synthesis program. Designs low, high, and band pass, high pass, and band reject filters. Computes number of stages, transfer function coefficients, magnitude, phase, and time delay characteristics for infinite gain multiple feedback and voltage controlled source implementations. Chebychev or Butterworth response.

IBM PC ☐ 62 KB req. ☐ Introduced: 1985 ☐ Cost: $70-$80

☐ **COMCALC**

Spreadsheet-like design tool for radio communications system designer or user. Enters components such as transmitter power, frequency, transmission path attenuation, and receiver noise figure. Display's system's performance characteristics.

IBM PC ☐ 60 KB req. ☐ Introduced: 1986 ☐ Cost: $73

☐ **DCNAP**

DC circuit analysis program which analyzes passive and active resistors, voltage sources and dependent and independent current sources. Analysis capacity of 30 nodes and 200 components. Performs sensitivity analysis and worst case voltages. Built-in editor.

IBM PC ☐ 56 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $70-$80

☐ **Locipro**

Root locus program containing integrated routines which analyze transfer functions derived from block diagrams of linear control loop systems. Computes the composite closed loop transfer function. Root movement as a function of gain is then computed. Supports free format input and simple editing.

IBM PC ☐ 48 KB req. ☐ Introduced: 1985 ☐ Cost: $70-$80

☐ **Matrix Magic**

Matrix manipulation and test program. Up to 20 rows by 20 columns. Manipulates entire matrices. Performs operations on a matrix or matrices such as inverse, adjoint and eigenvalues. Performs tests on a matrix or matrices and tells user whether a matrix is Skew-Hermitian, Tridiagonal or Jordan Canonical.

IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $70-$80

☐ **PCPlot**

Hi-res graphing program makes pixel-resolution screen and printer graphs for scientific and financial purposes. Creates linear, semi-logarithmic, and full logarithmic plots in any combination of *x* and two *y* axes. Forced scaling and autoscaling are supported. Grid lines may be specified for linear, semi-logarithmic, logarithmic, and financial data.

IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $70

☐ **Plotpro**

Creates linear, semi-logarithmic, and logarithmic plots with one or two Y axes, and plots multiple functions on the same graph. Forced scaling, autoscaling, and optional grid lines are supported. Works with any printer and computer.

IBM PC ☐ 48 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $70

☐ **SPP**

Signal processor for analyzing linear and non-linear systems and circuits and their effects on user-specified time domain waveforms. Compatible with BV's ACNAP, PLOTPRO, PCPLOT, PDP, and TEKCALC programs.

IBM PC ☐ 48 KB req. ☐ Copies sold: 1,500 since 1982 ☐ Cost: $70-$80

☐ **Stap**

2D steady state heat transfer program with particular emphasis placed on the analysis of heatsinks in the electronic packaging field. After entering the heatsink properties and heat input characteristics, the steady state temperatures at all nodes are calculated, displayed, and saved to a disk file.

IBM PC ☐ 62 KB req. ☐ Introduced: 1985 ☐ Cost: $70

☐ **XFER**

Uses short circuit transfer impedance functions around an operational amplifier to compute circuit element values and circuit configurations which synthesize desired transfer functions. Supports different circuit configurations and magnitude and phase calculations.

IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $73

CASE TECHNOLOGY, INC.

☐ **CT1000 CAE Design System**

Design creation, analysis and physical layout. Includes structured graphics editor, structured computer-aided logic design (SCALD) hardware compiler, firmware compiler, hard-copy post processor and cross-reference generator. Generates netlist and parts list. Outputs to PCB layout, SCALD timing verifier or SILOS/CADAT logic simulators.

IBM PC, XT, AT ☐ Cost: $5,200

☐ **PCB Layout System**

Component of CT1000 CAE Design System. Creates, edits and documents physical drawings to build PCB. Integrated/layout editors. Interactive rat's nest capability. Supports multiple signal layers. Performs back annotation, dynamic rubber banding/editing, parts placement, packaging and pin/part swapping.

IBM PC, XT, AT ☐ Cost: $4,250

☐ **Timing Verifier**

Component of CT1000 CAE Design System. Verifies digital design timing parameters and circuits. Based on SCALD timing verifier. Analyzes worst-case timing. Detects set up and hold errors. Verifies complete/partial designs. Checks interface specifications. Signal behavior summary. Estimated/actual wire delays.

IBM PC, XT, AT ☐ Cost: $3,500

CHANCELLOR COMPUTER CORP.

☐ **Netlist Extractor**

Extracts netlist from Symgraph schematic data base. Used as input to simulators. Expands schematic symbols containing lower level design description. Performs error checking. Assigns names to nets within circuit. Nine attributes associated with any symbol.

IBM PC, XT

☐ **Symgraph Schematic Editor**

Schematic entry and symbol creation. Hierarchical writing editor supports designs at gate and device levels. Parameters and attributes for simulation associated with symbols. Commands entered via mouse or tablet pointing device.

IBM PC, XT

CONTROL DATA CORP.

☐ **Cybernet Express Electronics Designer System**

Schematic entry, pan and zoom, naming and ID and rubber banding functions. Multiple windows. Buss-through points. Multiple-width components. Color support. Keystroke macros. Digital simulation (SALT), behavioral simulation (VERILOG), analog simulation (MicroASPEC), model parameter extraction (MicroOPTIMOS) and waveform analyzing (OCEANVIEW) functions.

IBM PC, XT ☐ Introduced: 1984 ☐ Cost: $7,500

☐ **Cybernet Express Piping Workstation**

IBM PC, XT, AT

☐ **Cybernet Express Power Systems**

IBM PC, XT, AT ☐ 512 KB req.

☐ **Cybernet ExpressED-Layout**

Creates, edits and documents drawings for building PCBs for electronics engineers. Utilities for placement of board parts, rat's nest generation of signal layout and pin-to-pin signal routing. Includes 2,500-part mil-spec component library, digital logic simulator, analog simulator, mil-spec 217 reliablility prediction and optimal analog model generation.

IBM PC, XT, AT ☐ Cost: $4,250

COOLIDGE & ASSOCIATES

☐ **Lighting Calculations**

Given room dimensions reflectance and light level, the number of fixtures are calculated by the zone cavity method.

IBM PC ☐ Cost: $100

DASOFT DESIGN SYSTEMS, INC.

☐ **Dasoft-PC2**

Schematic generation package. Includes a component library and a library editor for user-expansion of parts data base. Creates up to 32 schematic pages, sizes A through E. Net list and parts list are generated. Drawings can be plotted on an X-Y pen plotter.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $3,495

DATATRAK

☐ **Designpro**

Indoor Lighting, Electrical Outlet, Branch Circuit, and Power Panel programs. Evaluates for California Energy Commission compliance. Determines footcandle requirements, fixture quantities, electrical loads, installation materials, voltage drops, resistive and motor circuit materials and minimum-size circuit breakers, wiring and supply transformers.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $1,995

☐ **Estmat**

Electrical estimating. Length and Count Probes take off blueprint specifications and accept any architectural or engineering scale. Allows user to revise extensions. Records vendor quotes, subcontractors' bids, miscellaneous expenses, and taxes and bonds. Calculates bid proposal. Conforms to traditional takeoff methods.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 600 since 1977 ☐ Cost: $5,450

MARCEL DEKKER, INC.

☐ **Transformer & Induction Design Software**

Designs transformers for square or sine wave with up to 10 secondary windings, each of which may be center topped. Designs inductors with vion alloys, ferrites and molypermalloy powder cores, dc or ac.

IBM PC ☐ Cost: $89

DRACO TECHNOLOGY

☐ **PC-Layout**
Creates double-sided PCB artwork of up to 21-inch square. Uses color artwork editor. Produces final artwork, solder mask and silk screen using printer or plotter.
IBM PC ☐ Cost: $745

DUBERT INTERNATIONAL, INC.

☐ **Atlas Tutor**
Trains engineers and technicians to generate ATLAS code. Generates 54 verbs and 53 nouns in IEEE-716 Standard. Step-by-step sequence leads through statement generation process. Stores each statement constructed in user-defined file, linked together in numerical sequence.
IBM PC ☐ 192 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $400

DYNACOMP, INC.

☐ **ACAP (Active Circuit Analysis Program)**
Calculates node voltages, analyzes discrete components. User enters circuit in algebraic form, edits and saves description on tape/diskette.
IBM PC ☐ 48 KB req. ☐ Copies sold: 3,000 ☐ Cost: $40-$47

☐ **Digital Filter**
Designs filter functions or chooses from menu of filter forms. Converts filter forms into non-recursive convolution coefficients. Frequency transfer function shape specified by entering points along desired filter curve. Includes plotting, display, data storage, retrieval and editing.
IBM PC ☐ 16 KB req. ☐ Copies sold: 4,000 ☐ Cost: $50-$57

☐ **Engineering Collection No. 1**
Library of routines to deal with convolution, number conversion, reactor simulation, control system simulation. Creates antenna, bode, fourier and S and P plots.
IBM PC ☐ 48 KB req. ☐ Copies sold: 1,000 ☐ Cost: $40-$43

☐ **Engineering Sketchpad**
Draws on 5,000-point Cartesian coordinate system in preparation of transistor, resistor and desk drawings. Rotates, mirrors, inverts, expands and contracts. Drags about structures. Stores individual drawings to be included in new drawings.
IBM PC ☐ 128 KB req. ☐ Cost: $30

☐ **Ladder Network**
Cascaded 2-port network description, independently from load to source in data file generated by program prompts. Reads element type and value, generates ABCD matrix describing transfer characteristics. Matrices of complex numbers capacitors, resistors, inductors and transmission lines.
IBM PC ☐ 32 KB req. ☐ Cost: $30-$34

☐ **Logic Designer**
Digital hardware design. Obtains solutions of combinational logic problems having 2 to 8 input variables. Prompts for user-defined truth table and reduces input data into 2 boolean equations. Either equation converted into digital hardware.
IBM PC ☐ 16 KB req. ☐ Copies sold: 600 ☐ Cost: $35-$38

☐ **Micro-Cap II**
Provides bi-polar, opamp and transmission line models. User-defined macros.
IBM PC ☐ 48-256 KB req. ☐ Cost: $100-$800

☐ **Microcomputer Circuit Analysis Program**
Draws electronic circuit diagram on screen. Runs time-domain simulation of circuit responding to user-defined input sources. Performs AC bode analysis showing gain and phase shift vs. frequency. Performs DC transfer characteristic analysis showing output voltage vs. input voltage.
IBM PC ☐ 128 KB req. ☐ Cost: $400

☐ **Microcomputer Circuit Analysis Programs**
Circuit diagram design and time-domain simulation. Performs AC bode analysis. DC transfer characteristic analysis. Cursor adds/deletes components. Input drawn/keyed diagram/description/standard components library. Out to CRT or graphics bode/DC analyses, diagram, waveform graphics/plots and tabular listings.
IBM PC ☐ 64 KB req. ☐ Copies sold: 10,000 ☐ Cost: $400

☐ **Microcomputer Logic Design Program**
Logic diagram design and timing simulation. Keyboard cursor adds/deletes gates. Prepares netlists for simulation. Input macro network, drawn logic diagram, keyed-in network, signal source and patterns, gate truth tables and characteristics and clock wave forms. Outputs reports and listings.
IBM PC ☐ 64 KB req. ☐ Copies sold: 12,000 ☐ Cost: $400

☐ **Ohm's Law**
Solves Thevenins's and Norton's theorem problems as well as t circuit, bridged t circuit and lattice network problems.
IBM PC ☐ 16 KB req. ☐ Cost: $20

☐ **Wiremap**
Circuit and schematic analysis. Generates parts, wire and signal lists for production, debugging, troubleshooting and circuit documentation. Useful for prototyping, wire-map and point-to-point circuitry. Error checking and data editing included.
IBM PC ☐ 16 KB req. ☐ Cost: $40-$44

EESOF, INC.

☐ **MiCAD**
CAD for RF and microwave circuits. Processes and displays picture of user's circuit on graphics monitor. Supports Aristomat, HP 7585 Drafting Plotter and Wild Heerbrugg Coordinatograph. Data base of 350 individual layers.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $8,400

☐ **Microwave Spice**
Relates active device characteristics to process-related parameters. Performs time or frequency-domain analysis in nonlinear circuit design.
IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $8,400

☐ **Touchstone**
Provides analysis, tuning, and optimization of RF and microwave circuits. Constructs circuits from 100-element catalog. Performs 200 measurements including noise figure, stability and source mapping circles and S-parameter measurements. Performs algebraic calculations. Handles up to 25 variables simultaneously.
IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1984 ☐ Cost: $8,400

ELECTROCON INTERNATIONAL, INC.

☐ **A/DFI (AutoCAD/DPAS File Interchange System)**
Symbol library and drawing interchange file translation system for use in electrical distribution system mapping and data base generation.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 4 since 1985

☐ **DPAS (Distribution Primary Analysis System)**
Analyzes load flows, losses, voltages and fault currents of radial, 3/V/single-phase primary distribution systems. Data base creation/maintenance capabilities. Interfaces with AutoCAD for mapping.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 22 since 1983

☐ **PC One-Line Diagram Program**
Handles construction, modification and display of one-line diagrams of power systems. User may lay out, inspect, and modify programs interactively, and obtain hard copies. Features zoom and pagination. Requires PC Power Flow to supply network topology and numeric results from solved case.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 19 since 1984 ☐ Cost: $3,750

☐ **PC Power Flow Program**
System planning and analysis. Handles 2,500 buses. Provides fast-decoupled and Newton solution algorithms. I/O in IEEE Common Format. Control features includes reactive power limits on generators, local or remote voltage control, control of real and reactive power flow.
IBM PC, AT, XT ☐ 192 KB req. ☐ Copies sold: 48 since 1983 ☐ Cost: $8,500

☐ **PC Short Circuit Program**
Solves arbitrary short circuits or faults of any complexity on power transmission networks. Handles 550 buses. Simultaneous impedance connections among conductors or ground. Handles phase shifts and mutual coupling in zero sequence. Includes macro facility. Monitors maximum and minimum current.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 37 since 1984 ☐ Cost: $8,500

ELITE SOFTWARE DEVELOPMENT, INC.

☐ **Electric Panel Design**
Calculates minimum sizes for circuit breakers, wiring and supply transformers in electrical distribution system. Prints schedules listing circuit names, circuit breaker sizes, balanced phase watts, total wattage and total amperage. Project data files can be used by Short Circuit and Voltage Drop programs.
IBM PC ☐ 56 KB req. ☐ Introduced: 1986 ☐ Cost: $295

☐ **Lighting Fixture Calculations Program**
Calculates requirements, prints schedule and provides energy economics report. Based on zonal cavity method in IES Lighting Handbook. Handles input for 500 rooms. Output includes number of fixtures required per room, total wattage required and customizable fixture schedule.
IBM PC ☐ 56 KB req. ☐ Copies sold: 750 since 1980 ☐ Cost: $495

☐ **Short Circuit Calculations Program**
Calculates symmetrical and asymmetrical fault currents. Data for copper and aluminum cables, bus ducts, circuit breakers, switches and current transformers stored on disk. Inputs and stores up to 600 buses and 25 motors. Motor contributions accounted for exactly.
IBM PC ☐ 56 KB req. ☐ Copies sold: 850 since 1980 ☐ Cost: $495

☐ **Voltage Drop Calculations**
Calculates voltage drops at every bus in electrical distribution network. Prints voltage losses on absolute and percent basis. Allows all types of electric components. User can specify KVA load with power factor at each bus. Short Circuit, Panel Sizing and AutoCAD compatible.
IBM PC ☐ 56 KB req. ☐ Copies sold: 475 since 1984 ☐ Cost: $295

EML RESEARCH, INC.

☐ **TRACE - Nicolet to IBM Transfer Program**
Reads traces from Nicolet 2090-3C oscilloscope via RS232. Adjusts to any configuration and outputs to ASCII data file. Program or front panel controlled trace selection. Provides data conversion and reduction.
IBM PC ☐ 64 KB req. ☐ Copies sold: 75 since 1983 ☐ Cost: $100

FAST FEEDBACK TECHNOLOGIES

☐ **Microtest Instrumentation Package**
Converts computer into measurement system capable of reading, analyzing, data logging voltage, current, resistance and temperature.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $495

FUTURENET CORP.

☐ **D-APPLICON**
Converts DASH Schematic Designer output into input format required by specific CAD system.
IBM PC, XT, AT

☐ **D-CADAM**
Converts DASH Schematic Designer output into input format required by specific CAD system.
IBM PC, XT, AT

☐ **D-CBDS**
Converts DASH Schematic Designer output into input format required by specific CAD system.
IBM PC, XT, AT

☐ D-CV
Converts DASH Schematic Designer output into input format required by specific CAD system.
IBM PC, XT, AT

☐ D-REDAC
Converts DASH Schematic Designer output into input format required by specific CAD system.
IBM PC, XT, AT

☐ D-SCICARDS
Converts DASH Schematic Designer output into input format required by specific CAD system.
IBM PC, XT, AT

☐ D-TEGAS
Converts DASH Schematic Designer output into input format required by specific CAD system.
IBM PC, XT, AT

☐ Dash-Abel
Links schematic capture with programmable logic design, extracting and translating data from DASH schematics into ABEL source file.
IBM PC, XT, AT

☐ Dash-Cadat
Verifies performance of complex logic designs of up to 10,000 gates, and up to 1,000,000 gate equivalents using behavioral modeling.
IBM XT, AT

☐ Dash-PCB
Routes boards through transfer of logic designs to physical layout.
IBM PC, XT, AT

☐ Dash-Test
Verifies VLSI chips and PCB designs in same system that was used for development, once implemented into hardware.
IBM PC, XT, AT

☐ DASH-2
CAE schematic capture system. Supports tag and drag, rubber banding, pin highlighting, three levels of zoom and four windows. Schematic editor program outputs pinlist and netlist. Performs design checking such as non-connected pins and input to output connections.
IBM PC ☐ Cost: $5,280-$6,280

GAS LIGHT SOFTWARE

☐ Z-EDIT
Edits Z transforms or digital filters. Allows editing of filter including coefficients, poles or zeros. 8087 support available for increased performance.
IBM PC ☐ 192 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $395

GATEWAY DESIGN AUTOMATION CORP.

☐ BitGrade
Provides fault grading for built-in self-test circuits. Generates diagnostic information.
IBM AT

☐ StatGrade
Statistical fault analysis system. Estimates overall fault coverage for digital logical circuits. Covers potential circuit faults including those that occur at input of circuit elements.
IBM AT

☐ TestGrade
Interactive logic and concurrent fault simulator. Combines gate and switch level simulations. Handles VLSI-complexity random sequential digital logic.
IBM AT

☐ TestGrade-A
Distributed processing version of TestGrade. Provides distributed concurrent fault simulation.
IBM AT

☐ TestScan
Generates test patterns for scan design circuits.
IBM AT

☐ Verilog
Mixed-mode, interactive logic simulator and hardware description language. User can combine high-level block descriptions with register transfer level, functional, gate and switch level circuit representations.
IBM AT

THE GREAT SOFTWESTERN CO., INC.

☐ Auto-Board II
Set of printed circuit design aids for schematic capture, component layout and auto-routing of printed circuit boards. Allows 1 mil resolution for free placement of parts and signal traces.
IBM PC

☐ Auto-Board System
Circuit element templates which aid in schematic design, layout and trace routing of double-sided PCBs. Output is definition of PCB including silk screen and drilling patterns. Allows graphic editing of routed PCB. Uses AutoCAD for all graphics interfaces.
IBM PC ☐ 512 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $2,495

☐ Auto-Router SMD/Multi-layer
Auto-routes PCBs using surface-mounted technology and/or multi-layer boards. Advanced Routing Extensions 1 allows surface mounted technology routing. Advanced Routing Extension 2 allows routing on 1-16 layers in selectable routing pairs.
IBM PC ☐ 512 KB req. ☐ Introduced: 1986 ☐ Cost: $1,495-$2,495

HARRIS INFORMATION SERVICES
(division of Harris Publishing Co.)

☐ Selectory
Accesses 8,400 electronics industry manufacturing plants. Compiles specific or broad lists of target companies. Creates lists according to product, employment size and location criteria. Provides names/titles for 5 managers per firm. Generates mailing labels, continuous form cards and account profiles.
IBM PC

HEWLETT-PACKARD CO.

☐ Electronic Design System
Brings in netlist and part information and communicates engineering changes and back annotation for processing by HP Printed Circuit Design System.
IBM AT

HHB SYSTEMS

☐ Personal CADAT
Fault simulation, behavioral modeling, SSI/MSI model libraries, ASIC model libraries and CATS/Ethernet communications link. Suited to design of small PCBs and ASICs (Application Specific Integrated Circuits). Performs 21-state simulation. Min/max timing analysis.
IBM XT, AT ☐ 640 KB req.

HITACHI AMERICA, LTD.
Computer Sales & Service Division

☐ GM-PCB
Design for analog printed circuit boards.
IBM PC

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ CIEDS (Computer-Integrated Electrical Design Series)/ Design Capture
IBM no. 5668-878; 5669-191, 192. Features system monitor for access to all functions. Computer-aided schematics for entry/ edit of symbols and drawings. Netlist extraction from on-line schematics. Structured design language and standard symbol library. AT version requires DOS 3.1 or later.
IBM RT, AT ☐ Cost: $6,000-$8,000

☐ CIEDS/Engineering Access Routines
IBM no. 5713-ABF. Computer-Integrated Electrical Design Series. Accesses information within design capture data base. Translates data base logic descriptions into specific netlist formats for automated simulation or layout tools.
IBM RT ☐ Cost: $5,000

☐ CIEDS/Interface
IBM no. 5713-ABG. Computer-Integrated Electrical Design Series. Interface for translation of logic descriptions into sequential netlist in Structured Design Language or sequential output file formats for use by design automation tools.
IBM RT ☐ Cost: $2,000

INDUSTRIAL TECHNOLOGY GROUP

☐ Industrial Wiring Design
Calculates FLA and design amperes for given current, KVA or HP. Calculates conductor/conduit sizes, covering all common insulated conductors. Computes voltage drop in accordance with distance/type of conduit. Recalculates conductor size if voltage drop is larger than desired. Stores/tabulates calculation result.
IBM PC ☐ 64 KB req. ☐ Copies sold: 60 since 1983 ☐ Cost: $275

INFOLYTICA CORP.

☐ MagNet Release 3
CAD system for electromagnetic devices. Finite element method analysis of magnetic and electrical fields. Five principal processes and 3 file management programs keyed to single file structure. Postprocessor allows manipulation of solutions to calculate and display fields, torques, energy densities.
IBM PC ☐ 64 KB req. ☐ Copies sold: 40 since 1980 ☐ Cost: $8,950

INTEGRATED ENGINEERING SOFTWARE, INC.

☐ Electro
Integrated CAE field solver for design and analysis of electrical and electronic equipment. Utilizes boundary element method.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $20,000

IRIS SOFTWARE, INC.

☐ Iris-450
Schematic mapping. Supports digitizers.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $2,100

K. S. O.

☐ Logic Circuit Designer
Programs digital wave form, waving up to 16 outputs. Designs digital pulses from 250 nanoseconds to 4,096 minutes. Includes wave form compiler and analyzer, DOS or UNIX editor, EPROM program and back-up disk.
IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $499

MANAGEMENT SCIENCES, INC.

☐ PC-Availability
Tool for modeling system availability using Markov analysis. Models dependent failure rates and repair times. Based on matrix mathematics. Calculates system operation uptime/downtime, degraded time and reliability and maintainability measures. Compatible with MSI's PC-Bellcore or PC-Predictor.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1976 ☐ Cost: $3,000

☐ PC-Bellcore
Supports Bellcore Technical Advisory Publication, Reliability Prediction Procedure for Electronic Equipment (IP-10425). Accommodates component, unit and system burn-in and testing. Correction for infant mortality dependent upon effective burn-in test time due to temperature acceleration. Handles phrases. Accesses PC-Electronic Data Base.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $5,500

☐ PC-Electronic Data Base
Part information data base or library to calculate failure rate estimates. Covers resistors, ICs, capacitors, hybrid circuits, relays, semiconductors, printed wiring boards, inductors, switches, potentiometers and connectors.
IBM PC, XT, AT ☐ 256 KB req.

☐ **PC-FMEA/FMECA (Failure Mode Effects and Critical Analysis)**
Interactive tool for developing failure mode effects and criticality analysis per MIL-STD-1629A. Failure rate data thread from PC-Predictor. Calculates and displays failure probabilities from rates. System through component design.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $3,000

☐ **PC-Makedata**
Data creation system. Presents menu of data panels each corresponding to part or function described in line of Predictor data. Creates data files and catalogs. Compatible with PC-Panels for user-customized panels.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 98 since 1985

☐ **PC-Panels**
Designs data entry screens for PC-Makedata. Panel format capabilities. Reverse video, color, size and graphics options. Standard data checking routines.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 6 since 1985 ☐ Cost: $200

☐ **PC-Predictor**
Produces failure rate estimates based on part stress analysis per MIL-HDBK-217 reliability prediction requirements. Accesses PC-Electronic Data Base. User supplies component type, quantities, qualities and stresses. System through component level evaluation.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $5,500

MC2 ENGINEERING SOFTWARE

☐ **Electrical Engineering Group**
Includes Fault and Current Analysis, Fuse, Breaker and Wire Coordination, and Lighting Design programs. Printed inputs and outputs. Runs English or Metric units.
IBM PC ☐ 64 KB req. ☐ Copies sold: 250 since 1980 ☐ Cost: $1,385

☐ **E3M (Fault Current Analysis)**
Calculates 3-phase bolted and instantaneous peak currents and voltage drops including 700 faults/5,000 devices. Buss per unit method. Carries 30 device type files. Includes input screens, help messages and windows. Print pseudo schematic diagram.
IBM PC ☐ 64 KB req. ☐ Copies sold: 350 since 1980 ☐ Cost: $745

☐ **E4M (Fuse and Breaker Coordination)**
Coordinates electrical fuses and breakers to wire for proper operating sequence. Uses Buss up-over-and-down method. On-board data files. Printed inputs/outputs. Runs English or Metric. Retains job files on disk.
IBM PC ☐ 64 KB req. ☐ Copies sold: 240 since 1980 ☐ Cost: $295

☐ **E5M (Lighting Design)**
Calculates room cavity ratio, recommends number and location of fixtures according to IES maintained lighting level procedure, and prints diagram layout. Handles 400 fixtures in file storage. Handles 100 rooms in one run. Gives operating cost study description, maintenance factor and lighting curve data.
IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1980 ☐ Cost: $495

META-SOFTWARE

☐ **Circuit PathFinder**
Circuit performance verification tool. Extracts design critical path. Performs conservative timing simulation while locating path elements.
IBM RT ☐ Copies sold: 10 since 1986 ☐ Cost: $10,000-$15,000

☐ **HSPICE**
Electronic circuit simulator. Alogorithms handle choice of matrix methods, timestep controls, transistor models and node initialization. Diagnostics pinpoint circuit problem areas and list problems nodes and elements. Includes hi-res interactive color graphics postprocessor, HSPLOT.
IBM PC, XT, AT, RT ☐ Copies sold: 150 ☐ Cost: $10,000-$15,000

☐ **RADSPICE**
Adds modeling of radiation effects to HSPICE capabilities. Functions include transient gamma radiation effects on P-N junctions, neutron degradation on bipolar junction transistors, radiation dose degradation on MOSFETs, ionizing photocurrents, ferrite nonlinear cores, magnetics and radiation voltage and current sources.
IBM PC, XT, AT, RT ☐ Cost: $15,000-$22,500

MICROSIM CORP.

☐ **PSpice**
Simulates circuits with up to 120 transistors. Analyzes user-created circuits and outputs to printer on another text file. Library of common discrete devices includes diodes, transistors and opamps. Interactive graphics post processor program, device equation and parts options are available.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $950

MONOLITHIC MEMORIES, INC.

☐ **PALASM- PAL Assembler**
Allows designers to write on silicon and implement logic functions from random gates to complex arithmetic. Defines, simulates, builds and tests PALS. Verifies logic design and generates fuse plot to program PALS. Requires RS-232C cable and PAL programmer.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 1,000 ☐ Cost: $200

MOSAID, INC.

☐ **MOSFIT**
Extracts MOS Transistor model parameters from test device measurements. Supports user-defined or standard SPICE MOS models. Provides instrument control, measurement, parameter optimization and plotting capabilities. Generates global parameter sets which are independent of bias conditions and device geometry.
IBM PC ☐ 512 KB req. ☐ Copies sold: 25 since 1983 ☐ Cost: $9,750

NEOTECH SYSTEMS

☐ **SC-SOL**
Three-phase short circuit solution up to 64 buses. All data entry is via built-in data base system, screen-mapped forms. Solves all short-circuit parameters for 3-phase power system. Prints formatted reports.
IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 6 since 1981 ☐ Cost: $900

NORTHOUSE INDUSTRIES INTERNATIONAL

☐ **BODE**
Frequency analysis. Produces numerical tables and graphic plots (screen or printed) of typical frequency response curves. Linear transfer functions limited to maximum of 15th order.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1970 ☐ Cost: $200

OMATION, INC.

☐ **Schema**
Generates and prints hi-res schematics, block diagrams, timing diagrams and flow charts. Extracts net lists, wire lists and BOMs from schematic drawings while verifying circuit integrity with routing, design rule check and usage reporting. Transports files to other CAE/CAD/PCB systems.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $495

ORCAD SYSTEMS CORP.

☐ **OrCAD/SDT**
Includes part libraries and utility programs for schematic output, BOM generation, net listing and design checking. Rubberbanding of wires and buses when moving objects. On-line part browsing. Auto panning of worksheet of screen boundary. String searching. Visible grids. Five zoom levels.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $495

PERSONAL CAD SYSTEMS, INC. (P-CAD)

☐ **Logs II**
Logic simulator. Provides interactive, mixed mode 12-state logic simulation for semicustom designs. Switch, gate and behavorial modeling. Semicustom simulation libraries.
IBM PC

☐ **PC-Caps**
PCB design, layout and logic simulation. Features hierarchical design, continuity checking and standard semicustom and PLD symbol libraries.
IBM PC

☐ **PC-Cards**
Interactive PCB layout editor. Data base utilizes netlist data from P-CAD's PC-Caps.
IBM PC

☐ **PC-CUPL**
Universal language for programmable logic design. Expresses design in logic equations, truth tables and state machine syntax. Offers logic minimization algorithms, Turbo-Morgan expansion and table-oriented simulation. Preprocessor provides string substitution, file inclusion and conditional compilation.
IBM PC ☐ Cost: $995

☐ **PC-DRC/NLC**
Performs design rule and netlist checking to detect physical design violations and verify electrical continuity.
IBM PC

☐ **PC-Place**
Places PCB parts. Provides utilities such as force vectors, histogram displays and rats nest lines to analyze and optimize placement.
IBM PC

☐ **PC-Route**
Runs in conjunction with P-CAD's PC-Place to interconnect design once placed. Provides status on line and ASCII report generation.
IBM PC

☐ **PDIF**
Acts as bidirectional interface translating schematic or PCB data into ASCII format for transfer to CAE/CAD/CAM systems, or to develop customized applications.
IBM PC

POWER TECHNOLOGIES, INC.

☐ **PSS/U (Power System Simulator for Utilization Level Circuits)**
Handles load flow, voltage drop, unbalanced fault, load balance, and circuit breaker duty calculations on distribution and industrial systems.
IBM PC ☐ 640 KB req. ☐ Copies sold: 12 since 1985

PROFESSIONAL NETWORK SERVICES CORP.

☐ **Electroword**
Electronics and computers spelling check dictionary. Correct spelling of 8,000 words. Compatible with SpellStar as supplemental dictionary.
IBM PC ☐ Copies sold: 10 since 1984 ☐ Cost: $75

PROMPT, THE SOFTWARE CO.

☐ **RAP217**
Predictions of components in accordance with MIL-HDBK-217. Obtains parameters for calculating failure rates. Displays, prints or saves results. Outputs part number, quantity, type, failure rate, stress level, base failure rate, quality and environmental factors. Adjustable temperature and/or environment.
IBM PC ☐ 256 KB req. ☐ Copies sold: 250 since 1982 ☐ Cost: $2,450 and up

RACAL-REDAC, INC.

☐ **REDLOG/REDBOARD**
PCB and scientific design drawing. Interactive facilities. Employed as standalone workstation or within multi-station distributed processing configuration when linked to Redac's DSM 6 Series Central Processor.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $6,000

SCIENTIFIC CALCULATIONS, INC.

☐ Scidesign

CAE for schematic and logic drawings. Includes schematic sheet editor, symbol library and graphical symbol editor. Generates schematic diagrams, performs design rule checks on circuit and generates net lists. Provides ASCII file of all data including graphics. Optional circuit simulation.

IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1985 ☐ Cost: $6,000

☐ Scism

Logic simulator. Integrates with Scientific Calculations' Scidesign for schematic capture.

IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $3,000

☐ Scitherm

Heat transfer CAD system. Allows electronic equipment designers to analyze problems of space vs. heat buildup at every stage of design and production process.

IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $10,000

SCOTT & SCOTT CONSULTANTS, INC.

☐ Engineering and Economic Evaluation

Handles demand and energy, power transformers, distribution transformers and regulators, construction expenditures, cost and losses and economics comparison. Models hourly demands and electrical and physical characteristics of transformers or regulators.

IBM PC ☐ Cost: $950

SIMUCAD

☐ SILOS

Logic mixed mode switch level simulator for electronic circuits. Logic and fault simulation and analysis. For system level, board level or MOS/IC designs. Specifies input to network as individual clocks or binary/hexadecimal tables.

IBM AT, XT ☐ Copies sold: 60

SPECTRUM SOFTWARE

☐ MICRO-CAP (Microcomputer Circuit-Analysis Program)

Reviewed Mar 1984 p. 88.

Circuit analysis and simulation. User sketches diagram on CRT screen. Netlist created from drawing. AC, DC or transient analysis on network. Handles non-linear networks of up to 60 nodes containing discrete components.

IBM PC ☐ 256 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $475

☐ Micro-Cap II

Draws and analyzes circuits on screen. Handles resistors, capacitors and inductors through bipolar and MOS transistors. Macro models for opamps and transmission lines. AC, DC, Fourier and transient analysis of linear and non-linear circuits. Temperature and worst case analysis.

IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $895

☐ Micrologic

Reviewed Mar 1985 p. 112.

Logic design and simulation. User sketches diagrams directly on screen. Netlist created from drawing. Timing/state simulation on network. Handles up to 2000 gates, user-defined in terms of gate name, delay and I/O clocks.

IBM PC ☐ 256 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $450

TATUM LABS

☐ Electronic Circuit Analysis

Handles nonlinear transient, DC/AC analysis, worst case, Monte Carlo and frequency, time dependent parts. Includes built-in editor, macros and large circuits.

IBM PC ☐ 192 KB req. ☐ Cost: $450

TECHDATA

☐ Electrical Load Analysis

Computer-aided load list provides calculation of overall electric power requirements for industrial plants and buildings. Calculates loads at load centers providing KVAR, KVA and AMPS with optional default motor efficiencies and power factors.

IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $300

TERADYNE, INC.

☐ DataView

Integrates front-end design engineering applications, including schematic entry, documentation with mixed text and graphics, electronic mail, and LASAR simulation/waveform display. A consistent user interface, with pop-up menus, mouse, and multiple windows drives all functions.

IBM PC, AT ☐ 640 KB req. ☐ Cost: $4,500 and up

☐ LASAR

Circuit simulation for design verification and test generation for devices and printed circuit boards. Features model libraries of more than 4,000 devices, mixed-mode simulation, minimum/maximum timing analysis with one picosecond resolution, time-based concurrent fault simulation, and interfaces to ATE for test program generation.

☐ 4,000 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $18,000 and up

TITANIA PUBLICATIONS

☐ Electronic Drawing

Prints electronic component or logic circuits. Provides 98 predrawn shapes including passive and active components and logic elements. Places, moves and rotates shapes on screen. Color codes wire runs. Labels plan horizontally or vertically with text including punctuation and Greek characters.

IBM PC ☐ 48 KB req. ☐ Introduced: 1983 ☐ Cost: $50

US WEST

Knowledge Engineering Division

☐ ICPNI (Integrated Circuit Part Number Index)

Indexing for locating data on ICs by base number or manufacturer's device number. Accesses data in Tech-Doc/Micro-Index, INACOM's components and materials source data base.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1984

☐ Micro-Index

Accesses components in INACOM International's TECH-DOC files by product description, supplier or part number. Accesses product specifications, data sheets, applications material and supplier catalog data. Developed product/service index on hierarchical relationship using technical product descriptions and terminology.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $3,975

☐ Parametrix

Allows user to search for integrated circuit data by part number or by any combination of attributes.

IBM XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $4,000

VARIX CORP.

☐ GP1140

Programs and tests semiconductor devices such as PROMs, EPROMs, EEPROMs and programmable logic integrated circuits such as PALs and PLAs.

IBM PC ☐ Copies sold: 150 since 1983 ☐ Cost: $4,895

☐ SPO300

Programs and tests semiconductor devices such as PROMs, EPROMs, EEPROMs and programmable logic integrated circuits such as PALs and PLAs.

IBM PC ☐ 256 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $3,795

VECTORVISION

☐ PC10

CAD printed circuit board artwork design and documentation. Design rules can change during process to optimize component location and connection routing. Supports analog, stripline, ECL/TTL/MOS and RF circuit design. PC10 Con-Net auxiliary system available for net list entry and extraction.

IBM PC ☐ 256 KB req. ☐ Copies sold: 92 since 1984 ☐ Cost: $4,500

VECTRON GRAPHIC SYSTEMS, INC.

☐ CDS 2000

Computer-aided engineering system. Provides logic simulation and time verification.

IBM PC, XT, AT

☐ DNA2000 Electronic Design Automation

Supports electronic design processes. Includes schematic capture, interactive place and route, auto-routing, post-processing and NC drill and auto-insertion tapes.

IBM PC, XT, AT

VIDEO & COMPUTER SYSTEMS, INC.

☐ RAPS (Repair Analysis Program)

Enables user to analyze circuit board defects by levels of test stations, types of defects for improvements, types of components for failure rate reduction and board related problems. Adds, deletes and displays existing records.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 12 since 1984 ☐ Cost: $595

VIEWLOGIC SYSTEMS, INC.

☐ Workview 100 Series

Desktop CAE entry-level system. Features schematic entry, waveform processor, and symbol libraries for standard, semi-custom and analog parts. Includes document processing which merges text and color graphics, EDIF interface, and electronic mail and file transfer utilities.

IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $3,500-$5,500

☐ Workview 300 Series

Desktop CAE digital design system. Features schematic entry, waveform processor, and symbol libraries for standard and custom parts. Includes document processing which merges text and color graphics, EDIF interface, and electronic mail file transfer utilities.

IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $6,500-$8,500

☐ Workview 500 Series

Desktop CAE analog design system. Features schematic entry, waveform processor, document processing which merges text and color graphics, and EDIF interface. Includes circuit simulator, symbol library for analog parts, simulator library for discrete components, and electronic mail and file transfer utilities.

IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $5,500-$8,500

☐ Workview 700

Desktop CAE digital and analog design system. Schematic entry, waveform processor, document processing that merges text and color graphics, EDIF interface and communication facilities.

IBM PC ☐ 512 KB req. ☐ Cost: $6,500-$13,000

VISIONICS CORP.

☐ EE Designer

Schematic Capture, Circuit Simulation, PCB Layout, Artwork Generation and Libraries modules. Color graphics editor. TTL and CMOS compatible. Netlist extraction. Ratsnest connection. Simulates 12 signal states. Design rule check. Displayed timing waveforms. Spike analysis notation. What-if analysis. Rubberbanding.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $975

WINTEK CORP.

☐ HiWire

Schematic capture. Includes TTL, CMOS, microprocessor and discrete component libraries. Allows schematics on dot matrix printers/plotters. Supports hierachical design methods. Permits simultaneous display of schematic sessions. Includes netlist and BOM utilities.

IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $895

☐ smARTWORK

Reviewed May 1985 p. 113.

PCB artwork editor. Places and removes pads and traces with keyboard. Traces are vertical, horizontal or 45 degree diagonal, common device footprints obtained from library. Handles single- or double-sided PCB up to 10 by 16 inches.

IBM PC ☐ 320 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $895

EQUIPMENT MAINTENANCE & FIELD SERVICE

ABC MANAGEMENT SYSTEMS, INC.

☐ Equipment Data and Repair History

Used in manufacturing, processing, utility and industrial plants, public works, schools, hospitals and service businesses.

IBM XT, AT ☐ 64 KB req. ☐ Copies sold: 60 since 1982

☐ Maintenance Management System

Maintenance management and accounting for industrial/manufacturing plants and institutions. Processes daily time cards. Reports job progress, time and cost for maintenance accounting. Provides payroll data. Includes work order backlog, planning, work order activity, monthly budget and preventive maintenance modules.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 30 since 1982

☐ Preventive Maintenance System

Preventive maintenance management for manufacturing, utility, industrial plants, oil and gas, public works, hospitals, schools service and repair shops.

IBM, XT, AT ☐ 64 KB req. ☐ Copies sold: 60 since 1982

ACME VISIBLE RECORDS

☐ Acme Visible Software Systems

Maintenance management recordkeeping for ongoing preventive maintenance. Data on equipment records, maintenance schedules, history of repairs, materials costs, work orders, inventory and management reports.

IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $3,995-$13,000

☐ Media-Flex Maintenance Management

AVR Maintenance Management Software. Preventive maintenance program and parts inventory. Provides master equipment, record, history of repairs, parts inventory, parts vendor information, outstanding work orders, past due report, maintenance scheduling and daily activity reports. Generates hard copies of work orders, requisitions and management reports.

IBM PC ☐ 256 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $5,995-$16,000

ANAWAN COMPUTER SERVICES

☐ PM-STATUS II

Preventive maintenance status system. Identifies equipment overdue for scheduled maintenance. Displays or prints status records. Generates list of equipment groups, preventive maintenance categories and log sheet for shop use.

IBM PC, AT, XT ☐ 128 KB req. ☐ Copies sold: 150 since 1980 ☐ Cost: $395

ARTHUR ANDERSEN & CO.

Management Information Consulting Division

☐ Micro Maintenance Management (M3S)

Work Order Planning and Tracking. Stores/Materials Control and Equipment Monitoring.

IBM PC ☐ 384 KB req. ☐ Copies sold: 25 since 1984

APPLIED COMPUTER RESOURCES, INC.

☐ ISIS (In-Service Inspection Data System)

Automates data management and implements surveillance and component testing requirements. Addresses ASME and procedural requirements for mechanical components such as pumps, valves and piping supports. Data tracking, sampling, scheduling and provides status of current activities. Records performance and repair histories for trend analysis. Stand-alone or integrates with mainframe data bases.

IBM PC ☐ 384 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $20,000

THE AUSTIN CO.

Management Consulting Division

☐ MCRS-1 (Maintenance Control and Reporting System)

Repair and preventive maintenance work order planning, tracking and reporting. Equipment history. Inventory. Timekeeping. Management reporting.

IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 9 since 1985 ☐ Cost: $7,500

☐ PPM

Automatic predictive and preventive maintenance planning, scheduling and tracking. Compliance and performance reporting.

IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $4,500

BENTLY NEVADA CORP.

☐ Machine Monitoring

Monitoring and diagnostics for rotating machinery for plant operators, maintenance engineers and machinery specialists. Trend, current values, bargraphs, train block diagrams, alarm indication, set-up list configuration, sequence of events log, comments, reports and graphic data listings.

IBM PC, XT

CENTAURUS SOFTWARE, INC.

☐ ARGUS

Reports analyze costs, supplies, work orders and equipment.

☐ 128 KB req. ☐ Copies sold: 5 since 1984 ☐ Cost: $4,500

COMPUTER ANALYSTS INTERNATIONAL, INC.

☐ Prefix Maintenance Management System

Preventive maintenance management. Automatic work order production by time interval or meter reading (Prefix) or special request (Repairs), equipment performance history, financial history analyses/summaries, cost projections, manpower/materials requirements. Spare parts inventory management (Stores); equipment master list (Equipment). User-specified reports.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 90 since 1984 ☐ Cost: $995-$5,995

COMSEN, INC.

☐ P.I.E.M.I.S

Parts, inventory, equipment and maintenance information. Information on repair, down time and cost of operation. Several breakdowns of operational costs.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 10 since 1983 ☐ Cost: $7,000

CONSTRUCTION SYSTEMS SOFTWARE, INC.

☐ Equipment

Maintenance, master file print, on-line inquiry, trial balance and detail ledger. Enters journal entries, hours and gallons. Reports equipment utilization.

IBM PC ☐ 96 KB req. ☐ Copies sold: 60 since 1978 ☐ Cost: $1,000

CORE SOFTWARE, INC.

☐ FasTrak Repair Tracking For Inventory

Works with FasTrak Service Management. Tracks parts removed for repair, belonging to user/customer, as to when and to whom they were shipped off, when they are expected, and when they were returned. Allows for swapping. Prepares shipping labels and paperwork.

☐ 256 KB req. ☐ Copies sold: 40 since 1986 ☐ Cost: $500

☐ FasTrak Service Department Management

Designed for firms which service equipment or property belonging to others. Schedules PMs. Prints service invoices and maintenance histories. Analyzes technician's time. MTTR. Adds dispatching and contract processing. Requires FasTrak GL and AR. Multi-user support on PC networks.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $1,950

☐ FasTrak Service Dispatching And Depot Tracking

Works with FasTrak service management, GL and AR, to provide tracking of service requests. Call handling designed for fast response. Analysis reports include problem by model, problem by technician, and response time. Contract processing. Multi-user support on PC networks.

IBM PC ☐ 256 KB req. ☐ Copies sold: 45 since 1986 ☐ Cost: $1,000

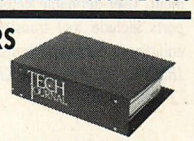
CORPORATE INFORMATION SYSTEMS, INC. (CIS)

☐ PREMISE (Preventive Maintenance Information System Executor)

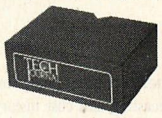
Provides maintenance management information for plant equipment, electrical and mechanical machinery, facilities and fleet vehicles. Functions include equipment and maintenance procedures, scheduling, order control, work history data capture, user-specified reporting and shop work hours calendar.

IBM PC ☐ 512 KB req. ☐ Copies sold: 5 since 1983 ☐ Cost: $7,500

PROTECT YOUR COPIES OF PC TECH JOURNAL



Make your collection of PC TECH JOURNAL a handsome addition to your office or home—and protect and organize your copies for easy reference!



PC TECH JOURNAL Magazine Binders and cases are made of durable luxury-look leatherette over quality binder board. Custom designed for PC TECH JOURNAL, every order receives FREE transfer foil to mark dates and volume numbers.

FOR FAST SERVICE CALL TOLL-FREE 1-800-972-5858

MAGAZINE BINDERS

Hold your issues on individual snap-on rods. $8.95 each; 3 for $25.75; 6 for $48.75.

OPEN BACK CASES

Store your copies for individual reference. $7.95 each; 3 for $22.95; 6 for $43.95.

PC TECH JOURNAL P.O. Box 5120 Philadelphia, PA 19141

CREATIVE MAINTENANCE SYSTEMS, INC.

☐ CAMS II - Maintenance Management Program

Manages equipment preventive maintenance and repair programs, facility work order control, spare parts inventory, and history and cost accounting. Schedules maintenance by calendar, run-time and/or mileage. Allows customized reports.

IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 24 since 1984 ☐ Cost: $5,900

THE DATA GROUP CORP.

(a NYNEX Co.)

☐ Fieldwatch

Includes Dispatch-Plus, Logistics-Plus, Billing-Plus, Remote-Plus, TAC-Plus, RCM-Plus and Forecasting-Plus. Controls service call tracking, field service inventory management, revenue tracking, remote diagnostics, billing and service profitability analysis. Forecasts yearly/monthly parts, manpower, equipment and warranty data. Preventive maintenance scheduling. Multiple search capability. Management reporting.

IBM PC ☐ Copies sold: 120 since 1983 ☐ Cost: $3,000

DATASOUTHERN, INC.

☐ Equipment Maintenance Scheduling-HE

Handles heavy equipment. Automatic scheduling by units. Maintenance history with costs, dates, and units. User-defined parameters for both units and hours. Optional spreadsheet and data base interface.

IBM PC ☐ 384 KB req. ☐ Copies sold: 4 since 1984 ☐ Cost: $995-$1,295

☐ Equipment Maintenance Scheduling-OR

Designed for over-the-road vehicles. Schedules preventive maintenance by miles or hours. Dates controlled reports. User overrides.

IBM PC ☐ 384 KB req. ☐ Copies sold: 3 since 1984 ☐ Cost: $995-1,295

DECISION DYNAMICS, INC.

☐ DynaStar II

Provides management tools for recording, scheduling, tracking and reporting of both preventive and corrective maintenance, parts inventory and detailed cost and time analysis for both types of activities. Provides facilities for tracking, analyzing and reporting machine history information.

IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $8,750

DEVCOR, INC.

☐ TEAM (Tool & Equipment Accounting Management)

Tracks status, location and transfers of 16,000 tools and equipment. User-definable categories. Maintenance notebook. Reports include tool transfer slips, project review summaries, equipment cards and transaction histories.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 33 since 1985 ☐ Cost: $695

DIAGONAL DATA CORP.

☐ Micro Maint

Plant maintenance system. Provides work order processing, PM scheduling, parts inventory, forecasting and cost history, machine case history and maintenance management reporting. Optional Maintlog interface permits CAMM-collected data to trigger maintenance procedures and work orders.

IBM PC, XT, AT ☐ Cost: $4,950-$9,950

DP SYSTEMS & SERVICES, INC. (DPSS)

☐ MMS (Maintenance Management System)

Prevents breakdowns and tracks machine failure rates. Forecasting method determines labor and spare parts requirements. Maintenance history reports by department or defined equipment group. Prepares project work orders including required parts/tools.

IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 3 since 1984 ☐ Cost: $4,500

ELKE CORP.

☐ Main/Tracker (Elke Maintenance Management System)

Assists in planning, scheduling and controlling work orders, monitoring preventive/corrective maintenance and controlling spare parts inventories. Features emergency work control, work order inquiry/reporting, repair/component history, working BOM, issues/returns, pick lists and parts catalogs.

IBM PC, XT, AT ☐ Copies sold: 540 since 1979 ☐ Cost: $4,000

ENERGY, INC.

☐ MICRO-SIMS

Work order, equipment control and tracking. Work request/trouble report processing, work orders printed for issue, work order tracking, equipment history generation, periodic maintenance forecasting and CM and PM trial schedule evaluation.

IBM PC ☐ 256 KB req. ☐ Copies sold: 1 since 1984 ☐ Cost: $4,995

ENTEK SCIENTIFIC CORP.

☐ EXAMINE

Locates potentially defective parts so they can be replaced before failure occurs.

IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $5,000

GLOBAL SOFTWARE CONSULTANTS, INC.

☐ Taskmanager II

Maintenance management of equipment. Work orders and reports showing maintenance time, status, costs, standard life expectancy and scheduled and unscheduled maintenance histories. ISAM file structure. Accesses other files without exiting current file.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $5,995

HARRIS TECHNICAL SYSTEMS

☐ Machinery Record Keeping

Tracks machinery inventory, cost history, repair cost, fuel and use, labor costs and repair frequency. Maintenance schedules. Graphs cost history, repair frequency by machine and repair frequency by year.

IBM PC ☐ 64 KB req. ☐ Cost: $595

HRL ASSOCIATES, INC.

☐ TMS (Total Maintenance System)

Facilities maintenance and inventory management. Generates preventive maintenance, corrective/repair maintenance and project-related work orders, and maintenance management and inventory system management reports. Distribution, return, receipt and adjustments to maintenance inventory accounting. Multi-user capabilities.

IBM PC ☐ 128 KB req. ☐ Copies sold: 102 since 1984 ☐ Cost: $6,295-$9,954

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Hardware Maintenance and Service

IBM no. 6025-072.

IBM PC ☐ Cost: $155

J B SYSTEMS, INC.

☐ MAINSAVER

Management information system. Manpower, materials and equipment histories with financial controls. Schedules preventive maintenance and provides histories of plant and equipment. Tracks work orders, spare parts inventory and POs.

IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $5,000-$27,000

☐ Micro Maintenance

Preventive maintenance scheduling and corrective maintenance tracking using management information system approach. Includes plant and equipment maintenance histories.

IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $3,000

JONAS & ERICKSON SOFTWARE TECHNOLOGY, INC.

☐ Maintenance Service Contractors System

Designed to handle information requirements of small or large, simple or complex service environments. User-definable processing structures including multiple contracts, definition of charge types and code, and AR integration.

IBM PC, XT, AT ☐ Copies sold: 5

JOSALLI, INC.

☐ PMS (Preventive Maintenance System)

Sets up equipment inventory with descriptive and accounting information. Establishes preventive maintenance tasks and schedules for equipment. Prints weekly job schedules, inventory lists, task lists and future work schedules. Retains, extracts and reports historical information on maintenance jobs.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 600 since 1983 ☐ Cost: $495

☐ WOT (Work Order Tracking)

Plans, schedules and tracks maintenance activities. Prepares job work orders with appropriate accounting and job costing information. Extracts and reports from history file.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $495

MAINTENANCE AUTOMATION CORP.

☐ Chief Software

Work order processing, scheduled preventive maintenance, grid locations, blueprint and document files, site and electromechanical facts and management reports. Spare parts and supplies inventory.

IBM PC ☐ 256 KB req. ☐ Copies sold: 300 since 1982 ☐ Cost: $2,000-$20,000

MIS/R SYSTEMS CO., INC.

(division of Fleetridge, Inc.)

☐ MIS/R (Maintenance Information System & Record)

Provides structured maintenance planning, scheduling and recordkeeping. Generates and controls work orders. Maintains equipment history. Provides maintenance cost reports. Reviews and adjusts manpower and maintenance organization work loads. Analyzes energy and utility cost and consumption.

IBM XT, AT ☐ Cost: $6,900

MODERN MANAGEMENT, INC.

☐ CMTS

Maintenance time standards management and data base. Allows determination of standard time for maintenance job prior to job start. Measures productivity levels. Calculates staffing requirements.

IBM PC, XT, AT ☐ 256 KB req.

☐ MODCAM

Maintenance management. Work Order Tracking, IC, Nameplate Tracking, Preventive Maintenance Tracking, Equipment History and PO Tracking. Status and work schedules. Current balance, location and YTD issues.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 125 since 1982 ☐ Cost: $20,000

NORSE SYSTEMS, INC.

☐ CEMP1 (Capital Equipment Maintenance Program)

Maintenance management system for fleet vehicles. Includes Fuel/Energy Control, Unit/Equipment Cost Reporting, Maintenance Reporting Sub-system, Inventory/Purchasing Control, AP, GL and Payroll modules. Provides DBMS access to all applications.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $15,500

NORTHOUSE INDUSTRIES INTERNATIONAL

☐ MachineStar

Machine maintenance program for stationery stock. Schedules regular maintenance and overhauls. Calculates work/costs for each piece of equipment. Keeps stock inventory of parts used in repairs, maintenance and overhauls.

IBM PC ☐ 192 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $495-$695

O'BRIEN & GERE ENGINEERS, INC.

☐ **Inventory Control System**
Indexes parts description and one or more parts numbers providing cross referencing to several number systems. Lists alternate parts. Retrieves part by referencing equipment which uses part. Imports equipment inventory information from Maintenance Management System.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 1 since 1985 ☐ Cost: $3,000

☐ **Maintenance Management System**
Maintains equipment inventory by unit and component. Defines component by manufacturer and model number. Assigns maintenance tasks on component basis. Produces preventive and corrective work orders, and current and historical management reports.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 8 since 1985 ☐ Cost: $3,000

OLIVER MARKETING, INC.

Specialized Software Division

☐ **PERDEC**
Decision-support to determine optimal replacement time to replace plant machinery and equipment. Input requirements include a history of operating and maintenance costs, acquisition cost, and estimated resale values.
IBM PC ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $1,495

☐ **RELCODE**
Uses data related to the history of component failures to determine the best replacement policy, whether to replace when a component actually fails, or to replace on a preventive maintenance basis.
IBM PC ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $1,495

OMNI COMPUTER SYSTEMS, INC.

☐ **Centaur**
Determines the cost of operations, identifies problem vehicles, most common repair problems and assists in management of routine activities. Accommodates preventive maintenances, warranty performance evaluation, spares and manpower requirements.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1 since 1983 ☐ Cost: $1,500

OMNICOMP, INC.

☐ **SERVICE CALL**
Integrated corrective and preventive work order tracking, analysis and reporting for facilities and equipment maintenance.
IBM PC, XT ☐ 384 KB req. ☐ Copies sold: 65 since 1983 ☐ Cost: $795

PENGUIN COMPUTER CONSULTANTS

☐ **Maintenance and Inspection**
Maintenance management system including parts inventory. Flexible coding structures and scheduling options. Prepares working, planning and analysis reports.
IBM PC ☐ 256 KB req. ☐ Copies sold: 60 since 1984 ☐ Cost: $2,500

PENTON SOFTWARE, INC.

☐ **MaintenancePro**
Preventive Maintenance, Planning, Scheduling and Control, and IC modules. Monitors maintenance efforts, coordinates equipment replacement, tracks labor and material cost.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $995

☐ **MaintenancePro Plus**
Preventive maintenance, planning, scheduling, work orders and IC. Inputs facilities data, monitors maintenance efforts, coordinates equipment replacement, and tracks labor, material, and miscellaneous cost. Generates reports.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $1,595

☐ **Penton/Maintenance I**
Preventive Maintenance, Inventory, Work Order, Bar (Gantt) Chart Scheduling and Systems Management modules.
IBM XT ☐ 256 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $2,995

☐ **Penton/Maintenance II**
Preventive Maintenance, Inventory, Work Order, Bar (Gantt) Chart Scheduling, Systems Management, Equipment History, PO Tracking and Spare Parts Lists Modules.
IBM XT ☐ 256 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $4,995

☐ **Penton/Maintenance III**
Preventive Maintenance, Inventory, Work Order, Scheduling, Systems Management, Equipment History, PO Tracking, Spare Parts, Fixed Assets, Warranty and Forms Design Modules.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $6,995

☐ **Penton/Maintenance IV**
Preventive Maintenance, IC, Work Orders, Scheduling, Systems Management, Equipment History, PO Tracking, Spare Parts, Fixed Assets, Warranty and Forms Design modules. Networking capability, equipment data, tool box and personnel management.
IBM PC, AT ☐ 512 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $9,495

PINETREE COMPUTER SYSTEMS, INC.

☐ **Dispatch Express Field Service Management System**
Uses portable hand-held terminal to dispatch and call from field. Tracks equipment in field. Maintains records of repair time and expenses. Locates personnel. Handles accounting functions and contract administration. Modules include Dispatch/Close, IC, Contract Administration, Billing, AR, GL and AP.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $9,995; $3,995 per module

☐ **Field Service DATA Management System**
Field personnel daily report on product, repair, expenses, parts usage and customer data. Retrieves data by customer name, service performed, time consumed, manufacturers product, parts used and/or service cost.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $1,000

PLANTEC CORP.

(subsidiary of Reynolds, Smith and Hills Architects-Engineers-Planners, Inc.)

☐ **PFM (Plant and Facilities Management)**
Work order/fixed asset management system for power plants, utilities, schools, manufacturers and process plants. Supports regular/preventive work orders. Provides materials management with purchasing/issues/returns. Maintains work order/component history and replacement costs. Provides actual vs. budget cost information.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 15 since 1983 ☐ Cost: $5,000

PMS (PLANNED MAINTENANCE SYSTEMS)

☐ **EMS 201 (Equipment Maintenance System)**
Preventive/corrective maintenance work orders. Reports include inventory, deferred maintenance, backlog, repair price as percent of purchase price, down time, employee performance report, maintenance history and failure analysis. Includes space utilization data base and management information system.
IBM PC ☐ 512 KB req. ☐ Copies sold: 180 since 1981 ☐ Cost: $5,000-$20,000

☐ **FMS Facility Management System**
Building, grounds, equipment and related structures. Work project, equipment and materials management; time accounting, budget/accounting and on-line report generation.
IBM PC ☐ 512 KB req. ☐ Copies sold: 180 since 1981 ☐ Cost: $10,000-$150,000

☐ **Prime B&A (Budget and Accounting)**
Tracks budget, authorization, commitments and expenditures against budget accounts. Accepts transactions from PMS Time Accounting System and TAS modules.
IBM PC ☐ 512 KB req. ☐ Copies sold: 8 since 1984 ☐ Cost: $3,000-$20,000

☐ **Prime INV (Material/Parts Inventory Management)**
Includes purchase/requisitions, reserves parts/materials, handles automatic reorder. Rates vendor performance. Accommodates multiple activities. Batch or lot control.
IBM PC ☐ 512 KB req. ☐ Copies sold: 11 since 1983 ☐ Cost: $5,000-$10,000

☐ **Prime PMS (Project Management System)**
Tracks multi-level project development. Creates work orders, manpower estimates and BOM. Reports tasks, dependencies and schedule impacts. Integrates with PMS Equipment Maintenance, Buildings and Grounds Maintenance, IC, Budget and Accounting and Time Accounting modules.
IBM PC ☐ 512 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $3,500-$30,000

☐ **Prime TAS (Time Accounting System)**
Records employee labor from time cards. Interfaces to PMS' EMS, WMS, PMS and Budget & Accounting and includes employee data file, labor transaction file, and codes lookup tables. Provides reports of employee charges and performance.
IBM PC ☐ 512 KB req. ☐ Copies sold: 18 since 1984 ☐ Cost: $3,000-$7,500

☐ **SWORD (Swift On-Line Report Developer)**
Report formatting, record selection, record sorting, data field calculations, subtotaling and totaling. Included with Prime-Work Order System.
IBM PC ☐ 512 KB req. ☐ Copies sold: 180 since 1984 ☐ Cost: $3,500-$10,000

☐ **WMS 201 (Work Management System)**
Issues work orders for corrective/preventive maintenance on buildings/grounds. Space utilization data base and management information system. Maintenance history/cost tracking. Interfaces with PMS' Equipment Management, Time Management, Project Management, Budget and Accounting and Inventory Management systems.
IBM PC ☐ 512 KB req. ☐ Copies sold: 180 since 1983 ☐ Cost: $3,500-$30,000

PROJECT SOFTWARE & DEVELOPMENT, INC. (PSDI)

☐ **Maximo Maintenance System**
Work order tracking, IC, preventive maintenance management and equipment histories tracking. Produces predesigned or user-formatted reports. Handles information with relational DBMS. Includes mouse.
IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $17,900

REMASCO, INC.

☐ **Plant Maintenance PM and Work Order Control System**
PM Scheduling by week, work order scheduling by tradesman. Prints work order assignments by each tradesman in priority order. Spare parts inventory and costing of labor and materials. Includes management, accounting and tradesmen performance reports.
IBM XT, AT ☐ 128 KB req. ☐ Copies sold: 1 since 1983 ☐ Cost: $10,000-$15,000

SCOTT & SCOTT CONSULTANTS, INC.

☐ **CTCS (Computerized Trouble Call System)**
Maintains required data by Distribution Primary Analysis, Transformer Load Management and Customer Inquiry. Processes all calls via interactive terminals. Determines probable devices out-of-service. Summarizes outage cases.
IBM AT ☐ Cost: $27,500

THE STANWICK CORP.
Operations and Maintenance Engineering Division

☐ Maintenance Management System
Planned Maintenance, Corrective Maintenance, Repair Planning and Spare Parts IC modules. Printed reports and work orders. Labor and material costs, repair status, machine history and parts inventory.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 5 since 1983 ☐ Cost: $2,500 and up

SYSTEMS ASSOCIATES, INC. (OH)
☐ Preventive Maintenance System
Informs user of rooms and pieces of equipment to be maintained on periodic basis. Performs up to 20 specific tasks. Generates work orders at correct intervals. Defines 100 pieces of equipment in each category.
IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 4 since 1984 ☐ Cost: $2,500

☐ Work Order System
Assigns and monitors progress of various work projects. Prints, records and sorts work orders and tickets.
IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 7 since 1984 ☐ Cost: $2,500

TMM SYSTEMS
(division of Weiss Associates, Inc.)

☐ TMM-Total Maintenance Management Control System
Maintenance IC, Corrective Work Order and Preventive Maintenance and Equipment History modules. Spare parts inventory. Data base of open and closed work orders. Daily scheduling and weekly planning. Computes labor and material costs.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1979 ☐ Cost: $9,500

TOMARK-CYBER ASSOCIATES, INC.
☐ Equipment Maintenance
Maintains equipment inventory. Allows customized preventive maintenance. Creates maintenance and repair work orders. Tracks gas inventory, repair costs and warranties.
IBM PC, XT, AT ☐ 12 KB req. ☐ Copies sold: 6 since 1980 ☐ Cost: $3,000

UNIK ASSOCIATES
☐ CMMS (Computer-Aided Maintenance Management System)
Integrated equipment history, preventive maintenance, work order system, spare parts IC and craft definition modules. Report categories include equipment, preventive maintenance, work order and IC. Preventive maintenance scheduling by run time or calendar date.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $5,500

☐ MMS (Maintenance Management System)
Equipment history, preventive maintenance, work order control and spare parts IC. Communicates with several existing building monitoring systems.
IBM PC ☐ 512 KB req. ☐ Copies sold: 75 since 1983 ☐ Cost: $5,995

☐ MMS II (Advanced Maintenance Management System)
Preventive maintenance, equipment data and history, repair history, work order system and IC. Computes each craft's productivity based on estimated and actual hours. Gives option to update inventory upon completion of a work order. Password system.
IBM PC, XT, AT ☐ Cost: $5,995

UNIVERSAL DATA RESEARCH, INC.
☐ Maintenance System
Equipment maintenance scheduling. Records scheduling, equipment descriptions and detailed maintenance routines. Interfaces with UDRI DBMS.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1980 ☐ Cost: $695-$1,195

EXPERT SYSTEMS

ARITY CORP.
☐ Expert Systems Development
Constructs expert systems and knowledge intensive programs. Provides 2 ways of representing knowledge and taxonomy of frames and rule-based system. Handles optimized backward chaining and bi-directional interfacing. Requires Arity/Prolog Compiler or Interpreter.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $295

ARTELLIGENCE, INC.
☐ Prodigy
Artificial intelligence.
IBM PC ☐ Cost: $450

ARTIFICIAL INTELLIGENCE RESEARCH GROUP
☐ ELIZA
Non-directive psychotherapist who analyzes each statement as it is typed and then responds with a comment or question. Conversation is saved in a buffer which can be stored on disk. Implementation of the mainframe version of MIT's ELiza.
IBM PC ☐ 48 KB req. ☐ Copies sold: 9,000 since 1981 ☐ Cost: $45

CALIFORNIA INTELLIGENCE
☐ XSYS
Suited for structured classification or catalog selection applications depending on a variety of input criteria. Facilities include knowledge attributes, variables and operators in if-then parts of any rule, handling of uncertainty and negation, and concatenation of hierarchically related knowledge bases.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 34 since 1983 ☐ Cost: $995

CHALCEDONY SOFTWARE
☐ Prolog V
Reviewed Jan 1986 p. 145.
Artificial intelligence language. Features Clocksin and Mellish-Standard Edinburgh Syntax, interactive debugging, 70 predefined predicates and integer arithmetic.
IBM PC ☐ Cost: $70

☐ Prolog V Plus
Artificial intelligence language. Clocksin and Mellish-Standard Edinburgh Syntax, interactive debugging, over 100 predefined predicates, floating point arithmetic, coresident program editor, calls to coresident programs and text and graphic screen manipulation.
IBM PC ☐ Cost: $100

☐ Prolog/i
Artificial intelligence language. Features over 100 predefines and operators, subroutine function library, and built-in, integrated editor. Supports double-precision floating point arithmetic and Clocksin and Mellish-Standard Edinburgh Syntax.
IBM PC ☐ 256 KB req. ☐ Cost: $70

COMPUTER * THOUGHT CORP.
☐ OPS5+
Expert system development and debugging tool.
IBM PC ☐ Cost: $1,850

CYBERENGINEERING CORP.
☐ CyberOracle - Forecasting of Time Series via Artificial Intelligence
Uses pattern cataloging to develop interrelationships. Combines interrelationships with logic decision tables to produce forecasts.
IBM PC

☐ CyberTools Artificial Intelligence Library
Collection of programs for AI and expert system builders. Includes a version of LISP written in Pascal, XLISP with C source code and supporting utilities.
IBM PC

DIALOG SYSTEMS, INC.
☐ LESP (Logistics Expert Systems Programs)
Develops applications for materials, production and distribution problems. Includes interactive knowledge base debugging, question generation, explanation of responses and factors to consider uncertainty.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 1 since 1985 ☐ Cost: $5,000-$25,000

DYNACOMP, INC.
☐ Eliza II
Artificial intelligence system.
IBM PC ☐ 48 KB req. ☐ Cost: $20

DYNAMIC MASTER SYSTEMS, INC.
☐ TOPSI
Artificial intelligence language system. Performs data driven symbolic processing using user-supplied rules. Permits multiple compound logical arithmetic conditions resulting in different actions. Rule base and data base saved separately.
IBM PC ☐ 65 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $75-$195

EXPERT SYSTEMS INTERNATIONAL
☐ ESP Advisor
Expert system consultation shell. Constructs knowledge bases of up to 3,000 rules and offers advantages for developers of knowledge-based software applications.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1984 ☐ Cost: $895

☐ PROLOG-1
Reviewed Jan 1986 p. 145.
Prolog interpreter based on standard Edinburgh syntax. Features floating-point arithmetic, debugging tools including break, backtrace, trace and spy predicates, interprocess communication and C, Pascal and Ada interfaces.
IBM PC, XT, AT ☐ Introduced: 1981 ☐ Cost: $95

☐ PROLOG-2
Prolog interpreter/compiler based on full Edinburgh syntax with built-in predicates for controlling windows. Includes full screen program editor, generalized tokenizer for free format input, full screen graphics, tail recursion, optimization, real arithmetic to IEEE long real format and precision and optional 8087 support.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1985 ☐ Cost: $1,895

EXPERT SYSTEMS, INC.
☐ Expert-Ease
Discovers rules from examples. Spreadsheet format for knowledge acquisition and maintenance. Builds pratical expert systems. Makes intuitive decision processes explicit.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $595

EXSYS, INC. (NM)
☐ EXSYS (Expert System Development Package)
Expert system development environment. Utilizes if/then/else production rules with probability. Features why, how, notes, reference, blackboarding, report generator, backward/forward chaining and math including trig. and log. Supports color. Interfaces to any .EXE file.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,300 since 1984 ☐ Cost: $395

GENERAL RESEARCH CORP.
☐ TIMM (The Intelligent Machine Model)
Primary functions are build, train, and exercise. Using the build function, user defines the choices that the system will make and the factors that influence that choice. After defining the values associated with each factor, system is trained using rules generated by both the user and the system.
IBM PC, XT, AT ☐ Cost: $9,500

HEURISTICS, INC.

☐ **Onspec Superintendent**
Performs knowledge-based process control in English.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $1,985

HUMAN EDGE SOFTWARE CO.

☐ **Communication Edge**
Assesses user's communication style relative to approach likely to be taken by counterpart. Generates strategy with ideas geared toward effective communication between parties.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $100

☐ **Expert Edge**
Rule-based expert system builder to develop interactive knowledge-based program. Incorporates calculations, reason, judgement, facts and uncertainties. Uses probabilites and Bayesian statistics. Interfaces to data bases, spreadsheets and word processors.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $795

☐ **Management Edge**
Offers strategies in solving situations including raising productivity, increasing performance, improving communications, effective disciplining, firing and policing subordinates. Bases strategies on information supplied about managers, organization and subordinates.
IBM PC, PCjr ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $100

☐ **Mind Over Minors**
Manages and motivates young people ages 5-18 by providing a strategy report based on personality of teacher or parent and the child. Generates report by responding to a series of questions.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $30-$50

☐ **Negotiation Edge**
Aids in developing strategies for conducting negotiations or bargaining. User completes assessment on self, counterpart and circumstances of negotiation. Negotiation plan generated based on assessments.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $100

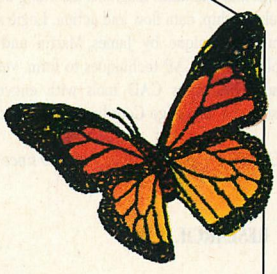
☐ **Sales Edge**
Provides individually-tailored strategy for dealing with specific customers. User completes assessments on himself and customer. Generated report contains sales strategy tailored to salesman's and customer's personality.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $100

INTELLICORP

☐ **KEE System**
Builds knowledge based systems, from prototype through finished product, to deliver to end users. Provides supportive environment that helps user understand how system uses its knowledge to solve problems and make decisions. Application knowledge base can be extended.
IBM RT PC

KDS CORP.

☐ **Knowledge Delivery System**
Expert system shell and run-time system. Produces up to 16,000 rules from up to 4,096 case histories per module. Uses 512 conditions in any combination to distinguish one case history from another. Interfaces with other systems at front and back end.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $945



KEPNER-TREGOE, INC.

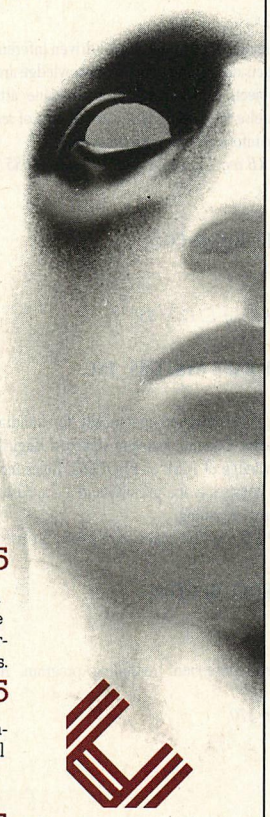
☐ **Trouble Shooter**
Finds the causes of problems, such as equipment malfunction, low sales and productivity. Works by organizing the facts surrounding the problem and allowing the user to test the possible causes against the facts.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $250

Chalcedony PROLOG

Not Copy Protected

A REAL Clocksin & Mellish Prolog for BOTH major microcomputing operating systems — with full cross-compatibility. **$99.95**

Complete with the predicates necessary for POWER AI programming:
op () name () functor () clause () =..("Univ")
...And no constraining data typing.



- Floating point
- Step-by-step tutorial
- Math functions
- Integrated editor

PROLOG/i

Extensible overlay library, 8087 support, large memory model (up to 640K)

PROLOG/m

Complete Macintosh environment with extensive pull-down menus and dialogue boxes.

No Risk Offer: *Examine the PROLOG/i or PROLOG/m documentation at our risk for 30 days. If not completely satisfied, return with disk still sealed for refund.*

APPLICATIONS—
Complete with SOURCE CODE

NFL X-pert **$49.95**
A true interactive expert system written by a professional knowledge engineer. A valuable learning tool for any Prolog programmer interested in using Prolog to develop expert systems.

TOOLBOX **$29.95**
More than 50 subroutines that speed and compress list handling, searches, sorts, and reversal algorithms. An inside look at the tricks of the professional Prolog programmer.

TOYBOX **$29.95**
Written by an academician to help his students understand Prolog, this collection of puzzles and mind-teasers will illustrate how the Prolog programmer creates programs that find the best solution to the problem. Turn your computer into a super reasoning machine!

CHALCEDONY SOFTWARE, INC.

5580 LA JOLLA BLVD.
SUITE 126 A
LA JOLLA, CA

CIRCLE NO. 342 ON READERS SERVICE CARD

KNOWLEDGEWARE, INC.

☐ (IEW) Information Engineering Workbench
Creates, validates and maintains diagrams including decomposition, entity-relationship, data flow and action. Logic and process diagramming technique by James Martin and Carma McClure. Employs CAD/CAP techniques to form, verify and reverse diagrams. Integrates CAD tools with encyclopedia knowledge base and Knowledge Coordinater AI-based expert system.
IBM PC, AT ☐ 2,000 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $7,500

LEVEL FIVE RESEARCH, INC.

☐ Insight 1
Provides a backwards chaining or goal-driven inference control structure. Supports if-then-else rule. Allows a confidence factor for each rule. Each fact is obtained within a confidence factor. Provides a report of current path of reasoning and explanatory information on a question or topic.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,500 since 1984 ☐ Cost: $95

☐ INSIGHT 2+
Backwards and forwards chaining or goal-driven inference control structure. Facts describing domain of knowledge are represented using objects with single- or multi-value attributes. Supports if-then-else rules. Reports on current path of reasoning and explanatory information on question/topic.
IBM PC ☐ 480 KB req. ☐ Copies sold: 700 since 1985 ☐ Cost: $985

MCGRAW-HILL BOOK CO.

☐ MicroExpert
Expert system.
IBM PC ☐ 64 KB req. ☐ Cost: $50

MICRO DATA BASE SYSTEMS, INC.

☐ Guru
Artificial intelligence designed specifically for building business expert systems. Communicates in standard English. Does not require knowledge of LISP or PROLOG. Rules include if-then statements consisting of a premise and a conclusion. Uses backward/forward reasoning.
IBM PC ☐ 640 KB req. ☐ Copies sold: 1985 ☐ Cost: $2,995

MILLER MICROCOMPUTER SERVICES

☐ Expert 2
Knowledge-based consequent reasoning program. Requires MMS-Forth.
IBM PC ☐ Cost: $70

OPTISOFT

☐ Optisolve
Handles a single equation in one unknown, a system of simultaneous equations in several variables, and maximization or minimization of a function with constraints.
IBM PC ☐ Cost: $195

JEFFREY PERRONE & ASSOCIATES, INC.

☐ Ex-Tran 7
Expert system development tool. Establishes hierarchical dependency between rules. Generates Fortran 77 code. Links external Fortran subroutines with the expert system to capture data.
IBM XT, AT ☐ Copies sold: 100 ☐ Cost: $3,500

☐ Expert-Ease
Expert system development tool. Checks for conflicts or clashes as examples are fed into knowledge base. Indicates areas with incomplete information. Allows independent construction and testing of knowledge system sub-components.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $695

☐ Exsys
Expert system development tool. Provides rule editor and mathematical functions. Supports certainty factors, with multiple modes of calculating probabilities available. Performs what-if sensitivity analysis by changing one or more answers to questions. Includes runtime version. Works with ram disk programs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $395-$600

☐ Insight
Expert system develpment tool. Enters knowledge in Production Rule Language. Uses if-then rules and goal outlining to define knowledge. Features forward and backward chaining mechanisms for its reasoning processes. Inference program reasons from uncertain information.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,500 ☐ Cost: $95

PORTABLE SOFTWARE, INC.

☐ Xi
Expert systems shell designed for advisory and knowledge communications.
IBM PC ☐ 384 KB req. ☐ Cost: $795

PRODUCTION SYSTEMS TECHNOLOGIES

☐ OPS83
Rule-based, expert systems programming language. Interfaces programs to existing programs written in other languages.
IBM PC ☐ Cost: $1,950

PROGRAMMING LOGIC SYSTEMS, INC.

☐ APES (Augmented PROLOG for Expert Systems)
Expert system shell. Constructs logic based expert systems. Queries user for information which is not in data base. Decides when to ask questions. Provides explanations of its reasoning. Includes meta queries, automatic menu generation, validity constraints, and natural language syntax. Requires micro-PROLOG.
IBM PC ☐ Introduced: 1984 ☐ Cost: $99-$395

PROGRAMS IN MOTION, INC.

☐ 1st-Class
Expert system development program. Builds diagnostic systems with visual aid or prompting, and/or with hardware data sensing/control. Ranks diagnostic tests. Controls external processes/equipment. Exchanges information with data bases. Global variables, report generator, trace facility, explanation facilities and expanded rule capacity.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $495

RADIAN CORP.

☐ RuleMaster
Includes RuleMaker subsystem and Radial interpreted language. Induces rules from example. Expresses and executes rules. Interfaces external programs including graphics libraries and data bases. Generates expert systems in C code.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $995-$17,500

THE SAVVY CORP.

☐ PC Language/Database Manager/Retriever
Artificial intelligence data base, programming language and natural query language.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 25,000 since 1984 ☐ Cost: $139; $79 each

SOFTSYNC, INC.

☐ SuperExpert
Expert system development program. Induces rules from examples already held in data bases and spreadsheets. Includes natural language inquiry system. Allows up to 1,000 examples for each problem/subproblem and 50 logical/integer attributes per problem. Links with Softsync's Reports Plus.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $199-$1,200

SOFTWARE ARCHITECTURE AND ENGINEERING

☐ KES II (Knowledge Engineering System)
Accepts English-like definitions and converts them into a form suitable for combination with the software. Contains production rules, statistical pattern classification and hypothesis and test subsystems. Each has its own form of knowledge representation and inference mechanism and can communicate with one another.
IBM PC ☐ 640 KB req. ☐ Copies sold: 12 since 1984 ☐ Cost: $4,000-$25,000

☐ KES.BAYES
Includes KES knowledge base parser and user interface system integrated with Bayesian statistical inference mechanism. Appropriate for those applications where knowledge is usually organized around well-known statistical patterns.
IBM PC ☐ 640 KB req. ☐ Copies sold: 40 since 1982

SOFTWARE INTELLIGENCE LABORATORY, INC.

☐ CICS Expert
Knowledge base for CICS programmers. Includes design considerations, problem determination, CICS facilities, BMS, TDQ, VSAM File and DL/I interface, task control, temporary storage, program control, debugging and command level and coding techniques.
IBM PC, XT, AT ☐ Cost: $95

☐ Wizdom
Generic expert system shell.
IBM PC, XT, AT

SOFTWAY, INC.

☐ XPER
Applications include computer assisted education, test and problem solving, help to decision making, diagnosis and scientific and financial applications. Menu-driven with on-line help. The determination is done by a query-response system.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1984

SOLUTION SYSTEMS

☐ PROLOG-86 Language for Artificial Intelligence
Reviewed Jan 1986 p. 145.
Includes tutorials, documented example programs and Prolog language interpreter. Provides examples of natural language interface to dBASE display command, and small expert system.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $95

☐ TransLISP
Artificial intelligence generation. Interpreter, editor, sample programs and printer.
IBM PC ☐ 256 KB req.

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ MicroMind Knowledge Engineering Tool
Enables user to create knowledge-based expert systems. Generates illness or disease decision making systems, sales or negotiation strategy simulations, diagnostics of machine problems and simulations of behavioral consequences of types of mental illness.
IBM PC ☐ Cost: $495

SYNERLOGIC, INC.

☐ Expert Systems Starter Pack
Introduction to expert systems. Covers induction, explanation, representation issues, production rules, forward/backward reasoning, conflict resolutions, navigating large search spaces, heuristics, metarules, and uncertainty. Built around MicroSYNICS, ES/P Advisor, Micro Expert and Expert Ease.
IBM PC ☐ Copies sold: 5 since 1985 ☐ Cost: $1,560

TEKNOWLEDGE, INC.

☐ M.1
Designs, builds and runs standalone knowledge systems to solve problems. Question/answer consultation.
IBM PC ☐ Cost: $12,500

TEXAS INSTRUMENTS

☐ **Arborist Decision Tree Software**
Analyzes complex decisions using decision tree analysis method. Helps decision makers build visual model of their situation and communicate their analysis to others. Can interactively change assumptions, alternatives and consequences built into model. Lotus 1-2-3 compatible.
IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $595

☐ **PC Scheme**
Reviewed Aug 1986 p. 29.
Artificial intelligence application development system. Includes debugging, graphics and windowing functions, Scheme Object-Oriented Programming System (SCOOPS) for developing object-oriented applications, ability to handle 8-bit characters for international applications and ability to suspend processing to execute other programs and then return.
IBM PC ☐ 320 KB req. ☐ Cost: $95

☐ **Personal Consultant Expert System Development Tools**
Allows software developers to design and deliver rule-based expert systems on a PC. Explores and develops prototypes of new applications of expert system technology. Contains features necessary to build applications for commercial use. Coexists with conventional applications written for systems compatible with MS-DOS.
IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $3,000

☐ **Personal Consultant Plus**
Expert systems for problem solving development. Explains reasoning in English sentences. Incorporates frames, procedural functions, access methods and meta rules. Graphics interface and graphics capturing snap shot. Develops and delivers applications of 2,000 elements.
IBM PC ☐ 512 KB req. ☐ Cost: $2,950

THOUGHTWARE, INC.

☐ **Management Advantage**
Expert system. Helps managers think through how to solve problems by clarifying thoughts, formulating judgements, and following an action plan.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $49

THUNDERSTONE CORP.

(division of Expansion Programs International, Inc.)

☐ **Logic-Line 1**
Natural language artificial intelligence. Takes text from any machine readable source and mathematically distills thought patterns for query and analysis.
IBM PC ☐ 90 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $250

ULTIMATE MEDIA

☐ **Advisor**
Expert system shell. Inference engine with backward and forward chaining, line entry editor, knowledge base editor, and line of reasoning and inference trace reports. Supports negative logic and circular reasoning detection.
IBM PC ☐ Cost: $99-$295

GEOGRAPHIC INFORMATION SYSTEMS

COMPUTER MATHWARE

☐ **Mapware**
Creates color-coded maps such as election districts, or standard maps such as states and ADI regions. Adds titles, legends and annotating text to create customized presentation level, hard copy and output.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $500

DYNACOMP, INC.

☐ **Mapit**
Creates maps. Population density by area, relative concentration of minerals, pictorial representation of city block.
IBM PC ☐ 128 KB req. ☐ Cost: $90

ERDAS, INC.

☐ **Applications Software**
Integrated Image Processing and Geographic Information System. Processes image files on disk and screen. Reads up to 8 channels of data. Displays raw data, image enhancement, interactive training field selection, geometric correction, classification and merging landsat classification into GIS. Full GIS analysis and mapping.
IBM AT ☐ 512 KB req. ☐ Copies sold: 178 since 1979 ☐ Cost: $14,995

GANESA GROUP CANADA, INC.

☐ **STATMAP**
Statistical, marketing and demographic mapping. Reads statistical data from dBASE II and ASCII files. Generates maps on screen or plotter by state, county and zip code area. Assists in site selection and analysis, planning, forecasting and other analyses.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $995

GEO BASED SYSTEMS, INC.

☐ **STRINGS**
Handles geographic/mapping graphics. Assists in management, analysis, synthesis, query and output of geographic and tabular information. Handles processing of data for spatial analysis and management of geographic information. Digitizes maps. Edits maps via interactive display and interactive processing.
IBM, PC, AT ☐ 640 KB req. ☐ Copies sold: 70 since 1979 ☐ Cost: $10,000-$50,000

GEOSOFT CORP.

☐ **Map Builder**
Creates color maps at state level for 48 contiguous U.S. states. Dictionary of 72,000 cities and towns. Looks up longitudes and latitudes of city names in customer data files such as mailing lists. Supports data base and word processing programs.
IBM PC, AT, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $250-$400

ILLSTON PC-PROGRAMS

☐ **US-ATLAS**
Locates cities and places of interest in U.S. Computes great circle distance. Finds all states with city of the same name. Locates all cities within a radius of a given location. Pre-coded data base contains 29,000 cities and over 1,500 places of interest.
IBM PC ☐ 192 KB req. ☐ Cost: $40

IN-SITU, INC.

☐ **Contur**
Contouring for regularly or irregularly distributed data. Options include labeling, contour levels, flagging of extremes and data values, contouring with various dashed line patterns and overlaying several contour surfaces on same frame.
IBM PC, XT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $950

☐ **Isopak**
Estimates volume between two contour surfaces and produces isopach maps. For cut and fill operations, mining and petroleum reserve estimations and overburden estimations.
IBM PC, XT

INDEPENDENT COMPUTER SERVICES

☐ **Landimprove**
CAD system for contouring and surface modeling, surface modification and earthwork quantities and drainage design with buried pipeline placement. Utilizes triangulation method. AutoCAD and VersaCAD compatible. Produces 2D/3D representations.
IBM PC ☐ 512 KB req. ☐ Cost: $3,150

☐ **Landimprove AutoCAD and VersaCAD Interface**
IBM PC ☐ 512 KB req. ☐ Cost: $350

☐ **Landimprove Contouring**
IBM PC ☐ 512 KB req. ☐ Cost: $1,975

☐ **Landimprove Contouring and Drainage**
IBM PC ☐ 512 KB req. ☐ Cost: $2,400

☐ **Landimprove Contouring and Earthworks**
IBM PC ☐ 512 KB req. ☐ Cost: $2,400

MICROPLOT SYSTEMS

☐ **CisMap**
Displays hi- or med-res weather map from Compuserv Information Service which was saved on disk file using PC-PLOT. Converts raster scan data from Compuserv to standard Tektronix 4010 command codes.
IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $40

MORGAN-FAIRFIELD, INC.

☐ **DocuMap**
Computer assisted cartography for interactively creating maps and digital terrain models. Outputs choroplethic maps, contour maps, 3D and proportional circle maps and perspective views of digital terrain models. Allows generation of Thiessen polygons, triangular and Bezier-splined contouring and trilateration.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 ☐ Cost: $1,000

PEERLESS ENGINEERING SERVICE

☐ **PC Digitizer**
Data entered with reference to position on original. Saves data in disk file as entered. Attaches labels, calculates areas, and plots saved files.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,500 since 1981 ☐ Cost: $95

☐ **PC Map**
Geographic package for land surveyors and civil engineers. Contouring from either averaged or kriged grids. All modules accept modified results from ASCII files.
IBM PC, AT, XT ☐ 512 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $995

☐ **Stadia Traverse**
Enters information from typical Stadia Traverse Field Notes. Generates coordinate locations, elevations, horizontal distances and true bearings. Each traverse saved in a file. Output reduced to X, Y, Z, label format for use with PES' PC MAP.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1981 ☐ Cost: $95

☐ **United States Geological Survey Data Plotting**
Draws plots from any perspective. Draws an enlarged view of portion of data. Determines the elevation of any point on the data surface.
IBM PC, AT ☐ 512 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $695

PLANNING DATA SYSTEMS

☐ **MultiMap**
Digitizing and aggregating map display system. Creates custom boundary files. Composes presentation-quality thematic maps in video and hard copy using interactive graphics. Used by urban planners, market researchers, geographers, conservationists and civil engineers.
IBM PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $495

POPULATION COUNCIL

☐ **FIVFIV-SINSIN**
Projects population trends. Analyzes complex changes in each country's population. Produces reports on future population changes.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $25

QUESTIONNAIRE SERVICE CO.

☐ MAPIT
Uses any printer or HP plotter to display maps. Includes conformant, interpolative, and trend surface mapping. Provides outline files for US, Canada, Europe, Africa, South America, Asia and Australia.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $95

☐ MAPIT US County Outline Database
Forty-eight state, US county outline data base. Draws the outside boundaries of each county. Represents county outlines using coordinate pairs measured in radians. Supports ASCII files. Works with MAPIT or other geographic information systems.
IBM PC ☐ Copies sold: 10 since 1985 ☐ Cost: $95

SOFTWARE CONCEPTS, INC. (CT)

☐ Concepts Computerized Atlas
3D representation of globe showing geopolitical map and such data as capital, population and languages for every country in world.
IBM PC, PCjr ☐ 64 KB req. ☐ Copies sold: 10,000 since 1985 ☐ Cost: $70

SPSS, INC.

☐ PC+ Mapping Featuring Map-Master From Decision Resources
Option to PC+. Provides maps from PC+ data. Includes predefined boundaries for state/county lines or zip code zones. User can explode map portions, create legends with titles/labels in various fonts/sizes and move/size maps.
IBM XT, AT ☐ 384 KB req.

UNIRAS, INC.

☐ BIZMAP
Creates world maps with continental and political boundaries in any of 5 standard projections or user-defined projections. Allows combining of maps with business charts.
IBM RT, AT

☐ GEOINT
Companion to GEOPAK. Handles interpolation of gridded data from scattered X, Y and Z data points. Preprocesses map data.
IBM RT, AT

☐ GEOPAK
Subroutines for producing color contour and grid mapping systems. Solves geological, geophysical, thematic, demographic and business mapping questions. Assists interpretation of engineering and scientific data. Displays multi-variate data as 2D and 3D surfaces.
IBM RT, AT

☐ UNIMAP
Interactive mapping application. Produces 2D grids, 2D color shaded contours, multiple 2D projections, 3D color shaded contours, 3D with 2D projection, 3D bar maps and 4D mapped data display.
IBM RT, AT

URBAN DECISION SYSTEMS, INC.

☐ Marketbase
Provides demographic data in DIF and WKS formats for manipulation with all major PC products. Compatible with most DBMSs. Available for all zip codes, counties, MSAs and ADIs. Interfaces with UDS's Onsite to accommodate user-defined areas.
IBM PC ☐ Introduced: 1978

☐ ONSITE
Demographic data retrieval. Features current year and forecasted projections based on population, households, income, age, race and sex. Any size or shape area of analysis.
IBM PC, XT/370, AT/370 ☐ 800 KB req. ☐ Introduced: 1972

☐ SCAN/US
Grid technology displays density by user-defined grids. Available display options include road networks, locations, trade areas and topography. Interfaces with user data for unique grid maps. Interfaces with UDS' Onsite/PC.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $500-$10,000

WEST COAST CONSULTANTS

☐ Curve Contour
Topographic mapping. Provides 2D and 3D views of contours on scaled axes.
IBM PC ☐ Cost: $250

☐ Curve USA
Produces charts of all or any subset of continental USA states with color shading and legends.
IBM PC ☐ Cost: $75

ZEPHYR SERVICES

☐ Bearings
Calculates bearings or great circle directions from one location to another. Designed for radio amateurs. User inputs latitude and longitude. Calculates and prints bearings and distances to over 500 locations worldwide. Uses azimuth system.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $20

GRAPHICS—BUSINESS APPLICATIONS

AARIAC CORP.

☐ XYZ-3D
Moves, rotates or scales structures within project. Creates copies and mirror images at new locations. Defines repeating patterns. Removes hidden lines. Simulation from any viewpoint.
IBM PC ☐ 512 KB req. ☐ Introduced: 1974 ☐ Cost: $795-$1,995

ACCENT SOFTWARE, INC.

☐ TGS: The Graphic Solution
Uses animated text and graphics to explain complex concepts, demonstrate products or services or design and illustrate on computer screen. Teaches non-programmer how to create simplest to most complex graphics for presentations, sales or training.
IBM PC, XT, AT ☐ Copies sold: 4,000 since 1982 ☐ Cost: $150

ADDE MARKETING

☐ Decisionnel Graphics
Uses data from external files. Displays 375 graphs. Includes line, point, line and point, step bar, stacked, pie, pyramid, scatter, numeric table and icon graph types. Graphs in color or monochrome. Provides windowing. Calculates with 30 built-in functions or user-defined functions.
IBM PC, XT, AT ☐ 256 KB req.

ADS IMAGING SYSTEMS

☐ Dial-30
Image processing system. Applicable to pattern recognition, particle analysis, factory automation and medical diagnostics.
IBM AT

ADVANCED GRAPHICS SOFTWARE, INC.

☐ SlideWrite
Text slides on paper and overhead transparencies. Manipulates text to fonts, sizes and weights. Enhances with italics, underlines and color. Highlights with lines, boxes, arrows and circles. IBM and HP plotters/Graphics Printer.
IBM PC, XT, XT/370, AT, 3270-PC, Portable PC ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $225

☐ SlideWrite Plus
Creates pie, bar, line, scatter, area, mixed, hi-low and text charts and diagrams on paper or overhead transparencies. Enhances Lotus 1-2-3 graphs. Figure library. Batch mode unattended printing/plotting. HP and IBM plotters. Epson, Oki, HP and IBM printers.
IBM PC, XT, AT, XT/370, 3270-PC, Portable PC, 3270-AT ☐ 256 KB req. ☐ Copies sold: 1986 ☐ Cost: $345

ADVANCED MATRIX TECHNOLOGY, INC.

☐ AMTgraph
Hi-res color graphics. Accesses data in Lotus 1-2-3 and Symphony work files. Converts and sends data to AMT Office Printer for output at resolutions of up to 240 X 240 dots per inch. Requires AMT Office Printer. Prints charts and graphs.
IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $49

ADVANCED SYSTEMS CONSULTANTS

☐ Tek-Mar Graphics Library
Graphics amd utility functions. Includes routine which prints hi-res TecMar screen to Epson LaserJet or NEC Printer. Least-squares fitting and plotting with polynomials/cubic splines. Requires TecMar Graphics Master board.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $195

AIMS+PLUS, INC.

☐ Graph Tools
Uses vertical/horizontal bar and 3D pictorial bar charts to graphically analyze data files. Demonstrates relationships between selected fields, linear regression, frequency distribution, mean standard deviation and computations variance. Prints graphs to screen or printer. Stores graphs.
IBM PC

ALPHANETICS

☐ Video Etch
Saves hi-res color graphics line etchings on diskette. Lines, circles, boxes, color, painting, fill, hue control, fine step length, insert text, save and load are available.
IBM PC, XT, PCjr ☐ 64 KB req. ☐ Copies sold: 13,800 since 1981 ☐ Cost: $50

THE AMERICAN COMMUNICATION ARTS ORGANIZATION

☐ Daisy Graphics
Contains over 150 graphic-like files which can be copied to working files while operating any full-size word processing program. Works with variety of printers. Allows graphic effects for daisy wheel and other cast-element printers.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $74

ANALYTICAL SOFTWARE

☐ Boardroom Graphics
Shaded and unshaded bar, text, trend line, organization charts, regression, scattergrams, pie or line charts and 3D graphics on screen, paper or transparencies.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 250,000 since 1983 ☐ Cost: $150

ANALYTX INTERNATIONAL, INC.

☐ MonoGrafx
Forms design. Overhead presentation slides. Free-form drawings, organization charts, block diagrams, calendars, bar charts, schedules, and business forms with/without graphics board. Text can be of different sizes. Up to 11 x 14 inch printouts.
IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $99

APG SOFTWARE

☐ INSET
Merges hard-copy output from graphics screens with text output from standard applications. Merged documents sendable via electronic mail. Rotates, expands and contracts image sizes. Supports color printers. Prints borders around images and with multiple passes.
IBM PC ☐ 80 KB req. ☐ Copies sold: 2,500 since 1985 ☐ Cost: $149

APPLICATION TECHNIQUES, INC.

☐ **Color Screen Print**
Prints screens as is or makes color, size, locational, rotational and density changes before printing. Sixteen predefined colors.
IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Cost: $80

AT&T

Electronic Photography and Imaging Center

☐ **Truevision Image Paint Software (TIPS for VDA/D)**
Draws, doodles, duplicates, manipulates and formats images. Includes 32,000 colors. Works pixel by pixel for detail or by screenful. Performs 20 drawing functions. Stores creations. Sends images to another PC via modem. Used with AT&T Truevision Video Display Adapter.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1985 ☐ $250

☐ **Truevision Image Processing Software (TIPS for ICB and TARGA)**
Digitizes video images. Creates images. Airbrush, retouch and redesign. Changes colors, tints and shades. Copies and blends screen portions. Adds digitized elements from other electronic photographs. Superimposes text and graphics. User-created graphics. Used with Truevision Advanced Raster Graphics Adapter or Image Capture Board.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $695-$1,250

☐ **Truevision PC Carousel Presentation Software**
Arranges and displays Truevision Image Capture Board, Targa 16 or Video Display Adapter images in electronic slide show. Supports 12 fades, dissolves and wipes.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $150

AT&T INFORMATION SYSTEMS

☐ **Business Graphics Presentation Software**
Uses data from spreadsheet packages to generate a variety of standard graph and chart formats, including 2D and 3D bar and pie charts.
IBM PC

☐ **Image Director**
User can scan any 8 ½ X 11 ½ hard-copy image into PC, modify or manipulate, add or delete elements, store and send to compatible system or print.
IBM PC ☐ Cost: $350

☐ **Truevision Paint and Image Processing Software**
Real-time image processing on photographs from AT&T Image Capture Board. Handles color manipulation, text overlay, multiple image merging, drawing and layout.
IBM PC

AUTO-TROL TECHNOLOGY CORP.

☐ **Redliner**
Downloads, views, reviews and annotates drawings created on Auto-trol's AGW or DEC VAX. Redline annotations include text and symbols such as circles and rectangles. User can add comments and details and point out errors on image. Returns redline file to host.
IBM PC, XT, AT ☐ Cost: $1,000

AUTOGRAPHIX, INC.

☐ **Autographix 35 Presentation Graphics Software**
Design and imaging of high-quality, hi-res, full-color 35mm slides and other graphics for speaker support.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ $895

AZTEK, INC.

☐ **Artcenter 20**
Permits ten users to simultaneously perform design, art and business graphics. Moves, rotates, copies, mirrors and scales. Multi-image animation capabilities. Utilizes a DBMS, symbol library and security system.
IBM PC

☐ **PCchart**
100 pre-formatted business charts, graphs and wordslides for presentation graphics. 14,000 colors and shaded areas. Telecommunicates slide files via modem to independent Aztek service centers.
IBM PC ☐ 448 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $1,395

☐ **Slidegraphic II**
Conversational creation, manipulation, storage and recall of free-form art, charts, graphs, text and composite visuals. Outputs to film recorders, printers and plotters. Features 14 fonts, symbol libraries, editing, and pan, zoom and scroll for animated effects.
IBM PC, AT ☐ 64 KB req. ☐ Copies sold: 168 since 1979 ☐ Cost: $28,888

BANNER BLUE SOFTWARE, INC.

☐ **Org Plus**
Creates organization charts. Shows each manager with direct subordinates. Draws and spaces boxes, centers text and lays out connecting lines. Allows chart revisions. Handles up to 250 employees and 99 levels. Provides staff and dotted-line reporting relationships.
IBM PC, XT, AT, PCjr, Portable PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $70

BASIC BUSINESS SOFTWARE, INC.

☐ **Plotting**
X, Y data prints file. Horizontal and vertical axes, plot scale control, removal of printer distortion and printing of values on each line of plot. Creates, prints and sorts data file.
IBM PC ☐ Cost: $50-$75

BIG TREES SOFTWARE CORP.

☐ **GRAF**
Scales data, centers titles and justifies labels. Produces pie, x-y line, separate, joined, stacked, comparative bar charts, scatter plots and trend lines.
IBM PC ☐ Copies sold: 2,000 since 1981 ☐ Cost: $295

Complete your library of PC TECH JOURNAL

Be sure to include month and year of the issue ordered.

VTEK™ 3.1

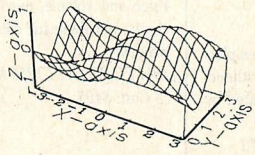
VT100/VT52 & Tektronix™ 4010/4014 Terminal Emulator

Excellent emulation and the features you want:

- use 4096 x 3120 resolution
- zoom, pan, and window plots
- high resolution printer dumps
- choose text and plot color
- transfer files with XMODEM and Kermit protocols
- scroll last 4 pages of text
- 132 column VT100 capability
- 18 User-definable keys
- capture plots and text on disk
- full or half duplex
- access to DOS commands
- all VT100 keypad commands
- command line editing
- fast direct screen access
- password security

VTEK makes your PC better than a terminal

$150 from Scientific Endeavors



GraphiC™ 3.0 in Color

Publication Quality Graphics for Scientific and Technical Applications

- linear, log, & polar plots
- bar charts & Smith charts
- contour plots with labels
- 3-D curves, 3-D surfaces with hidden line removal
- 4 curve types, 8 markers
- 14 fonts, font editor
- multiple levels of super/sub scripts
- 4096 x 3120 resolution
- zoom, pan, window plots
- multiple plots on a page
- high resolution printer dumps, full or half page
- plotter support in COLOR

16 color plots on EGA, Sigma, TeleVideo & Tecmar boards
Over 100 routines can be called by your C program. $350. Demo $8.
SOURCE INCLUDED for private use only.
For DeSmet, C-86, Aztec, Lattice, and Microsoft C compilers.

Scientific Endeavors
Route 4, Box 79; Kingston, TN 37763
(615) 376-4146

For 256k IBM and Corona PCs, DOS 2.xx,3.xx. Epson, Okidata, Toshiba, C. Itoh printers. Hewlett Packard, Houston, Sweet-P plotters. Corona Laser printer. IBM, IBM EGA, Sigma, TeleVideo, Tecmar, Hercules, Corona graphics. A compatible assembler is required.
THIS AD WAS MADE USING GraphiC™

CIRCLE NO. 317 ON READERS SERVICE CARD

BORLAND INTERNATIONAL, INC.
SEE AD ON INSIDE COVER & PAGE 1

☐ **Turbo Graphix Toolbox**
Provides library of hi-res, monochrome graphics procedures and functions to be used in conjunction with Turbo Pascal programs. Tools for graphics window management, precise plotting of curves, curve fitting and drawing geometric shapes.
IBM PC, XT, AT, 3270-PC, PCjr, Portable PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $55

BRIGHTBILL-ROBERTS/THE MARKETING CHANNEL AND CO., LTD.

☐ **Graph Magic II**
Draws pie charts, bar charts and graphs. Requires graphics adaptor and color monitor.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $100

☐ **Graphmagic**
Pie, bar, scatter, line or combination graphs from numeric data. Adds text, overlaps graphs, supports most printers and operates independently. Titling and labeling facility.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 10,000 since 1982 ☐ Cost: $90-$100

☐ **Inset**
Expands, shrinks, clips, rotates and places images in document for printout on dot matrix and laser printers. Co-resides with other programs. Displays image size inside word processor. Changes screen color to printer ink.
IBM PC, XT ☐ 75 KB req. ☐ Copies sold: 10,000 since 1985 ☐ Cost: $149

☐ **Show Partner**
Includes graphics animation and special/sound effects. Draws graphics while creating script. Graphics editor. Performs cut, copy, paste, mirror, shrink, enlarge, fades, wipes, weaves and scrolls. Captures/edits text and graphics from any program. Provides 20 fonts and 200 stock clip art images.
IBM PC, XT, AT ☐ Cost: $79

BUSINESS & PROFESSIONAL SOFTWARE, INC.

☐ **Business Graphics**
Creates bars, pies, lines, areas, and scattergrams in any combination. Users can place titles, axis labels, moveable titles and legends.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 10,000 since 1982 ☐ Cost: $350

☐ **Overhead Express**
Creates transparencies with dot matrix printer and office copier or color paper copies and color printer. Contains/modifies 12 preformatted page layouts or creates page layouts. Four typefaces in 5 sizes. Includes boxes, lines, symbols and screen show facility for on-line presentations.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $195

☐ **35mm Express**
Creates word charts, graphs or freehand drawings. Multiple images on single graphic. Imports Lotus 1-2-3 and Symphony files. Produces slides with Polaroid Palette, Bell & Howell CDI-IV film recorders or transmits to MAGICorp Slide Service. Paper copies and transparencies on dot matrix/laser printer.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $695

BUTTONWARE, INC.

☐ **PC-Graph**
Produces line graphs of PC-File III and PC-File/R data bases or reports. Plots up to 1,000 data points. Graphs stock market closing prices, periodic sales or volume figures, and statistical samplings or tests results. Prints graphs on IBM or Epson graphics printers.
IBM PC ☐ 192 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $60

BV ENGINEERING

☐ **PDP (Plotter Driver Program)**
Provides multi-color scientific and financial graphs on pen plotters. Provides 2 Y axes. Each axis may be linear or logarithmic, auto-scaled or forced, with full labeling. Plots files created by Lotus 1-2-3, VP-planner, PFS:write, BASIC and Pascal.
IBM PC ☐ 60 KB req. ☐ Introduced: 1986 ☐ Cost: $73

C SOURCE, INC.

☐ **BC Graphics**
Draw, line, circle, paint, point, Bload, Bsave, screen, Pset, color, put and get (animation), and relative coordinates. Supports most MSDOS C compilers.
IBM PC, XT, AT, PCjr ☐ Cost: $75

C & C ENGINEERING

☐ **AU2 Mapping**
Computer-aided mapping and design system. Stores, retrieves and edits graphic data bases. Creates maps from digitizer tablet or from keyboard using coordinate data base. Seven methods of data entry and 8 character fonts.
IBM PC ☐ 640 KB req. ☐ Copies sold: 15 since 1984 ☐ Cost: $22,000

☐ **Plotter Scribe**
Lets plotter print text at any size, direction and location, using 1 of 8 included text fonts, user-defined text font or any of plotter's internal fonts. Works with HP 7475 and 7500 series and Houston Instrument plotters.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 12 since 1985 ☐ Cost: $90

CEEGEN CORP.

☐ **GKS**
Based on Graphics Kernel System. Used in integrated businesses for outputs and interactive business with CAD/CAE/CAM for outputs, inputs, metafile operations and segments. Handles locator, stroke, choice, valuator, string and pick.
IBM AT ☐ Introduced: 1985

CHANG LABORATORIES, INC.

☐ **GraphPlan**
Explodable pie charts, line and bar graphs, scattergrams, statistics, titling, logarithmic scaling and work checking before printing.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $295

CHARTPAK
(subsidiary of Times Mirror Co.)

☐ **Artwork**
Creates solid shapes and can smooth, shade and rotate them in 3D. Color ramping available. Includes airbrush, cut and paste and shading. Supports Matrix QCR 400, plotter and ink jet printers.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 12 since 1985 ☐ Cost: $2,995

☐ **Picture This**
Draws freehand and paints nib boxes, circles, ellipses and lines. Thirty type fonts are available. Images can be duplicated, scaled, rotated and mirrored. Supporting hardware includes hi-res graphics circuit card, RS170 color monitor and digitizing tablet.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 30 since 1984 ☐ Cost: $2,495

☐ **Picture This Chart**
Creates pie, bar and line charts, histograms, and scattergrams. Works with Chartpak's Picture This. Handles Lotus 1-2-3 and VisiCalc data. Uses 4,069 colors.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 16 since 1985 ☐ Cost: $895

CHORUS DATA SYSTEMS

☐ **IMiGIT**
Icon-driven image editor.
IBM PC ☐ Copies sold: 300 ☐ Cost: $295

CITICORP INVESTOR SERVICES

☐ **Citiquote Technical Analysis Package**
Price and volume, moving average charts, point and figure charts, and automatic data capture. Linear regression. Multiple windows.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 109 since 1985 ☐ Cost: $495

CLASSROOM CONSORTIA MEDIA, INC.

☐ **Superdraw**
Creates detailed drawings and graphic illustrations. Allows geometric shapes, mirror images, blowups, painting in eight colors or color mixtures, custom characters, shapes overlaying and direct transmission to printer.
IBM PC, XT, AT, PCjr, Portable PC ☐ 128 KB req. ☐ Cost: $195

COMMUNICATION DYNAMICS, INC.

☐ **Quick Fix Graphics I and II**
Provides each graphic symbol as template file in 1 of 4 subdirectories. Changeable sizes, colors and fill patterns. Includes transfer program for copying diskette to hard disk.
IBM PC ☐ Cost: $40

☐ **Sound Presentations**
Presentation graphics. Template/symbol library. Includes top metro markets, world continents, U.S. map with and without state boundaries, and organizational and flow charts. Performs zoom and pan. Works with Lotus 1-2-3 and Symphony.
IBM PC ☐ Cost: $300

COMPUTER ASSOCIATES INTERNATIONAL, INC.

☐ **CA-Showmacs**
Integrates text, color graphics, rolling titles, animation and special effects. Multiple/user-defined fonts. Makes transfers to video cassette, transparencies and slides. Integrates with graph, charting and spreadsheet packages.
IBM PC ☐ 64 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $495

COMPUTER GRAPHICS GROUP, INC.

☐ **PC Illustrator**
Combines features for computer art, word charts, maps, graphs and flow charts. Provides symbolic picture icons. Supports digitizer, mouse, lightpen or IBM keyboard.
IBM PC ☐ 192 KB req. ☐ Copies sold: 2,500 since 1983 ☐ Cost: $95

☐ **ProGraf**
Generates business graphics including line, bar, area, pie and text charts. Supports ratio, hi-lo, decision, organization, PERT, loading, histogram and variance charts. Merges multiple graphs or pictures on same slide. Ten type fonts in 10 sizes with different slants.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $149

COMPUTER SUPPORT CORP.

☐ **Diagraph**
Business graphics. Provides over 2,200 predefined symbols for creating presentation aids such as organizational pie/bar/line charts, forms, flowcharts, diagrams, signs and word charts. Includes image manipulation, text and line-drawing capabilities.
IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $395

☐ **Picture Perfect**
Bar, pie, line and bar/line charts. Two independent Y-axes, overlapping bars, window numbers, and legends/text blocks anywhere in chart.
IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $295

COMPUVIEW PRODUCTS, INC.

☐ **V-GRAPH**
Designed for industrial and engineering sites and for CAD design and manufacturing installations.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $120

COMPUVISION INTERNATIONAL

☐ **Giraph Business Graphics**
Design control includes colors, hatching, labeling and layout. Uses data from Lotus 1-2-3, Multiplan and user-created file. Views graphs before plotting. Creates line, bar, pie and text charts.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $99

COMSHARE, INC.

☐ W/Graphics
Produces bar, pie, line, filled area, text, scatter, X-Y and combination charts in up to 16 colors. Charts displayed on IBM 3279 color screen, PCs, or printed on IBM 3287 printer.
IBM XT, AT ☐ Cost: $5,000

CONCEPT OMEGA CORP.

☐ ConceptG
Business graphics package. Produces horizontal and vertical bar charts. Creates charts with data retrieved from any Business BASIC data file. Includes labels, headers, footers and value displays options.
IBM XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $595

CONCEPTUAL SOFTWARE, INC.

☐ Prodas/Graphics
Dispalys X vs. Y plots, pie and bar charts. Handles unlimited plots per page. Supports IBM PC Graphics Screen and Printer, Epson compatible Graphics Printer, and HP-7470 2 or 6 Pen Plotter. Integrates with PRODAS system.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $365

CONTINENTAL RESOURCES, INC.

Peripherals Division
☐ CP/Graph I
Bar graphs, stacked bar graphs, stick graphs and line graphs.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 3,000 since 1983

CUBICOMP CORP.

☐ ModelMaker (3 Dimensional, Solid Modeling Graphics System)
3D model construction for display purposes. Models are assembled from planar polygons. Supports flat, smooth and constant shading.
IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $11,900

☐ Paint/10
Runs in conjunction with ModelMaker Modeling System, a 3D graphics system.
IBM PC ☐ 500 KB req. ☐ Cost: $3,100

CYBERRESEARCH, INC.

☐ CyberChrome
Provides photographic slide, print, and transparency creation for data presentation. Provides chart generation from data files or manually entered data, graphics pick-up from other software, and graphics manipulation to create the final image.
IBM PC, XT, AT

☐ Engineering Graphics Software
Prepares graphic display or plot of acquired data. Uses plotting symbols, error bars, multiple ordinates and superimposed graphs. Includes curve fitting, data smoothing, histogram fits and derivative calculation.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $350

DATA BUSINESS VISION, INC.

☐ GDSS (Graphic Decision Support System)
Handles rate of change, moving average, cumulative add, linear regression in semi-log and log-log scaling. Provides free-drawing editor. Includes utility to create data bases.
IBM PC, XT, AT ☐ 320-512 KB req. ☐ Copies sold: 400 since 1982 ☐ Cost: $795

☐ GraffHopper
Reduces chart building to a series of keystrokes. Provides 100 on-line charts from pies, smooth lines, symbols and multiple axes/curves.
IBM PC, XT, AT ☐ 256-512 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $295

☐ Private Eye
Displays on-line graphic reports under custom menu system. Reports can be updated from data files. Works with GDSS or GraffHopper.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $99-$395

DATA INNOVATIONS, INC.

☐ Expert Designer
Presentation-quality slideshow generator.
IBM PC ☐ Introduced: 1985 ☐ Cost: $8,500

DECISION GRAPHICS, INC. (CO)

☐ Organization
Creates, edits, updates, prints or plots organization charts for up to 58 employees, two title lines and a footnote. Charts may be saved for later use, or information may be added, deleted or changed.
IBM PC, AT, XT, PCjr ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $95

☐ Signmaker
Creates text signs on paper and transparencies for presentations. Provides automatic or manual selection of character size, text location, plotter pens, paper size, starting location and direction of print.
IBM PC, AT, XT, PCjr ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $75

☐ Type Shop
Creates, edits, saves or retrieves text slides for presentations. Provides automatic or manual selection of paper size, starting location, height and width of characters, justification, direction of print and option of plotting on paper or transparencies. Eleven optional fonts.
IBM PC, AT, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $175

DECISION IMAGES

☐ ReSource 1
Graphics and image processing. Manipulates hue/intensity. Uses vector or line graphics with images. Shows user effect of each command step-by-step in real time. Requires graphics pad.
IBM PC ☐ Cost: $1,975

DECISION RESOURCES, INC.

☐ Chart-Master
Chart text and data is entered manually or from VisiCalc or Lotus 1-2-3 files. Chart formats include line, hi-lo-close, scatter, bars, pies and area charts. User can choose color, fonts, 94 symbols, underlining, margin justification and italicizing.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 192 KB req. ☐ Copies sold: 45,000 since 1981 ☐ Cost: $375

☐ Diagram-Master
Organization and Gantt charts. User can command boxes, circles, arrows, lines and other shapes and text. Library contains 101 shapes. Free form drawing using drawing board. Permits choice of color, 7 fonts, 94 symbols and 16 sizes text.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ 320 KB req. ☐ Copies sold: 20,000 since 1985 ☐ Cost: $345

☐ Map-Master
Plots geographic territories by state, county or zip code. Creates custom regions as in sales territories. Shades and hatches. Capability to import from Lotus spreadsheet. Supports over 60 different plotters and 100 printers.
IBM PC, XT, AT, 3270-PC ☐ 384 KB req. ☐ Cost: $395

☐ Sign-Master
Word charts, tables and text pages. Permits choice of color justification, 7 fonts, 94 symbols, italics, plotting options and underlining. Outputs on paper, transparencies, slides or Video Show.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 192 KB req. ☐ Copies sold: 30,000 since 1983 ☐ Cost: $245

DICOMED CORP.

☐ PresenterPC
Slides and overheads. Taps DIF files from data base/spreadsheet programs to generate charts and graphs. Tools include 2 graphics arts quality fonts, lines, circles and rectangles. Compatible with DICOMED design stations.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Copies sold: 700 since 1985 ☐ Cost: $995

DIGITAL RESEARCH, INC.

☐ GEM Draw
Creates charts diagrams and illustrations. Provides library with 40 pieces of preprogrammed artwork. Provides picture elements menu from which user selects rectangles, rounded boxes, circles, polygons, lines, arcs and text. Drop-down menus, icons, scroll bars and windows.
IBM PC ☐ 256 KB req. ☐ Cost: $249

☐ GEM Graph
Draws comparisons, expresses trends and maps out sales areas. User creates graphs by choosing from pie charts, bar graphs, symbols, maps, colors, text sizes/styles, fill patterns, textures and depths. Interfaces applications including Lotus 1-2-3, Symphony and dBASE III.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $249

☐ GEM Paint
Creates color pictures. User can sketch, outline, spray paint, erase, highlight and shade. Draws shapes from menu. Provides 21 preprogrammed patterns and user-created patterns. User adds captions, titles and legends. Includes icons, drop-down menus, windows, scroll bars and 16 colors.
IBM PC, XT, AT ☐ 256 KB req.

☐ GEM WordChart
Organizes, emphasizes and presents words with charts. Creates agendas, expresses trends, emphasizes points and sets tables. Provides colors, bullets, checkmarks, bold, italic, underline, type sizes, front styles and borders. Allows user-defined titles, footnotes and formats.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $149

DUNCAN-ATWELL COMPUTERIZED TECHNOLOGIES, INC.

☐ LENIBASE: The Graphic Data Base and Animation System
Uses movement scripts written by light pen, joystick, mouse, GTCO Digitizing Pad or Koala Pad. Special effects, soundtrack, perpetual actions, voice output, boomeranging, floats, reverse action, speed control, lights, duration, and selective scenery.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $275

☐ LENIFLOW/3270: Intelligent Flowcharting System
Constructs schematic drawings, flowcharts, text and organizational charts, process-flow diagrams, floor space layouts and facilities planning. Performs scroll, pan and jump in 8 directions.
IBM 3270-PC/G, GX, 3270-PC, AT ☐ 320 KB req. ☐ Cost: $795

☐ LENIGRAPH: Graphic Editing and Flowcharting System
Free-hand art, electronic crayons, electronic graph grid, color mixing, multi-screen editing, painting, 16 background colors, graphic language interface, CAD/CAM circular, linear and linkage editors.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $250

☐ LENIMATION/jr: Video Animation System
Builds animation sequences using light pen, joystick, cursor control or Koala Pad.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $150

☐ LENIPAINT
Creates graphics using mouse, lightpen, keyboard or digitizing tablet. Includes electronic crayons, graph grid, color mixing, free-hand art, ribboning, 16 background colors and 256 type texture patterned. Cut and paste. Supports BASIC, Bitmap and VDI file formats and IBM enhanced graphic card for 64 colors.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $395

☐ LENIPEN/AT: Intelligent Color Graphics System
Command sets include business graphics, animation, flow charting, organizational charts, graphic data base, CAD and slide presentation facility. Supports light pen, Microsoft Mouse, Logimouse, Koala Pad, GTCO Digitizing Tablet, Bitmap, Basic and VDI formats.
IBM PC, AT ☐ 256 KB req. ☐ Cost: $895

☐ **LENIPEN/XT: Integrated Color Graphics System**
Command sets include animation, CAD, business graphics, video typesetting, flow charting, organizational charts, graphics data base and slide presentation facilities. Supports light pens, Microsoft Mouse, Logimouse, Koala Pad, joystick, digitizing cameras, color printers and voice output.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $695

☐ **LENIPEN/3270: Intelligent Color Graphic System**
Supports ergonomic graphic input devices such as Microsoft mouse, PC mouse, LENIPAD, GTCO or KURTA digitizing tablets. Comprises symbolic icon command sets. Constructs large schematic drawings and scrolls, pans or jumps thru them in 8 directions.
IBM 3270-PC, AT, 3270/G, GX ☐ 320 KB req. ☐ Cost: $995

☐ **LENIPREZ: Project management Graphics**
2D and 3D pie, bar, organizational, Gantt, pert, flow charts, line graphs and free-form graphics. Supports lightpen or mouse. Free-hand art, vectors, animation, sound and voice output. Slide presentation facility.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $595

☐ **LENISPEED: Rapid Computer Graphics Service**
Converts graphic image files to photographic slides or hardcopy. Typesets large scale and multi-colored graphic characters. Slide presentations.
IBM PC, XT

☐ **LENITEXT: On Video Typesetting System**
Photographic slides, posters, book covers and full scale presentations. Greek symbols, superscript, math symbols, and foreign language characters and graphics. Characters can be sliced, stripped, polka dotted, mirrored, rotated or enlarged.
IBM PC, XT, PCjr ☐ 256 KB req. ☐ Cost: $395; $150 (PCjr)

DYNACOMP, INC.

☐ **Data Plotter**
Creates graphs on printer. Allows uneven spacing of points, unlimited number functions on 1 graph and automatic/manual scaling. Choice of graph size. Eleven symbols in 6 sizes for line graphs and scatter plots. Shading for pie charts and bar graphs.
IBM PC ☐ 64 KB req.

☐ **Plot**
Plots and processes data or curves. Processing features allows user to switch back and forth between linear, semi-log, and double-log scales, to calculate and plot inverse, power and linear functions of data point.
IBM PC ☐ 16 KB req. ☐ Cost: $30

DYSAN CORP.

☐ **Boardroom Graphics**
Turns data from spreadsheets and other data bases into 3D graphics. Provides line charts, scattergrams, bar graphs, cluster bars and pie charts.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1985

ELECTRONIC COTTAGE, INC.

☐ **IMAGE (Image Management System)**
Combines business graphics, CAD and free-form drawing capabilities. Handles what-if questions. Images can be modified, combined, moved, copied, scaled and zoomed. Handles 256 columns by 256 rows, 638 monochrome pixels or 318 pixels in 16 colors.
IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $995

ENERTRONICS RESEARCH, INC.

☐ **EnerCharts**
Creates pie, bar, text and line charts in 2D/3D. Produces gantt, scheduling, text and symbol charts. Customizes graphs on-screen with text, color, sizing and overlays. Merges 4 charts on one screen.
IBM PC, XT, AT, 3270-PC ☐ 384 KB req. ☐ Copies sold: 2,000 since 1986 ☐ Cost: $395

☐ **EnerGraphics**
Business/presentation graphics and drawing/design. Pie, bar or line charts in 2D/3D, text and organizational charts. Merges 4 charts on screen. Adds text, lines and symbols. Changes text font, size, color, slant and angle. Free-form/mechanical/technical drawings, flow charts, electrical schematics and floor plans.
IBM PC, XT, AT, 3270-PC ☐ 384 KB req. ☐ Copies sold: 35,000 since 1983 ☐ Cost: $595

☐ **Enermerge**
Combines graphics with text documents. Prints merged letter/report via word processor. Captures/saves images. Displays image boundaries on text screen. Memory-resident. Performs clip, rotate, increase/decrease and printing specifications. Allows password protection. Works with most word processors.
IBM PC, XT, AT ☐ 85 KB req.

ENTER COMPUTER, INC.

☐ **Typ-Set-Lettering Software**
Generates art quality lettering for presentation graphics, using selection of font styles, shading and colors. Creates 35mm slides when connected to a video image recorder such as the Polaroid Palette.
IBM XT, AT, PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $199

ESSENTIAL SOFTWARE, INC.

☐ **Essential Graphics**
Draws horizontal and vertical pie and bar charts. Supports animation (get and put), filling (paint) and user-definable patterns. Utilizes any of 500 fonts and clip art sets.
IBM PC, XT, AT ☐ Cost: $250

EXECUCOM SYSTEMS CORP.

☐ **Impressionist**
Multi-color presentation graphics. Chartbook contains more than 100 graphic types. Selected graphs can be enhanced or altered using menu selections to thicken lines, change font sizes and typefaces, correct errors, change chart types, rotate images, enlarge or reduce, and move legends. Graphics editor.
IBM PC, XT, AT ☐ Copies sold: 100 since 1985 ☐ Cost: $995

FLOWERSOFT

☐ **Banner-Rama**
Prints banners, signs and announcements. Produces 6" x 3 ½" letters in four formats.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $29

FOX & GELLER, INC.

☐ **dGRAPH**
Reviewed Jun 1984 p. 117.
Graphics for Ashton Tate's dBASE II. Provides pie, bar, line and pie-bar charts. Includes data entry procedure and data base analysis ability.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $195

☐ **GRAFOX**
Allows user to define a data base and then produce pie, bar, line and pie-bar charts.
IBM PC ☐ 96 KB req. ☐ Introduced: 1983 ☐ Cost: $99

☐ **R:graph**
Produces color charts and graphs from R:base files. Creates multiple charts on a single printout.
IBM PC, XT ☐ Cost: $195

GENERAL PARAMETRICS CORP.

☐ **Picture It**
Creates graphics. Provides predesigned word charts, bar charts, pie charts, organizational charts, graphs, diagrams, flow charts and Gantt charts. Creates disk to be used with VideoShow. Produces slides, overheads and hard copy with PhotoMaker and PrintMaker.
IBM PC ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $700

GENIGRAPHICS CORP.

☐ **Series 1000 XT**
Business graphics upgrade program. Creates charts, graphs and other business communications graphics. Includes RGB video card, hi-res RGB monitor, and dual function async/RAM card.
IBM PC, XT ☐ 256 KB req.

GEOCOMP CORP.

☐ **GRAFKIT**
Converts complex data into presentation/report graphs on screen, printer or plotter. User-controlled chart elements. Produces line graphs with linear and log scales, scatter plots, hi-lo graphs, bar and pie charts. Unlimited data points, graph elements or chart types per graph.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $395

GOLDEN SOFTWARE, INC.

☐ **Golden Graphics System**
For scientific research, medical research or business applications. Hi-res XY, bar, pie, line and scatter graphs. 3D surface plots from irregularly spaced data. Generates contour maps with in-line contour labels. Business graphics.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3,000 since 1983 ☐ Cost: $299

☐ **GRAPHER**
Represents 10,000 XY data pairs with ten scales on one graph. Uses linear-linear, log-linear, linear-log or log-log axes without grid lines and scaling. Plots error bars. Performs four types of curve fitting.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $199

☐ **PLOTCALL**
Users can create reproducible graphs, charts, and drawings, annotated with alphanumerics and special symbols. Accesses dot matrix printer as if it were digital pen plotter. Interprets numerical commands in data file.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3,000 ☐ Cost: $149

GRAPHIC M*I*S, INC.

☐ **Fingraph 11**
Graphic MIS. Updates information from application, spreadsheets or data base. Slide show chart presentation features. Traces performance problems department by department, territory by territory irrespective of currency/languages.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $295-$5,000

☐ **Speech*Maker**
Presents information using a PC and printer or plotter to make such visual aids as flow charts and organization charts. Mixes graphics and text. Includes 100 predefined formats. Performs save/delete.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $70

GRAPHWARE, INC.

☐ **Charts Unlimited**
Flow charts, floor plans, organizational charts, forms, business charts, PERT charts and block/wire/circuit diagrams. Provides 36 predefined objects and 36 special symbols.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 800 since 1983 ☐ Cost: $195-$295

GRID SYSTEM CORP.

☐ **Paint**
Stores and recalls images. Draws circles, rectangles, lines and freeform shapes. Moves, duplicates or erases any image. Images can be superimposed, inverted, merged or mirrored. Provides zoom-in.
IBM PC

☐ **Plot**
Management tool for analyzing, reviewing and presenting financial and tabular information in graphic form of bar, line, pie or scatter charts.
IBM PC ☐ Introduced: 1982 ☐ Cost: $250

GSS

☐ **Grafstation**
For VDI standard graphics. Allows micro to perform as full-function intelligent graphics terminal for host-based VDI applications. Offloads graphic tasks from host to micro.
IBM PC ☐ 192 KB req. ☐ Cost: $250

☐ **Solutions GSS-Chart**
Icon-driven presentation graphics. Bar, pie, scatter, text and line charts. Outputs up to 4 charts per display or page. Symbols library provides simple drawing functions. Supports over 65 I/O devices. Compatible with Lotus 1-2-3 and Multiplan data files.
IBM PC ☐ 512 KB req. ☐ Cost: $295

☐ **Solutions GSS-Plottalk**
Bar, pie, line, stair, scatter and text chart making. Line and fill style, bar and pie outline, and text font selection. Output device independent. Natural language commands.
IBM PC ☐ 256 KB req. ☐ Cost: $295

☐ **Toolkit Plotting System**
Subroutine library for creation of 2D charts for line, bar, pie, scatter, step, area, text-only and schedule presentation in business and scientific environments.
IBM PC ☐ 192 KB req. ☐ Introduced: 1983 ☐ Cost: $495

GTCO CORP.

☐ **GAP 1 (Graphic Analysis Package)**
Allows digitizer to emulate an electronic planimeter for computing perimeters, lengths, distances and areas of polygons. Reduces graphic data to digital format. Requires Digi-PAD 5 digitizing tablet.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $450

HEX FF, INC.

☐ **GRAF/HEX**
Includes pie, line and bar charts. Text can be produced in variable character sizes and types. Saves charts. Produces charts in 8 colors. Interfaces with spreadsheets.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $595

HONEYWELL INFORMATION SYSTEMS, INC.

☐ **Graph6**
Consists of Graph6 Executive, Graph6 Interactive Facility, Graph6 Workstation Facility, Graph6 Application Development Facility and Graph6 Device Controller Facility. Creates pie, schedule, line, bar, scatter, step, area, deviation and text only charts.
IBM PC ☐ 384 KB req. ☐ Cost: $1,375-$2,485

HYPERGRAPHICS CORP.

☐ **HG StoryBook**
Creates graphics presentations. Combines animation, branching and external program references on 1 screen. Performs animation at 99 different speeds. Includes different move options and mouse functions.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $175

☐ **Presentation Graphics System**
Allows a graph from another software package to be pulled into HyperGraphics. Provides pie, bar, area graphs and 3D bar charts. Function key creation of graphic symbols and animation.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $349

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **Animation Creation**
IBM no. 6024-082. Creates animation sequences on color display by drawing, copying and layering pictures, then displaying them in rapid sequence. Animation speed is user controlled. 16 foreground and eight background colors using 95 text characters and 160 special characters.
IBM PC, XT, PCjr ☐ Cost: $40

☐ **Color Graphics Editor and Picture Plot**
IBM no. 4421-760. Graphics editor creates/modifies files and retrieves flow charts, files, diagrams and free-form sketches. Plots editor output or other files in Picture Interchange Format.
IBM 3270-PC

At last! - Fast, On-screen

FLOWCHARTS

Finally! An on-screen flowchart processor that knows about flowcharts - not just another "screen draw" program that makes you do most of the work.

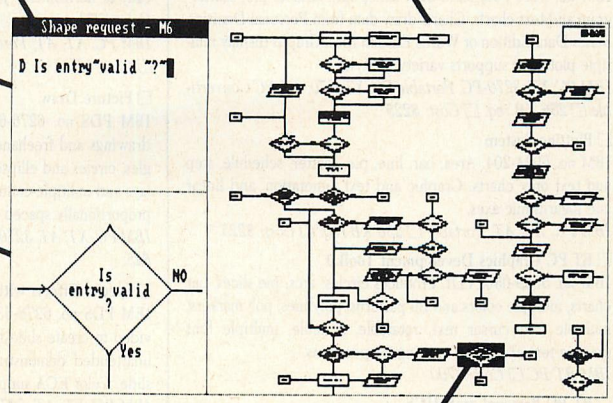
Interactive EasyFlow is a powerful full-screen graphics program dedicated to flowcharts and organization charts. With this program you can quickly compose charts on the screen. More important, you can easily modify charts so they are always up to date.

Features: • Text is automatically centered, character by character, within shapes as you type it • Text formatting controls allow you to over-ride the automatic formating where desired • Lines are created by specifying the starting and ending points - the program automatically generates the route • Cut and paste facility allows arbitrary chart fragments to be moved, copied rotated, reflected or sent to/from disk • Shape insert-delete and row/column insert-delete • Charts can be up to 417 characters wide by 225 lines high. Charts too wide for the printer are automatically printed in strips. • Charts can be larger than the screen - the window into the chart scrolls both horizontally and vertically as necessary • Works with many popular matrix printers including Epson, IBM graphics printer and compatibles. Full support for HP LaserJet and LaserJet Plus. Works with HP 7475A (& compatible) plotters. Can be used with ANY printer when non-graphic (character) output is acceptable • All standard flowcharting shapes included • Most shapes supplied in large, medium and small sizes • Extensive manual (100+ pages) includes many examples • Context sensitive "help" facility provides immediate assistance at any time • Any number of titles can be placed on a chart • Commentary text blocks can be placed anywhere in the chart • Fast: written in assembly language • Plus many more features than we can mention here

Requires at least 320K memory, DOS-2 or higher and an IBM or Hercules compatible graphics card. On EGA, full 640x350 resolution is used.

Order direct for only **$149.95** + $2.00 S&H (USA/Canada), $10.00 (foreign). Payment by MO, check, VISA, MasterCard, COD or Company PO. Rush orders accepted ($15.00 S&H; USA/Canada only). Rush orders received by noon will be delivered the next business day (to most locations).

Order Desk: 1-800-267-0668



The sample screen display shown below is typical of what you see while editing a chart. Other screen displays are provided for entering titles, changing options, getting "help" and so on.

STATUS BAR (not to be confused with a wet bar) tells you what Interactive EasyFlow is doing at all times.

CHART WINDOW gives an overview of your chart; this example shows the "normal" view. "Close-up" view shows a smaller part of the chart in more detail. "Wide-angle" view shows a larger part of the chart at reduced size.

TEXT/MESSAGE WINDOW used to enter user text and to display messages from Interactive EasyFlow.

CURRENT SHAPE WINDOW - shows the content of the current flowchart shape (the one under the SHAPE CURSOR) in complete detail.

SHAPE CURSOR shows where you are in the chart. Cursor keys move it around; chart window scrolls if you run off the edge of the window.

HavenTree Software Limited
P.O. Box 1093-B
Thousand Island Park, NY 13692
Information: (613) 544-6035 ext 40

CIRCLE NO. 113 ON READERS SERVICE CARD

☐ **Drawing Assistant**
IBM no. 6024-089. TopView-compatible color paint program for creating drawings and presentations. Entry via keyboard, mouse or joystick. IBM PC network compatible. Accepts files created with IBM PCjr ColorPaint. Permits picture magnification/retouching, horizontal/vertical flipping and color inversion.
IBM PC, XT, AT, Portable PC, PCjr ☐ 256 KB req. ☐ Cost: $169

☐ **Electric Poet**
IBM no. 6024-172. Creates electronic presentations with color, animation, music and rhythm.
IBM PC, XT, AT, Portable PC, PCjr ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $75

☐ **Graphics Development Tool Kit**
Reviewed Sep 1985 p. 42.
IBM no. 6024-196. Circles, arcs, pie slices, bar charts, polylines and polymarkers. Multiple colors and fill patterns. Graphic and cursor text are rotatable and scalable. Multiple fonts.
IBM PC, XT, AT, Portable PC, PCjr ☐ Cost: $495

☐ **Graphing Assistant**
IBM no. 6024-147. Creates pie and bar charts from data in IBM Filing Assistant programs. Graphs can be part of document generated by IBM Writing Assistant.
IBM PC, XT, Portable PC, PCjr ☐ 128 KB req. ☐ Cost: $165

☐ **Metafile Graphical File System**
IBM no. 6024-205. Business graphics.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Cost: $175

☐ **PC Storyboard**
IBM no. 6316-998. Presentation-quality graphics system. Consists of Picture Taker, Picture Maker, Story Editor and Story Teller.
IBM PC, XT, AT, PCjr, Portable PC, XT/370, 3270-PC ☐ Cost: $275

☐ **PCjr Color Paint**
IBM no. 6024-299. Color drawing system designed to accept input entered by a user-supplied mouse.
IBM PCjr ☐ Cost: $99

☐ **Personal Computer Image Processing System**
IBM no. 6466-996. Loads and saves images. Extracts pixels from one image to another. Performs spatial filtering, image arithmetic, parallel-piped boxcar multi-spectral classification and keystroke recording and playback. Annotates images or histogram displays.
IBM PC, XT, AT, Portable PC, XT/370 ☐ 384 KB req. ☐ Cost: $310

☐ **Personal Computer Slide Write**
IBM no. 6317-034. Text slides on paper or overhead transparency film. Expands or shrinks text automatically. Hi-res characters. Retrieves Display Write 2/3 print files or Display Write 3 ASCII files. Batch capability.
IBM PC, XT, 3270-PC, XT/370, AT, Portable PC ☐ 128 KB req. ☐ Cost: $225

☐ **Personal Decision Series - Graphs Edition**
IBM no. 6410-938; 6403-821. Line, bar, surface, pie, scattergram and text charts. Charts draw data from Personal Decision Series Data Edition or Words Edition files. Graphs display multiple plots and supports variety of styles.
IBM PC, XT, 3270-PC, Portable PC, XT/370, AT, PC Convertible ☐ 256 KB req. ☐ Cost: $225

☐ **Plotting System**
IBM no. 6024-204. Area, bar, line, pie, scatter, schedule, step and text only charts. Graphic and text annotation, and linear and logarithmic axes.
IBM PC, XT, AT, Portable ☐ 256 KB req. ☐ Cost: $225

☐ **RT PC Graphics Development Toolkit**
IBM no. 5669-050. VDI. Produces circles, arcs, pie slices, bar charts, multiple colors and fill patterns, polylines, polymarkers, multiple font cursor text, rotatable, scalable, multiple font graphic text and raster and input operations.
IBM RT PC ☐ Cost: $700

☐ **RT PC Personal graPHIGS**
IBM no. 5669-167. Graphics programming interface based upon proposed ANSI standard for PHIGS (Programmer's Hierarchical Interactive Graphics System). Sync and async I/O. Geometric articulation. Provides ability to select and edit parts of graphic structures.
IBM RT PC ☐ Cost: $1,000

☐ **RT PC Plotting System**
IBM no. 5669-063. Creates graphics, area, bar, line, pie, scatter, schedule, step and text-only charts. Allows attribute changing including line style for line and step charts, fill pattern for area, pie and bar charts, color, text height and font, logarithmic axes, axis range and tick spacing.
IBM RT PC ☐ Cost: $600

☐ **3270-PC Color Graphics Charting**
IBM no. 4421-519. Graphics end user interface with icons, picture file maintenance, chart delimiters and annotation, computational facilities and file conversion from DIF, SYLK and GDDM formats. Allows up to 4 charts per picture.
IBM 3270-PC/G, 3270-PC/GX, 3270-AT/G, 3270-AT/GX ☐ 384 KB req. ☐ Cost: $395

IBM PERSONALLY DEVELOPED SOFTWARE

☐ **Creativity Package**
IBM PDS no. 6276-545. Consists of Kaleidoscope, PC Palette, Personal Computer Picture Graphics and Select-A-Font.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $63

☐ **Lines Plus**
IBM PDS no. 6276-636. Text graphic editor. Selects intersecting or overlaying lines. Creates horizontal or vertical labels for drawings. Creates drawings composed of lines, boxes and arrows. Monochrome and color EGA support.
IBM PC, XT, AT, 3270-PC, PCjr, Portable PC ☐ 128 KB req. ☐ Cost: $20

☐ **Multimedia Presentation Aid**
IBM PDS no. 6276-611. Creates presentations in standard outline form or in free form to display tables. Supports multiple colors. Produces transparencies. Monochrome and color EGA support.
IBM PC, XT, AT, PCjr, Portable PC, 3270-PC ☐ 128 KB req. ☐ Cost: $25

☐ **PC Palette**
IBM PDS no. 6276-537. Pie/bar charts, line graphs and scatter plots. Four line widths and 12 drawing styles. Rotates copies and scales drawings. Joystick, mouse, graphics tablet or touch tablet for input. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $40

☐ **PC Palette Utility**
IBM PDS no. 6276-640. Plots PC Palette stroke files to create graphs, charts or pictures. Plots output on IBM 7371, 7372 or 7374 color plotters. Color EGA support.
IBM PC, XT, AT, 3270-PC, Portable PC ☐ 128 KB req. ☐ Cost: $20

☐ **Personal Computer Picture Graphics**
IBM PDS no. 6276-508. Images can be mixed to create new graphics. Increases/decreases art network size, changes colors, flips images, mixes type styles, moves objects and prints vertically or horizontally. Joystick, light pen or keyboard for input. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $30

☐ **Picture Draw**
IBM PDS no. 6276-628. Creates pictures, diagrams, scaled drawings and freehand artwork. Draws lines, squares, rectangles, circles and ellipses. Sizes, rotates, mirrors, outlines, overlays and multiple-centers images. Zooms or fills images. Uses 9 proportionally spaced lettering fonts. Color EGA support.
IBM PC, XT, AT, 3270-PC, Portable PC ☐ 256 KB req. ☐ Cost: $25

☐ **Special Effects with Slides**
IBM PDS no. 6276-631. Combines, text, graphics, audio and video to create slideshow presentation. Prepares attended or unattended demonstrations. Sets time delays between each slide. Color EGA support.
IBM PC, XT, AT, 3270-PC, PCjr, Portable PC ☐ 256 KB req. ☐ Cost: $25

IMAGIMEDIA TECHNOLOGIES, INC.

☐ **MicroCAD**
2D and 3D system. Plots 38,000 points. Constructs, edits and scales objects. Displays VisiCalc files as hi-res graphs.
IBM PC, XT ☐ Cost: $150-$500

IMAGING TECHNOLOGY, INC.

☐ **Image-Pro 100, Image-Pro**
Interactive image processing and graphics. Library of image processing routines. Includes report generator to all frame composition by merging image data with graphic data from image analysis functions. Interfaces to most dot matrix printers. Color real-time processing capabilities.
IBM AT ☐ 640 KB req. ☐ Cost: $995-$1,495

☐ **Itex 100**
Standalone library of board-level and image processing routines for use with Series 100 single-board image processor. Initialization and register access, look-up table manipulation, image acquire and clear, image save and restore, pixel read and write, line and area operations, image geometry and processing, and graphics.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 20 since 1986 ☐ Cost: $995

☐ **Itex/PC, Itex 151**
Standalone library of board-level and image processing routines. Initialization and register access, look-up table manipulation, image acquire and clear, image save and restore, pixel read and write, line and area operations, image geometry and graphics. Requires PCVisionplus Frame Grabber or Series 151 image processing subsystem.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $595

IMSI

☐ **Dr. Halo II**
Paint package and picture editor that displays graphics in hi-res monochrome and color. Supports laser printers and merges text from word processing files with graphics created.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 13,000 since 1985 ☐ Cost: $140

☐ **Galleria**
Picture library collection to be used with Dr. Halo II, PC Paintbrush, PC Paint or Polaroid Palette. Consists of 3 libraries: Business Library, Home Library and Artists Libraries. Libraries available separately.
IBM PC, XT, AT ☐ Copies sold: 400 since 1986 ☐ Cost: $60

☐ **TurboHALO**
Develop graphics applications with multi-color, hi-res and broad compatibility with graphics hardware. Includes 170 HALO primitives. Supports 10 graphics boards, 13 input devices and 23 printers and plotters.
IBM PC, XT, AT ☐ Introduced: 1986 ☐ Cost: $99

☐ **4-Point Graphics**
Outputs to over 30 printers and plotters. Enhances images from other software with full colors, logos or designs. Saves on-screen pictures from programs.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 15,000 since 1983 ☐ Cost: $195

INDIGO SOFTWARE, LTD.

☐ **iPrint**
Produces documents and forms. Includes zoom, area move/copy and user-set grid increments graphics facilities. Creates organization, block and bar charts/diagrams. Prints output as it appears on screen. User can insert graphics into documents. Interfaces Lotus 1-2-3.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $259

INFOGRAPHICS, INC.

☐ **InfoGraphics Choice**
Supports graphics design, statistical scaling and color harmony. Includes file transfer programs and drivers for printers and plotters.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $395

INNCON SOFTWARE

☐ **Business Graphics**
Creates color bar charts, line graphs and pie charts.
IBM PC, XT ☐ Cost: $20

☐ **Sign Maker**
Creates signs or messages in any size. Includes an optional banner capability.
IBM PC, XT ☐ Cost: $20

INNER LOOP SOFTWARE

☐ **Boxes & Arrows**
Creates block diagrams for use in pictorially representing relationships among components of complex systems. Associates what-if calculations with every object. Uses monochrome and graphics adapters and can support an optional mouse.
IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $145

INNOVATIVE SOFTWARE, INC.

☐ **Fast Graphs**
Bar/pie charts and line graphs. Automatic title placement, axis scaling, med- and hi-res graphics, ability to superimpose graphics and 16 background colors. Requires 2 double-sided 320 KB drives or hard disk 128 RAM interface card.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 100,000 since 1983 ☐ Cost: $140

INTERACTIVE IMAGES, INC.

☐ **Easel Automated Business Graphics**
Creates PC-based, color graphic, icon-oriented human interfaces to existing mainframe applications and data bases. Integrates systems.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $6,500

INTERCHART SOFTWARE, INC.

☐ **ChartBuster/PC**
Business graphics system which produces line, bar, pie and word charts in graphic design.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $750 per copy

INTERNATIONAL FINANCIAL DATA SYSTEMS, INC.

☐ **Color Graphics Presentation System - Plotter Version**
Handles reports produced by IFDS' Professional Series/1 through Series/4. Charts created include pie, bar and line. Permits self-calibrating graphs. Hard-copy output to plotter only.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $1,000

☐ **Graphics Presentation System-Printer Version**
Handles reports produced by IFDS' Professional Series/1 through Series/4. Creates bar charts. Integrates with client data base. Permits self-calibrating graphs. Hard-copy output to printer only.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $750

INTERNATIONAL SOFTWARE ALLIANCE

☐ **Caligraph With Image**
Pie charts, line, bar graphs and histograms. Defines X and Y axis labels or pie segments and scales data.
IBM PC ☐ 64 KB req. ☐ Cost: $75

IRIS SOFTWARE, INC.

☐ **Iris-100**
Presentation graphics. Generates bar charts, histograms, line graphs, pie charts and time series graphs. Includes multiple windowing and floating text. Supports plotters and printers.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,200 since 1984 ☐ Cost: $150

☐ **Iris-400**
Menu-driven graphics. Generates bar charts, histograms, line graphs, pie charts, time series graphs, stock market charts and scatter plots. Integrates graphics files into slide-show presentations, selectable range and circle function. Supports plotters and printers.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $395

ISSCO (INTEGRATED SOFTWARE SYSTEMS CORP.)

☐ **Disspla/PC**
Standalone graphics system or option to ISSCO's Disspla. Integrates mainframe graphics applications throughout PC environment. Allows Disspla mainframe applications to be offloaded to PC.
IBM PC

K SOFTWARE HOUSE, INC.

☐ **Drawing Tablet**
Hi-res drawing program. Supports one or multiple screen drawings. Block operations with replacing, inlaying and over-laying. Uses dot matrix printers and pen plotters. Paints with 100 different brush sizes. Library functions are available.
IBM PC ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $50

KERN INTERNATIONAL

☐ **Designer-3D**
Creates drawings on screen, rotates in 3D, enlarges, views in perspective, stores on disk, recalls and updates.
IBM PC ☐ 64 KB req. ☐ Cost: $120

☐ **Scientific/Engineering Data Plotting**
Data management and plotting programs. Plots several files simultaneously. Connects data points by solid, dotted or dashed lines. Produces linear, semi-log, log-log or polar plots. Includes axis labeling, data editing and optional grids.
IBM PC ☐ 64 KB req. ☐ Cost: $85

KOALA TECHNOLOGIES CORP.

(division of PTI Industries)

☐ **Executive Presentation Kit**
Presentation graphics.
IBM PC, XT ☐ 192 KB req. ☐ Cost: $300

☐ **PCDesign**
Presentation quality bar and pie charts using Koala Pad touch tablet.
IBM PC

LARK SOFTWARE

☐ **DataPlotter**
Produces line graphs, scatterplots, bar graphs and pie charts on dot matrix printers. Allows different symbols, uneven spacing on X axis, multiple functions, discontinous functions, numerous labels, and lines and unconnected points on same page.
IBM PC ☐ 48 KB req.

LCS/TELEGRAPHICS

☐ **TelePaint**
Produces 35mm slides and overhead transparencies. Combines color graphics and text on 8 ½ by 11 inch pages. Captures and enhances graphs and charts from Lotus 1-2-3. TelePic Image Libraries containing collections of symbols, graphic aids and illustrations are available.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $149

LECHT SCIENCES, INC.

☐ **Animation Studio**
Simulates camera and multi-plane animation stand. Paint module lays out graphics and text. Movie module creates, edits and reviews film dynamically in real time. Generates in-between frames. Utility for image capture, scaling and rotation.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 2 since 1985 ☐ Cost: $20,000

☐ **TAPS (The Animated Presentation System)**
Contains vehicle for interactive animated graphic presentations. Captures and enhances images and makes films. Displays resulting film interactively. Pause, rewind, step forward and backward single frame. Software controlled pointer.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 2 since 1985 ☐ Cost: $1,000

LIMICON, INC.

☐ **Animite**
Animation creation using in-between, stick-figure, sprites, cel, multi-plane, color-mapping, sequential display, blinking, and other techniques. Works within the Softbus environment so the user can add animation techniques, or modify the user interface.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $1,000

☐ **Chartright**
Creates color graphs and charts from numeric data entered directly or from spreadsheet. Stores 200-300 finished charts per ordinary diskette. Sends finished charts over 1200 baud phone lines.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $100

☐ **ProDraw**
Color drawing/animation software. Integrates with other Softbus operating environment software.
IBM PC, XT, AT, Portable PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $100

THE LISP CO.

☐ **TLC-Logo**
Multi-turtle graphics.
IBM PC ☐ Cost: $100

LOTUS DEVELOPMENT CORP.

☐ **Freelance**
Creates charts and drawings. Edits charts from Graphwriter, Lotus 1-2-3 and Symphony. Freeform capability and symbol library. Accepts Lotus PIC files and ASCII files and outputs to slides, transparency or paper.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $395

☐ **Graphwriter**
Business/presentation for paper, transparencies and slide/production. Pie, bar, line, Gantt, organization, range, bubble and special purpose charts. Built-in artist places, sizes and positions data as required by output medium.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 25,000 since 1983 ☐ Cost: $395-$595

MANAGEMENT GRAPHICS, INC.

☐ **PC-Slide**
Generates hi-res 35mm slides. Pie, bar and line charts. Text charts in 255 colors, 8 font styles and 95 sizes. Includes ShowMaker interface to VideoShow 150 and 160 video display unit.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $995

MARTIN MARIETTA DATA SYSTEMS

(operating company of Martin Marietta Corp.)

☐ **ShowIT**
Business graphics program with 3D pie charts, pyramid charts and slide shows. Displays actual data values with graphics. Interfaces to other PC programs in addition to other programs in the ITSeries. Printer, plotter and 16 colors support.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 920 since 1984 ☐ Cost: $250

MATHEMATICAL APPLICATIONS GROUP, INC.

☐ **Chart**
Creates data representations in the form of charts, graphs, words and symbols. Combines with SlideLink and Service Center Network for slides and overhead transparencies. Charts are modifiable with graphic and textual annotation. Accepts data entry in different formats. Mathematical functions available.
IBM PC ☐ 512 KB req.

☐ **PC Presents**
Transforms Lotus 1-2-3 graphs into color slides, prints and overhead transparencies. Creates design-compatible title and bullet charts.
IBM PC

☐ Plottalk
Creates presentation graphics. Chart types include horizontal and vertical bar, pie, line, step, scatter and text. Sends data to user's output devices or MAGI Service Center Network via modem. Integrates with SlideLink and Service Center Network for slides and overhead transparencies.
IBM PC ☐ 256 KB req.

☐ Sound Presentations
Combines a graphics editor with a library of pre-defined, interactive graphics templates. Creates special effects to highlight graphics. Draws in data from external data bases. Output devices include pen plotter and printers. Integrates with SlideLink for slide generation.
IBM PC ☐ 256 KB req.

MEDIA CYBERNETICS, INC.

☐ Dr. HALO II
Provides icons, filled/unfilled circles, ellipses, pencil, paint can and scissors. Draws, paints, moves, cuts, pastes and rubber stamps images. Choice of colors, patterns, symbols, line widths and airbrush densities. Includes virtual page, undo function, scaling and curve fitting.
IBM PC, XT, AT, 3270-PC, PCjr ☐ 256 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $140

☐ Image-Pro, Image-Pro 100
Analyzes, stores and retrieves for future reference information from documents, photographs, x-rays, satellites. Mouse driven image processing with icon-based interactive image editor, processing routines and HALO graphics subroutine library. Enhanced version requires Series 100 single-board image processing module.
IBM AT ☐ 512 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $1,000-$1,495

☐ NIMBUS
Bar charts, pie charts, line graphs, scatter plots and high/low graphs from numerical data.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $195

METASOFT CORP.

☐ Benchmark Graphics Package
Pie/bar charts, X-Y plot and graphs can be mixed with text created on BENCHMARK word processor. Images can be saved and edited. Supports zooming, filling, free-hand draw and multiple line choice. Interfaces with BENCHMARK 3-D Spreadsheet and other DIF generated files. Includes Font Builder.
IBM PC, XT, AT, 3270-PC ☐ 384 KB req. ☐ Copies sold: 9,000 since 1983 ☐ Cost: $199

METRO SOFTWARE, INC.

☐ QPlotter
Provides organizational charts, forms, bar charts and floor plans. Designs within .001-inch.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5,000 since 1982 ☐ Cost: $100

MICHTRON, INC.

☐ GRAFITI
Drawing aid.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $40

☐ Master Graph III
Graph generator. Creates line graphs, pie charts and 3D bar graphs. Displays chart types simultaneously for comparison.
IBM PC ☐ 256 KB req. ☐ Copies sold: 700 since 1984 ☐ Cost: $90

MICRO DATA BASE SYSTEMS, INC.

☐ K-Graph
Color business graphics utility for KnowledgeMan/2. Clustered, stacked and 3D bar graphs, scatter diagrams, line graphs, area plots, pie charts and hi-lo-close graphs. Split-screen graphing.
IBM PC ☐ 320 KB req. ☐ Introduced: 1984 ☐ Cost: $225-$850

MICRO FOCUS, INC.

☐ CO-Graphics
Generates graphics from COBOL programs. Writes applications that produce graphs and charts.
IBM PC, XT, AT, Portable PC, 3270-PC ☐ 256 KB req. ☐ Introduced: 1984

MICROGRAFX, INC.

☐ In a Vision
Creates technical drawings, blueprints, illustrations, diagrams and schematics. Pans user-defined drawing space of up to 68 by 68. Creates multi-layered drawings. Scales, rotates and dimensions symbols. Microsoft Mouse and Microsoft Windows are optional.
IBM PC, XT, AT ☐ Cost: $495; $195 Microsoft Mouse option; $100 Microsoft Windows option

☐ PC-Draw
Template-based drawing package for creating, modifying, printing and plotting documents. Templates include flowcharting, networking, data flow diagramming, electrical design, space planning and alternate text.
IBM PC, XT, PCjr, AT ☐ 256 KB req. ☐ Introduced: 1982 ☐ Cost: $395

MICROLITE CORP.

☐ PBG200
Produces pie, vertical bar, stacked, clustered 3D bar, scatter and line charts. Reads SYLK/ISIS files and tab/comma delimited ASCII text. Supports monochrome and color terminals, plotters and dot matrix printers.
IBM PC ☐ Cost: $750

☐ PBG300
Produces pie, vertical bar, stacked, clustered, 3D, scatter and line charts. Reads SYLK files, ISIS files and tab/comma delimited ASCII text. Performs templating, word chart printing, device handling and chart-formatting. Supports monochrome/color terminals, plotters and dot matrix printers.
IBM PC ☐ Cost: $995

MICROPLOT SYSTEMS

☐ PlotScale
Scales and translates picture files saved using PC-PLOT. Saves changed file in standard Tektronix format.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $40

☐ SketchPad
Saves traced or sketched pictures in disk file in standard Tektronix 4010 format. Displays on screen data being saved. Monochrome or color.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,500 since 1985 ☐ Cost: $50

MICROPRO INTERNATIONAL CORP.

☐ ChartStar
Produces charts. Includes text with nine choices of fonts, linear/logarithmic line, and charts. Charts/graphs include pie, bar, organizational, scatter, curve-fitting and Gantt. Accesses spreadsheet data.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $295

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Microsoft Chart
Enables graphics data to be entered, edited and formatted directly in windows. Data can be entered from any Macintosh program. Includes pictorial gallery of 40 charts and graphs.
IBM PC ☐ Cost: $295

MICROVISION SOFTWARE, LTD.

☐ Curve II
Hard copy graphics for business, science and engineering. Uses HP, HI and Pixie plotters. Plots equations, pie charts, bar graphs and text. Subroutines are separately documented.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1969

MIRACLE COMPUTING

☐ Eazygraf
Uses color display to prepare graphic displays using med- or hi-res. Prints on Epson MX-80 with GRAFTRAX. Saves graphics on diskettes.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 15 since 1982 ☐ Cost: $35

☐ Grafcalc
Pie charts, scatter, dot, line, bar and map graphs, histograms and graph overlays. Provides an interface to VisiCalc.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $475

☐ Graphit
Produces single graphs of data, including pie charts, dot graphs, line graphs, bar graphs and histograms. Prints results on an Epson MX-80.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 20 since 1982 ☐ Cost: $80

☐ Joydraw
Produces diagrams and illustrations. Places text on the screen at different places using placement of cursor with joystick. Prints on an Epson MX-80 printer.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $40

MOUSE SYSTEMS CORP.

☐ PC Paint Plus
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 75,000 since 1985 ☐ Cost: $99-$199

NCR CORP.

☐ Graph
Circles, rectangles, lines, text and other graphics pictures.
IBM PC ☐ 128 KB req.

NETRON, INC.

☐ Movie System
Creates and projects movies. Interactive tutorial facility writes customized training movies. Spy log facility copies screens and allows remote monitoring of terminals. Projects in forward and reverse. From five frames per second to several minutes per frame.
IBM PC

NEW ENGLAND SOFTWARE, INC.

☐ Graph-in-the-Box
Memory-resident graph generator. Captures data and text directly from application running. Allows changes to chart type, colors, fill patterns and attributes from icon menu. Supports hi-res graphics boards, plotters, black and white and color dot matrix printers and laser printers.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Cost: $98

NICOLET COMPUTER GRAPHICS DIVISION

☐ GKS (Graphics Kernel System)
Creates specific plotting language code that drives Zeta plotters. Must be used in conjunction with Graphic Software Systems GSS Drivers.
IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $250

NORFORK SYSTEMS

☐ PC-ORG Chart
Organization charts. New hires, terminations, and company reorganizations.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 150 since 1983 ☐ Cost: $95

OEDWARE

☐ PC-Key-Draw
Graphics editor for mechanical design, architectural design, 35mm slide creation, graphical interface design, demo slide shows with full animation, flowcharting, graphic arts and desktop publishing. Functions include layers, virtual pages, fill patterns and area and center calculation. Keyboard or mouse input.
IBM PC ☐ Cost: $100

OFFICE SOLUTIONS, INC.

☐ OfficeGraphics
Provides integration between text created on OfficeWriter and graphics created on Chart-Master, Lotus 1-2-3 and Graphwriter. User may specify image placement, check image size and modify images. Clipping, expansion, reduction and rotation. Color printed or variegated shades of grey.
IBM PC, XT, AT ☐ 75 KB req. ☐ Copies sold: 1,000 since 1986 ☐ Cost: $145

OMICRON

☐ Plotrax
Inputs/plots data with line, bar or pie format. Eight regression formulas for analysis. Supports log/semi log plots, dual axis and eight files per line plot.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1981 ☐ Cost: $340

PAB SOFTWARE, INC.

☐ HIRES Master
Enhances normal BASIC by providing hi-res plot command. Plots up to 6 functions on screen or printer.
IBM PC ☐ 96 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $35

PACIFIC BASIN GRAPHICS

☐ 100 or 200 Business Graphics
Pie/bar charts, line drawings and scatter plots. Supports RGB monitor, pen plotter, matrix printers and graphics console.
IBM PC ☐ 64 KB req. ☐ Copies sold: 250 since 1982 ☐ Cost: $295 and up

PAL SOFTWARE

☐ ARTPAK Drawing, Animation and Music
Draws circles, boxes and lines. Turns and flips images. Paints, duplicates, erases, expands and reduces to different size increments. Creates shading and pattern images. Writes text in different sizes. Mixes text with graphics.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $99

☐ ARTPAK Presentation System
Generates pie, line and bar charts. Supports 37 different text fonts. Provides 8 ½ by 11 inch hi-res printout.
IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $350

☐ Picturepak II
Set of 50 pictures used in preparation of business reports and presentations.
IBM PC, XT, AT, PCjr ☐ Cost: $50

☐ Plotter Support Program
Supports four-color plotters such as CACOMP model 84, 49, 95, IBM XY 749, Houston Instruments' DMP 40, DMP 29, PC 595, and PC 695 and InterSweet P model 100. Supports 16-color printers such as HP 7475 and HP 7470.
IBM PC, XT, AT, PCjr ☐ Cost: $50-$100

PAPERBACK SOFTWARE INTERNATIONAL

☐ Draw-It
Copies, moves, rotates, reduces or enlarges created pictures. Line, bar and pie charts.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $30

PATTON & PATTON

☐ Flow Charting II
Constructs and prints flowcharts and personnel charts. Provides two text fonts, standard flowcharting symbols plus additional sizes and three line styles.
IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $138-$197

P. C. STAT, INC.

☐ Advanced Graphics Package
Scatter, point, line, pie, stacked area, high-low-close, multiple/stacked/horizontal bar, *x-y* scatter, *x-y* line and *x-y* plots. Dynamic display and data transfer facilities.
IBM PC, XT, PCjr ☐ 128 KB req. ☐ Cost: $250

PCSOFTWARE OF SAN DIEGO

☐ Executive Picture Show
Creates free-form graphics. Provides 12 font styles and 25 paints and patterns. Mouse option. Creates bar, 3D bar, line, horizontal, surface and pie charts. Magnifies and scales. Grabs text and graphics from other software. Additional drawing libraries available.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 4,000 since 1982 ☐ Cost: $245

☐ PCcrayon
Creates free-form graphics on screen. Hard copy, slides and photographs. Includes 8 fonts styles, 10 paints and 10 patterns. Scaling. Animation. Mouse option. Additional drawings and pictures libraries available.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10,000 since 1982 ☐ Cost: $60

PENCEPT, INC.

☐ Pendraw
Color drawing graphics.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $195

PERSONAL SOFTWARE CO.

☐ Charts and Text
Builds organization charts, flow charts or any charts consisting of boxes and text. User can build boxes and text using ASCII tables. After building charts, they can be put together into a .BAT file to produce chart display.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $25

PETROCOMP SYSTEMS, INC.

☐ PEGS (Petrocomp's Enhanced Graphics System)
Creates presentation quality graphs of engineering and financial data. Creates Cartesian, date and true logarithmic axes. Plots data against any of 4 independent Y-axes. Works with Petrocomp's PEEK, PROFOR, PASS, Payout or other spreadsheet programs.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $1,295

PICK SYSTEMS

☐ Accu/Plot II
Transforms number stacks into charts and graphs. Formats data in simple bar, line or pie charts. Scaling, labeling, line and bar pattern/color selection. Interfaces with Pick Systems' CompuSheet+.
IBM PC, XT, AT ☐ Cost: $295

PICTUREWARE, INC.

☐ PicturePower
Incorporates photographic-quality pictures into data bases. Contains DBMS, picture capture facility, picture editor, forms generator and data communications system. Adds picture to existing data base file without recreating file. Compatible with dBASE III.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 25 since 1986 ☐ Cost: $795

PLOTWORKS, INC.

☐ Plot 88
Industry standard plotting. FORTRAN callable. Provides subroutine library for constructing grids, contour maps and 3D mesh drawings. Compatible with HP plotters/laser jet printers, Houston Instrument plotters and dot matrix printers.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $250

POLARWARE/PENGUIN SOFTWARE, INC.

☐ Graphics Magician Picture Painter
Allows user to manipulate lines, color-fill, paintbrushes, text and over 100 colors. Stores pictures. Transfers graphic files between computers.
IBM PC ☐ 48 KB req. ☐ Copies sold: 4,888 since 1984 ☐ Cost: $50

PRACTICAL PERIPHERALS, INC.

☐ CPS (The Computerized Presentation System)
Allows free form drawing for creating presentation graphics and slide shows with mouse. Composes color figures with boxes, lines, ellipses and arrows. Eleven text fonts in 6 sizes are built-in. Designs fonts. Object-oriented editing includes move, copy, resize, reshape, recolor, mirror and rotate.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $195

PRACTICORP INTERNATIONAL, INC.

☐ PractiGraph
Produces horizontal/vertical/stacked/clustered bar graphs, 7-item/35-change point line graphs, pie charts with exploded portion and percentage display options and text charts. Includes slide show feature. Plots/prints 8 colors.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $100

PRENTICE HALL PRESS

(division of Simon & Schuster)

☐ Graphics Generator
Accesses SuperCalc and VisiCalc. Color graphics displays.
IBM PC ☐ 64 KB req. ☐ Cost: $95

PROSOFT

☐ Fontasy
Twenty-eight on-screen fonts and 60 pieces of clip art. Screen is image of paper. Additional fonts and clip art available separately. Magnifies proportional spacing and justification standard. Reads ASCII text files from disk and accepts text from keyboard.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 10,000 since 1985 ☐ Cost: $70

PYXEL APPLICATIONS

☐ Batchprint
Converts PYXEL Visuals screens to proportionately-spaced, hi-res hard copy. Prints up to 42 screens without intervention. Provides 10 font styles and 3 line thicknesses.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 8,000 since 1983 ☐ Cost: $75

☐ Visuals
Produces overhead transparencies, slide-shows and signs. Hi-res color text ¼ to 1 inch. Lines, bullets and boxes. Sans serif and serif fonts. Full 8 ½ by 11 inch page with 192KB or one-screen page with 128KB. Automatic and prompted presentations. Prints horizontally or vertically.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 15,000 since 1983 ☐ Cost: $98

QUADRAM

(subsidiary of Intelligent Systems Corp.)

☐ Imagebase
Adds pictures to DBMS such as dBASE, R:Base and IBM Filing Assistant. Provides image resolution of 640 x 200 or 320 x 200. Produces 256 colors. Allows pictures to be captured before, during and after data base file is established.
IBM PC, XT, AT ☐ Cost: $495

☐ Imageware Toolkit
Creates customizes data bases integrated with photographic images. Accommodates 18 search parameters. Device independent.
IBM PC, XT, AT ☐ Cost: $995

☐ Imageware 100
Image manipulator and graphics editor with video digitizer support. Manipulates hi-res images up to 640 x 512 x 256 colors. Includes image grabber, slide show routine, multi-font annotation, texturing and color fill. Integrates product/people photos.
IBM PC, XT, AT ☐ Cost: $295

QUADRATRON SYSTEMS, INC.

☐ Q-Chart
Chart generation for comparison schedules or critical path analysis. Works with QSI's Q-One word processing system.
IBM PC ☐ 256 KB req. ☐ Cost: $325-$395

☐ Q-Graph
Adds graphing and drawing primitives to charting capabilities in Q-Chart. Generates graphs of data from Q-Office. Handles pie/bar charts, line graphs, titles, labels and legends. Curve fitting. Overlays charts. Scales data. Draws lines/boxes. Adds symbols/color. Fills areas/patterns.
IBM PC ☐ 256 KB req.

QUAM DEVELOPMENT GROUP, LTD.

☐ Flex-Draw
Produces maps, logos, custom charts, flow charts, Gantt charts, diagrams and illustrations. Data editing. Creates a continuous line by indicating points of shape and connecting these points. Works with Kurta Series 1 Graphics Tablet to create polygons and lines in stream mode.
IBM PC ☐ 256 KB req.

☐ Orgchart
Creates organizational charts and other shapes including boxes, diamonds, circles, lines, arrows and polygons. Provides basic drawing capability. Compatible with General Parametric's VideoShow for presentations.
IBM PC ☐ 256 KB req. ☐ Cost: $495

RAND MCNALLY & CO.

Information Resource Management Dept.

☐ P.B.G. (Presentation and Business Graphics)
Creates standard business graphs, specialized population pyramids and presentation text screens. Displays pie charts in 2 or 3 dimensions, exploded, or with single slice extracted for emphasis.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $100

RIX SOFTWORKS, INC.

☐ EGA Paint
Graphics drawing program. Supports hi-res 640 X 350 pixels and 16 colors. Brush controller, automatic shapes, fill and pour, move and copy, undo facility, pop-up grid, 200m processor, enlarge/reduce, text processor, screen save/receive, image library and print screen handlers.
IBM PC

RUNE ENTERPRISES

☐ Talkshow
Provides animation and slide show capabilities.
IBM PC ☐ 128 KB req. ☐ Cost: $149

SANYO BUSINESS SYSTEMS CORP.

(Computer Division)

☐ Sanygraph
Transforms numerical reports from spreadsheet, data base or application programs to line, bar or pie charts in full color. User-controlled titles and labels. Automatic/manual scaling of axes. Allows as many graphs per page as required. Stores/recalls graphs. Multiple line types.
IBM PC ☐ 256 KB req.

SAS INSTITUTE, INC. (NC)

☐ SAS/Graph Software
Color graphics for business and research. Produces charts, plots and maps in various colors and patterns. Provides several font styles. Projects statistical data to chloropleth, surface, prism and block maps. Includes maps coordinates for U.S. states/counties and Canadian provinces. Requires Base SAS Software.
IBM 370, 370XX, 43XX/OS, CMS, DOS/VSE, TSO ☐ 512-2,000 KB req. ☐ Copies sold: 4,878 since 1980

I. P. SHARP ASSOCIATES, LTD.

☐ Plotcomm
Accesses IPSA public data bases. Transfers data between system and IBM PC files. Draws pictures and creates graphics.
IBM PC ☐ 192 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $80

SOFPAK, INC.

Kanatek Micro

☐ SOFPAK GKS
Features include stroke text, high speed polygon fill, varying line styles, 6 types of polymarkers, fast rectangle fill, and error handling. Optional data transfer capability with AutoCAD. Supports several hi-res PC/AT graphics boards.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $300

SOFTEL, INC.

☐ Videogram
Provides color freehand painting and drawing with business graphics presentation features. Supports hi-res IBM enhanced graphics adapter and tablet input. Produces 35mm slides.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $75

SOFTEXT PUBLISHING CORP.

☐ Basic Business Graphics
Bar charts, pie charts, line graphs, scatter plots, and combination of graphic methods. Data sets can be entered and graphs displayed on CRT, printers and plotters.
IBM PC ☐ 128 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $95

SOFTKEY SOFTWARE PRODUCTS, INC.

☐ KeyChart
Presentation graphics. Previews charts in 3 different ways. Performs on-screen editing for final chart preparation. Bar, line, pie, horizontal bar, high-low-close and volume, X-Y, scatter, area, log-log, semi-log, regression analysis and text charts. Supports most plotters, printers and graphic peripheral devices.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 26,000 since 1983 ☐ Cost: $375

SOFTWARE CLEARING HOUSE, INC.

☐ GraphStation
Animated spreadsheet graphics. Supports existing Lotus graph definitions. Linear/nonlinear projection from existing data. Includes line, bar, pie, freeform, text only and mixed graphics. Supports slide shows. Scatter diagrams of fixed-increment data and X-Y graphs. Linear, running average, Fourier and polynomial curve fitting.
IBM PC ☐ Cost: $495

SOFTWARE PUBLISHING CORP.

☐ Harvard Presentation Graphics
Title, lists, bullet points, 2- and 3-column, free-form and organization text charts. Pie, pie-bar, horizontal/vertical bar, clustered/stacked/overlapped bar, area, lines, curves, trend lines, bar-line, scatter and hi-low-close graphs. Five type fonts in 17 typefaces. Word processing functions. Free-running/manually controlled slideshow.
IBM PC, XT, AT, Portable PC ☐ 256 KB req.

SOFTWARE SOLUTIONS, INC. (CT)

☐ GrafTalk
Bar, pie, line, symbol, bubble, Gantt, organization and word charts. Includes sketching capabilities, text editor and mini spreadsheet.
IBM PC ☐ 48 KB req. ☐ Introduced: 1981 ☐ Cost: $450

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ Organization Table
Constructs and prints tables of organization for complex organizations. Identifies subtables and components numerically. Projects tables on screen. Scrolls vertically and horizontally. Identifies positions by position name or incumbent name.
IBM PC ☐ Cost: $50

☐ SuperGraphs
User-controlled layout and design. Provides graphic feedback with each input. Generates bar charts, line graphs, pie charts, stick plots and symbol plots.
IBM PC ☐ 192 KB req. ☐ Cost: $50

SPRINGBOARD SOFTWARE, INC.

☐ Graphics Expander: Volume 1
Provides over 300 graphics for use in Broderbund's Print Shop banners, cards, signs and letterhead. Drawing and editing tools. Captures graphics from other sources including Koala Pad and digitizer.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $35-$40

STANSFIELD & ASSOCIATES

☐ P&RC Graphic Computerized Data Analysis
Data analysis through performance and status charts (P&RC). Multi-variate statistical chart optimizes graphics and alphanumerics with right brain, left brain capabilities. Tracks periodic operations and financial statistics for overview and early warning. Outputs analog/digital hard copy.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1978 ☐ Cost: $700

STELLA SYSTEMS, INC.

☐ Business Graphics/Syon
Includes column, pie, text and pictograph charts. Provides 4/8/16 colors. User-defined symbols. Integrates text and graphs. Imports data from numerous programs including Lotus 1-2-3 and Multiplan. Supports dot matrix, plotter, film recorder and laser printers.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 10,000 since 1985 ☐ Cost: $199

STRATEGIC LOCATIONS PLANNING, INC.

☐ Atlas
Generates maps and display data at state, county, congressional district, ADI or DMA advertising region, zip code and census track levels. Plots curves, points and polygons.
IBM PC ☐ 320 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $349

☐ Atlas AMP
Provides 10 dot sizes. Writes comments and labels geographic regions.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $449

☐ ExpressMap
Supports data files and map boundary files needed to meet mapping requirements of planning, marketing and sales managers. Includes Atlas AMP.
IBM PC ☐ Cost: $499

SUCCESS SOFTWARE

☐ Schedule Graphics
Prints custom bar and milestone schedules from Lotus 1-2-3/Symphony input. Graphics symbols represent activity durations and milestones. Places text with symbols.
IBM PC ☐ Cost: $59

TECHART ASSOCIATES

☐ SignART

Composes signs and banners. Characters from ¼ to 6 inches. Signs may be printed or saved on disk.

IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $50

TECMAR, INC.

☐ Video Van Gogh Software

Digitizes all or part of video picture, displays digitized picture, transfers digitized picture to and from disk and prints image on printer.

IBM PC ☐ 128 KB req. ☐ Cost: $95

TEMPLATE GRAPHICS SOFTWARE

(division of Megatek Corp.)

☐ Micro Template

2D graphics subroutine library. CAE, process control monitoring, architectural design and scientific graph/chart generation applications. Coordinate modeling, viewing, blanking regions and charting/graphing routines.

IBM PC, RT PC ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $300

☐ Template

3D graphics subroutine library for scientific and engineering industries. 3D mechanical CAD, structure analysis, molecular modeling and finite element analysis applications. Mnemonic user interface. Includes hidden line and back face removal capabilities which aid in presenting realistic view of 3D geometric data.

IBM RT PC ☐ 73 KB req. ☐ Copies sold: 400 since 1981 ☐ Cost: $6,000-$40,000

THREE D GRAPHICS

☐ Perspective

Includes 32 preset 3D and 15 preset 2D graphs. Performs scale, rotate, move, zoom, pan, stretch and increase/decrease. User-controlled shape parameters. Adjusts label font for size, slant and boldness. Provides 180 shades/patterns. Imports/exports data between spreadsheets, word processors and editors.

IBM PC, XT, AT ☐ Cost: $295

TIMEWARE

☐ Showtext

Lays out text, calendar and organization charts for use in presentations and reports.

IBM PC ☐ Introduced: 1983

TRANSACTION SYSTEMS, INC.

☐ Advance Graphics System

Graphics in hi-res, med-res color and lo-res character. Twelve plot types. Overlay and multiple curve types available in plotting mode. Includes pie, point, line, high-low-close, bar, multi bar, stacked bar, stacked area, x-y scatter, x-y bar, x-y line, horz. bar, and area. Interfaces to popular data bases and spreadsheets.

IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ Introduced: 1985 ☐ Cost: $250

☐ Automatic Business Graphics

Line, point, multi-bar, area, pie, high-low-close and Gantt charts. Allows user to change colors, overlay plots, display data values, show labels and grid lines. Accepts VisiCalc or Lotus 1-2-3 DIF files.

IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $55

UFO SYSTEMS, INC.

☐ UFO Process Monitor

Creates interactive animated graphics. Real-time control and monitoring of remote computers, implementation and control systems. Includes free form graphics editor. Touch screen and high pen interfaces available.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $6,000

UNIRAS, INC.

☐ BIZPAK

Business graphics system. Produces line charts with multiple styles, smoothing and interpolation, bar charts of horizontal, vertical, stacked and 3D format in width, spacing and shadow control, pie charts with explosion and labeling, shaded surface charts with multiple configurations and text charts.

IBM RT, AT

☐ UNIEDIT

Interactive drawing application. Draws organization charts, flow diagrams, word charts, forms and illustrations. Includes options for line, shapes, symbols, text, color and object manipulation.

IBM RT, AT

☐ UNIGKS

Implementation of international standard GKS 7.2, Level 2b. Provides graphical output, workstation independent segment storage and sync graphical input.

IBM RT, AT

☐ UNIGRAPH

Interactive graphics application. Produces visualization of line, bar, pie, plan chart and 3D bar chart formats. Provides single and multiple charts. Designs or modifies text, axes, chart style, grids, data and color.

IBM RT, AT

☐ UNIRAS

Graphics software for applications such as business graphics, 2D and 3D mapping, image processing, seismic display, interpolation routines and fundamental graphics building blocks including 3D primitives, hidden surface removal and light source calculations.

IBM RT, AT ☐ 640 KB req. ☐ Copies sold: 400 since 1978

UNISON WORLD

☐ Art Gallery I, II

Provides 140 graphics for use with Unison World's PrintMaster.

IBM PC, PCjr ☐ Cost: $25-$40

THE VAN DER ROEST GROUP, INC.

☐ R/Graph

Works with Revelation. Generates pie, bar, line, scatter, trend and area charts. Modifies and combines graph types. Produces summary overview of selected data/graphic components. Employs windows, cursor controlled selection lists and no change prompt data entry screens. Utilizes VDI standards.

IBM PC, XT, AT ☐ Cost: $395

WILLY VERBESTEL, INC.

☐ Micrograph

Produces med- or hi- res graphics. Simple or cumulative bar and pie charts, line graphs and scatter diagrams.

IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 600 since 1982 ☐ Cost: $95

VICTOR TECHNOLOGIES, INC.

☐ Easel Grafix

Creates illustrated documents, shaded 3D drawings, bar graphs, organization charts, computer games, flow charts, electronic diagrams, and logos. Graphics presentations are drawn on-screen with a cursor. Can be printed using a dot-matrix printer. Interfaces with the Graphics Tool Kit II's GRAFIX program.

IBM PC ☐ 256 KB req. ☐ Cost: $195

☐ Graphics Tool Kit II

Includes loadable, hi-res graphics library. BUSIGRAF, for common business graphics. Character graphics program. Character font editor. Defines soft keyboard. Standard Microsoft BASIC featuring graphics display output and screen dump to printer and musical notes produced on CODEC.

IBM PC ☐ 256 KB req. ☐ Cost: $295

VISUAL COMMUNICATIONS NETWORK, INC.

☐ EV Capture Plus

Interface between color printers and application programs. Enables user to transfer graphics to a VCN ExecuVision environment. Works with Lotus 1-2-3, Symphony, Chartman and Wordstar.

IBM PC, XT ☐ 34 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $125

☐ ExecuVision

Copies images from disk-based libraries and combines with business information. Library includes borders, initials and decorative designs, industry and business catalogs, professions, faces and figures, international symbols and landmarks, maps and regions, health and fitness collection, financial services, transportation and computer applications.

IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 20,000 since 1984 ☐ Cost: $395

☐ ExecuVision Pictorial Libraries

19 libraries of images that can be edited and incorporated into presentations using VCN ExecuVision. Maps, famous landmarks, people and industries.

IBM PC ☐ 256 KB req. ☐ Copies sold: 30,000 since 1984 ☐ Cost: $80-$90 per library

VISUAL DATA ENTERPRISES

☐ Perspective

Designs and Creates 3D objects on the hi-res screen. Up to 16 simultaneous windows can be displayed in perspective, oblique, or 6 different planar orientations. In each window, the object can be separately scaled, rotated, or translated.

IBM PC ☐ 256 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $750-$995

☐ VPAINT PLUS

Presentation and illustration graphics system. Hi-res color graphics are created with 136 dithered colors, 512 X 512 resolution, and 4,096 colors to select from. Creates title slides, product layouts, transparencies, storyboards, diagrams, training materials, medical or legal illustrations, symbols, and video presentations.

IBM PC ☐ 256 KB req. ☐ Copies sold: 351 since 1983 ☐ Cost: $1,599-$2,999

VISUAL ENGINEERING, INC.

☐ ProChart

Bar/pie charts, scattergrams and line graphs for display on terminals, video monitors, projection displays, cameras and plotters. Device independent.

IBM XT/370, RT/AIX ☐ 350 KB req. ☐ Introduced: 1983 ☐ Cost: $1,195 and up

VISUAL INTELLIGENCE CORP.

☐ DataViews

Builds displays of data streams. Formats include bar, pie and strip charts, line graphs, dials, meters, radial/scatter/vector/surface plots and flowfields. Applications include simulation, computer integrated manufacturing, business and finance.

IBM AT ☐ 2,000 KB req. ☐ Introduced: 1983

☐ DV-DRAW

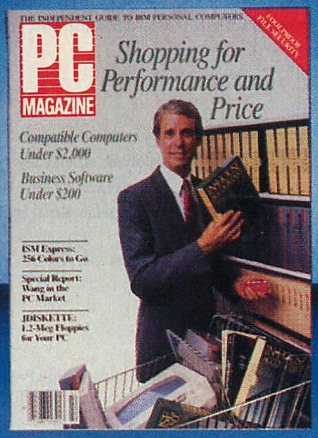
2D drawing editor. Accesses library of graphics primitives such as lines, rectangles, circles and arcs, and ISA-based symbols to create customized drawings. User designates color, size and position of each element.

IBM AT

☐ DV-Routines

Integrates any portion of DataViews graphics functionality into other software or hardware products.

IBM AT



WANG LABORATORIES, INC.

☐ PC Business Graphics

Bar, line, and pie charts. Designed for color monitors using PC lo-res controller. Permits eight line patterns. Reference information on graphics functions. Creates logarithmic, sine and linear regression curve models.

IBM PC ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $300

PC MAGAZINE LEADS YOU OUT OF THE INFORMATION JUNGLE...

Exploring the PC market is a confusing, and often risky, endeavor.

Lose your way, and you lose valuable time. One wrong turn, and you can lose lots of money.

That's why IBM and compatible PCusers look to *PC* Magazine. *PC* Magazine eliminates the risk in purchasing decisions with comparative reviews and product evaluations from the PC Labs, where products are tested the way you use them every day. It's the pathfinder to products that meet your specific needs —and those of others in your company.

PC Magazine puts you on the trail to new applications with power tips and special reports that will help you make the most of your system.

PC Magazine goes one step beyond leading you through the microcomputing jungle. *PC* leads you *out* of the jungle to the PC environment that meets your daily demands.

WEST COAST CONSULTANTS

☐ Curve II

2D hard-copy graphics capability for owners of Bausch and Lomb's Model DMP plotters. Customized graphics. Plots cartesian, parametric and polar equations; data points entered from keyboard or disk files; shaded horizontal and vertical bar graphs; and linear and logarithmic grids and scaled axes.
IBM PC ☐ Cost: $275

☐ Curve II CRT

Scientific and engineering graphics designed to plot equations and data, linearly and logarithmically, including line, bar and pie charts on screen, plotters and printers.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,500 since 1979 ☐ Cost: $325

☐ Curve Organizer

Designs and develops flow charts and hierarchical diagrams for management.
IBM PC ☐ Cost: $150

WEST END FILM, INC.

☐ Artwork

Creates graphics. Display lists and 3D manipulation. Outputs to hi-res camera.
IBM PC, XT, AT ☐ Cost: $495-$2,450

☐ Chartwork

Business graphics. Supports line, curve, bar, area and pie charts. Outputs to hi-res camera. Integrates with Artwork.
IBM PC, XT, AT ☐ Cost: $495-$750

WESTMINSTER SOFTWARE, INC.

☐ Pertplotter

Plots 500 activities in arrow or precedence. Produces compressed logic diagrams and provides time windowing. Allows views of nodes and connectors. Memory dependent. Additional memory plots larger networks.
IBM PC, XT ☐ 320 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $495

WILEY PROFESSIONAL SOFTWARE

(division of John Wiley and Sons, Inc.)

☐ Graph-Pro

Analysis techniques include regression, smoothing and confidence limits. Generates charts and graphs. Tilts/rotates 3D bar charts. Plots logarithms and semi-logs.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $100

☐ Slide-Pro

Generates transparencies, enhancing reports and presentations. Includes four character sizes, bold and italicized characters, bullets, underlining, highlighting. Manipulates 8 pen colors on a plotter.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $100

SAM WILSON & ASSOCIATES

☐ Banner

Prints one- or two-line signs and banners. User-specific upper/lower case letters, numbers and special symbols. Connects to parallel printer. Editing capabilities.
IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $40

P.A. WOOD, LTD.

☐ High Resolution Graphics

Designs and prints letterheads, diagrams, small signs and personal creations. Allows repeating and superimposition.
IBM PC ☐ 128 KB req. ☐ Cost: $80

WOODSMITH SOFTWARE

☐ Magic Keyboard

Prints letters from single size to 10 feet tall and horizontal/sideways banners to 12 inches tall. Includes several fonts and sizes. Compatible with Okidata 92-3, 192-3, Epson FX80, 100 and Star Micronics.
IBM PC ☐ Cost: $47

WORDTECH SYSTEMS, INC.

SEE AD ON PAGE 321

☐ dBCHART

Scans data files and selects the scale, hatching patterns, colors, and other parameters to create an optimal chart. Creates pictograph charts, which use symbols to represent quantities.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $99

XIPHIAS

☐ Videograph

Creates presentation quality graphics including slides, transparencies and on-screen video displays. Tool for graphic artists, product designers, industrial draftsmen and architects.
IBM PC, XT ☐ 384 KB req. ☐ Copies sold: 1,000 since 1981

ZENOGRAPHICS

☐ Autumn

Allows users to select from library of over 100 types of charts, which are created through menu prompts.
IBM PC ☐ 384 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $595

☐ Mirage

Data base graphics and query system. Produces charts, maps, diagrams and text images. Accepts data from Lotus 1-2-3, MultiPlan and any ASCII file format. Ad hoc or production graphics capabilities.
IBM PC ☐ 384 KB req. ☐ Copies sold: 2,000 since 1981 ☐ Cost: $895

Z-SOFT CORP.

☐ Frieze

Graphics screen grabbing from other programs. Prints screens on 30 printers. Stores screens on disk, for later enhancement with PC Paintbrush. Includes selectable screen viewport, and enlarges, reduces and rotates the image before printing.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 40,000 since 1984 ☐ Cost: $80

☐ PC Paintbrush

Produces freehand graphics. Modifies graphics produced by other programs using Frieze. Includes zoom, adjustable palettes, rubber band circles, curve drawing, rounded boxes, variable font stroke widths, cut/paste, undo and adjustable aspect ratio of drawings. Edits entire screen and pictures larger than screen.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 40,000 since 1984 ☐ Cost: $139

☐ PC Presentation

Presentation program of pictures created by PC Paintbrush or captured with Frieze. Places pictures on screen in 11 ways. Performs branching/looping. On-screen palette adjustment without changing picture. Intelligent picture caching. Displays character text screens. Requires PC Paintbrush Version 3.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $95

GRAPHICS—UTILITIES & SUBROUTINES

ADVANCED TECHNOLOGY CENTER

☐ DIP-10 PLUS

Device and machine independent plotting based on PLOT-10 TCS standard.
IBM PC ☐ 256 KB req. ☐ Copies sold: 275 since 1982 ☐ Cost: $550

☐ GRAFPAK-CORE

3D implementation of ACM Siggraph Core specifications. FORTRAN subroutine library for developing 2D, 3D, color, batch or interactive graphics applications programs.
IBM PC ☐ 256 KB req. ☐ Copies sold: 450 since 1982 ☐ Cost: $550

AFFIRMWARE

☐ PC Color Spectrum

Generates kaleidoscopic patterns on RGB display and color/graphics adapter. Uses alphanumeric mode. Produces video frames in any of 178 shades and colors.
IBM PC, PCjr, XT ☐ 64 KB req. ☐ Cost: $35-$44

AMT CORP. (ADVANCED MICRO TECHNOLOGY)

☐ PC-SnapShot

Screen capturing system. Captures graphics or text screen image on PC and saves it on disk for later use in presentations, tutorials and documentation. Creates custom software demonstrations and tutorial disks. Compatible with AMT's Solo Learning System.
IBM PC, XT, AT ☐ Introduced: 1985 ☐ Cost: $49

THE BINARY WORKSHOP

☐ Easy Color For Symphony

Utility to add color to Symphony. Protected cells, unprotected cells, pointers of both, error message, worksheet borders, screen borders. Colors remain resident in future Symphony sessions. Adds colors and stripes to graphs.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $60

☐ Easy Color for 1-2-3

Sets colors for foreground and background of various regions of worksheet. Protected cells, unprotected cells, pointers, worksheet borders, and screen border. Adds colors and stripes for graph page. Colors remain resident for future Lotus 1-2-3 sessions unless Easy Color is re-run.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $50

BRIDGE COMPUTER CO.

(division of Sea Data Corp.)

☐ Plotpak

High-level language interface to graphics devices. Provides windowing, linear print arrays, polygon drawing, annotations, plotting symbol/line selection, labeling and coordinates conversions. Drives screen and plotter simultaneously.
IBM PC ☐ Copies sold: 250 since 1980 ☐ Cost: $275

BRIGHTBILL-ROBERTS/THE MARKETING CHANNEL AND CO., LTD.

☐ GraFIX Partner

Creates, edits and cuts and pastes graphics. Performs global changes. Processes images instead of words. Free form drawing program operated as standalone. Supports printers, plotters and pallette. Requires graphics adaptor and color monitor.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 30,000 since 1986 ☐ Cost: $149

CEEGEN CORP.

☐ GMS

Utilizes Ceegen-GKS subroutines. Consists of a graphical modeling class library that provides the object-oriented architecture and a graphical modeling language which creates, edits and displays a GKS application.
IBM AT ☐ Introduced: 1985

M.I.B. CHOCK

☐ CGIPs (Computer-Generated Image Processors)

Semi-custom image processing and modeling programs. Examples include edge detection, thresholding, template matching, point classification, clustering, covariance, histograms, function minimization, interpolation, distance and area calculations and crosstabulation. Operates on 2D/3D data.
IBM PC ☐ 56 KB req. ☐ Copies sold: 12 since 1982 ☐ Cost: $200 and up

☐ PICDMS III (Picture Database Management System)

Language and data management for image processing, engineering models, cartography and scientific applications. Handles sets of picture data and 2D/3D variables. Builds 3D objects which may be analyzed by variety of operations.
IBM PC ☐ 56 KB req. ☐ Copies sold: 4 since 1982

COMPUTER MATHWARE

☐ Digiware

Provides software link between digitizer and IBM PC compatible. Enters, stores and calculates with graphical data. Perimeter, area and volume calculations are automatic.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $300

COMPUTER TECHNOLOGY CORP.

☐ ScreenWare

Pixel-based color graphics utility. Graphic Designer creates color graphic displays depicting process or machine being monitored. Graphic Animator animates displays in real-time. Runs co-resident with existing applications, external host or programmable controller.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $2,500

CORE ANALYTIC, INC.

☐ Visionbase

Stores/retrieves photographic images which link to textual data. Searches relational data base structure by text Keywords. Displays, stores and communicates corresponding photographic images to remote systems. Hi-res color/B&W images. Includes decision support, archival and telecommunications systems applications.

IBM PC

CYBERENGINEERING CORP.

☐ CyberTools CRT Drawing Library

Color paint program for med- and hi-res graphics, drawing and curve plotting in BASIC; etch-a-sketch type drawing, and forms generation and management. Draws triangle to user's specifications. Integrates forms into BASIC applications programs.

IBM PC

☐ CyberTools Graphics Utilities & Library

Transfers to color graphics adapter and monitor from DOS. DOS switch changes from 40 to 80 columns, to med-res mode and 80-column mono mode. BASIC bargraph program.

IBM PC

DATA TRANSFORMS, INC.

☐ Fontrix

Creates graphics on extended screen. Fonts generator allows character sets to 48 pixels. Hi-res graphics with dot by dot placement control, 96 foreground/background colors. Optionally interfaces with mouse. Prints to dot matrix printers. Lines, boxes, ellipses and cut-and-paste.

IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 10,000 since 1983 ☐ Cost: $95-$155

DATACOPY CORP.

☐ Fastore

Image scan and storage. Inputs image data to electronic archives. Establishes data bases of documents containing text, line art and written annotation. Archives historical documents, engineering drawings, maps and handwritten forms/documents. Distributes document data bases to remote locations.

IBM PC, XT, AT ☐ 256 KB req.

☐ WIPS (Word Image Processing System)

Integrated word and image processing system, OCR and CAD interface. Merges word processing, DBMS and graphics with hi-res image capturing system. Captures, manipulates, stores and transmits picture and line art images. Includes photos, line art and storage/transfer.

IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1983 ☐ Cost: $3,950

☐ WIPS Editor

Allows Datacopy image files to be modified down to the picture level. Edits captured images using graphics tools that will draw, fill, airbrush, erase, set type and rearrange the screen. Provides cut and paste facilities.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $245

☐ WIPS Jr.

Integrated word and image processing system. Receives transferred image files via floppy disk or standard communications media. Image files can be cropped, scaled, rotated and stored to disk in compressed form. Displays image with text files to verify formatting. Prints as a combined text and image file.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $495

DECISION GRAPHICS, INC. (AL)

☐ PCT

File transfer and ACI dialogue handler for AutoCAD system. Allows AutoCAD user to log on to Intergraph, DEC VAX or PDP and exchange drawing files using Decision Graphics' ACI program. Handles system to system communication, file transfers and ACI program execution.

IBM PC ☐ Cost: $75

DIGITAL VISION, INC.

☐ COMPUTEREYES

Slow-scan connection between any standard video source and computer. Acquires B&W image. Captures grey-scale and high-contrast images. Performs pattern recognition, security, quality control, spatial measurement, robotics, AI, industrial controls and computer art.

IBM PC ☐ 48 KB req. ☐ Copies sold: 5,000 since 1984 ☐ Cost: $130-$250

DUNCAN-ATWELL COMPUTERIZED TECHNOLOGIES, INC.

☐ LENIBASE/jr: Graphic Data Base System

Stores windows of graphic information to be recalled by BASIC programs or LENIPEN programs. Inputs to LENIMATION/jr, the video animation system.

IBM PC, XT ☐ 128 KB req. ☐ Cost: $150

ELECTRONIC COURSEWARE SYSTEMS, INC.

☐ Image Maker

Converts character sets into BASIC formats. Creates characters with seven colors and character sizes to 45 by 45 pixels. Character sets hold 150 characters.

IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $80

ENERTRONICS RESEARCH, INC.

☐ EnerConnect - Program 1 GDDM

Mainframe graphics files can be viewed, reduced, enlarged, rotated, annotated, and cut and pasted under PC processing control. Output can be directed to PC-based peripherals, printers, plotters, Polaroid Pallette or sent back to the host for output on the Host's peripherals. Allows data from Lotus 1-2-3 and Multiplan.

IBM PC, XT, AT, 3270-PC ☐ Introduced: 1985 ☐ Cost: $595

ENSIGN SOFTWARE

☐ HP7470 Plotter

Plots 12 month moving average for two sets of data. Letters slide plate from text stored in data statements. Uses plotter to digitize images. Plots a polar function equation and an Archimedes spiral equation.

IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $25

GEOCOMP CORP.

☐ Geocontour

Plots contours for variety of data. User inputs coordinates and data with desired contour values. Uses linear interpolation to locate and draw the contour lines. User may add geometry, symbols, labels and titles.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $550

☐ GEOGRAF

Plotting subroutines in FORTRAN, BASIC and Better BASIC. Prepares high-quality, customized graphs of any type. Produces graphs on screen, dot matrix printer and pen plotter. Formats axis labels. Adds grids to plotted data. Windowing and scaling. Twelve optional character fonts.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $275

GSS

☐ CGI

Computer graphics interface for raster and vector graphics. Provides device-independent interface between application program and graphical I/O devices. Provides device driver management, coordinate transformation, character/file I/O, graphic emulation and error reporting. Incorporates language bindings to C, FORTRAN, Pascal, BASIC compiler and Macro Assembler.

IBM PC, AT ☐ Cost: $495

☐ CGM Metafile Interpreter

Linkable subroutine library that reads, interprets, modifies and redraws graphics images stored in CGM format. Transmits images to remote systems and recreates them on graphics peripherals. Transfers information between OSs. Supports raster images and bitmaps.

IBM PC ☐ Cost: $295

☐ GKS

Full-level 2b implementation of ANSI and ISO GKS standard. Supports numerous RT displays and peripherals. Device independent. Supports VDM and GKS metafile standards. Bundles graphics primitives/attributes for picking and special handling. Ports applications to other operating environments including DOS.

IBM RT/AIX

☐ Toolkit Kernel System

ANSI/ISO GKS Level 2b standard subroutine library of low-level graphic primitives designed for programmers in fundamental graphics construction. Works with GSS-DRIVERS for device independence. Portable applications include business/presentation graphics and CAD/CAE.

IBM PC, RT/AIX ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $495-$795

HENSON SYSTEMS, INC.

☐ EmuPlot III - Three-Dimensional Printer Graphics

Graphics language interface and Pascal/MT or MicroSoft FORTRAN subroutine for production of hi-res hard copy graphics.

IBM PC ☐ Copies sold: 3 since 1983 ☐ Cost: $300

HYPERGRAPHICS CORP.

☐ Authoring System

Creates diskette based tutorials. Menu/sub-menu branching sketching, cut and paste and graphic editor. Business and presentation graphics, windowing with object libraries. Creates color graphic, screens and animation. Stores 1,000 screens on 360 KB disk.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $395

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ GDDM Graphics Data File-Color Support

IBM no. 5668-860. Business graphics support. Produces graphics support data file from screen image produced by Interactive Chart Utility, converts created file to IBM graphics language file, writes file to IBM Color Plotter attached to Graphics Attachment and tests installation.

IBM PC, XT, XT/370, 3270-PC

☐ GKS ANSI (Graphical Kernel System)

IBM no. 6024-203. 2D graphics applications portability between computer systems supporting GKS standard. Provides device independence. Supports segment rotation, scaling, transformation between world, normalized device coordinate and device coordinate systems.

IBM PC, XT, Portable, PC, AT ☐ 256 KB req. ☐ Cost: $295

☐ **RT PC Graphical File System**
IBM no. 5669-062. Provides standardized retrieval, storage and portability of 2D graphics. Sends encoded pictures to files in virtual device metafile format rather than sending graphics data to output device. Icon-driven.
IBM RT PC ☐ Cost: $600

☐ **Top View Programmer's Tool Kit**
IBM no. 6024-133. Develops filters to allow mouse and cut and paste facilities. Window-design aids and panel utilities. Provides language interfaced to Top View and assists in application development.
IBM PC, XT, Portable PC, AT, 3270-PC ☐ 256 KB req. ☐ Cost: $429

☐ **3270-PC Graphics Control Program**
IBM no. 1887-697. Business graphics support. Allows selection of screen configurations, manipulation and interaction with displayed alphanumeric and graphic data and management of screen presentations.
IBM PC ☐ Cost: $450-$550

IMEDIA CORP.

☐ **PC Presents**
Integrated presentation support for Lotus 1-2-3. Transforms Lotus 1-2-3 graphs into color slides, prints and overhead transparencies. Produces title/bullet charts and tables. Combines text and graphs. Produces visuals at Service Center Network. Optional Video Server provides on-site output.
IBM PC, XT ☐ Cost: $350-$495

☐ **PC Presents Video Server**
Used with PC Presents , links Lotus 1-2-3 to GPC's VideoShow 150 Business Presentation System, PhotoMaker 150 and PrintMaker 130 to produce on-site output of graphs/charts on 35mm slides/prints and/or color and B&W hard copy.
IBM PC, XT ☐ Cost: $150

INFORMATION BUILDERS, INC.

☐ **Focus Vision**
PC/Focus add-on. Stores color video camera/videotape recorder images including people, places, products and important papers in new or existing data bases. User can make image larger or smaller and place it anywhere on screen. Stores graphics produced by other programs.
IBM PC, XT, AT, 3270-PC ☐ 512 KB req. ☐ Introduced: 1986 ☐ Cost: $750-$995

INTELLUTION, INC.

☐ **Epson FX-80/100 Graphic Print Program**
Provides graphic printout of operator graphic displays.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $195

INTERACTIVE GRAPHICS SERVICES CO., INC.

☐ **AutoLINK**
Allows two-way transfer of graphic files between a microcomputer utilizing the AutoCAD Graphics software package and an Intergraph system based on a VAX-minicomputer. Utilizes Standard Interchange Format (SIF) allowing translations to other systems. Includes integrated file transfer software.
IBM PC ☐ 512 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $10,000

KINETIC VISION SYSTEMS

☐ **4D Geometry Package Kinetic Image Synthesizer**
Includes generation, reading, writing, editing, and viewing of 4D geometric images. Controls roll, pitch, yaw, translation, scaling, with viewpoint mapping in perspective, hither/yon clipping of geometries in data base. Calculates and displays real-time motion for objects over variable number of frames.
IBM PC ☐ 64 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $1,500

LIFEBOAT ASSOCIATES

SEE AD ON PAGE 291

☐ **Multi Halo**
Supports IBM PC color and monochrome graphics board and IBM/Epson printer. Functions from FORTRAN, BASIC, PASCAL, C, or any language compiling to OBJ files. Includes arc, pie, circle, ellipse, box, bar, line, point, fill, flood, set and palette. Controls text, graphics and crosshair cursors.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4,000 since 1984 ☐ Cost: $250

LIFETREE SOFTWARE, INC.

☐ **ColorMagic**
Memory resident color mapping. Replaces color palette offered within any application running on IBM Enhanced Graphics Adapter. Provides choice of 16 out of 64 available colors and 15 pre-configured palettes. User can create up to 48 custom palettes. Interactive color selection.
IBM PC, AT, XT ☐ 128 KB req. ☐ Cost: $40

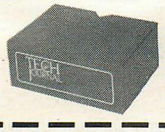
LIMICON, INC.

☐ **Softbus**
Controls multiple resident programs written in C, Pascal, Assembly, BASIC, and/or other languages. Provides machine-independent graphics and device control language (e-naps). Basis for ProDraw, Animite, Chartright and other Limicon software.
IBM PC, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $100

THE LITE-PEN CO.

☐ **Soft-Pen. 123**
Uses Lotus 1-2-3 with light pen. Cursor movement and grid locations enhance graphic capability and shrinks graphs, displaying four simultaneously. Moves portion of worksheet or help menu to color monitor for simultaneous viewing. Repeats last sequence of commands.
IBM PC, XT, AT, PCjr ☐ Cost: $80

PROTECT YOUR COPIES OF PC TECH JOURNAL

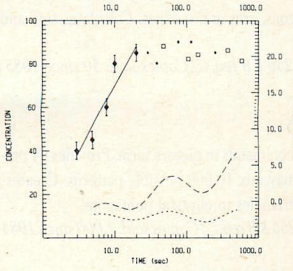


Make your collection of PC TECH JOURNAL a handsome addition to your office or home—and protect and organize your copies for easy reference!

PC TECH JOURNAL Magazine Binders and cases are made of durable luxury-look leatherette over quality binder board. Custom designed for PC TECH JOURNAL, every order receives FREE transfer foil to mark dates and volume numbers.

FOR FAST SERVICE CALL TOLL-FREE 1-800-972-5858

MAGAZINE BINDERS
Hold your issues on individual snap-on rods. $8.95 each; 3 for $25.75; 6 for $48.75.



OPEN BACK CASES
Store your copies for individual reference. $7.95 each; 3 for $22.95; 6 for $43.95.

PROFESSIONAL, COMPLETE, PC GRAPHICS

Display your research data on screen, printer or plotter with. . .

OMNIPLOT [S]: provides high quality scientific screen graphics including tabular plots, error bars, linear regression and curve fitting, contour maps, 3D plots, pies, bars and more. Screen dump to dot matrix printer.

OMNIPLOT [P]: Drives H-P or Houst. Inst. pen plotter for clear, high resolution plots.

FULLY DOCUMENTED. *Designed for the scientist, yet simple enough for the novice PC user.*

OMNIPLOT [S]: $ 195
add OMNIPLOT [P]: both 295
for IBM, PC, XT, AT and compatibles

MICROCOMPATIBLES
301 Prelude Drive, Silver Spring, MD 20901
(301) 593-0683

LODGE ELECTRONICS

☐ Image Ace II

Continuous, single screen and remotely triggered acquisition modes. Provides 320 X 200 resolution with 4 level digitization. Monochrome or pseudocolor display using IBM PC color palettes. Mixes images with text. Pop-up windows. Works with VCRs, cameras or any other source of standard video.
IBM PC, XT ☐ 128 KB req. ☐ Cost: $295

MATRICES, INC.

☐ VIP (VideoShow Interface Processor)

Captures spreadsheet, word processing and other data for presentation. Works with Lotus 1-2-3, SuperCalc, Multiplan, WordStar and other text-oriented applications including mainframe computer programs. Eight color palette. Supports VideoShow overlay and pause functions. Supports PhotoMaker for slide production. Developed for use with VideoShow.
IBM PC, XT, AT ☐ 256 KB req.

MEDIA CYBERNETICS, INC.

☐ HALO Graphics Tool Box

Includes point, line, arc, circle and ellipse. Hatch styles, dithering commands, pattern fills, world coordinates, fonts, image compression and animation. Device independent. Interfaces to most major languages.
IBM PC ☐ 256 KB req. ☐ Copies sold: 40,000 since 1982 ☐ Cost: $300

MEGA CADD, INC.

☐ Design Board Illustrator

Presentation and graphics enhancement tool. Creates graphics for business and design applications. Enhances images from Design Board Professional.
IBM PC, XT, AT ☐ 512 KB req.

MICHTRON, INC.

☐ GRAPHPAC

Graphics subroutines. Graphics interface for Lattice C, DeSmet C, Turbo Pascal and machine language. Accesses graphic related commands. Draws lines, rectangles, filled boxes, circles, ellipses, polygons, arcs and wedges. Calculates sine and cosine. Prints text.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $50

☐ PICASSO

Represents commands in picture form. Provides 64 pre-mix colors or user may mix 10,000 possible patterns. Creates polygon types from triangles to eliptical pentagons.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $100

MICRO DATA BASE SYSTEMS, INC.

☐ K-Paint

Painting for use with KnowledgeMan/2. Creates customized forms for color or monochrome screens or for printer. Paints foregrounds and backgrounds in black, blue, red, cyan, green, magenta, brown or white. Shrinks, expands, moves or modifies color blocks.
IBM PC ☐ 320 KB req. ☐ Introduced: 1984 ☐ Cost: $100-$375

MICRO-Z CO.

☐ Print-Graf

Graphics screen dump to printer. Print out of med- or hi-res graphics to IBM or Epson printer with GRAPHTRAX. Handles several formats and densities. PRTSC key initiates or calls from BASIC or Pascal.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3,000 since 1982 ☐ Cost: $45

MICROCOMPATIBLES, INC.

☐ GRAFMATIC

Seventy FORTRAN subroutines. Utility package sets screen mode and foreground and background color; 2D graphics program generates, edits and merges objects. Draws user-defined curves. Rotates and scales 3D plots and solid objects. Hidden line removal. Supports Microsoft, R/M, and Lahey FORTRAN compilers.
IBM PC ☐ 256 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $135

☐ OMNIPLOT (S) and OMNIPLOT (P)

2D and 3D graphics for scientists and engineers. Screen package and plotter driver supports HP or Houston Instrument plotters.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $135-$240

☐ PLOTMATIC

Pen plotter FORTRAN/Pascal graphics support. Interfaces with Microsoft, Ryan-McFarland, IBM Professional or Lahey FORTRAN in standalone mode or with Microcompatibles with GRAFMATIC.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1000 since 1984 ☐ Cost: $135

MICROPLOT SYSTEMS

☐ HpPlot-III

Interprets Tektronix commands and converts them to HP-GL. Recognizes Tektronix 4010, 4014 and some 4027 commands. Requires PC-PLOT III. Allows a picture file captured using PC-PLOT graphics terminal emulator to be drawn on pen plotter.
IBM PC ☐ 128 KB req. ☐ Copies sold: 2,100 since 1985 ☐ Cost: $50

☐ LotusTek

Converts picture file generated using Lotus 1-2-3 or Symphony into standard Tektronix 4010 command file. Allows pictures to be sent to remote computers using ASCII transfer.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,800 since 1985 ☐ Cost: $40

☐ Slide Show

Merges picture files into single file creating slide show from group of pictures. Up to 64 pictures can be included in one show. Supports all major graphics cards.
IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $40

MOSAIC SOFTWARE, INC.

☐ Softplot/BGL

Modular mergeable subroutines and command preprocessor which adds 40 graphics commands to BASIC. Axis, automatic label justification and 3D perspective plotting.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $99

NORFORK SYSTEMS

☐ Comp-Art

Generates coordinates and code. Draws charts, maps, pictures and logos. Accepts text and erases mistakes.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $60

NOVA GRAPHICS INTERNATIONAL CORP.

☐ GKS

Implements GKS. Distributed architecture separates all or portions of system on host and workstations, microprocessors or PCs. Provides a device independent graphics interface for application program development.
IBM PC, AT, 3270-PC/GX ☐ 80 KB req. ☐ Copies sold: 100 since 1983

OPTEL COMMUNICATIONS, INC.

☐ Telewriter II-PC

Real-time, interactive transmission of tablet-based writing, keyboard-generated text and arrow pointer. Screen capture and transmission of PC-generated, graphics and 40/80-column text. Built-in compression for subminute transmission. Broadcast capability. Screen data storage. Random access with forward and reverse recall. On-line directory.
IBM PC, XT, AT ☐ 256 KB req.

PACIFIC BASIN GRAPHICS

☐ 100 or 200 Subroutine Library

Designs custom graphics and original drawings with CalComp-Versatec compatible subroutines or will host previously developed software.
IBM PC ☐ 64 KB req. ☐ Copies sold: 250 since 1982 ☐ Cost: $500 and up

PAL SOFTWARE

☐ Color Printer Support Program

Allows user to dump graphics created using ARTPAK into color printer. Dumps graphics in user-defined color combinations, sizes and color textures. Selects print position. Rotates images in quarter turns. Requires IBM PC Color Printer.
IBM PC, XT, AT, PCjr ☐ Cost: $79

☐ Programmer's Animation Utility Program

Adds animation created with ARTPAK into user's own programs. Calls up to 36 animated sequences or musical strings. Calls from any programming language that can call .EXE files.
IBM PC, XT, AT, PCjr ☐ Cost: $100

POLARIS SOFTWARE

☐ Symbol Sheet

Includes 144 graphic symbols to add to documents or assign to keyboard characters. Changes symbol assigned to keyboard character at any time. Works with Polaris systems.
IBM PC, XT, AT ☐ 196 KB req. ☐ Cost: $50

PRIOR DATA SCIENCES PRODUCT SALES, INC.

☐ GKS/C

Implements GKS standard. Supports metafiles and VD/CGI standard. Segments can be scaled, rotated, flashed and made visible or invisible. Performs multiple display control, communicates with other users and maps multiple windows onto one screen.
IBM PC, XT, AT ☐ Copies sold: 19 since 1984 ☐ Cost: $12,000

RIX SOFTWORKS, INC.

☐ EGA Graph

Collection of subroutines which provide graphical capabilities for Enhanced Graphics Adaptor card in hi-res mode. Allows interface with Interpreted and Compiled BASIC, and Pascal. Includes print screen driver.
IBM PC

☐ EGA UTIL

Manipulates Enhanced Graphics Adaptor in text mode. Adjusts each of 16 palette registers individually. Number of lines on screen can be changed from 25 to 35 or 43. Smooth scroll, 256 user-defined characters and print screen drivers.
IBM PC

SAVANT CORP.

☐ Graphics Utility

Creates and edits shapes on enlarged grid. Different sizes and fonts for special characters sets, shapes for animation. Character size to 39 x 39 pixels. Combines into larger pictures stored on disk. Hard copies from graphics-capable IBM or Epson printer.
IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $85

SOFT & FRIENDLY

☐ PrintScreen

Makes hard copy of graphic screens. Operates with most applications including Lotus 1-2-3. Prints graphs in three sizes. Copies graphs from display screen to printer.
IBM PC, PCjr, XT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $70

SYSTEMS MODELING CORP.

☐ Blocks
Enters SIMAN model graphically and interactively. Draws blocks on screen. Highlights fields to be filled in. Checks syntax. Generates model input statements for SIMAN. Prints block diagram models using Epson FX-80 printer. Requires IBM graphics board.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $750

☐ Elements
Preprocessor. Constructs experiment portion of Siman simulation. Scans model file and creates required experimental frame. Provides error checking. Compiles files or outputs experiment in statement form.
IBM PC, XT, AT

☐ Playback
Postprocessor. Captures system dynamic behavior via graphical animation of simulation results. Represents queue lengths and resource utilizations by bar graphs and boxes. Constructs animation layout via menu driven interactive session. Animates 6 variables simultaneously. Displays in color what is occurring in system.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $250

THE TELESYS GROUP, INC.

☐ APPLEPIPS, MICROPIPS
Remote sensing analysis, feature recognition and pattern detection research. Subsetting, density slicing, histograms, image scanning/algebra, normalization, signature training and pixel classification.
IBM PC ☐ 48 KB req. ☐ Copies sold: 250 since 1981 ☐ Cost: $495

UNIRAS, INC.

☐ GIMAGE
Subroutines for processing and rendering of digitally encoded information which is organized into raster scan lines. Accepts channel or contour oriented data. Suited to applications such as data capture from satellites, medical scanners, video cameras and other image capture equipment.
IBM RT, AT

☐ RASPAK
Subroutines for performing fundamental graphics in 2D and 3D. Develops interactive, device-independent color graphics applications. Includes Unipict Interpreter metafile capability.
IBM RT, AT

VERSA COMPUTING, INC.

☐ Font Editor
Creates and edits custom character fonts for med- and hi-res graphics. Creates graphic characters. Alternate type styles and foreign alphabets include BASIC, BASICA or Assembly language programs. Uses alternate character fonts when printing to screen one or screen two.
IBM PC, XT ☐ 64 KB req. ☐ Cost: $25

☐ Graphics Hardcopy System
IBM PC, XT ☐ 64 KB req. ☐ Cost: $25

☐ Versawriter Drawing System
Accepts 8 ½ by 12 inch originals. Uses paddle game adapter connector. Features line draw, airbrush and dot, erase, recall, save, pie charts, bar graphics, circle, color fill in, 100 colors, microscope, area/distance, two draw modes and 320 by 640 resolution.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 9,000 since 1979 ☐ Cost: $299

VISION RESEARCH

☐ MegaFreeze
Snapshot utility. Transfers text/graphics screen images to MegaBuffer. Redirects Shift-PrtSc interrupt vector. Regular/double size and regular/double inverse snapshot selectable. Requires MegaBuffer.
IBM PC, XT, AT ☐ Cost: $75

☐ MegaScan
Image manipulation and editing tools. Performs move, copy, scale, rotate, erase, reverse, lighten, zoom darken halftone, mirror and vertical flip. Includes sketches, lines, boxes, circles and ellipses. Left, right, both and center justification fonts. Requires MegaBuffer.
IBM PC, XT, AT ☐ Cost: $295

VISUAL ENGINEERING, INC.

☐ C-Chart
Spline curve fitting, regression curves, major/minor ticks, individual pie slice explosion, multiple fill axes and charts, pattern styles, color or monochrome, grids, annotation and axis label rotation, legend generation, fill above-below-between curves, variable bar clustering and stacking.
IBM RT, XT/370/AIX ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $995 and up

☐ GeniSys
Integrated 3D software library and utilities. Produces images and scenes ranging from wireframe to photographic quality. Styles include facet, smooth and global shading, and wireframe. Constant time ray tracing.
IBM RT/AIX ☐ Introduced: 1985 ☐ Cost: $8,000 and up

☐ GKS
Implements ANSI/ISO GKS for device-independent graphics. Includes graphical I/O, inquiry, error trapping and disk storage. Development or run-time-only system available for including graphics with other applications.
IBM XT/370, RT/AIX ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $695 and up

WHITE SCIENCES, INC.

☐ Icon Builder
Includes graphics, template editor, template install and overlay print programs. Allows VARs to customize generalized applications to specific vertical applications. Creates business presentation graphics. Combines word processing text files with graphics.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $80

ZENOGRAPHICS

☐ VR
Virtual rasterizer. Converts graphics images into common graphics format while enhancing images. Interfaces to output device to create hard copy from graphics information displayed on screen.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $195

Z-SOFT CORP.

☐ Chart Interpreter
Allows PC Paintbrush to draw 1-2-3 PIC graph on screen. Provides hi-res Lotus graphics. Embeds full-screen 1-2-3 graph inside larger document.
IBM PC, XT, AT ☐ Cost: $30

LABORATORY SYSTEMS

ANTOMEX CORP.

☐ Laboratory Office Management
Provides patient billing, AR, aged trial balance and account status/productivity. Files for referring physicians, diagnoses, multiple pricing and procedures. Permits label generation, insurance claim production and control.
IBM PC, XT ☐ 64-128 KB req. ☐ Copies sold: 2 since 1979 ☐ Cost: $4,995

CGRS MICROTECH, INC.

☐ Control Mode
Allows data base modifications to device legends, zero/one state messages, engineering units and curve numbers for linearization. Displays analog and contact I/O devices. User may toggle contact output state and device.
IBM PC ☐ Cost: $125

CITATION COMPUTER SYSTEMS, INC.

☐ Microbiology
Includes Kirby-Bauer and MIC susceptibility reporting with results interpretation, management reporting for CAP workload and epidemiology and patient reporting.
IBM PC, XT

CLOVIS LABORATORY SOFTWARE, INC.

☐ Hummingbird Laboratory System Version S2/D2/H2
Specialized patient test result data base and medical laboratory management system. Capacities include 1,000 tests, 500 doctors and 1,500 comments. IBM XT handles 8,000 patients and 180,000 results.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $3,000-$9,000

☐ Hummingbird Quality Control System
Medical laboratory quality assurance system. Westgard rule checking, statistics, monthly Levey-Jenning plots and comment entry for each data point. Recordkeeping of 4 levels for 1,000 tests.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 17 since 1984 ☐ Cost: $1,495-$2,495

COMPLE-SOFTWARE
(division of Comple-Ware)

☐ ELISA-CALC
Transfers data from ELISA plate readers to micros, Lotus 1-2-3. Custom plate map defines contents of wells. Calculates and displays standards or unknowns. Data undergoes linear, log or logit transformations. Picks appropriate points to produce best fit.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 60 since 1983 ☐ Cost: $500

CUSTOM APPLICATION SYSTEMS, INC.

☐ BloodTrak
Hospital transfusion system. Tracks transaction history of blood products from receipt to disposition. Includes Patient, Product, Crossmatch, Issue, Return and Disposition modules and CAP reporting.
IBM PC ☐ 512 KB req. ☐ Copies sold: 5 since 1984

CYBERRESEARCH, INC.

☐ Chromatography Software for GP DAS
Performs data smoothing, peak area, peak start, peak maxima, peak end and splitting fused peaks.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $995

☐ Chromatography Software for Laboratory Automation
Interfaces directly to chromatography set-up or strip chart recorder output of standard chromatography equipment. Designed for production capillary gas or liquid chromatography. Interfaces to Lotus 1-2-3 or BBN Communications RS/1.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $795

☐ Laboratory Automation Software
Controls GPIB instruments and chromatography processing. Interfaces with Lotus 1-2-3 and BBN Communications RS/1. Features process control and forward and inverse FFT and nonlinear curve fitting for up to 10 parameters and 10 independent variables with transcendental functions.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $895

DOWNEAST DIGITAL

☐ LabManager Productivity
Workload and productivity recording system for hospitals and private laboratories. Reports productivity, workload, and revenue charged for current and YTD, with monthly and summary reports.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $495

DYNAMEDIX CORP.

☐ DMX-1000
Direct interface for automated blood analyzers, manual data entry, report generator, data storage for 10,000 requisitions, quality control, billing, lab workflow records and analyses.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 50 ☐ Cost: $30,000

ELSEVIER SCIENTIFIC SOFTWARE
(subsidiary of Elsevier Science Publishers)

☐ CHEOPS
Allows user to optimize yield of synthesis, maximize output of production plant, optimize separation factor for two compounds in chromotagraphic separation, composition of polymer, or determination of enzyme in blood plasma.
IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $295

☐ CLUE
Hierarchical clustering. Arranges objects which are characterized by variables into homogenous groups based on similarities and hierarchical relationships. Handles and edits data set. Performs logarithmic or Z-transformation if required. Clustering portion handles objects and variables. Provides graphic output.
IBM PC, AT ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $295

☐ Refvalue
Estimates reference intervals based on unselected lab results. Based on population description by partly overlapping distribution. Available with OS independent graphic routines for DEC terminals VT105/VT125.
IBM PC ☐ 32 KB req. ☐ Introduced: 1984 ☐ Cost: $700

GANTT SYSTEMS, INC.

☐ Lab Manager
Data base for businesslike lab management/administration. Schedules, plans and tracks sample workload, projects, and lab Q.A. Manages inventories. Optimizes use and productivity of resources. Screen/printer graphics. Interacts with spreadsheets, communications, word processors, and Gantt Sample Log.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $395; $40 (templates)

☐ Sample Log
Data base for sample log-in/data entry and reporting. Stores information on source and type of sample, dates logged in/out, test methods, test results, notes, and storage location. Interacts with spreadsheets for calculations and General Lab Manager for scheduling.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $395

HEWLETT-PACKARD CO.

☐ 3055S
Links IBM or HP PC to HP 3421A or HP 3497A data acquisition front end. Checks limits, activates alarms, stores, prints and analyzes data. Shows cause-and-effect relationships graphically. Channel vs. channel, channel vs. time and statistics. Feeds Lotus 1-2-3.
IBM PC, XT, AT ☐ Cost: $400-$500

HEX FF, INC.

☐ LAB/HEX
Handles technical and billing activities. Provides OE, worksheet generation, result entry and reporting, and quality control. Supports direct interfacing to laboratory equipment. AR and electronic billing modules available.
IBM PC, AT, XT ☐ 512 KB req. ☐ Copies sold: 15 since 1982 ☐ Cost: $4,000

INTERACTIVE MICROWARE, INC.

☐ ADAPT
OS and high-level language interface for ADALAB-PC. Control ADALAB-PC hardware instruments. Stores and recalls data from RAM memory. Displays strip charts and scrolls horizontally. Prints summaries. Plots data and labels axes.
IBM PC, XT ☐ 128 KB req.

LABORATORY SYSTEM CONSULTANTS, INC.

☐ Laboratory Administrative Support Module
Client and prospect marketing management, laboratory cost accounting, preventive maintenance, competition analysis, reference laboratory tracking, employee recruitment and tracking. Word processing and business graphics.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 4 since 1984 ☐ Cost: $5,000

LABORATORY SYSTEMS GROUP, INC.

☐ Lab Manager
Production accounting, case scheduling/tracking, AR system. Provides user-definable departments, products and production steps. Prints reports including work tickets, invoices, statements, aged trial balance, material lists, invoice register, case entry register, cash receipts journal, remake report and production reports.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 60 since 1982 ☐ Cost: $1,995

LABORATORY TECHNOLOGIES CORP.

☐ LABTECH CHROM
Chromatography analysis program. Accepts raw chromatographic data and method parameters as input and produces chromatographic peak areas and retention times as output. Oriented toward production capillary gas chromatography or liquid chromatography.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $795

☐ LABTECH NOTEBOOK
Integrated package for data acquisition, monitoring and real-time control. Collects raw data and stores it for further analysis.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $895-$1,095

LABSOFT
(division of CRYO Resources, Ltd.)

☐ CounterSoft
Replaces manual cell counting of clicker counter. Bell tone for every 100 cells counted, percent calculations and custom reports of cell counting data.
IBM PC ☐ 64 KB req. ☐ Cost: $500-$2,000

☐ LABNET
Stores, edits and updates patient medical files for up to 126 users. Accommodates clinical and medical history information and indexes patients' files. Patient entry, lab test orders and results, instrument interfacing, claims processing, billing and statistical reports. Generates labels, worksheets and test results.
IBM PC ☐ 64 KB req. ☐ Cost: $2,000 and up

☐ RIA-Soft
Calculation of RIA data from software to laboratory analytical instruments. Effects interfacing of curve fit routine to variety of scintillation and comma counter input formats. Provides statistical information on curve fit and variance of results. Constructs dose-displacement curve.
IBM PC ☐ 64 KB req. ☐ Cost: $500-$2,000

☐ TimerSoft
Provides simultaneous and independent timing of multi-step tasks on one screen.
IBM PC ☐ 64 KB req. ☐ Cost: $500-$2,000

LIFE SCIENCE ASSOCIATES

☐ PC/LAB
Event recording, A/D recording, oscilloscope, tachistoscope and data plots for research labs.
IBM PC ☐ 256 KB req. ☐ Cost: $345

☐ Pharm
Pharamacological research calculations package with 33 computational and statistical procedures for drug testing. Provides against antagonists, biochemical and pharmacokinetic principles, statistical analysis and statistical tables.
IBM PC ☐ 48 KB req. ☐ Copies sold: 480 since 1981 ☐ Cost: $274

☐ Pharm/DAS
Pharmacological data acquisition. Data recording and experimental control of Pharm experiments using isolated tissue preparations. Calibration/equilibration, data acquisition/process control and graphing dose-response function.
IBM PC ☐ 256 KB req. ☐ Cost: $235

MEDICAL SOFTWARE CONSORTIUM

☐ Blood Gas Consultant
Arterial blood gas interpreter. User inputs patient's name, ID number, pH, p02, pC02, Fi02 and body temperature. Produces acid-base analysis and respiratory interpretation. Stores values for later reference. Performs comparison evaluation on chronic respiratory disease patients.
IBM PC ☐ 128 KB req. ☐ Cost: $195

☐ Radiology Consultant
User selects procedure and enters patient's age, sex, height and weight. Calculates ideal exposure and multiple alternative exposures for numerous x-ray machines. Includes over 50 procedures. Med-res graphics shows patient and beam positions. Available in standard screen hi-speed and rare earth screen versions.
IBM PC ☐ 48 KB req. ☐ Cost: $295

MICROCOMPUTER SPECIALISTS

☐ PHARM/PCS
Provides 33 computational/statistical procedures to evaluate drug safety in experiments on animals and humans. Designed for pharmaceutical industry, medical research and pharmacology students.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 3,600 since 1981 ☐ Cost: $250

RADIAN CORP.

☐ SAM (Sample and Analysis Management)
Handles and controls information generated and used in laboratories. Tracking, scheduling, reporting and statistical analysis of lab results. Produces financial reports.
IBM PC ☐ 128 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $3,995-$14,995

ROUSSI CONSULTING

☐ Coulter Data Transfer
Transfers particle histogram data collected by Coulter Model-ZM Counting Stand and C-256 Multi-channel Analyzer to IBM PC for display, storage, statistics calculation or processing. Statistics on data include mean, variance, median, median/mean, mode, skewness and kurtosis. Compares files using Z-test and P-values.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $1,700

SCIENTIFIC SOFTWARE

☐ LAB Management System
Data base for analytical chemistry laboratory. Search, sort, trend analysis, table printing and report generation. Quality control laboratory in pharmaceutical, cosmetic, food, petroleum and clinical chemistry laboratory.
IBM PC ☐ 256 KB req. ☐ Cost: $4,000

SOFT COMPUTER CONSULTANTS

☐ Softlab
AR, billing for insurance, Medicaid, Medicare and doctors. Supports up to 100 terminals. Includes diskette submission of claims.
IBM PC ☐ 512 KB req. ☐ Copies sold: 15 since 1979

TELE VEND, INC.

☐ Med-Lab
Tracks AR, sends statements, tracks test results and holds test result history. Reports results or tests, aging of invoices and statements.
IBM XT, AT ☐ 256 KB req. ☐ Copies sold: 12 since 1984 ☐ Cost: $2,300

TRINITY COMPUTING SYSTEMS, INC.

☐ Cath Lab Support System
Reports include pre-medication, technique cardiac rhythm, oxygen consumption/contents/saturation, blood gas results, cardiac output calculations, pressure (MM HG), blood flows, gradients (MM HG) and shunts (L/MIN).
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 40 since 1982

☐ Du Pont's Micro Radiology Manager
Maintains patient index, provides order processing, film tracking and results reporting. Interfaces to mainframe.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 16 since 1984

☐ Electrophysiology Support System
Addresses Basic Interval, Incremental Atrial Pacing, Sinoatrial Conduction Time, Tachycardin Identification, A to V/V to A Conduction Time, ERP and FRP, and plans call for Cardiac Mapping.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2 since 1982

☐ Pacemaker Followup System
Detailed record for each patient with data on implants, reprogramming and follow-up activities. Manipulates information on general pacemaker inventory and specifications.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 15 since 1982

WHELAN ASSOCIATES, INC.

☐ Dentalab
Schedules case, generates work ticket, adds case to location file, produces invoice, applies invoice to patient statement and holds case in open/work order. Prints doctor's instructions of care on work tickets. Prints doctor's next prescription bank and shipping label.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1979 ☐ Cost: $1,000-$5,000

WILEY PROFESSIONAL SOFTWARE
(division of John Wiley and Sons, Inc.)

☐ Labsoft
Laboratory instrumentation control and monitoring system. Accesses capabilities of IBM Data Acquisitions and Control Adapter. Supports chromatography, spectroscopy, colorimetry, and thermal analysis.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $350

MANUFACTURING— BILL OF MATERIALS

AMERICAN BUSINESS COMPUTER

☐ MFG Bill of Materials Reports
Jobs and materials documents system. Provides reference documents and shop paper for initiating specific jobs and for verifying material availability. Provides where used reports. Uses reports to initiate specific jobs on shop floor.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 60 since 1976 ☐ Cost: $1,500

APPLICATIONS SYSTEMS GROUP, INC.

☐ Bill of Materials
Calculates quantity to build based on on-hand/on-order quarts. Pulls from inventory as BOMs are built. Updates inventory due to sales, orders, receipts and returns. Reports include physical inventory form and cost vs. price analysis. Requires Inventory system.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 15 since 1981 ☐ Cost: $595

CERTIFLEX SYSTEMS

☐ Bill Of Materials Inventory
Handles goods, assemblies and subassemblies. Records production and disassembly. Includes production and usage reports.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 200 since 1980 ☐ Cost: $895

CHARTERHOUSE SOFTWARE CORP.

☐ Manufacturing-Aide
Manufacturing IC package. Features a system for BOM providing ten level indentation, product cost reporting, status of commitment of finished goods and/or component inventories. Interfaces with Charterhouse's OE and AR and Billing Systems.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $1,000

COMPUMAX ASSOCIATES, INC.

☐ Bill of Materials
BOM/manufacturing processor for small manufacturers. Handles IC and MRP. Maintains stock, BOM and scheduling files. Updates inventory by issue/receive transactions or by net-out after program run. Journal file posted to Compumax's GL programs Maxiledger or Microledger.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1981 ☐ Cost: $350

COMPUTER APPLICATION SPECIALISTS, INC.

☐ Bill of Materials
BOM for small firms. Maintains inventory file, standard labor entry, entry and editing of inventory receivings. Backorder report by item/customer. Inventory stock status. Purchase advice. Various inventory parts list reports. Interfaces with AR, OE and purchasing control.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 20 since 1981 ☐ Cost: $1,000

COMPUTER COVENANT CORP.

☐ Bill of Materials
Multi-level BOM and routing control system.
IBM PC ☐ 30 KB req. ☐ Copies sold: 30 since 1978 ☐ Cost: $2,000

CORPORATE CONSULTING CO.

☐ Manufacturer's Bill of Material Invoicing and Inventory Control
Customer/item sales history by month. Up to 20 raw materials and 99 finished good items. Direct invoicing of raw materials. IC supports stock status reports, product category groups, last or average cost, inventory valuation and physical inventory counts. Sales and profit analysis.
IBM PC ☐ 256 KB req. ☐ Copies sold: 20 since 1979 ☐ Cost: $2,875 (without AR); $3,875 (with AR)

CYCLO-TRONICS, INC.

☐ Inventory - Bill of Material Program For Manufacturing
Supports 99 finished products with up to 400 part numbers each.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $695

EVOLUTION 1, INC.

☐ Bill of Materials Processor
Establishes, maintains, and retrieves BOM information. Produces single and multi-level BOM, single and multi-level where-used listings, summarized bills, pre-kit analysis, and a costed BOM report.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1977

FLAGSHIP TECHNOLOGY, INC.

☐ Bill of Materials
Component of INMASS. Tracks BOM structure, executes multiple-part inventory transactions and performs requirements reporting. Updates cost of assemblies to reflect component cost changes. Encompasses labor, overhead and other non-material costs. Maintains status of jobs in progress. Produces requirements and where-used reports. Used with MRP, Job Cost/WIP modules.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1980 ☐ Cost: $600

HAI SOFTWARE, INC.

☐ HAI*LINE Manufacturing
Integrates with HAI*LINE Inventory. Provides up to ten subassembly levels. Updates costs from component costs. Reports include produce cost, where-used, production list, shortage, and material requirements. Provides full audit. Available in foreign languages.
IBM PC ☐ 128 KB req. ☐ Copies sold: 8,000 since 1981 ☐ Cost: $495

HELMSMAN SYSTEMS, INC.

☐ H-BOMM
BOM management with part number control. Spreadsheet capability. Includes engineering change control with date effectivity built in. Tracks and controls drawings. Generates reports. LAN compatible.
IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $2,495

INFISY SYSTEMS, INC.

☐ Bill-of-Material
Multi-level BOM system. Generates single-level, multi-level and where used reports and screens. Integrates with InFiSy inventory routing, scheduling, job cost and OE.
IBM PC ☐ 128 KB req.

INFOSOURCE MANAGEMENT, INC.

☐ JMACS-Bill of Materials
Maintains on-hand items. Reports show actual scrap and waste percentages greater than standard. Multiple level bill provides material structure for MRP explosion. Shop routings show progression of labor for finished item.
IBM PC, AT ☐ 512 KB req.

LOGICAL DESIGN CORP.

☐ Bill of Materials
Component of LDC's Manufacturing Management System. Maintains parts list/item master, product structure, operations, routings, machines, work center, material classification, inventory and vendor. Parts explosion reporting. Parts defined as finished, component, user-defined. Maintains MTD and YTD.
IBM PC ☐ Copies sold: 75 since 1981 ☐ Cost: $2,450-$6,800

MCBA

☐ BOMP (Bill of Materials Processor)
Allows up to 12 levels of BOM for engineering, product costing, purchasing and manufacturing. Single-level, indented and summarized inquiries. User-assigned component sequences. Specifies scrap/shrinkage. Obsolete, forecasted, planned and modular bills.
IBM PC, XT, AT ☐ 96 KB req. ☐ Copies sold: 35 since 1980 ☐ Cost: $2,000-$9,500

☐ Micro Level II Manufacturing System - Bill of Material Processor
IBM PC, XT, AT ☐ Cost: $2,000-$6,000

MICROPLUS SOFTWARE, INC.

☐ Bill of Materials
Tracks assembled/unassembled inventory items. Works with Accounting Plus Inventory by adjusting quantities shown on hand when using unassembled parts. Calculates cost of assembled item based on components cost. Prints/tracks production orders. Requires Accounting Plus Inventory module.
IBM PC ☐ Cost: $495

MIDWEST COMPUTER CENTER CO.

☐ BOMP (Bill of Materials Processor)
Requires MCC's Inventory Management System. MRP report with quantity and cost of each required part, BOM using part, total cost to build in stock, total labor, hours required and cost. Additional disks for multiple lists.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1979 ☐ Cost: $395

MINI-MICRO BUSINESS SYSTEMS

☐ Bill of Materials
Product explosion/implosion.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 1,986 since 1978 ☐ Cost: $1,495

MMS INTERNATIONAL

☐ MCS-3 Inventory Control/Bill of Materials
Item Master-File, BOM, Stock Room Detail, Vendor Master, Shop Order, PO Printing and Special Report Menu module.
IBM PC ☐ 64 KB req. ☐ Copies sold: 600 since 1979 ☐ Cost: $2,500

OCCUPATIONAL COMPUTING CO., INC.

☐ Manufacturing-Aide
Manfacturing IC package. Provides ten level indentation, product cost reporting, status of commitment of finished goods and/or component inventories. Interfaces with OCC's OE and AR and Billing Systems.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 600 since 1979 ☐ Cost: $1,000

SDM-SYSTEMATICS, INC.

☐ Boss Inventory (Bill of Materials)
Builds finished part in inventory form existing subcomponents. Provides costing runs for price changes. Allows increased/decreased cost of finished goods, minimum/maximum level tracking, interfaces to OE and AR, parts explosion and 12 character part number.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 168 since 1982 ☐ Cost: $1,595-$2,995

C. R. SMOLIN, INC.

☐ BMP (Bill of Materials Plus)
BOMP and engineering documentation control. Supports multiple data bases of up to 32,000 parts and includes costing and cost roll-up features. Reports which contain sort and data selection capabilities include part master, single level, indented and summary BOM.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $995

SOLVATION, INC.

☐ Bill of Materials
BOM for small manufacturing companies. Integrates with other Solvation modules. Single- or multi-user.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4 since 1983 ☐ Cost: $1,195-$1,995

SYNERGISTIC SYSTEMS, INC.

☐ Manufacturer's Inventory Management System
Multi-departmental. Multi-level password security. Handles multiple accounting methods. Generates audit trail, part and job history, BOM, ABC classification and cyclic inventory report. What-if analysis and PO processing supported. Multi-level explosion/implosion. Six prices/part. Tracks shortages.
IBM PC ☐ 64 KB req. ☐ Copies sold: 14 since 1983 ☐ Cost: $2,000-$7,000

TWIN OAKS, INC.

☐ mrp2- Bill of Materials
Supports 20 levels of BOMs. Secondary Description module appends descriptive text to the primary description. Engineering Change module controls the starting and stopping of BOM or router.
IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $1,750-$3,050

WILEY PROFESSIONAL SOFTWARE

(division of John Wiley and Sons, Inc.)
☐ Bill of Materials Plus
Evaluates status of materials in product manufacturing. Tracks all material used in stages of product manufacturing. Creates a computer model of new products from the top assembly to the purchase parts.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $995

WOODBURY COMPUTER ASSOCIATES, INC.

☐ Bill of Materials
Integrates with MBSI accounting system. Multi-level allows product simulations, work order costing, outside labor, and service costs, work order adjustments and unit of measure maintenance.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1 since 1984 ☐ Cost: $2,500

MANUFACTURING— COMPUTER-AIDED MANUFACTURING

ANALOG PRECISION, INC.

☐ Coordinate Measuring Machine
Translates coordinate to parts axes. Handles three axis translations and rotations to allow inspection of complex mechanical parts. Calculates flatness, roundness, bore axis and bolt circle parameters and compares results with standard descriptions of each part.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 2 since 1978 ☐ Cost: $5,000

APPLICON

(a Schlumberger Co.)
☐ Complex Surface Machining
3D surface design and manufacturing capabilities based on Applicon's EQINOX geometric modeler.
IBM PC

☐ Editor
Geometric editor for 2D and 3D engineering design, drafting and manufacturing.
IBM PC

☐ Sheet Metal Design and Fabrication
Graphics system for designing and machining sheet metal parts. Creates fabrication designs in 3D views. Performs bend calculations.
IBM PC

ATE ASSOCIATES

☐ Testmate I
ATLAS compiler for ATE. Allows user customization to desired environment. Provides the ability to rehost, retarget and reconfigure.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 7 since 1978 ☐ Cost: $25,000

AUTO-TROL TECHNOLOGY CORP.

☐ Series 7000 Advanced Graphics Software
Geometric modeling. Develops 3D product models. Calculates volumetrics and mass properties including objects bounded by arbitrary surfaces. Calculates sections and volumes about various origins and vector orientations. Saves properties in external text file or summed in stack type calculator.
IBM PC, AT

CADAM, INC.

☐ Interactive Design
Covers manufacturing, electrical, architectural, engineering and construction design applications. 3D Interactive, Interactive Solids Design, 3D Piping, NC enhancements, Design/Build/Manage, Facilities Management and Interactive Prance modules available.
IBM PC, AT, RT PC

CHEMPRO DATA SCIENCES CORP.

☐ Rapidcost
CAM estimating system. Provides cost, time and routing sheet capability.
IBM PC, XT, AT ☐ Cost: $895-$4,125

COMPUTER DETAILING CORP.

☐ Beams and Columns
Sheetmetal fabrication. System of menu, macros and micro drawings for detailing structural steel with AutoCAD. User can modify and add menus.
IBM PC ☐ 640 KB req. ☐ Copies sold: 45 since 1986 ☐ Cost: $1,800

CONCEPT TECHNOLOGIES, INC.

☐ IBM CADAM Interface
IBM PC, XT, AT

HEWLETT-PACKARD CO.

☐ PC Instruments
Allows an HP or IBM PC to control eight HP instrument modules for test and measurement tasks. Performs instrument control and business applications.
IBM PC

ITMI (INDUSTRIAL TECHNOLOGY AND MACHINE INTELLIGENCE)

☐ LAIMAN
Interactive machine vision development environment. Includes 17 modules to perform feature extraction and analysis. Handles lines, segments, angles, arcs of circles, axis of inertia and bounding rectangle.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $4,000-$10,000

☐ LM-PC
Robot independent robot programming language. Pascal-like. Uses frames to model Cartesian space. Allows multiple robot control, parallelisms and advanced robot features.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 5 since 1984 ☐ Cost: $15,000

LOVELACE LAWRENCE & CO., INC.

☐ CAPP-CODE Interactive Process Planning and FMS Planner
Interactive planning files provide total recall retrieval of existing methods information for all process planners to insure consistent planning and standard routings. Standard plans and routings provide families of parts for FMS designs.
IBM PC ☐ Copies sold: 40 since 1970 ☐ Cost: $15,000

☐ UNICODE - CAM Data Base for Group Technology and FMS
Provides classified data base for all parts and assemblies. Uniform family codes are developed to establish group technology capabilities in CAM applications such as MRP and FMS studies.
IBM PC ☐ Copies sold: 150 since 1979 ☐ Cost: $15,000

PACKAGED COMMUNICATIONS TECHNOLOGY, INC.

☐ PCIM
Design, drafting, analysis and numerical control. Supports 2D/3D drafting and design with NC for lathe and milling operations. Simultaneous multiple views and customer report.
IBM PC, AT ☐ 1,100 KB req. ☐ Introduced: 1984 ☐ Cost: $4,500-$12,000

RENISHAW-MAE

☐ MAECAM
Graphical NC programming system. Includes graphical verification of geometry, tool and tool path to reduce prove-out time, and macro facility. Prints tooling and set-up information. For turning, milling, drilling, flame-cutting, laser cutting, engraving and punch nibbling machines.
IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 250 since 1981 ☐ Cost: $7,000-$15,000

TIPNIS, INC.

☐ Computer-Aided Manufacturing Systems
CAM for manufacturing/production planning and simulation. Modules include Group Tech, Job Shop, Layout, Machinability, ROI and Simulation.
IBM PC ☐ Copies sold: 40 since 1980

T & W SYSTEMS, INC.

☐ CAM Connection

CAD/CAM. Retrieves and orders part geometry information from a VersaCAD drawing, then converts it into numerical data transferred to Point Control's smartSHAPE graphics system. Bypasses duplication by making a direct connection between the drawing, through smartSHAPE to a CNC machine.

IBM PC, XT ☐ 384 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $750

MANUFACTURING—MATERIAL REQUIREMENTS

AAA TECHNOLOGY & SPECIALTIES CO., INC.

☐ Matecon

Tracks materials or equipment from multiple sources to multiple distribution points. User-defined accounting structure, associated documents, responsible parties and materials movement.

IBM PC ☐ 256 KB req. ☐ Copies sold: 2 since 1983

AFTEC, INC.

☐ Pro-III

OE invoicing, sales analysis, IC, purchasing, engineering, BOM, AP, AR, GL, payroll and financial reporting for manufacturers and distributors. Supports make-to-stock, make-to-order and engineer-to-order for discrete products. Handles multiple location/currency distributors. Optional lot, location and serial control.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 130 since 1978 ☐ Cost: $10,000-$20,000

A & M SOFTWARE

☐ MFGPLAN

Determines how plants should buy materials, manufacture, ship, and set selling prices in a way to maximize profit.

IBM PC ☐ 64 KB req. ☐ Cost: $400

AMERICAN BUSINESS COMPUTER

☐ MFG Job Entry

Product, MRP and inventory file records. Enters raw material quantities and production operations. Relates billing addresses to inventory. Specifies due dates and product quantities. Allocates finished stock to specific jobs. Includes ABC's MFG IC system.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 60 since 1976 ☐ Cost: $3,000

☐ MFG MRP Reports

Identifies requirements and expected shortages for materials based on release quantities, due dates, end item fabrication lead time, BOM, raw material quantities on hand, and materials on order. Traces records for selected materials during extract processing.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 60 since 1976 ☐ Cost: $1,500

COMMAND LINE CORP.

☐ MRP System

Includes interactive IC, BOM, purchasing, cash flow and labor requirements forecasting. Forecasts ahead from 1 job to 12 months of operations and reports past 12 months of manufacturing operations. Bar coding and LAN capabilities available.

IBM PC

COMPASS

☐ MRP

Calculates material requirements based on demand required to meet master schedule. Compares material requirement with quantity on hand in inventory and identifies shortages. Interfaces with Inventory and PO modules.

IBM PC, AT

COMPUMAX ASSOCIATES, INC.

☐ MRP-II Manufacturing Resource Planning

Includes Microbomp. Computes planning horizon for up to 30 months based on inventory master, product structure and schedule files. Multiple report printing. Generates pick lists and floor orders. Produces POs, shipping orders and invoices. Posts debit/credit entries to Microledger or Maxiledger GL.

IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $650-$1,000

COMPUTER COVENANT CORP.

☐ Material Requirements Planning

Timed-phased materials planning system.

IBM PC ☐ 30 KB req. ☐ Copies sold: 3 since 1982 ☐ Cost: $1,500

COMPUTERLINE

☐ Plantrac-M

Materials management system. Schedules and expedites preproduction requirements to meet start dates calculated by Plantrac.

IBM PC, XT, AT ☐ Cost: $1,300

EVOLUTION 1, INC.

☐ Material Requirements Planning

Maintains fully pegged requirements data base. Updates by net-change interactive mode, net-batch mode and regeneration. Interfaces with EDS, OE, IC, Purchasing and BOM systems.

IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1977

FLAGSHIP TECHNOLOGY, INC.

☐ Material Requirements Planning

Controls inventory balances, POs and production. Reports projected gross requirements along with scheduled receipts, projected balance on hand, planned receipts and planned order releases. Projects depletion and suggests re-order points. Requires MC Software's Inventory and BOM systems.

IBM PC ☐ 256 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $600

BERNARD GIFFLER ASSOCIATES

☐ MR2Ps

Maintains and updates inventory items. Explodes nets and setback schedules of material requirements. Creates and maintains BOM within product structure. Monitors status of order not completed. Regenerates end product requirements and corrects changed order.

IBM PC ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $10,000

HELMSMAN SYSTEMS, INC.

☐ H-MRP

Supports small-medium manufacturing company. Includes H-CHAMP, Applications Environment, H-BOMM, BOM Manager, H-BUY, Purchasing and Receiving, H-STORE, Inventory Management and Stores, H-MAKE, WIP Management, H-PLAN, Master Schedule, Planner Controls and MRP.

IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $9,995

INSTITUTE OF INDUSTRIAL ENGINEERS

☐ PLant Layout

From/to chart generator tallies number of times product is exchanged between departments. Micro-Craft produces block plan for suboptimal departmental arrangement for material handling costs. Determines optimum facility location. Considers layout evaluation.

IBM PC ☐ 48 KB req. ☐ Copies sold: 301 since 1986 ☐ Cost: $175

C. F. KERCHNER & ASSOCIATES, INC.

☐ Manufacturing Inventory Control with MRP & BOMP

Accommodates finished goods, subassembly, assembly and parts. Processes BOM and provides material requirements. Includes planning modules. Integrates parts, production schedule and purchasing information.

IBM PC, XT ☐ 48 KB req. ☐ Copies sold: 100 since 1980 ☐ Cost: $300

LOVELACE LAWRENCE & CO., INC.

☐ Classcode - Classification and Coding For MRP/GT

Improves productivity of MRP systems and traditional shop scheduling systems by providing combined-lot batch processing of similar parts and assemblies. Analog codes provide smart part numbers based on families of parts.

IBM PC ☐ Copies sold: 100 since 1979 ☐ Cost: $5,000

M & D SYSTEMS, INC.

☐ MYTE MYKE Material Requirements Planning

Determines gross and net raw material requirements by time based on standard cost module. Satisfies departmental, divisional or remote site requirements. Supports single and multi-user environments.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $795-$2,295

MMS INTERNATIONAL

☐ MCS-3 Materials Requirements Planning

Module of MCS-3. Includes BOM processor, master production schedule, MRP reports by item, MPS scheduling, demand and independent demand items and MPS groups updates.

IBM PC ☐ 64 KB req. ☐ Copies sold: 600 since 1980 ☐ Cost: $2,500

OPEN SYSTEMS, INC.

(subsidiary of Uccel Corp.)

☐ Material Management

Schedules and tracks components from raw materials to finished goods. Prints product status reports, parts requisition production schedules, inventory, costed BOM, common-parts BOM work-in-process report, manufacturing history report and work center lists. Explodes product requirements.

IBM PC, AT, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $895

PPL (PACKAGE PROGRAMS OF LONDON)

☐ Partplan

Materials Control component of Uniplan. Sales order, PO and workorder processing, requirements planning, product costing and master manufacturing file management. Password, access level and marker access security. Multiple company support.

IBM PC

C. R. SMOLIN, INC.

☐ E-Z-MRP

Runs with C.R. Smolin's BMP.

IBM PC ☐ 128 KB req. ☐ Copies sold: 30 since 1985 ☐ Cost: $1,495

SOLVATION, INC.

☐ MRP (Manufacturing Requirements Planning)

Time phased material availability. Recommends order rescheduling and new buys. Integrates with other Solvation modules.

IBM PC ☐ 128 KB req.

SOURCEMATE INFORMATION SYSTEMS

☐ AccountMate III - Manufacturing Inventory Control

Tracks finished goods and raw materials. Creates work orders, POs and invoices. Tracks receivables and prints or displays reports. User sets formulas for finished goods. Warns when items ordered exceed raw materials required. Contains billing invoice/AR and PO.

IBM PC ☐ 256 KB req. ☐ Copies sold: 70 since 1986 ☐ Cost: $995-$1,195

TWIN OAKS, INC.

☐ mrp2- Item Master & Control File
Establishes item records and interacts with data base records. Product family code used for report classification. Control code can be master scheduled, material planning, reorders point or non-controlled. Procurement code can be purchased, manufactured, phantom or descriptive. Interfaces with mrp2 modules.
IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $875

☐ mrp2- Material Planning
Generates and reschedules planned orders. Provides single level pegging and master schedule report. Features daily, net change with optional regeneration. Supports 3-year, 1,000 day shop calender.
IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $6,400-$8,295

VIDEO & COMPUTER SYSTEMS, INC.

☐ MQRS (Manufacturing Quality Reporting System)
Summarizes unit yields by station and defect percent contribution. Reports operator percent contribution to each defect.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 12 since 1984 ☐ Cost: $595

☐ SPARS (Supplier Product Assurance Reporting System)
Analyzes receiving lot quality. Tracks lot status, MRB activity, detailed vendor quality ratings and problem part numbers. Handles large volume of lots and different commodities. Generates reports. Update, inquiry and report options available.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 30 since 1978 ☐ Cost: $595

MANUFACTURING— NUMERICAL CONTROL

ACCUGRAPH CORP.

☐ multiCUT
CNC metal cutting. Generates required code for X-Y cutting table. Sends CNC code directly to cutting table without using external post processor.
IBM AT ☐ 512 KB req. ☐ Copies sold: 13 since 1984 ☐ Cost: $5,000

ADVANCED SYSTEMS CONSULTANTS

☐ ORACLS/PC (Optimal Regulator Algorithms for the Control of Linear Systems)
Numerical routines for performing linear optimal control system analysis. Utilizes EISPACK routines for eigenanalysis.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $295

APPLICON

(a Schlumberger Co.)

☐ Mechanical CAD/CAM-PC
Supports 2D design and drafting and NC programming. Compact II programming applications and communications available.
IBM PC

☐ NC Drill
Extracts and processes generic printed wiring board drill data created using Applicon's Interactive Layout Editor. Generates output for various NC drilling machines.
IBM PC

☐ NC Programming
Numerical control programming for manufacturing engineers. Combines interactive graphics processing with advanced programming features.
IBM PC

COMPREP CORP.

☐ PLC-Contour
Provides graphics geometry, tool motion generator with programming. Allows three axis plotting. Includes mirroring, variables, step and respect, user canned cycles, pocketing, boss avoidance, rotation and tab-cyl curve smoothing.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $5,500

☐ PLC-Microcam
Provides digitizer design capabilities and graphics/text plotting. Includes NC program preparation for designing machinable parts.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $7,995

COMPUTERVISION CORP.

☐ Personal Machinist
Design and manufacturing system. Provides NC programming capabilities for axis milling machines, lathes, punch presses, EDM and flame/laser cutting equipment.
IBM PC

DATAMAT PROGRAMMING SYSTEMS, INC.

☐ Datamat I
Computes geometry locations and programs machine tools from blue prints. Displays as it is defined. Output includes paper tape, floppy disk or direct transmission.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 400 since 1977 ☐ Cost: $8,500

☐ Datamat II
Computes geometry locations and programs machine tools from blueprints. Displays geometry as it is defined. Output is paper tape, floppy disk or direct transmission.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 300 since 1977 ☐ Cost: $12,000

ESAB NORTH AMERICA, INC.

☐ CAPP II
Computer-assisted parts programming. Leads operator step-by-step through the shape cutter programming process including design drawing, correction, calculations, and generations of program code for tool control equipment.
IBM PC ☐ 512 KB req. ☐ Copies sold: 40 since 1983

ICAM TECHNOLOGIES CORP.

☐ CAM.CAL1
Introductory APT graphics tutorial. Includes an engineering drawing with its part program. Stresses the relationship between the part geometry, tool movement and APT statements needed to manufacture the part.
IBM PC, XT, AT ☐ 48 KB req. ☐ Introduced: 1983 ☐ Cost: $1,250

☐ CAM.CAL2
Advanced APT graphics tutorial covering the 3D aspects of geometry and motions. Utilizes CAL techniques to establish the relationships between part geometry, tool motions/instructions and APT language statements.
IBM PC ☐ 1,000 KB req. ☐ Introduced: 1983 ☐ Cost: $2,750

☐ CAM.FIVE
Includes CAM.CAL2, CMA.APT.SURF, CAM.POST, CAM.PLOT, and CAM.PUNCH. Five axis APT language processor. Teaches APT programming and allows each user to program and verify parts. Covers non-analytical, 3D, sculptured surfaces and conventional geometric surfaces.
IBM PC ☐ 1,000 KB req. ☐ Introduced: 1983 ☐ Cost: $12,950 and up

☐ CAM.PUNCH
Reverse/conventional NC tape punch processing and management system. Offers ASCII and EIA conversion features and an editor permitting manual tape editing. Offers direct access to a main library of system and foreign tapes.
IBM PC ☐ 100 KB req. ☐ Introduced: 1983 ☐ Cost: $690 and up

MASTER NUMERICAL

☐ EZNC
NC machine programming language.
IBM PC, AT ☐ 64 KB req. ☐ Copies sold: 13 since 1979 ☐ Cost: $6,500

METCUT RESEARCH ASSOCIATES, INC.

☐ CutData
Data base with recommended cutting speeds and rates for machinery industry. Provides 84,000 recommendations covering 40 machining operations and 1,500 materials. Calculations include time estimations, horsepower estimations and unit conversions.
IBM PC ☐ Cost: $895

MICRO ENGINEERING SYSTEMS, INC.

☐ MSE (Machine Shop Estimating)
Establishes shop estimating system. Includes screw machines, CNC turning, drilling, broaching, machining center, grinding, milling, honing, turret lathe and gear machine. Handles production sawing, thread rolling/tapping, lapping, boring, gun drilling and straightening.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $4,995-$9,995

NATIONAL NUMERICAL CONTROL APPLICATIONS, INC. (NN/CA)

☐ CAPPS (Computer Aided Part-Programming System)
Supports milling and turning requirements using machine shop language. Includes two levels. Group I stores data in files translated into machine language. Group II provides 200 subroutines based on APT requiring post-processing.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 8 since 1981 ☐ Cost: $1,000

☐ NCAPT3D
Handles tape punch/read, HP 7475A or similar plotting, tape backplotting, printing, accessing APT compiler of post-processor, resequencing machine tapes, formatting CL file data into NC blocks. Addresses X, Y, Z codes, circular interpolation, block sequencing, feedrates, rapid or linear codes (G00 or G01).
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 20 since 1981 ☐ Cost: $10,350

☐ NCEDIT
Creates NC part programs. Uses manual programming techniques with text editor. Resequences N block numbers, character string search, line insert/delete. Reads/punches ASCII or EIA tapes. Reformats ASCII to EIA, or EIA to ASCII. Provides machine back-plotting.
IBM PC ☐ 512 KB req. ☐ Copies sold: 15 since 1981 ☐ Cost: $695

PERSONAL CAD SYSTEMS, INC. (P-CAD)

☐ PC-Drill
Outputs data in format that can be read and utilized for programming NC drilling machines in manufacturing.
IBM PC

PMX, INC.

☐ XL/NC
NC system for mills, lathes, grinders and wire EDM machines. Parts are described in sections so that each pattern, contour, or packet may be mirrored, scaled, rotated, reversed, and roughed-out independently. Extended capabilities for gears, curve-fairing, blend radii, automatic roughing, and variables with trig and math functions provided.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 450 since 1982 ☐ Cost: $10,000

RWT CORP.

☐ NCNET
Factory networking of NC machine tools and host computer. Provides collection of NC data for management reporting.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2,000 since 1978 ☐ Cost: $2,000

SOLUTIONWARE CORP.

☐ Geopath Lathe

Provides lathe contouring, roughing and threading. Provides custom post processors or universal lathe tailored to specific NC/CNC machines. Lathe Universal allows 99 user-designed post processors.

IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1980 ☐ Cost: $4,500

☐ Geopath Mills

Contouring, smoothing, cleaning, pattern manipulation, canned cycles and special routines. Supports laser, plasma and wire EDM cutters. Provides custom or Mill Universal post processors. Mill Universal allows 99 user-designed post processors. Runs prompted and batch modes.

IBM PC ☐ 64 KB req. ☐ Copies sold: 300 since 1980 ☐ Cost: $5,000

STOCHOS, INC.

☐ MICRO/NC

Geometrical programming language for lathes, milling machines and punch presses. Includes definitions for lines, circles, points and paths on 2.5 axis. Color graphics output to screen, printer or plotter. Automatic or manual tool path generation.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 3 since 1983 ☐ Cost: $3,750

U.S. DATA CORP.

☐ Dynamic Color Graphics

Add-on to FactoryLink. Consists of graphics editor for creating background displays, symbols and overlays and animation editor for adding dynamic capability to background displays and operator input function.

IBM PC, XT, AT, Industrial Computer Model 5531, 5532, 7531, 7532 ☐ Cost: $1,750

☐ FactoryLink

Industrial information management. Provides real-time color graphics including process and machine simulation, PID displays, alarms and alarm management, trending, data logging, file storage computation and communications between types of monitoring and control equipment. Novell NetWare compatible.

IBM PC, XT, AT, Industrial Computer Model 5531, 5532, 7531, 7532 ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $2,750

MANUFACTURING—PROCESS CONTROL

ACUREX CORP.

Autodata Division

☐ AutoMaster

Industrial process and laboratory data acquisition system. User can create and edit data acquisition programs. Provides data retrieval and data file management. Allows communication between PC and Acurex's data loggers and measurement front ends. Converts data to Lotus and BASIC files.

IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 100 since 1986 ☐ Cost: $495

ALLSTON GROUP

☐ PCL Document System

Process control lists shows current revisions of material and process specifications used on product. Tracks revision changes, maintains change history and controls distribution. Handles numerous projects each with maximum of 3 levels of document hierarchy.

IBM PC, AT, XT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $3,000

AMERICAN MULTIPLEX SYSTEMS

☐ Facilitator and Graphic Alarm

IBM PC, XT, AT, 5531 ☐ 256 KB req. ☐ Copies sold: 37 since 1980 ☐ Cost: $7,500

APPLIED COMPUTER SOLUTIONS, INC.

☐ SQC

Statistical quality control and process control. Provides normal and non-normal data analysis, histograms, X-bar, range, cumulative probability, P-chart, U-chart, C-chart and PN-chart capabilities. Features normality check, hilo charts, stats block, including actual, percent high, percent low, skewness, kurtosis, and average standard deviation.

IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $500

☐ VSAS Tolerance Analysis

3D simulation models include geometry, tolerance, and variation due to assembly operations based on user-specified tolerances. Predicts design tolerances and manufacturing variation using a statistical simulation of a production run. Accepts CAD parts geometry.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 110 since 1983 ☐ Cost: $2,500

BARBER-COLEMAN CO.

☐ PC-Trol

Programs and supervises 60 Barber-Coleman 560 Series temperature controllers equipped with digital interface. Verifies system integrity. Modules include Ramp/Soak Recipe, Alarm Summary Log, Data Acquisitions and Reports, and Communications.

IBM PC, XT

BETA TECH, INC.

☐ SPC/SQC Support Software System

Supports storage and processing/reporting of data collected in quality control applications. Contains statistical graphics capabilities for average/range charts, histograms, attribute charts, and pareto analysis. Supports Beta Mate 911 Portable Data Collector for shop floor data collection and communications.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $1,395

BRISTOL BABCOCK, INC.

(subsidiary of Babcock International, Inc.)

☐ ACCOL II: Advanced Communications and Control Oriented Language

Includes 26 preprogrammed algorithms that perform process control functions. Provides computational/arithmetic functions and constructs for program flow control. Handles sequencing, control interlocks, performance calculations and state evaluation in real time. Performs process modeling, simulation and optimization.

IBM PC

☐ AIC (ACCOL II Interactive Compiler)

Configures ACCOL II control schemes. Compiles/checks task syntax. Converts control scheme into executable tasks for RDC 3350 or UCS 3380. Creates and edits tasks. Performs linking and downloading. Modifies programs on line. Component of TrollTalk.

IBM PC

☐ TrollTalk-PC

Converts micro into network monitor. Configures Telemetroll RDC 3350/UCS 3380 micro-controllers. Allows PC to serve as remote area monitor in Network 300. Real-time data collection/presentation. Alarm logging/reporting. Historical data collection/storage. Scheduled and demand logs.

IBM PC, XT, AT

BUSINESS SYSTEMS DESIGN, INC.

☐ MetriStat

Statistical process control program that permits manual or automatic entry. Includes mean, median, mode variance, kurtosis, skewness, standard deviation, X Bar and r, X Bar and sigma, histogram, run charts, individual and moving range, c, u, p, np and capability study.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 120 since 1985 ☐ Cost: $495

CONCEPTIMATION

☐ Procost

Prepares conceptual cost estimates for process plant projects. Provides +20 to -20 range of accuracy.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $4,995

CONCOURSE CORP.

☐ Statistical Methods for Improving Performance

Statistical process control training for production employees in manufacturing. Covers how to improve quality, data collection, charting, pareto charts, cause-and-effect analysis, frequency distributions and control charts. Produces statistical charts and tools.

IBM PC ☐ 256 KB req. ☐ Introduced: 1986

CONTROLSOFT, INC.

☐ Intune

Expert-based control, system monitoring and loop tuning. Includes trending, scaling alarming, on-demand reporting, restart if power fails and simulation and tune-on-demand modes.

IBM PC, XT, AT ☐ 440 KB req. ☐ Copies sold: 20 since 1986 ☐ Cost: $1,200

DENNISON MANUFACTURING CO.

Corporate Quality Assurance Group

☐ StatAids

Statistical tools for monitoring, controlling and analyzing products/processes performance. Utilizes graphics/data storage, menu and macro instruction capabilities of Lotus 1-2-3. Includes pareto/ranked unit distribution, OC and AOQ, percent defective and correlation/regression charts. Requires Lotus 1-2-3.

IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $75

☐ StatCap

Enters, stores, analyzes and graphs measurement type process data. Analyzes/documents capability of manufacturing process to meet product/process specifications. Produces histogram, normal probability, process capability, multi-vari, range, average and moving range/average charts. Requires Lotus 1-2-3.

IBM PC ☐ 320 KB req. ☐ Cost: $150

☐ StatTrac

Analyzes product field failure, in-process and final inspection, outgoing product audit, in-plant product rejects, multiple defects per unit/lot and receiving inspection/vendor data. Displays/prints line/bar trend or bar/pie category charts. Requires Lotus 1-2-3.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $225

☐ StatTrol

Enters, stores and maintains variable/attribute type data from processes. Produces X & R, multi-vari, normal probability, moving average/range and percent defective charts. Maintains process performance capability via user-set control limits. Controls limit calculations. Requires Lotus 1-2-3.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $100

EQUINOX DATA CORP.

☐ Loopworks

Signal monitoring, alarm logging, single and hierarchical PID loops, discrete control loops, logic operations, CompuSensors, password protection and configurable displays. Supports several lines of signal interface hardware, including Opto 22, Data Translation, Analog Devices and Burr Brown.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $995

GENZLINGER ASSOCIATES, INC.

☐ Statistical Process Control

Includes attributes and variables. Accepts input from gages, calipers, scales, speech and pocket computers. Interfaces with statistical analysis systems.

IBM PC ☐ 256 KB req. ☐ Introduced: 1985

PAUL HERTZLER & CO., INC.

☐ QA/S
Data base SPC system for analysis of variable and attribute data. Control charts and process capability analysis. Data archiving for long term data storage and standard analysis. Electronic data acquisition available.
IBM XT, AT ☐ 640 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $995-$1,950

HEURISTICS, INC.

☐ Onspec Control Software
Real-time, multi-tasking system for design, analyses, specification and control. Includes modeling, simulation, historical analysis, displays, trends, alarms and process I/O and network communications.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 700 since 1983 ☐ Cost: $3,995

INTELLUTION, INC.

☐ BDBA (BASIC Data Base Access)
Transfers data between BASIC programs and Intellution's The Fix. Manipulates measurement, setpoint, output, alarm status, auto/manual status, new alarm status, alarm acknowledge, trend data, control tuning parameters, point descriptors and engineering units tags. Includes sleep function for TopView compatibility.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $395

☐ CBA (C Data Base Access)
Transfers data between C programs and Intellution's The Fix.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $395

☐ Fix: Base System
Process monitoring and control system. BASIC, Lotus 1-2-3, WordStar and SuperCalc compatible. Graphic symbol library includes valves, actuators, pumps, ladder logic, tanks and pipes. I/O includes signal linearization, filtering, alarm limit checking, message generation and direct digital and sequencing control.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $3,795

☐ Fix: Engineering Development System
Off-line development of control strategies and graphics. DBB, DBL, Draw and DBMAKE functions.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $1,750

☐ Fix: Run Time System
DBL, SAC, FIX, VIEW and TYPER functions for use with previously configured control data bases and displays using Fix Base System or Engineering Development System.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $2,250

☐ Historical Trending and Archiving
Periodically samples and saves process data from Intellution's The Fix on hard disk. Includes playback for display generation. IBM TopView compatible. IBM EGA (Enhanced Graphics Adapter) compatible. Zooming and data compression.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $500

☐ On-Line Spreadsheet Interface
Transfers data from Intellution's The Fix to external spreadsheets and from external spreadsheets to The Fix. Lotus 1-2-3, dBASE III and SuperCalc compatible.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $250

LIONHEART PRESS, INC.

☐ Quality Control and Industrial Experiments
IBM PC ☐ Cost: $145

LOGICAL DESIGN CORP.

☐ Quality Assurance System
Provides statistic process control studies. Handles reviewing design, manufacturing, assembly and quality activities. Handles processing, gaging and control activities. Performs short and long term capability studies to generate histograms, X Bar, R, S, P, NP, C and U charts.
IBM AT, XT ☐ 384 KB req. ☐ Copies sold: 30 since 1982 ☐ Cost: $5,500-$7,000

MAJOR MICRO SYSTEMS, INC.

☐ Datatrans
Transfers data collected on OS-4 Data Analyzer DataMyte 1500 and 750 Statistician or Lotus 1-2-3 to MMS' SPC Express for analysis, storage and reporting.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $350

☐ SPC Express
Documents and tracks date, shift, time, material, lot control number and operator. Monitors possible causes of process variation. Reports include full X-bar R chart, short reports, action reports, data sheet, histograms and attribute charts.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1983 ☐ Cost: $1,500

MOORE PRODUCTS CO.

☐ Mycro Distributed Batch Control Systems
Provides recipe management, unit management, scheduling, reporting, graphics, alarm handling and historical tracking. User can generate, edit and store recipes. Identifies, schedules and tracks batches. Provides performance logs and summaries.
IBM PC

☐ Mycro MIS
Evaluates plant performance. Analyzes current plant operating conditions. Gathers/stores data including energy information, chemical stream composition and production/operating costs. Formats data for use in spreadsheet. Requires Lotus 1-2-3.
IBM XT

PROSCAN, INC.

☐ QScan
Integrated statistical process control and DBMS. Monitors/controls industrial processes. Estimates manufacturing process capabilities. Designs acceptance sampling plans. Models/analyzes economics. Accommodates process control data management, statistical analysis, control charts, reports, applications development and presentations/slideshows.
IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $20,000

SIMULATION SOFTWARE SYSTEMS

☐ PCModel
Interactive, discrete-step graphic modeling and simulation of manufacturing assembly process. What-if case analysis. User controls pace of model, simulates failure points and modifies user-defined parameters during simulation session. Random number generator. Interfaces to spreadsheet programs.
IBM PC, XT, AT, PCjr, Portable PC ☐ 128 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $590

☐ PCModel/GAF (Graphic Animation Facility)
Integrated discrete-event simulation language and graphic animation system for manufacturing assembly process. Creates images in engineering units of measure. Object movement includes rotation/curvilinear motion and rectilinear translation. Includes graphic editor. Concurrent animation with simulation.
IBM PC, XT, AT ☐ Cost: $8,950

SOLVATION, INC.

☐ Routing
Maintains operations required to build product. Standard set-up and run hours. Standard labor roll-up. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req.

STOCHOS, INC.

☐ Custom/QC
Statistical process control. Includes 16 control charts, 24 descriptive statistics calculations, histograms, means, multiple regression, process capability, sampling plan development, and 12 frequency curve comparisons. Input from spreadsheet, ASCII files and automatic data capture.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $995

MANUFACTURING— PRODUCTION CONTROL

ABC MANAGEMENT SYSTEMS, INC.

☐ Work Order Management System
Planning, scheduling, time and cost control. Tracks time slips for job progress. Interfaces to payroll. Schedules work orders by priority. Provides estimating standards for time slots and repetitive jobs. Generates performance reports.
IBM XT, AT ☐ 64 KB req. ☐ Copies sold: 60 since 1982

ADAPTABLE SYSTEMS CORP.

☐ Production Scheduling System
Aids in step-by-step process of assembly of manufactured goods. Tracks work orders and schedules required man-hours. Maintains product, department and routing files, and file for variations in work force. Prints routing sheets and work orders by product number, sequentially or by sales.
IBM PC, XT, AT ☐ Copies sold: 1 since 1985

ALESSI DATA TECHNOLOGY

☐ Forecaster-Buy/Forecaster-Buy II
Automates IC and production control to support delivery schedules. Provides hi-lo update, programmed selection of turnover period, forecasting and status of inventory items. FORECASTER-BUY II includes batch processing of assembly parts. Requires only one variable input to activate internal Master Scheduling Plan.
IBM PC ☐ 64-128 KB req. ☐ Copies sold: 49 since 1984 ☐ Cost: $1,295 (Buy); $1,995 (Buy II)

AMERICAN BUSINESS COMPUTER

☐ MFG Production Planning
Provides backlog information based on release schedules, inventory quantities and operations required to manufacture end items. Plans end item requirements, prints requirements in customer order, designates an item stock and fabrication lead time, and estimates machine hours and labor hours required.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 60 since 1976 ☐ Cost: $1,500

CIMCO (COMPUTER INTEGRATED MANUFACTURING CO.)

☐ PEPS
Production estimating and planning system for turning, drilling and milling processes. Provides management reports for budgeting, equipment justification and shop floor control.
IBM PC, XT

COMPUTER COVENANT CORP.

☐ Production Planning
Capacity planning and job scheduling.
IBM PC ☐ 30 KB req. ☐ Copies sold: 15 since 1978 ☐ Cost: $2,500

CORPORATE CONSULTING CO.

☐ Manufacturer's Fractional Quantity Order Processing, Invoicing and Inventory Control
Prints user-defined orders and invoices, picking tickets, 30-character comment lines, sales and profit control reports by customer, salesperson and state, journal sales summary for commission calculation, and sales tax summary by customer's state.
IBM PC ☐ 256 KB req. ☐ Copies sold: 20 since 1979 ☐ Cost: $2,875 (without AR); $3,875 (with AR)

DICKENS DATA SYSTEMS

☐ Production Control System
Integrates job tracking with labor performance. Aids in scheduling and tracking. Information of performance to standards.
IBM PC ☐ 512 KB req. ☐ Copies sold: 2 since 1985 ☐ Cost: $6,500 and up

EVOLUTION 1, INC.

☐ Extended Work Order Status

Maintains open, released and completed work orders. Includes job status, amount of material, labor burden and outside processing accumulated at each operation, rework and scrap status and expected due dates. Reports capacity planning, loading capability at labor performance.

IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1977

☐ Master Production Schedule

Determines backlog, sets realistic goals and establishes management policy. Divides time periods into 24 intervals. Reports include master product schedule, and production schedule by product and plant.

IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1977

☐ Routing

Designed to interface BOM and WIP modules. Establishes and maintains routing master file, which calculates work center loads, manufacturing lead time and standard production costs.

IBM PC ☐ 128 KB req. ☐ Copies sold: 500 since 1977

HELMSMAN SYSTEMS, INC.

☐ H-MAKE

Provides WIP management. Enters, tracks and updates work orders. Generates paperwork packets including kit pull lists, for each job. Ties back-order item detail to work order and makes information available on-line. Generates labor and job costing reports. LAN compatible.

IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $2,495

☐ H-PLAN/M

Provides master schedule and planner controls and MRP for manufacturing operations. Provides time-phased net requirements for each item. LAN compatible.

IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $2,495

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ COPICS/EDL (Executive Data Language)

IBM no. 5785-DFW. Extracts information from DL/I and VSAM data bases and formats information for use on PC in DIF or basic sequential format. For use with spreadsheet analysis, graphics and management support applications. Requires IBM COPICS (Communications Oriented Production Information and Control System).

IBM PC, XT, AT, 3270-PC

INFISY SYSTEMS, INC.

☐ Estimating and Shop Order Routing System

Calculates cost and prepares quotes on four quantities and five mark-ups. Estimates in pieces per hours or hours per piece, multiple set-ups and set-up frequency, scrap factor, sequence operations and 999 lines of description.

IBM PC ☐ 128 KB req.

☐ Production Planning and Measurement

Provides manual or automatic, forward or backward scheduling. Considers standard hours to order/receive, setup time, run time, standard hours between operations, standard hours for outside operations, standard work week and holidays, material and outside schedules.

IBM PC

INSTITUTE OF INDUSTRIAL ENGINEERS

☐ Production Control

Features crew size analysis, assembly line balancing, line of balance analysis and setup time sequencing.

IBM PC, XT ☐ 48 KB req. ☐ Copies sold: 665 since 1982 ☐ Cost: $175

KEYTRIX SYSTEMS

☐ Primecut/2000

Panel cutting optimization, utilization and layout. Handles wood, metal, glass, carpet or other flat sheet stock. Provides cutting list and respective cutting patterns based on minimal material cost or minimum materials usage. Integrates with Keytrix's Casework/2000.

IBM PC ☐ 256 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $850-$5,000

LOGICAL DESIGN CORP.

☐ Capacity Requirements Planning

Module of LDC's Manufacturing Management System. Makes projection for 40 time periods. Includes data file backup, report spooling, and machine hours used update. Requires BOM, OE and/or Release Processing, Production Scheduling and WIP modules.

IBM XT ☐ Copies sold: 40 since 1981 ☐ Cost: $2,100-$5,600

H. B. MAYNARD AND CO., INC.

☐ MOST Work Measurement Systems

Work measurement and standards application system for manufacturing and labor control. Integrates with CAM and MRP systems.

IBM PC ☐ Cost: $11,000

MCBA

☐ M/S (Master Scheduling)

Allows what-if scheduling, use of customer's orders and sales forecasts and rough cut capacity planning. Extends into future periods with selected percent adjustments to quantities.

IBM AT ☐ Copies sold: 200 since 1984 ☐ Cost: $2,000-$7,500

M & D SYSTEMS, INC.

☐ MYTE MYKE Production Order Processing

Enters and releases shop orders and provides order inquiry and inventory updates. Features backlog based on date required, production based on completion date, and inquiry by shop order or product. Requires MYTE MYKE Standard Cost, IC and/or Production Reporting or Shop Floor Control modules.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $795-$2,295

MMS INTERNATIONAL

☐ MCS-3 Capacity Requirements Planning

Module of MCS-3, integrated manufacturing system. Handles work center load reporting and preventive maintenance.

IBM PC ☐ 64 KB req. ☐ Copies sold: 60 since 1984 ☐ Cost: $1,400

NAVONE ENGINEERING

(division of Navone Electronics, Inc.)

☐ PQS Process Quality Simulator

Evaluates part quality, manufacturing, inspection, production equipment, and inspection equipment. Provides three sampling methods. Displays good and bad parts shipped. Uses Monte Carlo random number simulation. Evaluates any plan from two parts to over 1,000,000 parts.

IBM PC, XT, AT ☐ 48 KB req. ☐ Cost: $135

PATTERN SYSTEMS INTERNATIONAL, INC.

☐ Cabinet Planner

Specialized BOM and cutting list program that calculates part sizes from overall dimension of each cabinet. Designed for customer cabinet and furniture manufacturer. Outputs listing of component parts and cutlist used by cut planner.

IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $2,000-$4,000

☐ CUT PLANNER

For manufacturing firms and fabricators. Minimum cost cutting schedule generator for rectangular parts of glass, wood, metal, sheet or other flat stock. Generates cutting layouts to minimize waste and cutting time. Handles special materials and equipment.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $995-$7,995

PROFITKEY INTERNATIONAL, INC.

☐ Job Shop System

Interactive shop floor control system featuring manpower and machine planning, finite and infinite scheduling and rescheduling. Provides estimating capability, job tracking and costing. Additional modules include Serial Number Control, Customer Management, Purchasing, Financials and Report Writer.

IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 170 since 1982

WYMAN ASSOCIATES, INC.

☐ onTime

Menu-driven production scheduling system. Tracks jobs. Calendar allows holidays and split shifts. Permits choice of 6 expert scheduling methods. Computes budgets, schedules, actual costs, profit earned, time remaining, workload and capacity forecast. Prints 12 reports.

IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1980 ☐ Cost: $495

MANUFACTURING— SHOP FLOOR CONTROL

ADMINISTRATIVE PRODUCTIVITY, INC.

☐ Mini Schedule and Machine Loading System

Job, work center and time tracking. Summarizes entire factory workload in man hours by work center by week for 10 week periods. Values WIP inventory. Production order status displays. Specifies each job's operations, time required and work remaining to be done.

IBM PC, XT, AT

A & M SOFTWARE

☐ JOBASIGN I

Accepts required start and end times for each job and the time to go from job to job. Specifies assignment scheme and sequence of work that requires fewest number of workers or machines.

IBM PC ☐ 64 KB req. ☐ Cost: $250

☐ JOBASIGN II

Handles different skill levels of workers on each machine. Records efficiency of each worker or machine on each job. Specifies assignment scheme that enhances efficiency.

IBM PC ☐ 64 KB req. ☐ Cost: $200

☐ JOBASIGN III

Records the skill of workers or efficiency of machines. Specifies assignment scheme that maximizes througput.

IBM PC ☐ 64 KB req. ☐ Cost: $250

APPLIED DIGITAL COMMUNICATIONS

☐ Shop Mgr.

OE/invoicing, job costing/reporting, perpetual IC, shop order release and shop floor control and estimating/MRP, single-point collection of time sheets, material requisitions and outside vendor invoices, process or operations sheets, multi-level BOM, shop scheduling and PO generation.

IBM PC, AT ☐ 64 KB req. ☐ Copies sold: 20 since 1981 ☐ Cost: $2,000 and up

DATA ACQUISITION SYSTEMS, INC.

☐ T/A Time and Attendance Software

Controls HP307X time and attendance terminals. Data is collected,verified and time stamped by means of a standard attendance transaction. Transactions may be reported and/or transferred to host system via an RS-232C link.

IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $695

DATAMATION, INC.

☐ Production Planning and Job Tracking
Closed-loop MRP system. Reports job cost daily, weekly or monthly by hour, dollars and budget by shop and operation. Provides completed job reports and 8-week production planning report integrated into manufacturing order control. Subsystems integrate with OE and shop floor control.
IBM PC ☐ 128 KB req. ☐ Copies sold: 150 since 1981 ☐ Cost: $14,000

DATAWAY SYSTEMS
(division of A. D. Kahn, Inc.)

☐ TEL/JIT System
Distributes information to suppliers on parts and time schedule needs or requirements. Developed for Chrysler Corporation. Requires Voice Response equipment.
IBM AT

☐ TEL/PRO System
Enables plant employees to send and receive shop floor data via touch-tone telephone. Reports production counts, quality indicators, downtime, manpower requirements and statistical process control. Voice response gives prompts and data confirmation to users.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 12 since 1986 ☐ Cost: $40,000-$60,000

☐ TEL/SPC System
Enables plant employees to send and receive shop floor data via touch-tone telephones. Reports Statistical Process Control indicators and first run data. Voice response gives prompts and data confirmation to users.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $40,000-$60,000

D. C. D. CO.
(division of Borg Enterprises)

☐ Job Shop Control System
Tracks jobs in process, costs jobs and provides shop scheduling. Allows for data entry, editing and correction. Provides audit trails. Integrates with AR, AP, GL, payroll, inventory and PO modules.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1974 ☐ Cost: $6,000-$11,500

DIGIBOARD, INC.

☐ VISTA Series
Shop order scheduling, tracking and costing. Built-to-order and built-to-stock.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 15 since 1981 ☐ Cost: $7,000-$80,000

HAI SOFTWARE, INC.

☐ HAI*LINE Work In Process
Assigns work order number to group of products being manufactured. Automatically interfaces with HAI*LINE Manufacturing's BOM and HAI*LINE Inventory master inventory file. Generates work order numbers from previously evaluated manufacturing requirements. Produces reports.
IBM PC ☐ 128 KB req. ☐ Cost: $395

INFOSOURCE MANAGEMENT, INC.

☐ JMACS-Job Costing
Produces reports for in-process or completed jobs. Analysis profitability and spots inefficient operation in shop.
IBM PC, AT ☐ 512 KB req.

☐ JMACS-Plant Reporting
Places jobs into shop. Economic manufacturing quantities aid in scheduling machines and labor. Provides promised delivery dates to customer by sales staff.
IBM PC, AT ☐ 512 KB req.

JOBTRAK SYSTEMS, INC.

☐ Job Boss
Consists of job estimating, job scheduling, tracking and costing, IC, purchasing and monitoring changing delivery dates and quantities. Integrates with AR, AP, Payroll and GL modules.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $7,000-$11,000

MANAGEMENT REPORTING RESOURCES, INC.

☐ Manufacturing Job Shop System
IBM PC ☐ 64 KB req. ☐ Cost: $395-$795 per module

M & D SYSTEMS, INC.

☐ MYTE MYKE Shop Floor Control
Supports single and multi-user environments. Generates production reporting based on actuals rather than standards. Provides report variances in method and deficiencies (+ or -) in standards. Updates raw and finished inventories. Requires MYTE MYKE IC, Standard Cost and Production Order Processing modules.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $795-$2,295

MICAPP, INC.

☐ Machine Shop Cost Estimating
Comprised of 18 programs tied together with filing routines. Machine specific and covers over 80 specific machine tools. Estimate re-pricing capability. Supports learning curves.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 7 since 1985 ☐ Cost: $600-$1,195

MICROBAR DEVELOPMENT CORP.

☐ ShopScan
Intelligent shop floor data collection. Includes WIP tracking, labor collection, dock-to-stock inventory issues and receipts, time and attendance and quality assurance. Provides bar code utilities including label format generator, import/export utility, installation utilities and inquiry/report writer.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 7 since 1984 ☐ Cost: $6,000-$12,000

MMS INTERNATIONAL

☐ SFC-3 Shop Floor Control/Job Costing
Handles WIP, tracking, job cost and job estimation.
IBM PC ☐ 64 KB req. ☐ Copies sold: 130 since 1984 ☐ Cost: $2,500

NATIONAL NUMERICAL CONTROL APPLICATIONS, INC. (NN/CA)

☐ Job Tracking System
Job OE and parts history of past jobs for machine shops. Lists jobs chronologically with pricing, monthly totals and grand total. Lists part numbers showing number of entries for each part and all previous runs with P&L data. Unloads orders as shipments are made.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 6 since 1985 ☐ Cost: $495

NUMERITRONIX, INC.

☐ DNC/CIM Paperless Factory System
Collects manufacturing management information from operators and via electronic monitoring of processes. Distributes graphics information to work station at machine. Optional conversion to BCL (RS494) input at NC/CNC.
IBM PC ☐ 512 KB req. ☐ Copies sold: 30 since 1982

☐ Exec 2001
Provides machine interface to various NC/CNC, Robots, CMM and shop floor terminals or controllers. Stores machining and process information locally and downloads to manufacturing equipment as needed. Allows sending of information to multiple devices. Stores collected data in host. Provides management reporting.
IBM AT ☐ 512 KB req. ☐ Copies sold: 6,500 since 1980

PALADYNE SOFTWARE PROFESSIONALS, INC.

☐ ELTACAP
Real-time shop floor data collection system. Handles raw material control, factory scheduling, machine monitoring, time and attendance and work scheduling. Supports magnetic and bar code input. Standalone or interfaces with mainframe manufacturing software.
IBM PC ☐ 256 KB req. ☐ Copies sold: 16 since 1978 ☐ Cost: $25,000

POTTERSTOWN ENTERPRISES

☐ Dynamic Job Shop Scheduler
Tracks orders and work center loads. Reschedules orders which have fallen behind schedule. Ascertains that work center loading does not exceed capacity. Maintains proper manufacturing sequences. Issues job tracking report and work center load/week report. Measures productivity of work centers and plant.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2 since 1986 ☐ Cost: $800

☐ Machine Shop Advisor
Handles set-up and handling times, feed rates surface speeds, depths of cut, number of tools, tool materials, job routing and total time. Customized to suit users facilities. What-if feature. Stores generated data for retrieval, editing and reprinting.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2 since 1985 ☐ Cost: $4,000

PPL (PACKAGE PROGRAMS OF LONDON)

☐ WIPPLAN
WIP component of Uniplan. WIP setup and progress, WIP scheduling, rough cut capacity planning, shop floor documentation and master manufacturing file management. Password, access level and marker access security. Multiple company support.
IBM PC

ROUGHNECK SYSTEMS

☐ Job Control
Includes job costing, job scheduling with GL, AP, AR and Payroll.
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1976 ☐ Cost: $1,995

SOLVATION, INC.

☐ Shop Floor Control
Production planning for small manufacturing companies. Tracks each order through operations. Shop load report. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $1,195-$1,995

☐ Work Order Tracking
Provides order cost information. Prints pick lists and work orders. Labor reports. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req.

TM COMPUTER SYSTEMS, INC.

☐ Job Control Plus
Designed for job shop that bids for jobs. Handles POs, work orders, daily labor and report generation. Includes material costs with automatic price breaks, tooling, setup and outside vendor costs. Separate workorders for job sub-parts generated.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 224 since 1984 ☐ Cost: $2,500

VIEHMANN CORP.

☐ Estimating System-Machine Shops
Prepares multiple-lot-size bids for make-to-order shop. Lot sizes, raw material, operation names and machining dimensions. Selects appropriate vendor bid for each lot size. Calculates machine speeds, feeds and cycle times, and costs and prices. Prints quotation.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $1,500 per module

☐ Job Cost Machine Shops
Tracks job material/labor costs and categories of expenses and outside direct costs. Displays/prints exception reports and job results. Records each job shipped. Searches by customer ID, customer PO number, part number, job ID, date, class of part raw material. Generates reports.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $1,500

☐ Shop Floor Control Job Shops
Shop floor scheduling, queue lists, job scheduling, productivity management, machine loading, capacity planning, resource management and performance analysis.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $6,950

WOLF DATA SERVICES, INC.

☐ Job Shop System
Enters orders, with estimated cost, defines workstations and records labor materials used at each workstation, analyzes work in progress by customer and order, calculated value or work loaded against each workstation and against entire shop.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 25

MANUFACTURING—OTHER

ADAPTIVE INTELLIGENCE CORP.

☐ AAMPL (Adaptive Assembly Machine Programming Language)
Programming language for Adaptive Assembly Robotic Machine. Programs gripper arm movement, use of force feedback and optical sensing, exception handling, production statistics/exception data logging, switch from batch-oriented procedure to another, and exception recognition by monitoring how arm travels and patterns encountered.
IBM PC

ADVANCED ANALYTICAL, INC. (AA COMPUTER SYSTEMS)

☐ CharterHouse Manufacturing Inventory/Bill of Materials
Single and multi-user. Multi-company. Schedules finished goods by allocating raw material components and sub-assemblies. Receives inventory. Works in conjunction with CharterHouse Accounts Receivable with Billing.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1979 ☐ Cost: $1,700

ALLSTON GROUP

☐ Defect Analysis System
Records and maintains yield data including defect types. Reports detailed yield percentages by sublot and defect type, defect ranking by part number and historical yield plots by groups of part numbers. Up to 19 user-defined defect types.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $3,000

AMERICAN BUSINESS SYSTEMS, INC.

☐ Manufacturing Management System
IC and PO including BOM, cyclic count and implosion/explosion. Features multi-level password protection. Includes what-if analysis and work-in-progress file. Uses Luhn's check. Used with ABS's business accounting control.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984

APPLICON

(a Schlumberger Co.)

☐ Design and Documentation
Interactive graphics system for creating blueprints and other mechanical and process documentation such as machine tool setup sheets and fixture drawings.
IBM PC

☐ Facility Layout
Integrates facility design with manufacturing. Defines and supports data base framework for facilities, equipment and utilities of manufacturing plant. Increases productivity in plant layout activities at project management and layout engineering levels.
IBM PC

☐ Factory Network
Enhances performance of manufacturing operations by streamlining communications between engineering office and factory floor.
IBM PC

APPLIED MANAGEMENT CORP.

☐ Accounts Payable-Open Item
Open voucher system with capacity for 32,000 vendors. Prepares reports for vendor master list, open vouchers, disbursements register, monthly register of written checks, paid voucher register, GL posting register and cash requirements report. Integrates to IBS 101 GL.
IBM PC ☐ 48 KB req. ☐ Copies sold: 100 since 1979 ☐ Cost: $450

APPLIED MANAGEMENT SCIENCES CORP.

☐ Order Entry, Invoicing and Receivables
Handles daily OE, invoicing, receipts, and warehouse inventory; weekly sales control, custom statements and receivables trial; monthly commission statements, sales by state, and sales by product; and on demand customer status and master file maintenance. OE module requires custom installation.
IBM PC ☐ 256 KB req. ☐ Cost: $40,000

ARGOS, INC.

☐ Sales
Version of ABECAS Financial and Management Accounting Series for distributors/manufacturers/processors. Sales Order Processing, Inventory Management, AR. Sales and inventory track sub-items and serial numbered items. Sales provides back room order taking, billing and counter sales, and updates GL and cost accounting.
IBM PC ☐ 64 KB req. ☐ Copies sold: 12 since 1983 ☐ Cost: $3,000-$5,000

AUTO TELL SERVICES, INC.

☐ Maintenance Management System
Maintenance management and spare parts IC system for industrial plants. Supports single and multiple users.
IBM PC

BELL & HOWELL CO.

Information Services Division

☐ Power+ Data Collection System
Captures and edits manufacturing data. Transfers data to host as source data for daily operations and management reports.
IBM PC, XT, AT ☐ Cost: $29,000

BIK CUSTOM SYSTEMS

☐ PICS (Production Inventory Control System)
Manufacturing IC. BOM, IC of parts, sub-assemblies and finished goods, low stock and on-order information, OE, shipping and parts YTD and monthly usage. Adjusts inventory levels based on goods received and shipped. Handles 1,000-10,000 items, 500 vendors and 500 BOMs.
IBM PC ☐ 64 KB req. ☐ Copies sold: 8 since 1984 ☐ Cost: $495

COMPUTER APPLICATION SPECIALISTS, INC.

☐ Job Costing/Estimating
Allows labor, material and outside vendor entry. User can specify markups for various product lines through different burden and overhead rates. Hnadles custom and semi-custom products. Interfaces OE and IC.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 20 since 1981 ☐ Cost: $1,000

COMPUTER COVENANT CORP.

☐ Materials Inventory/Purchasing
IC system for raw materials and components including PO writing.
IBM PC ☐ 30 KB req. ☐ Copies sold: 11 since 1979 ☐ Cost: $2,500

☐ Tool Accounting Inventory
Maintains, reserves, requisitions, receives, transfers, adjusts, issues, returns and disposes of manufacturing tools in multiple tool cribs. Reports supply, usage, activity, condition, and location of tools used in manufacturing process. Charges tool costs to using work center.
IBM PC ☐ 30 KB req. ☐ Copies sold: 4 since 1985 ☐ Cost: $1,000-$2,500

CORPORATE CONSULTING CO.

☐ Manufacturer's Job Cost/Inventory Control
Features last cost paid or average cost and records job number/description when drawing items from inventory. Prints inventory by item number, location and bin number or product grouping. Inventory valuation report. Month-end summary.
IBM PC ☐ 256 KB req. ☐ Copies sold: 20 since 1978 ☐ Cost: $1,375

D. C. D. CO.

(division of Borg Enterprises)

☐ Inventory Control System/Bill of Materials
Keeps item balances current through entry of inventory transactions such as issues, sales, receipts and adjustments. Produces reports and tracks material orders and requirements. Used with job costing and BOM.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 300 since 1981 ☐ Cost: $1,500-$3,000

D & S SYSTEMS, INC.

☐ IMAG (Manufacturing Job Shop)
Provides payroll with labor production, union and government reporting, purchasing, AP and GL. Generates financial statements, job cost, equipment cost, estimating, and subcontractors reporting. Tracks fixed assets, AR, IC, OE, invoicing, labels and check reconcilation.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 700 since 1978 ☐ Cost: $5,250-$16,500

HELMSMAN SYSTEMS, INC.

☐ H-STORE
Inventory management with audit trail to data base transaction source document and operator. Creates/tracks back orders. Provides available inventory and WP transaction interface to accounting. LAN compatible.
IBM PC ☐ 512 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $2,495

INDUSTRIAL ENGINEERING SERVICES

☐ MODAPTS Plus
Handles manufacturing, clerical and warehousing.
IBM PC

INDUSTRY SOFTWARE SALES, INC.

☐ Manufacturing Control System
Job costing and IC. Maintains historical costs per item and figures sales quotes. Updates POs. User sets price code levels. Prints quantity discount breaks, BOM and year end tag count.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1 since 1984 ☐ Cost: $11,500

INFOSOURCE MANAGEMENT, INC.

☐ JMACS-Customer Order Processing
Interfaces customer orders and shipments to finished goods section of MRP. Supports open order/ship-to files. Provides daily billing data for invoicing and subsequent processing in AR system.
IBM PC, AT ☐ 512 KB req.

☐ JMACS-Purchasing
Maintains purchasing records. Provides on-order of raw materials for MRP.
IBM PC, AT ☐ 512 KB req.

INSTITUTE OF INDUSTRIAL ENGINEERS

☐ Operations Research
Features linear programming, maximum flow analysis, and inventory and queuing models.
IBM PC, XT ☐ 48 KB req. ☐ Copies sold: 600 since 1984 ☐ Cost: $140-$175

INTERNATIONAL MICRO SYSTEMS, INC.

☐ Manufacturing Inventory Control System
Provides finished-goods and parts inventory, BOM, production scheduling. Creates work orders. Produces reports of parts required to meet current or anticipated production. Prints POs for parts. Calculates production costs and time of work order completion. Prints production cost variance report.
IBM PC, AT, XT ☐ 128 KB req. ☐ Copies sold: 623 since 1981 ☐ Cost: $1,500

KASONS COMPUTER SYSTEMS, INC.

☐ Labor Cost Tracker
Produces job cost reports, tracks productivity of each employee and produces wage and tax data for weekly pay checks and federal withholding forms. Historical job cost details are available for bidding new jobs. Designed for manufacturing companies with up to 100 employees, and up to 50 active jobs or projects.
IBM PC ☐ 64 KB req. ☐ Copies sold: 20 since 1982 ☐ Cost: $1,995

LEAST COST FORMULATIONS, LTD.

☐ Least Cost Formulator
Linear programming system. Determines least-cost formulation of materials. Permits products to be made from raw materials or pre-blends. Provides what-if capability to study effects/costs of product.
IBM PC ☐ 56 KB req. ☐ Copies sold: 120 since 1975 ☐ Cost: $12,000-$25,000

☐ Quality Control Manager
Handles filing, cross-indexing, statistical calculations and reports on vendor analysis/comparisons, process control, people productivity, and return-on-investment and reduces reaction time. Accumulates data by lot samples. Generates history tables, trend charts and control graphs.
IBM PC ☐ 256 KB req. ☐ Copies sold: 8 since 1983 ☐ Cost: $4,000-$6,000

MICRO-MRP, INC.

☐ Just-in-Time
Schedules parts and plans labor resources on products planned for shipment. Modular component of Micro-MRP's MAX.
IBM PC ☐ Cost: $4,000

MINI-MICRO BUSINESS SYSTEMS

☐ Manufacturing
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 1,986 since 1978 ☐ Cost: $1,495

MMS INTERNATIONAL

☐ MCS-3 Financial Resource Planning
Modular component of MCS-3 integrated manufacturing system. Forecasts, budgets and controls cash flow. Designed for small to medium manufacturers.
IBM PC ☐ 64 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $950

☐ Syman Financials
Manufacturing accounting system designed to stand alone or integrate with Syman Job Shop manufacturing control system. AR, AP, GL and Payroll.
IBM PC ☐ 640 KB req. ☐ Introduced: 1986

MOORE PRODUCTIVITY SOFTWARE

☐ BLOCPLAN (Block Layout Overview with Computerized Planning with Logic and Algorithms: New Issue)
Develops and displays graphically block plan layouts for factory or office. User must input area requirements and relationship chart defining relationships between all pairs of departments.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4 since 1985 ☐ Cost: $895-$1,695

☐ SLPCALC (Systematic Layout Planning CALCulator)
Eleven templates predict space needs, prepare from-to charts, determine layout installation costs, space requirements, payout period of layouts, and layout alternatives and materials handling alternatives for factories/offices/warehouses. Used with VisiCalc or Lotus 1-2-3.
IBM PC ☐ 64 KB req. ☐ Copies sold: 90 since 1983 ☐ Cost: $250

MTM ASSOCIATION FOR STANDARDS AND RESEARCH

☐ ADAM
Universal predetermined time system applicable to all manual work. Creates and maintains labor standards and data. Incorporates MTM-2, MTM-UAS, MTM-V, MTM-C and MTM-MEK. Accepts data from other sources.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 100 since 1981 ☐ Cost: $18,000

☐ 4M Data-MOD II
Universal predetermined time system applicable to all manual work. Creates and maintains labor standards. Applies MTM-1 while incorporating MTM-UAS, MTM-MEK, MTM-V, MTM-C or data from other sources.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1978 ☐ Cost: $36,000-$39,000

NAMCO, INC.

☐ Unidex
Group technology system designed to code and classify component products and parts so they can be organized, retrieved and reported by such characteristics as purpose, shape, size and material.
IBM PC, XT, AT ☐ 32 KB req. ☐ Copies sold: 12 since 1975 ☐ Cost: $15,000

NORTH AMERICAN TECHNOLOGY EDP, INC.

☐ SLIM (Service & Light Manufacturing Information System)
Handles operation of project oriented service or light manufacturing business. Includes estimating, invoicing, job costing, profit analysis and sales analysis.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 30 since 1984 ☐ Cost: $3,495

NORTHWEST ANALYTICAL, INC.

☐ Quality Analyst
Statistical quality control charting and statistical analysis for manufacturers. Process investigation and control. Includes data manipulation, cumulative sum analysis and charting.
IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $495

POLYMATHIC COMPUTER CORP.

☐ Furniture Manufacturers
IBM PC

PPL (PACKAGE PROGRAMS OF LONDON)

☐ Jobplan
Job Costing Component of Uniplan. Job setup and estimating, job scheduling, job progressing, job costing and master manufacturing file management. Password, access level and marker access security. Multiple company support. Record level locking.
IBM PC

☐ Ledgerplan
GL component of Uniplan. Nominal, sales and purchase ledgers and invoicing. Password, access level and marker access security. Multiple company processing. Record level locking. Narrative, posting or total account types. VAT codes/descriptions. Inter-ledger journals. Net VAT reports.
IBM PC

☐ Payplan
Payroll component of Uniplan. Prepared standard, SSP (Statutory Sick Pay) and PIW (Periods of Incapacity of Work) payroll. Prints payslips, coinage analysis, credit transfers and checks. Multiple company support. Password, access level and marker access security.
IBM PC

SELKIRK ASSOCIATES

☐ Correspondent-Manufacturing
DBMS, word processing, calendaring. Tracks customer/distributor service activity over time. Schedules followups. Corresponds to target groups. Produces tickler reports for service reps.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $1,500

SOFTWARE DESIGN SYSTEMS, INC.

☐ Manufacturing Inventory Control
Provides inventory valuation report, POs, on-order report, vendor master list, BOMs, where-used list and material requirements planning report. Reports on overstocked items based on sales history and reorder items. EOM sales and gross margin dollar reporting.
IBM PC ☐ 64 KB req. ☐ Copies sold: 3 since 1983 ☐ Cost: $6,500

SOFTWARE TECHNOLOGY

☐ Gage & Master, Calibration/Control
Gage recall for calibration, inspection history and GM or Ford capability studies.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $675

SOLVATION, INC.

☐ Accounts Payable
Ages/schedules payables. Check writing and bank reconciliation. Produces cash requirements reports. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req.

☐ Accounts Receivable
Statements, aging and overdue reports. Mailing labels. Calculates finance charge. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req.

☐ General Ledger
This year, last year and budget comparisons. User-defined reports. Interfaces with AR, AP and Payroll.
IBM PC ☐ 128 KB req.

☐ Inventory
Single- or multi-user inventory for small manufacturers. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req. ☐ Copies sold: 12 since 1983 ☐ Cost: $995-$1,650

☐ Order Processing
Order processing for small manufacturers. Integrates with other Solvation modules. Single- or multi-user.
IBM PC ☐ 128 KB req. ☐ Copies sold: 8 since 1984 ☐ Cost: $1,495-$2,495

☐ Payroll
Departmental reporting. Federal, state and local tax reporting. Check printing and bank reconciliation. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req.

☐ Sales Analysis
Sales analysis by customer, item, representative and region. Integrates with other Solvation modules.
IBM PC ☐ 128 KB req.

STOLZBERG RESEARCH, INC.

☐ Accumark
Handles BOM, inventory allocation/depletion, MRP, incoming stock and audit trail for each part movement. Chemical/formulations version available for lot and batch inventory.
IBM PC ☐ Cost: $2,995

STRAIGHTFORWARD

☐ MSDfont
Font processing system for printer manufacturers.
IBM PC ☐ Introduced: 1985

SUPERIOR MACHINERY CO.

☐ INV
BOM, IC, cost control, AR, OE. Generates PO, invoices, stock requisitions, work orders and reports. Rolls up current costs from actual cost data and time reports.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1 since 1983

SYSTEMS MODELING CORP.

☐ Siman
General-purpose, simulation language for modeling combined discrete and continuous manufacturing systems. Draws inferences from proposed systems without building. I/O in graphics mode. Performs statistical analysis on output.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 900 since 1983 ☐ Cost: $1,500 (micro)

TECHNOLOGY RESEARCH CORP.

☐ ROBOTJUSTIFICATION
Analytical spreadsheets for economic justification analysis of industrial robots. Worksheets evaluate applicable tax and depreciation benefits under new federal tax laws. Calculates investment returns and payback period based on user-supplied data.
IBM PC ☐ 64 KB req. ☐ Copies sold: 926 since 1983 ☐ Cost: $100

TWIN OAKS, INC.

☐ mrp2- Inventory
IC module provides stock status, reorder and transaction reporting. Secondary Location module supports unlimited secondary sites. Pick List module generates material picking list. Cycle Counting module calculates stock room accuracy. Historical Usage module reports monthly, YTD and annual usage.
IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $1,600-$3,750

UNIK ASSOCIATES

☐ Manufacturing Inventory Control Program
Maintains tool cribs, stock-room and warehouse. Stores and receives 30,000 parts with 3 vendors per part. Provides reorder point, on-hand and maximum inventory, lead time, cost, parts usage, charge account history, and out of stock.
IBM PC ☐ 512 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $1,995

MECHANICAL ENGINEERING

AAA TECHNOLOGY & SPECIALTIES CO., INC.

☐ Pipenet
Fluid flow analyses of piping networks. Calculates flow rates, velocities, pressure and pressure drops. Handles compressible and incompressible fluids. Incorporates any type flow resistance or equipment gain or loss. Fire protection system analysis and reporting follow National Fire Protection Association regulations.
IBM PC ☐ 500 KB req. ☐ Copies sold: 8 since 1980

☐ Tri*Flange
Analysis and design of all flanges in Figure UA-48, Section VIII, Div. 1. Handles internal/external pressure, test pressure and external forces and moments. Analyze or design welding neck, slip-on, lap-joint, plate, blind and split flanges.
IBM PC, XT, AT ☐ 500 KB req. ☐ Copies sold: 9 since 1976

☐ Tri*Flex
3D piping system analysis and design considers effects of temperature, pressure, weight and seismic loadings. Features free format keyword input, automatic spring hanger design and nonlinear (one-dimensional limit stops) restraint actions. Provides compliance reports.
IBM PC, XT, AT ☐ 1,024 KB req. ☐ Copies sold: 40 since 1972

☐ Tri*Vessel
Designs and analyzes unfired pressure vessels, nozzles and flanges following ASME Sec. VIII, Div. 1. Five sub-programs, horizontal, horizontal with zick analysis, vertical vessel, reinforcing pad design for horizontal vessels, and reinforcing pad design for vertical vessels. Internal materials library.
IBM PC, XT, AT ☐ 500 KB req. ☐ Copies sold: 15 since 1976

☐ Werco
Calculates local stresses due to external loadings in vessel shells at clip and nozzle connections. Determines single or combined stresses in spherical and cylindrical vessels. Applies Welding Research Council (WRC) bulletin number 107. Contains dimensionless curves and handles connections within its parameters.
IBM PC, XT, AT ☐ 500 KB req. ☐ Copies sold: 11 since 1975

APPLIED COMPUTER SERVICES, INC.

☐ MTM-1 (Methods Time Measurement)
Productivity tool for use by industrial engineers in developing and maintaining labor standards. Creates and maintains standards or motion pattern studies. Includes user ID and password protection, automatic activity log and backup and restore support.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 12 since 1984 ☐ Cost: $3,500

☐ SWP (Standard Working Procedure)
Productivity tool for use by industrial engineers in developing and maintaining labor standards by referencing data base of standard data. Prompts for compulsory inputs relating to study code, PF&D allowance and costing base.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 16 since 1984 ☐ Cost: $1,899

AUTO-TROL TECHNOLOGY CORP.

☐ Series 7000 Advanced Graphics Software for Mechanical Design and Manufacturing
Geometric modeling system develops 2D and 3D product models. Conducts design studies, generates documentation and prepares NC programs. Provides CAD/CAM capabilities. Can interface with third party software for analyses such as solids modeling and finite element modeling and analysis.
IBM PC, AT ☐ 1,000 KB req. ☐ Copies sold: 500 since 1981

BANTA SOFTWARE

☐ Mechanical Engineering Pot Pouri
Kinematic and kinetic analysis of Four bar and slider crank mechanisms. Beam design including deflection for statically determinant cases in structures and machine design.
IBM PC ☐ 64 KB req. ☐ Cost: $50

CAETEC SYSTEMS, INC.

☐ PROfessional Engineering Series
Consists of Pro-Solid for 3-D solids modeling, Pro-Fem for 3-D finite element modeling, Pro-Link for 3-D finite element analysis linking, Pro-Fea for 3-D finite element analysis, Pro-Draft for 2-D drafting and Pro-Hook a link between Pro-Solid and other drafting systems including VersaCad, AutoCad and Anvil 1000.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $8,000-$19,250

CATRONIX CORP.

☐ CatSoft
CAE system for mechanical design. CatSolid provides CSG-based solids modeler with Boolean operations and B-rep capability. CatFem acts as 2D/3D Finite Element Modeler. CatFace interfaces to FEA. IGES interfaces to CAD/CAM systems.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 8 since 1982 ☐ Cost: $20,000

COMPUTER SOFTWARE TECHNOLOGY

☐ Axisymmetric Multiple Layer Orthotropic Shells
Analysis of axisymmetric shells made of composites or bidirectional material properties. Isotropic and up to three layer sandwich structure analyzed under linear, pressure and temperature loads.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $290

☐ Axisymmetric Thin Shells with Symmetric Loadings
Analyzes isotropic shells under axisymmetric loads. Analyzes cylindrical, conical or any vessel described by conical sections.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $88

☐ General Disk Design
Designs disk to satisfy stress constraints, given material and acceptable stress distribution.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $180

☐ Low Cycle Fatigue by Universal Slopes
Calculates number of low cycle fatigue cycles to failure given high-low stress and loading history.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $190

☐ Rotating Beam/Disks Vibration
Turbomachinery applications. Obtains natural frequencies of shafts with disks.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $160

☐ Secondary Creep
Computes strain time history of elements in sections for prismatic structures using Larson Miller parameters.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $155

☐ Symmetric Disk Design
Given thin disk with midplane symmetry, under speed, loads and temperatures, program computes stresses and displacements.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $160

☐ Torsional Dynamics
Subjects 20 torsional stations to torsional inputs. Computes natural frequencies and dynamic responses. Useful for gearbox analysis.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $255

☐ 2-D Plane Thermal Stresses
Analyzes 2D structures with temperature maps.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $265

CTS ENGINEERING, INC.

☐ Automatic Pipe Sizing
Performs pressure drop calculations. Stores pipe schedule data. Calculates density and viscosity of 10 liquids/gases by temperature. Allows any pipe diameter or fluid properties to be used in calculations. Calculates total line loss. Performs hydraulic calculations on segmental basis.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 30 since 1984 ☐ Cost: $395

☐ Belt Conveyor Design
Performs design calculations for bulk material belt conveyors. Calculations include belt tensions, motor horsepower, starting torque, minimum radii for vertical curves, counterweight requirements, backstop requirement, acceleration and deceleration. Handles up to 10 straight sections with lengths to 3,000 feet.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $1,250

☐ Belt Sizing
Selects belt width when tons per hour and type of material being conveyed is known. User inputs trough angle, surcharge angle, material density, maximum belt speed and tons per hour. Calculates new speed required to convey selected tons per hour if selected belt is overridden and new belt selected.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 28 since 1983 ☐ Cost: $160

☐ Combustion Plus
Performs combustion calculations on weight or volumetric basis. Determines boiler efficiency using ASME method. Performs forced draft and induced draft fan calculations.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $350

☐ **MOD-ES1 (Modular Energy Simulator)**
Simulates industrial steam/electrical generation plants. Allows tracking of pump, fan and process steam demands with boiler production or other parameters. Performs summer/winter energy studies, equipment addition evaluations, plant efficiency studies and analyzes operational changes. Results available as numeric printout or graphic flowsheet.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $1,995

☐ **Shaft Design**
Companion to Belt Conveyor Design. Sizes shafts needed in conveyor design. Determines minimum diameter for shafts loaded transversely and/or torsionally. For any shaft that is solid, circular, constant diameter cross-sectioned; supported at only 2 points; or where transverse load is composed of 2 vector components.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $300

MARCEL DEKKER, INC.

☐ **Spring Design with and IBM PC**
Designs helical, compression, extension and torsion springs. Furnishes hard copy of design specifications and parameters, stores information and designs on diskette. Includes tables, equations and line drawings.
IBM PC ☐ Cost: $85

DESMAC CORP.

☐ **Spring Editor**
Designs springs. Includes helical compression and extension design for round wire, compression for rectangular wire, nested spring system, helical torsion, leaf, symmetric and cantilever, cone disk, material properties file, spring identification and spiral.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $200

DYNACOMP, INC.

☐ **Analysis of Plane Grids**
Analyzes plane grid structures. Calculates out-of-plane displacements and x and y axis rotations at joints, shear forces, torsion moments, bending moments, and section top and bottom stresses at member ends. Analyzes support settlement case.
IBM PC ☐ 48 KB req. ☐ Cost: $50-$120

☐ **Analysis of Plane Trusses**
Analyzes determinate and indeterminate plane truss structures. Calculates horizontal and vertical displacements at joints, and axial forces and stresses in members. Analyzes support settlement case.
IBM PC ☐ 48 KB req. ☐ Cost: $50-$120

☐ **Mechanical Engineering 1**
Collection of programs designed for use with Calfex. Contains selections on applied math, stress and strain, fluid flow and dynamics.
IBM PC, PCjr ☐ 48 KB req. ☐ Cost: $200

ELITE SOFTWARE DEVELOPMENT, INC.

☐ **Commercial Building Energy Analysis Program**
Calculates 24-hour loads four days per month per year for project with 1,000 zones and 100 air systems. Outputs monthly heating/cooling loads, costs and economic analysis evaluating, initial and annual costs. Simulates central plants and air handler systems.
IBM PC ☐ 56 KB req. ☐ Copies sold: 950 since 1982 ☐ Cost: $695

☐ **Commercial Heating and Cooling Loads Program**
Uses 1985 ASHRAE Handbook of Fundamentals tables and procedures. Over 1,000 zones entered and grouped under 100 air systems. Each zone, system and building individually peaked. Building rotation, exterior shading, psychrometrics, internal operating profiles, reheat and sub-cooling, and pretreated air.
IBM PC ☐ 56 KB req. ☐ Copies sold: 1,575 since 1980 ☐ Cost: $595

☐ **Duct Sizing**
Calculates optimal round and rectangular duct sizes using either static region, equal friction, or constant velocity method. Reports include matter input data, trunk output data, runout output data, sheet metal and duct fitting BOMs with costs, and duct system summary.
IBM PC ☐ 56 KB req. ☐ Copies sold: 895 since 1983 ☐ Cost: $395

☐ **Fire Sprinkler Design**
Performs hydraulic calculations in accordance with NFPA 13 standards. Allows trees, grids and hybrid systems with up to 200 pipe sections. Allows all types of pipe materials and fittings. Produces manually verifiable reports concerning flow rates, hydraulic pressures, water velocity and friction losses.
IBM PC ☐ 56 KB req. ☐ Copies sold: 525 since 1984 ☐ Cost: $695

☐ **Residential Heating and Cooling Loads Program**
Uses table values and procedures from 1985 ASHRAE Handbook of Fundamentals. Handles over 1,000 zones grouped under 100 air systems. Peak loads and air quantities calculated for each zone, system and residence. Building rotation, exterior shading, psychrometrics and manual J requirements.
IBM PC ☐ 56 KB req. ☐ Copies sold: 850 since 1983 ☐ Cost: $295

☐ **Static Regain Duct Sizing Program**
Calculates optimal round and rectangular duct sizes. Uses static regain method with Colebrook's friction equation for sizing. Input allowed for ducts with up to 150 trunks and runouts. Outputs optimal trunk and runout sizes with BOM.
IBM PC ☐ 56 KB req. ☐ Copies sold: 975 since 1982 ☐ Cost: $395

☐ **U-Factor Calculations**
Generates u-factors for roof and wall sections. References file containing r-values for over 200 different types building materials. Scrolls r-values through on-screen windows. Displays resulting u-factor as material types are selected. Allows all types of air film and air space resistances.
IBM PC ☐ 56 KB req. ☐ Copies sold: 725 since 1983 ☐ Cost: $99

ENGINEERING SOFTWARE CO.
(division of Infotech Management, Inc.)

☐ **CAM**
Determines profile of disk cam. Motion types include harmonic, cycloidal and eighth-order polynomials. Roller types include offset translating flat-face, offset translating roller, oscillating flat-face and oscillating roller. Generates polar and cartesian coordinates of CAM profile and cutter positions.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $275

☐ **Compress**
Design of helical compression and tension springs. Incorporates material properties for 5 common spring steel alloys. Outputs number of coils, spring rate, solid height, wire diameter and factor of safety. Handles static and fatigue loading.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $395

☐ **Compression Springs**
Designs or validates compression and extension springs. Includes graphics of spring design and library of 14 common spring materials. Calculates wire diameter, number coils, mean diameter, spring rate, critical tension, working stress, fatigue life, weight, critical frequency, stress in hooks and solid height.
IBM PC, AT ☐ 128 KB req. ☐ Cost: $595

☐ **Control Systems**
Controls systems software. Determines model and transfer function forms of linear, constant coefficient, ordinary differential system. Tabulates and plots frequency response calculations for linear and decibel vs. log frequency. Determines necessary pole gains for single output.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $750

☐ **Equation Solver**
Memory resident pop-up solver with 114 pre-programmed functions. User programmable. Inputs results directly to screen. Includes graphics of calculator.
IBM PC, AT ☐ 70 KB req.

☐ **FREQRESP**
Tabulates and plots frequency response calculations for linear and decibel vs. log frequency.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $250

☐ **Gear Design**
Helical and spur gear. Calculates bending and surface stresses for tip or highest point of single tooth contact loading including nonstandard involute tooth forms.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $595

☐ **Geometric Properties**
Calculates property area, composite rectangular cross sectional area property, cross sectional area property, thin walled property and volumetric property.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $295

☐ **Laminate**
Uses physical properties and orientation of each individual layer of filamentary composite plate to determine elastic behavior of composite. Calculates stresses, strains and margins of safety for each ply. Considers 100 layers of 50 materials.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $250

☐ **Mechanisms**
Analyzes planar mechanisms with revolute and slider joints. Considers kinematic and dynamic forces, output positions, velocity, acceleration and force data at each link. Provides graphical animation of mechanism.
IBM PC, AT ☐ 128 KB req. ☐ Cost: $595

☐ **Power Transmission**
Provides modules for spring determinations, belt and pulley analysis and design, stresses and deflections in determinate or indeterminate shafts, calculations for helical and spur gear and disk cam profiling.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 75 since 1983 ☐ Cost: $995

☐ **Properties of Thin Wall Sections**
Calculates properties of thin walled sections for open and closed multi-cell geometrics. Considers up to 5 different materials with up to 30 nodes and 30 segments.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $495

☐ **Shaft Design**
Calculates deflection and stress response of 3D loaded shafts to bending, torsional and axial loadings or specified support displacements. Uses Finite Element/Matrix Analysis methods.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 75 since 1984 ☐ Cost: $495

☐ **Spring Design**
Designs, draws and documents compression, extension and torsion springs. Validates spring specifications. Provides library of 14 common spring materials. Calculates working stress, fatigue life, weight, critical frequency, stress in hooks, spring rate, solid height, wire diameter, number of coils mean diameter and factors of safety.
IBM PC, AT ☐ 256 KB req.

☐ **StressPAC**
Calculates stresses, deflections and factors of safety in structural and mechanical elements.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $295

☐ **Torsion Springs**
Designs helical/spiral torsion springs. Screen graphics include spring cross section and dimensions. Calculates wire diameters, weight and performs fatigue analysis. Includes standard values of wire diameter for circular sections. Designs springs with rectangular and square sections.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $395

☐ **VBELT**
Belt and pulley analysis and design. Calculates belt type, number, length and pulley dimensions given input speed, horsepower, service and velocity ratio design requirements.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $295

☐ **Vibrapac**
Calculates undamped natural frequencies and mode shapes for beams, springs and plates. Hi-res graphics. Approximations of modal parameters. Uses closed form linear elastic solution methods and Raleigh's Method. Full screen editor and data entry calculator.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $495

ENGINEERING TECHNOLOGIES, P.A

☐ **Geardesigner**
Three volume series. Designs spur, helical and bevel gears or replacements. Minimum sizing of new gears, optimization of replacement gears or allowable loading. What-if comparisons using eight tooth forms and any bronze, steel or cast iron materials.
IBM PC ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $200 per volume; $550 per set

ENTEK SCIENTIFIC CORP.

☐ **EMODAL**
Used to measure the dynamic behavior of mechanical structures by measuring natural frequency, dumping and displaying animated mode shapes.
IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $3,950

☐ **EMONITOR**
Performs automated monitoring of machinery vibrations. Provides alarm indication, trending, plotting and DBMS.
IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $6,000-$10,000

☐ **ESHAPE**
Measures operating deflection shapes of rotating machinery and displays the animated shape on the CRT.
IBM PC, XT ☐ 640 KB req. ☐ Cost: $3,500

☐ **Minimonitor**
Checks machine's overall vibration levels or other process parameters against pre-established alarm levels and reports its operational condition. Downloads route information to data collector and uploads data. Reports exceptions, trend data and spectrum plots.
IBM PC, XT, AT, 3270-PC ☐ 640 KB req. ☐ Cost: $6,000

ERIS ENGINEERING ASSOCIATES

☐ **Crossflo**
Selects and designs cross flow turbines. Calculates basic parameters using design head and flow as input.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $200

ESDU INTERNATIONAL, INC.

(subsidiary of International Thomson Organization)

☐ **Aerodynamic Center - Wing/Fuselage Combinations**
Obtains position of aerodynamic center of conventional aircraft wing/fuselage combination. Computes dimensional data for wing and fuselage. Develops scale dimensioned sketch of aircraft. Color graphics capability.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Analysis of Forced-Damped Vibrating System**
Examines simple spring-mass-damper system vibrating in one plane. Vibrates in translation, in rotation or by swinging. Handles viscous, Coulomb or zero damping. Results in graphical and tabular form.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Analysis of Pressure Fluctuations in Turbulent Boundary Layers**
Obtains noise levels generated in attached turbulent boundary layer on cylindrical or conical parts of flight vehicle. Provides altitude and Mach number, temperature difference from ISA and distance behind leading-edge.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Design of Parallel-Axis Spur and Helical Gears**
Designs gears to meet required conditions. Compares performance of different designs. Input includes power transmitted, pinion speed, operating temperature, required life, material and its surface hardness method of manufacturing gear ratio, gear geometry, and center power loss, and operating torque.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Elastohydrodynamic Film Thickness**
Chooses values for two out of temperature, film thickness and lubricant properties in contact zone of rolling element radial or thrust bearing, or of parallel axes gears, and obtains value for third.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Hydrodynamic Journal Bearing Design**
Designs and studies performance of steadily-loaded pressure-fed hydrodynamic journal bearing. Outputs lubricant temperature, bearing eccentricity and film thickness, attitude angle, oil flow rate and power loss. Provides library of lubricants and of bearing materials.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Hydrodynamic Thrust Bearing Design**
Designs and studies performance of steadily-loaded fluid film thrust bearing. Covers bearings with fixed inclined thrust pads or tilting pads. Computes lubricant temperature, film thickness, power loss and operating torque. Explores effects of varying load and speed.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Low Speed Lift and Drag-Staggered Surfaces**
Obtains total drag of pair of lifting surfaces and lift break-down between them, and investigates effect of geometry variation and change in relative disposition of surfaces.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Rolling Element Bearing Selection**
Selects appropriate rolling element bearings for arrangement of 2 or more bearings or checks whether existing bearings arrangement is satisfactory. Considers single row radial ball, angular contact and cylindrical roller bearings. Contains data base of over 350 designs of ISO metric bearings.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Rotor Dynamics - Geared Systems**
Obtains frequencies and mode shapes of lower torsional modes of vibration of geared system. Computes geometry and properties of shaft and components attached to it.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Rotor Dynamics - Hydrodynamics Journals**
Obtains frequencies and mode shapes of lower lateral and torsional modes of vibration of shaft running in hydrodynamic journal bearings. Computes geometry and properties of shaft, components attached to it, and bearings.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Rotor Dynamics - Rolling Bearings**
Obtains frequencies and mode shapes of lower lateral and torsional modes of vibration of shaft running in rolling element bearings. Computes geometry and properties of shaft, components attached to it, and bearings.
IBM PC, XT, AT ☐ 128 KB req.

EXERGETIC SYSTEMS, INC.

☐ **Ex-Air**
Calculates thermodynamic properties for moist air. Provides range for dry bulb temperatures, wet bulb temperatures and total pressures. Includes interactive and callable routines program types. Performs property, 2-sided heat transfer, turbine efficiency and fan efficiency calculations.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $350

☐ **Ex-Flow**
Calculates mass flow rates through nozzles, venturi, orifices and pilot tubes. Compiles with ASME fluid meters and performance test codes. Provides internal access to fluid property data. Includes water, combustion gases and psychrometrics properties. Prints reports. Supports color.
IBM PC, XT, AT ☐ 460 KB req. ☐ Introduced: 1986 ☐ Cost: $620

☐ **Ex-Foss**
Analyzes fossil-fired boilers. Shows how controllable parameters offset boiler efficiency in dollars/hours gain or loss. Optimizes boiler's performance against constraints of operational and mechanical limitations.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $3,100

☐ **Ex-Gas**
Calculates gas properties for temperatures ranging from cryogenic to 2,200 degrees F. Provides 2 types of programs including interactive and callable routines. Calculates 2-sided heat transfer, turbine efficiency and fan efficiency. Provides water/steam and dry air properties. Supports color.
IBM PC, XT AT ☐ 320 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $200

☐ **Ex-Prop**
Calculates water/stream properties. Includes subcooled, saturation, super-heated and supercritical regions. Performs energy balances with cell-driven formats like spreadsheet programs. Supports color.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $300

☐ **Hyprop**
Collection of programs describing various hydraulic properties. User can link modules to applications. Divides hydraulic parameters in sublibrary into 2 groups, programs calculating true transparent properties and programs yielding parameters more directly involved in hydraulic analysis. Supports color.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $620

FLOWNET

☐ **FLOWVIEW**
Scaled displays of network on monitor with emphasis on system pressures, flow velocities and losses per unit length and/or contour pressure lines. Prints results. Works in conjunction with two FLOWNET distribution network analysis programs.
IBM PC, XT, AT ☐ Cost: $550

☐ **KYGAS**
Calculates flow and pressure conditions in complex gas distribution networks with components including compressors, pressure regulators, check valves and minor losses. Accounts for different tempatures in lines. Graphics capability for network layout and layout presentation.
IBM PC ☐ 256 KB req. ☐ Copies sold· 10 since 1985 ☐ Cost: $950

☐ **STEAMNET**
Determines steady state flow and pressure conditions in steam distribution network. Accounts for superheat in specified lines. Components included are multiple supplies, pressure regulators, check valves and fitting. Graphics capability to display network layout and highlight results.
IBM PC ☐ 256 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $950

E. JESSUP, MECHANICAL ENGINEERS

☐ **FCHART 1-2-3**
Calculates solar heating system performance, annual fraction of heating load supplied; beam, diffuse, and ground-reflected radiation; space and water heating loads and monthly fraction by solar. Input meteorological data for location, space heating load, temperature and collector data.
IBM PC ☐ 256 KB req. ☐ Copies sold: 10 since 1983 ☐ Cost: $60

☐ **HVAC 1-2-3**
Calculates duct and pipe sizes and sound. Calculates pressure drop in each section based on flow, duct attenuation, bend attenuation, branching losses, end reflection effect, room absorption effect and resultant sound pressure level in room.
IBM PC ☐ 256 KB req. ☐ Copies sold: 248 since 1983 ☐ Cost: $100

☐ **Load 123**
Calculates 24-hour building heating and cooling loads. Heating loads calculated for transmission losses and infiltration; cooling loads for condition, solar, internal loads, and infiltration. Library of roof and wall types; operation schedules; graphs. Handles 250 zones per run.
IBM PC ☐ 512 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $120

JP AXE ID

☐ MKAD (Machinery Kinematics and Dynamics)
Kinematic and dynamic analysis of planar machinery. Models mechanical systems in motion and calculates position, velocity and acceleration of moving parts. Calculates forces and torques acting on/within system.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3 since 1986 ☐ Cost: $1,250

SAMUEL J. LEVY ENGINEERING

☐ Tolculator (Tolerance Calculator)
Mechanical design and geometric tolerance analysis. Includes sampling and analysis, limits and fits, positional tolerance, gauge formulas, tolerance circuit and probability analysis, coordinate machine output inspection analysis, mathematics, trigonometry and quadratics.
IBM PC, XT, PCjr ☐ 512 KB req. ☐ Copies sold: 50 since 1986 ☐ Cost: $125-$150

NATIONAL PLANNING & CONSULTING CORP.

☐ HYDRASEL
Solution of fluid handling system component problems. Handles centrifugal and rotary pumping units. Examines suction and discharge piping systems. Determines control valve sizing coefficient for liquid, gas and vapor services involving normal or choked flow, laminar or transitional. Utilizes ANSI/ISA standards for value sizing.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $395

☐ SELECTRA
Mechanical power transmission component selection system. Determines shaft diameters using accurate selection and close approximation. Determines systems of standard ANSI roller chain drive components. Selects components for heavy-duty conventional V-belt and heavy-duty narrow V-belt.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $295

PATHTRACE, INC.

☐ Pathcad
CNC machining system. Production of scrap sections and stretching of designs with dimension adjustment. Supports differing colors and thicknesses for finished drawings. CAD to CAM and CAM to CAD data transfer, detail enlargements and area and moments of inertia calculation.
IBM XT, AT

☐ Pathmill
Milling and machining center system for defining such tools as endmills, drills, taps and facemills. Includes graphical representation of profiles, fixtures and clamps. Offset calculation capability. Pocketing and area clearance cycles. User-specific radius compensation. Canned cycles independent of CNC control.
IBM XT, AT

☐ Pathpunch
Punching and nibbling system. Graphical display of clamps, sheet size and table size. Multiple profiles or hole patterns. Allows profile viewing with dynamic screen nesting. Pocket clearance and notching cycles. Allows cutting on 1 or both sides of standard tool shapes.
IBM XT, AT

☐ Pathtrace Computer Aided CNC Programming System (Basic Module)
Tool library and geometry facility for converting engineering drawing detail into absolute, incremental or relative coordinate information. Tangential, radial and intersecting variations. Circle to circle, retrospective and manipulation commands. Screen scaling. Zoom. Parametric facility for family of parts programming and construction facility for side calculations.
IBM XT, AT

☐ Pathtrace 3D Surface Machining
Utilizes 2D profiles from Pathtrace's Computer Aided CNC Programming System geometry section and combines them to define 3D surfaces which are displayed on screen as wire frames. Requires that each surface have flowline representing surface's center line or closed 2D profile (outline).
IBM XT, AT

☐ Pathturn
Mechanical engineering oriented CAM system. Utilizes machine canned cycles to prevent long part programs. Machining cycles, pocket clear, mirror, rotate and translate functions. Post-processor portfolio base. DNC capabilities and 3D visualization of machined part in solid model form.
IBM XT, AT

PC ENGINEERING PROGRAMS, INC.

☐ PC-Pipe
Thermal and weight stress analysis on 3D piping systems. B31.1 or B31.3 piping code.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 56 since 1983 ☐ Cost: $1,650

SDA TECHNICAL SERVICES

☐ DESICOMP
Programs include mechanics, spring design, fluid flow, principal stresses in solids, moments of inertia, loadings, torques.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $75

STRESS ANALYSIS ASSOCIATES, INC.

☐ Torsvibs
Computes torsional dynamics of machinery elements. Computes torsional frequencies of shaft represented as series of lumped masses connected by torsional springs. Provides frequencies and mode shapes of modeled machinery elements. Computes modal excursions when force applied.
IBM PC ☐ 128 KB req. ☐ Copies sold: 35 since 1984 ☐ Cost: $225

TANOAK SOFTWARE, INC.

☐ Conversions
Unit conversions program, 50 conversion categories for engineering, scientific and general purpose. Accesses over 500 units of measure. Decimal or exponential format.
IBM PC ☐ 128 KB req. ☐ Cost: $49

TECHDATA

☐ COMPRESS: Computer Aided Pressure Vessel Design
Designs pressure vessels per ASME Code, Section VIII. Calculates required wall and head thicknesses, MAWP new and corroded, hot and cold, possible failure routes, nozzles, effects of earthquakes and wind. Designs skirt and anchor bolts.
IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $2,800

TECHNICAL RESEARCH SERVICES, INC.

☐ API Tank and Tall Tower Design and Estimating
Covers design, estimating and layout of ASME and API vessels. Consists of 7 programs entitled estimate, apitank, talltower, layout, nozzel velocities, tube layout and TEMA fixed tubesheet design.
IBM PC ☐ 48 KB req. ☐ Cost: $1,340

☐ ASME Code Vessel Design
Consists of six programs which make basic computations required by ASME Code for design of unfired pressure vessels. Also includes code related topics not addressed by code.
IBM PC ☐ 48 KB req. ☐ Copies sold: 10 since 1982 ☐ Cost: $1,010

☐ Beam Formulas
Provides reactions, shears, moments, deflections and angles of rotation of beam ends under loading. Provides data for plotting shear, moment and deflection. Handles two or more concurrent beam loadings. Over 50 cases covering most possible types of loading.
IBM PC ☐ 48 KB req. ☐ Copies sold: 2 ☐ Cost: $595

☐ Local Stress in Vessel and Attachment
Four programs determine stress in local area of nozzle-to-shell interface when under loads induced by piping, thermal effects, seismic or dead loads and internal pressure. Performs reverse operation of determining allowable loads. Can apply to vessel supports and lugs.
IBM PC ☐ 48 KB req. ☐ Copies sold: 12 since 1982 ☐ Cost: $600

☐ Seismic Analysis
Used for horizontal vessel mounted on two saddle supports and vertical vessel on four lug-type supports. Requires MICA and CGCAL programs (included) and STRSC program (included in Local Stress in Vessel and Attachment package) for complete report.
IBM PC ☐ 48 KB req. ☐ Copies sold: 7 since 1982 ☐ Cost: $590-$785

TECHSOFT

☐ PV-Sys/1
Pressure vessel materials calculator. User inputs pressure, diameter, material type and corrosion allowance. Calculates elliptical and hemispherical heads, plate and pipe shells, and nozzle neck thickness. Stores data in customer file. Provides printout upon request.
IBM PC ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $90

UNIVERSAL TECHNICAL SYSTEMS

☐ TK SolverPack for Mechanical Engineering
Equations, values and tables for solving frequently encountered problems. Model topics include planar and cylindrical heat transfer, area moment of inertia and fluid flow. User-tailored models.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $100

UNIVERSITY OF KENTUCKY

Civil Engineering Software Center Division

☐ Firenet
Provides detailed hydraulic verification of fire protection sprinkler system. Accommodates multiple supplies, loops, booster pumps and sprinklers with different K factors. Locates remote area for gridded systems.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $300

VAN GULIK/OLIVER, INC.

☐ BAP (Boiler Analysis Program)
Calculates boiler efficiency, fuel consumption air and stack gas flow based on fuel used and stack conditions. Contains expandable fuel files for fuel data input, steam table algorithms and gas analysis conversion procedure.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4 since 1985 ☐ Cost: $275

WILEY PROFESSIONAL SOFTWARE

(division of John Wiley and Sons, Inc.)

☐ Combustion
Computes efficiency of boilers and process heaters based on standard combustion calculation methods. Determines fuel gas heat losses. Handles all standard fuels and special fuels such as wood wastes and industrial by-products based on specific chemical and thermal characteristics.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $275

☐ Curvfit
Curve-fitting analysis on user supplied data to determine best-fit equation for distributions including exponential inverse, polynomial, square root, linear, power and logarithmic. Uses method of least squares. Handles 500 data points. Data sets may be segmented for piecewise curve-fitting.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $95

☐ Cylinder and Shock Absorber Analysis
Calculates for known situation or assists in selection of standard cylinder based on user limiting criteria of time or acceleration and fluid velocity. Outputs velocity-time-distance relationship plus thrust, fluid velocity, GMP, energy requirements, stopping force, deceleration, stroke and time.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $125

☐ Fluidflo
Computes pressure losses and pumping power of pipe flows. Contains internal tables of pipe characteristics, water properties, standard pipe fittings. Enters data directly from piping layouts. Uses English or SI units.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $185

☐ Gasprops
Computes thermodynamic properties of gases including Air, Argon, Carbon Monoxide, Carbon Dioxide, Hydrogen, Nitrogen, Oxygen, Water Vapor. User inputs any 2 independent properties. Calculates remaining dependent properties, specific heat as constant volume/pressure, ratio of specific heats and acoustic velocity.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $185

☐ Heatflo
Computes heat losses from insulated/uninsulated pipes and flat surfaces in any situation where process temperature is higher than ambient temperature. User may alter 1 or more input parameters without affecting other parameters. Carries out what-if parametric studies. English or metric units.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $185

☐ Steamcalc
Computes thermodynamic properties of steam and water in superheated, subcooled, supercritical and mixture regions. Calculates saturation, temperature, pressure, enthalpy, internal energy, specific volume, entropy and quality. User chooses combinations of input parameters for desired information at given conditions.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $185

PROJECT MANAGEMENT

ABRACADATA, LTD.

☐ Everybody's Planner
IBM PC ☐ Cost: $100

AGS MANAGEMENT SYSTEMS, INC.

☐ Estiplan-Project Estimating System
Provides estimates for project resource time and costs. Handles system development projects including new development, enhancements/maintenance and purchased packages. Formats data for transfer to project management system such as PAC Micro, PAC II and PAC III.
IBM PC, XT, AT ☐ Copies sold: 45 since 1984

☐ PAC Micro
Critical path scheduler. Provides windowing and color graphics including pie, bar and network charts. Schedules project based on duration, effort and resource availability. Uses target start/finish dates. Accounts for holidays. Develops budgets. Generates reports. Interfaces PAC II, PAC III, Lotus and WordStar.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $990; $25,000 (site license fee)

AIMS+PLUS, INC.

☐ Timetools
Add-on module for AIMSPLUS and ARMS. Time analysis and scheduling dealing with numerical information vs. time. On-screen graphics for visual comparisons. Recalculates numeric data to reflect date changes. Displays data records by date in week, month and 10-day increments.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $800-$1,000

AMERICAN COMPUTER GROUP, INC.

☐ Quickplan
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $995

APPLIED BUSINESS TECHNOLOGY CORP.

☐ Advanced Project Workbench
Links Gantt chart, resource allocation spreadsheet and critical path network through multiple windows. Produces resource aggregation reports from multiple projects. Runs on LANs.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 8,000 since 1983 ☐ Cost: $1,150

☐ Standard Project Manager Workbench
Resource allocation, electronic Gantt chart, critical path calculations, status monitoring, time data capture, activity library, project costing, dynamic scaling, multi-level reporting, LAN support and subproject capability. For flagged activities, specific range of dates or in phase, activity or task level of detail.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $750

☐ Standard Project Workbench
Integrates Gantt charts, CPM networks and resource spreadsheets for project management. Supports resource leveling and what-if analyses. Import/export facilities allow interface with micro-based and mainframe systems. Tracks indicating status, revision of start/end dates, booking of time, and time-to-complete.
IBM PC, XT, AT, 3270 PC

APPLIED DIGITAL COMMUNICATIONS

☐ CPM MGR.
Monitors budgeted vs actual costs, projects end date. Reports include early/late start and finish dates, float items, estimated vs actual cost, critical path, work status and progress/precedence relationships.
IBM PC ☐ 256 KB req. ☐ Copies sold: 10 since 1981 ☐ Cost: $2,000

APPLIED MANAGEMENT SCIENCES CORP.

☐ F-A-S-T Software Project Management System
Coordinates each phase, sub-phase, task sequentially. Initiates/collects task strings. Generates documents. Data base creation, management, updating.
IBM PC ☐ 256 KB req. ☐ Cost: $40,000

APPLIED MICROSYSTEMS, INC.

General Systems Division

☐ Empact
Manages up to 100 projects containing 250 activities each. Produces 8 business-quality status and loading reports and 5 Gantt Charts. Activities are maintained with spreadsheet-like editor or interactive gun-sights in Gantt Charts.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $150

☐ Protracs
Tracks up to 100 projects containing 150 activities each. Produces 6 business-quality status and loading reports and 4 Gantt Charts in 2-month or annual formats. Offers gun-sights, zoom, sort/search, calculator and custom calendar.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 15,000 since 1983 ☐ Cost: $60

APPLITECH SOFTWARE, INC.

☐ Project Planner
Draws PERT charts. Performs what-if analysis on durations, costs, resources, structure and organization. Supports hi-res graphics.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $195-$295

ASHTON-TATE

☐ Project Analysis
Defines, organizes and plans each step of new project. Lists personnel and special skills for task requirements. Compiles resources to meet project requirements.
IBM PC, XT, AT ☐ Cost: $70

BREAKTHROUGH SOFTWARE CORP.

☐ Time Line
Project scheduling management. Handles unlimited tasks, dependencies, resources and cost categories. Partial resource allocation. Levels overscheduled resources. Enters fixed, variable and unit costs up to $99,999,999. Prints reports and exports directly to Lotus 1-2-3, Symphony and dBASE III.
IBM PC ☐ 256 KB req. ☐ Copies sold: 20,000 since 1984 ☐ Cost: $295-$995

THE BRIDGE, INC.

☐ Project Manager Workbench
IBM PC

COADE

(division of International Thomson Information, Inc.)

☐ Viewpoint
Handles unlimited number of projects, activities, resources, and costs. Supports multi-calendar, connections, and hierarchy levels. Planning support, touch control, structured planning, and retained experience. Plotter graphics available. Coordinates multiple activities. User-oriented design.
IBM PC ☐ 512 KB req. ☐ Cost: $2,000

COMPUTER AIDED MANAGEMENT

☐ ViewPoint
Project management system. Drawing board environment. What-if analysis. Mouse or keyboard access. Find activity, shrink, magnify, cut, copy, paste and move functions. Outputs time-scaled network diagrams, Gantt and PERT charts, resource and cost profiles and network tree diagrams.
IBM XT, AT ☐ 512 KB req. ☐ Cost: $1,195

COMPUTER ASSOCIATES INTERNATIONAL, INC.

☐ CA-Planmacs
Expert planning/knowledge-based project management. Produces baseline/action project plans. Working with generated action plans, user monitors project progress and reports status. Applies estimating information from CA-Estimacs to produce completion plans.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $15,000 (2 copies)

COMPUTER ASSOCIATES INTERNATIONAL, INC.

Micro Products Division

☐ SuperProject Plus
Uses PERT, Gantt and CPM. Provides resource calendars, variable resource usage rates, resource leveling and support of cross-project resource leveling.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 10,000 since 1984 ☐ Cost: $495

COMPUTER SOFTWARE TECHNOLOGY

☐ PERT I and PERT II
Computes critical path/time slacks of 60 tasks with PERT I or 400 tasks with PERT II.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $120 (PERT I); $260 (PERT II)

COMPUTERLINE

☐ Plantrac
Project management system with project scheduling, resource and cost management and graphics. Allows for 125,000 activities per project and 100 subprojects. Schedules projects in minute/hour durations of less than one day. Includes what if simulator and desktop calendar, calculator and screen shot.
IBM PC, AT, XT ☐ 64-128 KB req. ☐ Cost: $3,000

☐ Plantrac-EV
Produces revenue projection report, revenue projection graph, payments estimate report, and project status and revenue analysis report.
IBM PC, XT, AT ☐ Cost: $300

☐ Plantrac-T
Time recording system. Records and tracks manhours and produces time sheet analysis reports.
IBM PC, XT, AT ☐ Cost: $450

☐ Plantrac-1
Project scheduling system. Analyzes I/J and Precedence networks. Tracks project process. Interfaces with Plantrac/CS.
IBM PC, XT, AT ☐ Cost: $1,600

☐ Plantrac-2
Resource management system. Calculates resource requirements based on early or late dates and compares requirements/availabilities. Reschedules resources to constraints or to minimize usage.
IBM PC, XT, AT ☐ Cost: $800

☐ Plantrac-3
Cost management system. Calculates costs by priod on days worked, resources and activity overhead costs, compares planned to budgeted and actual costs and calculates cost progress.
IBM PC, XT, AT ☐ Cost: $600

☐ Plantrac-4
Depicts projects in logic and bar charts on screen, printer and plotter.
IBM PC, XT, AT ☐ Cost: $800

☐ Plantrac/CS
Project control and monitoring system. Integrates cost/contracts, time and resources for budgeting, planning, analysis and simulation. Includes user-defined data base/WBS, graphics and report writer. Interfaces with Plantrac.
IBM PC, XT, AT ☐ Cost: $3,000

☐ PSR
Performance summary reporting system. Produces graphic and tabular analysis of cost/schedule and manpower/schedule performance. Projects forecasted completion dates and manpower.
IBM PC, XT, AT ☐ Cost: $500

CORPORATE CONSULTING CO.

☐ Project and Job Cost Accounting
Project cost management/accounting for government contractors, construction, architectural and engineering companies. Records project labor and material costs. Prints weekly labor distribution. Prints project status report. Maintains PO/project commitment control.
IBM PC ☐ 256 KB req. ☐ Copies sold: 20 since 1978 ☐ Cost: $10,000

DAI, INC.

☐ APPRAIS
Utilizes standard or customized WBS (work breakdown structure) for cost estimating. Historical cost data base may be built and used for comparisons to current estimates. Facilitates analysis of differing plans for single project, alternate projects, and historical projects vs planned efforts. Analytical report output.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3 since 1986 ☐ Cost: $1,095

DATA CONSULTING GROUP

☐ DATA*EASY Project Scheduler
Projects are displayed in screen graphics format showing up to 14 tasks simultaneously. Data is displayed on daily basis showing user-defined status codes. Up to 10 weeks of data displayed at one time.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $78

DATA TREK
(division of Interface, Inc.)

☐ PMS82
Critical path calculations with calendar dating, cost and budgeting options. States activity durations in work days and assigns responsibility code or crew number to each activity. Up to 200 activities or categories for each project may be defined.
IBM PC ☐ 48 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $100

DATAMATICS MANAGEMENT SERVICES, INC.

☐ Time Accounting System 302
Client, task and project management. History, status, inquiry/demand reports.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 12 since 1980 ☐ Cost: $2,250

DATAMENSION

☐ Project Manager
IBM PC ☐ 192 KB req. ☐ Cost: $499

DATAWRITER CORP.

☐ Fast MOD
MODAPTS analysis, data manager, time study, work sampling and regression analysis. Labor standards generation, work measurement and predetermined time system. Accepts multiple codes on line as in manual practice. Search, macro-motion, formula generation, footnote and error detecting.
IBM PC, XT, AT ☐ Cost: $4,300

☐ Fast MSD
Generates labor standards. Supports time study, work sampling and regression analysis. Handles longer-cycle and noncyclic operations. Uses MSD motion codes. Handles all simos, awarding overlap time as needed. Search, macro-motion, formula generation, footnotes and error detecting.
IBM PC, XT, AT ☐ Cost: $4,300

☐ Fast MTM
Develops standard data using data manager, MTM-1, MTM-2 and time study. Includes work sampling for auditing standards, determining allowances, and setting standards on staff labor, and regressional analysis for developing formulas from historical data.
IBM PC, XT, AT ☐ Cost: $5,900

☐ Fast Time
Generates labor standards. Work measurement and predetermined time system. Includes data manager, time study, work sampling and regression analysis.
IBM PC, XT, AT ☐ Cost: $3,500

DAVIS & ASSOCIATES, INC.

☐ PC/MIS (Project Cost/Management Information System)
Project oriented data management system.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $69

DECISION SCIENCE SOFTWARE, INC.

☐ EXPERT
Solves problems using PERT. Defines starting/ending events with optimistic, most likely and pessimistic time estimates and manpower, money or machines demand. Prints solution and critical path by nodes or events and activity name.
IBM PC ☐ 48 KB req. ☐ Introduced: 1983 ☐ Cost: $125

DEKKER, LTD.

☐ Trakker and Trakker Plus
Performs project scheduling and resource/cost tracking. Trakker Plus adds performance measurement and earned value tracking.
IBM XT, AT ☐ 384 KB req. ☐ Cost: $750 (Trakker); $1,500 (Trakker Plus)

DIGITAL MARKETING CORP.

☐ Milestone
Plans, budgets, schedules and tracks projects. Performs what-if testing to determine impact of manpower/supplier alternatives. Divides projects into individual activities. Alters plan in response to changes.
IBM PC ☐ 56 KB req. ☐ Cost: $99

DYNACOMP, INC.

☐ Personal Task Manager
Organizes daily and long-range tasks and prioritizes them. Estimates, schedules and controls amount of time each task takes.
IBM PC ☐ 96 KB req. ☐ Cost: $40

DYNAMIC SOLUTIONS, INC.

☐ PERT6
Multiple project reporting, user-defined reports and audit trails. Multi-user. Up to 32,000 activities per project. What if analysis. Unlimited projects.
IBM XT, AT ☐ 96 KB req. ☐ Copies sold: 32 since 1972 ☐ Cost: $10,000

EARTH DATA CORP.

☐ MicroDOD
Costs and time on project are tracked and compared with initial projection. Complies with Department of Defense Regulation 7000 for reporting earned value and variance. Runs at regular time intervals to monitor progress. Calculates differences between projection and actual progress.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $100

☐ MicroGANTT
Interactive project management that calculates schedule and budget. Prompts data needed to build project plan which includes critical path network. Schedules across projects or contracts and shows how individual or resource is allocated.
IBM PC, XT, AT, Portable, PCjr ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $395

☐ MicroGANTT-22
Prompts for data from which it calculates schedules and budgets. Provides multiple project resource allocation. Supports optimal management of production and research and development projects. Limits size of subproject to 22 tasks. Defines larger projects using network of subprojects.
IBM PC ☐ 128 KB req. ☐ Cost: $195

☐ MPERT
Produces report in form of network diagram or work flow chart. Depicts projects as boxes and triangles, connected to show relationships among tasks, subprojects or resources. Generates charts of projects created with MicroGANTT.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $100

ELECTRONIC RESEARCH ASSOCIATES, INC.

☐ Project Manager
Provides visual aid for managing projects. User can draw tasks on terminal and establish dependencies with interconnecting lines. Graphics interface. Horizontal/vertical scrolling. Draws large networks on multiple pages.
IBM AT ☐ 640 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $595

ELITE SOFTWARE DEVELOPMENT, INC.

☐ CPM/PERT (Critical Path Method and Job Scheduling Programs)
Defines and evaluates up to 700 activities in network. Reports include critical path, activity schedule Gantt chart in bar graph form. Includes user-defined holidays, printer output options, special workday modes, user-defined calendar files and disk storage of project data.
IBM PC ☐ 56 KB req. ☐ Copies sold: 1,050 since 1982 ☐ Cost: $249

EMERGE SYSTEMS

☐ GPERT
Details activity schedules/resources loading requirements. Permits probabilistic time estimates and constraint dates.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $195

ERTL ASSOCIATES

☐ TMS (Turnaround Management System)
Work orders, manhour estimates, staffing, critical path schedules, resource histograms, bar charts, daily shift schedules, daily detailed and summary progress reports.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1982 ☐ Cost: $45,000

EXPERTWARE, INC.

☐ CMT (Configuration Management Toolkit)
Controls approved software, hardware inventories and documentation for all configurations of software product. Maintains, tracks and provides reporting on problem reports. Identifies references to or from elements in product components. Generates UNIX make files that build product for testing or delivery.
IBM PC, AT ☐ 1,000 KB req. ☐ Copies sold: 10 since 1985

☐ DST (Documentation Support Toolkit)
Provides formatting capabilities for document creation and maintenance, including headers, footers, section headings, tables of contents and indexes. User selects and fills in templates to produce forms which can be retrieved, displayed, modified, sorted or saved.
IBM PC, AT ☐ 1,000 KB req. ☐ Copies sold: 3 since 1986

GANTT SYSTEMS, INC.

☐ Pack Work Processor
Planning, scheduling, project tracking/control and resource management. Draws critical milestone and Gantt charts. Highlights early/late activities. Projects scheduled in dates, days, hours, minutes. Permits what-if questions and alternative project schedule evaluations. Data base structure permits search/sort. Shows project/resource status.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 250 since 1980 ☐ Cost: $225

GARLAND PUBLISHING, INC.

☐ Pathfinder
For project planning. Uses CPM for 500 activities. On-line critical path schedule, expertise, cash flow, work-day calendar conversion, what-if scenarios, time-scaled Gantt charts.
IBM PC ☐ 48 KB req. ☐ Copies sold: 200 since 1980 ☐ Cost: $299

GORDON GROUP

☐ BYL (Before You Leap)
Knowledge-based project estimation and scheduling. Forecasts detailed loading requirements by task across major time phases of project. Allows cost effective evaluation of project management scenarios. Produces single estimate for macro estimation. Evaluates 150 components/modules per project for micro estimation.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $495

IBM PERSONALLY DEVELOPED SOFTWARE

☐ Project Planning and Scheduling
IBM PDS no. 6276-500. Outputs plan upon entry of details and stages of each project. Indicates which tasks take place simultaneously and which are sequential. Calls out important activities that must be tracked. Estimates time of completion. Provides time/cost analyses. Color EGA support.
IBM PC, XT, AT, Portable PC ☐ 128 KB req. ☐ Cost: $150

INFORMATION TECTONICS

☐ GHL Cocomo
Cost estimation model. Features 3 levels of detail, multi-project structure, data retention, sensitivity analysis and what-ifs. Data describing any number of projects or variations of project may be entered, stored, copied, displayed, compared and edited.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 26 since 1984 ☐ Cost: $395

INSTITUTE OF INDUSTRIAL ENGINEERS

☐ Project Management
Features critical path analysis, project evaluation and review techniques, resource allocation and activity on-node network analysis.
IBM PC, XT ☐ 48 KB req. ☐ Copies sold: 830 since 1982 ☐ Cost: $175

KELAR CORP.

☐ PROJECAD
Graphic interface/file conversion program which converts drawings created by Primavera software to data interchange files used by AutoCAD and VersaCAD.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $595

K & H PROJECT SYSTEMS, INC.

☐ CUE
Planning/scheduling, estimating, costing and performance measurement. Optional graphics, data management, corporate accounting, GL and purchase agreement control. Designed for shipbuilding, construction, utility, aerospace and defense industries.
IBM PC ☐ 500 KB req. ☐ Copies sold: 100 since 1980

☐ Prestige PC Project Management System
Project control system. Utilizes precedence and arrow diagramming network techniques. Provides time analysis critical path method, resource levelling, activity costing, relational DBMS and network and gantt bar chart graphics.
IBM XT, AT ☐ 512 KB req. ☐ Introduced: 1986 ☐ Cost: $5,000

LIONHEART PRESS, INC.

☐ PERT and Critical Path Techniques
Produces critical path with costs and estimates of probability of completion as scheduled upon entry of activity data for normal and selective or full crash costs and times.
IBM PC ☐ 64 KB req. ☐ Copies sold: 600 since 1984 ☐ Cost: $95 and up

MAINSTAY SOFTWARE CORP.

☐ WBS Data Organizer
Performs cost analysis with RCA Price Hardware model output. Creates and dynamically rebuilds project work breakdown structure as additions, changes and deletions are made to model.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $3,995

MAINTENANCE AUTOMATION CORP.

☐ Chief Software Project Management Module
Maintenance project management.
IBM PC ☐ 512 KB req. ☐ Cost: $3,900

MC2 ENGINEERING SOFTWARE

☐ M2M (Critical Path Project Management)
Project scheduling. Prints PERT report, Gantt chart showing critical tasks, float days, early/late start date and project completion time. What-if studies. Task reorganization mid-project. Accommodates 40 holidays, variable work weeks and 3 year projects.
IBM PC ☐ 64 KB req. ☐ Copies sold: 200 since 1980 ☐ Cost: $295

METIER MANAGEMENT SYSTEMS, INC.

☐ Artemis
Project MIS. Identifies slippages and reports schedule performance. Performs risk assessment, cost control and planning analysis. Includes DBMS, graphics and communications.
IBM PC, XT, AT, RT ☐ 512 KB req. ☐ Copies sold: 2,700 since 1977 ☐ Cost: $5,000

MICRO PLANNING SOFTWARE USA

☐ Micro Planner
Project management. Plots Critical Path (or PERT). Pinpoints resource overloads. Optimizes usage of available resources. Progresses and updates schedules. Produces exception management reports. Provides simultaneous modeling.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,000 since 1981 ☐ Cost: $395-$1,995

MICRO PLANNING SYSTEMS, INC.

☐ Micro Planner
Suitable for projects with up to 4,000 activities. Uses critical path analysis. Establishes earliest/latest dates throughout project. Multiple calendars. Activity/event types include overlapping, summary, key events, nonsplit and reverse logic. Provides resource/progress management and exception management reporting.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $495-$1,995

☐ MP-500
Suitable for projects with up to 500 activities. Features resource leveling across multiple projects, progress reporting to compare actual vs. plan, exception management reporting and multiple archives to compare alternative scenarios.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $495

MICROMEC

☐ Task Tracker
Creates data base of tasks which details description, due date, completion date, comments and priority. Accepts up to 140 tasks. Prints reports on tasks upcoming, tasks overdue and priorities.
IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $25

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ Microsoft Project
Spreadsheet-style layout, individual resource and cost tables, graphics displays of schedules and resource utilization/reporting. Includes what-if capabilities. Optional Microsoft Mouse.
IBM PC ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $250

MICROSYM, INC.

☐ SympLCPM
Simplified CPM. Handles calendar projects. Reports for project costs, billing and resource management. Provides Gantt charts for each resource code.
IBM PC ☐ 128 KB req. ☐ Copies sold: 25 since 1982 ☐ Cost: $945

MITCHELL MANAGEMENT SYSTEMS, INC.

☐ Micro-MAPPS (Management and Project Planning System)
Macro modeling and decision support capabilities. Handles networks of up to 32,000 activities and manages multiple phases of large-scale projects. Includes integrated graphics program, multi-project resource leveler and resource utilization programs, micro-macro roll-up and TAILS scheduling technique.
IBM RT PC ☐ Introduced: 1986 ☐ Cost: $12,000

☐ Quick-Plan
Builds project plans based on time, cost and resources. Handles 250 activities, 99 resources and 500 connectors for each project. Contains report writer and cost matrix utility.
IBM PC ☐ 384 KB req. ☐ Copies sold: 4,250 since 1984 ☐ Cost: $995

☐ Time-Plan
Scheduling programming including precedence diagramming, time lags and four connectors. Handles 150 activities and 300 connectors for each network schedule. Includes TAIL for networking.
IBM PC ☐ 256 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $129

MONITOR SOFTWARE

☐ Task Monitor
Schedules precedence relationships between activities with positive/negative lags. Creates network. Keeps 3 working schedule models and 1 base line or reference schedule. Identifies critical path. Generates network, time-phased logic diagrams and Gantt charts. Tracks dollars/hours for each activity. Supports subprojects.
IBM PC ☐ 512 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $695

MORGAN COMPUTING CO., INC.

☐ EasyGANTT

Produces Gantt chart showing critical path. Sets up projects with 3,160 activities. Prioritizes sequence of steps to be accomplished. Updates project while underway and recalculates schedule as necessary. Does not handle resources or PERT charts.

IBM PC, AT, XT, PCjr ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $49

NATIONAL INFORMATION CONSULTANTS, INC.

☐ Management Information System

GL, AP, AR and payroll. Provides detailed or summary project information.

IBM PC ☐ 64 KB req. ☐ Copies sold: 25 since 1983 ☐ Cost: $1,995

NATIONAL INFORMATION SYSTEMS, INC.

☐ Vue

Multi-project distributed project management. Analyzes alternatives. Develops contingency plans. Includes report writer. Provides 5 levels of report summarization. Provides printer/plotter graphics.

IBM XT, AT ☐ 640 KB req. ☐ Copies sold: 200 since 1980 ☐ Cost: $995

NATIONAL SOFTWARE ENTERPRISES, INC.

☐ Project Management System

Personnel resources management provides reports on activity and progress of individuals, teams, projects and departments. Collects data at any time by activity. Displays current tasks for each individual. Provides internal calendar and department load report.

IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $850

NEWKIRK MANAGEMENT SERVICES, INC.

☐ PASCO

Prepares budgets, system development, maintenance and operations. Anticipates when OS should be replaced. Monitors cost for maintaining OS. Evaluates staff performance. Aids project cost/time estimating. Monitors change control, chargeback and backlogs.

IBM PC ☐ 512 KB req. ☐ Copies sold: 5 since 1984

ROBERT E. NOLAN CO.

☐ Nolan/Prompt (PROject Modeling and Performance Tracking system)

Projects Inventory, Project Modeling, Performance Management, Staff Management, Management Reporting and Life Cycle Standards modules. Tracks, prioritizes and schedules projects. Individual performance measurement for programmers and analysts. Modeling and reporting function for DP projects and activites.

IBM PC ☐ 512 KB req. ☐ Cost: $40,000

NORTH AMERICA MICA, INC.

☐ BPS-II (Batch Processing System)

Designed for use with NAMICA's PMS-II. Calculates and generates reports unattended.

IBM PC ☐ 128 KB req. ☐ Copies sold: 150 since 1983 ☐ Cost: $95

☐ GPS-II

Subsystem to PMS-II. Printer graphics support. Converts PMS-II and RMS-II network diagrams, bar charts, graphs and histograms into graphic presentations without mainframe plotters. Uses dot-matrix printers. Provides time-seriesed, zone headed network diagram for network logic. Prints diagrams, graphs and histograms sideways.

IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $495

☐ MMS-II (Material Management System)

Optional material management for PMS-II. 1,000 POs entered for 500 vendors and 32,000 line items of material allocated to PMS-II activities. Enters update material budget and actual values in PMS-11 and displays on activity report, funding schedule and earned value analysis.

IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $695

☐ Plot-II

Plotter support for PMS-II. Supports decimal and metric plotters and single-pen and multi-pen devices. Performs sort and select. Plots partial diagrams for special emphasis. Prints in expanded and standard character sizes. Positions plots on page using vertical/horizontal alignment.

IBM PC ☐ Cost: $695

☐ PMS-II

Project management scheduling. Calculates critical path and float for each activity within large/complex projects. Includes network diagrams, bar charts, budget analysis, what-if, networking and project cloning.

IBM PC ☐ 128 KB req. ☐ Copies sold: 2,000 since 1980 ☐ Cost: $1,295

☐ RMS-II (Resource Management System)

Optional subsidiary resource allocation system for PMS-II. Defines 192 resource centers. Produces activity reports and bar graphs showing percent allocation over time for one or more resources. Allows 32,000 allocations to activity in PMS-II project.

IBM PC ☐ 128 KB req. ☐ Copies sold: 700 since 1980 ☐ Cost: $995

☐ Teamplan

Manages file control for PMS-II. Enables 2 to 26 LAN or multi-user system users to run PMS-II simultaneously by maintaining separate files.

IBM PC

OMICRON

☐ Plan/Trax

Plans, schedules and monitors projects with 700 tasks and 10 labor resources for 5 years. CPM or Gantt scheduling methods. CPM network graphics and resource leveling included. 15 reports.

IBM PC ☐ 320 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $795

OPEN SYSTEMS, INC.

(subsidiary of Uccel Corp.)

☐ Project Estimating

Predefined spreadsheet designed for project control and estimate vs actual functions. Prepares formal project estimates for clients. For law, accounting, architectural and consulting firms. What if projections. Allocates expenses across job timeframe. Shows estimated costs, updated billing totals and resulting profit.

IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $395

PALADIN SOFTWARE CORP.

(division of Integrated Automation)

☐ VisiSchedule

Project planning, scheduling, resource leveling, critical paths, project length, manpower level and costs.

IBM PC, XT, AT ☐ 48 KB req. ☐ Cost: $149-$195

PINNELL ENGINEERING

☐ PMS80 Advanced Package

Timescale network diagram for printing activities with relationships. Uses dot matrix printers. Optional modules include Resource Forecasting, Cost Estimating and Accounting, Project Financial Status, Summary Bar Chart with Earned Value, Schedule Comparison, Screen Manager and Macro.

IBM PC ☐ 512 KB req. ☐ Introduced: 1981 ☐ Cost: $2,500

☐ PMS80 Basic Package

Reporting for scheduling, contractor's payment request, cash flow forecasts, and bar chart with comparison and earned value.

IBM PC ☐ 512 KB req. ☐ Introduced: 1981 ☐ Cost: $995

☐ PMS80 Basic Package Plus Timescale Arrow Diagram

Timescale network diagram for printing activities with relationships. Uses dot matrix printers.

IBM PC ☐ 512 KB req. ☐ Introduced: 1981 ☐ Cost: $1,500

☐ PMS80 Data Base Manager with Applications Software

Screen manager, report writer, file manager and scheduler. Generates, uses and modifies included application or creates new applications. Applications provided include materials control, change order management, AR/AP and income/expense journal, multi-project management and cost estimating.

IBM PC ☐ 512 KB req. ☐ Introduced: 1981 ☐ Cost: $1,500

☐ PMS80 Plotter Graphics Module

Timescale arrow diagram, percent complete curve and cash flow curve. User-defined, multi-color graphics.

IBM PC ☐ 512 KB req. ☐ Introduced: 1981 ☐ Cost: $1,500

☐ PMS80 Timecard Module

Posts CRT-screen timecard to project files for cost accounting and to individual file for use by payroll system.

IBM PC ☐ 512 KB req. ☐ Introduced: 1981 ☐ Cost: $1,200

PLANNING CONTROL INTERNATIONAL

☐ EASYTRAK Project Management System, ET/COPROCESSOR

Scheduling, costing, resource management for aerospace/defense, R and D, and pharmaceutical companies. Maintains unlimited projects and activities, networks, multiple calendars, inter-project dependencies, global updates, tiered subnetworking and multiple levels of WBS. What-if capability.

IBM XT, AT ☐ 128 KB req. ☐ Copies sold: 85 since 1983 ☐ Cost: $9,500

POC-IT MANAGEMENT SERVICES

☐ MicroMan Project Control System

For information services. Workload control for project and non-project activities. Unlimited number of projects and resources per project. Project and management reporting, scheduler and monthly financial reports for cost accounting and chargeback.

IBM PC ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $1,195-$1,450

PRIMAVERA SYSTEMS, INC.

☐ Finest Hour

Multiple calendar/hourly, scheduling version of Primavera Project Planner. Controls schedules, costs and resources for high-intensity, short duration projects. Optionally interfaces with Primavera's Primavision for producing time-scaled bar charts and network logic diagrams. Custom reporting with user-defined sort, selection, content and format.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 150 since 1986 ☐ Cost: $5,000

☐ Primavera Project Planner

Controls schedules, costs and resources using critical path analysis. Tabular/graphic reports. Handles 10,000 activities within any work breakdown structure. Supports earned value analysis. Optionally interfaces with Primavera's Primavision plotter graphics system for producing time-scaled bar charts and network logic diagrams.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 2,700 since 1983 ☐ Cost: $2,500

PROJECT CONTROL SYSTEMS

☐ PLANFLOW

Forecasts cash flows of capital projects. Supports reforecasting of to-go costs based on actuals. Includes user-definable distribution curves, automatic escalation, and monthly/annual incremental/cumulative reports with subtotals. Graphs to any screen or printer.

IBM PC ☐ 128 KB req. ☐ Introduced: 1983 ☐ Cost: $99

PROJECT RESOURCES OF OHIO CORP.

☐ PSP Series
Estimate handling system with data base for creation and maintenance of capital cost estimates. Features security, index generator, file manager, codes and lists directories, and report ordering section.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $13,500

PROJECT SOFTWARE & DEVELOPMENT, INC. (PSDI)

☐ QWIKNET - 500/250/125 Activity Models
Project management capabilities include planning and scheduling through CPM analysis, target scheduling, cost and resource management, progress reporting, and what-if analysis. Four types of logic relationships. Elapsed or working calendar. Twenty-one reports with multi-level sorting capabilities for customized reports.
IBM PC ☐ 384 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $895 (500 Activity); $695 (250 Activity); $395 (125 Activity)

QUADRAM

(subsidiary of Intelligent Systems Corp.)

☐ Deadline Manager
Performance/deadline data in seven reports and four Gantt charts. Highlights overdue tasks.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $149

QUALA

☐ Taskmanager
Schedules 999 tasks by start/completion dates, department, person, project and sub-project. Tracks person hours and percent complete. Reports and Gantt charts.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 2,168 since 1982 ☐ Cost: $395

RIVERDALE SYSTEMS DESIGN, INC.

☐ Entrepreneur's Project Management Workplate
Utilizes Gantt/Pert and CPM techniques. Automated scheduling of multiple projects, cost estimates, status reporting and manpower needs.
IBM PC ☐ 256 KB req. ☐ Copies sold: 120 since 1985 ☐ Cost: $90

RMS MANAGEMENT SYSTEMS, INC.

(division of MAST Resources, Inc.)

☐ CT4
Project management and productivity control. Integrated planning, budgeting, scheduling and cost/time control for construction, manufacturing and services. Supports multiple projects.
IBM PC ☐ 256 KB req. ☐ Cost: $1,800-$5,500

SAS INSTITUTE, INC. (NC)

☐ SAS/OR Software
Operations research and project optimization tool. Product scheduling and general assignment problems. CPM and linear programming. Determines minimum/ maximum cost flow and shortest path through network. Solves transportation problems. Requires base SAS software.
IBM PC, XT, AT, AT/370, XT/370/VM/PC ☐ 512 KB req. ☐ Copies sold: 859 since 1983

SCHUCHARDT SOFTWARE SYSTEMS, INC.

☐ IntePERT
Calculates critical path, displays PERT and Gantt charts. Project details transferrable to Schuchardt Software's InteCalc and IntePlan.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $249

SCITOR CORP.

☐ Project Scheduler Network
Schedules up to 2,000 jobs per project and up to 999 resources per job. Total number of jobs and resources dependent on available memory. Provides resource planning, graphics and selectable report generation. Allows sub-tasking. Creates network diagrams and Gantt charts.
IBM PC, XT, AT ☐ 320 KB req. ☐ Introduced: 1985 ☐ Cost: $495

☐ Project Scheduler 5000
Handles forecasting, scheduling, control and tracking of project status. What-if capabilities. Handles 5,000 tasks. Produces reports and spreadsheet-compatible cost/resource data.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $345

☐ Project Scheduler 5000 + Graphics
Handles forecasting, scheduling, control and tracking of project status. Calculates critical path. What-if analysis. Handles 5,000 tasks. Supports resource allocation, labor usage and cost spreads.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $395

SENTINEL COMPUTER CORP.

☐ Project Management System
Handles unlimited number of projects, events and resources. Multiple starts/stops in arrow/precedence networks. Provides fuel schedule analysis including critical path.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 6 since 1983 ☐ Cost: $5,000

SHEPPARD SOFTWARE CO.

☐ MicroPERT 0 Project Management System
Produces time-scaled network diagram. Handles 220 events. Facilities to construct, maintain, manipulate and back up project data base. Stores on hard disk. Charts can be printed sideways on IBM and Epson printers.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 400 since 1983 ☐ Cost: $250

SHIRLEY SOFTWARE SYSTEMS

☐ Mister (Management Information System for Time, Expenses and Resources)
Identifies potential time, resource and cash flow problems. Resource scheduling, bar charts, plotter, cost reporting, executive summarization and report generator.
IBM AT, XT, PC ☐ 512 KB req. ☐ Copies sold: 50 since 1967 ☐ Cost: $5,000

SIMPLE SOFTWARE, INC.

☐ ProjectMaster
Results-oriented tool to plan and manage small-to mid-sized projects. CPM, resource allocation, extended leveling, schedule risk, project acceleration and multi-project rollup.
IBM PC, XT, AT, 3270-PC, PC/370, PCjr ☐ 128 KB req. ☐ Copies sold: 1,100 since 1984 ☐ Cost: $399

SOFTCORP, INC.

☐ Advanced PRO-JECT 6
Supports CPM. Subtasking allows model linking and sub-project task summarization. Displays resource allocations. Permits partial completion based on percentage. Summarizes costs. Produces bar charts and to-do lists. Transfers data to Lotus 1-2-3, WordStar and dBASE II/III.
IBM PC, XT, PCjr ☐ 128 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $199

SOFTEXT PUBLISHING CORP.

☐ Scheduling and Control
Includes project layout, timetables, Gantt charts, PERT and CPM.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $95

SOFTPOINT

☐ Softpoint PMS
Assists project managers in preparing project schedules based on CPM and PERT techniques.
IBM PC ☐ Cost: $395

SOFTRAK SYSTEMS

☐ MicroTrak
Generates calendars/schedules, allocates/tracks resources, evaluates what-if scenarios. Conversion utility available to share data with other programs.
IBM PC ☐ 128 KB req. ☐ Copies sold: 4,500 since 1983 ☐ Cost: $595-$895

☐ PlotTrak
CPM network diagram and bar chart plotting. Takes schedule files generated by MicroTrak project manager and enables user to format, generate and output to a plotter time-scaled network diagrams and bar (Gantt) charts.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,500 since 1984 ☐ Cost: $395-$595

SOFTWARE PUBLISHING CORP.

☐ Harvard Total Project Manager
Includes roadmap, schedule tracking, cost tracking, resource allocation, reports, minimum/negative slack, subprojects and calendar. Cross-project resource allocation. Graphics capabilities. On-screen actual vs. planned project information. Creates projects at roadmap. Multiple and synchronized windows.
IBM PC, XT, AT ☐ 384 KB req.

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ Project PERT
Provides small-medium businesses with PERT. Number of events connected limited by disk space.
IBM PC ☐ Cost: $99

☐ Task Master
Organizes time and projects. Things-to-do today file provides detailed breakdown of projects with tasks. Prioritizes and estimates time needed. Future tasks allows user to set start and completion dates for projects. When start date is reached, future task becomes today's task.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $40

SPEAK SOFTLY, INC.

☐ Public Process Planner
For use by school district/hospital administrators and local governments in project planning and task analysis. Utilizes time lines and target dates to prioritize tasks and assign responsibilities. Recalls by task, area of responsibility, or target date.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $95

STATE OF THE ART, INC.

☐ Job Cost System
Tracks project costs including estimated costs, actual costs and cost variances. Details project cost information by labor or materials. Provides 16 costing and estimating reports. Posts project-related expenses and labor costs when used with AP and Payroll systems. Provides current revenue and cash receipt information when used with GL.
IBM PC, XT, AT ☐ Cost: $695

STRATEGIC SOFTWARE PLANNING CORP.

☐ PROMIS - Project Management Integrated System
Scheduling, resource management and cost control in planning and control phases of projects. Includes subnetworking, multi-project reporting, resource constrained scheduling, MDBS data base architecture, DIF functions, reports and graphics.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $2,995

SYSTONETICS, INC.

☐ VISIONmicro
Creates input networks on screen. Allows uploading and downloading to VISION project management system operating on Prime or DEC VAX computers. Provides standard reports and graphics.
IBM PC ☐ 512 KB req. ☐ Introduced: 1985 ☐ Cost: $2,495

TIMEWARE

☐ Timeplan
Schedule planning and status reporting.
IBM PC ☐ Introduced: 1982

TITANIA PUBLICATIONS

☐ Everybody's Planner
Creates project plans and flow charts. Supports plans for up to 5 years. Plans can have 54 tasks and 216 resources. Uses 18 rotatable flowchart shapes in 9 sizes. Vertical and horizontal labeling. Uses color to flow sequence. Uses mouse.
IBM PC ☐ Cost: $100

TOM SOFTWARE, INC.

☐ Project Management Information System
Supports multiple burden rates. Handles integrated project estimating. Forecasts demand for labor, inventory, purchases and equipment.
IBM PC, XT ☐ 28 KB req. ☐ Copies sold: 45 since 1984 ☐ Cost: $800-$3,500

TRAC LINE SOFTWARE, INC.

☐ MAPS - Management and Planning Software
Diagram projects into networks of tasks. Locates bottlenecks.
IBM PC ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $495-$695

TRAVELING SOFTWARE, INC.

☐ Project Manager
Handles quarterly projects over an extended period. Defines activity and task categories. On-screen and printed reports and graphs.
IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $100

TYDEN CONSULTANTS

☐ Project Costing/Crop Year Costing
Tracks costs across fiscal years by field/department/company/project. Accepts records from Tyden's GL. Holds 99 companies and 99 departments. Uses Quad relational DBMS.
IBM PC ☐ 128 KB req. ☐ Copies sold: 75 since 1982 ☐ Cost: $495

VISION SYSTEM, INC.

☐ Project Cost Control System
Project cost control for large projects. Separates projects into activities/transactions. Tracks budgets, encumbered expenses, actual expenses, variances to budget and revised budgets, and by vendor and PO. Break-out by ITC and non-ITC expenses. Behind schedule report function.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $1,000

WANG INSTITUTE OF GRADUATE STUDIES

School of Information Technology

☐ WICOMO Tool
Software cost estimation tool. Cost accounting, forecasting, project management and scheduling functions. Requires use of CRT. Estimates amount of effort, cost and schedule time per project based on its size and additional parameters.
IBM PC ☐ Cost: $200

WELCOM SOFTWARE TECHNOLOGY

☐ Open Plan
Project management. Integrates with dBASE III Plus. Graphics, report writer, and time, resource and cost modules. Supports 32,000 activities, ADM, PDM, 8 calendars, and unlimited resources.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $3,600

WESTMINSTER SOFTWARE, INC.

☐ Keeping-Tabs
Composite barchart illustrating planned and actuals. Schedule slippage analysis. Five-level sorting. Selective reporting. Budgets per activity. Actual spent amount for period. Calculates spent-to-date. Intermediate level sub-totals of budgetary items. Intermediate level percentage breakdown of budgetary values. Requires schedule plans created by Pertmaster.
IBM PC, XT ☐ Cost: $195

☐ Pertmaster
Critical path analysis. Uses activity-on-arrow and precedence networking. Analyzes 2,500 activities per network. Project/period bar-charts, histograms, milestone reports, cash flow curves, what-if projections, resource/descriptive coding. On screen network building. Used with Westminster's Pertplotter.
IBM PC ☐ 64-256 KB req. ☐ Copies sold: 15,000 since 1980 ☐ Cost: $695 (1,500 activities); $895 (2,500 activities)

WILEY PROFESSIONAL SOFTWARE

(division of John Wiley and Sons, Inc.)

☐ Project Manager
Critical path planning outlines tasks to be completed. Identifies potential time traps.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $125

WIND-2 RESEARCH, INC.

☐ One Plus
Financial management for architects and engineers. Consists of Business Management, Cost Proposal, GL, AP, and Payroll modules. Project invoicing, project management, employee management and AR. Provides quality control checks and audit trails.
IBM PC, XT, AT, XT/370, 3270-PC ☐ 128 KB req. ☐ Copies sold: 350 since 1984 ☐ Cost: $600-$4,500

SCIENTIFIC CALCULATIONS/PROCEDURES

AMERICAN DATA CABLE, INC.

☐ Temperature/Voltage/Resistance/Power Measurement System
Measures, records and graphs temperature, pressure, humidity and electrical parameters such as volts, ohms and amps. Up to 512 channels. Provides unit conversion by formula/table. Stripchart recording/plotting. Control interface has alarm setpoints and output management for process control. Converts units to any curve or function.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 1,600 since 1983 ☐ Cost: $150-$450

APTECH SYSTEMS, INC.

☐ Gauss Programming Language
Built-in editor. Interactive matrix programming. Direct access to DOS. Date and time functions. Hi-res graphics. Arithmetic, relational and logical operators. Reshape, sort, shift, rotate, reverse and manipulate elements of matrices. LINPACK, EISPACK and related algorithms. Numerical integration and differentiation.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $200

ASTROLABE

☐ Astro Star II
Supports 9 house systems, Uranian planets, transit scan, any kind of directional rate, sidereal zodiac, multiple composites, parans, and astro-mapping points. Allows different ways of analyzing aspects, midpoints, harmonics and angular separations. Chart files can be read by other programs.
IBM PC ☐ Cost: $295

☐ Nova
Supports 10 house systems, sidereal zodiac, midpoint sorts and trees, synastry and composites, and different progression and direction techniques. Lists transit, progression and direction hits in one chronological sequence. Nova Plotter Wheel available.
IBM PC, XT, Portable, PCjr ☐ 256 KB req. ☐ Cost: $245

ATLANTA SIGNAL PROCESSORS, INC.

☐ Digital Filter Design Package
Designs IIR and FIR digital filters. Prints frequency response plots, magnitude, log magnitude, phase group delay and delay. Prints impulse response plots. Supports design of multiband filters, differentiators, and Hilbert transformers. Version 2 supports design of FIR filters to piecewise linear magnitude response specification.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 190 since 1984 ☐ Cost: $995-$1,195

BEDFORD RESEARCH

☐ I*S*P
Integrates signal processing computations with data and file management. Data types handled include real/complex, integer, fixed point, floating point and double precision, character strings, flags, programs and data structures. Graphics functions include data plots in real, imaginary or polar format, or 2D/3D plots.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 40 since 1983 ☐ Cost: $1,295

BLAISE COMPUTING, INC.

☐ Sparky
Scientific, programmable calculator. Helps user evaluate mathematical expressions. Performs calculations during performance of another task.
IBM PC, XT, AT ☐ 100 KB req. ☐ Introduced: 1984 ☐ Cost: $75

C. ABACI, INC.

☐ Scientific Desk
Contains functions and subroutines covering typical problems in mathematics and statistics. Includes problem solving environments in eigenanalysis, high density fitting and plotting, path solving, linear equations and statistical inference and estimation. Includes standalone programs for scientific purposes.
IBM PC, XT, AT, RT ☐ 256 KB req. ☐ Copies sold: 325 since 1984 ☐ Cost: $660

CROSS EDUCATIONAL SOFTWARE, INC.

☐ Numerical Methods in Physics
Shows effects of adding rotation or friction using such mechanics systems as Skydriver, Projectile, Pendulum, Damped Harmonic Oscillator, Coupled Harmonic Oscillator, Circular Drumhead and Central Force Motion. Graphs or plots results.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $40

CYBERENGINEERING CORP.

☐ CyberTools Astro Library
Astronomy, satellite tracking and celestial navigation programs. Calculates day of week, Umbral lunar eclipses, great crossings and rhumb lines, and stellar parameter. Time conversion, Julian date conversion, world navigation, star map displays, satellite finder and USAT tracking.
IBM PC

☐ Fougere's Maximum-Entropy Spectral Analysis
Provides spectral estimates in the presence of noise signals. Locates cycles in all types of data.
IBM PC ☐ Cost: $200-$300

DATA SYSTEMS (CA)

☐ **Constellation Finder**
Displays time of rise and set time/meridian transit for given constellation, time and coordinates. Contains data for 45 constellations visible in northern hemisphere.
IBM PC ☐ 16 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $15

☐ **Navigational Star Identification**
Provides name and position of navigation star within 3 degrees when given star coordinates/position and time.
IBM PC ☐ 16 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $15

☐ **Navigational Star Program**
Calculates visible navigational stars in order of increasing azimuth and coordinates. Contains coordinates and visual magnitudes of 57 primary stars used in navigation.
IBM PC ☐ 16 KB req. ☐ Cost: $35

DYNACOMP, INC.

☐ **Basic Scientific Subroutines Volume I**
Handles alphanumeric data plotting, complex variables and matrix operations, random number generation and series approximations, of sines, cosines, arctangents, naturals, base-10 exponents and logarithms.
IBM PC ☐ 16 KB req. ☐ Copies sold: 30,000 ☐ Cost: $17-$21

☐ **Basic Scientific Subroutines Volume II**
Handles least squares, series, and functional approximations by iteration and recursion, CORDIC approximation techniques and alternatives, table interpolation, differentiation and integration, finding of real roots of functions, finding of complex roots of functions and optimization by steepest descent.
IBM PC ☐ 16 KB req. ☐ Copies sold: 25,000 ☐ Cost: $15-$22

☐ **Basic Scientific Subroutines Volume III**
Seven basic sorting routines consisting of bubble, insertion, shell, a shell-metzner, butterfly-hart, heap and quick sorts.
IBM PC ☐ 48 KB req. ☐ Cost: $30-$33

☐ **Calfex and Calfex G/T**
Equation processor. Creates graphs and tables. Solves maxima and minima and simultaneous equations. Handles numerical integration and array or simple variables. Produces linear, log or semilog plots. Prints results tables and parametric graphs.
IBM PC, PCjr ☐ 48 KB req. ☐ Cost: $290

☐ **Data Smoother**
Provides means to least-squares smooth equally spaced data and plot results. Variation in each data point smoothed according to weighted average of points surrounding it. Average span is 3 to 25 points. Order is linear to quintic.
IBM PC ☐ 16 KB req. ☐ Copies sold: 3,000 ☐ Cost: $20-$27

☐ **Fourier Analyzer**
Examines frequency spectrum characteristics of defined duration signals. Input data Fourier transformed into frequency space descriptors of amplitude and phase displayed in tabular form. Input data and calculated results plotted at user's option. Input data set limited by host computer memory size.
IBM PC ☐ 16 KB req. ☐ Copies sold: 5,000 ☐ Cost: $20-$27

☐ **Halley's Comet Locator**
Displays star map showing exactly where comet will appear from specified latitude on specified date.
IBM PC ☐ 64 KB req. ☐ Cost: $30

☐ **Harmonic Analyzer**
Specific to repetitive wave forms of Fourier transfer. All data entry, storage, retrieval and editing features on Dynacomp's Transfer Function Analyzer included. Supports signal and transform plotting functions and cubic spline interpolation procedure to transform irregularly space data.
IBM PC ☐ 16 KB req. ☐ Copies sold: 5,000 ☐ Cost: $30-$37

☐ **Star Cal III**
Monthly sky calendar displays moon phases, lunar/solar eclipses, oppositions of Mars, Jupiter and Saturn, east/west greatest elongations of Venus, meteor showers, culmination of 85 constellations and miscellaneous events. Astronomical clock in local standard/daylight, civil and mean sidereal and GMT and GMST. Generates sky maps. Draws constellation patterns.
IBM PC, PCjr ☐ 64 KB req. ☐ Cost: $30

☐ **Transfer Function Analyzer**
Analysis of limited duration signals. Applies Fourier integral transform to provide frequency domain. Based on Dynacomp's Fourier Analyzer. Presents results in engineering terms. Input data may be plotted before calculations. Frequency domain results plotted.
IBM PC ☐ 16 KB req. ☐ Copies sold: 6,000 ☐ Cost: $26-$33

☐ **Weather Forecaster**
Predicts average temperatures for any day of year, heating degree days, cooling degree days, number of frost free days, growing seasons and corn heat units. Three day weather forecast. Predictions displayed include cloud cover/type/height, wind direction and speed, and weather movement direction and speed.
IBM PC ☐ 48 KB req. ☐ Cost: $40

ELSEVIER SCIENTIFIC SOFTWARE
(subsidiary of Elsevier Science Publishers)

☐ **Balance**
Compares means of two series of measurements. Parametric and non-parametric, independent and related, one and two-tailed, Students, and Cochran's, Wilcoxon matched-pairs signed-rank, and Mann-Whitney U-tests. Helps user match test with situation. Tests small and large numbers of observations.
IBM PC ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $150

ESDU INTERNATIONAL, INC.
(subsidiary of International Thomson Organization)

☐ **Buzz-saw Noise - Sound Pressure Level Estimation**
Obtains sound pressure levels to buzz-saw or combination tones generated in far-field outside intake duct of fan or compressor. Computes duct geometry, number of fan blades, their radius and rotational speed, blade and duct Mach numbers, and static pressure.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Lateral Attenuation of Air-To-Ground Noise**
Obtains lateral noise attenuation of turbo-jet or turbo-fan powered aircraft.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Noise Shielding by Barriers**
Obtains noise shielding due to diffraction around sharp edges of rigid wedge-shaped barrier having hard surfaces. Calculates barrier geometry, positions of noise source and observer in relation to barrier and their heights above ground.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Noise Spectra Correction - Ground Reflection**
Obtains effect on perceived noise, at point distant from source, of interference between noise heard directly by propagation through uniform still atmosphere and that heard by reflection from ground.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Response of Two-Degree-of-Freedom Systems**
Obtains response characteristics to any known forcing function of any system modeled by two coupled second-order constant-coefficient differential equations.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Sound Attention by Non-uniform Atmosphere**
Obtains attenuation of sound within frequency band as it propagates through non-uniform still atmosphere. Calculates gaseous absorption of sound. Computes band attenuation for up to 34 constant percentage or constant bandwidth frequency bands according to user's requirements.
IBM PC, XT, AT ☐ 192 KB req.

EXPERT-EASE SYSTEMS, INC.

☐ **EASE+ACSL**
Enables ACSL engineering program user to perform complex systems simulations. Supports hi-res graphical ACSL models. Generates input decks and plots results. Maintains data base of system models and results.
IBM PC, AT ☐ 640 KB req. ☐ Introduced: 1986 ☐ Cost: $4,450

HART SCIENTIFIC, INC.

☐ **Q.E.D.**
Data acquisition and control system. User can acquire, graph, mathematically manipulate, file and transfer data for scientific report generation. Windowing capabilities.
IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1985 ☐ Cost: $849

HEM DATA CORP.

☐ **Snapshot Storage Scope**
Digital storage oscilloscope and data acquisition system. Provides real-time collection and display of analog data. Supports triggers, cursors, zooming and selective recording/replaying of data to/from disk.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $495

HITACHI AMERICA, LTD.
Computer Sales & Service Division

☐ **DNASIS**
DNA analysis system.
IBM PC

HOLLIS GEOSYSTEMS CORP.

☐ **GeoTrak IMS**
Converts information from GeoPod 124 tapes into engineering units. Archives data. Allows user to enter into RS/1 system for mathematical and statistical analysis. Creates graphs from table data, direct input or functions, including x-y plots, bar graphs, pie charts and 3D graphs. Graph editor.
IBM PC, XT ☐ 256 KB req. ☐ Introduced: 1984

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **ACRITH (High-Accuracy Arithmetic) FORTRAN Subroutines**
IBM no. 5664-185/01.
IBM XT/370/VM/PC ☐ Cost: $150

INFOMETRIX, INC.

☐ **Ein*Sight**
Exploratory multivariate analysis system. Identifies and graphically displays patterns of association in large data sets. Features include principle component analysis, centroidal hierarchical cluster analysis, and routines to calculate covariance and correlation matrices of user's data set.
IBM PC ☐ 640 KB req. ☐ Copies sold: 20 since 1985 ☐ Cost: $295

INNCON SOFTWARE

☐ **Scientific Plotting**
IBM PC, XT ☐ Cost: $20

INTERACTIVE MICROWARE, INC.

☐ **Chromatochart-PC**
Supports up to four channels of simultaneous data acquisition and control for GCs and HPLCs. Utilizes proprietary data compression algorithms to permit more raw data storage. Allows user to calculate, review, edit and store baseline information.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $800-$995

☐ **Curve Fitter**
Permits selection of appropriate curve for experimental results. Scaling and transformations, averaging, smoothing, interpolation and least square fitting.
IBM PC ☐ 48 KB req. ☐ Introduced: 1980 ☐ Cost: $35-$95

☐ Scientific Plotter
Receives input from keyboard, disk or end user subroutine. Controls length and position of each axis, grid size and interval between numbers. Color plotter enhancement available.
IBM PC ☐ 48 KB req. ☐ Introduced: 1983 ☐ Cost: $25-$95

INTERNATIONAL COMPUTING, INC.

☐ Unit Conversions
Performs 3,564 measurement conversions within 22 families of units. Displays results in decimal and scientific notation. Accuracy is 6 significant digits. Rounds results rather than truncates. Includes input mask and traps.
IBM PC, XT, AT ☐ 48 KB req. ☐ Introduced: 1985 ☐ Cost: $50

INTERNATIONAL LOGIC CORP.

☐ micro-Flush
Performs 3D analysis of soil-structure interaction during earthquakes. Features beam elements, 3D ability, deconvolution analysis capability and out-of-core equation solver. Includes 1D site-response and 2D dynamic finite element analysis programs and graphic post-processor.
IBM PC ☐ 256 KB req. ☐ Cost: $1,100-$1,400

JANDEL SCIENTIFIC

☐ Digital Paintbrush System
For scientific measurement and statistical analysis with presentation graphics. Charts and graphs output to dot matrix and color ink jet printers.
IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $229-$495

☐ Sigma-Plot
Produces scientific data plots. Includes error bars, log/linear scales, regression lines and unlimited data set size. Generates scatter, line, vertical/horizontal bar, grouped bar and horizontal/vertical histogram charts. Requires HP or compatible plotter.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $350

☐ Sigma-Scan
Performs scientific digitizing, area/linear measurement, angle/slope measurement and object counting. Produces descriptive statistics on measurement data. Generates, saves and transfers DIF or ASCII text files. Measures object position/area in photomicrographs, x-rays, maps, strip-charts and flat objects.
IBM PC ☐ 256 KB req. ☐ Cost: $395

K SOFTWARE HOUSE, INC.

☐ KSH-1 Scientific Calculator
Reviewed Jul 1986 p. 172.
Memory resident Scientific calculator that emulates HP-11C with 18 digit calculations. Hex, binary and octal operations including Boolean functions. Up to 512 program steps.
IBM PC ☐ 40 KB req. ☐ Introduced: 1985 ☐ Cost: $50

MACMILLAN SOFTWARE CO.

(affiliate of Macmillan Publishing Co.)

☐ ASYST
Provides arithmetic, trigonometric and hyperbolic functions, array manipulation, control of vectors and matrices, plotting, file manipulation, programming control structures, built-in text editors, eigenvalues, eigenvectors, polynomials, Fourier transform, least squares approximations, curve fitting, convolutions, integration, differentiation, and smoothing.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $795-$2,195

☐ Asystant, Asystant+
Integrated data reduction, analysis and display graphics. Array-based scientific calculator supports algebraic and RPN operation. Includes text editor and waveform processor. Plus version adds data acquisition.
IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $495 (Asystant); $895 (Asystant+)

MARCUS SYSTEMS

☐ MSYS Scientific Data Plotting and Analysis
Produces plotting with in-situ polynomial curve and equation plot capability.
IBM PC

THE MATHWORKS, INC.

☐ PC-MATLAB
Provides scientific and engineering mathematical calculations. Specializes in matrix computations. Includes eigenvalues, eigenvectors, matrix arithmetic, matrix inversion, linear equation solution, least squares, regression, determinants, singular-value decomposition and condition estimates.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $695

MICROWAY, INC.

SEE AD ON COVER 3

☐ 87SFL (Scientific Function Library)
Contains 170 mathematical subroutines for scientific, engineering and statistical calculations. Handles Fresnel, Dawson, exponential and elliptic integrals. Performs gamma, beta, psi, Kelvin, Airy and Bessel functions. Includes numerous polynomials, student's t-/F-distribution and inverses. Callable from FORTRAN, BASIC, Pascal and C.
IBM PC, XT, AT ☐ Cost: $250 and up

MITCHELL & GAUTHIER ASSOCIATES, INC.

☐ ACSL/PC
Dynamic system modeling. Integrates differential equations. Interactive or batch operations, compatibility with user-generated FORTRAN libraries, Gear's integration algorithm for stiff systems, access to variable dictionary via ACSL commands, no limit on program size, number of names, states or labels.
IBM PC ☐ 320 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $1,900

NATIONAL INSTRUMENTS

☐ IEEE-488 Applications Guide
Tutorial on programming GPIB instruments. Describes over 50 instruments from vendors including HP, Tektronix, Gould and Fluke.
IBM PC

☐ Versaplot 9/GPIB-PC
Generates graphic output at high speeds. Controls Versatec V-80 electrostatic plotters via IEEE-488 bus. Includes library of compatible function calls.
IBM PC

NUMERICAL ALGORITHMS GROUP, INC.

☐ FORTRAN PC50 Library
Fifty FORTRAN routines. Covers zeros of polynomials and transcendental equations; Fourier transforms; quadrature; ordinary DEs; non-linear optimization; linear algebra; basic statistics; random numbers; linear programming. Shows how to input data, call a routine and print results. Allows user-developed programs.
IBM PC ☐ 192 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $345

PROCESS SYSTEMS INTERNATIONAL

☐ FLASHCALC
Performs flash calculations using Chao-Seeder/Gryson-Staged K-value correlations for multi-component streams containing hydrocarbon and non-hydrocarbon components. Handles 20 components per stream, including mixtures of inorganic, light hydrocarbons and petroleum fractions. Calculates enthalpy using Redlich-Kwong correlation.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 30 since 1983 ☐ Cost: $1,495

QUINN-CURTIS

☐ IPC-TP-006
Turbo Pascal science/engineering tools. Provides general-purpose procedures/functions for solving data analysis/graphics problems. Supports statistics, multiple regression, curve fitting, simultaneous equations, Fourier analysis, matrix math, complex number arithmetic, integration, differential equations, linear programming, file transfers, data smoothing and communications.
IBM PC, XT, AT ☐ Cost: $75

☐ IPC-TP-008
Metrabyte Dash-8 and Dash-16 Turbo Pascal data acquisition/control tools. General-purpose procedures, functions and utility programs for solving science/engineering data acquisition control problems. Supports analog/digital I/O, graphics and data logger.
IBM PC, XT, AT ☐ Cost: $100

RAPID SYSTEMS

☐ Digital Oscilloscope Peripheral/Spectrum Analyzer
Features four channels, 2MHZ sampling rate, 500 KHZ analog bandwidth and diode projection on inputs. Graphics uses up to 160 x 260 pixels for data display. Provides keyboard control of gain parameters for channels A, B, C, and D, time base values, number of channels and trigger mode.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $599

☐ Spectrum Analysis
Frequency resolution 1 Hz. Supports variable order of Fast Fourier Transform, up to order 1,024. Includes selectable time window, rectangular and Hanning. Voltage and power spectrum computation. Power spectrum averaging. Save/restore spectrums.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $295

RLJ SOFTWARE APPLICATIONS

☐ Scipack
Consists of monochrome monitor plot; hi-res plot for color monitor; numerical integration program; program to find real and complex polynomial roots; linear least squares regression program; and polynomial least squares curve fitting program.
IBM PC ☐ 64 KB req. ☐ Cost: $40

SCIENTIFIC ENDEAVORS CORP.

☐ GraphiC
Produces hi-res publication quality scientific and engineering color graphs. Approximately 100 C-callable routines. Provides 14 fonts, 8 curve markers and 4 curve types. Linear, log, polar, contour, bar, Smith charts and 3D plots available. Used with most C compilers.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $350

SIGNAL TECHNOLOGY, INC.

☐ ILS-PC 1,2
Signal processing system. Microcomputer version STI's ILS. Handles data acquisition, digital signal processing and filtering.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $995 (ILS-PC1); $1,495 (ILS-PC2)

SIR, INC.

☐ SIR/DBMS, The Intelligent Relational System
Scientific-oriented DBMS. Consists of nucleus relational DBMS with active data dictionary, graphics, forms data entry and retrieval facility, SQL+ query language, graphics module and host language interface. Features built-in intelligence. Supports interface to SPSS, SAS and BMDP.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 450 since 1980

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ Halley's Comet Locator
Shows how to find Halley's Comet. Enters latitude and date of observation. Shows stars of different magnitudes, direction, degrees above or below horizon, and symbol for comet itself. Prints star map for future reference.
IBM PC ☐ Cost: $50

STELLAR SOFTWARE

☐ Beam 2 Optical Ray Tracer

Optical design system. Provides table editor, double-precision trace algorithm, interactive diagram routine, filing system, spot diagram routine and optimizer. Allows examination/modification of numerical system specification and ray description. Handles arbitrary skew rays. Generates rays of specified class.
IBM PC, XT, AT ☐ Cost: $90

SUNDERLAND SOFTWARE ASSOCIATES

☐ HP-PC Hypercalculator

Pop-up scientific calculator utility, emulates HP-11C, permits 2-way data transfer. Added features include hex/oct/bin arithmetic, alpha-numeric program messages, 100 registers and 1,000 program steps. State of all registers may be saved on disk. Programmable using any text editor. 8087 version included.
IBM PC ☐ 128 KB req. ☐ Copies sold: 800 since 1984 ☐ Cost: $40

TECHSOFT

☐ Math

Calculates circle sectors and segments. Finds unknown radius, angle, chord length, arc length or area. Calculates triangles and finds unknown angles or sides.
IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $40

TRACOR XRAY

☐ Spectrace 5000

Energy-dispersive, x-ray fluorescent system for nondestructive elemental analysis. Uses FI (LI) detector with 155 resolution. Fundamental parameters program. Dynamic range. PPM to 100% with dilution. Handles solids, powders, liquids and thin films. Geological, chemical, petroleum, forensic, environmental and mining applications.
IBM PC, AT ☐ Cost: $55,000-$62,000

UNIRAS, INC.

☐ KRIGPAK

Companion to GEOPAK. Geostatistics covering graphics and statistical applications in geology and mining.
IBM RT, AT

☐ SEISPAK

Subroutines for construction of seismological, geophysical and well logging applications. Supports dual attribute plotting of seismic sections and seismic cubes construction. Generates wiggle lines, monochrome/solid color/color section/color rectangle variable area fill and color gridded/color contoured seismic displays.
IBM RT, AT

UNKEL SOFTWARE, INC.

☐ Unkel Scope

Science and engineering laboratory tool. Level 1 displays data in real-time and stores data for later analysis. Level 2+ adds experiment control, process controllers, oscilloscope functions, digital filtering, FFT-related functions, calibration and conversion. Transfers data to spreadsheet or data base programs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $349 (Level 1); $549 (Level 2+)

VECTORPLEX DATA SYSTEMS, LTD.

☐ Vector87

Array processor subroutines. Includes FFT, convolution, dot product, vector operations, random number generations and linear equation solvers for scientific programs. Versions for Lattice C, Microsoft C, IBM Pro FORTRAN, Lahey FORTRAN and MS FORTRAN.
IBM PC ☐ Cost: $120

VERAC, INC.

☐ Fire Control Sensor Simulator

End-to-end simulation of electro-optical sensor detection, recognition and ID of ground and air targets. Sensors include laser radars, IRSTs, FLIRs, TVs/LLLTVs, direct vision optics and unaided visual search. Propagation based on USAF LOWTRAN and Army XSCALE and LZTRAN propagation models.
IBM PC ☐ 512 KB req. ☐ Copies sold: 6 since 1984 ☐ Cost: $10,000

WILEY PROFESSIONAL SOFTWARE

(division of John Wiley and Sons, Inc.)

☐ Calculus for Scientists and Engineers

Performs single, double and triple integration and differential equations.
IBM PC, XT ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $75

XIRIS CORP.

☐ Molecular Modeling System

Models chemical structures, compares molecules and obtains general geometry, bond lengths and angles, dihedral angles, distances and overall strain information on atoms and bonds.
IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $495

ZEPHYR SERVICES

☐ Astro-Aid

Forty-four astronomical functions. Coordinate, time and basic conversions. Kepler's/Newton's laws, relativity, trigonometry, telescope design, equinox/solstice, polaris transits, Jupiter's moons, solar system data, constellations and stars.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $30

☐ Astrobase

Data base of 300 astronomical objects. Objects are observable in telescopes of amateur size (6-16 inches diameter). User can add to data base.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $30

☐ Astrocalc

Astronomical calculations for sun, moon and planets. Includes input time, date, longitude and latitude. Provides rise/set times, magnitude, elongation, right ascension and declination, orbital elements, attitude and azimuth.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $30

☐ Astrostell

Teaches 88 constellations and deep sky objects they contain. Provides names and magnitudes of bright stars. History of constellations and star charts. Calls up constellations by name to screen. Shows constellations using 4 star brightness.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $30

☐ Cometwatch

Calculates comet data. Background on physics of comets, how to observe them and information on Halley's Comet and its return to the sun in 1985-86.
IBM PC ☐ Copies sold: 500 since 1985 ☐ Cost: $30

STATISTICS & MATHEMATICS

ABACUS SCIENTIFIC SOFTWARE

☐ ADDaSTAT

Statistical enhancement template for Lotus 1-2-3, performing linear regression, error bar plots, simple and matched-pair t-tests, chi-square, ANOVA and Poisson analysis.
IBM PC ☐ 256-384 KB req. ☐ Cost: $80

☐ MULTIFIT

Statistical enhancement template for Lotus 1-2-3 performing multiple regression and Fourier transformation trend analysis. Features skewness indicators, confidence limits, next time interval prediction, curve smoothing, descriptive analysis, multiple regression, missing data substitution and residual scatterplots.
IBM PC ☐ 256-384 KB req. ☐ Cost: $90

☐ Sympathy

Statistical enhancement template for Symphony performing linear and multiple regression, error bar plots, simple and matched-pair t-tests, Fourier transformation trend analysis, chi-square, ANOVA and Poisson analysis.
IBM PC ☐ 512 KB req. ☐ Cost: $160

ACTUARIAL MICRO SOFTWARE

☐ GASS

Simulates 10 variables simultaneously and combines them into user-defined algorithms. Variables can be random, Boolean, functional or compound. Features 13 probability distributions including empirical tables and on-line documentation.
IBM PC ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $325

☐ Monte Carlo Simulations

Chi-square goodness-of-fit test and random number generation based on any seven probability distributions. Graphics, color and audio enhancements.
IBM PC ☐ 48 KB req. ☐ Copies sold: 105 since 1983 ☐ Cost: $125

☐ Simulations

Analyzes past experience and future possibilities via GASS and Monte Carlo simulations.
IBM PC ☐ 48 KB req. ☐ Copies sold: 29 since 1984 ☐ Cost: $395

ADDISON-WESLEY PUBLISHING CO., INC.

☐ Micro-DYNAMO System Dynamics Modeling Language

Builds continuous simulation models to study business, social, economic, biological, psychological or engineering problems. Creates DYNAMO-based cause and effect models and produces tabular and plotted results which can be displayed or printed in color.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $245-$395

AD & P ANALYSIS DESIGN & PROGRAMMING

☐ STAT-PAK

Modeled after SPSS. Creates files. Defines existing system files for statistical analyses. Extracts specific records from file to create new file. Univariate statistics, cross tabulation tables, frequency distribution tables, product moment correlations, partial correlations, dispersion around mean, bivariate regression and scatterplot. Novell Netware compatible.
IBM PC, XT, AT ☐ 4 KB req.

☐ U-CALC

Financial calculator with 9 decimal places and 10 memory cells. Paper tape or display output. Simple/compound interest, nominal vs. effective interest rates, present and future values of lump sums or annuities, net present values, IRR, loan amortization schedules and investment yield analysis.
IBM PC, XT, AT ☐ 4 KB req.

AGRICULTURAL SOFTWARE CONSULTANTS, INC.

☐ LINPGM

Linear programming for business, industry and applied sciences. Contains machine language subroutine that uses revised simplex algorithm. Runs problems from 50 variables and 55 constraints to 150 variables and 25 constraints to 250 variables and 5 constraints.
IBM PC ☐ 48 KB req. ☐ Introduced: 1981 ☐ Cost: $95

☐ MINI-MAX

Linear programming for business, industry and applied sciences. Simplex algorithm and machine language for calculation. Solves from 1x100 to 300x39 problems. Sensitivity analysis includes price ranges, slack variables, shadow prices and range of resources.
IBM PC ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $395

ALGOR INTERACTIVE SYSTEMS, INC.

☐ Acurve

Fits mathematical functions to bi-variate data. Curfit fits given data set to 6 functions. Polfit fits data to polynomial of order 2 through N. Both programs measure quality of fit and show correlation between input and calculated data at same points.

IBM AT ☐ 256 KB req. ☐ Introduced: 1978 ☐ Cost: $250

ALLIGATOR TRANSFORMS

☐ Fourier Perspective I

FFT and graphics package. One-dimensional 16,384 points and 2D 128 x 128 points. Real, imaginary, amplitude and phase 2D plots of data, 3D hidden line plots, and 2D cross-sections of 3D data. Reads and writes data files on disk.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $149

☐ Fourier Perspective II

FFT and graphics package. One-dimensional 16,384 points and 2D 128x128 points. Real, imaginary, amplitude and phase 2D plots of data, 3D hidden line plots, and 2D cross-sections of 3D data. Reads and writes data files on disk.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $395

☐ Perspective FFT

Transforms 8,192 single precision, complex data points. Performs FFT in 1 and 2 dimensions and also in forward and inverse. Compatible with compilers using IEEE or Microsoft floating point number formats.

IBM PC, XT, AT ☐ Cost: $159

ALTERNATIVE DECISION SOFTWARE, INC.

☐ PC-Calculator Plus

Allows PC to become multifunction desktop calculator. Solves financial, statistical, mathematical and trigonometric problems. Solutions saved into spreadsheet.

IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $30

ANDERSON-BELL CORP.

☐ Abstat

Reads/writes dBase, Lotus and ASCII files. Provides data management, transformations, descriptive statistics, multiple linear regression, correlations, anova, t tests, crosstabs, histograms, scatter plots and non-parametrics.

IBM PC ☐ 196 KB req. ☐ Copies sold: 5,500 since 1981 ☐ Cost: $395

APPLIED I

☐ Fansy

Frequency analysis and synthesis. Analyzes time response of TUTSIM simulation program. Uses FFT routines to convert filed time response of TUTSIM simulation to frequency domain. Displays gain and phase plots vs. frequency, using IBM color graphic adaptor.

IBM PC ☐ Cost: $185

☐ TUTSIM

Reviewed Jul 1984 p. 40.

Block diagram oriented simulation. Graphs behavior of linear or nonlinear systems. Performs system evaluation with numeric, graphic, or plotter output, I/O and frequency response options available.

IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 1,200 since 1983 ☐ Cost: $475-$495

APTECH SYSTEMS, INC.

☐ Gauss Mathematical and Statistical System

Graphics and text plots, data and file handling, descriptive statistics and tables, linear models and regression, nonparametric statistics and pseudo random number generation for additional models. Nonlinear estimation for general and specific models, optimization, nonlinear equation solution and time series/signal processing.

IBM PC, XT, AT ☐ 320 KB req. ☐ Cost: $50-$300

A2DEVICES

☐ Biostatistics 3PC

Combined statistical analysis and graphical data plotting. Data editing and storage. Includes standard deviation, t tests, Wilcoxon, variance and several regressions.

IBM PC, XT, PCjr ☐ 128 KB req. ☐ Copies sold: 500 since 1980 ☐ Cost: $125

BASIC BUSINESS SOFTWARE, INC.

☐ Some Common Basic Programs

IBM PC ☐ Cost: $35

☐ Statistics

Multiple linear regression. Normal, T, chi-square, F, bivariate-normal, geometric, poisson, binomial, weibull and logarithmic-normal distributions and Spearman's rank and contingency table. Handles permutations plus combinations, basic statistics, moments, skewness, kurtosis and power curve fit.

IBM PC ☐ 8 KB req. ☐ Cost: $75

BELANGER RESEARCH ASSOCIATES

☐ BetaSTAT

Statistical analysis package. Modules include Stepwise Regression, Factor Analysis Discriminant Function, Analysis of Variance, Matrix Manipulation, Analysis of Covariance, Analysis of Variance W&B, Nonparametrics and Utilities. Modules can be sold individually.

IBM PC ☐ 64 KB req. ☐ Copies sold: 2,000 since 1978 ☐ Cost: $295

BMDP STATISTICAL SOFTWARE, INC.

☐ BMDP/PC

PC version of BMDP Statistical Software. Time series, survival analyses, cluster analyses, nonparametric statistics, multivariate analysis, nonlinear regression, ANOVA, frequency tables, plots, group comparisons and data description.

IBM PC, XT, AT ☐ Cost: $450

BRIGHTBILL-ROBERTS/THE MARKETING CHANNEL AND CO., LTD.

☐ MatheMagic

Solves simple calculations or elaborate mathematical formulas without programming. Handles mathematical applications for business, science, engineering, education and home. Accommodates formulas with 200 characters. Formulas may call other formulas. Provides conversion function and variable names up to 30 characters long.

IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 15,000 since 1982 ☐ Cost: $90

BV ENGINEERING

☐ TEKCALC

Programmable scientific calculator for solving mathematical problems. Built-in graphics, statistics, data table window, and compatibility with other BVE software.

IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $73

THE CACTUSPLOT CO.

☐ Cactusplot: A Mathematics Utility

Five-function plotting with vertical axis scaling. Trigonometric, logarithmic, exponential and polynomial functions. Calculates and shades areas under or between curves. Finds slopes of secant lines and points where graph crosses any horizontal line.

IBM PC ☐ 48 KB req. ☐ Copies sold: 1,000 since 1981 ☐ Cost: $60

CALIFORNIA SCIENTIFIC SOFTWARE

☐ LSAP

Performs linear analysis functions and produces transient response plots. Produces Bode plots, Nyguist diagrams, Root-Locus diagrams, and transient analysis plots for linear systems up to degree 40.

IBM PC ☐ 256 KB req. ☐ Copies sold: 10 since 1985 ☐ Cost: $465

COMPUTER SOFTWARE TECHNOLOGY

☐ Fourier Analysis

Computes Fourier coefficients for abscissas or angular degrees or radians up to the 50th order.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $90

☐ General Contour Math Applications

Plots contour maps within rectangular frame, when values are given at points inside.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $100

☐ LP I and LP II (Linear Programming)

Analysis of 10 variables (LP I) or 40 variables (LP II).

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $100 (LP I); $220 (LP II)

☐ Matrix Operations, Inversion, Linear Equations and Eigenvalues

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $130

☐ Non-Linear System of Equations

Solves for system with no singularities using up to 16 equations.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $80

☐ Polynomial Regression

Produces polynomial fit for data set and up to tenth order using least squares method.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $80

☐ Runge-Kutta 4th Order Differential Equations

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $100

COMPUTING RESOURCE CENTER

☐ STATA, STATA/Graphics

Statistics and data analysis. Creates, sorts, appends and merges data sets. Calculates univariate statistics, correlations and cross-tabulations. Multiple regression includes OLS, weighted, 2-stage least squares and instrumental variables. Labels variables/values. Offers interactive analysis graphics, multiple-imaging, overlaying of images and pie/bar charts.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $195-$395

CONCEPTUAL SOFTWARE, INC.

☐ Prodas/Statistics

Handles descriptive statistics, regression statistics, variance analysis, multivariate analysis, discriminant analysis and scoring. Contains equivalents to 23 SAS procedures with SAS-like syntax. Integrates with PRODAS/DATABASE.

IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $420

CONSORTIUM SOFTWARE

☐ ABC

Explanatory text precedes each request for command and supplies data entry. Writes results of any procedure or of an entire session to a disk file or printer.

IBM PC ☐ 256 KB req. ☐ Copies sold: 350 since 1982 ☐ Cost: $200

CORE ANALYTIC, INC.

☐ 4Cast/2; 4Cast/2X

Performs statistical forecasts of sales, earnings, market demand or inventories variables. Includes presentation graphics. Handles trending, curve fitting, stepwise, multiple regressions and model simulations analysis methods. Includes command language/interpreter, calculator, calendar and report generator. 4Cast/2X includes Census X-11 Seasonal Decomposition module.

IBM PC, XT, AT ☐ 384 KB req. ☐ Cost: $350 (4Cast/2); $595 (4Cast/2X)

☐ 4CX11
PC version of Bureau of Census' X-11 seasonal adjustment statistical program. Includes multiplicative decomposition, quarterly/monthly analysis, adjustable sigma limits for removing extremes and option for trading/strike day. Transports results via ASCII files to other systems. Works with 4Cast/2 for forecasting and graphical display.
IBM PC, XT, AT ☐ 256 KB req.

CRUNCH SOFTWARE CORP.

☐ CRISP (Crunch Interactive Statistical Package)
ANOVA with repeated measures, multiple and stepwise regression, crosstabulation, nonlinear regression and 8 statistical modules. Data management and data transformation features. Reads ASCII, DIF, dBASE II, III and Rbase 5000 files. Batch processor and keystroke macros.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $495

CYBERENGINEERING CORP.

☐ Cambridge ARIMA
Performs regression analysis with autocorrelated errors and variables subject to geometric lag structures. Provides iterative algorithms for computation of maximum likelihood estimators. Handles short or small samples of data.
IBM PC ☐ Cost: $75-$125

☐ CyberFit&Plot
Mathematical fitting and plotting. Outputs to daisy wheel printer, dot matrix printer or HP plotter. Calculates coefficient of determination. Allows data smoothing of first or third degree over 5 data points.
IBM PC ☐ Cost: $75

☐ Draper's Stepwise Multiple Non-Linear Regression
Allows for transformation of input data, for residual analysis, forcing regression curve through origin or some other specified Y intercept, and fitting of non-linear (power type) equations. Supports 1,800 lines of ASCII code.
IBM PC ☐ Cost: $35-$125

CYGNET TECHNOLOGIES, INC.

☐ Calculator Plus
Pop-up, printing calculator. Writes calculation totals directly into application programs.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $20

DAVELL CUSTOM SOFTWARE

☐ DCS MultiStat
Interactive user interface to multiple linear regression data analysis for scientists and engineers. Builds data models from ASCII or Lotus 1-2-3 files. Displays data and predicted values. Determines significant process variables. Optimizes operating parameters. Projects effects of changing operating conditions on products.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1983 ☐ Cost: $290

DBI SOFTWARE PRODUCTS

☐ Trajectories Plus
Transfers data to statistical module without recoding. Manipulates data base to create files, enter data and generate reports. Supports 9 linked files simultaneously with unlimited relations. Parametric and non-parametric correlations, regression analysis and ANOVAs.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $595

☐ Trajectories SPC1
Builds process control data set and charts control data set. Bar, range(s), standard deviation(s), median, individual(s), moving range, p, np, c and u charts. Provides histograms, 1-10 samples per group, 100 samples per file, pattern analysis, Cp and Cpk and Pzu and Pzl.
IBM PC ☐ 256 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $595

AT LAST: Professional Typesetting Capability For PC Users

With **PC TEX**™ — the best-selling full implementation of Professor Don Knuth's revolutionary typesetting program TEX.

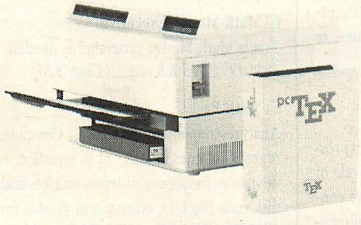
FINEST Typeset Quality Printing From:
dot matrix laser phototypesetter

$$\sum_{i=1}^{\infty} \frac{1}{i} \qquad \begin{pmatrix} a_{11} & \cdots & a_{1n} \\ a_{21} & \cdots & a_{2n} \\ \vdots & \ddots & \vdots \\ a_{m1} & \cdots & a_{mn} \end{pmatrix} \qquad \int_{-\infty}^{\infty} e^{-x^2}\,dx$$

WIDEST Range Of Output Device Drivers:

- Epson FX, LQ
- Toshiba
- Corona LP-300*
- HP LaserJet*
- Apple LaserWriter
- APS-5 phototypesetter
- Screen preview, with EGA or Hercules card

MOST COMPLETE Product Offering:



PC TEX (not copy protected) includes the following:

- Our specially written *PC TEX Manual*, which enables you to start using TEX right away.
- Custom "macro packages" that provide formats for letters, manuals, technical documents, etc.
- The LATEX document preparation system, a full-featured macro package for preparing articles, books, reports, etc., and LATEX User's Manual.
- *AMS*-TEX, developed by the *Amer. Math. Society* for professional mathematical typesetting.

Site licenses, volume discounts, and interfaces to PC Paintbrush, PC Palette, FancyFont and Fontrix are also available.

PRICED FROM ONLY $249.00!

(Printer drivers and interfaces additional.)

Laser printer, fonts & software from $2995.00

For IBM PC/XT, AT or compatible, DOS 2.0 or higher, and 512K RAM. Hard disk required for printer drivers and fonts. *HP LaserJet and Corona require additional interface boards.

For more information call or write:

Personal TEX, Inc.

20 Sunnyside, Suite H, Mill Valley, CA 94941 (415) 388-8853

This ad, with space for the photograph, produced by PC TEX. Typeset on the Epson FX80, the Corona LP-300 laser printer, and the Autologic APS-5 phototypesetter.

TEX is a trademark of the American Mathematical Society. Manufacturers' product names are trademarks of individual manufacturers.

CIRCLE NO. 307 ON READERS SERVICE CARD

☐ **Trajectories SPS**
File creation and manipulation, descriptive statistics and plots, parametric and non-parametric correlation, regression analysis, tests for mean differences and ANOVAs, test distributions, crosstabs for RxC contingency tables and qualitative variables, Monte Carlo variable distributions and multivariate analysis.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,000 since 1982 ☐ Cost: $395

☐ **Trajectories TS**
File creation and manipulation, descriptive statistics and plots, parametric and non-parametric correlations, regression analysis, test for mean differences and ANOVAs, test distributions, crosstabs for RxC contingency tables and qualitative variables, Monte Carlo variable distributions and multivariate analysis. Averages and exponential smoothing.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $495

DECISION SCIENCE SOFTWARE, INC.

☐ **ASSIGN**
Size of problem is minimum of 60 tasks/people with larger sizes available depending on memory of microcomputer. Accepts maximization or minimization problems. Stores/retrieves data sets from disk.
IBM PC ☐ Cost: $50

☐ **DYNAM**
Dynamic programming model with allowances for maximization or minimization.
IBM PC ☐ 48 KB req. ☐ Introduced: 1981 ☐ Cost: $50

☐ **LINPRO**
Implements simplex algorithm to solve linear program mathematical problems. Performs sensitivity analysis.
IBM PC ☐ 32 KB req. ☐ Copies sold: 20 since 1981 ☐ Cost: $80

☐ **MATRIX/80**
Generalized matrix manipulation operations to solve problems expressed and solved using matrix algebra.
IBM PC ☐ Introduced: 1981 ☐ Cost: $65

☐ **MULTIREG**
Performs estimates of parameters of model, of sigma, sigma squared and r-squared. Calculates 2-sided confidence limits on parameters for any alpha. Analyzes variance for significance of regression. Calculates and plots residuals. Calculates and reports pairwise multicollinearity. Performs Kolmogorov-Smirnov test.
IBM PC ☐ Cost: $95

☐ **REGRESS**
Solves problems using least squares linear regression. Data entered in any order by X, Y pairs. X and Y vectors interchangeable. Computes predicted Y-values for given X-values or confidence limits on predicted Y-values.
IBM PC ☐ Introduced: 1981 ☐ Cost: $65

☐ **SHORT/80**
Single/double precision arithmetic to solve problems of expression and solution using shortest path solution to network of directed arcs with known lengths. Detects exact machine configuration and any software. Adjusts internal memory dimensions for network storage.
IBM PC ☐ Introduced: 1982 ☐ Cost: $50

DECISION SYSTEMS SUPPORT, INC.

☐ **DSM (Decision Support Modeling)**
Integrated modeling system including multiple regression, time series; quadratic, linear, and integer programming; EOQ inventory, queueing, CVP, simulation based; ANOVA, principal components, multidimensional scaling, and multiple criteria models. Windowing capability and data sharing between spreadsheet, data base and word processing.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,055 since 1984 ☐ Cost: $295

MARCEL DEKKER, INC.

☐ **STATPAL**
Performs ANOVA with up to 5 factors in addition to interaction terms and covariates, multiple regression using model building approach, cross tabulation including chi-square, correlation, histogram and frequency distribution, nonparametric methods, descriptive statistics and transformation and management utilities.
IBM PC ☐ 128 KB req. ☐ Cost: $165

DYNACOMP, INC.

☐ **ANOVA (Analysis of Variance)**
Analyzes fixed/random factors. Sums squares and mean squares printed for both factors and interaction and error sum of squares and all F ratios. Accepts 4 levels per factor or levels not to exceed 1,024 treatment combinations in 16 Kb of core.
IBM PC ☐ 16 KB req. ☐ Copies sold: 4,000 ☐ Cost: $40-$47

☐ **Argus Perceptual Mapper**
Multi-dimensional scaling and hierarchical clustering. Accepts data as distances between pairs of objects, or as profiles of objects on set of attributes. Transforms data into 2D graph showing objects as labeled points and attributes as labeled vectors. Displays tree diagram.
IBM PC ☐ 128 KB req. ☐ Cost: $100

☐ **Basic Statistical Subroutines**
Covers binomial test, chi-square and Kolmogorov-Smirnov 1 sample, 1 sample runs test, McNemar test, sign test, Wilcoxon matched pairs signed ranks test, Walsh test, randomization test for matched pairs, Fisher exact probability test, Fisher-Tocher test, chi and test for independent samples.
IBM PC ☐ 32 KB req. ☐ Copies sold: 3,000 ☐ Cost: $100

☐ **Complex Matrix Master**
Encodes real and imaginary parts of matrix into BASIC matrix.
IBM PC ☐ 48 KB req. ☐ Cost: $40-$50

☐ **Differential Equations**
Uses addition, subtraction, multiplication, division, exponential, log and trigonometric functions and Euler, Improved Euler and Runge-Kutta methods to solve ordinary differential equations. Results output to printer or plotter.
IBM PC ☐ 48 KB req. ☐ Cost: $20

☐ **Fast Fourier Transform Master**
Performs 1,024-point single-precision real transform. Single precision and double precision available. Performs transforms in place with Hanning windowing and inverse transforms.
IBM PC ☐ Cost: $50-$58

☐ **Linear Programmer**
Method used is Khachian algorithm. Can be incorporated into other linear programming software as utility.
IBM PC ☐ 16 KB req. ☐ Copies sold: 1,000 ☐ Cost: $30-$37

☐ **Math Master Executive**
Loads Math Master programs as needed.
IBM PC ☐ 48 KB req. ☐ Cost: $20

☐ **Math Pack**
Analyzes numerical data bases. Computes and displays linear regression lines, mean, SLR equation coefficients, standard deviation, frequency distribution plots and data points. Includes disk data file I/O, editing and printer functions.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,000 ☐ Cost: $50

☐ **Matrix Master**
Addition, subtraction, multiplication, transportation, inversion, scalar operations, identity matrix creation and storage and retrieval.
IBM PC ☐ 48 KB req. ☐ Cost: $30-$38

☐ **Multilinear Regression**
Treats multivariate situations. Variables are X1. Regressed coefficients are a, b and c. Utilizes logarithm, exponential and simple default mathematics and matrix algebra or steepest descent optimization techniques. Outputs regression coefficients and their associated standard error.
IBM PC ☐ 16 KB req. ☐ Copies sold: 5,000 ☐ Cost: $25-$32

☐ **Parafit II**
Determines 10 unknown A, B, C non-linear parameters in Gaussian, exponential, damped sine wave and dual-frequency sinusoidal equations. Accepts BASIC-like or reverse Polish structures. Produces partial derivative/parameter correlation matrices, data weighting, derivative specification, Least Squares Matrix Analysis and algorithm iteration.
IBM PC, PCjr ☐ 64 KB req. ☐ Cost: $100

☐ **Poly Root Master**
Determines the roots of polynomials.
IBM PC ☐ 16 KB req. ☐ Cost: $18-$26

☐ **Polymaster**
Allows polynomial operations to be accomplished using symbolic statements.
IBM PC ☐ 16 KB req. ☐ Cost: $18-$26

☐ **Regression I**
Regression curve fitting for interactive analysis of linear and nonlinear, 1D data. Employs algorithm to determine coefficients with round-off error properties. Data sorting and plotting, fitted curves and choice of fitting functions included.
IBM PC ☐ 16 KB req. ☐ Copies sold: 6,000 ☐ Cost: $20-$27

☐ **Regression II (PARAFIT)**
Parametric least squares regression program to determine nonlinear coefficients. Employs form of modified steepest descent. Plots data fitted function and residual.
IBM PC ☐ 16 KB req. ☐ Copies sold: 6,000 ☐ Cost: $20-$27

☐ **Roots**
Determines zeroes of polynomials having real coefficients. Employs an algorithm which interactively seeks all roots simultaneously. Convergence is cubic and stable, requiring no explicit initial guesses. Accuracy is usually within 2 digits of precision of BASIC employed.
IBM PC ☐ 16 KB req. ☐ Copies sold: 500 ☐ Cost: $16-$23

☐ **SL-MICRO**
Implements frequencies, crosstabs, Pearson correlation and multiple regression. Calculates new variables from existing variables using algebraic expressions. Recode command categorizes metric variables or converts alphanumeric to numeric variables. Includes counts and percentages and multiple linear regressions.
IBM PC ☐ 128 KB req. ☐ Cost: $250

☐ **State Variables**
Solves forcing functions including constant, ramp, step, sine, wave or user specific. Results output to printer or plotter.
IBM PC ☐ 48 KB req. ☐ Cost: $20-$23

☐ **Stattest**
Performs T-tests, chi-square tests and F-tests, regression and random number generation. Calculates descriptive statistics, states hypothesis to be tested and runs test.
IBM PC ☐ 16 KB req. ☐ Copies sold: 5,000 ☐ Cost: $30-$37

☐ **Stepwise Multilinear Regression**
Variable naming, switching, addition and removal to a data file, listing of data vs fit, including differences and percent differences, correlation matrix.
IBM PC ☐ 48 KB req. ☐ Cost: $30-$33

☐ **Xtrapolator Time Series Forecasts**
Rates linear trends, exponential and geometric curves, second and third order polynomials, regressive trends, Gompertz curves, moving and double moving averages and exponential, double and triple smoothing.
IBM PC, PCjr ☐ 48 KB req. ☐ Cost: $190

EASTERN SOFTWARE PRODUCTS, INC.

☐ **BLP88**
Employs revised simplex algorithm to solve linear programming problems which restrict value of variables. Solves any combination of 510 constraints and 1,510 variables with lower and upper bounds.
IBM PC ☐ 192 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $99

☐ DLP88
Converts linear program into dual and vice versa. Inputs problems with 1,510 greater than, less than or equal to constraints in any combination and 510 variables in primal form using simplex algorithm. Features 8087 support.
IBM PC ☐ 192 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $99

☐ LP88
Employs revised simplex algorithm to solve linear programming problems with any combination of 510 constraints and 2,510 variables. Features 8087 support.
IBM PC ☐ 192 KB req. ☐ Copies sold: 1,500 since 1983 ☐ Cost: $99

☐ MILP88
General-purpose system for solving linear programs in which up to 64 variables are restricted to integer values. Evaluates 255 constraints and 1,255 non-integer variables.
IBM PC ☐ 192 KB req. ☐ Copies sold: 1,000 since 1984 ☐ Cost: $99

ECOSOFT, INC.

☐ Microstat
Transformations include recode, add, subtract, multiply, divide, reciprocal, log, natural log and antilog, exponential, linear transformation, adding any number of variables to create new variable and random number generator. Hypothesis testing, ANOVA, regression, time series and correlation analysis.
IBM PC ☐ 64 KB req. ☐ Copies sold: 5,500 since 1978 ☐ Cost: $375

ELECTRONIC COURSEWARE SYSTEMS, INC.

☐ Simple CALC
Computer calculator with operations in sequential steps. Executes addition, subtraction, multiplication, division, squares and square roots. Four variables available.
IBM PC ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $30

EXEC*U*STAT, INC.

☐ Advanced Software for Today's Executives
Routines for basic plotting, descriptive methods, estimation, forecasting, time series analysis, regression and financial calculation. Produces line, scatter and time sequence plots, line, bar and pie charts, histograms and 3D graphics. Accesses dBASE and Lotus 1-2-3. Expert Key explains results in English.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 500 since 1985 ☐ Cost: $495

THE FUTURES GROUP

☐ Statplan III
Supports basic statistics, correlation analysis, ANOVA, multiple regression analysis, autocorrelation analysis, curve fitting, exponential smoothing, and cross tabulation. Exchanges data with spreadsheet and data base programs.
IBM PC, XT, PCjr, Portable ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $149

GEN/COMP, INC.

☐ 3521 Data Distribution Software
Matches best fitting statistical distribution to user-supplied data. Performs parameter fitting, goodness-of-fit testing, random number generation and pdf plotting superimposed on histograms of user data. Handles normal, binomial, log-normal, beta, asymptotic range and linear failure rate distributions.
IBM PC, XT, AT ☐ 96 KB req. ☐ Introduced: 1985

GRYPHON MICROPRODUCTS, INC.

☐ dBRx - The dBASE II Math/Stat Program
Reviewed Jun 1984 p. 80.
Adds trigonometric, logarithmic, square root, exponentiation and string functions including BTRIM pack and nospace to dBASE II with seven to nine digits of precision.
IBM PC ☐ 48 KB req. ☐ Copies sold: 200 since 1982 ☐ Cost: $150

☐ dBRx/87 - The dBASE II 8087 Math/Stat Program
Expands functions of dBASE II to include scientific notation and statistical and mathematical capabilities with 8087 chip. Exponentiation, logarithm, sine, cosine, arc tangent, add, subtract, multiply, divide, compound interest and annuity calculations with 18 digits of precision.
IBM PC ☐ 96 KB req. ☐ Introduced: 1984 ☐ Cost: $150; $300 (with 8087 chip); $450 (with 80287 chip)

☐ dBRxIII
Performs trigonometric, financial, hyperbolic and random number functions on dBASE III files. Accesses functions in machine language form from dBASE using RUN command, with same syntax structure as dBASE. Error trapping.
IBM PC ☐ 384 KB req. ☐ Introduced: 1985 ☐ Cost: $99

HEM DATA CORP.

☐ Snap-FFT (Fast Fourier Transform)
Reads data from HEM's Snapshot file and converts it to frequency domain using Fast Fourier Transform (FFT). Calculates and plots amplitude and phase of up to 4 channels, transfer function, amplitude ratio and phase shift.
IBM PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $295

HOUSEWRIGHT SOFTWARE, INC.

☐ ESTI*MAKER
Estimating tool. Stores over 30,000 items and costs. Performs calculations in cost estimating formulas and line item estimates. Recalculates estimates with indicated changes.
IBM PC

HUMAN SYSTEMS DYNAMICS

☐ PC ANOVA
Calculates 1- to 5-factor ANOVA with randomized, repeated measures or mixed designs. Handles randomized complete blocks, latin square, ANOCOVA, nonparametric analyses and post ad hoc tests. Accepts Lotus 1-2-3 or VisiCalc DIF files or ASCII files from other sources.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $200

☐ PC Statistician
Statistics with DBMS for professional researcher. Designs, counts, searches, sorts, reviews, edits, ranks, indexes and reorganizes files. One- to 5-way cross tabulation, ANOVA, regression analysis and parametric and nonparametric tests. Accepts Lotus 1-2-3 and VisiCalc files.
IBM PC ☐ 256 KB req. ☐ Copies sold: 2,200 since 1983 ☐ Cost: $300

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ ACRITH (High-Accuracy Arithmetic Subroutine Library)
IBM no. 5664-185; 5665-337; 5666-320. Routines for solving numerical analysis problems. Evaluates arithmetic expressions, polynomials, zeros of polynomials, linear equations, matrix inversion, linear optimization, eigenvalues, eigenvectors, vector operations, scalar product and matrix multiplication.
IBM XT/370, AT/370

IBM PERSONALLY DEVELOPED SOFTWARE

☐ Personal Scientific Calulator
IBM PDS no. 6276-513. Functions range from balancing checkbooks to solving math problems involving complex numbers, trigonometric functions and coordinate conversions. Displays full screen of active stack and memory areas for variables. Designates fixed decimal or scientific notation. Color EGA support.
IBM PC, XT, AT, Portable PC, PCjr, 3270-PC ☐ 128 KB req. ☐ Cost: $25

☐ Scientific Package
IBM PDS no. 6276-548. Consists of Personal Scientific Calculator, STATLIB 1 and STATLIB 2.
IBM PC, XT, AT, Portable PC, PCjr ☐ 192 KB req. ☐ Cost: $195

☐ STATLIB 1
IBM PDS no. 6276-501. Provides descriptive statistics, hypothesis testing, confidence intervals, ANOVA, quality control, reliability, linear and non-linear regression and financial analysis. Incorporates numerical integration of normal, t, f and chi-square distributions. Color EGA support.
IBM PC, XT, AT, Portable PC ☐ 192 KB req. ☐ Cost: $150

☐ STATLIB 2
IBM PDS no. 6276-539. Provides random number generators, multivariate statistics, time series analysis and non-parametric statistics. Requires IBM 8087/80287 math co-processor. Color EGA support.
IBM PC, XT, AT, Portable PC ☐ 192 KB req. ☐ Cost: $150

IDEAL SYSTEMS

☐ Advancestat
Includes multiple regression, three-way ANOVA and unequal sizes for one-way ANOVA with FMAX, Bartlett's and other tests.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $195

☐ Introstat
Statistics with tests suited to education, research and business.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 500 since 1981 ☐ Cost: $125

IMSL, INC.

☐ Library
Collection of 540 subroutines. ANOVA, basic statistics, categorized data analysis, differential equations, quadrature and differentiation, eigensystem analysis, forecasting, generation and testing of random numbers, linear equations, nonparametric statistics, regression analysis, sampling and utility functions.
IBM RT PC ☐ Copies sold: 3,037 since 1971

☐ LP/PROTRAN
Defines problems by specifying objective functions, constraints and bounds. Uses algorithm suited to large sparse problems. For operations research, agricultural economics, econometrics, statistics, management and manufacturing.
IBM RT PC ☐ 384 KB req. ☐ Copies sold: 38 since 1983

☐ Math/PC-Library
Differential equations, integration, eigensystem analysis, error and gamma functions, interpolation, approximation, smoothing, linear algebraic and nonlinear equations, optimization, vector/matrix arithmetic and sorting.
IBM PC, XT, XT/370, AT/370, Portable PC ☐ 128 KB req. ☐ Copies sold: 240 since 1985

☐ Math/PROTRAN
Approximation, smoothing, data fitting, differentiation, fast Fourier transforms integration, interpolation, differential equations, eigenvalues, linear/nonlinear systems of equations and nonlinear least squares problems.
IBM RT PC ☐ Copies sold: 125 since 1982

☐ SFun/Library
For applied mathematics, physics, engineering and other technical fields. Eighty special subroutines for fundamental, elementary, trigonometric, hyperbolic, gamma, error and bessel functions and exponential integrals.
IBM PC, XT, AT, XT/370, AT/370, RT PC, Portable PC ☐ Copies sold: 47 since 1984 ☐ Cost: $440

☐ Stat/PC-Library
Basic statistics, regression and time series analysis, ANOVA, non-parametric statistics, goodness-of-fit tests, forecasting, random number generation, probability distribution and their inverses.
IBM PC, XT, XT/370, AT/370, Portable PC ☐ 128 KB req. ☐ Copies sold: 158 since 1985

☐ Stat/PROTRAN
Basic statistics, frequency, cross tabulation, correlation, regression analysis, ANOVA and random number generation. Manages and analyzes information and prints results.
IBM RT PC ☐ Copies sold: 60 since 1982

INSTITUTE OF INDUSTRIAL ENGINEERS

☐ Statistical Analysis
Features Mann-Whitney Test, statistical data analysis, polynomial curve fit, and distribution fitting using Kolmogorov-Smirnov Statistical Test.
IBM PC, XT ☐ 48 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $175

ISTEL, INC.

☐ SEE WHY
Defines and manipulates elements of simulation. Routines for display enhancements, automatic or user-directed statistics collection, sampling from theoretical or user-defined distributions, and construction of model interactions. Interactions for simulation run control, inspection and change.
IBM PC, AT ☐ 512 KB req. ☐ Copies sold: 140 since 1983 ☐ Cost: $31,700

JOINER ASSOCIATES, INC.

☐ Jass
Designs and analyzes 2-level factorial experimental designs applicable to laboratory research, production line or marketing. Graphs/displays results in data collection forms, alias tables, plots of effects, normal/dot/square/cube/interaction/scatter plots, residuals, fitted values and cell statistics.
IBM PC ☐ 512 KB req. ☐ Cost: $895 and up

KOCH SOFTWARE INDUSTRIES, INC.

☐ PC-Pocket-Calc
Calculator emulator with math and memory. Blocks off and embeds total numbers in documents.
IBM PC ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $50

LIONHEART PRESS, INC.

☐ Business Statistics
Sampling, performance characterization by comparision to standard mean or variance, quality control, product reliability, regression, forecasting, parametric/non-parametric significance testing and business experiments design.
IBM PC ☐ 64 KB req. ☐ Copies sold: 350 since 1984 ☐ Cost: $145

☐ Decision Analysis Techniques
Bayesian probability, hypothesis testing, experimentation, mathematical programming, multiple objectives, decision tables and trees, prior and posterior probabilities and ELECTRE techniques.
IBM PC ☐ 64 KB req. ☐ Copies sold: 350 since 1985 ☐ Cost: $110 and up

☐ Experimental Statistics
Quantitative statistics including uncertainties, sampling and normal distribution, hypothesis testing, significance levels, calculation of Type I and II errors, ANOVA, experiment design, linear and multi-linear regression and covariance.
IBM PC ☐ 64 KB req. ☐ Copies sold: 800 since 1984 ☐ Cost: $145

☐ Exploratory Data Analysis
Descriptive statistics amassed by median polish, resistant lines, rootgrams and coded tables. Graphing of box and whisker plots based on stem and leaf techniques.
IBM PC ☐ 64 KB req. ☐ Copies sold: 275 since 1985 ☐ Cost: $75 and up

☐ Linear and Non-Linear Programming
Monte Carlo technique as applied to linear/non-linear programming. Calculations with number of independent variables and constraints. General programs cover linear, quadratic and non-linear programming. Separate programs cover problem assignment, distribution and transport.
IBM PC ☐ 64 KB req. ☐ Copies sold: 450 since 1984 ☐ Cost: $95 and up

☐ Monte Carlo Simulation
Ratio analysis of situation in which user must allow for seemingly unpredictable occurrences. Generates random numbers according to normal, log-normal, Pareto's, uniform, binomial, negative binomial and Poisson distributions. Provides statistical analysis and chi-square goodness-of-fit facility.
IBM PC ☐ Copies sold: 300 since 1984 ☐ Cost: $125 and up

☐ Multivariate Analysis
Reviews major techniques of multivariate analysis. Topics include correlation analysis, factor analysis, component analysis and the study of multiple populations.
IBM PC ☐ Cost: $150

☐ Optimization
Optimization by experiment, sampling, linear and goal programming, simulation and user-defined functions.
IBM PC ☐ 64 KB req. ☐ Copies sold: 400 since 1985 ☐ Cost: $110 and up

MATHEMATICAL SOFTWARE CO.

☐ IMP (Interactive Multiple Prediction)
Multiple, linear regression program. Accepts as input a data-set made up of one criterion variable and M-1 predictor variables. Output is multiple-regression formula used for making predictions.
IBM PC, XT, AT ☐ 48 KB req. ☐ Introduced: 1985 ☐ Cost: $40-$60

☐ Multiple Factor Analysis
Analyzes new primary data from surveys or multiple-variable measurements and intercorrelation matrices in journal articles. Accommodates different rotational schemes on factor-loadings or those created by other researchers. Allows 10 refactorings. Outputs F x M matrix and M communalities.
IBM PC, PCjr, XT, AT ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $60-$70

☐ Son of Multiple Factor Analysis
Computes factor-score profiles for each case on F factors. Searches for types among the cases using several profile-similarity, clustering techniques. Computes the factor-loadings of a new variable and/or the factor-score profile for a new case.
IBM PC, XT, AT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $60-$80

MATHSOFT, INC.

☐ MathCAD
Creates and edits equations. Calculates and displays results as single number, plot or table. Adds text to screen. Prints integrated document.
IBM PC ☐ 256 KB req. ☐ Cost: $189

THE MATRIX CALCULATING ENGINE (MACE), INC.

☐ Statistician's MACE
Statistics. Multiple regression, correlations, several ANOVAs, nonparametric tests, descriptive stats and data transformations. Data from keyboard or files created by spreadsheet, data base and word processors.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $255

MEDIAX INTERACTIVE TECHNOLOGIES

☐ Microscale
Analyzes surveys, questionnaires, market research, productivity reports, behavioral data and statistical input.
IBM PC ☐ 256 KB req.

MICARY ELECTRONICS, LTD.

☐ Mega Math
Numeric calculations including matrix multiplication and transpose, Fast Fourier Transform, convolution, linear equations and vector, scalar and transcendental operations.
IBM PC, XT, AT ☐ Cost: $99-$150

MICRO FOCUS, INC.

☐ CO-Math
Mathematical functions library. Exponentiation, power, square root, natural log, log 10, sine, cosine, tangent, arcsine, arccosine, arctangent and arctangent XY. Integrates with Micro Focus' CO-Graphics and programming products.
IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $200

MICROSOFT CORP.

SEE AD ON PAGES 284/285/286/287/288

☐ MuMATH Symbolic Mathematics Package
Algebra, trigonometry, calculus, integration, differentiation and transcendental functions. Handles low and high level symbolic math operations. Loads only portions of muMath package needed.
IBM PC ☐ 64 KB req. ☐ Introduced: 1980 ☐ Cost: $250

MICROWAY, INC.

SEE AD ON COVER 3

☐ MatrixPak
Employs 8087 coprocessor to achieve floating point throughput. Element add, subtract, multiply and divide. Swap and divide rows, Inverse/Gaussian elimination, identity, transpose and list matrices, matrix scaling, row and column operations and determinants. Callable from MS FORTRAN, RM FORTRAN and 87BASIC.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 2,525 since 1984 ☐ Cost: $150

MINITAB, INC.

☐ Data Analysis Software
Descriptive statistics, plotting histograms multiway tables, regression with residual analysis, diagnostics and step-wise procedures, ANOVA, non-parametric methods, exploratory data and time series analysis and matrix operations. Suitable for engineers, social and physical scientists, educators, managers and students.
IBM PC, XT, AT ☐ Copies sold: 2,500 since 1972

MINUTEMAN SOFTWARE

☐ GPSS/PC Version 2
Implements mainframe simulation language GPSS. Five graphics windows and animation capability. Modifies real-world systems.
IBM PC, XT, AT ☐ 320 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $995

MORGAN COMPUTING CO., INC.

☐ MLR (Multiple Linear Regression)
For business and social sciences. Analyzes relationship among set of variables. Handles 10 variables and 999 observation sets. Produces usual statistical measure. Allows for sensitivity analysis.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $100

MSS-MICROCOMPUTER STATISTICAL SYSTEMS

☐ MSS (Microcomputer Statistical System)
Performs balanced and unbalanced ANOVA with up to 20 main effects, multiple linear regression (up to 20 regressors), ANOCOVA, discriminant analysis, descriptive univariate statistics, hypothesis testing, plotting, polynomial regression, correlation and covariance matrix and data management.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3 since 1985 ☐ Cost: $199

NCSU SOFTWARE (NORTH CAROLINA STATE UNIVERSITY)

☐ Psycho-Stats
File-oriented statistical system. User can perform routines on data bases that include up to 30 variables with up to 400 observations per variable. Features field manipulation, descriptive statistics, frequencies, t-tests, correlation, multiple regression, up to 3-way ANOVA and nonparametric tests.
IBM PC ☐ 128 KB req.

NH ANALYTICAL SOFTWARE

☐ Statistix

Statistical analysis and data manipulation. Data management, probability, goodness of fit association testing, randomness/normality testing, file management, summary statistics, 1, 2 and multi-sample testing, linear modeling, residual and ANOVA/ANOCOVA functions.

IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $75

NIGHTHAWK COMPUTER SCIENCES, INC.

☐ dInline Calculator

Provides calculator capabilities to dBASE II and dBASE III applications.

IBM PC ☐ Copies sold: 20 since 1984 ☐ Cost: $35

NORTHWEST ANALYTICAL, INC.

☐ Statpak

Data file creation/manipulation, probability calculations, reporting, single variable statistics, regression, correlation, nonparametric statistics, distribution functions, means testing, chi-square analysis, crosstabulation, contingency tables and ANOVA. Adds presentation graphics to control charts and analytical routines. Presentation graphics. Interfaces with spreadsheets and data bases.

IBM PC ☐ 64 KB req. ☐ Copies sold: 12,000 since 1980 ☐ Cost: $395-$495

NUMBER CRUNCHER STATISTICAL SYSTEMS

☐ NCSS

Regression analysis, ANOVA/ANOCOVA, principal components factor, cluster, discriminant, time series, contingency tables, T-tests, scatter, quantic and box plots, transformation and variables, cases or missing values. Spreadsheet-like data entry/import from ASCII files.

IBM PC ☐ 256 KB req. ☐ Copies sold: 2,500 since 1980 ☐ Cost: $79

P-STAT, INC.

☐ P-STAT

Relational data base used by educational, commercial and government installations for census/demographic analysis, biometric research, systems performance and administrative management. Conversational processing with immediate error correction and file management. Reads DIF and ASCII files.

IBM XT, AT ☐ Copies sold: 500 since 1964

PAB SOFTWARE, INC.

☐ Complex Matrix Master

Provides extension to BASIC ROM which calls standard matrix operation from BASIC. Addition, subtraction, multiplication, transpose, inverse, identity and scalar arithmetic operations. Sets matrix to constant. Single/double precision lead files available.

IBM PC ☐ 48 KB req. ☐ Copies sold: 4 since 1984 ☐ Cost: $35

☐ FFT Master

Forward/inverse, with/without Hanning weighting Fast Fourier Transform (FFT) analysis. Double precision for exacting analysis, single precision for normal analysis and scaled integer with sine-cosine table. Transforms performed in place. Size of each FFT limited only by available RAM.

IBM PC ☐ 48 KB req. ☐ Copies sold: 35 since 1983 ☐ Cost: $25

☐ Math Master Executive

Loads Math Master Programs as needed.

IBM PC ☐ 48 KB req. ☐ Copies sold: 35 since 1984 ☐ Cost: $25

☐ Matrix Master

Provides extension to BASIC ROM which calls standard matrix operations from BASIC. Addition, subtraction, multiplication, transpose, inverse, identity and scalar arithmetic operations. Sets matrix to constant. Single/double precision lead files available.

IBM PC ☐ 48 KB req. ☐ Copies sold: 80 since 1983 ☐ Cost: $25

☐ Poly Master

Array form arithmetic and standard polynomial operations. Uses subroutines callable from BASIC that provide extension to BASIC ROM. Addition, subtraction, multiplication, division, greatest common denominator, integral, evaluate and setting 1 polynomial equal to another.

IBM PC ☐ 48 KB req. ☐ Copies sold: 30 since 1984 ☐ Cost: $25

☐ Poly Root Master

Enhances normal BASIC by providing polynomial root computation command. Finds multiple complex roots. Command syntax is 10 CMD ROOT A=R(B) and I(C) using (D). Assumes working knowledge of polynomial roots. Interfaces with PAB Software's Math Master Executive.

IBM PC ☐ 48 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $25

PARAGON COURSEWARE

☐ Savant Tools: Infinite Precision Math IPMath

Includes documented source Pascal routines which solve equations, and do numerical integration, all to any accuracy up to 32,727 digits.

IBM PC ☐ 256 KB req. ☐ Copies sold: 65 since 1985 ☐ Cost: $85

☐ Savant Tools: Real Precision Math: RPMath

Includes documented Pascal (source code) routines which solve linear, non-linear and differential equations, do least squares fits, numerical integration, and complex arithmetic.

IBM PC ☐ 64 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $55

P. C. STAT, INC.

☐ ASAP Curve Fitting with Graphics

Least squares curve fitting of 7 curve types. Regression formula and coefficients and standard error estimates. Stepwise multiple regression fits curve of 10 independent variables. Curves show actual points, regression and selected confidence ranges.

IBM PC, XT, PCjr ☐ 64 KB req. ☐ Cost: $80

☐ ASAP Statistics & Graphics

Least squares and multiple regression curve fit, descriptive statistics, chi-square, student T-test, ANOVA, covariance, correlation, distribution and 3-way and binomial distribution analyses. Includes P.C. Stat's Business Graphics package.

IBM PC, XT, PCjr ☐ 64 KB req. ☐ Cost: $225

☐ Statistical Analysis Package

One hundred statistical analysis routines, graphics, DBMS and report generation. Handles large amounts of numeric data in relational environment. Produces scatter, point, line, pie, stacked area, high-low-close, multiple/stacked/horizontal bar and X-Y scatter, line and bar charts.

IBM PC, XT, PCjr ☐ 128 KB req. ☐ Cost: $800

☐ Statistical Package II

One hundred statistical analysis routines and file maintenance. Curve fitting, ANOVA, inference, random sample generation, time series and distribution analysis, data conditioning and character graphics.

IBM PC, XT, PCjr ☐ 128 KB req. ☐ Cost: $550

PEERLESS ENGINEERING SERVICE

☐ All Purpose Calculator

Expresses 64 characters. Syntax checking returns help messages. Provides six constants, 20 memories and 38 functions. Displays source expression at any time. Subtotal Mode displays and prints solution to current expression running subtotal. Includes paper tape option using system printer.

IBM PC, XT, AT, PCjr ☐ 64 KB req. ☐ Copies sold: 1,000 since 1985 ☐ Cost: $30

PENTON SOFTWARE, INC.

☐ QualityAlert

Enables users to analyze process capability, construct different types of control charts and determine when quality deviations occur. Designed for both attribute and variable data. Outputs numerical data, statistics, and graphic display on the monitor or as optional hard copy on a graphics printer.

IBM PC, XT ☐ 192 KB req. ☐ Copies sold: 1,000 since 1983 ☐ Cost: $795

☐ Statpro

Data analysis integrating statistical techniques with graphics and data base management capabilities. Supports Descriptive, Regression, ANOVA, Time Series and Multivariate modules. Provides multi-color graphics including scatter plots, histograms and regression plots, box plots, dendrograms, and function plots.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 2,000 since 1983 ☐ Cost: $795

PHOTON SOFTWARE

(division of Care Computer Systems)

☐ Ten Key

Memory-resident desktop calculator with windowing, addition, subtraction, multiplication, division, percentage calculations, constants, decimal precision to 15 places and movable, printable and scrollable tape display.

IBM PC, XT ☐ 16 KB req. ☐ Copies sold: 30,000 since 1984 ☐ Cost: $38

PROGRAMMED PRESS

☐ Statistical Software for Forecasting

Handles exponential smoothing. Includes secular trend and projections, growth rate and projections, monthly and quarterly seasonal indexes, monthly and quarterly link relatives, time series and quarterly time series decomposition and multiple correlation regression.

IBM PC, XT, AT, PCjr ☐ 48 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $120

QUALITY SOFTWARE ENGINEERING, INC.

☐ Statistical Quality Control Package

Produces single and multiple samples per interval. Allows 1,000 intervals per data base and 5 sample ID fields with carryover for repetitive items. Provides control charts and summary data for standard deviation, population distribution and probability.

IBM PC ☐ 256 KB req. ☐ Cost: $495

QUANT SYSTEMS

☐ Statistician

Multiple regression, time series analysis, descriptive statistics, transformation, survey research, non-parametrics, X-Y plots, ANOVA, random samples, hypothesis testing and data base search and sort.

IBM PC ☐ 128 KB req. ☐ Copies sold: 1,000 since 1978 ☐ Cost: $350

QUANTITATIVE TECHNOLOGY CORP.

☐ Math Advantage

Provides 176 subroutines used in development of programs for engineering and scientific applications such as mechanical CAD, large-scale simulation and signal and image processing.

IBM PC ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $495-$15,000

THE QUANTUM CO.

☐ Galileo

Statistical process control system. Creates charts using data from keyboard, ASCII files, spreadsheets or gauges. Provides color graphics, keystroke logging, data manipulation, statistics, sampling plans, process evaluation, frequency curves and data capture.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $995

QUESTIONNAIRE SERVICE CO.

☐ SL-MICRO, Statistical Language for Microcomputers
Processes up to 32,600 cases with 200 variables. Includes frequencies with statistics, crosstabs, anova, Pearson correlation, multiple regression, data editor and data transformations.
IBM PC ☐ 48 KB req. ☐ Copies sold: 400 since 1982 ☐ Cost: $250

RAPID IMAGING SOFTWARE

☐ FFT87
Fast-Fourier Transform (FFT). Interfaces to 8 languages. Performs forward and inverse transforms with or without normalization. Requires 8087 Co-processor chip.
IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 80 since 1984 ☐ Cost: $125

☐ Imaging Toolkit
Imaging software for IBM PCs with the 8087 numeric coprocessor chip and a high performance graphics board. Expected applications are in digital scene simulation of topographic data and 3D image reconstruction for medical data.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $799

RJL SYSTEMS

☐ Disk Calculator
Emulates a desk-top calculator. Performs exponentiation and present and future value computations. Displays or prints results. Result fields to 18 digits.
IBM PC ☐ 128 KB req. ☐ Cost: $29

ROSEN GRANDON ASSOCIATES, INC.

☐ A-STAT
Statistical analysis with DBMS. Performs frequency distributions, T-tests, ANOVA, crosstabulations, correlations, scattergrams, histograms, multiple regression, factor analysis, file sorting, aggregation and sub-group analysis. Includes data transformation language and report writer with break and sum fields.
IBM PC, PCjr ☐ 48 KB req. ☐ Copies sold: 1,000 since 1978 ☐ Cost: $175-$200

SAS INSTITUTE, INC. (NC)

☐ SAS/IML Software
Interactive programming facility for data analysis and manipulation. Operates on entire matrices of values. Performs common mathematical and matrix operations. Transcribes formulas from matrix algebra notations into SAS/IML statements. Requires Base SAS Software.
IBM PC, XT, AT, XT/370, AT/370/VM/PC ☐ 512 KB req. ☐ Copies sold: 242 since 1985

☐ SAS/Stat Software
Statistical analysis system. Includes pre-written procedures for regression analysis, ANOVA, common factor and component analyses, discriminant analyses and scoring. Interactive windowing enables users to edit and manage I/O and messages. Requires Base SAS Software for PCs.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1986

SCIENTIFIC COMPUTER APPLICATIONS CORP.

☐ DCNTREE
Decision tree analysis generates tables of net present value for every path. Tables show path and calculated expected return for each decision node. Computes returns as net present values when discount rates and time delays are varied.
IBM PC ☐ 128 KB req. ☐ Copies sold: 3 since 1982 ☐ Cost: $200

☐ MUR
Multiple regression can be used with Lotus 1-2-3. Determines relationship between independent variables and dependent variable. Output is stepwise development of regression equation. Enters 10 variables. Variance-ratio statistics can be set for independent variable entry/exit at any step.
IBM PC ☐ 128 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $50

SCIENTIFIC COMPUTING ASSOCIATES

☐ Statistical System
Forecasting and time series analysis. Includes exponential smoothing, Box-Jenkins ARIMA, intervention, transfer/simultaneous transfer function and vector ARMA modeling. Performs linear regression, variance analysis, descriptive statistics, plots and histograms, data manipulation, matrix operations, analytic functions and distribution/model simulation.
IBM PC, XT, AT ☐ Cost: $595

SCILAB, INC.

☐ ANCOM/TFD
Planned and post hoc contrast, trend and simple effects analyses, multiple comparison tests, ANOVA on complete and incomplete factorial designs and orthogonal and nonorthogonal contrasts.
IBM PC ☐ 48 KB req. ☐ Copies sold: 50 ☐ Cost: $100

JIM SERWER

☐ SlipStick
Calculator simulator. Computes roots of a polynomial, factorials, gamma function, normal distribution function, chi-square distribution function, random number generators, cross products, elliptic integrals, Jacobian elliptic functions and matrix operations. Programs can be up to 145 instructions long.
IBM PC, XT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $200

SHADE INFORMATION SYSTEMS, INC.

☐ Wisard
Combines AI with statistical forecasting. Performs future projections based on user-supplied historical or time-series information. Includes exponential smoothing and linear regression forecasting. Calculates seasonal adjustments. Supports industry-standard and character-based graphics. Exchanges data with Lotus 1-2-3 spreadsheets.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $495

SIGNIFICANT STATISTICS

☐ SIGSTAT
Scatter plots, histograms, univariate and multivariate ANOVA and ANOCOVA, time series, multi-dimensional scaling and log-linear. Performs regression, factor, and discriminant analyses; canonical correlations, crosstabulations and quality control charts. Handles data transformations. Supports 8087 and ASCII files.
IBM PC ☐ 256 KB req. ☐ Copies sold: 500 since 1983 ☐ Cost: $595

SOFT LAB, INC.

☐ Calc Aid
Multiple function tape calculator. Allows all amounts to be correctable and subtotals to be recalculated. Amounts inserted or deleted anywhere in tape. Tapes may be output to disk to be printed later or reloaded for correction. 10 memory amounts available.
IBM PC ☐ 256 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $50

SOFT WAREHOUSE, INC.

☐ muMATH-83
Interactive symbolic math system. Calculates arithmetic through calculus, trigonometry, exact rational arithmetic, differential equations and matrix algebra for scientists, engineers and educators.
IBM PC ☐ 64 KB req. ☐ Copies sold: 6,000 since 1979 ☐ Cost: $300

SOFTEXT PUBLISHING CORP.

☐ Basic Business Statistics
Analyzes data sets/types and descriptions. Basic descriptors/mean, standard deviations, standard error, probability, estimation, hypothesis testing, statistical inference, correlation and regression analysis.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $95

☐ Statistical Analysis Software System
Descriptive, parametric and non-parametric statistical routines. Data handling and foreign file reading. Forecasting. Graphics.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $295

THE SOFTWARE TOOLWORKS

☐ MathPak
Executes matrix multiplication for Toolworks C compiler.
IBM PC ☐ Copies sold: 200 since 1985 ☐ Cost: $30

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ Interactive Statistics
Five data management programs analyze data sets which contain extensive file handling and data manipulation as well as data analysis programs. Supports ASCII, systems data and matrix files. Runs programs independently.
IBM PC, XT, AT ☐ Cost: $595

☐ Meta Count
Provides integrated operating environment for analysis of user-defined problems. Offers 32 statistical tests for looking at relationships within data portrayed in spreadsheet. Provides user visual impact of discoveries.
IBM PC, XT, AT ☐ Cost: $395

☐ MM Datafit
Generalized data fitting program. Fits any function to any data. Uses least squares matrix analysis algorithm without availing itself of second partial derivatives. Determines linear parameters in single iteration. Nonlinear parameters may require several iteration. Provides MM Fourier module.
IBM PC, XT, AT ☐ Cost: $99

☐ Statistical Design Analysis System
Provides method for analyzing various proposed statistical designs from standpoint of Alpha and Beta or Error I and Error II for t-test, ANOVA, regression and correlation, contingency and chi-square, and analysis of proportions. Examines alternative assumptions regarding type of distributions of sampled data.
IBM PC, XT, AT ☐ Cost: $99

☐ STATPLOT plus
Computes simple regressions between 2 arrays of data and plots results. Plots up to 1,000 points with polynomial regressions of orders 1-20. Reports include scatter plot, smooth plot, plot of residuals and regressions statistics report.
IBM PC, XT, AT ☐ Cost: $95

SOUTHWEST EDPSYCH SERVICES, INC.

☐ Cactus Plot
Plots linear, quadratic, exponential, logarithmic and trigonometric functions. Evaluates $y=f(x)$ for any value of x. Automatic or manual scale of axis. Reduces or expands graphs. Locates definite integral and shades area under curve. Obtains tables of values. Prints graph and saves to disk.
IBM PC ☐ Cost: $63

SPSS, INC.

☐ PC+
Statistical analysis and reporting system. Provides matching, merging and condensing file manipulation tasks and recoding, transforming, sampling and weighting data manipulation tasks. Supports descriptive, frequency, crosstabular, variance analysis, hypothesis testing regression and correlation procedures. Includes full-screen editor and report generator.
IBM PC, XT, AT ☐ 384 KB req. ☐ Introduced: 1985 ☐ Cost: $795

☐ PC+ Advanced Statistics
Option to PC+. Performs analyses. Includes MANOVA, discriminant, factor, hiloglinear, cluster and quickcluster procedures. Saves/adds cluster memberships and factor and discriminant scores to a file. Analytical plots and reading/writing of matrix material available.
IBM PC, XT, AT ☐ 448 KB req. ☐ Introduced: 1985 ☐ Cost: $295

☐ PC+ Graphics Featuring Microsoft Chart
Graphics option to PC+. Provides 45 predesigned chart formats. User can change color, pattern or font on screen, move and change size of chart components and explode pie chart segments. Allows text insertion. Creates text-only graphics and organizational charts.
IBM XT, AT ☐ 384 KB req. ☐ Introduced: 1986 ☐ Cost: $395

☐ PC+ Tables
Option to PC+. Handles multiple response data. Provides multiple tables in one display and nesting of multiple subtables in any dimension. Allows default or user-defined table layout/content formatting, statistics, labeling and titling. Includes percentages, totals and means.
IBM PC, XT, AT ☐ 448 KB req. ☐ Introduced: 1985 ☐ Cost: $295

STANFORD BUSINESS SOFTWARE, INC.

☐ Matrix 100
Performs matrix operations including multiple regression, solution of systems of equations and inversion. Single statement for each operation. Obtains condition number, determinant, regression statistics. Includes source code to solve linear programs and find eigenvalues. Requires IBM BASIC or BASICA.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $80

☐ Matrix 100 - Compiler Support
Handles matrix inversion, solution of linear equations, multiple regression, LU factors and QR factors. Obtains condition number, determinant and regression statistics. Includes source code to solve linear programs and find eigenvalues. Requires IBM BASIC or BASICA.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1985 ☐ Cost: $250

☐ Matrix 100 - FORTRAN
Library of numerically stable subroutines for multiple regression, simultaneous equations, matrix inversion, factorizations and read/write.
IBM PC ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $175

☐ Matrix 100 - 8087 Support
Handles matrix inversion, solution of linear equations, multiple regression, LU factors and QR factors. Obtains condition number, determinant and regression statistics. Includes source code to solve linear programs and find eigenvalues. Requires IBM BASIC or BASICA. Uses 8087 chip for speed.
IBM PC ☐ 128 KB req. ☐ Copies sold: 250 since 1985 ☐ Cost: $125

STATISTICAL CONSULTANTS, INC.

☐ PCNONLIN
Statistical analysis of general nonlinear regression models. Executes commands from disk or interactively. Includes library of pharmacokinetic models, addressed by model number and full screen text editor. Allows user-defined models.
IBM PC ☐ 320 KB req. ☐ Copies sold: 150 since 1984 ☐ Cost: $575 (non-academic); $350 (academic)

☐ STAN
Statistical analysis of regression and ANOVA models. Gives descriptive statistics for quantitative variables and frequency distributors for qualitative variables.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $95

STATISTICAL GRAPHICS CORP.

☐ STATGRAPHICS
Interactive data analysis and statistical graphics. Includes 2D and 3D line/surface plots, scatter plots, time sequence plots and bar/pie charts. Supports numerous graphics boards, printers and plotters.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 5,000 since 1983 ☐ Cost: $795

STATSOFT, INC.

☐ CSS/Forecast
Time series analysis and forecasting with graphics and statistical data management. Stepwise, ridge and nonlinear multiple regression. Box-Jenkins, Fast Fourier and ARIMA time series techniques.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $195

☐ CSS/pc
Windows user interface. Descriptive statistics, crosstabulation, graphics, nonparametrics, multi-factor ANOVA/MANOVA (repeated, random, nested), multiple (stepwise, ridge, nonlinear) regression, factor analysis, time series analysis, simultaneous modeling of 2 series, forecasting and multi-dimensional scaling.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $395

☐ PSYCHOSTAT-3
Multiple regression, ANOVA, ANOCOVA, graphics and data entry/editing. Bar graphs and scatterplots. Repeated measures. Simple effects. Contrasts. Unbalanced designs. Adjusted means. Up to 25 predictors per regression equation. Formatted correlation matrix.
IBM PC ☐ Cost: $99

☐ STATS-PLUS
Windows user interface. Descriptive statistics, cross-tabulation, graphics, nonparametrics, multiple regression, ANOVA/ANOCOVA (repeated measures, contrasts, and unbalanced designs), spreadsheet editor and data base manager.
IBM PC ☐ 256 KB req. ☐ Introduced: 1986 ☐ Cost: $195

STRATIX

☐ MICROBJ
Univariate ARIMA system based on Box-Jenkins philosophy. Multipurpose time series analysis and forecasting. Multi-parameter univariate models. Uses spreadsheet data files.
IBM PC, XT, AT ☐ 64 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $295

STRESS ANALYSIS ASSOCIATES, INC.

☐ Curvefit
QR algorithm that fits equations having any number of independent variable to data in two, three or four dimensions.
IBM PC ☐ 32 KB req. ☐ Copies sold: 30 since 1982 ☐ Cost: $185

SUGAR MILL SOFTWARE CORP.

☐ Stat 1 - A Statistical Toolbox
Provides full screen editor, ASCII file import, crosstabs, descriptive statistics, parametric and non-parametric t-tests and correlation procedures, OLS regression, ANOVA, ANCOVA, MANOVA and smallest space analysis. Includes statistical decision tree, on-line glossary, and statistical term reference system.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 1,200 since 1985 ☐ Cost: $30-$500

SUNSET SOFTWARE

☐ LP83/MIP83
Linear and generalized mixed integer programming system. Includes virtual memory techniques to solve large problems (300 x 600). Uses double precision floating point numbers in calculations. Accepts industry standard format MPS. Provides post-optimal analysis and presentation-quality output. Reads/writes from Lotus worksheets.
IBM PC ☐ 256 KB req. ☐ Introduced: 1982 ☐ Cost: $795-$895

SYMBIOTICS

☐ Weibull Analyses/Plot
Calculates Weibull parameters. Plots failure vs. life percentages. Provides least squares fit of Weibull equation to life data. Prints order number, median ranks, slopes and characteristic life. Hi-res color plots. Axes scaling. Supports HP7475A or Sweetpea 600 plotters. Runs under STSC's APL*Plus/PC.
IBM PC ☐ 256 KB req. ☐ Copies sold: 1 since 1985 ☐ Cost: $100

SYNERGY

☐ Cyber-MATH
Window math facility. Adds, subtracts, multiplies and divides in decimal and hexadecimal.
IBM PC ☐ 128 KB req. ☐ Cost: $35

SYNTEL

☐ Math Toolbox
Mathematical and graphical aide for scientific and engineering design. Supports sin, cos, tan, inverse, hyperbolic, logarithmic and exponential mathematical functions with integrated character and bit-map graphics. Calculates linear regression and standard deviation. Includes template and learning module.
IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Copies sold: 800 since 1984 ☐ Cost: $50

SYSTAT, INC.

☐ SYSTAT
Includes statistics, graphics and data management. Contains full screen editor, descriptive statistics, regression, ANOVA, MANOVA, time-series, nonparametrics, cross-tabulations, logit, probit, multidemensial scaling, cluster analysis and nonlinear estimation.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 8,000 since 1983 ☐ Cost: $595

THEOS SOFTWARE CORP.

☐ Definitive C
Supports floats as doubles, 13-digit precision floating point numbers, trigonometric and hyperbolic functions and natural, common and base 2 logarithms.
IBM XT, AT ☐ Cost: $395-$495

TRANSACTION SYSTEMS, INC.

☐ Advance Statistical Analysis Program
Takes user from design of experiment through final analysis and preparation of reports and displays of data and results. One hundred stat and analysis routines. Integrated numeric DBMS and business and scientific graphics.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $800

☐ Advance Statistics Program
Statistical tools. One hundred statistical routines and transformations. Includes descriptive stats, curve fitting, ANOVA, statistical inference, random samples, distributions tests, time series analysis, data transformations. Interfaces to most data bases and spreadsheets.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ Cost: $550

☐ Automatic Curve Fitting
Least squares curve fitting using 7 curve types. Regression formulas and coefficients and standard error estimates. Stepwise multiple regression fits curve of 10 independent variables to set of X and Y values.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 128 KB req. ☐ Cost: $80

☐ Automatic Statistics and Graphics
Least squares and multiple regression curve fits, descriptive statistics, covariance and correlation analysis, ANOVA, 3-variable, chi-square and distribution analysis and student T-test for normal distribution. Accepts data from VisiCalc or Lotus 1-2-3.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 64 KB req. ☐ Cost: $225

☐ **Automatic Statistics Package 1**
Least squares curve fitting, multiple regression, descriptive statistics, chi-square, student T-test, distribution tests, ANOVA, covariance, and correlation. File maintenance capabilities with business graphics. Descriptive statistics and transformations plus character graphics and data transfer between ASCII, delimited and interfaces with Lotus 1-2-3 and dBASE.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 256 KB req. ☐ Cost: $2,000

☐ **Automatic Tabulations and Variance Analysis**
Cross-tabulation and ANOVA. Data maintenance, 1- and 2-way ANOVA, two-way ANOVA with replication, 3 variable analysis, covariance, correlation and Wilcoxon ranked pairs. Character graphics and data transfer between ASCII, delimited and interfaces Lotus 1-2-3 and dBASE.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $80

☐ **Automatic Time Series Analysis**
Time series analysis routines. Data maintenance, auto-correlation, cross-correlation, fourier transform and analysis, Fast Fourier Transform, deconvolution, power spectrum, filters, moving average, cosine smoothing and exponential smoothing. Data transfer between ASCII and delimited fields. Interfaces Lotus 1-2-3 and dBASE.
IBM PC, XT, AT, PCjr, XT/370, 3270-PC, Portable PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $80

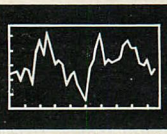
UNITED STATES SOFTWARE CORP.

☐ **FPAC Floating Point Library**
Arithmetic, trigonometric and exponentiation functions. Data conversion and floating point utility procedures.
IBM PC ☐ 4 KB req. ☐ Copies sold: 300 since 1980 ☐ Cost: $950-$1,250

☐ **80386 FPAC/DPAC Floating Point Library**
Includes 32-bit single and 64-bit double precision IEEE floating point libraries. Includes trigonometric functions (sine, cosine, tangent, arctangent), exponentiation functions, data conversion procedures (ASCII and integer to/from floating point) and floating point utility procedures.
IBM PC ☐ 3 KB req. ☐ Introduced: 1986 ☐ Cost: $950 (FPAC single precision); $1,250 (DPAC double precision)

UNIVERSAL TECHNICAL SYSTEMS

☐ **TK Solver**
Reviewed Sep 1985 p. 137; Jun 1986 p. 124.
Algebraic equivalent of electronic calculator. Determines lists of values, individual values and missing variables using direct solve or interactive technique. Exchanges known variables with unknown variables without reformulating equations. Unit conversion. Exception processing for solving linear and nonlinear equations. User-defined functions.
IBM PC, XT, AT ☐ 192 KB req. ☐ Cost: $250



WALONICK ASSOCIATES, INC.

☐ **Forecast Plus**
Time-series analysis forecasting. Features data manager, exploratory graphics and 13 forecasting techniques. Interactive and batch.
IBM PC ☐ 128 KB req. ☐ Copies sold: 300 since 1984 ☐ Cost: $595

☐ **Goodness-of-Fit**
Interactive regression. Simple linear and non-linear regression, stepwise multiple regression, probit regression, principal components analysis and multicollinearity diagnostics. Transformations using standard algebraic equations including trigonometric functions, differencing, lagging, sorting and creating dummy variables.
IBM PC ☐ 192 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $195

Improved

StatPac Gold™

POWERFUL STATISTICAL ANALYSIS AND FORECASTING SOFTWARE

StatPac Gold is the most advanced statistical analysis package available for your PC. It's been proven in business, government and academic communities for more than six years.

StatPac Gold is powerful and easy to use. A comprehensive programming language gives you complete control over your data. Perform complex transformations and sophisticated analyses with speed and accuracy. Produce customized tables and outstanding presentation-quality graphics.

StatPac Gold uses sequential ASCII files so it's compatible with most other PC software. Time-series analysis and quality control options are also available.

StatPac Gold is the best statistical analysis package you can buy—a high-quality product for professional applications.

Free brochure and technical specifications

Call Toll Free: 1-800-328-4907

WALONICK ASSOCIATES, INC.
6500 Nicollet Avenue South, Minneapolis, MN 55423
(612) 866-9022

CIRCLE NO. 290 ON READERS SERVICE CARD

☐ **StatPac (Statistical Analysis Package)**
Batch processing of frequencies, descriptive statistics, breakdown, crosstabulations, correlation and regression, stepwise multiple regression, T-tests, one- and two-way ANOVA, principal component, factor and multiple variable response. Fixed or free format ASCII files of 5,000 records and 254 columns of alpha or numeric information.
IBM PC ☐ 192 KB req. ☐ Copies sold: 5,000 since 1980 ☐ Cost: $495

☐ **StatPac Gold**
Interactive and batch processing, frequencies, descriptive statistics, breakdown, cross tabs and banners, correlation and regression, stepwise multiple regression and probit regression. Principle components and multicollinearity analyses, factor analysis, t-tests, 11 anova designs and multiple variable response. Printing, graphics, windows and command programming language.
IBM PC

WEST COAST CONSULTANTS

☐ **Curve Three-D**
Plots 3D equations of form Y= F(X,Z) or any data organized by rows or columns on scaled axes.
IBM PC ☐ Cost: $200-$250

☐ **Curve-Fit**
Calculates and plots 4 categories of best fit equations to user's data. Plots residuals and makes projection analyses.
IBM PC ☐ Cost: $100-$150

WILEY PROFESSIONAL SOFTWARE
(division of John Wiley and Sons, Inc.)

☐ **BASICA Library**
Consists of 114 pretested and precompiled mathematical and statistical subroutines. Performs tasks involving complex number operations in such areas as matrices with real or complex elements, polynomials, differential equations, ANOVA solution of equations and general statistics.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $125

☐ **C Subroutine Library**
One hundred and twelve subroutines covering statistics, regression, matrices, polynomials and interpolation.
IBM PC, XT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $175

☐ **FORTRAN Subroutine Library**
Over 14 FORTRAN subroutines and test problems. Handles matrices, polynomials, interpolation, differentiation, statistics, numerical analysis, graphics and utilities.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 700 since 1984 ☐ Cost: $175

☐ **Professional FORTRAN Scientific Subroutine Library**
Reviewed May 1986 p. 201.
Includes statistics, probability, regressions, matrices, polynomials, integration and cross tabulations.
IBM PC ☐ Introduced: 1985 ☐ Cost: $175

☐ **SurvCalc**
Statistical analysis using survival analysis/reliability theory methods. Analyzes survival data via parametric and nonparametric models.
IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $125

☐ **X-Stat**
Statistics and process design tool for scientists and engineers. Streamlines the experimental design process, raising R & D productivity.
IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ Cost: $350

THE WINCHENDON GROUP, INC.

☐ **Arima**
Uses Box-Jenkins techniques. Includes identification, estimation, forecasting, seasonal and non-seasonal models, Box-Cox transformations and centering data and differencing. Allows user to save intermediate calculations, define convergence criteria, Q-statistics, t-statistics, coefficients and mu and sse grid. Offers printer graphics.
IBM PC ☐ 48 KB req. ☐ Copies sold: 500 since 1981 ☐ Cost: $350-$450

☐ ELF-The Statistical Package
Factor analysis, stepwise discriminant analysis, stepwise regression with residuals, forecasting, crosstabulations, frequencies, histograms, scattergrams, means, standard deviations, correlation, coefficients, one- and two-way ANOVA and T-tests. Interfaces with DIF, Lotus 1-2-3, ApplePlot or card-image files.
IBM PC, XT, AT ☐ 48 KB req. ☐ Copies sold: 1,500 since 1980 ☐ Cost: $250-$350

ZEPHYR SERVICES

☐ Statcalc
Correlation and regression, binomial distribution, normal (Gaussian) distribution, Poisson distribution, chi-square distribution, student's T distribution, and data handling routine for I/O. Calculates basic parameters.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1984 ☐ Cost: $40

ZIASOFT, INC.

☐ DataStat
General statistics and data manager. Handles numeric/text data. Descriptive stats include mean, mode, median, frequency distributions, graphs, SD, SE, CV, skewness and kurtosis. Crosstabulations, nonparametrics, 1-/2-way ANOVA, t-tests, multiple regression with scatter plots, residual plots and estimates.
IBM PC, XT ☐ 64 KB req. ☐ Introduced: 1984 ☐ Cost: $275

STRUCTURAL ANALYSIS

ABACUS COMPUTER SERVICES

☐ RWALL
Designs cantilever retaining walls using Working Stress Design Method and Uniform Building Code standards. External loading conditions include axial loads, sloped backfills and surcharges. Walls can be tapered. Calculates required minimum effective depth and areas of steel, shears, moments and soil pressures.
IBM PC ☐ 64 KB req. ☐ Cost: $295

ADVANCED STRUCTURAL TECHNOLOGY, INC.

☐ Building Analysis and Design
AISC-compliant member design system. Includes seismic loading of UBC.
IBM PC

ALGOR INTERACTIVE SYSTEMS, INC.

☐ Abeam
Provides ASCII data of properties from AISC Manual of Steel Construction. Includes variety of shapes, tubing and pipe. Properties include area, moments of inertia, radii of gyration and section moduli. FORTRAN subroutines and programs for output included.
IBM PC AT ☐ 640 KB req. ☐ Introduced: 1983 ☐ Cost: $195

☐ BeamBuilder
CAD system to build finite element beam models with interactive graphics. Handles loads, boundary conditions, section properties, material designation and end releases. 3D capability and color graphics. Final output is FEM beam element file.
IBM PC, AT ☐ 640 KB req. ☐ Copies sold: 20 since 1983 ☐ Cost: $1,900

☐ Model Builder
Handles three/four-node finite element model generation. Includes key node input, region definition, division specification, curved or circular side control, nodal load, boundary conditions and material property specifications, draw option and scale and sketch nodes.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 20 since 1979 ☐ Cost: $2,000

AMERICAN COMPUTER AND ENGINEERS, INC.

☐ Structural Engineering-SCADA
Civil and structural analysis of 2D and 3D beam and truss elements. Plots structures with/without deflection. Carries out modal analysis, time history, response spectrum and base motion. Designs concrete or steel beams and columns. Includes non-linear capabilities.
IBM PC ☐ 640 KB req. ☐ Copies sold: 250 since 1980 ☐ Cost: $3,500

APPLICON
(a Schlumberger Co.)

☐ Finite Element Analysis
Performs analyses on finite element models created with Applicon's Finite Element Modeler. Performs linear static and linear dynamic structural analysis and steady-state heat transfer analysis.
IBM PC

☐ Finite Element Modeler
Set of tools for creating, editing, checking and viewing finite element models and subsequent analysis results. Facilitates transfer of 3D geometry created by Applicon's Editor and Surface Modeling systems.
IBM PC

AUTO-TROL TECHNOLOGY CORP.

☐ A-Frame
Generates structural framing plans, elevations and column schedules by defining member end points and selecting its member designation. Standalone or integrated with STEEL-3D.
IBM PC ☐ 1,000 KB req.

☐ Foundation-3D
For design and detailing of reinforced concrete foundations. Displays output in color graphics form. Designs group or individual foundations. Prints design parameters and results. Generates BOM. Design and detail specifications according to ACI-318-83 standards. Interfaces with Auto-trol's STEEL-3D.
IBM PC

BINARY ENGINEERING ASSOCIATES, INC.

☐ Beam Analysis Templates
Designed for use with Multiplan or Lotus 1-2-3. Handles simple, built-in, cantilever, overhanging ends or elastic foundation beam support conditions. Solves for support reactions, bending moment, shear, outer fiber bending stress and deflection, at all points on beam.
IBM PC, PCjr, AT ☐ Cost: $125

BROOKS SCIENTIFIC, INC.

☐ PCTRAN Plus
3D interactive graphics FEA program. Solves stress, vibration, thermal and fluid flow analyses. Graphics aids in preparing data for analysis and interpreting results. Unlimited solution size. Element library includes rods, beams, membranes, plates, solids and axisymmetric elements.
IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $1,295

BUILDING ENGINEERS, INC.

☐ Post Tensioned Design
ACI 318-83-compliant flat slab beam design system.
IBM PC ☐ Cost: $3,000

C-SQUARED B-SQUARED SOFTWARE DESIGN, INC.

☐ Beam Analysis and Design
Handles various beam end conditions including cantilever, simple and fixed. Applies point loads, uniform loads and moment loads. Chooses appropriate section and alternates from tables on diskette. Color graphics display shear, moment, slope and deflection diagrams.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 35 since 1983 ☐ Cost: $500

☐ Column Analysis and Design
Specifies axial loads, moment loads about both axes and any degree of end fixity. Designs columns in steel, timber, concrete or any specified material. Tables of standard properties and sections. Follows AISC, ACI or AIIC/NFPA code guidelines.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 20 since 1984 ☐ Cost: $300

CASA/GIFTS, INC. (COMPUTER AIDED STRUCTURAL ANALYSIS)

☐ GIFTS (Graphical Interactive Finite Element Structural Analysis Total System)
Provides full linear solution capability including static, vibrational, and transient. Allows pre- and post-processing to other programs. Includes automatic mesh generation, and grid biasing. Handles multi-level substructuring and unlimited problem size. Provides set of basic tested elements. CAD interfaces available.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $2,000

CELESTIAL SOFTWARE, INC.

☐ IMAGES-AISC
Uses data base of structural shapes to check against AISC eight edition code for a set of loads. Interactive code used for post processor for IMAGES-2D and IMAGES-3D codes.
IBM XT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $200

☐ IMAGES-2D
Performs static and dynamic analysis of plane frames, beams and trusses. Finite element method, model generation, node numbering for bandwidth minimization, screen plots and animated node shapes.
IBM PC, XT ☐ 192 KB req. ☐ Introduced: 1983 ☐ Cost: $500-$1,300

☐ IMAGES-3D
Performs dynamic and static analysis of 3D structures. Displays/prints models in original or deformed states with hidden lines removed, surfaces highlighted, colors, and rotated orientation. Analyzes problems up to 2,400 degrees of freedom with no penalty for bandwidth.
IBM XT, AT ☐ 512 KB req. ☐ Introduced: 1984 ☐ Cost: $1,500-$3,900

CIVILSOFT
(division of The Technical Group, Inc.)

☐ Stress
Plane frame and truss program to calculate joint rotations, joint displacements, moments, shear forces and axial forces under static loadings for plane frame/truss, multi-story, rigid frame and truss structures. Uses stiffness method for solution of unknowns.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $590

COMPUTER AIDED STRUCTURAL TECHNOLOGY

☐ M-STRUDL
2D/3D frame and truss analysis and design. Static/dynamic analysis. AISC compliant.
IBM PC, XT, AT

COMPUTER SOFTWARE TECHNOLOGY

☐ Contours For Applied Mechanics
Contour lines printed for finite element models, such as quads or triangles, and values at nodes or element centers.
IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $135

COMPUTERS AND STRUCTURES, INC.

☐ ETABS84, PLOTTER, STEELER, CONKER, WALLER
Provides 3D static and dynamic analysis of multi-story buildings up to 100 stories with design postprocessors for steel or concrete frames or concrete shear walls. Graphics program plots undeformed geometry, static deformed shapes and mode shapes.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 411 since 1984 ☐ Cost: $1,000-$3,000

☐ SAP80, SAPSTL, SAPCON
Provides 3D static and dynamic analysis of structures with frame, shell, solid and/or axisymmetric elements. Includes design postprocessors for steel or concrete building frames. Graphics program for undeformed geometry, static deformed shapes and mode shapes.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 361 ☐ Cost: $1,000-$5,000

CONTROL DATA CORP.

☐ Cybernet Express Graphics Modeling System
Pre- and post-processor for host-based structural finite element analysis programs. Includes GMS/PREP a model generator with graphics, mesh generation physical model characteristics and loading definitions and GMS/POST for producing graphics depicting effects on structural model.
IBM PC, XT, AT

☐ Cybernet Express Mechanical Structures
Provides environment to create structural models and perform finite element analysis.
IBM PC, XT, AT

☐ Cybernet Express Structures
IBM PC, XT, AT ☐ 512 KB req.

CONTROL DATA CORP.

Science Information Services

☐ VistaSIGMA
Single resource design package. Tasks include entering and modifying data, transferring files to/from UIS's CRAY-1 based SUPRA Service, submitting jobs for CRAY processing automatically, interactive graphics, and hard copies of graphics. Access to range of engineering codes.
IBM PC, XT ☐ 256 KB req. ☐ Cost: $1,600

DESERT EARTH ENGINEERING

☐ PFrame
Uses displacement method to determine joint displacements, member forces at ends or at ¼ points along members, support reactions and total structure weight for any general 2D linearly elastic system composed of beam or bar members.
IBM PC ☐ 128 KB req. ☐ Copies sold: 30 since 1982 ☐ Cost: $150

☐ TDTruss
Uses displacement method to determine joint displacements, member axial forces and support reactions for any general 3D linearly elastic system composed of bar members.
IBM PC ☐ 128 KB req. ☐ Copies sold: 5 since 1982 ☐ Cost: $150

DYNACOMP, INC.

☐ Analysis of Continuous Beams
Analyzes determinate and indeterminate beam structures. Calculates joint displacements and rotations, member end shear forces, bending moments and section top and bottom stresses. Defines loading by concentrated loads and moments, and member-uniform and linearly distributed loads. Analyzes support settlement.
IBM PC ☐ 48 KB req. ☐ Cost: $50

☐ Analysis of Plane Frames
Analyzes determinate and indeterminate plane frame structures. Calculates horizontal, vertical and rotational displacements at joints, axial forces, shear forces, bending moments and section top and bottom stresses at member ends. Analyzes support settlement case.
IBM PC ☐ 48 KB req. ☐ Cost: $50-$120

☐ Beam Deflection
Data input program develops data files to describe problem. Analysis program calculates stress and deflections of beam in numerical and graphic form.
IBM PC ☐ 16 KB req. ☐ Copies sold: 2,000 ☐ Cost: $40-$43

☐ Sofnet
Liquid pipeline network analysis. Creates network data files. Solves series of flow equations by interactive link-node technique. Determines pressure and external flows at each point and flow through up to 150 connecting elements.
IBM PC ☐ 48 KB req. ☐ Copies sold: 600 ☐ Cost: $130

ECOM ASSOCIATES, INC.

☐ Structural Engineering Series
Aids in analysis of 2D/3D commercial, industrial and special structures and links to design of steel and concrete members. Modules available to analyze/design footings, bridges, prestressed beams, post-tensioned slabs and shear walls.
IBM PC, AT ☐ 256 KB req. ☐ Copies sold: 1,200 since 1973 ☐ Cost: $325-$2,500

ENERCALC

☐ Structural Library
Library of 40 structural analysis/design templates. Includes analysis, steel, concrete, retaining wall, timber and masonry templates. Templates available individually, by group or complete library. Requires Lotus 1-2-3 or Symphony.
IBM PC, PCjr, XT, AT ☐ 384 KB req. ☐ Copies sold: 250 since 1983 ☐ Cost: $845

ENGINEERING COMPUTER SOFTWARE (NY)

☐ EOSP/Structural Design and Analysis
Performs structure analysis, foundation analysis, multiple engineering and engineering-math functions. Provides interactive graphic presentation of I/O.
IBM XT, AT ☐ 250 KB req. ☐ Cost: $2,000

ENGINEERING MICRO RESEARCH, INC.

☐ EMRSE
Steel design and analysis. Handles moments and shear profiles. Calculates K factors. Produces output as graphics or numeric data. Allows user-specific locations for code checking anywhere along members.
IBM PC, XT, AT, RT ☐ 512 KB req. ☐ Cost: $500

ENGINEERING SERVICES

☐ CBEAM
Concrete beam analysis. Input includes geometric parameters and member loads. Output includes calculation of steel to satisfy current ACI 318-83 flexure and shear capacity requirements.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $150

☐ CFOOT
Concrete footing design. Output includes reinforcing steel necessary to satisfy current ACI 318-83 strength requirements.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $225

☐ Column
Analysis and design of reinforced concrete axially loaded members. Input includes initial member geometry, axial load and eccentricity of load about both minor and major axes. ACI 318-83-compliant.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $250

☐ ISSAS
Analyzes rigid frames, determinate trusses, indeterminate trusses and continuous beams subjected to gravity or lateral loads.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $335-$435

☐ PCSAP: 3-D Frame/Truss
Evaluates 700 joints. Handles 3D truss elements, 3D frame elements and boundary elements.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $200

☐ PCSAP: 3-D Frame/Truss With Dynamics
Evaluates 3D frame elements, 3D truss elements and boundary elements. Handles up to 700 joints.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $300

☐ PCSAP: 3-D Frame/Truss/Plate/Shell/Plane Stress/Strain
Evaluates 3D truss elements, 3D frame elements, plane stress and plane strain elements, 2D axisymmetric solids, thin plate or thin shell elements and boundary elements.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $300

☐ PCSAP: 3-D Frame/Truss/Plate/Shell/Plane Stress/Strain With Dynamics
Evaluates 3D truss elements, 3D frame elements, plane stress and plane strain elements, 2D axisymmetric solids, thin plate or thin shell elements and boundary elements.
IBM PC, XT, AT ☐ 640 KB req. ☐ Cost: $400

☐ PGROUP
Pile group analysis. Determines pile loads for eccentricity loaded pile caps and interactively deletes, adds or adjusts piles spacing.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $150

☐ Plate
ACI 318-83-compliant interactive flat plate analysis and design. Includes preprocessing graphics for input data verification.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $150

☐ RWALL (Retaining Wall Analysis)
Retaining wall analysis and design. Outputs reinforcing steel requirements and calculates safety factors for overturning and sliding. Interactively corrects unsatisfactory initial designs until final member dimensions satisfy user-specified safety factors.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $225

☐ Settle
Estimates foundation settlement. Analyzes rectangular, circular and continuous strip footings. Calculates settlements of sand and clay foundation soils using Schmertmann's (1978) methods.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $250

☐ SWALL (Shear Wall Analysis)
Considers wind, seismic forces, eccentricities due to center of pressure and center of mass effects to analyze buildings containing multiple shear walls.
IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $250

ENGINEERING SOFTWARE CO.

(division of Infotech Management, Inc.)

☐ AutoFRAME
Finite element program for design and analysis of 2D plane frame or truss. Creates architectural drawings.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $750

☐ Pressure Vessel
Designs or rerates shell and heads for horizontal or vertical vessels using ASME VIII code formulas/procedures. Calculates reinforcements for shell or head nozzles and tension of compression stresses for internal or external pressures.
IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $995

☐ Shaft 3D Dynamics
Tests/designs solid or hollow shafts. Determines maximum load/load distribution for given shaft size. Calculates bending and torsional stresses for static and dynamic conditions. Determines critical speed or frequency of vibration under dynamic conditions.
IBM PC, XT ☐ 128 KB req. ☐ Copies sold: 5 since 1986 ☐ Cost: $795

☐ Shells of Revolution
Calculates deflection, strain and stresses for pressure vessels, formed heads and piping. Includes mesh generation.
IBM PC ☐ 128 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $595

☐ SIGAINS1
Controls system gains. Determines necessary pole gains for single output and single control variable configurations using differential equations.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $250

☐ SISO1 - Single Input-Single Output
Determines transfer function form of model of linear constant coefficient ordinary differential system from state space equations.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $250

☐ Solver
Programmable to solve complex engineering and scientific equations with up to 512 steps. Stores results for insertion into other equations. Integrates with many word processing and spreadsheet programs. Calculates up to 18 significant digits.
IBM PC ☐ Cost: $50

☐ **Spur Gear Design**
Spur gear analysis. Calculates bending and surface stresses for pinion and spur gear set over range of specified face, widths and diametral pitches.
IBM PC, XT ☐ 64 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $395

☐ **STATE1**
State space equations. Determines model form of linear, constant coefficient and ordinary differential system.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $250

☐ **2D Finite Element Analysis**
Calculates deflection and stresses with screen graphics and plotting.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 200 since 1985 ☐ Cost: $495

☐ **2D Stress Analysis**
Calculates 2D stress analysis including super-element mesh generator.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 50 since 1984 ☐ Cost: $595

☐ **3D Finite Element Analysis-Dynamics**
Calculates deflections and stresses for static and dynamic models of frames and trusses with screen graphics.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $1,595

☐ **3D Finite Element Analysis-Statics**
Calculates deflections and stresses for static models with 3D screen graphics.
IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $795

ESDU INTERNATIONAL, INC.
(subsidiary of International Thomson Organization)

☐ **Bending of Curved Beams**
Calculates maximum stresses in fabricated curved beam under bending in its plane of curvature. Choice of ten cross-sections for beam. Color graphics capability.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Buckling of Plates - Clamped and Simple-Supported Edges**
Obtains values for shear and compressive direct loads that make flat rectangular orthotropic plate or isotropic plate buckle. Color graphics capabilities.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Buckling of Plates - Clamped Edges**
Obtains values for shear and compressive direct loads that make flat rectangular orthotropic plate or isotropic plate with clamped edges, buckle. Color graphics capability.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Buckling of Plates - Simply-Supported Edges**
Obtains values for shear and compressive direct loads that make flat rectangular orthotropic plate or isotropic plate with simply-supported edges, buckle. Color graphics capabilities.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Buckling of Rectangular Orthotropic Plates I**
Obtains values for shear and direct loads that make rectangular orthotropic plate or isotropic plate buckle. Handles longitudinal, transverse and shear loads. Provides geometric and materials properties data for plate.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Buckling of Rectangular Orthotropic Plates II**
Obtains values of shear and direct loads that buckle rectangular fiber-reinforced plate. Plate can have up to 400 layers. Layers can be of up to nine types and oriented at any prescribed angle.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Continuous Beam Analysis**
Tabulates reactions at supports and results of the calculation of deflection and/or slope, bending moment, shear force, and/or direct stress in the extreme fiber as tables of values along the beam length and/or as graphs of their distribution along the beam.
IBM PC ☐ 256 KB req.

☐ **Free Vibrations of Sway Frame Buildings**
Obtains undamped natural vibration characteristics of high-rise building of up to 20 stories modeled as sway-frame building.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Free Vibrations of Thick Cylindrical Shells**
Obtains lower natural frequencies and mode shapes of thick circular cylindrical shells. Computes natural frequencies, maximum displacement and associated stresses through shell thickness.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Natural Frequencies of Laminated Flat Plates**
Obtains lower natural frequencies of initially unstressed, specially orthotropic, rectangular flat or curved plates. Applicable to fiber-reinforced composite laminated plates.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Pressure Loss Through Duct Contractions**
Obtains pressure loss for compressible flow through sharp- or round-edged sudden contraction in duct section. Computes Mach number, and static and total pressure ratios across contraction.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Pressurized Cylindrical Shells**
Obtains values for elastic stresses in circular cylindrical shell with flat head closure under uniform external or internal pressure. Color graphics capability.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Pressurized Thin Pipe Bends in Bending**
Obtains values for elastic stresses in, and bend flexibility factor of, thin pipe bend, with or without internal pressure, under in-plane bending. Tabulates values of eight stresses at ten degree intervals around circumference of pipe. Color graphics capability.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Static Shaft Analysis - Stresses**
Obtains stresses in shaft subject to various loads, and takes into account bearing stiffness and preload, shaft/bearing misalignment, thermal loads, and stress concentrations at shaft section changes.
IBM PC, XT, AT ☐ 128 KB req.

☐ **Stiffened Shell Vibrations I**
Deals with free vibration of initially stressed thin stiffened shell. Provides geometry, materials properties, loading and edge condition data.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Stiffened Shell Vibrations II**
Deals with forced vibration of initially unstressed stiffened thin shell. Provides geometry, materials properties, natural frequencies and mode shapes of shell.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Stiffnesses and Properties of Laminated Plates**
Obtains stiffnesses and apparent elastic properties of fiber-reinforced laminated rectangular plate. Provides properties of individual laminae, orientations of their lay-ups and their stacking sequence. Produces values of apparent Young's modulus, shear modulus and Poisson's ratio.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Strength of Bonded Joints in Tension or Shear**
Obtains elastic tensile or shear stresses in adherends, and in elastic shear stresses or strains in adhesive, of balanced bonded single- or multi-step lap joint with up to six steps which may differ in lengths and thicknesses.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Stresses and Deflections of Plates Under Pressure**
Obtains stresses and deflections at various positions in rectangular flat plate under uniform pressure. Choice edges free or fixed in rotation and translation, or edges free in rotation and fixed in translation or vice versa. Color graphics capability.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Undamped Vibration of Core Buildings**
Obtains undamped natural vibration characteristics of high-rise building with over three stories modeled as core building. Provides number of stories, floor masses and radii of gyration, core flexural and shear rigidities, story heights and foundation stiffness of building.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Undamped Vibration of Shear Buildings**
Obtains natural vibration characteristics of high-rise building between 4-60 stories modeled as shear building. Provides number of stories, stiffnesses, and lumped masses at each floor of building.
IBM PC, XT, AT ☐ 192 KB req.

☐ **Vibrations of Frame Structures**
Obtains natural vibration characteristics of rigidly jointed frame structure. Provides geometry of frame and data on inertial and stiffness characteristics of individual members of structure. Computes natural frequencies and mode shapes with generalized masses and stiffnesses.
IBM PC, XT, AT ☐ 192 KB req.

FIFTH DIMENSION ENGINEERING, INC.

☐ **Beam Stresses and Deflections**
Sizes elements with beam loadings. Calculates bending stress at user-selected point, deflection at that point, maximum stress/deflection, moment/shear at point and maximum moment/shear. Computes section properties I/Z for six common beam cross-sections.
IBM PC ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $290

GEOMETRIC DATA FLOW, INC.

☐ **DETAIL**
Structural steel detail engineering. Uses grid planes from design. Plots framing planes and elevations showing position of members and connection types assigned to each point. Details members by size and weight, combining all identical members.
IBM PC, AT ☐ 512 KB req. ☐ Copies sold: 14 since 1976 ☐ Cost: $75,000-$150,000

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ **CAEDS Base**
IBM no. 5669-206, 5713-AAA. Computer-Aided Engineering Design System. General application support, model file access, graphics device support and dialog management for all other CAEDS modules.
IBM RT ☐ Cost: $1,655

☐ **CAEDS Graphics Finite Element Modeler**
IBM no. 5669-209, 5713-AAD. Computer-Aided Engineering Design System. Builds and checks finite element models, analyzes each model and reviews results.
IBM RT ☐ Cost: $8,940

☐ **CAEDS Object Modeler**
IBM no. 5669-207, 5713-ABB. Computer-Aided Engineering Design System. Solid and finite element modeling. Interactively builds, visually inspects and physically analyzes objects during their creation.
IBM RT ☐ 640 (RT); 4,000 (30XX, 43XX) KB req. ☐ Cost: $6,060

☐ **CAEDS System Dynamics Analysis**
IBM no. 5713-AAF. Computer-Aided Engineering Design System. Interface to ANSYS and MSC/NASTRAN. Accepts data from CAEDS Object Modeler. Maintains compatibility while displaying solutions and results. Defines components in local coordinate systems. Detailed geometry and connectivity of component and system descriptions.
☐ 4,000 KB req. ☐ Cost: $31,500-$94,500

☐ **CAEDS System Modeler**
IBM no. 5669-208, 5713-AAC. Computer-Aided Engineering Design System. System assembly analyzes and assembles multiple objects and mechanism design analyzes system's kinematic behavior.
IBM RT ☐ Cost: $8,230

INNOVATIVE ANALYSIS, INC.

☐ **LARSA**
Linear and nonlinear, finite element method based structural analysis and design system. Printed or graphics output.
IBM PC

INTERCEPT SOFTWARE
(division of S. Levy, Inc.)

☐ **Libra**
Structural or thermal finite element analysis. Node and element generation. Handles up to 4,000 nodes, temperature dependent material properties, and effects of inertial and constant rotational forces. Incorporates graphics displays of model geometry in both pre- and post-processors.
IBM PC, XT, AT ☐ 640 KB req. ☐ Introduced: 1985 ☐ Cost: $1,495 (structural or thermal); $2,495 (both)

JAMES J. JORDAN, ARCHITECT-ENGINEER

☐ Sherwall
Calculates seismic load compared to winds using maximum. Calculates unit shear, and overturning and resisting moments and hold down requirements for each panel and present choices. Detailed data loaded automatically.
IBM PC ☐ 48 KB req. ☐ Introduced: 1982 ☐ Cost: $97

JP AXE ID

☐ SAFE (Structural Analysis by Finite Element)
Analyzes stress in variety of structures. Examines plane trusses, plane frames, space trusses, space frames, plane stress triangles, plane stress rectangles. Calculates forces, stress, displacements and reactions.
IBM PC ☐ 256 KB req. ☐ Copies sold: 462 since 1983 ☐ Cost: $250 and up

KERN INTERNATIONAL

☐ Structure Analysis Software for Microcomputers
Matrix analysis of 2D and 3D frames on microcomputers. Structural analysis including multi-supported beam, non-uniform beam, non-linear structures, large deformations, properties of plane areas, combined stresses, finite element mesh generation with 3D rotation, graphics display of deflections.
IBM PC ☐ 48 KB req. ☐ Cost: $48

☐ Visual Statics
Analysis of 2D and 3D mechanic problems on microcomputers. Solves static problems. Includes graphics display of forces and managements. Sets up and solves simultaneous equations using Gauss-Jurdam elimination.
IBM PC ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $85

☐ Visual Stress and Strain
Solves 2D or 3D combined stress problems, with emphasis on graphics display. Shows stress cubes with stress resultants drawn to scale and corresponding Mohr's circle.
IBM PC ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $85

LIBRARY OF ENGINEERING APPLICATIONS PROGRAMS, INC.

☐ CONSYS
Continuous beam analysis. Specifies 12 spans with 2 cantilevers. Specifies point loads and moments and partially distributed trapezoidal loads for static load analysis. Supports standard, non-standard and multiple trucks. Generates moment and shear influence lines for any point on structure.
IBM PC ☐ 256 KB req. ☐ Copies sold: 21 since 1985 ☐ Cost: $950

☐ PRESTO
Prestressed member design. Models double tees, keystone joists, hollow core slabs, solid slabs, L-beams and others. Specifies cantilevers at either or both ends. Uses regular, stress-relieved or low relaxation strands in design. Allows point and partially distributed trapezoidal loads.
IBM PC ☐ 256 KB req. ☐ Copies sold: 16 since 1985

MACNEAL-SCHWENDLER CORP.

☐ AutoFEM (Finite Element Modeling)
Converts AutoCAD-generated design into finite element model which can be analyzed by MSC/pal2. Supports color graphics and access to all AutoCAD commands. Requires 8087 or 80287 numeric co-processor and IBM color graphics adapter.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $295

☐ MSC/Case
Table of equations for structural analysis and engineering, graphics and numerical evaluation.
IBM PC ☐ Cost: $895

☐ MSC/pal
Mechanical design analysis using finite element method. Solves problems in static analysis, natural frequency response and transient response. Full graphical pre-and post-processor package.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 550 since 1984 ☐ Cost: $995

☐ MSC/pal2
Performs finite element analysis. Includes quadrilateral and triangular plates, shear panels and straight and curved beams. Applies nodal, pressure, line and gravity loads. Performs stress and vibration analysis. Includes pre- and post-processing graphics.
IBM PC, XT, AT ☐ Cost: $1,995

MTI SOFTWARE

(formerly DISCO-TECH, division of Morton Technologies, Inc.)

☐ Beam-1
Analyzes reactions, shears and moments for loading conditions on simple beam. Calculates triangular loads using appropriate point loads. Displays maximum deflections. Analyzes simple beams with/without cantilevers on either/both end.
IBM PC ☐ 64 KB req. ☐ Copies sold: 570 since 1982 ☐ Cost: $145

☐ Elfan
Predicts performance of continuous grade beam foundations under multiple load conditions. User inputs design dimensions, load conditions, moment of inertia, modulus of elasticity of grade beam. Grade beams include 99 vertical loads. Calculates every point load and chosen point.
IBM PC ☐ 64 KB req. ☐ Copies sold: 970 since 1981 ☐ Cost: $220

☐ Footing
Handles isolated footing design with variety of types including continuous, square and rectangular isolated footings. Use of steel reinforcement can be compared to plain concrete.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,152 since 1981 ☐ Cost: $110

☐ Foundation Design Package
Includes PolEm, Footing, PGB, and ELFAn. Provides solutions for reinforced concrete foundation design problems.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,000 since 1982 ☐ Cost: $500

☐ PGB
Develops optimum pier and grade beam foundations. User enters design strengths of concrete and steel, grade beam width/depth, pier design diameter and allowable skin fraction and uplift, and nine independent live/dead loads. Calculates maximum pier spacing, and shear reinforcement.
IBM PC ☐ 64 KB req. ☐ Copies sold: 975 since 1981 ☐ Cost: $150

☐ Polem
Determines minimum embedment depth for constrained/unconstrained, laterally-loaded poles. Reviews validity of user-entered design features. Performs design calculations and displays design depth.
IBM PC ☐ 64 KB req. ☐ Copies sold: 1,112 since 1981 ☐ Cost: $80

☐ Retwall
Designs retaining wall. Displays maximum height of wall for given loading condition when masonry stresses exceeded. Powered concrete option allows straight or tapered sides to handle stress.
IBM PC ☐ 64 KB req. ☐ Copies sold: 500 since 1980 ☐ Cost: $250

☐ Tiltwall
Designs concrete walls with thickness less than normally allowed by height/thickness ratios. Designs meet Uniform Building Code Section 2610 or American Concrete Institute requirements. User sets design parameters.
IBM PC ☐ 64 KB req. ☐ Copies sold: 150 since 1983 ☐ Cost: $350

NUMBER CRUNCHER MICROSYSTEMS, INC.

☐ SAP86
Finite element program for 2D and 3D static and dynamic analysis of linear structural systems. Provides element library. Interactive I/O capabilities. Prepares models using full-screen data forms and/or MICROTAB preprocessor with interactive 3D graphics.
IBM PC, XT, AT ☐ 640 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $1,495

NUMERICS CORP.

☐ FE2000
Finite element analysis. Covers linear/nonlinear static stress, vibration modes and frequencies, heat transfer, plasticity, nonlinear elastic, rigid links, multipoint constraints, coupling, bandwidth minimization, and convection boundary conditions. Library of 40 elements for 2D and 3D models.
IBM PC ☐ 512 KB req. ☐ Copies sold: 40 since 1985

PENG ENGINEERING

☐ LOCALC
Tests for local stresses in cylindrical shells. Based on WRC-297 standards. Studies opening on each shell and restraining effect of nozzle wall. Evaluates pipe connections on cylindrical vessels.
IBM PC, XT, AT, RT ☐ 512 KB req.

☐ LOCALS
Tests for local stresses in shells. Based on WRC-107 standards. Studies spherical and cylindrical shells.
IBM PC, XT, AT, RT ☐ 512 KB req. ☐ Cost: $1,500

☐ QFLEX
Finite element method based piping flexibility checking system. Studies elements, restraints and loadings. Produces isometric plots. Outputs input echo, pipe data, system description, anchor and support force, member force and stress, modal displacement and maximum responses.
IBM PC, XT, AT, RT ☐ 512 KB req. ☐ Cost: $3,000

☐ SIMFLEX.S
Static piping stress analysis. Studies weight, thermal plus weight, wind direction, earthquakes and earthquake support displacement and load cases. PC version of SIMFLEX-II.
IBM PC, XT, AT, RT ☐ 512 KB req.

POSTEN DESIGN SYSTEMS, INC.

☐ BIAXICOL
Assists design of rectangular columns for biaxial bending.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ EZETABS
Performs second order analysis of frame and shear wall buildings to include P-Delta effects. Determines lateral sideway stability of building structure including printing of buckling load factors. Computes column moment magnifiers due to P-Delta effect. Static seismic design per 1982 UBC.
IBM PC ☐ Copies sold: 30 since 1977 ☐ Cost: $2,000

☐ GLULAMB
Designs glu-lam roof or floor beams in AITC and UBC code.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ LONGCOL
Designs long slender rectangular reinforced concrete or post-tensioned concrete columns.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ RETWALL
Designs and analyzes reinforced concrete retaining walls.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ SLENDERCOL
Computes ultimate load on long slender rectangular reinforced concrete or post-tensioned concrete columns.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ SPIRACOL
Designs round columns' axial plus moment loads.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ STEELFLANGE
Locates allowable moment for I-beam or channel sections with laterally unsupported flanges, using AISC Code specifications.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ TAPERGLU
Designs tapered glu-lam beams and girders based on AISC and UBC Codes.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ TAPERSTEEL
Designs tapered steel girders.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

☐ TILTUP
Designs high slender tilt-up bearing walls subjected to lateral loads.
IBM PC ☐ 256 KB req. ☐ Copies sold: 30 since 1977 ☐ Cost: $200

THE RAND GROUP, INC.
(subsidiary of Intergraph Corp.)

☐ Rand Micas
Frame and finite element-based analysis and design for engineers.
IBM XT, AT ☐ 512 KB req. ☐ Copies sold: 100 since 1974 ☐ Cost: $7,500-$9,995

RESEARCH ENGINEERS, INC.

☐ STAAD-III
Analyzes planar and 3D structures comprised of any combination of beam, truss or thin shell elements. Used for design of concrete beams and columns and selection of steel members according to current ACI and AISC codes.
IBM PC ☐ 640 KB req. ☐ Copies sold: 500 since 1977 ☐ Cost: $3,000-$12,000

SCS, INC.

☐ BeamBoss
Finite element analysis. Interactive graphics builds models and analyzes results. Frames of beam and/or truss members with torsional and linear springs. Displacements, internal forces, shears and moments, graphically and printout.
IBM PC ☐ 256 KB req. ☐ Cost: $395

SDRC CAE INTERNATIONAL, INC.

☐ I-DEAS Supertab
Interactive pre and post-processing finite element modeling. Includes Triquamesh enhanced mesh generator for irregular surfaces, Anser for finite element analysis and Optisen structure optimization module. Integrates with Geomod and other GE-CAE International programs. Interfaces CAD/CAM through IGES files.
IBM RT PC 6150 ☐ Copies sold: 500 since 1975 ☐ Cost: $5,000

SOFTEK SERVICES, LTD.

☐ G-Frame
Grid analysis system with quantitative graphics including undeformed/deformed geometry and all forces for both load cases and combinations.
IBM PC ☐ 320 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $1,500

☐ P-Frame
Plane frame analysis system with quantitative graphics including undeformed/deformed geometry and all forces for both load cases and combinations.
IBM PC ☐ 512 KB req. ☐ Copies sold: 300 since 1983 ☐ Cost: $1,500

☐ S-Frame
Space frame analysis system with quantitative graphics including undeformed/deformed geometry and all forces for both load cases and combinations.
IBM PC ☐ 512 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $2,000

SOFTWARE CONSULTING SPECIALISTS, INC.

☐ BeamBOSS
Interactive graphics driven 2D frame analysis system. Analyzes 2D structures composed of beam and/or truss members using finite element analysis.
IBM PC ☐ 256 KB req. ☐ Cost: $395

THE SOFTWARE ENGINEERING CO.

☐ AISCFILE
Design data for W, M, HP and S shapes, American standard and miscellaneous channels, W, M and S tees, angles, pipes and structural tubings. Accesses structural steel member design properties.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $75

☐ AXICOL
Steel column design for axial loads. Calculates floor dead, live and special loads. Prints running totals of floor loads, column weight, design load and selected column sizes.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $150

☐ BASEPL
Analyzes and designs column base plates and anchor bolts for axial compression plus bending loads. Input consists of AISC W, S, M and HP shapes. Output consists of depth, width and thickness of base plate, anchor bolt size and concrete and steel stresses.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $150

☐ BEAMCOL
Design or analysis of steel beam columns. Selects W-, M-, S- or HP-shape beam columns from shape tables. Accepts entry of end and interior moments. Designs for any combination of biaxial bending plus axial tension or compression.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $175

☐ COBEAM
Analyzes continuous beams or rigid frames. Inputs beam and column sizes or moment of inertia, spans, dead and live loads and support conditions. Studies uniform, partial linearly varying, concentrated force, cantilever and end bending moments. Outputs dead and live load shears and bending moments.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $125

☐ COLFTG
Designs isolated columns spread footing, square or rectangular, subjected to various combinations of forces such as gravity, wind and earthquake or vertical, horizontal or bending loads. User specific plan dimensions and footing thicknesses. Outputs load input, final footing size and selected reinforcements.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $150

☐ PFRAME
Formulates and solves equilibrium, force-deformation and compatibility equations for 2D linearly-elastic systems composed of beams and bar members. Outputs for each load case and combined load joint displacements, member forces, support reactions and structure weight.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $400

☐ RCCAD
Analyzes reinforced concrete columns with uniaxial or biaxial bending. Studies columns of any geometric shape and reinforcing of any arrangement. Analyzes any number of columns per single run. Outputs moment and axial load values.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $300

☐ Sections
Calculates section properties for arbitrary shapes. Calculations include area, center of mass for floor and perimeter wall elements that may be used in lateral analysis, shear stress at any level within each section.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $75

☐ SWALL
Distributes lateral wind or seismic loads to system of shear walls or frames including skewed elements. Analyzes up to 50 walls and 40 levels. Outputs location of center of rigidity and design wall shears due to direct shear and torsional moments.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $350

☐ TDTRUSS
Formulates and solves equilibrium, force-determination and compatibility equations for 3D linearly-elastic systems composed of axially loaded bar members. Outputs joint displacements, member axial force, stress, displacement and strain and support reactions.
IBM PC, XT ☐ 48 KB req. ☐ Cost: $300

SRAC

☐ COSMOS/M
2D/3D finite element analysis. Interactive pre- and post-processing, structural and heat transfer capabilities. Color graphics and mesh generation. Evaluates 1400 structural and thermal nodes.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 50 since 1985 ☐ Cost: $1,995

SST SYSTEMS, INC.

☐ CAEAUTO
Interface between SST's CAE software and AUTOCAD drafting program.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $1,600

☐ CAEFRAME
Static analysis of 3D frame structures consisting of beam, truss and plate elements. Generates models. Provides material properties, AISC sections and pipe size data bases. Joint and element generation options. Tracks software usage. Includes error diagnostics and graphics.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $2,900-$4,900

☐ CAENOCYL
Performs linear stress and flexibility analysis of radial nozzle or pipe penetrations in cylindrical vessels and tanks. Performs 6 external load components, and nozzle and vessel pressure. Based on closed-form solutions in shell theory.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $5,600

☐ CAENOZLS
Performs linear stress and flexibility analysis of radial nozzle or pipe penetrations in spherical vessels or cylindrical vessel heads. Performs 6 external load components, nozzle and vessel pressure, and different temperature change for each component. Based on closed-form solutions in shell theory.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $5,600

☐ CAEPIPE
Performs linear, static analysis of 3D process, power and nuclear piping system. Provides pipe and insulation materials, pipe size and standard pipe hangers data bases. Generates piping models. Tracks software usage. Includes error diagnostics and graphics.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $7,900

☐ CAEPIPE Dynamic Option
Performs seismic analysis and design of piping systems using response spectrum method. Add-on to CAEPIPE.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $3,600

☐ CAETRANS
Interface between SST's CAE software.
IBM XT, AT ☐ 640 KB req. ☐ Cost: $1,600

STRESS ANALYSIS ASSOCIATES, INC.

☐ Beamvibs
Calculates static and dynamic analysis of vibrating or static beams. Accommodates shafts for rotating machinery, beams and equipment affected by seismic loads. Calculates frequencies, deflections, moments, reactions and stresses.
IBM PC ☐ 128 KB req. ☐ Copies sold: 40 since 1980 ☐ Cost: $345

☐ Codeflange
Flat-faced and raised-face, pipe flange stress analysis. Calculates weld neck, slip on, lapped, optional and reverse. Stress calculation uses SECTION III or VIII of 1983 Boiler Code. Flat faced supports nine APPENDIX Y of SECTION VIII possibilities.
IBM PC ☐ 128 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $185-$195

STRUCTSOFT, INC.

☐ PCSA
Creates and maintains leveled data flow diagrams and project data dictionary. Includes bit-block transfer operations and object-oriented pop-up menus on bit-mapped hi-res display with mouse. Provides dragging, rubber banding, smooth curve generation, consistency checking for diagram balancing and global name replacement.
IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 300 since 1985 ☐ Cost: $995

STRUCTURAL ANALYSIS, INC.

☐ FRAME
Analyzes and designs reinforced concrete frames consisting of one floor and adjacent columns. Generates moment envelope and shear diagram. Includes dead or live concentrated or distributed loads. Includes effect of wind moments.
IBM PC ☐ 256 KB req. ☐ Copies sold: 60 since 1981 ☐ Cost: $750

☐ POST
Analyzes and designs post-tensioned concrete frames. Solves for all conditions of alternately loaded bays. Generates moment envelope and shear diagram. Dead or live concentrated or distributed loads and wind or seismic moments. Performs live load reductions. Computes deflections.
IBM PC ☐ 256 KB req. ☐ Copies sold: 75 since 1980 ☐ Cost: $2,498

☐ RATIONAL
Performs rational analysis of a building comprised of multi-story rigid frame, with/without shearwalls acted upon by horizontal loads. Computes wind forces, effect of second order deformations, and non-linear material characteristics. Designs forces for columns and beams.
IBM PC ☐ 192 KB req. ☐ Copies sold: 50 since 1981 ☐ Cost: $1,000

☐ STEEL
Analyzes and designs structural steel frames consisting of one floor and adjacent columns. Solves for all conditions of alternately loaded bays and generates a moment envelope and shear diagram. Includes dead or live concentrated or distributed loads and wind loads.
IBM PC ☐ 192 KB req. ☐ Copies sold: 35 since 1981 ☐ Cost: $898

STRUCTURAL DATA, INC.

☐ Post-Tensioned Concrete Structure Analysis and Design
Designs beams, slabs and flat plates. ACI Code 318-83 compliant. Available for English or metric unit systems.
IBM PC ☐ Cost: $6,500

STRUCTURAL MEMBERS USERS GROUP

☐ Structural Member Analyses
Programs for static, stability, dynamic response and stress analysis of structural members and mechanical elements. Models members with continuous or lumped mass. Calculates static and steady state displacements and forces, natural frequencies and mode shapes, buckling loads, sectional properties and stresses.
IBM PC ☐ 256 KB req. ☐ Copies sold: 275 since 1973 ☐ Cost: $400

STRUCTURAL SOFTWARE SYSTEMS

☐ FATPAK (Frame and Truss Package)
Structural analysis of frames and trusses in 2D or 3D. Uses interactive or disk file input. Plots original geometry on monitor screen.
IBM PC ☐ 64 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $249

☐ TRUSILPC (Truss Influence Lines)
Computes ordinates of influence lines for member forces in general plane truss. Uses interactive or disk file input. Plots influence lines on monitor screen.
IBM PC ☐ 64 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $149

STRUCTURAL SOFTWARE, INC.

☐ Analysis and Design of Flat Plate/Slab
Analyzes and designs reinforced concrete flat plate or flat slab. Uses modified five cycle moment distribution procedure to solve for moments and shears. Computes slab punching shears and compares them against allowable code values.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 90 since 1985 ☐ Cost: $475

☐ Analysis and Design of Reinforced Concrete Beam
Analyzes and designs a reinforced concrete beam by strength method. Designs rectangular or T beams. Considers torsion in combination with shear and bending. Analyzes 20 separate uniform loads and 20 separate concentrated loads in any one problem.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 110 since 1984 ☐ Cost: $400

☐ Analysis of Continuous Beam
Analyzes prismatic or non-prismatic continuous beam with or without cantilevers at either end. Accommodates up to 20 spans. Computes reactions and moments at each support. Calculates moments and deflections between supports, at point intervals, for each span.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 70 since 1984 ☐ Cost: $400

☐ Beam to Column Connection
Designs steel beam to steel column connection subjected to bending moment and vertical shear. Beam may frame into column flange or column web. Calculates and designs required connection to resist applied bending moment and vertical shear force.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 40 since 1982 ☐ Cost: $400

☐ Cantilever Beam Analysis
Analyzes cantilever beam subjected to uniform loads, partial uniform loads, triangular loads, partial triangular loads and concentrated loads.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 42 since 1982 ☐ Cost: $150

☐ Column Base Plate Decision - Axial Load and Bending Moment
Designs column base plate that is subjected to axial load only or one that is subjected to axial load and bending moment.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 70 since 1985 ☐ Cost: $175

☐ Column Cap Plate Connection
Designs interior or exterior structural steel cap plate connection subjected to design bending moment. Outputs required thickness, width and length of cap plate. Provides required number and size of Hi-Tensile bolts to connect cap plate to steel beam above.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $150

☐ Combined Footing
Analyzes and designs by strength method combined footing supporting exterior and interior column or pier. Loads exterior and interior column and pier with axial loads, bending moments and horizontal shears applied about axis parallel to long dimension of footing.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 90 since 1982 ☐ Cost: $450

☐ Composite Steel Beam
Analyzes, designs and investigates any simply supported composite steel beam or girder. Computes design value of shear connectors. Shear connectors may be studs or channels. Lets user consider composite beam as having full or partial composite action.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 95 since 1982 ☐ Cost: $400

☐ Design of Diagonal 'X' Bracing
Selects area of steel brace required for frame stability, tension and compression within braced bent. Deflection/height ratio of bracing is limited to 0.002. One story or multi-story braced bent.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 55 since 1982 ☐ Cost: $125

☐ Design of Drilled Caisson (Pier) Foundation
Designs shaft and bell caissons or shaft caissons only. User can load top of caisson with vertical loads, horizontal loads and applied moments. Permits user to consider effect of negative skin friction in design.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 80 since 1985 ☐ Cost: $250

☐ End Plate Moment Connection
Designs end plate moment connection. Calculates required end plate size, number of bolts and size of bolts required for moment and shear, and required welds for moment and shear based on beam size user inputs.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 80 since 1982 ☐ Cost: $150

☐ Fixed End Beam Analysis
Analyzes simple span fixed end beam subjected to uniform loads, partial uniform loads, triangular loads, partial triangular loads and concentrated loads.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 44 since 1982 ☐ Cost: $150

☐ Fixed End/Simple Beam Analysis
Analyzes single span beam with one end fixed and one end simply supported subjected to uniform loads, partial uniform loads, triangular loads, partial triangular loads and concentrated loads.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $150

☐ General Section Properties
Computes properties of rectangular concrete section for use in deflection calculations. Calculates properties of any arbitrary shaped geometric figure that can be defined by consecutively numbered nodal points that are connected together by straight segments.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 60 since 1983 ☐ Cost: $175

☐ Isolated Spread Footing
Designs isolated spread footing. Permits design for square or rectangular footing with either footing dimension input as held dimension. Loads footing with axial loads, bending moments and horizontal shears applied about either or both axes of footing.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 75 since 1982 ☐ Cost: $425

☐ Isolated Unreinforced Footing
Designs isolated unreinforced spread footing. Permits design for square or rectangular footing with either footing dimension input as held dimension. Loads footing with axial loads, bending moments and horizontal shears applied about either or both axes of footing.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $175

☐ Pile Group Analysis
Analyzes group cluster containing 2-50 piles. Calculates pile reactions for each pile. Computes and compares sum of pile reactions of entire pile cluster to applied vertical load.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 90 since 1983 ☐ Cost: $200

☐ Plane Frame and Truss Analysis
Determines horizontal and vertical displacement and rotation of each joint. Computes axial force, shear force, and moment for each member. Determines support reactions for each support or joint restraint. Each support may be fixed, hinged, or roller support.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 225 since 1984 ☐ Cost: $500

☐ Prestressed Concrete Beam
Analyzes and designs pre-tensioned or post-tensioned prismatic prestressed concrete beam that is simply supported, has cantilevers at either or both ends, or is part of continuous system.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 90 since 1984 ☐ Cost: $600

☐ Reinforced Concrete Column
Analyzes or designs reinforced concrete column. Supports rectangular or circular column types. Bending moments may be applied about either or both axes of column. Considers effects of slenderness required, by use of modified R method.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 110 since 1984 ☐ Cost: $300

☐ Retaining Wall
Designs reinforced concrete retaining wall using strength method. Calculates bending moment, wall thickness, required reinforcement (As), % As, minimum As, and maximum As reinforcement permitted by code at 11 points for stem of constant or uniformly varying thickness with or without sloping backfill.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 110 since 1983 ☐ Cost: $450

☐ **Simple Span Beam Analysis**
Analyzes simply supported beam subjected to uniform loads, partial uniform loads, triangular loads, partial triangular loads and concentrated loads. Analyzes foundation wall restrained at top and bottom, and subjected to earth pressure, water pressure and surcharge.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 43 since 1982 ☐ Cost: $150

☐ **Space Frame & Grid Analysis**
Determines displacements and rotations of each joint about X, Y and Z global (structure) axes for any 3D frame or grid. Calculates axial force, shear force, torsional moment and bending moments for each member of frame.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 160 since 1984 ☐ Cost: $1,200

☐ **Steel Beam and Bearing Plate**
Designs or investigates adequacy of steel beam subjected to biaxial bending and axial load.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $300

☐ **Steel Column**
Investigates or designs steel column subjected to uniaxial or biaxial bending, shear forces and axial load. Wind or seismic loadings can be a part of inputted moments, shears and axial force.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 75 since 1985 ☐ Cost: $300

☐ **Timber Design**
Designs timber rafters or beams, studs, columns and truss members. Calculates size of member to suffice all loadings, based on inputted allowable design stresses. Wind, seismic, short duration, long term or continuous and impact loadings can be part of inputted design moments, shears and axial forces.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 65 since 1982 ☐ Cost: $300

☐ **Torsion Analysis and Design of Steel Beams**
Analyzes and designs wide flange steel beam subjected to plane bending and torsional loadings. Provides plane bending portion of analysis for simply supported, fixed end, cantilever and fixed end/simple end beams.
IBM PC, XT, AT, 3270-XT, XT/370 ☐ 64 KB req. ☐ Copies sold: 135 since 1983 ☐ Cost: $450

S2D, INC.

☐ **A-SAP-M2M**
Linear finite element, 2D/3D structural analysis. Static/dynamic analysis. Model plots. M2MPRE pre-processor, M2MPOST post-processor, ASAPBAND node/joint renumbering, ASAPPRN print utility, S2DSAP1 eigenvector/eigenvalue analysis and S2DSAP2 time history or response spectrum analysis functions.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $795

SUS ENGINEERING

☐ **Syframe**
Analyzes 2D multi-story frames for vertical and/or lateral loads. User inputs frame parameters, stiffnesses of members, vertical and lateral loads. Output includes final moments for all members at each joint needed for final design of members.
IBM PC, XT, AT ☐ 128 KB req. ☐ Cost: $99

SWANSON ANALYSIS SYSTEMS, INC.

☐ **Ansys-PC/Linear**
Pre/postprocessing for linear static and modal analyses. Provides element library including 1D, 2D and 3D solids, shells, beams, spars, springs, masses and mass matrices. Includes animation, 10 colors, dithering, hidden line removal, animation of shape distortion and rotation graphics capabilities.
IBM PC, XT, AT ☐ 512 KB req. ☐ Cost: $3,600

SYS COMP CORP.

(an Easinet Co.)

☐ **BASPLT-Column Base Plate Design**
Computes size and thickness of square/rectangular column base plates subject to axial loads and moments or seismic forces about both symmetry axes. Requires equal minimum plate and column sizes and same center of gravity of plate and column. Follows AISC code guidelines. No tension allowance.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $100

☐ **BASTEN-Column Base Plate with Tension on Bolts**
Design of structural steel column base plate with/without tension or anchor bolts. Utilizes minimum length and width of plate, column dimensions, material properties and applied loading. Determines minimum plate size and thickness and corresponding bolt size and bolt forces.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $125-$200

☐ **BRGWAL1-Brick, Block or Concrete Bearing Wall Design**
Evaluates and designs walls subjected to end moments, axial loads, and other earth, wind or earthquake loading. Parameters include wall weight and consider single/double steel curtains using stress and design values and Temperature steel requirements. Uses 1979 and 1977 ACI codes.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $300-$500

☐ **COLLDS - Multi-Story Column Load Take-Off Tabulation**
Compiles column for entire building or portion of building. Inputs up to four area loads and four concentrated loads or line loads in random manner for each column at each story. Computes, identifies, stores and reduces loads.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $300-$500

☐ **COMPBU1/COMPBA1**
Investigates uniformly-loaded beams or beams with any type loading, either shored or unshored subjected to dead and live loads. Parameters for study investigate steel section as composite beam. Designs optimum and minimum sections. Includes deflections, welds and connectors.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $525-$850

☐ **DETTRS - Determinate Truss Analysis**
Solves statically determinate pin-connected truss for support reactions and axial stress and member lengths. Uses method of joints. Maximum number of members is 245, corresponding number of joints is 124.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $200-$300

☐ **EQKSWL**
Determines shears and overturning moments for up to 20 walls each way on 10 stories. Utilizes dimensional descriptions of walls and weights of building elements. Determines building period, accounts for torsional increase or shear and analyzes wind or seismic forces.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $900-$1,500

☐ **EQPIER1-Brick, Block or Concrete Shear Wall or Pier Design**
Investigation for combination of vertical and lateral loads. Selects reinforcement for solid rectangular wall or pier subject to moment, shear and gravity load. Obtains moment and shear by using wind or earthquake rotational analysis program.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $300-$500

☐ **FLEX-Flexible Diaphragm Analysis**
Analyzes flexible wood or steel building diaphragms for wind or seismic loadings. Outputs input echos, diaphragm reactions, shears at 10th point and end of span, midspan moment and chord stresses for each span, and wall shear.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $300-$500

☐ **JOIST-Wood Joist Allowable Span Determination**
Prepares wood joist span load tables for various loading conditions and material selections. Analysis based on bending stress, shear deflection for live load and dead plus live load. Joist sizes 2 X 6 through 2 X 14, spaced 12, 16, 24 inches.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $100

☐ **RETWAL 2-Retaining Wall Design**
Analysis and design for block or concrete retaining walls. Designed according to concrete strength, steel yield stress, allowable soil pressure and slope of retained earth. Determines concrete thickness, footing requirements, reinforcing requirements and height of each block size.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $475-$800

☐ **SGEN-SPSTRESS Input File Generator**
Conversational input data generator program for SPSTRESS program. Outputs plot including joint and member numbers, partially scaled to represent shorter or longer moments.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $300-$500

☐ **SIM PBM-Simple Span Beam Analysis**
Analyzes simple span beams with/without cantilever under live or dead loading. Loads chosen from 16 types or shapes, combined for maximum amounts and deflection coefficients. Live load is skip loaded for maximum design values. Moment values given at 1/12 points.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $125-$200

☐ **STLBMU/STLBMA**
Analysis and design of structural steel beams for uniform loads, simple beam and cantilever loading with applied end moments and axial loads for struts and members. Investigates gravity, seismic and wind loading conditions. Determines inflection points and compares with unbraced lengths.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $525-$850

☐ **STLCOLI-Steel Column Investigation and Design**
Investigation and design of structural steel columns. Studies axial load and gravity moments in two directions and earthquake or wind axial loads and moments. Designs lightest column section, compact/noncompact sections. Takes lateral support reductions, computes column end conditions.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $375-$650

☐ **STRCHK - SPSTRESS Check**
Design of steel beams or columns. Checks against SPSTRESS results. Determines inflection points and compares with unbraced length, verifies maximum deflection. Adds three factored loadings before applying them to member and accommodates wind or earthquake design stresses.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $300-$500

☐ **STRESS-SPSTRESS General Structural Systems Analysis**
Linear analysis for 2D/3D structures subject to all loading types. Computes displacements, forces and reactions for plane truss/frame/grid and space truss/frame. Members assumed to be slender and prismatic. Non-prismatic handled through stiffness matrices or method of sections.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $1,250-$2,500

☐ **WELDBM-Welded Steel Girder Investigation and Design**
Analyzes, determines size and designs simple-span tapered or welded steel girders according to AISC code with H/T limited to 220 for uniform loading or any loading of girder. Program can be used for parallel or tapered flange up beams.
IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $400-$650

SYSTEK, INC.

☐ **Continuous Beam Analysis**
Analyzes up to 20 spans with up to 40 concentrated loads and uniform load on each span. Prismatic or variable cross-sections. Beam ends fixed, free or cantilevered. Outputs end shears and end moments.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1983 ☐ Cost: $47

☐ **Structural Analysis**
Input consists of joint coordinates, member incidences, support conditions, member releases, support settlements, temperature deformations and joint and member loads. Outputs joint displacements and rotations, member end forces and reactions.
IBM PC ☐ 128 KB req. ☐ Copies sold: 200 since 1984 ☐ Cost: $47

TECHART ASSOCIATES

☐ Program SST

Data base of AISC Steel Section Tables. Accesses and displays properties of single section or group of sections. Adds/deletes sections from data base.

IBM PC ☐ 64 KB req. ☐ Introduced: 1983 ☐ Cost: $150

TECHSOFT

☐ B-Sys/1

Selects steel framework for commercial buildings. Prompts user for building design parameters. Calculates and searches through pre-programmed vendor data to make selection of proper component parts. Establishes structural load requirements.

IBM PC ☐ 128 KB req. ☐ Introduced: 1985 ☐ Cost: $834

☐ C-Sys/1

Calculates concrete columns, beams and panned floors for commercial buildings. User selects concrete mix strength and building parameters. Program selects beam size and number of steel bars required to meet load.

IBM PC ☐ 128 KB req. ☐ Introduced: 1986 ☐ Cost: $834

TRUCOMP

☐ Intemp

Solves 2D finite element inverse heat conduction problems. Figures unknown flux-time histories at unlimited specified locations. Includes 1D elements, 2D triangles and planar/axisymmetric quadrilaterals. Constant material properties can be orthotropic and vary per element.

IBM PC ☐ 512 KB req. ☐ Cost: $995

☐ Tempest

Performs 2D nonlinear finite element transient heat transfer analysis including latent heat effects. Includes 1D elements, 2D triangles and planar/axisymmetric quadrilaterals. Accommodates temperature dependent, isotropic and orthotropic materials. General boundary conditions including nonlinear convection, radiation and earth/surface balance with snow cover.

IBM PC ☐ 512 KB req. ☐ Cost: $995

☐ Tempost

Accesses data file produced by Tempest. Plots model geometry with node, element or material numbers. Produces temperature contour plots of automatically- or user-selected isotherms. Time-history plots of nodal temperatures and user-selected isotherm along nodes line location. Batch or interactive input.

IBM PC ☐ Cost: $275-$1,500

UNIK ASSOCIATES

☐ General Engineering

Includes 50 engineering programs including mathematics, hydraulics, heat exchangers, structural design, spring design and gear forces.

IBM PC ☐ 48 KB req. ☐ Copies sold: 50 since 1983 ☐ Cost: $195

UNIVERSAL SOFTWARE APPLICATIONS, INC.

☐ Stress

Calculates forces, moments and displacements and analyzes trusses, continuous beams and plane frames. Number of joints (maximum 25), members (maximum 75) and loadings (maximum 99) increase with additional memory.

IBM PC ☐ 64 KB req. ☐ Copies sold: 20 since 1980 ☐ Cost: $500

VON GUNTEN ENGINEERING SOFTWARE, INC.

☐ Shear

Calculates triaxial, unconfined and direct shear tests. Displays Mohr's circles and envelope.

IBM PC ☐ 256 KB req. ☐ Cost: $499

WILEY PROFESSIONAL SOFTWARE

(division of John Wiley and Sons, Inc.)

☐ Area Moment of Inertia

Calculates area moment of inertia WK2, neutral axis location and radii of gyration for non-standard built up section. Built-up section consists of 25 components, either rectangular cross-section or structural shapes combined in any orientation.

IBM PC, XT ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $125

☐ Beam Analysis

Consists of 24 modules to perform classical stress analysis on single-span, horizontal beam problems with varying loads and end conditions. Twenty modules handle pre-defined problem, and 4 handle any loading conditions.

IBM PC, XT ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $125

☐ Beam Analysis with Selection

Consists of 20 single-span beam modules that analyze determinant and indeterminant conditions. Analyzes beams which are supported at both ends or are cantilevered. Changes elasticity value depending on material.

IBM PC, XT ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $200

☐ Column Buckling

Calculates safe and actual stresses from concentric and off-center loads, utilizing the Chicago or AISC building codes or user safety factor.

IBM PC, XT ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $125

☐ Continuous Span Analysis

Calculates moments at supports of multiple span problems containing uniform and point loads, fixed or pinned ends or cantilevered ends.

IBM PC, XT ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $125

☐ Spring Design

Selects the best design on input mean diameter, free length, working deflection and leading. Contains calculation routines for analyzing existing springs and for spring constant determination. With helical springs, sheer modulus default values for carbon and stainless steel are provided, or the user can specify a value.

IBM PC ☐ 64 KB req. ☐ Introduced: 1985 ☐ Cost: $125

☐ Steel Assembly Weight Determination

Determines weight of steel subsections such as rounds, rectangles, structural shapes or specials and categorizes and sums for total weight.

IBM PC, XT ☐ 48 KB req. ☐ Introduced: 1984 ☐ Cost: $125

ZEILER-PENNOCK, INC.

☐ Flat Plate/Slab

Designs or analyzes two way flat plate or flat slap with or without edge beams. Uses stiffness matrix method of analysis for calculations.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 25 since 1975 ☐ Cost: $995

☐ Olivetti Structural Pack

Linear analysis of any elastic, statically loaded, framed structure mathematically modeled as plane frame, plane truss, grid, space frame or space truss. Uses stiffness/displacement method analysis technique.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 100 since 1972 ☐ Cost: $1,995

☐ Precast/Prestressed Concrete Programs

Designs, determines or calculates design strength, corbel design, bearing ledge design, wall panel loads, section properties, torsion design, studded plate design, panel properties, and bearing plate design.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 75 since 1978 ☐ Cost: $1,995

☐ Structural Analysis and Design

Designs or analyzes continuous beams, plane frames, indeterminate trusses, cantilever retaining wall, steel column, laterally loaded pier, section properties, ultimate moment, prestressed beams, reinforced concrete column, concrete beam, wood column, wood beam, lateral shear wall and ring frame.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 125 since 1973 ☐ Cost: $3,595

TELECOMMUNICATIONS

ACCOUNT-A-CALL CORP.

☐ Inventory Control System

Tracks vital telecommunications equipment information. Provides information about telephone equipment, tracks equipment problems, maintains statistics on vendor maintenance, defines and references cabling/circuits of local and remote networks and maintains pricing information. Includes GL interface and trouble ticket control. PC online update available.

IBM PC, XT ☐ Cost: $12,000

☐ ITAS (Interactive Traffic Analysis System)

Performs optimizations and/or simulations of voice communications network. Calculates number of trunks needed to meet service requirements. Supports WATS, Foreign Exchange (FX), leased lines, toll trunks and Special Common Carriers (SCC). Accepts summary traffic information.

IBM PC ☐ 512 KB req. ☐ Cost: $5,000

ALPHANETICS

☐ Auto Dialer

Telephone number data base and dialing program using autodialing modem. Uses access codes and Sprint or MCI dialing reduced to single keystroke. Prints sorted master directory for reference and dialing. Allows 1,800 names, addresses, telephone numbers and comment lines.

IBM PC, XT, PCjr ☐ 64 KB req. ☐ Copies sold: 12,000 since 1981 ☐ Cost: $50

AMERICAN INTERNATIONAL COMMUNICATION CORP.

☐ GRAM-A-SYST DCS 200

Western Union Easylink service interface. Accesses services from FYI, Western Union's help, electronic mail, cablegram, telegram and telex, both domestic/international. Automatic archiving of incoming/outgoing messages, telex directory, name and address directory and built-in editor.

IBM PC ☐ 192 KB req. ☐ Copies sold: 2,000 since 1983

☐ TLX-A-SYST DCS 300

Interface to ITT Timetran and Interactive Telex, ITT Speedmail, and ITT Update. Autolog-on, full screen editor, auto archive, message traffic log, built-in directories for Telex numbers, names and addresses, built-in clock, off-line message preparation, 300/1200 baud.

IBM PC ☐ 256 KB req. ☐ Copies sold: 2,000 since 1982

AMERICAN TELEPROCESSING CORP.

☐ Proto.Call

Features full concurrency, auto-dial, auto-answer, and message file system. Contains editor, manual/automatic calls. All messages stamped and logged. Password, encryption and audit trail reports.

IBM PC ☐ 256 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $795

APPLIED VOICE TECHNOLOGY, INC.

☐ PHONEXPRESS

Voice processing. Voice store and forward, data collection and dissemination. Includes card for digitizing voice and connecting to telephone. Plugs into PC expansion slots. Provides voice messaging and response to touchtone entry. Expandable, concurrent and interfaces with spreadsheets and DBMS.

IBM XT, AT ☐ 640 KB req. ☐ Cost: $6,000

AT&T INFORMATION SYSTEMS

☐ Telephone Manager/Electronic Mail

Telephone call management, on-screen directory, call history and dialing services. DEC VT100 terminal emulation and file transfer capabilities under Xmodem, X.PC and PC 6300 protocols. Sends and receives files. Compatible with AT&T Mail and AT&T's Message Transfer Architecture.

☐ Cost: $279

BCR ENTERPRISES, INC.

☐ FAST (Financial Analysis Software for Telecommunications)

Problem solving and tutorial. Calculates cash flows and present values for telecom capital equipment in lease, purchase, or installment purchase situations. Stores proposals for future retrieval and/or modification. Print option and cash flow analysis.

IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $395

☐ First Course in Telephone Traffic Engineering

Traffic problem solving and tutorial for network design and training. Records real or hypothetical traffic data to simulate particular situations. Provides key traffic and cost information through what-if methodology.

IBM PC ☐ 64 KB req. ☐ Copies sold: 900 since 1983 ☐ Cost: $395

BENTON, SCHNEIDER & ASSOCIATES, INC.

☐ Caps

Summarizes and reports detailed usage for cost allocation and provides basic traffic statistics for network analysis. Incorporates service and equipment costs into existing reporting structures. Automated procedures available to conduct network analysis with generated data.

IBM XT ☐ 64 KB req. ☐ Copies sold: 25 since 1979 ☐ Cost: $9,000

CCMI/MCGRAW HILL

☐ Call-Pricer

Allows definition of rates of local resellers. Prices MTS service by single call or entire bill. Cost optimizes 6-digit translation for PBX loading.

IBM PC, XT, AT ☐ Copies sold: 250 since 1985 ☐ Cost: $295-$895

CMC INTERNATIONAL, INC.

☐ PC-Dial/Log

Consists of software and PCB that digitizes voice messages. Messages stored and manipulated to accommodate outgoing or incoming calls. Makes calls in unattended mode. Provides 200 member user-defined phone book. Accommodates 20 messages and records 40 incoming calls.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 2,000 since 1984 ☐ Cost: $595

COM DEV, INC.

☐ Centrad

SMDR network polling system. Retrieves usage data stored in remote STU SMDR storage units. Provides sync link to host. Transmits data to be processed. Supports unattended polling operation. Produces polling activity reports.

IBM PC, XT, AT ☐ 512 KB req. ☐ Introduced: 1986 ☐ Cost: $6,000-$12,000

COMMERCIAL SOFTWARE, INC. (NY)

☐ TASC (Telemanagement Applications Support Center)

Integrated or standalone modules include CADETS, TEMS, IDS, IMPACT, TRAMS, NODE/1 and NDMS. Provides work order preparation, equipment and service IC, cable plant management, directory maintenance, call detail recording processing, network design/engineering/management, telecommunications cost allocation and trouble reporting.

IBM XT ☐ Introduced: 1978

COMMONWEALTH COMPUTER ASSISTANCE FOR BUSINESS

☐ Redial

Redialer for Symphony. Provides menu of telephone numbers. Prompts for whether and how many times to redial. Built-in range for capturing telecommunication session log. Includes starter set of numbers, comunications settings sheet and newsletter article describing Symphony telecommunications and Redial.

IBM PC, XT, AT ☐ 9 KB req. ☐ Introduced: 1986 ☐ Cost: $20

COMMUNICATIONS ANALYSIS

☐ PULSE

Telephone call accounting system. Designed for firms that bill-back clients for telephone expenses. Holds 10,000-12,000 call records per diskette. Report writer. Supports PBXs that output records via RS/232 interface. Call buffer is available.

IBM PC ☐ Cost: $1,995-$2,495

COMPUTER COMMUNICATIONS SPECIALISTS, INC.

☐ ACCA System

Allows IBM Series 1 or PC to communicate with batch buffered async device via voicegrade telephone. Uses portable terminals in many commercial/industrial applications. Allows 1- or 2-way communication between terminal and host.

IBM PC, XT, AT ☐ 128 KB req. ☐ Copies sold: 400 since 1980 ☐ Cost: $5,000-$25,000

COMPUTERISED BUSINESS SYSTEMS, INC.

☐ CTS (Computerized Telephone Traffic System)

Polls data from traffic accumulators. Reports daily, weekly and average business day peg counts. Includes hourly, 24-hour and maximum busy hour usage engineering studies. Hourly data, daily/weekly summary and study analysis holding times. Reports annual traffic factors and conversation time only.

IBM PC ☐ 640 KB req. ☐ Copies sold: 8 since 1985 ☐ Cost: $19,995

CONTEL INFORMATION SYSTEMS, INC.

(subsidiary of Continental Telecom, Inc.)

☐ MIND-Voice

Designs/optimizes single-site voice communications networks. Handles networks consisting of common carrier tariffs.

IBM PC ☐ 500 KB req. ☐ Copies sold: 15 since 1982

DIGITAL COMMUNICATIONS ASSOCIATES, INC. (DCA)

☐ ETI Line Pricer

Calculates rates for voice, data, and other private line services specified by interstate tariffs of AT&T, MCI, GTE and other common carriers. User can forecast and evaluate line charges and termination costs.

IBM XT, AT

ECONOMICS AND TECHNOLOGY, INC.

☐ PLP (Private Line Pricer)

Allows managers to plan, manage and control interstate private-line network costs. Evaluates costs under AT&T and LEC special access tariffs. Prices point-to-point and multi-point circuits for 4 service types. Contains 48 state V and H coordinates.

IBM PC, XT ☐ 512 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $2,495

FTCC MCDONNELL DOUGLAS INTERNATIONAL TELECOMMUNICATIONS CO.

☐ Message Handler

Turns IBM PC or XT into telex or messaging center. Sends and receives messages, retries calls, validates answerbacks, queues messages, records transactions and archives messages. Accesses FTCC's international and domestic communications services and dial-up DDD services.

IBM PC, XT, AT ☐ 256 KB req. ☐ Introduced: 1984 ☐ $250

GALACTICOMM, INC.

☐ Software Breakthrough

Builds multi-user, dial-up applications. Supports 64 simultaneous users, modem function control, selectable I/O buffer sizes, bidirectional touchtones, busy/ringing/voice detection, parity-error handling, incoming character translation, interactive or transparent-binary operation modes, echo control and channel monitoring.

IBM XT, AT ☐ 128 KB req. ☐ Cost: $7,450

GENASYS CORP.

☐ Telios

Reviewed Jan 1985 p. 130.

Provides micro-to-host or micro-to-micro link. Operates at 110 to 9600 baud. Works with any modem. Uses available memory as screen buffer, allows scroll back. Features user-definable color, port switching commands, XMODEM and KERMIT file transfer protocols.

IBM PC ☐ 96 KB req. ☐ Copies sold: 800 since 1983 ☐ Cost: $120

GRANADA SYSTEMS DESIGN, INC.

☐ TELDEAR-Audio Response

Data keyed in from any touch tone telephone. Prompts user by digitized voice. All responses recorded on disk. Order collection system available 24 hours. Bank balance inquiries in voice. Industry adjustable.

IBM PC, AT, XT ☐ 256 KB req. ☐ Copies sold: 24 since 1981 ☐ Cost: $17,500

HELICON MANAGEMENT SYSTEMS, INC.

☐ COMCOP

Tracks ROLM CBX user, equipment and trunk problems. Controls equipment inventory. Generates user, system speed and forced authorization code directories. Optional CALLCOP processes calls directly from ROLM CBX's serial interface to generate detail and summary bills, analyze trunk utilization, detect telephone misuse and analyze patterns.

IBM XT, AT

HENSON SYSTEMS, INC.

☐ ADMIN-Remote Administration and REMOTE-Remote End User Node

On-line troubleshooting of hardware and software. ADMIN programs reside at central administration site. Each controls six REMOTE and user nodes. Concurrent end user and ADMIN system execution permitted. REMOTE programs autodial ADMIN program with end user logon and ID.

IBM PC ☐ Copies sold: 3 since 1983 ☐ Cost: $60-$600

HTL TELEMANAGEMENT, LTD.

☐ NTD-1 Long Distance Analyzer

Quantifies number of traffic hours eligible for each trunk group being considered and reports parameters needed for analysis and design. Optional report consisting of breakdown by service area and area code for total number of calls, hours and cost is available.

IBM PC, XT, AT ☐ 256 KB req.

☐ NTD-4 Traffic Engineer's Tool Kit

Determines line numbers required to obtain grade of service, grade of service of existing configuration, traffic carried on each trunk in group, costing for set of lines/hours, queue period and desired queuing parameters, and optimization involving 1 WATS-like trunk group with overflow to DDD.

IBM PC, XT, AT ☐ Cost: $500-$895

☐ NTD-6 Switch Designer

Designs least cost configuration of trunk groups or analyzes specified configurations including up to 10 FX groups, intrastate WATS, dedicated OCC as first choice routing, 5 AT&T WATS bands and DDD. Includes current AT&T WATS and major OCC rate files.

IBM PC, XT, AT ☐ 512 KB req.

☐ NTD-7 ACD Designer
Configures telephone trunking facilities to accommodate calling and agent response patterns. Utilizes historical traffic studies to assist in planning future agent staffing and trunking configurations. Performs economic trade-off analysis of number of agents vs. cost of WATS, FX or lost calls.
IBM PC, XT, AT ☐ 256 KB req.

☐ NTD-9 Enhanced Switch Designer
Optimizes configurations with over 1,000,000 hours per month with wide range of facilities. Permits user to constrain certain trunk groups within design to existing number of circuits and then reoptimizes.
IBM PC, XT, AT ☐ 512 KB req.

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Personal Telephone Manager Program
IBM no. 6429-190. Connects telephone to PC for creating and maintaining telephone directories and reminders, facilitating 1-key dialing, audible call progress and redial lists.
IBM PC, XT, AT, 3270-PC, 3270-AT ☐ 108 KB req. ☐ Cost: $70

THE IMS GROUP

☐ Telephone Software
Allows communications engineers and managers to manage and control telephone systems' design, operation and costs. Operates from single data base. Modules include equipment manager, maintenance manager, cable manager, call accounting manager and message center manager.
IBM PC ☐ Cost: $10,000

THE INFO GROUP

☐ ATMS (Automated Telecom Management System)
Designed around relational data base, applications include CDR pulling, call accounting, work order, inventory, trouble management, cable management, directory and network optimization.
IBM AT ☐ 256 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $30,000-$200,000

☐ Info-Call
Collects data from multiple PBXs. Combines activity from varying locations. Handles multiple carrier types. Interfaces with other facility management software.
IBM PC, AT ☐ 128 KB req. ☐ Copies sold: 150 since 1979 ☐ Cost: $15,000-$30,000

☐ Network Optimizer
Optimizes network trunking configuration based on actual or projected traffic and various vendors offerings. Uses output from Info Group's Info-Call. Designs single and multiple node configurations.
IBM PC ☐ 128 KB req. ☐ Copies sold: 50 since 1980 ☐ Cost: $7,500

☐ TFMS (Telecom Financial Management System)
Financial controls on voice and data telephone bills, expenses and vendors. Records billing information on formatted screens. Actual to budget, percent change, YTD, summaries by varying categories and exception reporting. Integrates into other Info Group packages.
IBM AT ☐ 256 KB req. ☐ Copies sold: 10 since 1984 ☐ Cost: $15,000-$20,000

INFORTEXT SYSTEMS, INC.

☐ OS Call Accounting System
Provides details by extension, client or trunk to bill clients or departments and manages phone system. Standard reports include detail, summary, exceptions, usage and traffic analysis. Handles 100-2,500 stations and 10,000-350,000 call records.
IBM PC

INSTANT INFORMATION, INC.

☐ Instantcom TMT
Accesses ITT's Timetran service for interactive or store/forward Telex messaging. Auto-dial and auto-logon. Formats message. Prints and archives on-line sessions. Built-in word processor or imports other word processing programs. Message management. Includes general communications module.
IBM PC ☐ 256 KB req. ☐ Copies sold: 3,000 since 1984 ☐ Cost: $120

INSTOR CORP.

☐ Call Analyzer
Provides call costing, reporting and high-volume data capture from PBXs and electronic key systems. Includes V and H costing and rates for OCC, AT & T, local, intrastate, interstate and international calls.
IBM AT, XT ☐ 256 KB req. ☐ Copies sold: 100 since 1983 ☐ Cost: $9,000

INTERNATIONAL INFORMATION SERVICES

☐ Easytalk
Telecommunications program for Western Union Easylink. Function keys provide automatic dial up, sign on and transmission of message files. Saves incoming messages. Printer toggle allows optional hard copy for communication activity.
IBM PC ☐ 96 KB req. ☐ Copies sold: 450 since 1983 ☐ Cost: $95

KUSTOM ELECTRONICS, INC.

Path Bank Division

☐ Micro-KAD
Computer-aided dispatch system for business or public safety agencies. Features user configurable screens. Provides several access levels. Reports include activity analysis by zone, day, hour or average response times.
IBM PC, AT

MAINTENANCE AUTOMATION CORP.

☐ Telephone Chief Software
Tracks and manages installation and maintenance of telephone systems. For systems of more than 300 lines.
IBM PC ☐ 256 KB req. ☐ Copies sold: 5 since 1986 ☐ Cost: $3,000-$9,000

MCI INTERNATIONAL

☐ COMM Desk
Accesses MCI International Telex and MCI Mail communication services. Allows software in background mode to run simultaneously while communicating. Collects mail, sends and receives messages and maintains system and message status logs. Provides menus, help screens and built-in editor.
IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 150 since 1985 ☐ Cost: $295

MICRO-SYSTEMS SOFTWARE, INC.

☐ Miracle
Telecommunications built around 4 window spreadsheet and word processor. Downloads information and reformats into spreadsheets, charts, technical and functional analyses, and word processing. User may write agenda for tasks to be performed unattended.
IBM PC ☐ Cost: $299

☐ MTERM II
Allows computer to function as terminal. Provides functions for file transfer and on-line data storage/retrieval. Features character mode translation, user-defined macrokeys, spooled printer support and auto-dial support. Supports direct to disk file transfer in xmodem and xfer protocols.
IBM PC ☐ 48 KB req. ☐ Copies sold: 2,500 since 1982 ☐ Cost: $120

MICROCORP

☐ Intelliterm
Communicates with mainframe, mini, and micro via telephone modem or null modem cable. Accesses data base and provides electronic mail, electronic shopping, computerized typesetting and teleconferencing. Features split screen mode, pre-selection of multiple files to transmit and simultaneous, bi-directional file transfer.
IBM PC ☐ 48 KB req. ☐ Copies sold: 500 since 1982 ☐ Cost: $150-$325

OMNI COMPUTER SYSTEMS, INC.

☐ Flash-Forward
Integrated call forwarding and referral. Direct-dial to individual departments, 24 hour access without operator assistance, inbound call statistics for market research, sales lead tracking and quality control. Generates reports showing call traffic, end-user demographics and inbound call routing profiles.
IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 6 since 1985 ☐ Cost: $3,500-$70,000

ORIGIN, INC.

☐ Call Tracker
Stores contents of telephone conversations in summary form, and when to follow up. Searches by contact, company, group, class, status, time zone or follow up date. Provides mailings, conversation history and overview reports, and phone books.
IBM PC, XT, AT ☐ 62 KB req. ☐ Copies sold: 100 since 1984 ☐ Cost: $325

QUALITY SOFTWARE, INC.

☐ Call
Sets up parameters for target service, retaining and cataloging information for future reference. Receives from most word processing and computer systems.
IBM PC, XT, PCjr ☐ 64 KB req. ☐ Introduced: 1982 ☐ Cost: $150

SANYO BUSINESS SYSTEMS CORP.

(Computer Division)

☐ Sanycom
Operates in terminal mode and file transfer mode, performs auto-dial and supports personal telephone directory. File save feature stores currently displayed screen data on disk and transmits command sequences. Communicates with any system running MODEM 7. Uploads/downloads ASCII files.
IBM PC ☐ 64 KB req. ☐ Copies sold: 2,500 since 1983 ☐ Cost: $105

SONA SYSTEMS CORP.

☐ Call Monitor
Telephone system monitoring and control. Applicable to government departments, boards and agencies, professional service firms, hospitals, schools and other institutions and businesses with monthly telephone charges in excess of $2,500.
IBM PC ☐ 640 KB req. ☐ Cost: $3,995

SOURCEVIEW SOFTWARE INTERNATIONAL

☐ Source Phone Billing System
Allows independent telephone utilities to be computerized. Presents federally required components related to chart of accounts. Converts tapes of telephone toll charges received on magnetic tape to invoice. Calculates monthly rate, city and excise taxes.
IBM PC ☐ Cost: $1,995

STAR TECHNOLOGIES, INC.

☐ Star*Message
Electronic telephone message system. Utilizes audio and visual signal, prioritizes messages and monitors personnel. Records each call for action taken, deletes it from day's system or forwards it to another user.
IBM XT ☐ 128 KB req. ☐ Copies sold: 700 since 1983 ☐ Cost: $2,000

STOK SOFTWARE, INC.

☐ TeleSys

Provides remote communication with computer from Touch Tone telephone. Includes remote OE, voice message forwarding, home banking, dictation, PBX unattended answering and intelligent automated operator assistance. Handles up to 4 incoming phone lines simultaneously.

IBM PC, XT

SUMMA FOUR

☐ MCX MAXX

Handles call accounting, on-demand reporting, account code tracking, scheduled batch reporting and data base management. Stores over 100,000 call records. Computes call prices using pricing data base. Multi-level password structure.

IBM PC

TEAL COMMUNICATIONS INTERNATIONAL, INC.

☐ Around

Communicates with information services, electronic mail services, mainframes and other PCs. Sends, receives and handles electronic mail. Full-screen editor, directory of frequently-called people/services and notepad for composing/editing messages. Timed reminders and timed routes. Simultaneous operation with communications.

IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1985 ☐ Cost: $190

TELCO RESEARCH CORP.

☐ Basic TOSCA (On-Site Cost Allocation)

SMDR processing with cost allocation. Records one PBX and handles 2,000 stations and 45,000 to 80,000 calls per billing period (XT) and 4,000 stations and 120,000-150,000 calls per billing period (AT). Generates station detail and trial balance reports. Allocates equipment and variable costs.

IBM XT, AT ☐ 384 KB req. ☐ Copies sold: 25 since 1985 ☐ Cost: $4,900-$9,800

☐ Extended TOSCA (On-Site Cost Allocation)

SMDR processing with cost allocation. Records 1 to 15 PBXs and handles 2,000 stations and 45,000 to 80,000 calls per billing period (XT) and 4,000 stations and 120,000 to 150,000 calls per billing period (AT). Generates station detail reports.

IBM XT, AT ☐ 384 KB req. ☐ Copies sold: 550 since 1983 ☐ Cost: $14,500

☐ On-Site Inventory Control

Performs telecom equipment recordkeeping and cost accounting. Tracks details for 2,000 stations. Manages modems, data terminals, PCs, office equipment and furnishings.

IBM PC, XT, AT ☐ 384 KB req. ☐ Copies sold: 25 since 1984 ☐ Cost: $5,500

☐ Traffic Statistics

Generates daily detail, facilities used, station traffic, destination dialed and area code reports. Analyzes long distance telecommunications systems.

IBM XT, AT ☐ 384 KB req. ☐ Copies sold: 450 since 1983 ☐ Cost: $3,000

☐ TRU Data Recorder/Poller

PBX call recording package. Provides error-free capture of call detail data from PBX with SMDR feature. On-line inquiry, monitoring and reporting; automatic alarms and backup capability; flash management reports; and optional single-location cost allocation reports.

IBM XT, AT ☐ 384 KB req. ☐ Copies sold: 900 since 1983 ☐ Cost: $6,000 and up

☐ 1 to 5 Optimizer

Long distance analysis. Designed to optimize telecom systems using WATS and OCC (Other Common Carriers) facilities. Includes ARS/Erlang B route selection, automated retry, automated queuing and 5 WATS band optimization. Optional component of TRU system.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 40 since 1984 ☐ Cost: $1,000

TELECOM MANAGEMENT

☐ ACD Manager

Identifies incoming calls by type such as wrong numbers, credit inquiries and orders. Prints reports on daily basis. Generates user-defined, history, custom, exception or management reports based on captured call data to reflect trends.

IBM PC, XT, AT ☐ 256 KB req.

☐ Inventory

Inventories voice and data telecommunications related equipment and services. Prints selected items or entire inventory file. Reports by station, department, division, summary and location. Provides duplicate validation, history, purchase and lease cost allocation.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $3,000-$6,000

☐ Pollable Memory/TSA

Storage device accommodates 2,000 to 448,000 of call records. Compression techniques utilized to store greater amounts of call records. Status checks provide instant verification of last record polled and remaining storage capacity. Performs error checks to protect against garbled transmission.

IBM PC, XT, AT ☐ 64 KB req. ☐ Cost: $450-$5,000

☐ Stand Alone Call Accounting

Call accounting and billing, station directory, system management, and station message detail recording. Provides call detail reporting. Available for corporate, shared tenant, resale and lodging applications.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $13,000-$15,000

☐ Traffic Engineering

Network optimization, configuration and traffic reporting system. Shows potential traffic availability to WATS, FX, LATA WIDE and OCCs. Gives information necessary for network design and optimization. Provides actual traffic information from current mix of facilities. Could-be reports available.

IBM PC, XT, AT ☐ 256 KB req.

☐ Traffic Planner

Determines correct trunking requirements, grade of service and costs based on actual outgoing traffic. Reports include summary, traffic carried, lost, average and total rate per minute, total cost and what-if projections.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $1,000

☐ Work Order/Problem Tracking

Produces printed work order, vendor order and PO for any type of move, change, add, delete or repair of voice and data communications equipment.

IBM PC, XT, AT ☐ 256 KB req. ☐ Cost: $3,000-$6,000

TELECOM SOFTWARE

☐ Phonbill

Maintains records of phone bills for 24 month period. Displays or prints monthly expense reports.

IBM PC ☐ 128 KB req. ☐ Copies sold: 5 since 1985 ☐ Cost: $200

☐ WATSTEST

Traffic engineering, long distance telephone bill analysis. Compares costs to WATS. Determines WATS bands and number, length and cost of calls. Estimates savings of WATS compared to DDD based on results of each band.

IBM PC ☐ 128 KB req. ☐ Copies sold: 77 since 1983 ☐ Cost: $150

TELECOMMUNICATION SYSTEM TECHNOLOGY, INC.

Tele-Tech Services Division

☐ V and H Coordinate File

Lists area codes, exchanges, city names with V and H coordinates for US and Canada. Call pricing based on mileage calculations. File available on nine track, 1600 bpi magnetic tape or 16 eight inch or 5-1/4 diskettes.

IBM PC ☐ 32 KB req. ☐ Copies sold: 100 since 1982 ☐ Cost: $500

TEXAS INSTRUMENTS

☐ SATPLAN

Designed to support Global Positioning System (GPS). Selects 4 best satellites for each selected date and location. Indicates precise satellite rise/set time, satellite azimuth and elevation, satellite visibility profile and PDOP/NAV recommended mode. Produces graphic or tabular results.

IBM PC ☐ 256 KB req. ☐ Cost: $350

U.S. INTELCO NETWORKS

☐ CBS (Carrier Billing System)

Allows independent telephone company to bill long distance carriers. Meets deregulation requirements. Bills recurring, non-recurring and usage charges for common carrier.

IBM PC ☐ 128 KB req. ☐ Copies sold: 120 since 1984 ☐ Cost: $3,995

VISUAL HORIZONS

☐ Transgraphic

Telecommunications package that transmits PIC files. Sends files in sequence.

IBM PC ☐ Cost: $150

WOLF DATA SERVICES, INC.

☐ Customer Service Information System

Installed equipment inventory and configuration records. Activity in-process records. Detailed service call history. Automatic creation of billing transactions and invoices for AR processing. Costing and posting of inventory issues for repair or installation.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 10 since 1982

XIOX CORP.

☐ Large Business Series

Telephone management for general purpose business applications. Interfaces with equipment to monitor and analyze use. Call pricing, screening for lengthy or expensive calls, financial accounting and traffic analysis.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 22 ☐ Cost: $3,900-$14,000

☐ Phonechek

Manual-entry call accounting for small businesses or professionals with less than $1,000 per month long distance bill. Sorts calls by date, cost, area code, extension and account code.

IBM PC, XT, AT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $75

☐ Pro-Times

Telephone management for attorneys, accountants, architects and consultants who bill expenses to clients. Interfaces with equipment to monitor and analyze use. Posts charges to accounts as calls are made. Pricing, screening for lengthy or expensive calls, financial accounting and traffic analysis.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 18 since 1984 ☐ Cost: $2,875-$7,475

☐ Small Business Series

Supports call accounting. Call pricing, screening for lengthy or expensive calls, financial accounting, traffic analysis and multi-tasking capabilities. Interfaces with telephone equipment to monitor and analyze use.

IBM PC, XT ☐ 256 KB req. ☐ Copies sold: 22 since 1985 ☐ Cost: $875-$2,875

☐ Times I and II

Telephone management for hotels, motels, hospitals and nursing homes. Interfaces with equipment to monitor and analyze use. Includes pricing of guest, patient and administrative calls; screening for lengthy or expensive calls; financial accounting; and traffic analysis.

IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Copies sold: 50 since 1982 ☐ Cost: $2,500-$7,500

XTEND COMMUNICATIONS

☐ CDR PLUS

Processes information provided by PBX in real time. Provides phone cost allocation reports with timing, pricing and ID of called city/state. Monitors employee calls.

IBM PC, XT, AT ☐ 512 KB req. ☐ Copies sold: 120 since 1982 ☐ Cost: $8,400

☐ XTENDED ACD

Reports and tracks Northern Telecom SL-1 and SL-100 systems that have automatic call distributor feature activated. Reports agent groups, queues, positions and trend, and trunk routes.

IBM AT

VIDEOTEX

AT&T

Electronic Photography and Imaging Center

☐ NAPLPS Terminate and Stay Resident Software (PLPTSR)

Develops PC-based programs employing graphics encoded with SRM NAPLPS frames. Displays NAPLPS frames. Used with Truevision Video Display Adapters.

IBM PC ☐ 130 KB req. ☐ Introduced: 1985 ☐ Cost: $5,000

☐ PC NAPLPS Decoder

Decodes SRM NAPLPS and ASCII frames for access to SCEPTRE videotex services. Emulates SCEPTRE terminal including X.25 LAP B sync data communications capability. Used with AT&T Video Display Adapter.

IBM PC, XT, AT ☐ 192 KB req. ☐ Introduced: 1984 ☐ Cost: $150

DATA TRANSLATION, INC.

☐ Videolab

For real-time video digitization and display applications. Provides B&W or color imaging capabilities for applications in industrial testing, inspection and assembly and scientific and medical imaging. Image processing subroutine library for user-defined programs.

IBM PC, XT ☐ 128 KB req. ☐ Introduced: 1984 ☐ Cost: $995

DISC INTERNATIONAL, INC.

☐ VIEWBASE

Permits user to communicate with remote computer via CRT, PC adapted television set, telephone and videotex adapter. Uses logical menu structures and color graphics. Accommodates other terminal devices, peripheral equipment and communication links. Accesses telephone trunk network and local PABX.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 75 ☐ Cost: $3,000

FORMIC VIDEOTEX SYSTEMS

☐ Multidec

Micro-based, multi-user videotex host system. Controls multiple users with tree structure, keyword or direct page access. Handles any protocol. Can be expanded from a single stand-alone unit to a full network of interactive terminals.

IBM PC ☐ 256 KB req. ☐ Introduced: 1983

IBM (INTERNATIONAL BUSINESS MACHINES)

☐ Videotex/PC

IBM no. 6410-985; 6316-967. Allows IBM PC, XT, AT, PCjr to serve as videotex terminal. Sets up communications with host, receives frames for display on color monitor or TV, enters data for transmission to host, saves incoming frames on disk, or views saved copies.

IBM PC, XT, AT, PCjr ☐ 128 KB req. ☐ Cost: $220-$250

☐ VTXGRAF (PC/Videotex Graphic Artist Facility)

Enables IBM PC to create videotex frames (pages of information) combining color graphics and text that appear to end users on videotex terminals.

IBM PC, XT, AT

MBP SOFTWARE AND SYSTEMS TECHNOLOGY, INC.

SEE AD ON PAGE 293

☐ Videotex

Videotex decoder for Antiope, Prestel, CEPT and NAPLPS Videotex standards. CEPT editor and server software capability.

IBM PC

MICROSTAR SOFTWARE, LTD.

☐ Personality + III

Communications for ASCII and NAPLPS data bases. Provides NAPLPS/ASCII terminal with upload/download and slide show. Billboard provided. Supports different graphics cards with hi-res capability. Accesses NAPLPS graphics information or ASCII data bases.

IBM PC, XT, AT, 3270-PC ☐ 256 KB req. ☐ Introduced: 1985 ☐ Cost: $159

MICROTAURE, INC.

☐ Teligraph

Implementation of NAPLPS videotex standard allowing page creation, on-line decoding, graphics editing and slideshow preparation.

IBM PC, XT, AT, PCjr ☐ 256 KB req. ☐ Cost: $399

TAYSON INFORMATION TECHNOLOGY, INC.

☐ ABLE

Color graphic cable TV application system. Creates color graphic frames, schedules sequential displays of frames and sends frames to cable head end for broadcast. Graphics/character generator with frame scheduler.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 5 since 1982 ☐ Cost: $2,000; lease terms available

☐ DIDS (Distributed Information Database System)

Distributed public access information system. Includes PC-based information kiosk local frame storage. Kiosks are updated by dial-up modems or diskette, from central support consisting of networked microcomputers. DIDS supports printer in Kiosk and provides frame statistics.

IBM PC, XT, AT ☐ 256 KB req. ☐ Copies sold: 7 since 1984 ☐ Cost: $15,000 and up

☐ VAST (Videotex Application System)

Videotex DBMS and color graphic frame creation. Creates, telecommunicates, stores and presents frames from local microcomputer. Frames loaded from remote services into VAST structured data base. Multiple presentation parameters and modes.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 65 since 1981 ☐ Cost: $499

☐ VITAL (Videotex Integrated Teaching and Learning)

Authoring system for educational and training companies. Creates modules using graphic frames. Variety of access parameters provide flexibility in setting up training module and question structure. Records alphanumeric responses to questions.

IBM PC, XT, AT ☐ 192 KB req. ☐ Copies sold: 6 since 1984 ☐ Cost: $1,000-$6,000

VIDEODIAL, INC.

☐ Inpro

Videotex production tool for creating informational services. Accelerates production of tree-structures. Once created off-line, final structure sent to mainframe. Inserts keywords on- and off-line.

IBM PC ☐ 256 KB req. ☐ Copies sold: 2 since 1985 ☐ Cost: $24,000-$37,000

VIDEOTEX SYSTEMS, INC.

☐ PC-DISPLAY

One-to-11-user host videotex system. Supports combination of local or remote dial-in Prestel and ASCII terminals at varying baud rates. Features data collection response frames, password security, closed user group security and usage monitoring.

IBM PC ☐ 256 KB req. ☐ Copies sold: 250 since 1984 ☐ Cost: $300

☐ PC-EDITOR

Prestel page creation for use either locally or with remote host. Includes full bulk update protocol for updating multiple pages automatically. Includes frame management, telesoftware loader, and interface to data processing applications.

IBM PC ☐ 128 KB req. ☐ Copies sold: 400 since 1984 ☐ Cost: $400

☐ VIDTERM

Transforms PC into Prestel or ASCII terminal with Prestel protocol emulation, autodialing, autologin, page saving, page printing, command sequences and local editing.

IBM PC, PCjr ☐ 128 KB req. ☐ Copies sold: 600 since 1984 ☐ Cost: $200

WANG LABORATORIES, INC.

☐ PC Viewdata Decoder

Expedites retrieval of information needed by entering frame numbers into directory. Requires industry standard color monitor, Wang Industry Standard Monitor Card and modem if user is going to access remote data bases.

IBM PC

WOLFDATA, INC.

☐ NAPLPS Decoder Software

IBM PC ☐ 128 KB req. ☐ Cost: $200

☐ Prestel Decoder Software

IBM PC ☐ 64 KB req. ☐ Introduced: 1981 ☐ Cost: $150

☐ Prestel Editor Interface

IBM PC ☐ 64 KB req. ☐ Introduced: 1981 ☐ Cost: $1,595

REQUIRED READING FOR ALL IBM PC SYSTEMS EXPERTS

If you're a systems expert, microcomputer specialist, or MIS/DP professional working with IBM PCs, you need the comprehensive information PC TECH JOURNAL provides 13 times a year!

It's the only magazine that provides you with the technical information to help you increase the performance of your multi-component system. It talks to systems experts and systems designers in the language you understand—about the applications and products you have to know about!

As part of your annual subscription to PC TECH JOURNAL, you'll receive the special PC TECH JOURNAL Directory issue published in November, the most comprehensive guide and index to the products in the PC marketplace and PC TECH JOURNAL's coverage!

Don't leave a gap in your required reading, subscribe to PC TECH JOURNAL now and save 50%!

For faster service call Toll-Free 1-800-852-5200 today!

Send me PC TECH JOURNAL for:
☐ One year (13 issues) for $26.70.
☐ Two years for $53.35.

SAVE 50%!

PC TECH JOURNAL
P.O. Box 2966
Boulder, CO 80322

My department took all the blame

They said that putting data processing in control of PC software was too much trouble. Then people started copying software. When we were sued, guess where the fingers pointed.

Software piracy is a Federal crime. At ADAPSO, the computer software and services industry association, we're working to help data processing managers like you prevent the problem. And to help your company avoid substantial fines and legal fees.

You can help top management protect your company by actively discouraging software piracy. ADAPSO can provide you with sample policy statements and free booklets for company employees.

Just return the coupon. It could put you back in control. And it might keep your department off the hook.

Send this coupon or your business card for more information. Or call us at (703) 522-5055 and ask for Muriel.

ADAPSO, 1300 North Seventeenth Street, Arlington, Virginia 22209

900 Series (Allen Datagraph), p. 88
9081 Rainbow Integrated Terminal (HMW Enterprises), p. 84
9083 Color Graphics Display Terminal (HMW Enterprises), p. 84
9203 Rainbow Dust, Oil, Watertight Terminal (HMW Enterprises), p. 84
9204 Rainbow Terminal for Class 1 & 2 Explosive Environments (HMW Enterprises), p. 84
9380E Series (Digital Associates), p. 97
9600A/B Data Modem (Prentice), p. 154
9600VP (Racal-Vadic), p. 155
9650 FT/PA (Racal-Vadic), p. 155

SOFTWARE PACKAGE INDEX

.dBackup II (SBT), p. 346
(IEW) Information Engineering Workbench (KnowledgeWare), p. 434
/N (Sherborn Software Systems), p. 384
A" (SuperSoft), p. 298
C" (IBM), p. 289
C" (Meridian Software Systems), p. 307
F" (Meridian Software Systems), p. 400
A-Frame (Auto-trol Technology), p. 487
A-SAP-M2M (S2D), p. 493
A-STAT (Rosen Grandon Associates), p. 484
A/DFI (AutoCAD/DPAS File Interchange System) (Electrocon International), p. 425
A/E Marketing Manager (INFOMAX), p. 412
AAMPL (Adaptive Assembly Machine Programming Language) (Adaptive Intelligence), p. 463
ABC (Consortium Software), p. 478
ABC (Application Builder Code Generator) (Extended Applications), p. 365
Abeam (Algor Interactive Systems), p. 487
ABLE (Tayson Information Technology), p. 498
Abstat (Anderson-Bell), p. 478
ACAD (Engineering Services), p. 418
ACADPLUS (Cad Design Systems), p. 416
ACAP (Active Circuit Analysis Program) (Dynacomp), p. 425
ACCA System (Computer Communications Specialists), p. 495
Accelerator (The Intelligent Computer Users Group), p. 377
Access (DCM Data Products), p. 389
Access (Microsoft), p. 272
Access Manager (IBM), p. 248
Access-II (Genesis Microsystems), p. 332
Access-86 (Genesis Microsystems), p. 332
Access/BSC 3270 (Communications Solutions), p. 254
Access/DIA (Communications Solutions), p. 254
Access/SNA APPC (Communications Solutions), p. 254
Access/SNA 3270 (Communications Solutions), p. 254
Access/SNA 3770 (Communications Solutions), p. 254
Access/X.25 (Eicon Technology), p. 275
ACCOL II: Advanced Communications and Control Oriented Language (Bristol Babcock), p. 459
Accolade (Computer Corp. of America), p. 241
AccountMate III - Manufacturing Inventory Control (SourceMate Information Systems), p. 457
Accounts Payable (Solvation), p. 464
Accounts Payable-Open Item (Applied Management), p. 463
Accounts Receivable (Solvation), p. 464
Accu/Plot II (Pick Systems), p. 445
Acculink-Micro (Micro-Integration), p. 259
Accumark (Stolzberg Research), p. 464
ACD Manager (Telecom Management), p. 497
ACE (Advanced Communications Emulator) (Shared Systems Technologies), p. 252
ACE (Asynchronous Communication Emulators) (Communication Resources), p. 254
ACE COBOL (Austec), p. 278
ACEBridge (Austec Conformable Environments) (Austec), p. 355
ACEGen (Austec), p. 363
ACEMenu (Austec), p. 349
ACI/PC (Decision Graphics), p. 418
Acme Visible Software Systems (Acme Visible Records), p. 429
ACNAP (BV Engineering), p. 424
ACRITH (High-Accuracy Arithmetic Subroutine Library) (IBM), p. 481
ACRITH (High-Accuracy Arithmetic) FORTRAN Subroutines (IBM), p. 475
ACS (Decision Graphics), p. 418
ACS (Asynchronous Communications Server) (Novell), p. 276
ACSL/PC (Mitchell & Gauthier Associates), p. 476
ACT.COM (Advanced Color Technology), p. 390
ACT.TXT (Advanced Color Technology), p. 390
Actfil (BV Engineering), p. 424
Action Diagrammer (KnowledgeWare), p. 377
Active Trace (Awareco), p. 336

When you give PC TECH JOURNAL as a gift to a client or business colleague, you're giving valuable information on systems design and integration.

PC TECH JOURNAL is the recognized source of expert facts for designers, integrators and DP/MIS professionals who require current information and sophisticated applications and input.

Give a gift that's delivered 13 times* a year and save 50% off the annual single-copy price of $53.35.

*Your gift subscription includes the special PC TECH JOURNAL Directory issue published in November!

THIS CARD GIVES A COLLEAGUE A YEAR'S WORTH OF VALUABLE INFORMATION AND INSIGHT

FOR FASTER SERVICE CALL TOLL-FREE 1-800-852-5200!

I didn't know it was a crime

They told me those copies of programs I made for my computer could cost the company hundreds of thousands of dollars. Maybe even cost me my job.

Few people realize that software piracy is a Federal crime. At ADAPSO, the computer software and services industry association, we're doing everything we can to inform the public of the problem. And the penalties.

You could unknowingly put your company on the receiving end of a lawsuit by making illegal copies of software. Maybe even put yourself on the receiving end of a pink slip. And that's why ADAPSO wants you to know the facts.

Return the coupon for a brochure that explains the risks of software piracy. It's free. And it may help you keep your job.

Send this coupon or your business card for more information.
Or call us at (703) 522-5055 and ask for Marilyn.

ADAPSO, 1300 North Seventeenth Street, Arlington, Virginia 22209

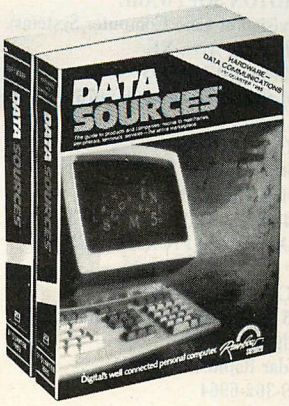
IF YOU FIT THIS DESCRIPTION DATA SOURCES IS JUST WHAT YOU'VE BEEN LOOKING FOR.

You're a data processing professional, or you're the recognized microcomputer specialist in your company. You may be looking to purchase microcomputers for several divisions or departments. You'll need the hardware and software that will allow you to link them to your company's minis or mainframes; the know-how to set up local area networks; the software that will make these new pcs functional and efficient for accounting, word processing, graphics and DP purposes.

So you need product information that's accurate, up-to-date and complete—and you need it *fast*.



To find it, you could wade through stacks of magazines, mailers, catalogs and trade show brochures. You could call in several dozen salespeople.

Or, you can zero-in on your best options—by turning to the *single* resource that contains all the information you need: **DATA SOURCES**.

DATA SOURCES is a two-volume reference factbook that gives you:

- *Comprehensive details on more than 50,000 software, hardware and data communications products*
- *10,000 company profiles for instant access to product manufacturers.*
- *At-a-glance charts that help you make fast product comparisons*

To subscribe, call toll-free 1-800-443-0100, ext. 251. We'll send your first two-volume edition and enter your one year (four editions) subscription for just $295—over 22% off the regular price.

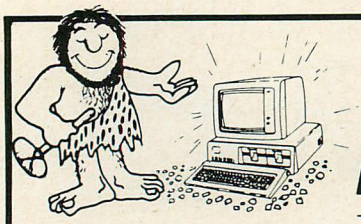
NEED IT FAST? WANT TO KNOW MORE? DON'T HAVE TIME TO SHOP AROUND?

INTRODUCING...



If you're like most system professionals you're up-to-date about the products in the PC marketplace. You're aware of brand and model differences, are informed about connectivity and compatibility problems, and you shop for competitive prices and fast service.

You're also probably among the many PC TECH JOURNAL readers who purchase by mail. That's why we're starting THE MART—PC TECH JOURNAL'S First Class Mail-Order Section.

Starting this month, and every month hereafter, you'll find the products you're looking for advertised in THE MART—and you'll benefit from the fast service and helpful support that identifies PC TECH JOURNAL advertisers.

If you're ready for First Class service, you're ready for THE MART.

From B C Associates —

NETWORKING FOR ONLY $99 A USER!

Yes, it's true, now you can take control of your data handling problems and implement your own PC local area network for only **$99.00** per station (plus software, power supply and cables).

Are you tired of carrying around a box of diskettes just to transfer information among your many PC systems in your office? You've probably looked into networks, but the high cost of such systems kept you away.

Now there's SimpleNET™. A truely low cost/ medium performance alternate to the high priced systems. SimpleNET uses a small interface module which attaches to your PC systems and a PC Network (DOS 3.x) compatible network BIOS program. The interface allows up to 32 users to be connected via a single interface cable with a maximum cable length of 1.2 kilometers (how about 4000 feet?). The software interface is compatible with DOS 3.x and the new PC Local Area Network Program available from your IBM dealer.

SimpleNET Basic System* — For up to 4 users

- Interface/Power supply module. (One power supply module is capable of driving 8 stations.)
- User Interface modules
- Cable Package
- Network BIOS Software
- Installation/Operations Manual

Only $695.00 Complete Additional user can be added for $99.00 each.

*Requires IBM PC/XT/AT or compatible with one available asynchronous communications port.

PROGRAMMERS AND SOFTWARE DEVELOPERS - LOOK AT THESE PRODUCTS!
NO ROYALTIES REQUIRED

ASMLIB
The Programmer's Library

- A Multipurpose set of over 200 Assembly Language sub routines supplied in the form on a linkable library.
- Virtual disk file hangling.
- Int. driven asynch. support.
- Graphics on EGA, herc. and CGA.
- Floating point math and trig routines with 8087 support.
- Installable keyboard activated programs are easily written with ASMLIB's special functions.
- Plus much, much more.
- Supplied with complete source code.

Only $149.00 Complete

asmTREE
The Programmer's B+Tree Data File Management System

- A complete single/ multiuser database management system written entirely in Assembly Language gives the Lattice "C" or Assembly Language programmer these capabilities.
- Up to 256 users.
- Up to 256 index and data files.
- Multiple key types.
- Multiple indices per index file.
- Duplicate and variable length keys.
- Virtual file handling
- Plus much, much more
- Supplied with complete source code.

Only $395.00 Complete

GenericGL - Generic general ledger package can be used by any program...UDS...$295.00

FSEdit - Full sreen edit package by UDS...$49.95

REALIA COBOL USERS!

FPLIB - Floating point library package with 8087 support and trig functions...$149.00

SMART COPY PROTECTION

Attention Software Developers, are you tired of Copy Protection that:
-is NOT transparent to the user.
-does not allow backups.
-requires I/O plugs or special media.
-doesn't support hard or cartridge disks.
-makes you pay for every disk protected.
-requires source code changes.
-can be beaten by hardware copy boards.
If so, EVERLOCK can solve these problems for only $495. Free info & demo disk available.

G★L★I★S★T★E★R™

The File Print Manager

Imagine . . . You are 53 pages into a 60-page listing and the printer starts to eat paper. No problem!

G★L★I★S★T★E★R can backspace up to 127 pages and then start printing again.

With **G★L★I★S★T★E★R,** you can build a list of up to 100 files to print, sort the list by file name or by extension, or order it in any way you wish. Your list of files prints much faster because **G★L★I★S★T★E★R** is NOT reloaded for each file printed.

G★L★I★S★T★E★R gives you control over:

Top, Bottom and Left Margins
Line and Page Length, Tab Expansion
Spacing Between Lines
Number of Copies of Each File
Layout and Content of Optional Heading and Footing Lines

and much, much more!

Save That SCREEN!

Do you immediately reach for the PrtSc key to save screen information? What a waste of time and paper! Now, ScreenSnap™ lets you save and recall up to 9 screens at the touch of a key.

Let's say you're in Lotus-123™ and you decide to save a screen. Just press the keys that you've assigned to the save and SNAP! it's done. Later, in your word processor, if you want to recall that screen, press the recall keys and the saved screen is up faster than you can blink.

The package also contains some useful utility programs for creating custom screens, saving and restoring screens from disk, printing saved screens. Also included is a programmer's interface to ScreenSnap.

12MHz SPEED . . .
. . . plus A MEGABYTE FOR DOS!

THEY ALL NEED NUMBER SMASHER/ECM™

Turn your PC or XT into the machine it should have been! The 12 MHz Number Smasher/ECM is the fastest accelerator on the market. It is also the most powerful, providing a **true megabyte** for DOS!

To break the 640K DOS barrier MicroWay designed a Memory Management Unit (MMU) that is tailored to DOS plus a 2000 byte resident driver – MegaDOS™. MicroWay calls this breakthrough Extended Conventional Memory. When you type CHKDSK with the board installed, your system will report 1,036,288 bytes total memory and 1,010,016 bytes free! Any conventional DOS program can utilize a full megabyte for data or *code* without changing a byte.

Downloading a mainframe application? ECM memory runs with any program that uses DOS for screen services including RM and MS FORTRAN and MS and LATTICE C! This means you have an additional 384K available for oversized applications. Programs which write directly to the screen require a simple patch to adhere to the new standard. MicroWay has already developed patches for the Lotus, WORDSTAR and AUTOCAD screen drivers. Release 1A of 1-2-3 jumps from 535,516 to 916,444 bytes available and runs faster than Release 2 for most worksheets.

Number Smasher/ECM is 100% compatible with all hardware and software including EMS and EGA boards. The compatibility is a result of control: its speed is switch, keyboard or software selectable from 4.77 MHz to 12.0 MHz. Applications which have not been upgraded to ECM can still be run by setting DOS to 640K or 704K and using the memory above DOS for I/O enhancers.

Number Smasher/ECM runs floating point bound programs faster than an AT or any other 80286 based machine. In fact, Number Smasher's 12 MHz 8087 runs a factor of three faster than the standard 80287 on the AT, delivering up to 125 kflops. Software is included for RAM Disk, print spooler, and disk caching, which speeds up floppy and hard disks by a factor of 2 to 10!

Number Smasher/ECM is the most cost effective productivity tool you can buy. The base board which runs at 9.54 MHz comes with 512K and costs only $599! The complete system which includes a motherboard accelerator, one megabyte of memory and a 12 MHz 8087 is just $1199. Call today to discuss your particular configuration. Remember: *"The advantage of buying from MicroWay is outstanding personal service."* (PC Magazine, 6/10/86 – p. 162)

FasTrak™: Backup made easy for the forward moving company

"Performance is excellent... it has speed and excellent drive diagnostics...one of the best..."
PC Tech Journal

"A smooth operator...in making file-by-file backups...(it) hardly ever stopped to catch its breath..."
PC Magazine

Sigma Designs introduces FasTrak, a revolutionary concept: powerful PC backup in a compact, portable design.

FasTrak delivers the power

Speed. At 5 MB/minute there's always time to FasTrak.

Performance. FasTrak backs up and restores data, reliably, consistently. With both image and file-by-file modes, and menu and command driven operation, FasTrak has all the flexibility you need.

Simplicity. Our on-line tutorial is acknowledged as the best in the business. And as to ease-of-use, ask any dealer!

Big things do come in small packages

FasTrak comes in two versions, so you can backup either 27 MB or 60 MB of data per tape. And since connecting it is so simple, FasTrak moves easily from PC to PC, or XT or AT.

It's all in the family

FasTrak carries on Sigma Designs' tradition of product excellence. For backup, storage, expansion, or all three, Sigma Designs the systems.

FasTrak. To keep *you* moving forward.
Call **(408) 943-9480** for the Sigma Designs dealer nearest you.
